JAN 3 1955 **SUMMARY-INDEX OF THE WEEK'S NEWS—January 1, 1955**

34,000,000 TV SETS NOW, and there's another great year ahead, with production & sales expected at 6-7,000,000, & more than \$1 billion telecasting business (p. 1).

DuMONT CURTAILS TO "MAIN LINE" NETWORK, reducing AT&T interconnections, cutting back staff, banking on emergence of more stations for full-scale revival (p. 3).

AMs ADD UP TO 2782 AT YEAR'S END, 138 more authorized during 1954; new AM-FM Directory also shows 583 FM grantees, down from last year's 602 (p. 5).

PHOENIX'S 4th VHF & PASCO UHF SATELLITE, plus limited operation of uhf KCEB, Tulsa, bring year-end total to 426 stations on air (p. 5).

FIRST STATION TO HIT FULL 1000-kw is uhf WBRE-TV, Wilkes-Barre; second is WILK-TV, Wilkes-Barre, striving for boost to megawatt on New Year's Day (p. 6).

MORE UHF STATIONS SHIFTING to lower channels; Fairbanks CP granted, while Albany battle goes to hearing and Flint grant is challenged (p. 7).

TRADE RIDING HIGH INTO 1955, with TV output near 1950 record and retail sales close to 7,000,000 in 1954; prospects for future are encouraging (p. 11).

INCREASE IN IMPORTS OF RADIOS & PARTS have a lot of U. S. manufacturers uneasy about potential competition from abroad; will seek tariff hike (p. 12).

COLOR-EQUIPPED STATIONS increasing rapidly, all CBS-TV & NBC-TV basics carrying network feeds, many equipping themselves for local color (p. 10).

NEW TV MODELS INTRODUCED by Admiral, DuMont, GE, Magnavox, Motorola, Trav-Ler, Westinghouse; Crosley cuts price of 10 "Super V" models (pp. 13-14).

MOTOROLA SIGNS PATENT LICENSE RENEWAL as RCA settles FM suit out of court with Maj. Armstrong's widow; status of other patent cases (p. 15).

NETWORK BILLINGS HIT ALL-TIME HIGH in Nov., according to PIB, which shows ABC, CBS & NBC set TV sales marks; 1954 billings to reach \$320,000,000 (p. 16).

YOU CAN EXPECT ANOTHER GREAT TV YEAR: TV enters its 9th year -- dating its commercial beginnings from the 16 stations on the air in 1947 and mere trickle of 178,571 receiving sets produced that year -- with some 34,000,000 sets in the hands of the American public. That's about 7,000,000 more than a year ago, and the prospect is that another 6-7,000,000 will be made and sold in 1955.

The New Year starts with 426 stations on the air and several dozen more being built, up 101 from year ago, with probability that 50-75 more will start in 1955.

Telecasting has ended a \$900,000,000 advertising year -- and there's good reason to expect the 1955 figure will go well over \$1 billion for time, talent and all other costs, thus representing more than 10% of the national advertising budget.

TV receivers, parts & service accounted for something like \$2 billion of the gross national product in the year just ended, should do as well or better in 1955, depending on consumer demand and the price structure. Product of whole electronics industry, of which TV is the keystone, is variously estimated up to \$10 billion.

* * * *

There you have a quick glimpse of the fabulous TV industry in general. But what about particular aspects? What's in store for 1955? Here are summaries of the best thinking of Television Digest's editorial staff on major trends & developments as we launch 11th volume in 10th year since publication of Vol. 1:1 on Sept. 1, 1945:

Telecasting: 101 stations went on the air in the U.S. in 1954 (25 of them uhf), latest being satellite in Pasco, Wash. (see p. 5). There are currently 179 CPs outstanding, and it's our guess that more than half of these will never be built -- unless uhf fortunes take a turn for the better. There are 175 new-station applications pending. It will be surprising if new starters in 1955 total as many as 100. Incidentally, Canada now has 24 stations, 15 of which started in 1954, and will very likely add this year the 7 holding CPs and possibly a handful more.

Film: More live network shows are preparing to switch to film, though it's noteworthy that of ARB's "Top 10" for Dec. (p. 9) only 4 were filmed. Biggest film

news in 1955 will be wide-scale increase in top shows syndicated to topnotch stations for placement in prime hours -- the first emergence of long-heralded "film networks." Even DuMont Network may turn to teletranscription mainly (see p. 3). The trend is toward consolidations among top producers & syndicators, making for group of select "majors" as in the motion picture industry. Good feature films will command big prices, leading movie majors to re-examine their policy of withholding backlogs from TV. Relaxation of major producers' stiff-backed opposition to release of old films may be triggered not only by high prices but by fact that imminence of color reduces value of oldies; that General Teleradio's "Million Dollar Movie" package, bought from Bank of America, is clicking around country; that Walt Disney is releasing his features on his ABC-TV Disneyland show; that Republic has released a batch of 27 high-budget films made in the '40s. Video tape recording will emerge from the lab in 1955, but practical use of it will be limited to on-the-job field-testing by NBC.

* * * *

UHF: 1954 was a tough year, 31 outlets having quit operating, all of them for economic reasons. Three resumed operation, but year ended with fewer uhf on the air (121) than when it began despite fact 25 started. Uhf woes won't end in 1955 and there will be more mortalities, but a few more established stations in good markets should turn the profit corner. Great boost to uhf will come from big-interest operations like Storer's in Portland, Ore. & Miami, CBS's in Milwaukee, NBC's in 2 as yet undisclosed cities. Some uhf may switch to satellite or quasi-satellite operation. Some well-heeled operators will go to maximum 1000-kw power., Uhf operators will continue to clamor for de-intermixture in selected areas, but may not get any further with FCC this year than last -- albeit pressures from Congress will increase for a rejuggle of allocations to protect uhf areas from vhf or else switch uhf to vhf.

UHF Receivers: Approximately 1,250,000 uhf-equipped sets were produced in 1954, about 17% of total output, compared with 1,460,000 in 1953 (20%). Together with 2,190,000 field conversions in 1953 and estimated 1,300,000 in 1954, the uhf-equipped sets now total around 6,000,000. Several new developments in uhf tuner design, leading to better and cheaper tuners, can be expected in 1955, with probable reduction of price differential between vhf-only & vhf-uhf sets and resultant increase in "circulation". How great the increase is, will determine to large extent the success of uhf stations in 1955.

Color: Majority of TV homes will be within reception range of network colorcasts in 1955, and a sizeable percentage of TV homes will be in range of locally-originated color, live & film. Network color originations will increase, including feeds from west coast and some "spectacular" remotes. Rate of set production and sales may remain disappointingly low this year, probably well under the 200,000-to-400,000 predicted by industry leaders -- barring some now-unforeseen technical and production developments making possible prices under \$500. Quality and simplicity of color sets will improve steadily and significantly, with greater brightness, stability, registration, resolution, contrast, etc. No important change in picture size (21 & 22-in.) can be expected. Important developments are likely in studio equipment, possibly including emergence of the single-tube camera chain. Color film producers will start coming into their own as stations with film cameras begin to demand their product.

* * * *

Govt. Regulation (FCC): Chairman McConnaughey, his confirmation held up in last Congress, will be renominated by President Eisenhower and confirmed by Senate after minor objections & delays. Comr. Hennock is unlikely to be reappointed, and there's good chance of another woman Democrat getting her place in June. "Protest" provision of Communications Act will be modified by Congress -- at least, legislative wheels to that end will start rolling. FCC will have to spend a lot of time in court defending decisions in TV cases; it will win most court decisions, as in past. FCC will continue the "free enterprise" philosophy expressed by McConnaughey and others, with less and less actual interference with station operations. There will be some exceptions, such as inquiries into "overcommercialization" which will be more persuasive than dictatorial. Effort will continue to streamline FCC procedures, cut down on paper work required of stations.

Govt. Regulation (Congress): Investigation fever will continue to run high despite change in control of Congress. Senate Commerce Committee under new chairman, Sen. Magnuson (D-Wash.), will probably continue network-uhf probe begun by Bricker (R-Ohio), but with change in emphasis because of diminished influence of the investigation's GOP counsel, ex-FCC Comr. Robert F. Jones. Some of Potter subcommittee's recommendations may be revived -- cutting excise taxes on uhf-equipped sets, and an ad hoc committee to study uhf & allocation problems. Sen. Kilgore (D-W.Va.) will run into jurisdictional dispute between his Judiciary Committee's proposed TV-radio monopoly probe and Commerce Committee's inquiry -- and scope of Judiciary probe will be narrowed or the 2 investigations will be "combined" under aegis of Commerce Committee. House Commerce Committee, under new chairman Rep. Priest (D-Tenn.), will be more active in TV-radio matters than was its predecessor. But best bet still is that no far-reaching TV legislation will be passed during the 1955 session.

* * * *

Subscription TV: Start of rule-making on pay-as-you-look in next few weeks is virtually certain. FCC is likely to couch its proposal in exceedingly general terms, throwing whole matter open to comments, picking the industry's brains. Oral hearings are possible some time this year -- but they're not likely to be nearly so protracted as were the color hearings. Commission will look to Congress for guidance on basic question -- "to pay or not to pay." Decision this year is improbable.

Boosters & Satellites: Commission will finalize current proposal to allow 100-watt satellites, probably also start rule-making on low-power boosters. After satellite proposal is finalized, installation of satellites will be gradual -- slower than many expect, because costs will be greater than many think.

Microwave-Cable Facilities: FCC will liberalize conditions under which TV stations may build own microwaves, resulting in booming construction of many individual links. AT&T will offer "utility grade" of interconnection service for new small-station towns, at considerably lower cost than present service. Compared with past years, AT&T will extend service to relatively few new areas, having completed most of its basic network.

Educational Stations: The infant educational TV took its first steps in 1954 and 10 stations went on the air, one going off; total at year's end was 11 and at best another 15 will start in 1955. Slowly and not-too-surely, educational TV may eventually find its niche and achieve stability -- but it's still subject to the caprices of the political winds, particularly in state legislatures, which usually hold pursestrings too tightly to permit real growth.

Community Antennas: They'll continue growing, but at somewhat slower rate, while potential operators keep close eye on boosters and satellites, sweating out caprices of state utilities commissions and battling excise taxes.

Trade Developments: See Trade News section (pp. 11-12).

DuMONT CURTAILS TO 'MAIN LINE' NETWORK: Can the DuMont Network survive the loss of its main fiscal prop, the highly profitable WDTV, Pittsburgh (Ch. 2) which has been sold to Westinghouse (Vol. 10:49) for the unprecedented sum of \$9,750,000?

Dr. Allen B. DuMont thinks that it can -- and the explanation of this week's drastic curtailment of AT&T interconnections and severe cutbacks in staff is that it's "merely a temporary tightening of our belts."

Also hinted is a new "technological development," unexplained but presumably having to do with teletranscriptions; this would seem to indicate plans to expand in film fields, though it's denied there's any intention of becoming a film syndicate.

Though the network has never made money despite increased billings, and has been supported largely by the 3 DuMont-owned stations (other 2 are in N.Y. and Washington), its operators are still convinced there's an economic basis for a fourth national network, as in radio. This is a point of dispute along Madison Avenue's advertising row because of the high cost of telecasting time.

Moreover, it requires at least 4 stations in a market to justify a competitive structure and, as of now, as DuMont director Ted Bergmann points out, only 14 of the

top 148 markets have as many as 4 stations. Worse than that, 27 markets have only 3 stations, 55 have only two, 39 have only one, 13 have none. Small-market stations, still relatively few, aren't as much in demand by the national advertiser.

As and when more stations are built, as and when uhf wins its rightful place in the TV sun, another network ought to be able to get along -- and DuMont appears to be banking on just that. Whether new construction or the juggling of channel assignments by Washington brings it about, this is the cue to DuMont's thinking:

"In 1954," said Bergmann recently before an advertisers' convention, "the fourth vhf station started telecasting in such important markets as Detroit, Minneapolis and Denver, and 1955 shows promise of increased numbers of stations in cities like Boston, Pittsburgh, Toledo, St. Louis, New Orleans and many others. In addition, some inadequately covered markets are now being opened up by outside stations -- KOVR in Stockton, Cal., for example, is covering the San Francisco area, and plans are afoot to cover Pittsburgh from Steubenville, Ohio."

* * * *

Whatever its hopes and plans -- and the next few months should prove or disprove its theories -- the facts about this week's DuMont actions are these:

Whereas the network has been engaging AT&T lines as far west as Kansas City and south to Atlanta on the customary contract basis of \$39.50 per mile per month, 8 hours per day minimum, interconnecting up to 188 stations, spending about \$175,000 a month, it will now contract only for a "main line" hookup of these cities: New York, Philadelphia, Baltimore, Washington, York, Harrisburg, Altoona, Johnstown, Columbus, Pittsburgh, Cincinnati, Cleveland, Youngstown, Windsor (Detroit) and Chicago. That means 15 stations plus some off-the-air feeds to other affiliates from these stations.

The rest of DuMont's 213 affiliates will be served, as many already are, by teletranscriptions as ordered by the sponsor. If an advertiser wants a bigger live network and station time can be cleared, AT&T lines will be ordered on so-called "occasional basis," for which the AT&T rate is \$1.15 per mile per hour. That's how Bishop Sheen, for example, can be continued live to some 70 stations; how occasional sports events, in which DuMont has specialized, can be continued. Only last week it interconnected 187 stations for pro grid championship from Cleveland; it's also carrying Shrine's annual East-West football game from San Francisco New Year's Day and big Pro Bowl game from Los Angeles Jan. 16.

It's estimated that line costs are being cut to about \$70,000-\$80,000 per month -- more than halved. Besides that, staff cutbacks will be considerable -- notably engineering, production & office employes.

Fact is that DuMont Network has never utilized all its 8 hours per day on the whole 188-station hookup. It has been feeding out only 20-22 hours of programs per week, clearing time for all of them on only its own 3 stations, for most of them on such major affiliates as Chicago's WGN-TV and Baltimore's WAAM. Varying hours were taken by other stations, especially those also having affiliations with another network or networks. This scant budget of shows is being further reduced by loss of the American Chicle-Geritol co-sponsorship of "Rocky King, Detective" and by cancellation of Consolidated Cosmetics Co.'s "They Stand Accused." These losses doubtless hastened the decision to curtail.

* * * *

DuMont has had plenty of offers to buy both New York & Washington stations, but won't consider their sale -- yet. There's also talk, which DuMont spokesmen insist is merely talk, that Paramount Pictures might be willing to liquidate its 25.5% interest in DuMont (which enjoys a flourishing TV set, tube and electronics manufacturing business) if the network and its 2 remaining stations are turned over to it. Paramount already has a TV station in Los Angeles, KTLA, which operates quite successfully as an independent.

Entirely rejected is the suggestion that the new Vitapix-Guild film syndicate combine might merge with DuMont. Guild Films' Reub Kaufman is known to hanker after DuMont's splendid New York studios, and for a while Bergmann considered joining his 2 stations in the Vitapix plan calling for fixed time clearances for its films.

Dr. DuMont pioneered network TV, as he did the set & tube field, only to see more aggressive later comers like CBS & ABC come along and forge ahead of his network. Yet he's obdurate in wanting to be identified with the telecasting side of the business, rather than manufacture alone. And he believes time is on his side as TV surges to No. 1 advertising medium and as demand for more facilities is created. His present purpose seems to be to sweat out as much time as cheaply as possible.

AMs MULTIPLY, TOO—2782 AT YEAR'S END: TV's tremendous commercial upsurge during 1954 did not prevent AM from increasing its ranks also -- in fact, there were more new radio stations authorized during year (exactly 138) than there were new TV starters (101). This surprising fact is disclosed in a statistical recapitulation of our 1955 AM-FM Directory, which comes off presses in about 2 weeks. The oft-predicted decline of AMs simply hasn't happened -- and FM's drop has been slight.

Actual figures are these: Total AMs authorized at end of 1954 were 2782, of which 2662 were licensed and on the air and 120 still CPs. On same 1953 date, total was 2644, of which 2514 were licensed and on the air and 130 were CPs. Thus there hasn't been a year since the wartime freeze ended that AM didn't add to its ranks: At end of 1952, total was 2516; 1951, 2410; 1950, 2351; 1949, 2246; 1948, 2131; 1947, 1961; 1946, 1579; 1945, 1056. Most of the newcomers are local or daytime stations.

FM grantees totaled 583 at end of 1954, of which 549 were on air. Year ago total was 602, with 550 on air. During last year, 37 FM licenses and 2 CPs were dropped. At end of year, only 11 applications for new FM stations were pending.

The 1955 AM-FM Directory (loose-leaf & punched for binding, carrying no ads, cost per extra copy \$7.50) also lists all applications for new AM stations pending as of Dec. 31. These totaled 174, as against 207 year before. Dropped during 1954 were 9 AM licenses, 13 CPs.

Canada's radio stations increased to 197 from 191 during year, Mexico's to 443 from 420; Cuba's to 135 from 121 -- all listed with addresses, facilities, etc.

TWO MORE STARTERS MAKE ON-AIR TOTAL 426: Phoenix's 4th vhf station and the Yakima uhf satellite in Pasco, Wash. got going this week -- these and the announced resumption of Tulsa's KCEB (Ch. 23) on limited basis bringing year-end total to 426 on air (121 uhf). At press time, FCC had not yet been notified that oilman Elfred Beck's uhf, which got permission to suspend for 6 months due to economic troubles (Vol. 10:49), was back in operation but he writes us: "We are at present continuing operations on a limited film schedule and present plans are to continue with this limited operation until reorganization plans are completed." Week's new starters:

KTVK, Phoenix, Ariz. (Ch. 3) began test patterns Dec. 24, plans commercial debut Jan. 15 as independent. It has 25-kw RCA transmitter with 100-kw visual ERP, 125-ft. Allison tower with 6-bay antenna on 2655-ft. Salt River Mt. Ex-Senator, now Gov. Ernest W. McFarland owns 40%, heading group which includes v.p.-gen. mgr. Ralph A. Watkins, 20%; Leon M. Nowell, 20%; Ed Cooper, 20%. Sean Dillon, ex-ABC, is operations & program mgr.; James E. Overpeck, sales mgr.; Robert Latham, chief engineer; Ray Gallagher, senior producer. Base rate is \$300. Rep is Weed.

KEPR-TV, Pasco, Wash. (Ch. 19), first satellite to be authorized by FCC, began operation Dec. 28, feeding Kennewick-Pasco-Richland area with programs from Yakima's KIMA-TV (Ch. 29). It uses 1-kw GE transmitter, 300-ft. Fisher tower with 5-bay helical antenna on 1730-ft. Badger Mt. M. Dow Lambert, ex-KING-TV, Seattle, is in charge of the operation, which is manned by himself and one other engineer. KIMA-TV has increased base hour from \$200 to \$300 for combined operation. Rep is Weed.

* * * *

Note: Danville, Va.'s only TV station, WBTM-TV (Ch. 24) announced this week "heavy financial losses and a lack of advertising revenue" would force it off air on Dec. 31. Following announcement, a community-wide "save our station" movement was organized, according to v.p.-gen. mgr. Edward G. Gardner Jr., aimed at guaranteeing station enough advertising contracts to insure operation for next 12 months. As we went to press, station's future was still in balance, pending tally of new contracts.

Personal Notes:

Walter Craig, who resigned as v.p. of Benton & Bowles in Jan. 1952 to become v.p. & adv. director of Pharmaceuticals Inc., handling Serutan, Geritol, R.D.X. & Hi-V Orange Juice accounts, joins William H. Weintraub & Co. Jan. 18 as TV-radio v.p.; at Benton & Bowles, he directed the Procter & Gamble, General Foods, Best Foods, Crosley, Prudential, among other accounts; v.p. Wm. Weintraub Jr. and TV-radio v.p. Harry Trenner reported resigning, with Elkin Kaufman to become pres. and Wm. Weintraub Sr. chairman . . . Tom Slater, ex-v.p. & TV-radio director, Ruthrauff & Ryan, joins Fuller & Smith & Ross as director of TV-radio section of film-radio-TV dept. in Cleveland, with David G. Adams, ex-director of the dept., heading new film-visual communications section . . . Adolph J. Toigo elected pres. of Lennen & Newell, succeeding late H. W. Newell; Toigo is succeeded as exec. v.p. by Thomas C. Butcher, senior v.p. . . . Mike Shapiro, recently with Avery-Knodel's Chicago office and ex-asst. mgr. of KDUB-TV, Lubbock, Tex., on Jan. 1 becomes commercial mgr. of WFAA-TV, Dallas, succeeding Terry Lee, who becomes v.p. & gen. mgr. of Hoffman Radio's KOVR, Stockton, Cal. . . . John H. Smith Jr. resigns as mgr. of NARTB public affairs to join Chrysler Corp., Detroit, as supervisor of new public relations projects . . . Paul Jensen promoted to program director of KOLN-TV, Lincoln, Neb., succeeding Wm. E. Lucas; Wm. Hemke replaces Jansen as production director . . . George Flax, ex-WTTG, named Washington editor of *TV Program Week*, new weekly magazine to be published by Curtis Circulation Co., first issue due about Jan. 10 . . . Jack Gillman named mgr. of Chicago edition of *TV Guide Magazine*, succeeded as Detroit mgr. by Kenneth Armstrong, ex-Philadelphia; Ben Miller, from Washington-Baltimore edition, named Texas mgr., Houston . . . Bill Lucas named program director of KTIV, Sioux City, Ia. with Max Schindler, production director . . . Peter K. Onnigian named chief engineer of upcoming KBET-TV, Sacramento, Cal. (Ch. 10), due in Feb. . . . Hazel Markel, newscaster & Washington columnist, appointed associate producer in charge of TV-radio activities for Theodore Granik's *American Forum* and *Youth Wants to Know* . . . Frederick Crawford named v.p. in charge of marketing surveys and TV-radio sales promotion, John Shrager Inc., N. Y. . . . Jane Daly, TV-radio director of Earle Ludgin & Co., Chicago, elected v.p. . . . Wm. Hollenbeck quits as program director of KOVR, Stockton, to become studio mgr., KFSD-TV, San Diego . . . Edward F. Glacken, ex-WBOC-TV, Salisbury, Md., joins new WFMZ-TV, Allentown, Pa., as director of program operations . . . George J. Kapel, recently gen. mgr. of U of Missouri's commercial KOMU-TV, Columbia, Mo., named sales mgr. of upcoming new KBET-TV, Sacramento, Cal. . . . Lee Savin, ex-exec. v.p. of UTP, assumes similar position with Gross-Krasne Inc. . . . Charlie Stone promoted from sales v.p. to v.p. in charge of WMBR-TV, Jacksonville; radio sales mgr. Dave Booher also promoted to v.p.; both report to pres. Glenn Marshall Jr. . . . Kenneth H. Baker, who left NARTB as research director several years ago to set up Standard Audit & Measurement Services Inc., joins Market Research Corp. of America as v.p. in charge of research studies.

Washington law partners Norman E. Jorgensen & Seymour Krieger have applied for their third radio CP, station to be built in Herkimer, N. Y. (1-kw daytime, 1420 kc). Each holds 40%, Louis Adelman, Trans-World Productions Inc., New York TV film producer, holding 20%. They also hold 42% each of Broadcasting Inc., which operates WSBB, New Smyrna Beach, Fla. (250-watts, 1230 kc), and is building WLCO, Eustis, Fla. (250-watts, 1240 kc).

Senator Assis Chateaubriand, the Brazilian TV-radio station and newspaper owner, arrived in N. Y. this week.

FIRST MILLION-WATT TV transmissions began at 3:15 a.m. Dec. 31 from NBC-basic WBRE-TV, Wilkes-Barre, Pa. (Ch. 28), and second station to achieve 1-megawatt was planning to go to full power next day—ABC-basic WILK-TV (Ch. 34), also in Wilkes-Barre. WBRE-TV achieved the full 1000-kw power after completing antenna installation and de-icing operations on afternoon of Dec. 30. WBRE-TV's installation is RCA 25-kw transmitter with new 46-gain antenna. WILK-TV is using GE 45-kw transmitter, 25-gain helical antenna (Vol. 10:50-52).

"Mt. Higby mystery" (Vol. 10:51) was still unsolved this week, but best guessing was that NBC is the unidentified lessee of 3-acre tract on high point at Middletown, Conn., about halfway between Hartford & New Haven, and will soon seek uhf channel for new 1000-kw uhf station there. NBC engineers meanwhile have completed uhf survey of San Francisco area. Network's uhf plans are expected to be made known momentarily.

* * * *

Only shipments reported this week were GE 50-kw amplifier to WCPO-TV, Cincinnati (Ch. 9), 12-bay batwing antenna to U of Illinois' upcoming WTLC, Champaign-Urbana (Ch. 10) and all remaining transmitter parts for WILK-TV's boost to 1000-kw. From principals of upcoming TV stations, these are latest reports:

WCBI-TV, Columbus, Miss. (Ch. 4), previously reporting "early 1955" target, now is negotiating for 500-ft. tower which it hopes to have ready by May 1, according to gen. mgr. Bob McRaney. RCA 5-kw transmitter is on hand, but antenna has not yet been ordered. Station plans to ask for site change to Hwy. 12, four mi. NNE of city at new location of radio WCBI. Signed as CBS affiliate under new Extended Market Plan, it also seeks other network affiliation. Owner Birney Imes Jr., who turned in Ch. 28 CP last May, publishes *Columbus Commercial Dispatch* and controls WCBI and 5 other Miss. radio stations. Base rate not set. Rep will be McGillvra.

KCOR-TV, San Antonio, Tex. (Ch. 41), which recently asked for Ch. 14 allocation, now doesn't expect to get on air with test patterns until mid-March, plans mid-April programming, reports chief engineer Marvin L. Fiedler. Delivery date hasn't been set for 1-kw RCA transmitter, nor has work begun on Emsco 406-ft. tower and RCA antenna. It plans to be all-Spanish outlet, using films and kines from Mexico and other Latin-American countries, as well as U. S. Nathan Safir, from radio KCOR, will be gen. mgr. Base hour will be \$250. Rep will be Richard O'Connell.

* * * *

CBOFT, Ottawa, Ont. (Ch. 9), first Canadian TV with 5-letter call (and first such in North America without hyphen), won't be on air until next summer due to equipment delays. CBC will operate it as French-language outlet, using same studios and same transmitter setup as companion CBOT (Ch. 4), which will switch to all-English. Initial CBOFT programming will be network only. In Montreal, CBC setup is similar, with CBFT (Ch. 2) as French-language, CBMT (Ch. 6) English.

KDRO-TV, Sedalia, Mo. (Ch. 6) this week asked FCC permission to leave air Dec. 31—then changed mind and told Commission it will reduce programming to 2 hours daily beginning Jan. 1. Non-interconnected non-network station is undergoing financial reorganization, according to spokesman for owner Milton Hinlein.

WGBS-TV call letters are now being used by Storer's Ch. 23 Miami outlet, telecasting from temporary Ft. Lauderdale location formerly occupied by WFTL-TV, whose physical facilities and channel WGBS-TV has taken over (Vol. 10:47, 51).

SHIFTS OF UHF stations downward in frequency, requested more and more often nowadays, aren't what FCC would like—but it continues to authorize them because it's apparent that alternative is even greater uhf mortality.

FCC's concern about trend is based on fear that paucity of stations on higher channels will discourage receiver and transmitter makers from improving equipment—leading to general abandonment of large chunk of TV spectrum.

Three more uhf CPs have been turned in, meanwhile: WJOL-TV, Joliet, Ill. (Ch. 48); WJLB-TV, Detroit (Ch. 50); WSBM-TV, Saginaw, Mich. (Ch. 51).

Taking cue from FCC's action in granting WMGT, Adams, Mass. shift from Ch. 73 to Ch. 19, giving it "show cause" order insuring that station would get the channel, other stations are making similar requests. WLOK-TV, Lima, O. (Ch. 73), soon to become WIMA-TV following sale (Vol. 10:52), has asked shift of educational Ch. 14 from Oxford, O. WWLP, Springfield, Mass. (Ch. 61), wants to go to Ch. 22, submitting channel-shifting plan involving substitution of Ch. 36 for Ch. 22 in Providence and Ch. 38 for Ch. 50 in Boston, deletion of Ch. 36 from Northampton, addition of Ch. 61 to Easthampton.

A geographical and channel shift is requested by WKST-TV, New Castle, Pa. (Ch. 45). Having lost \$70,000 to date, it told FCC it believes it can make out in Youngstown, get a network affiliation there. It asks permission to move to Youngstown with Ch. 45 transmitter, shifting Youngstown's Ch. 73 to New Castle.

Search for vhf channels continues, too. E. Anthony & Sons, one-time holder of CPs for WBOS-TV, Boston (Ch. 50) and WTEV-TV, New Bedford (Ch. 28), petitioned for allocation of Ch. 6 to Nashaquitsa, Mass.

Meanwhile, Commission granted one of its now-infrequent CPs, giving Ch. 11 to Northern TV Inc., Fairbanks, Alaska (A. G. Hiebert, pres., principal stockholder). One initial decision was rendered, examiner Charles Frederick choosing Beachview Broadcasting Corp. over WAVY, for Norfolk's Ch. 10. He found the 2 generally equal, but

frowned upon action of 50 WAVY stockholders in giving control of their stock (37.4%) to 11 voting trustees. Pres. and 77.77% stockholder of Beachview is optometrist Dudley Cooper; secy. and 10% stockholder is Irvin M. Kipnes, one-time reporter (including stint on *Broadcasting-Telecasting Magazine*) and ex-mgr. of radio WCAV, Norfolk, and other stations. Pres. of WAVY group is Hunter C. Phelan (food store chain); v.p. is Carl J. Burkland, former mgr. of WTOF, Washington, ex-gen. sales mgr. of CBS Spot Sales.

Battle between WTRI and WROW-TV, Albany, N. Y. (Vol. 10:51), will be settled by hearings, FCC decided this week, setting en banc oral argument for Jan. 24, with evidentiary hearing before an examiner to come later. Commission turned down WTRI's request that sale of WROW-TV to Lowell Thomas group be held up.

Oral argument will be on whether Thomas group's ownership of WROW-TV would violate rules on station ownership by network personnel and whether affiliation arrangement between WROW-TV and CBS violates anti-trust laws. Hearings will be on allegations of "secret agreement" on affiliation between the two, possibly also on matters considered in oral argument.

Fight over grant of Ch. 12, Flint, to Detroit's WJR, hasn't let up, either. Defeated applicants WFDF, Flint (Bitner) and Butterfield Theatres filed joint petition for further hearing, charging that grantee WJRT has completely changed plans from those it advanced during hearing—moved site 44 mi., renting studios rather than building, affiliating with CBS rather than DuMont, changing stock ownership, changing program plans, etc.

On allocations front, off-air WTOV-TV, Norfolk (Ch. 27), seeking assignment of Ch. 13 to area, challenged propagation data of WAAM, Baltimore (Vol. 10:51), stating that it wasn't timely filed, is incorrect and based on insufficient measurements. Even if data were correct, WCOV-TV said, FCC should stick to its 170-mi. co-channel separation in Zone I because of need for more stations there.

Midnight Sun Bestg. Co.'s \$100,000 purchase of KFIA, Anchorage (Ch. 2) and CP for KFIF, Fairbanks (Ch. 2) from Richard R. Rollins, in deal whereby Rollins retains approximately 19% (Vol. 10:47), was approved by FCC this week. Midnight operates 4 Alaskan radio stations, has as majority owner Lathrop Co., operator of theatres in Anchorage and Fairbanks. Other transactions approved: (1) Transfer of WAYS-TV, Charlotte, N. C. (Ch. 36), to local advertising man Hugh Deadwyler for token \$4; radio WAYS is not involved (Vol. 10:51). Sellers are G. W. Dowdy, B. T. Whitmire, J. Horton Doughton & Harold H. Thoms, latter also owning uhf WISE-TV, Asheville. (2) Transfer of CP for KBAY-TV, San Francisco (Ch. 20) from Lawrence Harvey to Bay Television, in which Dr. & Mrs. Leonard Averett are equal partners (Vol. 10:45). Averetts are to contribute \$200,000 each to partnership.

KNUZ-TV, Houston (Ch. 39), which went off air last June after 8 months deficit operation (Vol. 10:27), filed this week for extension of CP for 6-12 months while it considers plan to return to air from studios of radio KNUZ. Letter with application revealed uhf station had lost total of \$300,000, at rate of \$18,000-\$40,000 a month.

Talk of moving all or some vhf stations into uhf, because of military requirements, is discounted by FCC chairman George McConaughy, who also views with skepticism the reverse—getting more vhf from the military.

Edward Lamb hearing will resume Jan. 18, by agreement between counsel for Lamb and FCC broadcast bureau, instead of Jan. 4 as previously announced.

"TV Assignment Rules & Policies" is title of paper to be delivered Feb. 1 by FCC Broadcast Bureau chief Curtis Plummer, during Jan. 31-Feb. 4 AIEE meeting in New York's Statler and Governor Clinton Hotels. Other papers same day, in addition to several on color (Vol. 10:52): "UHF Wave Propagation," by Robert P. Wake-man, DuMont; "Performance of Sectionalized Broadcasting Towers," by consulting engineer Carl E. Smith, Daniel B. Hutton, FCC & Wm. G. Hutton, Goodyear Aircraft Corp.; "TV Receiver Signal Overload," by C. Masucci, CBS-Columbia.

Network service was extended by AT&T to 4 stations over Xmas week end: WFIE, Evansville, Ind.; WEHT, Henderson, Ky.; WBTW, Florence, S. C.; WSFA-TV, Montgomery, Ala. WWTV, Cadillac, Mich., is now getting network service via its own 3-hop private microwave from Kalamazoo. Next on AT&T's hookup list are WEAT-TV, W. Palm Beach; KLRJ, Henderson, Nev.; KEYD-TV, Minneapolis.

R. W. Miller, asst. operations director of AT&T long lines dept., promoted to asst. v.p. in charge of new group to promote use of all long-distance services. Beverly H. Swango replaces Miller. John C. Marsh is promoted to asst. v.p. in charge of personnel for new group; Wm. J. Whittaker succeeds Marsh as asst. treas.

FCC meeting on pay-as-you-look TV will probably come week of Jan. 10, starting wheels moving toward rule-making on subject. Previously, Jan. 3 had been set for meeting, but too few commissioners are expected to be in town then.

Station Accounts: Spot TV billings in 7 categories—detergents, toilet soaps, shortenings, margarines, dentifrices, home permanents, shampoos—exceeded spot radio by nearly 5-to-1 in third quarter 1954, overturning radio's slight lead over TV in third quarter 1953, according to report this week of N. C. Rorabaugh Co., 347 Madison Ave., N. Y. Spot TV expenditures in those categories in third quarter totaled \$6,385,654 vs. radio's \$1,476,796; in same 1953 quarter spot TV totaled \$2,963,951 vs. radio's \$3,105,566. For 15-month period from July 1, 1953 to Sept. 30, 1954, TV billings were \$25,033,198 vs. radio's \$11,632,460 in those categories . . . National Biscuit Co. to sponsor weekly 30-min. filmed *Sky King* in about 25 markets starting in Jan., thru McCann-Erickson . . . White King Soap Co., Los Angeles, for its new "D" detergent, to use heavy TV spot campaign in all major western markets starting in Feb., thru Jim Morgan Co., Hollywood . . . Carter Products (Carter's liver pills) to use 125 TV markets in 13-week spot campaign starting Jan. 3, thru Ted Bates . . . National Brush Co., Aurora, Ill., to introduce its new "Sno-Chaser" snow removal brush for motorists, uses one-min. spots in several stations across nation only on snowy days, thru Charles O. Puffer Co., Chicago . . . Producers Livestock Marketing Assn., Salt Lake City, pleased by results of 4-month spot campaign in Utah this year to promote lamb consumption, expands budget for bigger promotion in 1955 . . . Among other advertisers currently reported using or preparing to use TV: Ore-Ida Potato Products, Ontario, Ore. (frozen potato products), thru Sidney Garfield & Assoc., San Francisco; Bissell Carpet Sweeper Co., Grand Rapids, Mich., thru N. W. Ayer & Son, Chicago; Botany Mills, Passaic, N. J. (Botany lanolin cosmetics), thru Hirshon-Garfield, N. Y.; Autoyre Co., Oakville, Conn. (bathroom-kitchen closet accessories), thru Ben Sackheim, N. Y.; Lux Clock Mfg. Co., Waterbury, Conn., thru Edward Graceman & Assoc., Hartford; O'Donnell-Usen Fisheries Corp., Boston (Taste O'Sea fish), thru Arnold & Co., Boston; Hanover House, N. Y. (publishers), thru Lewin, Williams & Saylor, N. Y.; Harper Products, N. Y. (Appedrin weight reducer), thru Duane Jones Co., N. Y.; Pez Haas Inc., N. Y. (PEZ candy with own dispensing unit), thru Wesley Assoc., N. Y.; Porter-Cable-Machine Co., Syracuse (saws, sanders, planes).

Network Accounts: Changing concept of network sponsorships, in which rival companies sponsor same program, may be heralded by announcement that 3 soap companies have bought 15-min. segments of NBC-TV's *Ding Dong School* (Mon.-thru-Fri. 10-10:30 a.m.)—albeit for non-competing products. The companies are Procter & Gamble, for its pin curlers; Colgate, for toothpaste; Manhattan Soap Co., for its Sweetheart soap. It's a by-product of the ever-increasing diversification of many large corporations, of course, but it's inspiring what *Variety's* George Rosen calls "some unprecedented shenanigans" in sponsorship concepts. Only a year ago, writes Rosen, anyone who suggested such affinities would be "railroaded out of the business so fast that he wouldn't know what had happened to him" . . . H. J. Heinz Co. to sponsor *Captain Gallant of the Foreign Legion* on NBC-TV starting Feb. 13, Sun. 5:30-6 p.m., thru Maxon Inc.; Hallmark will cut back its current 5-6 p.m. *Hallmark Hall of Fame* drama to 5-5:30 . . . Brillo to sponsor *Star Tonight* on ABC-TV starting Feb. 3, Thu. 9-9:30 p.m., thru J. Walter Thompson . . . Revlon to sponsor *Pantomime Quiz* on ABC-TV starting Jan. 2, Sun. 9:30-10 p.m., as replacement for *What's Going On?*, thru Sullivan, Stauffer, Colwell & Bayles . . . Bristol-Myers to replace Parker Pen Co. as alt. sponsor (with Singer Sewing Machines) of *Four Star Playhouse* on CBS-TV starting Jan. 30, Sun. 9:30-10 p.m., thru Doherty, Clifford, Steers & Shenfield . . . Plymouth to sponsor Mon. & Wed. segments of *Camel News Caravan* (to be renamed *Plymouth News Caravan* for those days) on NBC-TV starting in Jan., Mon.-thru-Fri. 7:45-8 p.m., thru N. W. Ayer . . . DuMont Labs sponsors East-West football game from San Francisco New Year's Day on DuMont starting at 4:45 p.m., thru Campbell-Ewald . . . Bissell Carpet Sweeper Co. buys 4 part. a week on NBC-TV's *Today* and *Home* starting Jan. 3, thru N. W. Ayer . . . Dutch Masters Cigars and TV Guide sponsor programs before and after Orange Bowl on CBS-TV New Year's Day, thru Erwin, Wasey & Co. . . Philip Morris, which recently got Procter & Gamble as alt. sponsor for *I Love Lucy* (Vol. 10:46), seeks alt. sponsor for *Public Defender* on CBS-TV Thu. 10-10:30 p.m. . . ABC-TV to present weekly country-&-western show from Springfield, Mo., starting Jan. 22, Sat. 9-10 p.m.

Rate increases: WXEL, Cleveland, has raised base hour from \$1250 to \$1700, min. \$300 to \$375; KSD-TV, St. Louis, adds new 6:30-10:30 p.m. daily Class AA \$1200 hour, \$200 min., Class A remains \$1000; KENS-TV, San Antonio, adds 7-9:30 p.m. Mon.-Sat. & 6-9:30 p.m. Sun. Class AA \$700 hour, \$140 min., Class A remains \$600; KWTW, Oklahoma City, adds 7-10 p.m. daily Class AA \$700 hour, \$140 min. Class A hour drops from \$600 to \$560, min. \$120 to \$112; WKZO-TV, Kalamazoo, raises base hour from \$800 to \$900, min. \$150 to \$170; KTNT-TV, Tacoma, Wash., from \$625 to \$700 & \$135 to \$150; KOIN-TV, Portland, Ore., from \$600 to \$700 & \$120 to \$140; WOAI-TV, San Antonio, from \$600 to \$700 & \$110 to \$140; KXLY-TV, Spokane, from \$400 to \$490 & \$80 to \$95; KATV, Pine Bluff-Little Rock, from \$350 to \$450 & \$70 to \$90; KJEO, Fresno, from \$350 to \$450 & \$70 to \$90; WKNB-TV, New Britain-Hartford, from \$350 to \$400; WKJG-TV, Fort Wayne, Ind., from \$300 to \$350, min. \$60 to \$70; share-time KMBY-TV, Monterey, Cal. & KSBW-TV, Salinas, from \$200 to \$300 & \$40 to \$60; WWTW, Cadillac, Mich. from \$200 to \$250, 20 sec. \$40 to \$50; KWFT-TV, Wichita Falls, \$200 to \$250, min. \$40 to \$50; KTVE, Longview, Tex., from \$150 to \$175; KRLD-TV, Dallas, from \$850 to \$950 & \$175 to \$190; WOW-TV, Omaha, from \$700 to \$800 & \$140 to \$160; WKNX-TV, Saginaw, Mich., from \$250 to \$300 & \$50 to \$60; KIMA-TV, Yakima, Wash. (which now has satellite KEPR-TV,

Pasco) from \$200 to \$300 & \$40 to \$60 for combined operation. Effective Feb. 1: WFIL-TV, Philadelphia, raises base hour from \$2000 to \$2400, min. \$375 to \$450; WSYR-TV, Syracuse, from \$660 to \$800 & \$132 to \$150; WTVD, Durham, N. C. from \$300 to \$350 & \$60 to \$70.

CKLW-TV, Windsor, Ont. (Ch. 9), opposite Detroit, has one rate for CBC network & Canadian accounts and separate rate for U. S. business, reports station rep Adam J. Young Jr. The \$450 base hour reported as revised rate (Vol. 10:49) applies to Canadian business. All U. S. business "which represents the greater portion of station's dollar volume" is based on \$1100 base rate reported when station began operation last Sept. 16.

NBC will televise and broadcast both the announcement of Academy Awards movie nominations Feb. 12 and the "Oscar" presentation ceremony itself in March under 6-year contract signed this week with Academy of Motion Picture Arts & Sciences, Oldsmobile again sponsoring.

NBC's WRCA-TV, New York, hikes cut-in rates on *Today* from \$350 to \$425 as of Jan. 3.

Alexander W. Dannenbaum, ex-pres. of WDAS, Philadelphia and father of Alexander W. Dannenbaum Jr., sales mgr. of WPTZ, died Dec. 28.

Arthur W. Kelly, 64, onetime United Artists exec. v.p., lately in TV film production, died in Nice, France, Dec. 26.

Telecasting Notes: "A staggering \$80,000,000 — about double the record figure of 1954—has been budgeted by telefilm producers in Hollywood for 1955," reports Dec. 29 *Variety* on basis of survey of all Hollywood TV film producers. These conclusions are reported: Some 111 series are definitely planned for 1955, compared to 64 last year; 60 of the 111 are pre-sponsored, 35 are being produced for syndication—as compared to 34 pre-sponsored and 23 for syndication last year . . . While the giants are growing larger, there's still "ample room for more of the smaller companies lensing one or 2 sponsored series," article notes, pointing out there are 51 Hollywood TV "filmeries" with production definitely set, as compared to 34 a year ago . . . No. 1 in TV film field this year and last is Ziv, which estimates \$9,500,000 in 1955 production vs. \$5,000,000 in 1954; No. 2 is MCA's Revue Productions, with \$6,000,000 planned; then McCadden Productions (Burns & Allen), "which shot into the big leagues in one season," with more than \$5,000,000 scheduled. Other ranking companies are Desilu, planning nearly \$5,000,000, Gross-Krasne with \$4,500,000, Columbia Pictures' Screen Gems with \$4,200,000 . . . TV as employment source for Hollywood actors now ranks neck-and-neck with theatrical movies, Screen Actors Guild reports. Survey by the 8000-member Guild showed TV films now provide 46% of employment of actors earning up to \$7500 a year, while theatrical films provide 54% . . . Ziv TV finally has "the home we needed," as chairman Frederic Ziv puts it—the big American National Studios, once home of Eagle-Lion and Pathe, purchased this week for sum in excess of \$1,400,000. It covers 6 acres with completely equipped sound stages, more than doubling Ziv's present facilities. It will be used for all production henceforth. Property is being taken over 100%, sellers including Bob Hope, Ed Pauley, Dan Reeves, Fred Levy, Ed Matz, Bernard Prokter. Heading new "one roof" facilities is Ziv's West Coast v.p., Maurice Unger . . . Guild Films pres. Reub Kaufman, reporting his company did \$5,000,000 in billings in 1954, says 8 series are to be filmed in 1955, totaling 234 half hours, 273 fifteen-minute programs. To be shot in Hollywood: *Life with Elizabeth*, *Liberace*, *Confidential File*, *Frankie Laine*, *Florian Zambach*, *Connie Haines*; in N. Y., *The Goldbergs*, *It's Fun to Reduce* . . . General Teleradio's WOR-TV reports it hit black for first time in 1954, most of profit having been made last 16 weeks and much of it attributable to *Million Dollar Movie* series; v.p. Gordon Gray also says radio WOR billings in 1954 topped 1953 by 16.8% . . . WKY-TV, Oklahoma City, has received copyright on its on-the-air and advertising identification which promotes its colorcasts—an artist's palette with brushes and daubs of color . . . As Xmas gift to sponsors and timebuyers, and in lieu of greeting cards, Calgary's CHCT-TV sent them shares of bona fide Calgary oil stock.

Newcomers to ARB's top-10 for Dec.: *Disneyland* (ABC) No. 9, and *George Gobel Show* (NBC) No. 10. Rating-wise, *Dragnet* (NBC) is No. 1, *You Bet Your Life* (NBC) No. 2, *Jackie Gleason Show* (CBS) No. 3, *I Love Lucy* (CBS) No. 4, *Toast of the Town* (CBS) No. 5—though *Toast of the Town* ranked first in number of viewers reached . . . Nielsen ratings for 2 weeks ended Nov. 27 put top 5 in this order: *Jackie Gleason Show*, *Toast of the Town*, *I Love Lucy*, *Buick-Berle Show* (NBC), *Disneyland*.

Knight Newspapers Inc. bought *Charlotte* (N. C.) *Observer* for \$7,000,000 this week in deal involving no TV-radio properties. Elsewhere, Knight owns 45% of WAKR-TV, Akron (Ch. 49); 27.7% of CP for WIND-TV, Chicago (Ch. 20); part of Ch. 7 application for Miami. Other Jack Knight newspapers: *Akron Beacon-Journal*, *Chicago Daily News*, *Detroit Free Press*, *Miami Herald*.

TV in 1955 will "crash the \$1 billion barrier," says Oliver Treyz, pres. of Television Bureau of Advertising, in year-end statement verifying our recent guesstimate (Vol. 10:48) of \$900,000,000 as the advertisers' 1954 investment in TV. He points out that network billings are up 40%, national spot billings "similarly up," whereas 11-month PIB figures show slight decline in magazine advertising billings and Media Records reported small decline in newspaper lineage in first 11 months of 1954. This means, he adds, that "although TV is behind direct mail, and newspapers out-bill TV by more than 2-to-1, the gap is closing. In fact, only TV is gaining." Also predicting records is Richard P. Doherty, consultant, ex-NARTB economics chief, who in Jan. *Television Age* estimates TV's revenues (not including time, talent & other costs) at \$615,000,000 to \$630,000,000 in 1954 and predicts more than \$800,000,000 in 1955.

Beer & wine advertisers sponsored only 2% of all radio programs, 3% of TV, in year ending Aug. 31, NARTB told House Commerce Committee in final report answering its request in connection with Bryson bill (HR-1227) which would outlaw such commercials (Vol. 10:42). Of actual commercial time, NARTB said, beer-wine commercials took only .21% of radio, .31% of TV. Dollar-wise, expenditures for beer-wine commercials were \$34,000,000. NARTB survey included data from 2139 radio stations (76.5% of all), 205 TV stations (92.3%). Beer-wine sponsors bought 17.88% of all sports programs; next highest were music and news, with 1.95% each. NARTB pres. Harold E. Fellows reiterated contention that Bryson bill is unconstitutional and that industry has been successful in self-regulation.

Legal slap on the wrist was administered to CBS-TV's *Strike It Rich* by N. Y. City Magistrate Samuel H. Ohringer Nov. 28 when he found show guilty of soliciting funds from studio audience without license from Welfare Dept. (Vol. 10:10). He also ruled local authorities had no jurisdiction over relationship between show and its sponsors or nationwide TV audience—and said he would have dismissed the charge if program were not presented before studio audience. In 16-p. opinion, magistrate said matter was "a very close question of law" and that no fine was called for. Producer Walt Frammer and city welfare commissioner Henry L. McCarthy both expressed gratification with decision, Frammer declaring show would continue, but without studio audience participation, and that he would nevertheless appeal the ruling.

Latest community antenna starter is Durango TV Network, Durango, Colo., operated by John Morrissey, brother of consulting engineer Thomas Morrissey, and backed by Denver banker George Rock. Installation employs signal of KOB-TV, Albuquerque, 169 mi. away. Company plans systems for other communities in area. Another system in prospect is for Bend, Ore., franchise being sought by Louis H. Peacock, of Donovan Construction Co., St. Louis.

How to act, what to wear and other pointers for those about to appear on TV for first time are explained clearly and with good humor—accompanied by delightfully funny illustrations—in new booklet, *So You're Going to Be on WOI-TV*, issued by the Iowa State College commercial station. Booklet also describes how TV works in general, and WOI-TV in particular, copies available from station.

FCC's 20th annual report, covering activities ending June 30, was released this week, accompanied by 35-p. document giving biographical data on employees hired during year. Latter is supplement to data submitted last year on all employees, pursuant to new amendment to Communications Act.

Financial & Trade Notes: According to *U. S. News & World Report*, the bull market which broke all records this year brought an increase of 47.4% in prices of TV stocks, 55.2% in electrical equipment stocks, 34% in motion picture stocks between Jan. 7 and Dec. 16, 1954. Here's quick rundown of financial data on some of the major companies in TV-radio-electronics, as reported by United Business Service, Boston:

	Earnings		Recent Price	Divs. 12 Mos.	Current Yield	*P/E Ratio
	Est. 1954	1953				
Admiral	\$3.25	\$3.48	29	\$1.00	3.4%	8.9
CBS	4.75	3.80	80	1.90+	2.4	16.8
DuMont	0.50	0.60	15	Nil	Nil	30.0
GE	2.25	1.92	45	1.60	3.6	20.0
IT&T	2.95	3.12	24	1.00	4.2	8.1
Motorola	3.60	3.66	51	1.50	2.9	14.2
Philco	1.75	3.43	37	1.60	4.3	21.1
RCA	2.60	2.27	37	1.35	3.6	14.2
Sylvania	3.00	3.10	48	2.00	4.2	15.0
Westingh'se	5.25	4.53	76	2.50	3.3	14.5
Zenith	8.50	11.44	90	3.00	3.3	10.6

* Price-earnings ratios based on 1954 estimates.

Raytheon's net profit for 6 months ended Nov. 30 totaled \$2,396,000 (96¢ a share), 46% higher than the \$1,639,000 (64¢) earned in same 1953 period. Sales for the 1954 period were \$93,007,000 vs. \$81,212,000 preceding year. For 3 months ended Nov. 30, sales of \$48,300,000 and profit of 52¢ a share were indicated, compared to \$43,900,000 and 29¢ a year ago. Pres. Charles F. Adams Jr. attributed improvement in sales to continuing high volume of govt. orders, improved market for TV sets, tubes and components, steadily increasing demand for transistors and diodes. He added that govt. billings in first half of fiscal year were approximately 60% of total, compared with 70% in previous periods, and Nov. 30 backlog of govt. orders was \$117,000,000 vs. \$150,000,000 at end of previous fiscal year and \$185,000,000 Nov. 30, 1953.

International Resistance Co., which operates on annual accounting basis for ten 5-week periods, reports earnings after taxes for 3-period June 28-Oct. 24 amounted to \$245,242 as against \$123,080 for 5-period Jan. 1-June 27. Income for June 28-Oct. 24 period was \$4,176,135 vs. \$5,813,243 for 5-period Jan. 1-June 27. Final 2 periods of 1954, states pres. Charles Weyl, "will conform generally to the June 28-Oct. 24 periods." IRC last Oct. 24 purchased Van Dyke Instruments Inc., maker of precision potentiometers required for guided missiles, automation, etc., is operating it as a wholly owned subsidiary.

Trav-Ler Radio's 1954 sales reached new high of about \$16,000,000, compared to \$14,700,000 in 1953, pres. Joe Friedman told meeting of distributors and dealers. Earnings won't equal 1953's \$412,275 (54¢ a share) but will be high enough to cover 30¢ dividend payment, he said.

Dividends: Motorola, 37½¢ payable Jan. 14 to stockholders of record Dec. 31; Audio Devices, 5% stock payable Jan. 21 to holders Jan. 6; General Instrument Co., 12½¢ Jan. 15 to holders Jan. 7.

CBS Foundation Inc.'s plan for making grants to privately-endowed educational institutions, based on a formula whereby contributions are made in the names of its executives who meet certain standards, has met good reaction in business and educational circles, indicating possibility others may follow suit. Foundation's first contribution was \$32,000 to 14 colleges & universities on behalf of 16 executives (Vol. 10:52), and similar contribution is planned in 1955.

Color Trends & Briefs: Most authoritative report available on network affiliates' ability to rebroadcast network color feeds and originate own slide, film and live color will be included as a new feature in *TV Factbook No. 20*, due off presses later this month.

Based on information supplied by networks and equipment manufacturers, it will give network-by-network and station-by-station tabulation showing whether or not stations are now able to handle network or local color—plus target dates for local color for these not now using slide, film or live equipment. Compilation gives this lineup:

NBC-TV—All 53 basic affiliates are equipped to carry network color, 14 have slide & film equipment, 7 have live cameras. Sixteen basics plan to get slide & film gear this year, 12 live cameras. Of interconnected affiliates individually available, 41 can carry network color, 5 have slide & film gear, none live cameras. Eight more plan to be ready with slide & film this year, while 2 plan to acquire cameras.

CBS-TV—Equipped for network color are 48 basic required affiliates, while 6 are shown with slide & film equipment, 4 with live cameras. Sixteen basics are due to get slide & film gear this year, 2 live cameras. Of supplementary interconnected affiliates, 37 can carry network color, none are shown with slide, film or live color installations. Nine are due for slide & film this year, 3 live cameras.

DuMont—Total of 81 affiliates (most shared with NBC-TV or CBS-TV) able to take network color, 16 of these also ready with slide & film equipment.

ABC-TV supplied no report on status of its affiliates.

AT&T reports that it re-engineered and re-equipped over 47,000 channel miles of facilities during 1954, to bring color to 139 stations in 101 cities. As of Jan. 1, 1955, AT&T served 260 stations in 234 cities with monochrome.

* * * *

Color set production won't go beyond 50,000 in 1955, says Dr. Allen B. DuMont, who takes issue with forecasts ranging up to 300,000 by other industry leaders. In year-end statement, he commented: "The development of the right color tubes; the refinement in receiver circuits; the necessary reduction in manufacturing costs; the large scale presentation of color programs in all markets—all of these things are taking time. Eventually, yes, TV will be both a color and a black-&-white medium. However, in 1955 it looks about 99% black-&-white." DuMont Labs tube div. mgr. F. P. Rice, reporting limited production of rectangular color tubes is scheduled for latter 1955, also thinks "average estimates of approximately 250,000 color sets seems to be very high."

Color TV will cut into other media's take of ad budgets, according to 68% of the 5000 members of *Tide Magazine's* "leadership panel" of marketing executives. Only 8% feel it will increase use of other media, while 24% say it won't affect them. What can other media do about it? Executives generally say "improve," "use more color," "make a pitch for smaller advertisers who can't afford color TV."

Rumors that CBS and NBC would reduce or quit color-casting were denied vehemently by spokesmen of both, NBC going so far as to issue statement by pres. Sylvester L. Weaver that "public interest has been highly encouraging and we look forward to continued advances and expansion in color programming during 1955."

Jan. 3 week network color schedules: CBS-TV—Jan. 5, *Best of Broadway*, "Arsenic & Old Lace," 10-11 p.m.; Jan. 8, *My Favorite Husband*, 9:30-10 p.m. NBC-TV—Jan. 5, *Norby* premiere, 7-7:30 p.m.

Recognizing color's commercial infancy, AT&T again notified FCC that it will continue "experimental" rates for color network facilities—asking extension to May 31.

AS 1955 BEGINS—TV-RADIO TRADE RIDES HIGH: The year's TV production hovered close to 1950's record 7,463,800 as we went to press. With one week yet to be reported, the preliminary RETMA estimate, subject to revision, showed 7,305,000 TVs turned out, exceeding the 7,214,827 produced in all of 1953. Output for week ended Dec. 24, normally a low-production holiday week, totaled 151,285. Radio production that week was 239,168 (109,472 auto), for 51-week 10,210,000 total vs. 13,000,000 in 1953.

And 1954 has been TV's biggest retail sales year, irrespective of whether it was first or second best production year. Several weeks ago retail sales passed 1953 high of 6,400,000, and are expected to total between 6,800,000 & 7,000,000 for the full year. This means about 35,000,000 sets sold to the public in TV's 8 commercial years from 1947-54, of which perhaps 1,000,000 have been scrapped.

Inventories at year's end are estimated about 2,200,000, compared to about 2,000,000 at start of year. Whether this represents a potential danger to trade, as has been suggested by some industry leaders (Vol. 10:49-50), is open to the normal differences of opinion which exist in TV no less than in other industries.

* * * *

What does 1955 hold for trade? From where we sit, it looks like 6-6,300,000 black-&-white sets should be produced and marketed in 1955 -- down somewhat from the 1954 level -- but total dollar volume from TV alone shouldn't be far off estimated \$2 billion in 1954 if sales of high-priced color receivers come anywhere near the 200-300,000 predicted by industry leaders. This, of course, is pegged to highly optimistic forecasts of consumer purchasing power and employment in 1955.

With TVs now in about 70% of nation's 47,000,000 household units, trade just can't realistically expect many more fat years in initial sales -- at least not until color really gets going. Consequently, we look for replacement and multiple sales to a family to assume greater importance than ever this year -- and this inevitably means far keener competition and bigger promotions to induce families to trade in their old sets or buy second sets for use in other rooms.

Prices this spring should remain firm or even dip slightly lower on leader models. But if market holds up reasonably well, look for some price hikes by fall. The models introduced thus far this winter (for details of those introduced this week, see p. 13) are firm-to-lower in the majority of cases.

* * * *

Accent will continue to be on 21-in. overwhelmingly as most popular size, with 24-in. creeping up slowly at expense of 17-in. Several companies have added 24-in. to their lines for first time this winter; still others have expanded their offering of 24-in. RCA and Philco, among the major manufacturers whose actions and comments are watched closely by trade for future trends, have expressed themselves as pleased with sales of big-ticket 24-in. in a \$300-plus market.

RCA's Frank Folsom says it has sold entire output of 24-in. full-door mahogany and walnut console at \$500, the highest price in RCA line. And he says total unit production in that model is "more than you think." Philco's James H. Carmine says "Miss America" 24-in. console at \$360 is currently by far best console seller.

Color's impact remains conjectural. Best that can be seen in admittedly hazy crystal ball is that color will exert a greater influence on 1955 market than in 1954 -- but scarcely enough to make many prospective TV customers pay the price or induce set owners to trade in good-working black-&-white receivers for it. Folsom, for one, says there will be a "substantial market" this year for RCA's \$895 color set among the "Cadillac" and "Miami" carriage trade as a starter.

The 1954 servicing bill was impressive, and 1955 should be slightly higher. Overall, it was about \$1.7 billion, and RCA corporate executive v.p. Charles Odorizzi

estimates it will reach annual gross of \$2.7 billion in 3 years (Vol. 10:48). Some 88,000,000 TV-radio replacement receiving tubes had estimated retail value in 1954 of \$260,000,000; 5,500,000 TV replacement picture tubes had retail value of about \$210,000,000; and components, antennas & accessories added up to \$400,000,000.

Radio production and sales appear to have fallen off to about 10,500,000 in 1954 -- and the prospect is that 1955 should see about same volume. At factory value this would mean about \$225,000,000. In 1953 it was \$300,000,000 for 13,000,000 sets.

MANUFACTURERS UNEASY AS IMPORTS GO UP: Increase in imports of radios and parts -- and heavy promotion of foreign items -- have a lot of U.S. receiver and parts makers uneasy about what future may hold in potential competition from abroad. Although imports thus far have been confined to radio receivers & components, they're asking themselves, logically enough, can TV be far behind?

Concern with what future may bring, more than any present inroads, impelled RETMA to resolve at recent convention to fight for restoration of import duty to 35% from current 12½% (Vol. 10:47). While admitting nobody's being put out of business by current level of imports, parts makers particularly want protection for future.

RETMA is currently surveying its membership to determine exactly how much competition really exists, as first step before petitioning Congress and the Tariff Commission for an increase in duty. Tariff laws provide that substantial injury to an industry must be proven before duties on individual commodities can be increased. It's frankly doubted that the industry, having just ended highest TV sales year in history and a good if unspectacular radio year, can prove very extensive injury now.

Plea for tariff hike will also cite fact that West Germany and Britain, where most serious competition originates, have far lower labor costs than U.S. RETMA is also expected to contend that U.S. Govt. funds have directly subsidized exporters.

James D. Secrest, RETMA exec. v.p., characterized goal thus: "We're trying to put out the flame while it's still just a small brush fire. We don't know if or when it will erupt into a four-alarm blaze."

Commerce Dept. classifies electronics imports as "TV Apparatus and Parts" (Schedule A-7090680) and "Radio Apparatus and Parts" (Schedule A-7090660). They include receivers and components, though in practice virtually no TV receivers have been imported. Combined imports of such electronics items in first 8 months of 1954 totaled \$1,814,515, composed of \$1,465,220 radio, \$349,295 TV -- mainly components in case of TV and obviously a bagatelle when stacked against U.S. industry's factory value (1953) of \$1.235 billion TV, \$299,236,000 radio. In 1953, imports totaled some \$3,334,558, compared to \$6,330,885 in 1952. No breakdown by units is provided.

Electronics exports by U.S. in first 9 months of 1954 were \$192,177,193. In 1953, they were \$247,839,764 and in 1952 were \$210,000,000. TV-radio sets are substantial but by no means dominant items among these exports.

* * * *

West German radios and British TV-radio and high fidelity components provide keenest competition in U.S., Commerce reports. German exports to U.S. totaled some \$300,920 in first 8 months, compared to only \$109,058 for all of 1953 and \$95,420 in 1952. Leading German radios in U.S. are Telefunken (distributed by American Elite Inc., N.Y.); Grundig (by Majestic Radio); Siemens and Metz. To this list should be added Philips of Eindhoven, the Dutch radio distributed in U.S. by North American Philips. Philips is particularly strong in South America (Vol. 10:12). In recent months, German firms have been signing U.S. distributors, many of them retailers.

German radios are well-constructed and many of them admittedly have tonal qualities superior to same-priced U.S. sets. German radios for sale in U.S., however, usually have high price tags by American standards. For example, the least expensive Grundig AM-FM radio sells for \$70; similar American sets start at \$40.

British electronics exports to U.S., chiefly components, totaled \$607,331 in first 8 months, compared to \$463,006 in 1953 and \$789,541 in 1952. Among popular British items are Wharfedale speakers, Garrard record changers, Leak amplifiers.

Topics & Trends of TV Trade: Industry-wide price cuts in long-playing records are regarded as certain in wake of RCA Victor's surprising, heavily-publicized announcement of reductions of up to 30% in price of 10 & 12-in. LP records, along with revision of dealer discounts, effective Jan. 3.

Within 48 hours of RCA's announcement, which hit record industry like a bombshell, Columbia Records—regarded 1-2 with Victor in industry—cancelled its 5-month price guarantee to dealers on LP records, announced only week before. M-G-M Records and London Records cut prices to meet RCA's reductions. Several other major manufacturers indicated they would also cut prices in week or so. RCA made these changes:

All 12-in. LPs were cut to \$3.98 from \$5.95, \$4.85 & \$4.19, depending on whether they were classical, semi-classical or popular; 10-in. LPs were cut to \$2.98 from \$4.95, \$3.85, \$3.15 & \$2.99; double extended play 45rpm's were set at \$2.98 from \$3.85, \$2.99, \$2.98 & \$2.94; 45rpm singles were cut to 89¢ from \$1.16 & \$1; single extended plays were set at \$1.49 from \$1.58 & \$1.47. Price of 78rpm was increased from 89¢ to 98¢, as consequence of drastically diminished production and sales.

Of equal importance to trade is radical revision of discount structure. Dealer gross margin on all 45 & 78rpm records will be spread from current 38% to 42%. On LPs it will remain 38% and traditional dealer return privilege will be eliminated. Returns continue at 5% for 78s & 45s.

RCA pres. Frank Folsom, who made cuts after recent cross-country visit to distributors & dealers, said Victor action hits hard at mail order business in records. Trade sources commented that discount houses would also suffer as result of big price slashes. Discount houses sell records average 25% below regular retail outlets.

Folsom said new plan was developed because of his belief that record industry "is on the threshold of its greatest period of expansion." Record sales in 1954 are estimated by authoritative trade sources at about 230,000,000 units, with retail value of \$275,000,000. Folsom foresees a 15% increase in record sales in 1955. He commented:

"Today there are more than 25,000,000 turntables—many of them equipped to handle the 3 phonograph speeds—compared with only 16,000,000 phonographs at the end of World War II. About 20,000,000 record players of all types are expected to be produced and sold in the next 5 years. Renewed popularity of the phonograph is expected to continue to increase the number of machines in use and this, of course, will mean greater sales of records."

* * * *

Motorola introduced new line of 26 TV models to distributors Dec. 29 at Chicago's Edgewater Beach Hotel—only major manufacturer to show full new line at mid-winter. Most models contain new "Five Star" chassis for improved fringe area reception. Prices, which are unchanged from old line, range from \$140 for 17-in. ebony metal table model to \$410 for 24-in. blonde console. Line:

Table Models: 17-in. ebony metal \$140; 17-in. blonde \$150 & \$170; 17-in. mahogany \$160; 21-in. ebony metal \$160; 21-in. blonde \$170, \$210 & \$240; 21-in. mahogany \$200 & \$230; 24-in. mahogany 250; 24-in. blonde \$260.

Consoles: 21-in. walnut or maple \$200; 21-in. blonde \$210, \$280, \$310 & \$340; 21-in. mahogany \$270, \$300 & \$330; 24-in. mahogany \$350 & \$400; 24-in. blonde \$360 & \$410.

Also introduced were 4 new auto radios at \$40, \$47, \$55 & \$60, and a plated circuit table radio at \$15 & \$17.

* * * *

Crosley cut price of 10 "Super V" 17 and 21-in. table models by \$20 each in move which gen. mgr. Leonard F. Cramer attributed to "volume production." New prices range from \$130 for 17-in. to \$190 for 21-in.

Westinghouse added 24 new TV models to line, unveiled them in closed-circuit telecast Dec. 29 to dealers in 28 cities. One 24-in. table model and three 24-in. consoles were carried over. Richard L. Sandefur, national sales mgr., explained that while prices are set nationally, distributors in each market area would be empowered to "adjust" prices slightly according to local conditions, similar to policy announced recently by GE for certain kitchen appliances. New models are 17-in. brown metal table \$150; 17-in. black, maroon & green metal table \$170; 21-in. brown metal table \$180; 21-in. mahogany metal table \$200; 21-in. blonde metal table \$210; 21-in. de luxe mahogany metal table \$230; 21-in. de luxe blonde metal table \$240; 21-in. custom mahogany table \$260; 21-in. custom blonde table \$270; 21-in. open-face mahogany console \$230 & \$260; 21-in. open-face blonde console \$240 & \$270; 21-in. open-face de luxe mahogany console \$300 & \$330; 21-in. open-face de luxe blonde console \$310 & \$340; 21-in. 3-way mahogany combination \$370; 21-in. 3-way blonde combination \$380; 24-in. 3-way mahogany combination \$470; 24-in. 3-way blonde combination \$480. Also added were 8 new radios ranging from table model at \$20 to 5-tube portable radio-phonograph at \$100. Carried over were 11 radios and radio-phonographs.

GE adds 17 models to current TV line at Chicago's Merchandise Mart Jan. 3. Of the new models, 10 are "Pacer" receivers with prices ranging from \$130 to \$250. Seven are "Ultra-Vision" models from \$260 to \$370. Four of latter series follow "Lo-Boy" design introduced last year by GE, in which picture is close to floor. All have 41-mc IF. New models: (Pacer) 17-in. metal table \$130; 17-in. metal & mahogany table \$150; 21-in. metal table \$160; 21-in. metal & mahogany table \$180; 21-in. mahogany table \$200; 21-in. blonde oak table \$210; 21-in. open-face metal & mahogany console \$200 & \$220; 21-in. open-face metal & blonde oak console \$230; 21-in. open-face mahogany console \$250. (Ultra-Vision) 21-in. mahogany console \$260; 21-in. open-face mahogany console \$300; 21-in. open-face blonde korina console \$320; 21-in. Lo-Boy open-face mahogany console \$300; 21-in. Lo-Boy open-face blonde korina console \$320; 21-in. Lo-Boy full-door mahogany console \$350; 21-in. Lo-Boy full-door blonde oak console \$370. Optional uhf tuners are \$30 extra on Pacer models, \$40 on Ultra-Vision.

Admiral has added 8 new TV models, including five 24-in. sets with 335-sq. in., 90-degree tubes. Optional with new 24-in. table models is matching console base with tapered ebony legs. New models: 17-in. ebony metal table \$130; Paris, 21-in. open-face mahogany console \$200; Versailles, 21-in. open-face blonde console \$210; Honduras, 24-in. ebony metal table \$230; Copacabana, 24-in. mahogany table \$240; Haiti, 24-in. blonde table \$250; London, 24-in. open-face mahogany console \$280; Madrid, 24-in. open-face blonde console \$290. Optional uhf tuner is \$50 extra. Also added was a high-fidelity mahogany phono console at \$250, blonde \$260. At week's end, Admiral raised price of 21-in. ebony metal table from \$150 to \$160.

Magnavox has added Telerama 141, a 21-in. de luxe mahogany table at \$235, oak \$240; New Yorker 151, a 21-in. open-face console in 3 colors at \$250; Video Theatre 152, a 21-in. de luxe open-face console in mahogany at \$280, oak or cherry \$290; Magnarama 24, a 24-in. table model in blonde, cordovan & sand, at \$250. All new models have high-fidelity sound.

Stewart-Warner, going out of TV-radio field, its service and some of distribution facilities being taken over by Hoffman Radio (Vol. 10:51-52), has sold some of its factory inventory to Macy's, N. Y., which will shortly break big promotion. Said to be involved are 2500 TVs, 5000 radios.

DuMont re-entered radio production after 3-year absence with announcement this week that own AM-only radios would be included as optional equipment at \$30 extra in 3 new "wide horizon" TV models to be introduced Jan. 3 at Chicago marts. Sales mgr. Dan Halpin said radio production would be in limited quantities on experimental basis at first. The radio chassis are housed in TV cabinets but operate independently, using only the speaker in common with TV chassis. New TV models are Trevor, 21-in. walnut table at \$220, mahogany \$230, blonde \$240; Kendall, 21-in. open-face mahogany console \$320, blonde \$330; Lancaster, 21-in. open-face mahogany console \$330, blonde \$340.

Picture tube sales in first 10 months totaled 7,746,240, valued at \$161,520,089, compared to 8,501,455 worth \$203,127,855 in first 10 months of 1953, reports RETMA. Oct. sales hit new monthly record of 1,269,674, valued at \$26,597,702, compared to 1,149,791 at \$23,892,469 in Sept. and 948,593 at \$23,994,184 in Oct. 1953. Receiving tube sales in first 10 months totaled 308,398,701, valued at \$220,988,119, compared to 382,080,558 at \$263,328,699 in same 1953 period. Oct. sales were 42,347,794 at \$29,228,992 vs. 40,966,063 at \$28,953,592 in Sept. and 34,928,108 at \$25,393,879 in Oct. 1953. [Note: Tabulation of picture and receiving tube sales, 1947-54, with breakdowns by initial equipment, renewal, export, govt. & factory value, will be included in upcoming spring edition of *TV Factbook*, off presses about mid-Jan.]

GE tube dept. mgr. J. Milton Lang figures 5,500,000 new picture tubes will be required as replacements in 1955—about one in every 6 sets. That would be highest replacement ratio yet, having been one in 7 in 1954. In addition, he estimates the industry will make about 6,000,000 tubes for new sets, so that 1955 total will run 11,500,000, or about 500,000 ahead of record 1953. Industry-wide, including receiving industrial & military types, the electronic tube business will enjoy total volume of about \$650,000,000 in 1955, in Lang's opinion.

TV set sales by Canadian factories totaled 530,350 at average price of \$348 in first 11 months of 1954, when production was 499,928, reports Canadian RTMA. Projected production estimate is for 224,640 more sets in Dec.-Feb. period. Inventory at end of Nov. was 38,411, compared to 36,318 at end of Oct. and 49,165 at end of Sept. Montreal area led in sales with 148,081; Toronto second, 93,544; Prairies, 58,911; British Columbia, 52,457; other Ontario, 46,528; Ottawa & eastern Ontario, 34,645; Hamilton-Niagara, 30,811; Quebec City area, 29,400; Maritime Provinces, 19,721; other Quebec provincial areas 1920.

Trav-Ler Radio introduced new line of 22 TVs, 40 radios at distributor-dealer meeting in Chicago this week. TV prices range from 17-in. table model at \$130 to 21-in. TV-radio-phono combination at \$400, company's first combination. A 24-in. table model was reduced from \$300 to \$200. Pres. Joe Friedman disclosed company plans to enter Canadian TV market in 1955, is currently negotiating for plant in central Canada.

Definition of high-fidelity is sought by RETMA in letters this week to its high-fidelity equipment members asking them to write their own definitions in 50 words or less. Initiated by Joseph N. Benjamin, Pilot Radio v.p., move is designed to clarify existing confusion on what the term includes, for benefit of industry and consumers. Letters will be discussed at meeting of RETMA high-fidelity section during Los Angeles Audio Fair in Feb.

Radio shipments to dealers, excluding auto radios, totaled 4,416,783 in first 10 months of 1954, according to RETMA state-by-state report released this week and available from RETMA to members on request. Oct. shipments were 639,624, compared to 722,161 in 5-week Sept.

Trade Personals: Clifford J. Hunt, gen. mgr. of Stromberg-Carlson TV-radio div., elected v.p. in charge; Anthony G. Schifino elected v.p. of sound div.; Arthur J. Fink, gen. credit mgr., named asst. treas.; John H. Voss elected v.p. of telephone div.; Philip J. Lucier named asst. treas. & mgr. of telephone finance dept. . . . M. C. Thomsen resigns as exec. v.p. of Wilcox-Gay Corp. (Majestic Radio) . . . Frank M. Folsom, RCA pres., along with Rear Adm. Richard E. Byrd, named recipients of 1955 good citizenship award, Philadelphia chapter, Sons of the American Revolution . . . Robert A. Seidel, RCA executive v.p., consumer products, named co-chairman of Radio-TV-Phono div., Father's Day Council . . . Dr. Donald B. Sinclair, chief engineer of General Radio Co., Cambridge, Mass., elected a v.p. . . . Harvey E. Weimer, ex-Kroger Co., Cincinnati, named mgr. of Crosley-Bendix market research, reporting to marketing director A. E. Cascino; Russell E. Mings named asst. mgr. of market research . . . Curtis L. Peterson promoted to Raytheon TV-radio adv. mgr., Cliff Knoble named merchandising mgr. . . . Arthur H. Schneider, Commonwealth Edison, elected pres. of Chicago Electric Assn. . . . Bernard Rafkin appointed supervisor of sales research, Sylvania TV-radio div., N. Y., reporting to sales research director Frank W. Mansfield . . . Richard Reyburn, ex-Capehart-Farnsworth, joins Kay Lab, San Diego, as chief of tests; Earl Cunningham, ex-Consolidated Vultee, placed in charge of TV camera development . . . Harry C. Huebner, ex-Harry Alter Co., Chicago (Crosley-Bendix), named merchandising v.p. of Polk Bros., big Chicago retail appliance chain . . . John E. Hogg, ex-GE, named instrumentation field sales mgr., Ampex Corp., Redwood City, Cal. (audio equipment) . . . Bernard Klein named exec. secy., Audio Components Distributors Assn., Los Angeles . . . C. O. Wavvig, chairman of Globe-Union Inc., elected pres. of Milwaukee Automotive & Electronic Parts Mfg. Co. . . . Edward S. Miller named gen. mgr. of Sherwood Electronic Labs, Chicago, in charge of high-fidelity equipment . . . Edward M. Cappucci, gen. mgr. of Radio Merchandise Sales Inc. (antennas), assumes additional duties of sales director . . . Wm. Platt named sales v.p. of Winston Electronics, Philadelphia (Win-tronix TV test equipment).

* * * *

DISTRIBUTOR NOTES: Admiral establishes factory branch at 45 W. Main St., Spokane (Herman S. Albert, mgr.), replacing Salisbury Distributors Inc. . . . Sylvania: Stratton-Warren Hardware Co., Memphis . . . Gould-Farmer Co., Syracuse (GE) elects Charles H. Wittenburg pres., succeeding Earland M. Farmer, who moves up to chairman . . . Southern Wholesalers, Washington (RCA), promotes Ralph M. Lane to gen. mgr. . . . Raymond Rosen & Co., Philadelphia (RCA), promotes Larry Crevey to asst. sales mgr. . . . GE Supply Co., Buffalo, names Ezra F. Howington TV-radio sales mgr. . . . Graybar, Richmond (Crosley), promotes C. R. Hunsicker to district appliance sales mgr. . . . CBS-Columbia Distributors Inc., N. Y., promotes Milton Marcus to sales mgr. . . . RCA Victor Distributing Co., Buffalo, appoints Irving E. Henseler sales mgr. of Rochester office.

Puritan Electronics Corp., Hawthorne, N. J., is new picture tube manufacturer which began operation this week. Plant has 30,000-sq. ft., will eventually turn out 2500-3000 tubes per week, said pres. Thomas Stave.

Sears, Roebuck spring catalog, out this week, has TV-radio receiver prices average 5½% under year ago, as part of overall decline in consumer goods prices.

Sir Alexander Aikman has retired as chairman of Electric & Musical Industries Ltd. (EMI), succeeded by J. F. Lockwood.

Electronics Reports: Factory sales of electronic products in 1955 should reach \$6.1 billion in 1955, compared with an estimated \$5.8 billion in 1954. That's authoritative forecast of Commerce Dept.'s electronics experts, whose predictions in past have often been quite accurate. It's contained in year-end review by Commerce Secy. Sinclair Weeks, who predicts 1955 will see moderate rise in business activity, high employment and increase in living standards.

Electronics forecasts were prepared by Commerce Dept.'s Business & Defense Services Administration (BDSA) Electronics Div., headed by Donald S. Parris. At factory level, the predicted \$6.1 billion output would approach 1953's record high electronics production of \$6.3 billion, when military expenditures were at peak levels. Products included in estimate are TV-radio receivers, broadcast & communications equipment, tubes & components, and military equipment such as radar, sonar and guided missile systems.

Breaking down forecast, Commerce Dept. estimates 1955 color TV receiver factory sales at about \$150,000,000 (or 300,000 sets at \$500 each), and black-&-white sales at "almost \$1 billion" (or about 6,500,000 sets at current average price of around \$150). There was no breakdown as between military and civilian production, but most estimates place military electronics procurement at annual rate of around \$2.5 billion for both 1954 & 1955. Commerce Dept. estimate differs from RETMA's slightly lower one (Vol. 10:51) in that Commerce includes factory value of all components, while RETMA considers only replacement components.

* * * *

What happens to the electronics industry in the event of an enemy attack? The ability of electronic and other vital plants to spring back into production, with continuity of management, administration and technical know-how, could mean the difference between victory and defeat. Commerce Dept.'s Business & Defense Services Administration (BDSA) is waging all-out campaign to emphasize the immediate need for individual company planning—and making available knowledge and experience accumulated in this field by both Govt. and industry. Electronics Div. of BDSA has already met individually with top officers of 25 leading electronics firms to discuss industrial defense plans, and is appealing to other companies in the industry to meet with it for discussions on comprehensive plans to insure continuity of management and rapid resumption of vital production in the event of attack. Corporate defense planning is outlined in new booklet, "Job for Management," published by BDSA and available from Electronics Div., BDSA, Commerce Dept., Washington 25, D. C.

"Unit Territory Plan—to Serve the Jobber Better" is new report based on 18-month study by RETMA jobber relations committee under J. A. (Shine) Milling, exec. v.p., Howard W. Sams & Co., designed to improve distribution of electronic parts through more efficient utilization of manufacturers' representatives. Copies of report are available to all members of industry, whether or not RETMA members, from RETMA, 777 14th St. N.W., Washington 5, D. C.

Carrier Corp., air conditioner manufacturer, enters electronics field through affiliate Cambridge Corp., which begins electronic equipment production this month in new 60,000-sq. ft. plant in Lowell, Mass.

"TV telephone," which enables telephone callers to see one another, was one of prize exhibits at recent communications conference in Hull, England.

Transistor the size of match-head is now being produced by CBS-Hytron for use in hearing aids.

Lowest-priced transistor hearing aid yet: Zenith's tiny 3-transistor model 75-X, at \$75.

MOTOROLA renewed patent license agreement with RCA Dec. 30, effective for 5 years—and that appears to leave Admiral & Philco the only majors still unsigned, except of course for litigating Zenith. At press time, Dec. 31, RCA declined to reveal names of companies that have or have not renewed but checkups to date have indicated most have signed. There was even possibility Admiral & Philco would renew at last minute.

The late Maj. Edwin H. Armstrong's infringement suit against RCA & NBC, involving FM patents, was dismissed by stipulation this week on motion of plaintiff in Federal Judge Paul Leahy's court in Wilmington. Judge Philip J. McCook, former N. Y. state supreme court justice, acted as arbitrator and fixed amount of settlement at approximately \$1,000,000. Mrs. Armstrong, as executrix of the estate of the late inventor, was said to have insisted personally on the out-of-court settlement; she was Gen. Sarnoff's secretary in the early days of RCA.

Other Armstrong patent infringement suits against Motorola, Wells-Gardner, Radio Craftsman & Sentinel have been ordered to trial before Federal Judge Igoe in Chicago court Jan. 13.

On other patent fronts, Judge Knox in Federal court for N. Y. southern district still had under advisement as of Dec. 30 RCA's motion to change venue of Dept. of Justice's anti-trust suit to Wilmington (Vol. 10:47-48), and Judge Leahy in Wilmington on Jan. 4 is to set trial date in RCA-Zenith suit.

Combination TV-radio-tape recorder may be in works by Raytheon. Dec. *Wireless World* (London) notes that "the corporation is contemplating developing several new receivers which will incorporate tape recorders and is, therefore, interested in contacting [British] manufacturers who would be willing to supply the basic tape recording chassis without the loudspeaker and other sound reproducing equipment."

TV is helping to solve one of most distressing problems of the auto age—finding a place to park. In Oakland, Cal., Downtown Merchants Assn. has installed RCA "TV Eye" industrial TV camera atop light pole overlooking its 225-300-ft. parking lot. It automatically scans entire parking area, enabling attendant in booth to spot vacant spaces by looking on screen of 21-in. set.

Navy's new super-carrier *Forrestal* uses TV to keep ship's officers in visual contact with all parts of ship. Fixed TV cameras on flight deck and other key stations flash pictures to screens in below-decks control centers. Ship is also equipped with underwater TV cameras which can be swung over side to inspect hull in case of battle damage.

Raytheon has issued new 12-p. brochure describing its basic KTR-100 color TV microwave relay equipment, which carries video & audio simultaneously. It's bulletin 3-110, available from Dept. 6130, Raytheon, 100 River St., Waltham 54, Mass.

New 9x12-ft. projection unit of Fleetwood Corp., Toledo (Vol. 10:49) will be demonstrated Jan. 6-7 in Room 5A1070, Pentagon, open to public. It's Model FL-1001, sells for \$2350, is designed for closed-circuit or off-air.

Size of cigar box, newly designed DuMont "Tel-Eye" industrial TV camera measures 10x6 $\frac{3}{4}$ x4 $\frac{3}{4}$, weighs 8 $\frac{1}{2}$ lbs., and is priced at \$975.

Thomas R. Jones, pres. of Daystrom Inc., Poughkeepsie, N. Y., elected a director of Weston Electrical Instrument Corp., Newark.

Norman E. Carlson named industrial sales mgr., Fireye div., Electronics Corp. of America.

Clevite Corp., Cleveland electronic products and bearing manufacturer, names Willard W. Brown marketing v.p.

NARTB
Network TV-Radio Billings

November 1954 and January-November 1954
(For October report, see *Television Digest*, Vol. 10:49)
(For preceding years, see *TV Factbook No. 19*, p. 15)

THREE NETWORKS achieved new records in TV billings in Nov., according to monthly Publishers Information Bureau tabulations—CBS-TV jumping to \$14,218,622, NBC-TV to \$12,391,828, ABC-TV to \$4,134,103. Month's total for all networks reached new high of \$32,141,881 (compared to \$23,573,056 in Nov. 1953) to bring 11-month total to \$286,648,222, which compares with \$202,904,049 in same 1953 period. It's clear now that figure for whole year will be around \$320,000,000.

Network radio billings, now running about one-third TV, held fairly firm during Nov., compared with recent months, but \$11,348,785 aggregate total was considerably under the \$13,666,932 for Nov. 1953. For 11 months, radio aggregate was \$126,379,619 vs. \$146,349,762 for same 1953 period. CBS continued to maintain lead in radio, as in TV. The PIB figures:

NETWORK TELEVISION

	November 1954	November 1953	Jan.-Nov. 1954	Jan.-Nov. 1953
CBS	\$14,218,622	\$ 9,756,593	\$131,217,799	\$ 87,084,930

* Revised as of Dec. 30, 1954.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers' Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 40%. However, they're generally accepted in the trade as an index.

Bound and Indexed

We will index and bind, between embossed hard book covers, a limited quantity of all 1954 issues of the *Television Digest* Weekly Newsletters, plus the semi-annual *TV Factbooks* with all Addenda, plus all Supplements and Special Reports. This volume will provide a handy and handsome permanent reference for your own or your company library. Orders will be taken only until Jan. 10. Price: \$25 per volume.

TV cameras won't be permitted at any House committee hearings, incoming Speaker of House Sam Rayburn (D-Tex.) said Dec. 28, immediately stirring protests from industry. Rayburn made similar ruling during 82nd Congress (Vol. 8:9), but Speaker Martin (R-Mass.) held during 83rd Congress that it was up to House committees to determine whether they would permit televising of their hearings. Senate in past has left matter to discretion of individual committees. Following Rayburn's latest statement, NARTB pres. Harold Fellows wired him asking meeting to discuss matter, adding that broadcasters "have earned and deserve an acknowledged position with all other media in coverage of the public sessions of our legislative bodies." NARTB's freedom of information committee, under Edgar Kobak, WTWA, Thomson, Ga., meanwhile sent letters to chairmen of Senate & House Rules Committees requesting early conferences to establish rights of TV-radio in covering legislative hearings. Richard L. Harkness, executive committee chairman of Radio & TV Correspondents Assn. (Congressional galleries) also said his group would take up matter with Rayburn on his return to Washington.

Amplifying his "minimum controls" philosophy, FCC chairman George McConaughy stated, in speech before Southern California Broadcasters Assn. in Los Angeles Dec. 30: "Dangerous thinking by wild-eyed theorists was the order of the day in the 1930's. These theorists descended upon Washington with the basic ideas and ideals that the only salvation for this country was for the Federal Govt. to assume a leading role—yes, I might add a commanding role, in controlling and regulating the operations of all business enterprises . . . I favor as few Govt. controls as possible consistent with the public interest and other considerations required by the Communications Act." An ardent Ohio State U football fan, McConaughy went to Rose Bowl game.

Vote on 1955 football TV plans will be taken next week as more than 1200 representatives of universities and colleges convene in New York for NCAA convention. Delegates will hear report and recommendations by NCAA's TV committee, under Harvey Cassell, U of Washington, which is expected to endorse nationwide telecasts again, but with some changes and "liberalization." This year, TV committee will present 5 alternative TV plans, but is expected to recommend only one.

All 3 DuMont-owned stations operated in the black during 1954, reports gen. mgr. Donald McGannon in year-end statement. Average billings ran 16% ahead of 1953 with "comparable composite increases in profit." Last report on WDTV, Pittsburgh, whose sale to Westinghouse for \$9,750,000 pends FCC approval, showed 1954 profit before taxes in accounting period to Oct. 10 was \$2,439,000 on revenue of \$4,153,000, with similar high returns for 1953 & 1952 (see Vol. 10:50, p. 9).

No major RCA-NBC staff changes are contemplated at Jan. 7 board meeting, according to latest advices—and we were wrong last week in reporting probable shifting of RCA staff v.p. Mannie Sacks, to new duties at NBC-TV. He will continue with parent RCA organization, continuing also as gen. mgr. of RCA Victor Records Div. and as an NBC v.p. paying special attention to talent.

NBC is releasing 30-40 TV engineers and technicians in N. Y. as of Dec. 31, mainly men of low seniority, due to curtailment of certain technical operations. There's no plan, though, to cut back colorcasting schedules during 1955, as rumored. DuMont Network also is dropping about 50 engineers and about 25 in program dept. (see p. 3).

Power increases: WJAR-TV, Providence (Ch. 10) to 316-kw ERP; WKRC-TV, Cincinnati (Ch. 12) to 316-kw; WDAK-TV, Columbus, Ga. (Ch. 28) to 234-kw.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 2

SUMMARY-INDEX OF THE WEEK'S NEWS—January 8, 1955

NBC BUYS NEW BRITAIN-HARTFORD UHF, plans super-power basic affiliate at Mt. Higby; Hearst buys WTVW, Milwaukee (Ch. 12) for \$2,000,000 (p. 1).

COLOR INTEREST AT MARTS at low ebb, RCA the sole exception, as industry seeks reasons for doldrums and the public's puzzling reaction (p. 2).

MAGNUSON PROPOSES EXTENSION of TV network-uhf investigation started by Bricker, as Kilgore & Chernoff prepare for more talks on "monopoly" probe (p. 5).

TV RATE STRUCTURE SETTLING DOWN as only 96 stations report increases during last half year, as shown by rate digests in TV Factbook No. 20 (p. 5).

4 UHF STATIONS LEAVE AIR in mixed markets; first station to radiate 1,000,000 watts gives enthusiastic report on coverage & shadow fill-in (p. 6).

EDWARD LAMB HEARING hits critical point, as FCC counsel Walter Powell resigns and Lamb moves for close of hearing and favorable decision (p. 7).

THEATRE OWNERS attack Zenith petition, urge rule-making rather than immediate commercialization of pay-as-you-look TV (p. 10).

TOLEDO "INTERIM CP" DEAL collapses, one initial decision issued, Providence's WPRO-TV gets FCC go-ahead, Zone I height compromise seen (p. 10).

FACTORY VALUE & TV MARKUPS DROP sharply in 1954, average price of TV set down to \$145 from \$170 in 1953. TV-radio sales: \$2.65 billion (p. 12).

SECOND-SET & REPLACEMENT MARKET drives mapped by trade for 1955; Philca returns to production of 17-in. sets as first step (p. 12).

PHILCO DEFENDS DISTRIBUTOR FRANCHISE agreements against Justice Dept. charges that they violate anti-trust laws (p. 14).

FIRM-TO-LOWER TV PRICE TRENDS reflected in introduction of more new models by big and small manufacturers at Chicago marts and elsewhere (p. 14).

9 BIG COMPANIES, ALL IN TV-RADIO, "rated" by Farber Magazine for management and labor, community & stockholder relations (p. 15).

TWO ALASKA STATIONS AIM for Feb. debuts; new stations planned within month in Tampa, Lexington, Ky., Dathan, Ala. & Jefferson City, Mo. (p. 11).

CHANGING NETWORK AFFILIATIONS & PATTERNS pointed up by FCC-approved sale of WDTV and CBS shifts in Phoenix, Albany, possibly Kansas City (p. 16).

CONTINUED NATIONAL FOOTBALL TV contracts certain—but on more liberal basis as result of Big Ten walkout threat at NCAA convention (p. 16).

NBC BUYS UHF STATION IN CONNECTICUT: NBC's first venture into uhf on its own will be in the thickly populated Connecticut River Valley -- a 1000-kw station atop Mt. Higby, in Middletown, some 12 mi. south of Hartford on the way to New Haven, about 23 mi. farther southeast. This week, it purchased WKNB-TV (Ch. 30), licensed to New Britain but with main studios in Hartford. As soon as FCC approves takeover, RCA will install 1-megawatt transmitter covering both cities and a wide countryside.

This latest testimonial of belief in uhf, with new station due to become a basic NBC outlet, unravels the "mystery of Mt. Higby" recently reported in these columns (Vol. 10:50-51 & 11-1). It sets in motion a train of developments that not only augur well for the future of uhf but indicate anew the changing face of TV as the rival networks maneuver for position (Vol. 10:50).

NBC's advent into superpower uhf comes even as reports of excellent coverage are being received from uhf's first million-watt plant in Wilkes-Barre and even as 4 more uhf are leaving the air (see p. 6) -- making 31 quitting since early 1953.

NBC is paying \$606,000 cash and assuming some \$200,000 in obligations for WKNB-TV and its AM counterpart WKNB (1-kw on 840 kc). It has bought up all stockholdings, control being in hands of Hartford adman Julian Gross (for detailed holdings, see p. 70, TV Factbook No. 19). It has given assurances to mgr. Peter Kenney and staff that they will be retained. And NBC pres. Pat Weaver promises "to develop a uhf service which will be as nearly comparable as possible [to] vhf."

Big network's action may give shot-in-arm to other faltering uhf projects, especially in Conn. and nearby Mass., and is expected to hearten uhf operators gen-

erally as well as point way to other networks. NBC won't reveal where its second allowable uhf will be acquired, stating simply: "We've got lots of ideas."

But the full force of the network and its parent RCA, with their enormous wealth, know-how and promotional powers, is now behind uhf. WKNB-TV, possibly with new call letters, will become the 5th uhf on the basic NBC network -- others being in Wilkes-Barre, Norfolk, Youngstown, Portland, Ore.

NBC will abandon shared affiliation with WNHC-TV (Ch. 8), pioneer New Haven outlet which also carries ABC, DuMont, CBS; and NBC indicates it's not going to await possibility its longtime 50-kw AM affiliate WTIC, Hartford, might get vhf Ch. 3 for which it has bitterly contested the Harry Butcher group. NBC commits itself just as irrevocably for the long pull for uhf in this area as CBS has in Milwaukee, where it bought WOKY-TV (Ch. 19), and as Storer has in Miami, with his new WGBS-TV (Ch. 23).

CBS isn't telling, either, where it will go for its own second uhf -- but it also is committed to get another. ABC is frankly watching what the others do first.

NBC might have had Meriden's Ch. 65 for the asking, since it's as yet unapplied for; but it chose to buy a going plant, said to be in excellent condition, and some think it preferred the lower Ch. 30 frequency. WKNB-TV claims to have up to 65% uhf conversions already in Hartford area, though figure is probably nearer 40% over its whole range in view of vhf WNHC-TV's head start. Hartford also has Ch. 18 WPTH-TV, which started last Aug., and WELI-TV has projected Ch. 59 in New Haven.

That uhf has made deep inroads in area is reflected by fact that (1) it has had enormous publicity and curiosity attention ever since RCA-NBC's pioneer uhf tests in Bridgeport, called by Weaver "the nursery of uhf"; and (2) progress shown by WKNB-TV, which started operating Feb. 1953, lost money steadily until Nov. 1954, then hit the black in big way, showing reported profit of \$20,000 a month in Nov. & Dec. NBC says it made a "good buy," even discounting the big investments facing it in new plant construction, let alone building toward 100% conversions to uhf.

(For additional reports on uhf and network maneuvering, see pp. 6 & 16.)

* * * *

Ten-week-old WTVW, Milwaukee (Ch. 12) has been sold for \$2,000,000 to Hearst Corp., publisher of Milwaukee Sentinel and founder-owner of WBAL-TV, Baltimore. Hearst thus withdraws from competition for Ch. 6 allocated to nearby Whitefish Bay. WTVW began operating Oct. 26 (Vol. 10:44), uses maximum 316-kw power from 50-kw RCA transmitter, 1105-ft. Blaw-Knox tower, 12-bay antenna. Around \$900,000 cash will be paid, rest being assumption of obligations and liabilities, largely payments due on big plant. It's ABC primary, with theatreman L.F. Gran as chief stockholder, was built after agreement among rival applicants WEMP, WFOX & Kolero Telecasting Corp. to merge with Milwaukee Area Telecasting Corp. Hearst TV-radio v.p. D.L. Provost, who manages WBAL-TV & WBAL, will supervise the new operation.

THE COLOR DOLDRUMS—WHYs & WHEREFORES: Never was color TV's sluggish condition more apparent than at Chicago marts this week. In contrast with year ago, color was scarcely mentioned. Several manufacturers showed color sets, but they were largely ignored by distributors and dealers.

Once-high optimism and enthusiasm for color has oozed out of all major manufacturers, with one powerful exception -- RCA. The RCA spokesmen insisted, with unabated vigor, that color will be put across -- single-handedly by RCA, if necessary -- but here's the kind of reaction we elicited from spokesmen at marts:

Motorola -- Executive v.p. Robert W. Galvin said onetime ambitious plans have been scaled down considerably, and company is now producing on a "very limited basis," though he noted that some orders were placed by distributors at recent convention. "I don't think color will accelerate in popularity in the first half of 1955," he said. However, cost of tube and sets is not the problem, he added, saying that there haven't been enough good color programs to induce public demand.

CBS-Columbia -- Spokesman said that his never-too-big color production has been scaled down to "very limited numbers." There's still interest in color, he added, but he believes it has to be nurtured far more than it has been.

Westinghouse -- TV-radio gen. mgr. T.J. Newcomb told us he's getting out of color production altogether "as soon as a few current commitments are disposed of." Though Westinghouse was one of the first to seek identification with color, Newcomb now wants no such identification whatever for Westinghouse. He's sharply critical of round tubes, says he won't get back into color until rectangulars are available. In retrospect, he said, Westinghouse's early dip into color wasn't exactly disappointing because expectations were never very high. Company simply wanted to see if consumers would go for color, as presented -- and they didn't.

Philco -- Recently, TV v.p. Fred Ogilby sent letter to all distributors saying that Philco wouldn't have a color set until "it can be sold with confidence at a reasonable price." He said this wouldn't be during first part of 1955, made no commitment thereafter. Purpose of letter, he said, was to bring up-to-date a similar statement at Aug. 2 convention, because he realized distributors and dealers wanted to know Philco's latest plans for color.

Admiral -- Though it introduced 21-in. color at \$895, set was displayed without fanfare, and spokesman merely referred us to recent statement by pres. Ross Siragusa: "Color TV will continue to develop and grow slowly. From 100,000 to 200,000 color sets will be sold during the year...Mass production of color receivers at prices the public can afford will not be feasible until a color tube is available at approximately \$50 to \$60."

Many others in industry are even more bearish -- for some of the companies above retain their hopes for color even though they're now convinced that its full-fledged emergence is still far off.

* * * *

RCA pres. Frank Folsom stands out sharply against this dim background, stating: "We're not exactly cowards, you know. We're going right ahead. We were the only ones producing 45rpm for a few years, then the others came along. We took black-&-white off the ground when no one else would. I believe that others in this industry want profits badly enough that they're not going to stand around while we sell color sets." He reiterated conviction that people who can afford Cadillacs and "Honolulu vacations" are going to buy.

Asked why such affluent folk haven't bought yet, Folsom said: "They haven't had good sets to buy -- mentioning no brand names."

In Chicago press conference this week, meanwhile, RCA v.p. Robert A. Seidel conceded "it will take time and further simplification of production methods to produce quality color receivers within reach of most consumers." He estimated that industry's 1955 color set production will run some 200,000, with sales of 160,000. This is well under Folsom's prediction last Sept. (Vol. 10:38) that total sales for 1954-55 would run 350,000.

CBS v.p. Richard Salant, who has lived with color as closely as anyone in his company, confesses he's "baffled". The answer "must come from psychologists, not market research people," he said. Failure of the luxury trade to buy is beyond his understanding, he admitted.

Each CBS sponsor will have had at least one crack at color by April, ending year of "rotation." After that, Salant says, "we're not stopping color, but our schedule has not been set yet. The manufacturers and the public will determine what we put on in color." CBS's own set-making division, CBS-Columbia, "is producing the number of color sets people will buy," he said. As for CBS-Hytron's 22-in. rectangular tube, Salant said: "We're not going to talk about it. There's been enough confusion. We had the 19-in., and RCA confused the industry with a 21-in. We're not going to make the situation any worse."

Salant's personal hunch is that dealer is the key; that color hasn't moved because good black-&-white sales have deprived dealer of incentive to push color.

From dealer's standpoint, however, networks and stations have fallen down -- transmitting so little color that public has scarcely had chance to see it. Recent "Videotown" survey of New Brunswick, N.J. (Vol. 10:41), showed only 8% of respondents had seen color, and this week Admiral disclosed that survey of Los Angeles,

conducted for it by Woodbury College, showed only 13% have watched color. Admiral survey also indicated that 1/3 of public would pay \$300 for 21-in. set, 27% would pay \$400, 23% would go to \$500 -- with "a handful" prepared to pay \$600 or more.

No significant increase in color programming may be expected this year, based on Salant's statement and those of NBC spokesmen who indicate that no substantial change from announced schedule is contemplated. Individual stations may augment network fare considerably, however, because they've been buying color film scanners at brisk clip lately.

* * * *

So there you are -- manufacturers, broadcasters, dealers all pointing finger at each other. But the dealer ends up by pointing to the consumer -- saying public just isn't interested in color.

Is the dealer right? Is color all it's cracked up to be? Here's our feeling, based on watching just about all the network color shows offered to date -- on both 15 & 21-in. sets -- plus close questioning of scores of guests over a year:

If black-&-white has, say, 5-to-100 times the impact of radio, depending on program, color can be said to have 1-to-5 times the impact of black-&-white. These "ratings" are entirely subjective, of course, based on no psychological research, and others will undoubtedly come up with different evaluations. Nonetheless, it's our belief that black-&-white supplies the basic information, gets the story across, and that color can be a very attractive embellishment -- but still an embellishment.

We have no doubt at all public will eventually buy color, rejecting monochrome just as public would reject the stripped-down automobiles of yesterday if they were offered today, even at stripped-down prices. But price of color must come down drastically and the utility of a color set must be expanded tremendously. Who would buy a car with automatic shift if he could use it only 5% of the time?

* * * *

But the complaints get louder. New York Times TV-radio columnist Jack Gould gets more exasperated daily. Enthralled with the holiday color programs on his RCA 21-in. set -- which were indeed the epitome of the television art -- he suggests there's something decidedly peculiar about way color is languishing. He writes:

"The difficulties are not to be minimized, notably on the economic front... But certain facts nonetheless are established. For all the alleged technical difficulties, this writer has been using a 21-in. color receiver under normal home conditions -- which means children switching the station dial too fast and tuning in color themselves -- and the serviceman has not been back once. Granted that this may be an isolated and lucky case, it does show that color TV is not too far away from everyday practicality...

"But color will not come about without the will to make it so. So far, RCA is the only firm to promise further immediate steps in color development -- receiver with more simple circuits... Many manufacturers frankly wish the subject of color would just disappear.

"This attitude is short-sighted. Sooner or later it will arouse the curiosity of Congressional committees as to the reasons why the ballyhoo over color has not been translated into reality."

Advertising Age editorializes that there may have been some deliberate restraint in the industry in the past, and states: "Set manufacturers won the battle of black-&-white as against color last year. This year, it is likely that the set producers will turn up on the other side of the color fence, and will push color set sales, rather than holding them back."

We think the reason for color's lassitude is much simpler and more innocent than any such dark allegations. It's the public. Black-&-white gave the viewer a new world. Color decorates it.

Too many able manufacturers and merchandisers have made valiant and tremendously expensive efforts to crack the color market -- RCA, Westinghouse, Motorola, CBS-Columbia -- for anyone to put the blame on set makers. The inevitability of color must be conceded -- but apparently it's going to come gradually.

MAGNUSON BACKS EXTENSION OF TV PROBE: About the only thing certain in the TV investigation picture after first week of Congress is that GOP Sen. Bricker's inquiry into the networks and uhf problems will be continued by Senate Interstate & Foreign Commerce Committee under Democratic Sen. Magnuson (Wash.).

Though Committee hasn't held its first meeting in new Democratic Senate -- it still has 2 Democratic vacancies -- Sen. Magnuson Jan. 6 submitted a resolution (S.Res. 13) which would extend investigation, authorizing necessary expenditures, employment of staff, etc. Probe would have died automatically Jan. 31. Passage of the resolution will be routine -- but mere fact of its introduction shows Magnuson's willingness to continue the inquiry started by previous Congress.

Harry Plotkin, Democratic counsel for Sen. Bricker's investigation, this week submitted report to Sen. Magnuson, presumably summarizing his staff work on inquiry to date and possibly making recommendations. Contents of report were not made public. Republican counsel Robert F. Jones is expected to make separate report -- and it's possible that Plotkin may submit further comments to Committee.

Investigators' work is now stalled, pending instructions from new Committee. This hiatus holds up -- and possibly ends -- Jones' efforts to obtain confidential network-&-station financial figures from FCC for use in probe (Vol. 10:52).

Two more Democrats will be named to Senate Committee, to give Democrats the same 8-7 majority enjoyed by Republicans in 83rd Congress. Official appointments won't be made until next week at earliest, but at week's end there were rumors -- which could not be confirmed -- that Democrats had selected Sens. O'Mahoney (D-Wyo.) and Thurmond (D-S.C.) for Commerce Committee posts.

* * * *

On another probe front, Sen. Kilgore (D-W.Va.), chairman-designate of Senate Judiciary Committee, will confer next week with broadcaster Howard Chernoff, who has been consulting with broadcasters and others in preparation for possible investigation of "monopoly in the TV & radio business" (Vol. 10:50-51).

House Commerce Committee, like its Senate counterpart, will be in throes of reorganization for next few weeks. To be headed by Rep. Priest (D-Tenn.), it may have as many as 5 Democratic vacancies to fill, depending on final decision as to the ratio of Democrats to Republicans on House committees.

TV RATE STRUCTURE IS SETTLING DOWN: It may be that TV station rates, which usually are triple or more those of counterpart radio stations, are at long last achieving stabilized levels. Whereas rate increases every 6-12 months have been the rule, as TV set ownership increased by leaps and bounds, they're now the exception, judging from the digests of rate cards of each U.S. (and Canadian) commercial station published in the 20th edition of our semi-annual TV Factbook, now on the presses.

Of the 426 stations on air as 1955 began, 11 of them non-commercial and 101 of them 1954 starters, only 96 increased time rates during the 6 months since our July 15 Factbook. Most of the increases were by vhf outlets, 78 out of 305 (about 25%) showing higher base hour rates. Other time segments went up commensurately.

Among 121 uhf stations that survived 1954, when 25 quit the air, only 18 (or about 15%) jumped rates while 4 reduced them.

Increases ranged from the \$15 per hour (to \$165) of uhf WTRV, Asbury Park, N.J. to \$1000 per hour -- two big-city vhf stations actually doubling their rates from \$1000 to \$2000 recently. These were WWJ-TV, Detroit and WATV, Newark.

Highest hourly rate now on the books is \$6200 Class AA (10:30-11 p.m. daily & 6-7:30 p.m. Sun.) of NBC flagship WRCA-TV, New York. CBS's key WCBS-TV's Class A hour (7:30-10:30 p.m. Mon.-Sat. & 6-11 p.m. Sun.) is \$6000, having jumped in May from \$4800. Next highest on the books: WNBQ, Chicago, \$3300; WABC-TV, New York, \$3100; WBBM-TV, Chicago, \$3000; KNXT, Los Angeles, \$2700; KRCA, Los Angeles & WPTZ, Philadelphia, \$2500; WCAU-TV & WFIL-TV, Philadelphia, \$2400; WBZ-TV, Boston & WWJ-TV, Detroit, \$2000.

Lowest rate among vhf stations is the \$100 quoted by KXLF-TV, Butte, Mont., taking that distinction away from KVOs-TV, Bellingham, Wash., which raised from its

original \$90 an hour to \$200. Only vhf stations that lowered were KTEN, Ada, Okla., down from \$300 to \$225; KGVO-TV, Missoula, Mont., from \$200 to \$150.

Highest base rate among uhf stations is the \$600 of WCAN-TV, Milwaukee, whose purchase by CBS awaits FCC approval; it went up recently from \$500. Next are KPTV, Portland, Ore., \$550, up \$100 recently; WGBS-TV, Miami, \$500; WENS, Pittsburgh, KMJ-TV & KJEO, Fresno, \$450. Biggest uhf jump was that of WKNA-TV, Charleston, W.Va., \$200 to \$350. Uhf rates range down to the \$100 of WKNY-TV, Kingston, N.Y.; others that cut in recent months were WTAO-TV, Cambridge, Mass., from \$375 to \$250; WGLV-TV, Easton, Pa., from \$200 to \$150, and now-defunct WNAM-TV, Neenah, Wis., \$150 to \$100.

Illustrative of how TV & AM rates compare are these examples in major cities: New York, WRCA-TV's \$6200 vs. WRCA's \$1200 and WCBS-TV's \$6000 vs. WCBS's \$1350; Philadelphia, WPTZ's \$2500 vs. KYW's \$450; Boston, WBZ-TV's \$2000 vs. WBZ's \$560; Washington, WRC-TV's \$1000 vs. WRC's \$300 and WTOP-TV's \$1100 vs. WTOP's \$375. In only one instance can we find higher radio than TV rates where stations are operated by same interests: Cincinnati, WLW's \$1080 vs. WLWT's \$1000.

Most of Canada's 24 stations went on air during latter 1954, so the relatively few rate changes there are meaningless as yet. CBC recently hiked network TV rates.

* * * *

Factbook No. 20 lists not only all on-air stations, but complete data (including rate digests) on 18 more due to start during next few months. It also lists all 24 Canadian stations, plus 2 others due to start shortly, and all Mexican and Cuban stations. Also published are complete personnel, affiliation and rate data on the 4 U.S. networks and CBC. Brought up-to-date is Directory of TV Stations in Foreign Countries, which has become the standard reference throughout the world.

FOUR UHF OPERATORS in mixed markets announced this week they were going off air, as the operator of the nation's first 1,000,000-watt uhf station—in an all-uhf market—pointed enthusiastically to reports of increased long-distance reception and vastly improved coverage of shadow & fringe areas. The stations going off air, all of which had previously indicated their intentions to shut down or move to different cities:

KCEB, Tulsa (Ch. 23), which received FCC permission to quit early in Dec., then went back on air on limited film schedule (Vol. 10:49 & 11:1), this week reported it had ceased operations pending financial reorganization.

WBTM-TV, Danville, Va. (Ch. 24) threw in sponge Dec. 31 because of lack of national advertising, despite last-minute attempt by local merchants to keep it going (Vol. 11:1).

WKST-TV, New Castle, Pa. (Ch. 45) requested FCC permission to cease operation for 90 days beginning Jan. 14, pending action on its petition to move to Youngstown, O. (Vol. 11:1). It told FCC it had lost \$70,000 on its operation—after radio profits—since it began operation in April 1953.

WNAM-TV, Neenah, Wis. (Ch. 42) went off air Jan. 2 in line with terms of deal whereby it is to purchase control of Ch. 5 grantee WFRV-TV, Green Bay, Wis. (Vol. 10:49). Application for the purchase was filed with FCC this week.

* * * *

First reports on coverage from 1-megawatt WBRE-TV, Wilkes-Barre, Pa. (Ch. 28), an NBC basic, indicate sharp improvement in penetration of previous shadow and fringe areas, as well as excellent long-distance reception, according to mgr. David M. Baltimore, himself a graduate engineer (MIT). "We're overwhelmed by the reports," he told us. "It's working like a charm." Though detailed measurements haven't been made yet, he said letters and spot checks indicate reliable signal as far as 75 mi. to the west, with excellent reports of direct reception in Sun-

bury and Williamsport, 54 & 58 mi. distant. Good reports have also come from Bethlehem, 50 mi. southeast over rugged terrain.

Wilkes-Barre's WILK-TV (Ch. 34), ABC-affiliated, didn't make boost to 1-megawatt last week end as planned (Vol. 11:1), now says it hopes to turn on full power this week end or early next week. By afternoon of Jan. 7 it had turned power up to about 260-kw, planned to get to 500-kw same evening, gradually increasing over week end until full 1000-kw is reached. With Wilkes-Barre now becoming known as "mother of megawatts," interesting sidelight on story is that the area's CBS-affiliated WGBI-TV in nearby Scranton (Ch. 22) has applied to FCC for CP to install GE equipment to bring its power to 1000-kw.

Meanwhile, RCA—whose installation was first on air in Wilkes-Barre—reports all transmitting equipment has been delivered to Storer's KPTV, Portland, Ore. (Ch. 27) for its boost to 1-megawatt, with antenna only major item yet to come. KPTV's target date for 1000-kw is March 1. RCA also has orders for megawatt equipment from Storer's WGBS-TV, Miami (Ch. 23) and from NBC for newly acquired WKNB-TV, Hartford on Ch. 30 (see p. 1).

New Congress always brings new batch of bills bearing on TV-radio industry. First 4 of these were introduced in House this week, all identical to previous bills which died with 83rd Congress. Highlight was reintroduction by Rep. Hinshaw (R-Cal.) of his bill to classify subscription TV as common carrier (Vol. 9:31,41); it's now labeled HR-524, is same as his HR-6431 in last Congress. Other bills re-introduced: By Rep. St. George (R-N.Y.), HR-177, the "Strike it Rich" bill which would require broadcasters "to investigate persons and organizations on whose behalf contributions are solicited on radio & TV programs"; by Rep. Celler (D-N.Y.), HR-626, to ban commercial sponsorship of broadcast Congressional hearings or proceedings; by Rep. Keating (R-N.Y.), HR-789, to restrict broadcasting of horse race and other gambling information.

Personal Notes: Leonard H. Hole, NBC-TV programs div. production director, named director of program development, succeeded by Anthony M. Hennig, ex-director of plant operation; Thomas O. Loeb, producer & mgr. of NBC business unit, promoted to mgr. of TV network programs div. . . . John F. Day, veteran newspaperman recently asst. managing editor of *Newark Star-Ledger*, named CBS director of news for TV-radio, replacing Edward P. Morgan, now ABC . . . Norman A. Gittleson, ex-gen. mgr. of WJAR-TV, Providence, named exec. v.p. & gen. mgr. of ex-Gov. Francis P. Murphy's WMUR-TV, Manchester, N. H., succeeding Harvey Carter, resigned . . . Joseph Sitrick, ex-Voice of America & *Broadcasting-Telecasting*, named mgr. of NARTB publicity and informational services, replacing John H. Smith Jr., now with Chrysler Corp. . . . Bette Doolittle, ex-asst. TV code director of NARTB, heads new dept. of home-making service set up by P. Ballantine & Sons, Newark (brewers), big TV users . . . Wm. Dempsey promoted to program mgr. of KPIX, San Francisco, succeeding R. W. Wassenberg, who becomes station mgr. of KTVU, Stockton . . . Dr. Herman H. Hohenstein, for last 29 years director of Lutheran Church-Missouri Synod's KFUE, St. Louis, has been appointed supervisor of newly formed TV-radio extension dept., set up to help pastors and laymen plan and conduct religious programs; KFUE holds CP for Ch. 30. Emerson Russell, ex-gen. mgr. of Huffman Adv., St. Louis, succeeds Dr. Hohenstein as mgr. of KFUE . . . Layne Beaty, ex-WBAP-TV, Ft. Worth, succeeds Kenneth Gapen as director of Dept. of Agriculture TV-radio service . . . Fred M. Kiefer, district supervisor for NBC merchandising dept. in N. J. & Pa., named asst. mgr. of the dept. in N. Y. under Murray Heilweil . . . Will Powell, son of film star Wm. Powell, Princeton graduate recently with 20th Century-Fox, named NBC coordinator of program development under Frank Cleaver, NBC program director for Pacific div. . . . Roger Van Duzer, ex-WPDQ, Jacksonville, Ch. 12 applicant, named operations mgr. of upcoming KBET-TV, Sacramento, Cal. (Ch. 10), due in Feb. . . . Bert Chance resigns as Sacramento sales mgr. of KOVR, Stockton, to join new KBET-TV, Sacramento . . . R. L. (Bud) Swats Jr., from NBC radio, Chicago, named mgr. of NBC radio network sales, Detroit, in separation of TV-radio staffs . . . Colby Lewis, production director of upcoming educational WGBH-TV, Boston, named production mgr. of upcoming educational WTTW, Chicago; he's ex-asst. program mgr., WTMJ-TV, Milwaukee . . . Robert F. Bender, ex-WKRC-TV and gen. mgr. of WKRC, Cincinnati, named TV-radio v.p., Haehnle Adv., Cincinnati . . . J. Richmond Ritenour, TV dept. head, elected v.p. in charge of TV, Modern Talking Picture Service Inc., N. Y. . . . Robert P. Canavan, ex-ABC-TV, joins Devney & Co., reps. . . . Calvin J. Smith, KFAC, Los Angeles, elected director of NARTB's District 16, succeeding Albert D. Johnson, ex-KOY-TV, Phoenix, now gen. mgr. of KENS, San Antonio . . . H. Weller Keever named national sales mgr., NBC film div. . . . Charles Brooks, ex-Kamin Adv., Austin & San Antonio, named sales promotion director, KTBC-TV & KTBC, Austin, Tex. . . . George Harding named Branham TV-radio v.p., Dallas . . . Wm. Thomas Hamilton, ex-CBS, on Feb. 1 becomes sales mgr. of WNDU-TV, Notre Dame U's upcoming new uhf . . . Lawson Paynter named business mgr., Campbell-Ewald TV-radio dept.

Harry J. Lavery, 49, with RCA broadcast marketing dept. sales for 25 years, was killed Jan. 3, along with his 7-year-old daughter, in an auto accident near Rocky Mount, N. C. In hospital and expected to survive are his wife and a 10-year-old daughter.

Lincoln P. Simonds, 55, mgr. of Hollywood office, Joseph Weed Co., died suddenly Dec. 30. Survivors are his wife, a son and daughter.

EDWARD LAMB HEARING had 2 sharp breaks this week: (1) FCC chief counsel in case, Walter R. (Bucky) Powell, resigned Jan. 3 to join legal staff of NARTB. (2) Lamb counsel moved on Jan. 7 that examiner Herbert Sharfman call off hearing immediately and render decision recommending that FCC grant Lamb renewal of his licenses—on grounds Commission has failed to prove that Lamb is guilty of misrepresentation in failing to disclose alleged past pro-communist leanings.

FCC has finished its presentation and Lamb was to present his side starting Jan. 18, but his counsel summed up situation as follows: "The bankruptcy of the Broadcast Bureau's evidence to date is appalling, and to require Mr. Lamb to answer further the incredible and defamatory charges of such irresponsible and disreputable witnesses as have been heard is an abuse of process and is not conducive to the orderly and prompt dispatch of the Commission's business."

After Powell's resignation, FCC appointed Edward J. Brown to handle case, asked postponement from Jan. 18 to Feb. 9 so that Brown can familiarize himself with case. FCC's Brown shouldn't be confused with Lamb counsel Russell M. Brown.

Responsibility for handling FCC's side is transferred to Hearing Div., where Brown reports to chief Robert Rawson. No replacement for Powell as division chief has been selected. At NARTB, Powell reports to chief attorney Vincent T. Wasilewski and replaces Abiah A. Church, who recently joined Storer Bestg. Co.

Some of changes at DuMont, as result of curtailment of network and reduction of personnel (Vol. 11:1): Robert I. Brown named acting mgr. of general engineering, replacing Robert Bigwood; David Lowe named acting mgr. of news & public affairs, instead of director & supervising producer; Roger Gerry remains as supervising producer, with Ted Hammerstein & Henry Opperman leaving; Don Trevor named film editor; Edward H. Koehler remains as area supervisor, with Joseph R. Cox, Jack Batte & Charles Hilton leaving; Wm. Muldoon out as mgr., cooperative programs; Alice Guego out as supervisor, continuity acceptance.

Agenda for NARTB's semi-annual board meetings Jan. 26-28 at Hollywood Beach Hotel, Hollywood, Fla., includes progress report on pilot study of county-by-county set census (Vol. 10:26), subscription TV, community antenna systems, and plan of TV code review board to extend affiliation to film production companies (Vol. 10:49). TV board meets Jan. 26, radio board Jan. 27, joint board final day.

Father Max Jordan, NBC's chief European correspondent in the late '20s & '30s and later its director of religious programs, recently became a Benedictine monk in Beuron, Germany, on the third anniversary of his ordination to the priesthood, when he took the name of Father Placid Jordan.

Ben Grauer, the NBC announcer & commentator, wins annual man-of-the-year award of the Metropolitan Temple Brotherhoods Jan. 20, along with a special citation from the Jewish Chautauqua Society.

John Stuart Jr., editor of Voice of America's central news desk, former correspondent for VOA in Europe, Far East and at UN, named VOA news chief for Europe with headquarters in Munich.

George Y. Wheeler II, on NBC Washington staff since 1937 when he joined it as a page boy, was elected RCA Washington staff v.p. Jan. 7.

Senate may investigate televised boxing, according to UP dispatch quoting Sen. Magnuson (D-Wash.), chairman-designate of Commerce Committee.

Station Accounts: TV and radio can grow side-by-side in national spot field, with neither weakening the other, in opinion of Adam J. Young Jr., new pres. of Station Representatives Assn. In statement this week, he said that although "the very success of TV is to an extent overshadowing the growing radio medium," there is "every reason for spot radio advertising to grow." Many advertisers, he declared, are currently testing TV or are looking for the "right combination" of TV & radio. He said TV had proved a "most potent" national spot medium and described prospects for increased national TV spot business in 1955 as "excellent" . . . Budweiser Beer buys Screen Gems' *Damon Runyon Theatre*, based on Runyon's short stories, for syndication starting April 15, thru D'Arcy & Wm. Morris Adv., Los Angeles . . . Robert Burns Cigars sponsors weekly Chicago city championship bowling series for 13 weeks starting Jan. 4 on WNBQ, Tue. 10:30-11 p.m., thru Young & Rubicam . . . Apt title for real estate program for prospective home buyers, good for single or partic. sponsorships, is *House Detective*; it runs 10:30-11 p.m. Tue.-Wed.-Thu. and 1-1:30 p.m. Sat. on WATV, Newark . . . Ideal Mortgage Co., Beverly Hills, Cal., reported so pleased with results of spot campaign on Los Angeles stations in 1954 it's now producing own 13-week film series under pres. Robert Bergman, who has also been active in financing motion pictures . . . Uhf WTVI, Belleville-St. Louis, renews contract to televise all road games of St. Louis Cardinals in 1955, taking option for 1956 schedule . . . Underwater commercial is used by Hanna Enterprises, San Francisco, to demonstrate its "Pool-master," a new hydro-jet vacuum cleaner for swimming pools, on KPIX, thru Sherman-Harkness Adv., San Francisco . . . Among other advertisers currently reported using or preparing to use TV: Colden Mfg. Co., Newark (Fomed-Hair mattresses), thru Wexton Co., N. Y.; Cedric Adams Inc., Minneapolis (Cedric Adams Enterprises), thru Addison Lewis Adv., Minneapolis; Hal-O-Gene Corp., Newark (rheumatic remedy), thru Fiore & Fiore Adv., Jersey City; Ironrite Inc., Mt. Clemens, Mich., thru Brooke, Smith, French & Dorrance, Detroit; Climalene Co., Canton, O. (detergents), thru Ruthrauff & Ryan, Chicago; Clopay Corp., Cincinnati (window shades), thru Fairfax Inc. Adv., N. Y.; Gates Rubber Co., Denver (tires, tubes & batteries), thru Harold Walter Clark, Denver; Procter Electric Co., N. Y. (ironing tables, pad-cover sets), thru Weiss & Geller, N. Y.; All-O-Wheat Cereal Co., Ogden, Utah (cereals, flour, pancake flour), thru Halverso-Hust Adv., Ogden; Emaline Knitted Sportswear Co., N. Y., thru Dunay Co., N. Y.

Rate increases: Storer's new WGBS-TV, Ft. Lauderdale-Miami, raises base hour from \$300 to \$500, min. \$60 to \$80, and adds new 7:30-10:30 p.m. daily Class AA min. only \$100 rate; WDEL-TV, Wilmington, Del., adds new 8-10 p.m. daily Class AA \$1000 hour, \$200 min., Class A hour goes from \$575 to \$800, min. \$100 to \$160; KFSD-TV, San Diego, adds 8-10 p.m. daily Class AA \$600 hour, \$120 min., Class A hour remains \$500; WALA-TV, Mobile, raises base hour from \$300 to \$400, min. \$60 to \$80; KTBC-TV, Austin, Tex., from \$300 to \$350 & \$60 to \$70; CKSO-TV, Sudbury, Ont., \$150 to \$200; KGO-TV, San Francisco, adds new 7:30-10 p.m. Class AA \$1200 hour, \$250 min., Class A hour remains \$1100.

KBST-TV, Big Spring, Tex., signed this week as 12th small-city station to participate in CBS-TV's "Extended Market Plan" to provide network programs at minimum cost (Vol. 10:49-50).

DuMont Network flashing news of its programs and personalities, along with WABD's, on 250-ft. electric sign designed by Douglas Leigh on east side of Broadway between 44th & 45th Sts.

Network Accounts: Success of partic. sponsor programs on CBS-TV & NBC-TV prompts ABC-TV to put its projected new hour-long Disney daytime program on sale in 15-min. segments, thus making possible as many as 20 sponsors. Film show is tentatively scheduled for next fall, Mon.-thru-Fri. 5-6 p.m. ABC pres. Robert Kintner and program director Robert Lewine are currently on west coast to iron out details with Disney . . . Bing Crosby signs exclusive contract with CBS-TV for 2 one-hour filmed programs this year, to be produced by Ralph Levy during March and in June or July; CBS-TV has right to one network rebroadcast of each program . . . Lehn & Fink Products (cosmetics) to sponsor re-runs of *I Love Lucy*, under as yet unselected title, on CBS-TV starting April 17, Sun. 6-6:30 p.m., thru McCann-Erickson . . . General Foods planning hour-long colorcast March 29 featuring Ringling Bros. circus, networks undetermined, in extravaganza similar to big Rodgers & Hammerstein show last spring (Vol. 10:13) . . . General Motors to sponsor annual one-shot Motorama extravaganza for preview of new autos on NBC-TV Jan. 19, Wed. 10-11 p.m., thru Kudner; Bob Hope will be m.c. . . ABC-TV to offer *Ozark Jubilee*, its new country-style show originating from Springfield, Mo., as a co-op for first 30 min., while retaining second half-hour for network sponsorship; program starts Jan. 22, Sat. 9-10 p.m. . . Miami Beach is origination point week of Jan. 10-14 for Dave Garro-way's 7-9 a.m. *Today* (which celebrates 3rd anniversary Jan. 14) and for Steve Allen's 11:30-1 a.m. *Tonight*; both shows will feature remotes from tourist attractions at resort, celebrities, etc. . . Jackie Gleason keeps raking in the blue chips, signing new personal services contract this week with CBS-TV for \$100,000 a year for 15 years starting in 1957, following by only 2 weeks his \$11,000,000 2-year contract with sponsor Buick (Vol. 10:52).

Top 10 people in the agency field, as picked by the venturesome editors of *Advertising Agency Magazine*: Bruce Barton, chairman, BBDO; Thomas D'Arcy Brophy, chairman, Kenyon & Eckhardt; Leo Burnett, pres. Leo Burnett Co.; Fairfax M. Cone, pres., Foote, Cone & Belding; Ben Duffy, pres., BBDO; Marion Harper Jr., pres., McCann-Erickson; Sigurd S. Larmon, pres., Young & Rubicam; Philip W. Lennen, ex-chairman, Lennen & Mitchell; David Ogilvy, pres., Ogilvy, Benson & Mather; Stanley B. Resor, pres., J. Walter Thompson. They're not necessarily ranked in this alphabetical order, were selected because of their success, the standards of their agencies, and accomplishments in outside fields.

Skyline TV Group is what Time Inc. stations—KLZ-TV, Denver; KOB-TV, Albuquerque; KTVT, Salt Lake City—now call themselves. As of Jan. 1, they're being offered at group discount of 3% from earned rate when 2 stations are bought, 6% when 3 are bought, discounts being limited to programs only. Each station has own national rep, but special national sales rep J. I. Meyerson has also set up headquarters at 3432 RCA Bldg., N. Y. (PLaza 7-1298).

First edition of Curtis Circulation Co.'s new pocket-size weekly, called *TV Program Week* and patterned along same editorial and sectionalized lines as Walter Annenberg's big-circulation *TV Guide*, went on newsstands Jan. 6. Curtis also distributes *Saturday Evening Post*.

P. A. T. Bevan, senior member of BBC planning & installation dept., named chief engineer of new Independent Television Authority, which institutes commercial TV in England next Sept.

New reps: KBAK-TV, Bakersfield, Cal., to Weed (from Forjoe); KANG-TV, Waco, Tex., to Raymer (from Pearson); WGBS-TV, Miami, to Katz.

Telecasting Notes: TV feature film market "underwent a virtual revolution" in 1954, states *Billboard's* Gene Plotnik in Jan. 8 issue. It was expected that feature film sales efforts would be concentrated in newer and smaller stations, but "in the spring a new development occurred which staggered the industry—several groups of high-quality, first-run pictures burst upon the market, and they were demanding prices such as had never before been paid for TV film" . . . Top quality features which made debut last year, as enumerated by *Billboard*: General Teleradio's "Million Dollar" 30-picture group, acquired from Bank of America; Hygo's "Big Ten," from Chesapeake Industries; MPTV's 12 *Sherlock Holmes* films from Universal; Associated Artists' 56-picture package; Hollywood TV Service's (Republic) 26-film "Diamond" group . . . Michael Sillerman reports his Television Programs of America, having done \$3,000,000 business in Dec., will show total 1954 sales of \$12,000,000, which he says make TPA No. 1 syndicator of TV films; he's now planning a film on how-to-sell-film . . . For TV film supervisors, Van Praag Productions, 1600 Broadway, N. Y., has issued second of series of pocket-sized handbooks to advise on what type of film to use in a given circumstance; it's titled *Take Stock of Your Picture*, follows up first one, *The Lens in Your Picture* . . . More hinterland originations as antidote to stereotyped Hollywood & New York-originated TV shows are again demanded by *Variety's* George Rosen in leading article in 292-p. 49th anniversary edition Jan. 5. Continuing his long-time "Get Out of Town Crusade," Rosen carries approving quotes and suggestions from station veterans like Hugh Terry, KLZ-TV; George Burbach, KSD-TV; Charles Vanda, WCAU-TV; Robert D. Swezey, WDSU-TV; Bud Sugg, WKY-TV; Mitchell Wolfson, WTVJ; D. L. Provost,

WBAL-TV . . . Among other big-name articles in the special edition, CBS-TV pres. Jack Volkenburg defends continuity in TV programming, as opposed to one-shot "spectacular"-type shows, NBC pres. Pat Weaver defends "staying live" . . . Canned laughter on TV shows is subject for good-natured spoof in Jan. 10 *Newsweek*, which reports that filmed shows which have experimented with no-laugh policy have all returned to giggle-box techniques, resulting in increased ratings. As to dubbed recorded laughter, *Newsweek* remarks: "People who once, in a moment of abandon, guffawed at Stoopnagle & Budd can, without knowing it, hear their youthful follies repeated as the background for a TV film" . . . "Some of the old laughs," says *Newsweek*, "are peddled by record companies who deal in sound effects. One company has a record for sale carefully labeled 'Applause,' 'Applause & Whistles,' 'Applause, Large Spirited Audience,' and 'Large Audience in Continuous Hilarity.' For more effete occasions, EMI even made a platter in London [designated] 'Polite Applause with Murmurs'" . . . Playwright Maxwell Anderson writing book for 90-min. musical play, adapted from Mark Twain and titled *Raft on the River*, to be presented on NBC-TV's Hallmark show as a sort of preview to lengthier Broadway stage play due next fall; it has 5 songs by late Kurt Weill, with whom Anderson had been preparing a musical version of *Huckleberry Finn* . . . Perry (Skee) Wolf, producer of CBS-TV *Adventure* series, assigned to produce new *Conquest of the Air* series being filmed in cooperation with U. S. Air Force; Robert Northshield becomes producer of *Adventure* . . . Gordon Jenkins, who composed *Manhattan Towers*, signed by NBC-TV program v.p. in Hollywood to handle musicals and color "spectaculars."

Demonstration of new 9x12-ft. projection unit by Fleetwood Corp., Toledo, Ohio, at Pentagon this week (Vol. 11:1) drew enthusiastic response from about 125 visitors, mostly military and civilian govt. observers, with a smattering of industry people. The \$2350 unit is designed for closed-circuit or off-air. Regular off-air picture was used for demonstration. Fleetwood plans other demonstrations soon in other cities, promises 30-day delivery.

Title of biggest closed-circuit TV producer goes to NBC's new Telesales Dept., which plans 300 such shows during 1955—or nearly one a day. Its biggest recent effort was Dec. 29 closed-circuit colorcast to NBC-TV basic stations in 53 cities, where some 3000 food brokers saw live show featuring Dave Garroway, Steve Allen & Arlene Francis, as guests of Star-Kist Foods, which recently bought \$900,000 in participations on NBC-TV's *Today*, *Home & Tonight* shows. Telesales Dept. is headed by Erik Hazelhoff.

"Closed-circuit TV has come of age in past 12 months as a potent selling tool for American industry." So said Box Office TV pres. Wm. P. Rosensohn in year-end report to stockholders, revealing that firm had booked "a total gross volume of close to \$1,000,000" on basis of 12 business meetings last year, seen by total of about 300,000 people. He said BOTV expects to handle 50 closed-circuit sessions in 1955, with 4 shows already booked for first 2 months of year.

Training in closed-circuit TV techniques will be offered military and civilian personnel of Defense Dept. in special 5-day course to be held at Jerrold Electronics Corp., Philadelphia, starting Jan. 17. Subjects will include planning, operation, maintenance and applications of closed-circuit TV systems used at military camps for lectures, demonstrations, training films, chaplain talks, etc. Course is first major activity of Jerrold's new govt. div., headed by Max H. Kraus.

Administrators of new TV performers' pension plan (Vol. 10:47) were announced this week by networks and AFTRA (AFL). Management and contract employes are represented by 3 trustees & 3 alternates each. Representing management are: Air Features Inc. pres. I. S. Becker; NBC v.p. Emanuel Sacks; J. Walter Thompson Co. v.p. Edward G. Wilson. Their alternates: General Teleradio v.p. Gordon Gray; ABC secy.-gen. counsel Geraldine Zorbaugh; Young & Rubicam v.p. David Miller. Employe trustees: AFTRA national exec. secy. George Heller; announcer Clayton (Bud) Collyer, a director of AFTRA's N. Y. local; AFTRA pres. Frank Nelson. Alternates are Claude McCur, Alex McGee & Raymond Jones of AFTRA executive staff. Trustees hold first meeting Jan. 11. Networks are now contributing 5% of "gross compensation" due each employe into welfare & pension fund—a rate estimated at \$2,500,000 annually.

Subscription TV can be expected to appear more and more as subject of articles in general magazines, e.g., feature in Dec. 26 *American Weekly* which begins: "How would you like TV without commercials?" It's built around Telemeter tests in Palm Springs, Cal.

First Texas-originated closed-circuit business meeting was held Jan. 3, when Humble Oil Co. used TV network lines to explain 1955 sales programs to 4000 sales personnel in 10 Texas cities.

Trial of anti-trust complaint against 12 movie companies to compel them to release 16mm films to TV and other non-theatrical outlets (Vol. 10:43) was set for Sept. 6 in Los Angeles Federal Court.

Technical details of Audimeter, automatic device for recording program viewing and listening on 16mm film, are given in January *Electronics Magazine* by A. C. Nielsen's A. C. Lewis Brown.

TV in every classroom is part of specifications of new \$2,000,000 high school in Vancouver, Wash.

Color Trends & Briefs: Designed for color from ground up, new \$2,000,000 studios will be built by GE for WRGB & WGY, Schenectady, to be completed mid-1956. Robert B. Hanna Jr., mgr. of GE broadcasting stations dept., stated: "We are pioneering by actually designing a new building to meet the space and equipment requirements of local color programming." Structure will cover nearly an acre, include 3 TV and 2 radio studios, the largest an auditorium seating 300.

Approximately 20,000 color sets have been produced, according to trade statisticians. No figures on actual sales are available, although *Television Age Magazine* estimates 9690 have been distributed—including 3000 in New York, 1000 each in Chicago & Philadelphia, 500 in Los Angeles.

Jan. 10 week network color schedules: NBC-TV — Jan. 10, *Producers' Showcase*, "Yellow Jack," 8-9:30 p.m.; Jan. 12, *Norby*, 7-7:30 p.m.; Jan. 15—*Max Liebman Presents*, "Naughty Marietta," 9-10:30 p.m. CBS-TV—Jan. 12, *Douglas Edwards & The News*, 7:30-7:45 p.m.; Jan. 15, *Big Top*, noon-1 p.m.

First view of RCA 21-in. color set, for general public, is scheduled for Jan. 10, when sets will be placed in windows of RCA Exhibition Hall for viewing of 90-min. *Yellow Jack*. Other sets will be located on lower level, in Johnny Victor Theatre.

CBS-Columbia is entering industrial-TV field, offering closed-circuit field sequential color system. Production will be centered at Long Island City plant under Robert K. Hartman, director of govt. & industrial contracts.

RCA shipped 3-V color film cameras Dec. 28 to WBTV, Charlotte, N. C. and WDEL-TV, Wilmington, Del.; another Dec. 30 to upcoming WFLA-TV, Tampa, Fla. (Ch. 8), due mid-Jan.

Britain will have color in 2-3 years, not before, BBC director-general Sir Ian Jacob stated this week. BBC won't colorcast, he said, until "really foolproof" sets are on market.

Colorvision Inc.'s process of putting color on black-& white film, by splitting image into 3 small pictures (Vol. 10:45), is being tested in Hollywood by Ziv, most color-conscious of the TV film producers.

Unusual wrinkle in colorcasting technique of WBZ-TV, Boston will be to telecast NBC's Eastman-sponsored *Norby* 4 days late, putting film through own film cameras. Station has both RCA 3-V camera and DuMont scanner.

"Fundamentals of Color Television," by Wm. F. Boyce, is latest technical book on the subject. It's 216-pp., published by Howard W. Sams Co. (\$2).

ONE INITIAL DECISION came out of FCC this week —Seaton Pub. Co. (Fred Seaton, Asst. Defense Secy.) getting nod for Ch. 5 in Hastings, Neb. after drop-out of Strand Amusement Co., while a big "interim" CP deal for Toledo's Ch. 11 fell through. Four more uhf CPs were cancelled: KETV, Little Rock, Ark. (Ch. 23); KCTV, Sioux City, Ia. (Ch. 36); KFAZ, Monroe, La. (Ch. 43); WSHA, Sharon, Pa. (Ch. 39).

The Toledo deal was to be like that for KSLA, Shreveport, La. (Ch. 12), where 3 applicants joined forces to get grant and build station pending outcome of competitive hearing. All 7 Toledo applicants had tentatively agreed to throw \$100,000 each into pot, winner of hearing to pay other 6 back, but one applicant decided to pull out, quashing plan.

That grand-daddy of all "protest" cases was decided this week, FCC restoring effectiveness of CP for WPRO-TV, Providence (Ch. 12), which has been blocked from building for more than a year because of protest by

SUBSCRIPTION TV petition of Zenith Radio Corp., asking immediate commercialization without rule-making (Vol. 10:49), was roundly lambasted this week when Joint Committee on Toll-TV filed formal opposition with FCC, urging full hearings be conducted. Stating it represented owners of some 75% of nation's 16,000 movie theatres, JCTT divided opposition into these major parts:

(1) Attack on Zenith's argument that pay-TV should be permitted because today's system isn't "free" anyhow—being supported by public's purchase of advertised products. JCTT argued that the "obvious answer is that that the public is not *required* to buy any products advertised on the TV screen." With public having invested some \$15 billion in sets, JCTT said, it will raise "a hue and cry [that] will make the complaints of the 160 uhf broadcasters to the Senate Interstate & Foreign Commerce Committee sound like a muffled whisper."

(2) Analysis of FCC's legal authority to permit subscription TV. JCTT stated that neither FCC's comments on Hinshaw bill (Vol. 10:20), its approval of functional music on FM, nor its pre-war decision in Muzak pay-radio case supports conclusion that Commission has adequate power to authorize pay-as-you-look TV.

(3) Attack on Zenith's claim that fee TV will make many more stations economically possible. JCTT noted that Zenith's attention has been on big cities and that Zenith disapproves limiting pay service to uhf for several years—in contrast to Skiatron's petition (Vol. 10:38). If Zenith is sincere in efforts to foster more stations, JCTT said, it would propose limiting fee-TV service to markets which now have no TV stations.

(4) Argument against Zenith's plea for commercialization without hearings. JCTT found "complete incongruity" in Zenith's argument that FCC could stop pay TV if it found it wasn't in public interest. System is too fraught with dangers, JCTT stated, to be authorized without full hearings.

JCTT said it represents following exhibitor groups: Allied States Assn., Theatre Owners of America, Texas Drive-In Theatre Owners, So. California Theatre Owners Assn., Kentucky Assn. of Theatre Owners, Independent Theatre Owners Assn. of N. Y., Metropolitan Theatre Owners Assn.

NARTB pres. Harold Fellows filed brief letter with Commission this week, also urging rule-making instead of simple go-ahead. FCC may meet on subject next week, and there's every indication it will start with general rule-making, probably eventually going into oral hearing and demonstrations. This is what Zenith most wanted to avoid, simply because of time element—for such procedures frequently take years.

WNET, Providence (Ch. 16). WNET counsel Benedict Cottone promptly stated he would appeal to courts. FCC ruled that merger of 3 applicants in WPRO-TV grant didn't violate duopoly rules; that no improper payoff of \$200,000 was involved in the merger; that WPRO-TV did not start construction before getting CP.

Another grant taken to courts was Ch. 12 CP of WJRT, Flint (Vol. 10:50). Losing applicant WFDF filed suit in D. C. Court of Appeals this week.

Due for FCC decision soon is matter of proposal to lift Zone I ceiling to 2000 ft. with full power (Vol. 10:50). In view of heavy opposition and fact that the 2 proponents—WBEN-TV, Buffalo & WSAZ-TV, Huntington—have modified their requests somewhat, best guess is that Commission will compromise by lifting ceiling just enough to take care of the 2 stations.

Arthur Godfrey was guest at White House stag party Jan. 6, along with 17 businessmen, lawyers & politicians.

TWO ALASKA stations, both in Fairbanks, are shooting for first telecasts next month. KTVF (Ch. 11), granted Dec. 29, hopes to get on air Feb. 1-15, writes pres. A. G. Hiebert, who also heads now-operating KTVA, Anchorage (Ch. 11). Also planning Feb. start is KFIF, Fairbanks (Ch. 2), recently acquired with already-operating KFIA, Anchorage (Ch. 2) by Midnight Sun Bestg. Co. (Lathrop interests). KTVF already has RCA 2-kw transmitter and most other equipment, and KTVA chief engineer Jack Walden is supervising construction in Fairbanks. It will use 165-ft. tower with 6-bay GE batwing antenna. Rep for both KTVF & KTVA is new Alaska Radio-TV Sales, Seattle, whose pres. Wm. J. Wagner owns 6% of the 2 stations.

GE reports shipments this week of 35-kw amplifier to KGBT-TV, Harlingen, Tex. (Ch. 4), and 12-kw amplifier to KSAN-TV, San Francisco (Ch. 32). Also reported by GE is order for 35-kw amplifier for WRBL-TV, Columbus, Ga. (Ch. 4).

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WFLA-TV, Tampa (Ch. 8) expects to meet mid-Jan. test pattern target, begin as basic NBC by mid-Feb., reports gen. mgr. George W. Harvey. It has 50-kw RCA transmitter installed and checked out, 12-section RCA antenna in place on 1054-ft. Ideco tower. Grantee *Tampa Tribune* has interlocking ownership with *Richmond Times-Dispatch* and *News-Leader* (WRNL), TV applicant. Base hour will be \$400. Rep will be Blair.

WTVY, Dothan, Ala. (Ch. 9) expects to start in Feb., being sold in combination with WEAR-TV, Pensacola & WJDM-TV, Panama City, reports Milt R. de Reyna Jr., asst. mgr. for the 2 Florida outlets. Mel Wheeler, mgr. of WEAR-TV & WJDM-TV, will also manage WTVY for group of local owners headed by builder Charles Woods. It has 500-watt DuMont transmitter on hand, hasn't reported type of other equipment. Network affiliation not set yet. Base rate will be \$150. Clarke Brown Co. will be rep in Southeast.

KBET-TV, Sacramento, Cal. (Ch. 10) expects to start in late Feb. or early March, according to v.p.-gen. mgr. John H. Schacht. FCC grant of CP to KBET-TV over McClatchy Newspapers was chosen as test case by ANPA last month when it voted to join appeal against FCC's "diversification" policy (Vol. 10:51), now pending in District of Columbia appeals court. KBET-TV transmitter house is nearly completed, 50-kw GE transmitter is due Jan. 15, and Ideco 450-ft. tower with GE antenna is scheduled to be ready by Feb. 1. Base rate will be \$600. Rep will be H-R Television Inc.

KRCG, Jefferson City, Mo. (Ch. 13) has Feb. 1 programming target, reports owner Mrs. Betty G. Handy, whose family also controls local radio KWOS and *Jefferson City Capital News & Post Tribune*. KRCG studios & transmitter will be at model Callaway Hills Farm, 5 mi. NE of Jefferson City, and 10 mi. SE of Columbia, where U of Missouri operates commercial KOMU-TV. It has 500-ft. Stainless tower ready, will use 10-kw RCA transmitter, 12-section superturnstile antenna. Base rate will be \$200. Rep will be Meeker.

WLEX-TV, Lexington, Ky. (Ch. 18), delayed by weather, now expects to begin test patterns by Jan. 15, start NBC programming month later, reports 28% owner Guthrie Bell, who with J. D. Gay Jr. owns radio WLEX, holding 44% of TV. It's 70 mi. from Louisville's 2 vhf outlets, 73 mi. from Cincinnati's 3 vhf and educational uhf. It will use GPL Continental 1-kw transmitter and 600-ft. Stainless tower with RCA antenna. Base rate will be \$150. Rep will be Forjoe.

Electronics Reports: Raytheon has begun production of 8-transistor portable radio, shown for first time in Chicago Jan. 3. Company intends to put big promotional push behind the "tubeless wonder," which is powered by 4 regular flashlight batteries said to last for 500 hours of use. The 5-lb. leather-cased radio measures 2 5/8 x 6 3/16 x 9 3/16-in., receives standard broadcast band, using conventional superheterodyne circuit, with 3 1/2-in. square-shaped speaker, built-in ferro-magnetic rod antenna. It uses 5 CK760 transistors—for converter, local oscillator, 1st & 2nd IF and high-gain detector—one CK722 transistor for audio pre-amplifier and 2 CK722 for push-pull audio Class B power amplifiers. Raytheon TV-radio v.p. Henry F. Argento predicted that within 5 years "the industry will forsake the manufacture of radios depending on power lines for their current supply." Set is priced at \$79.95.

Meanwhile, Regency div. of IDEA Inc., which has been marketing 4-transistor pocket radio in New York & Los Angeles (Vol. 10:43), announced that it will offer the radio to its 25 high-fidelity distributors, servicing 52 areas, beginning this month. Regency officials said that demand for the set at \$49.95 still exceeds supply.

* * * *

FCC's latest patent-filing proposal (Vol. 10:50) has attracted remarkably little industry interest—only 6 companies indicating intention to participate in Feb. 1 oral argument. Those filing by Jan. 3 deadline were: AT&T, IT&T, DuMont, Sylvania, Collins and Central Committee on Radio Facilities of the American Petroleum Institute. RCA hasn't participated in proceedings, nor has Zenith, with which RCA has been in patent litigation for years—but it was expected that appearances would be filed by some of the organizations which protested so vigorously against FCC's original proposal. These included American Bar Assn., NAM, inventors' associations, in addition to many companies in communications and electronics.

Total of 28 electronics factories now located in Puerto Rico—including plants of Sylvania, Remington Rand, Weston Electrical Instrument. This is revealed in *New York Times* advertisement by Puerto Rico Govt. offering tax exemption to new industry, and appealing particularly to such industries as electronics, small appliances, plastics, etc.

RCA's new engineering lab specializing in electronic fire control systems for military aircraft, under Dr. Robert C. Seamans Jr. (Vol. 10:50), will be located next month in Waltham, Mass., in newly-leased portion of Waltham Watch Co. plant, 227 Crescent St.

Spring assembly meeting of Radio Technical Commission for Aeronautics will be held jointly with Los Angeles section of IRE at Los Angeles, April 5-7.

— ■ —

"Type approval" and "type acceptance" proposal by FCC, first issued Dec. 3, 1953, was finalized this week. System provides method whereby Commission assures itself that equipment employed by communications it regulates complies with standards. As finalized, rules were changed somewhat from original proposal on basis of recommendations of RETMA and individual companies. Document is Notice 55-6, Mimeo 13880, Docket 10798. Copies are available from Commission—or from us.

New 50-kw AM "Ampliphase" transmitter has been designed by RCA, will be offered late this year. RCA reports that it employs phase modulation principles, takes half space required by existing comparable units, has 50% lower operating costs. Designated type BTA-50G, it's air-cooled, obviates need for under-floor cable trenches, external blowers and water-cooling equipment. It has no modulator tubes, modulation transformers or reactors—which are essential to conventional units.

FACTORY VALUE & MARKUPS DOWN SHARPLY: At average factory value of \$145 per set -- a considerable drop from the \$170 of 1953, due to price cuts, preponderance of low-end sales and spread of discount house operations -- 1954 TV output of 7,350,000 in 1954 meant factory billings of some \$1.06 billion. When markups (estimated at 40%, down from 50% in 1953) and estimated \$500,000,000 more for antennas, tubes, service and other costs are added, the year's over-the-counter value was about \$2.2 billion to trade, compared to \$2.375 billion in 1953, when production was 7,214,787 sets.

Radio production of 10,330,000 meant factory billings of \$227,260,000, based on factory value of \$22 a set -- roughly same price as 1953. When markups and all other costs are added, retail value was about \$450,000,000 vs. \$600,000,000 in 1953, when radio output was 13,368,556. This compares with \$400,000,000 for 9,711,236 radios in 1952. Figures include auto as well as home radios.

Trade's combined TV-radio volume thus was about \$2.650 billion last year. Figures are unofficial, of course, and are based on estimates by RETMA and other industry research officials, as well as on Census Bureau data.

TV production in 1954 was short of 1950's record 7,463,800. Preliminary RETMA figures show mere 58,988 sets turned out week ended Dec. 31 (a 4-day week in most plants), running year's total to unofficial 7,350,000. It was second highest output in TV history, and estimated 7,000,000 retail sales made it a record year for sales. Radio output totaled 120,729 (77,267 auto) week ended Dec. 31 -- 10,330,000 for year.

SECOND-SET & REPLACEMENT DRIVE MAPPED: Pattern of the current TV trade, judging from what we saw and heard at Chicago's big furniture marts and what transpired at Philco's midwinter convention this week in Atlantic City, appears to be: 21-in. for initial sales, 17-in. for second sets, 24-in. for replacements.

Philco returned to 17-in. production, after more than year, with introduction of a mahogany table model at \$150, blonde \$170. Prospect of burrowing into second-set market was frankly admitted by Philco spokesman as reason for return. Philco also introduced a 21-in. open-face blonde console at \$320 and a 24-in. consolette in mahogany at \$300, blonde \$320. Latter sizes offer excellent possibilities in growing replacement market. They were introduced at Atlantic City convention. (For details of other receivers introduced elsewhere this week, see p. 14.)

In spaces of 16 manufacturers represented at marts, we noted a growing awareness of the need for special incentives to capture second-set and replacement sales. With 34,000,000 sets in hands of 70% of nation's 47,500,000 households as of Jan. 1, trade appears very much alert to immediate sales task before it.

* * * *

What steps will be taken to tap the potentially big second-set & replacement markets? Philco and others are reverting to 17-in. as a set which can be quickly sold at a bargain rate for use in bedroom or other place in the home. With eye to bigger profits, others are expanding their 24-in. offerings as lure for set owner who wants to trade in his small-screen receiver for larger size.

A big increase in advertising keyed to second-set and replacement markets is also planned by several manufacturers. One suggested promotional approach would feature pictures of sets in bedrooms, dens, etc. Other set makers contend the only advertising approach they need is to "stress the tremendous value of a TV set now." As Philco's Fred Ogilby remarked, "Never before in history have such price values been offered to the public as now. And values seem to be increasing all the time."

Manufacturers are quietly confident of their ability to capture substantial portion of second-set and replacement markets this year. They say they're giving dealers a sizeable profit margin on 24-in. sets as an incentive to sell up into that

size, regarded as ideal for replacement. The prices of such sets are coming down steadily, too, though the margins remain comparatively high for dealers. Trade is also counting on a lot of picture tubes going bad in 1955 among sets 5 years or older -- and at \$25-30 replacement rate, it's figured many would rather use that sum for down payment on a brand new receiver.

* * * *

NARDA pres. Harry Price Jr. said that the "new" second-set and replacement markets might well contribute to biggest year ever for TV-radio-appliance dealers in 1955. Confidence in public's pocketbook ability to continue to buy TVs at high rate in 1955 was expressed by Philco pres. James H. Carmine at his convention:

"Conservative observers estimate consumer expenditures for goods and services in 1955 will reach a new peak and exceed 1954 by \$9 billion. The biggest increase, they estimate, will be for durable goods. While there are divided views whether the public will want this or that product, there can be no argument that they will have the money to spend to satisfy their desires, if they can be persuaded to do so."

Trade Personals: Al Chatten, Philco field sales mgr. for eastern territory, named div. mgr. for N. Y., N. J. & eastern Pa., with headquarters in N. Y., as part of realignment of sales organization; Stuart Falk named div. mgr., Detroit, covering Ohio, western N. Y. & Detroit areas; Wm. Kress, Chicago, for Wis., Ind. & Ill.; C. E. Lindstrom, San Francisco, for northern Cal., Ore. & Wash. . . . Herbert J. Rowe named Muter Co. sales mgr., Leslie F. Muter Jr. production mgr. . . . Wm. Chamard, secy-treas. of Canadian Aviation Electronics Ltd., Montreal (DuMont), elected finance v.p. . . . Harold F. Bersche, distributor sales mgr., RCA tube div., promoted to new post of mgr. of marketing services, succeeded by Durward M. Branigan, ex-promotion mgr. of receiving tube & transistor marketing dept. . . . Robert G. Scott promoted to gen. sales mgr., DuMont CR tube div., succeeding William C. Scales, now gen. mgr. of receiver sales div. . . . Victor Legendre, ex-Chatham Electronics & Tung-Sol, named chief engineer of Haydu Bros., Plainfield, N. J. (tubes) . . . Buford (Buck) Melton, ex-Hallicrafters and graduate of West Point, appointed sales mgr., Admiral contract div. . . . Wm. W. Bowen promoted to staff asst. to Richard L. Sandefur, Westinghouse TV-radio sales mgr. . . . Fred Meurer resigns as Westinghouse TV-radio publicity mgr. to set up own public relations firm in Newark; his duties are assumed temporarily by Paul Langdon . . . Walter Jablon resigns as sales mgr. of Freed Electronics . . . Wm. Gay named Sparton adv. mgr., replacing John Hoffman, resigned . . . George G. Gabel promoted to mgr. of manufacturing engineering at GE commercial equipment plant in Clyde, N. Y. . . . Myles M. Walker promoted to Raytheon mgr. of marketing research . . . Howard H. Ganson Jr. appointed Chicago area mgr., Raytheon equipment sales div. . . . Larry Coen, ex-Hallicrafters, named Raytheon Cincinnati district mgr., replacing Gale Callendar . . . Robert Bruce Jr., from Cleveland office, named Westinghouse Texas district mgr. for TV-radio, Houston . . . Marion Pettegrew promoted to gen. mgr. of Sylvania parts div., headquartering in Warren, Pa. . . . Roy Dahl, asst. secy. of Wilcox-Gay, adds duties of exec. v.p. M. C. Thomsen, resigned . . . Joseph G. DeVico resigns as Majestic Radio director of adv. & sales promotion . . . Philip C. Weinseimer Jr., mgr. of electric shaver div., elected v.p. in charge of consumer products, North American Philips Co. . . . Frank F. Neuner, in charge of RCA tube div. long-range planning, appointed mgr., semi-conductor marketing, newly created post under marketing mgr. Lee F. Holleran.

Senator Armand Daigle, Canadian industrialist, elected a director of RCA Victor Co. Ltd., Montreal, reports pres. F. R. Deakins.

DISTRIBUTOR NOTES: CBS-Columbia establishes factory branch, CBS-Columbia of Texas, 1230 Drago St., Dallas (Roger G. Brown mgr.), replacing Schoelkopf Co. . . . Arvin: Ralph Lay Wholesale Distributing Co., 5627 Manchester Ave., St. Louis, replacing Broadwell & Co. . . . DuMont N. Y. factory branch promotes Harry Rippo to gen. sales mgr. . . . L. M. Popkey Co., Marinette, Wis. (CBS-Columbia) names Ira L. Lavin, ex-CBS-Columbia Minneapolis regional mgr. & onetime NARDA managing director, as gen. sales mgr. . . . Elliott-Lewis Corp., Philadelphia (Hallicrafters) appoints Laurence C. Phister, ex-Raytheon Television Distributors, as gen. sales mgr. of air conditioners . . . Westinghouse Electric Supply Co., Milwaukee, due to start construction next spring of new headquarters on W. Cornell St.

RCA will salute TV servicemen with sponsorship of "National Television Servicemen's Week" March 7-12, awarding prizes totaling more than \$10,000 to service dealers initiating effective service promotions at neighborhood level. RCA will promote event with full-page magazine ads and display "packages" among service dealers. "Salute" of a different kind, an "expose" of fraudulent TV serviceman, will be dramatized on NBC-TV's *Dragnet* Jan. 27, Thu. 9-9:30 p.m. Local groups can obtain 16mm sound films of program from NARDA for promotional showings thereafter.

Western Auto Supply Co. acquires 140 West Coast retail stores now owned by Gamble-Skogmo Inc. as of April 1, latter continuing to operate some 350 stores in 19 central & midwestern states and in Canada. Western's 1954 business of \$164,000,000 is reported to have included about 25% appliance trade, including TV-radio.

TV sets need periodic tune-ups just like automobiles. So says GE tube dept.—and to further this idea it's sponsoring nationwide "TV Service Month," beginning April 19, to urge spring tune-ups to improve focusing, contrast & brightness in preparation for baseball season.

Raytheon shipped 5000 TV sets to Colombia this week for distribution by govt. Similar shipment was made last month by Emerson (Vol. 10:51).

Raymond R. Machlett, 54, TV-radio transmitter tube manufacturer and pioneer in use of neon, who in 1930 founded Machlett Laboratories Inc., Springdale, Conn., died at his home in New Canaan, Conn., Jan. 7. He is survived by his widow, 2 daughters and a son.

Myer H. Cogan, 52, founder and retired pres. of Symphonic Radio & Electric Corp., Boston, died in Brighton, Mass., Jan. 4. He is survived by his widow, daughter and son.

Topics & Trends of TV Trade: Philco hit back this week at Justice Dept. anti-trust complaint filed against it and some 130 independent distributors Dec. 15 (Vol. 10:51). At distributors convention in Atlantic City, exec. v.p. John M. Otter, who spearheaded drive for refranchise agreements last Aug., which Govt. contends are illegally restrictive, called case "a dangerous challenge to those of us who believe in and desire to protect the function of the independent distributors like yourself."

Point by point, he defended new agreements against 3 major charges in govt. complaint—that distributors are required to agree not to sell any Philco products to retailers outside their assigned territories; that distributors must not deal in any product competitive with Philco; that retailers "approved" by distributors must sell only to consumers, never to retailers.

Otter said ban on trans-shipping was standard practice in industry and Govt. complained only when "we put some teeth into our distributor contract." He said geographical limitations are necessary to provide public with service on their purchases.

"You cannot do this job if you bandy our merchandise throughout the country and sell it to dealers you cannot train or with whom you have no personal relationship, and with dealers who have no interest in Philco, its products or its future," he said.

He denied govt. charge that new agreements forbid distributors to deal in products competitive with Philco, but added: "That is the legal part of it, but that is not what we want and we certainly hope that is not what you want . . . If you were to divide your loyalty, we know you would lose; and if such a method were to be followed by all wholesalers, competition would become soft instead of hard-hitting and aggressive as it is now."

Finally, he defended Philco against charge that retailers must not sell to other retailers, saying that "when a so-called retail dealer sells to another retail dealer he has by that very act become a wholesaler and not a retailer, so the govt. is really asking you, as a distributor, to sell other wholesalers . . . If Philco sets are indiscriminately bandied about by sub-wholesalers for resale by irresponsible dealers who are not willing to meet, and have not been trained to meet, the essential merchandising warranty and service obligations, you and Philco are bound to lose good will and reputation. Such dealers will not and cannot service our products in the homes of the consumer."

Hoffman Electronics has added 15 new TV models to current line, prices ranging from \$150 for 17-in. walnut table model to \$595 for 21-in. blonde or cherry combination. Several models have vertical chassis, and 11 have aluminized picture tube. New models: 17-in. walnut table \$150, mahogany \$160, blonde \$170; 21-in. ebony table \$180, mahogany \$190, blonde \$200; 21-in. mahogany table \$180, blonde \$190; 21-in. walnut table \$200, mahogany \$210, blonde \$220; 21-in. open-face walnut console \$230, mahogany \$240, blonde \$250; 21-in. mahogany table \$260, toast & smoked cherrywood \$280; 24-in. mahogany table \$290, blonde \$300; 21-in. open-face mahogany console \$290, blonde or cherry \$300; 21-in. open-face mahogany console \$350, toast or smoked cherry \$365; 21-in. open-face mahogany console \$375, blonde or cherry \$385; 24-in. open-face mahogany console \$390, blonde or cherry \$400; 21-in. full-door mahogany or cherry console \$425; 24-in. open-face mahogany or cherry console \$425; 24-in. full-door blonde or cherry console \$485; 21-in. mahogany combination \$575, blonde or cherry \$595.

Regal introduced new line of 8 TV models Jan. 3 at Chicago's Conrad Hilton Hotel, prices ranging from \$140 for 17-in. mahogany table to \$367 for 21-in. ¾-door mahogany console.

Zenith introduced 50 new TV models at distributors' convention in Chicago Jan. 5-6, prices ranging from \$150 for 17-in. maroon table model to \$1250 for 27-in. 3-way blonde combination. A vertical chassis is used in 12 models at low end of line. Most sets contain 90-degree tubes, with some having 72-degree. The 21-in. series ranges from \$170 maroon table model to 3-way blonde combination at \$700; 24-in., from mahogany console at \$380 to high-fidelity console at \$420. Also introduced were 8 calendar-clock-radios from \$45 to \$52, 13 portables from \$30 to \$40, an AM-FM table model at \$90 & \$92.

Sylvania slashed prices by \$20 to \$75 on nearly all models this week, crediting manufacturing economies in new TV plant in Batavia, N. Y. In addition, its price leader, a 21-in. table model previously listed at \$170, will be offered without list price. As result of reductions, line ranges from 21-in. table model at \$200 to 21-in. all-channel console at \$410. Sylvania will introduce late this month a 21-in. mahogany console at \$230, blonde \$240.

Stromberg-Carlson has added 3 new 21-in. TV models: Panavue, a mahogany table at \$285, blonde \$290; New Era, open-face mahogany console \$330; Chippendale, open-face mahogany console \$380. Also introduced at regional distributors meeting in Washington was International 8-band portable short wave radio, list price not set. Clifford J. Hunt, TV-radio v.p., said company's 1954 unit TV sales were up 31% over 1953.

Emerson has added a 21-in. table model in ebony, mahogany & blonde at \$150, and a 21-in. open-face console in all 3 woods at \$190. It also raised price of 21-in. ebony table from \$170 to \$180, and reportedly will bring out a 24-in. table model at \$250 in about 6 weeks.

Olympic introduced new line at Chicago's Conrad Hilton Hotel, prices ranging from \$100 for 14-in. cordovan table model to \$490 for 21-in. combination in classical Chinese furniture cabinet. Big talking point of line is 3-way 17-in. "lo-boy" walnut combination for \$200.

Arvin raised price of 21-in. mahogany tables from \$150 to \$160, \$170 to \$180, \$180 to \$190; and 21-in. console from \$220 to \$230.

Reminiscent of Gene McDonald's court challenge of Herbert Hoover's authority to regulate radio when he was Secy. of Commerce in 1926—the courts deciding the Govt. was acting illegally—is court test in Britain which held that Post Office Dept. has been collecting radio license fees for 50 years, a total of more than \$1 billion, without apparent legal sanction. British radio listeners pay £1 (\$2.80) a year, TV owners £3 (\$8.40). New Wireless Telegraphy Act this year authorizes the Post Office to collect the fees, but legislation must be enacted to legalize past collections, particularly prosecutions against "radio bootleggers." Note: In 1926, when Zenith Radio's AM station in Chicago jumped to an unauthorized wavelength, courts held Dept. of Commerce had no authority to prevent it from doing so, whereupon Congress quickly passed Radio Act of 1927 setting up original Federal Radio Commission.

A. J. Brunner shifts from gen. export mgr. to chief engineer of E. K. Cole Ltd., reporting to technical director A. W. Martin; W. M. York, head of Ecko heating div., now directs export of TV-radio, cinema, plastics and other equipment for big British manufacturer.

Pye Ltd., Cambridge, England, plans to raise £1,500,000 additional capital to buy up a cabinet factory and a TV-radio component firm, and to provide about £120,000 additional working capital.

Hoffman Electronics Corp. listing on N. Y. Stock Exchange begins Jan. 10, when trading on Los Angeles Stock Exchange is also expected to start.

Financial & Trade Notes: Nine companies are included in the "electrical equipment" category among the 142 major American corporations "rated" in the Jan. 1 *Forbes*, business & financial magazine, for their achievements in management, labor relations, public & community relations, stockholder relations. All are major factors in TV-radio production, which is discussed at length in the article—with RCA, Philco, Admiral & Motorola given top-ranking positions in that order.

The "ratings" are admitted by the editors to be "opinion"—but they were carefully arrived at on basis of analysis of individual companies, talks with "blue-chip presidents," visits to plants, studies of annual reports, etc.

"In recent years," *Forbes* states, "the electrical equipment industry has been expanding more than twice as fast as the whole U. S. economy, and for this reason has proved to be extremely attractive to inventors. Thus, on the Big Board last year, the major electrical issues appreciated 55% as compared with only 36% for the Standard & Poor's 480 stock average. This phenomenon caused many apprehensive Wall Streeters to wonder if electrical equipment earnings and dividends have not indeed been discounted well into the future.

"But the long-range odds appear to be on the electrical goods makers' side. Economists predict that the U. S. population and its disposable income, the two factors on which demand for generating equipment and appliances depend most heavily, will keep right on growing at a rapid pace. Investors apparently are taking the long view, for they bid up prices of electrical stocks last year in spite of a decline in sales and a narrowing of profit margins."

These are the *Forbes* "ratings" (assets in millions as of Dec. 31, 1953):

	Management	Labor Relations	Public & Community Relations	Stockholder Relations
General Electric (\$1,696.6)	90	85	90	90
Westinghouse (1,265.4)	90	90	90	95
RCA (493.6)	90	90	90	90
Avco (223.0)	75	75	—	—
Sylvania (204.4)	90	90	90	90
Philco (163.5)	90	85	80	85
Admiral (107.6)	90	85	85	85
Raytheon (93.6)	80	90	90	85
Motorola (86.8)	90	90	85	85

Consolidated Electronics Industries is new name for Reynolds Spring Co., and its control is now in hands of North American Philips Co., a U. S. corporation owned in trust for stockholders of Philips of Eindhoven, Holland. Stockholders have approved sale of Reynolds Spring's auto spring & small plastic businesses to Stubnitz Green Spring Co., Adrian, Mich. for about \$900,000 cash, leaving Reynolds with \$1,350,000 net quick assets. Consolidated also acquired North American's A. W. Haydon div. for 279,000 shares of Reynolds common. With the \$1,350,000 from Reynolds and the \$1,500,000 reported book value of Haydon, Consolidated's book worth is estimated at \$5 to \$6 per outstanding share, in addition to which it has tax credit of about \$800,000 inherited from Reynolds. Haydon div., Waterbury, Conn., which makes electronic devices for aircraft, guided missiles, radar, etc., in 1953 earned \$859,000 before taxes & renegotiation (about \$1.53 on Consolidated's presently outstanding 559,000 shares) and is expected to show about same 1954 pre-tax net. North American also owns molybdenum & tungsten products plant at Lewiston, Me., and X-ray & electronic plant at Mt. Vernon, N. Y., in addition to operating lab at Irvington, N. J. It has approval of stockholders to increase authorized common from 500,000 to 1,500,000 shares; after payment for Haydon plant, this leaves 941,000 authorized but unissued.

McIntosh Laboratory Inc., Binghamton, N. Y., founded in 1947 by the Washington consulting engineer Frank H. McIntosh to utilize his patents in the manufacture of high-fidelity amplifiers for home & industrial uses, is recapitalizing and, out of an authorized 6000 shares of common and 24,000 shares of preferred stock, is offering for sale 4500 common and 6750 preferred, at \$10 per share each, purchasable at ratio of 2 common to 3 preferred. No underwriters are participating in the issue; funds will be used to increase working capital, inventory, sales force & advertising as well as for research & development of new products. Mr. McIntosh retains control with 8621 shares of common in consideration of present equities surrendered and of a \$27,790 indebtedness to him for his share of the earned surplus of \$39,818 as of last March 31. Company's active gen. mgr. is Gordon J. Gow, who runs 18,000-sq. ft. factory employing 53 people in Binghamton. Its sales were \$320,869 in 1952 when it lost \$6996. Sales were \$437,791 and profit \$4205 in 1953. In first 3 months of 1954, sales were \$139,294, profit \$14,648. At end of 1952, earned surplus was \$18,959; at end of 1953, \$25,169; at end of first 1954 quarter, \$39,818. According to Mr. McIntosh, 1954 profit figure will be about \$55,000 before taxes, and volume is now running \$80,000-\$100,000 per month.

Philco's fourth-quarter sales exceeded \$100,000,000, bringing year's volume to about \$350,000,000, midwinter distributors convention in Atlantic City was told this week by pres. James H. Carmine. Sales in 1953 were record \$430,420,000. Philco was hampered this year by a 45-day strike at its electronic plants in May & June; otherwise, Carmine said, it would have sold an additional 150,000 TV sets and several hundred thousand more radios. Philco is aiming for a 15% increase in over-all business this year, which he predicted would send sales over \$400,000,000. Philco's TV production in first quarter of 1955, he said, would be at an annual rate of 1,000,000 units. (For other news of Philco convention, see pp. 12 & 14.)

Hycon Mfg. Co., Pasadena, Cal., specializing in photographic & electronic equipment, has called Jan. 14 stockholders meeting to act on proposed issue of 120,000 shares of 5½% cumulative convertible preferred stock to be publicly offered at \$10 per share, proceeds to be used to expand aerial survey div. Present capitalization is 3,000,000 shares of common, of which 1,075,000 are outstanding. Indicated net earnings for 10 months ended Nov. 20 were \$432,019 compared with \$67,733 for full fiscal year ended Jan. 31, 1954. Hycon plans expansion in geophysical exploration under agreement with Varian Associates, Pasadena; they're jointly taking over Hycon subsidiary Hycon Aerial Surveys Inc. (airborne surveys).

Cornell-Dubilier reports for fiscal year ended Sept. 30 net profit of \$1,729,640 (\$3.25 a share) on sales of \$37,149,778—both figures second highest in company's history. For fiscal 1953, profit was \$1,666,696 (\$3.12) on \$43,630,816. Pres. Octave Blake said sales for first 2 months of current fiscal year are running at annual rate of \$39,000,000. He attributed this high level to applications of the company's products to many electronic fields besides TV.

Walt Disney Productions, for fiscal year ended Oct. 2, had consolidated net income after \$840,000 taxes of \$733,852, or \$1.12 per common share, compared with \$510,426 (78¢) preceding year. Gross income for 1954 fiscal year was \$11,641,408 vs. \$8,365,861 year before. Said Chairman Disney: "We have embraced TV not only for itself and its possibilities, but also to exploit and sell our motion picture productions."

Sylvania fourth quarter sales are expected to total \$79,000,000, compared with \$68,798,321 in 1953 quarter, bringing sales for year to about \$280,000,000, or 4% below 1953 record of \$293,267,408, according to chairman Don G. Mitchell.

CHANGING NETWORK affiliation patterns appear to be coming about much as forecast in these columns (Vol. 10:50), pointed up this week by FCC's approval of Westinghouse's \$9,750,000 purchase of WDTV, Pittsburgh (Ch. 2). Westinghouse plans to take over Jan. 10, retaining management and staff, and station will become basic NBC and change call letters to KDKA-TV.

Deal was approved by 5-1 vote just month after concluded (Vol. 10:49), gives Westinghouse its 4th outlet, all NBC, 3 acquired by purchases. Comr. Bartley opposed transfer, stating in dissent: "I see a substantial diminution in competition." Comr. Henneck was absent.

This week, too, CBS-TV formally announced affiliation of Storer's recently acquired WXEL, Cleveland (Ch. 8) as of March 1, and of Gene Autry-owned KOOL-TV, Phoenix (Ch. 10) as of June 16, both to be primary affiliates. Switch from Scripps-Howard's WEWS (Ch. 5) in Cleveland presumably means that station will go ABC & DuMont. In Phoenix, KOOL-TV takes CBS away from Meredith Publishing Co.'s KPHO-TV (Ch. 5)—which spells real trouble for that station, inasmuch as KVAR (Ch. 12) has NBC and Gov. McFarland's new KTVK (Ch. 3) has ABC tied up.

Ed Meredith and his TV-radio director Payson Hall were in N. Y. this week, reportedly discussing with CBS a shift of their KCMO-TV, Kansas City (Ch. 5) to that network in lieu of KMBC-TV (Ch. 9). Latter's quick start in Aug. 1953 was originally engineered by CBS which got rival applicants KMBC-TV & WHB-TV together in time-sharing deal and gave them basic affiliation. Last June, Arthur B. Church sold out his KMBC interests for \$2,615,000. Meredith's Omaha WOW-TV is on NBC, its WHEN-TV on CBS.

CBS also announced Lowell Thomas group's WROW-TV, Albany (Ch. 41) as "limited alternate affiliate" as of Feb. 1, this in wake of recent Indianapolis switch from the Bitners' WFBM-TV (Ch. 6) to the McConnells' WISH-TV (Ch. 8). Albany CBS affiliation is shared with WTRI (Ch. 35), owned by Harry Wilder & Stanley Theatres, and presumably is prelude to full affiliation if Lowell Thomas group gets Ch. 10 it seeks (Vol. 10:49-50).

Strike at KPIX, San Francisco, marked by extensive sabotage of station equipment (Vol. 10:52), has been settled, NABET and AFTRA members going back to work Jan. 6. Mgr. Phil Lasky announced that NABET members would get terms offered by management before strike started and that among provisions of contract were retention of station's rights to prosecute saboteurs, recall NABET members on individual basis and agreement by NABET members to repair damaged equipment. Lasky said that during strike management learned that fewer employes were necessary and that reduction in technical staff would be made. Sabotage is being probed by FCC.

Survey of "blacklisting" practices in the movie and TV-radio industries has been started by Fund for the Republic, headed by Dr. Robert M. Hutchins and supported by Ford Foundation. Survey is headed by John Cogley, ex-editor of *Commonweal*, Catholic weekly, who will report on legal, psychological & historical aspects of "political tests of any kind in hiring and firing practices in the motion picture, radio and TV industries." Conducting the "blacklisting" investigation is Paul Jacobs, union consultant and member of board of Civil Liberties Union.

Sole TV application filed this week was for Sharon, Pa., Ch. 39, by Sanford A. Schafitz, owner of WFAK, Farrell, Pa., and banker Guy M. Gully, replacing CP for same channel dropped by WSHA (Leonard J. Schafitz).

AT&T's network interconnection schedule: KLRJ-TV, Henderson, Nev., Jan. 16; WMVT, Montpelier, Vt., Feb. 2 (replacing private link).

NATIONAL CONTROL of college football TV is certain for another year—but a no-holds-barred battle which shook the NCAA is sure to result in more liberalized telecasting rules under the new national plan, as yet unformulated. NCAA convention in New York, at week's end, rejected Big Ten-Pacific Coast Conference proposal for regional telecasting in informal vote, gave incoming TV committee "blank check" to work out national TV control system, but at same time expressed preference for a more liberal national plan proposed by Eastern College Athletic Conference (ECAC).

Highlight of week-long convention was challenging speech Jan. 6 by U of Michigan's Fritz Crisler, representing Big Ten, serving notice on convention that his conference would not participate in the 1955 program if it was essentially the same as 1954. He implied Big Ten would be under compulsion from state legislatures to undertake its own TV program, regardless of consequences. After Jan. 7 vote favoring national controls, however, he indicated Big Ten might be willing to go along with a liberalized national plan as proposed by ECAC.

Though convention gave new TV committee no instructions, it expressed its sentiments in an informal standing preferential vote on 5 different TV plans. The results: (1) For re adoption of 1954 plan, 81. (2) For ECAC plan, eliminating geographical restrictions on games to be telecast, allowing one local telecast and permitting sponsor to pick game-of-the-week as few as 5 days in advance, 84. (3) For Big Ten plan, providing for 9 weeks of regional telecasting, 4 of national, 37. (4) For no controls, 4. (5) For plan permitting each college to televise only one game nationally, and with no other restrictions, 1.

Annual program awards by *Motion Picture Daily* and *Fame Magazine*: best network program, *Toast of the Town* (CBS-TV); panel discussion, *Meet the Press* (NBC-TV); audience participation, *You Bet Your Life* (NBC-TV); panel quiz, *What's My Line?* (CBS-TV); classical music, *Voice of Firestone* (ABC-TV); popular music, *Your Hit Parade* (NBC-TV); drama, *Studio One* (CBS-TV); comedy, *Jackie Gleason Show* (CBS-TV); children's, *Ding Dong School* (NBC-TV); daytime, *Today* (NBC-TV); comedian, George Gobel (NBC-TV); comedienne, Lucille Ball (CBS-TV); comedy team, Lucille Ball & Desi Arnaz (CBS-TV); news commentator, John Cameron Swayze (NBC-TV); sportscaster, Mel Allen; announcer, George Fenneman; male vocalist, Perry Como.

Don't blame TV and comic books for juvenile delinquency, says *Journal of the American Medical Assn.*, which states in editorial: "Harmful as these may be, they are far more likely to produce in the average child nightmares and heightened anxiety than they are to lead to crime, and the problems of where to draw the line in censorship are almost unsurmountable."

American Marketing Assn., 1525 E. 53rd St., Chicago, has published and is making available (at 50¢ per copy) an annotated bibliography of *Current Sources of Information for Market Research*, compiled by Natalie D. Frank, librarian, Geyer Adv., N. Y.

Index to 1954 Newsletters

Included herewith, to all subscribers, is the annual Index to Contents of all 1954 Newsletters, Supplements, Special Reports, etc.—providing handy device for locating major events, trends, dates, etc. Bound volumes of all these publications are available at \$25 per copy.

JAN 17 1955

SUMMARY-INDEX OF THE WEEK'S NEWS—January 15, 1955

RCA AIMS TO CRACK COLOR MARKET by cutting 21-in. tube from \$175 to \$100 (p. 1); other set makers praise action but feel more steps are needed (p. 8).

3 NEW VHF STATIONS START in Minneapolis, Las Vegas, Boston; uhf total down to 117 as result of 31 quitting air to date (p. 2).

BAN ON HIGH TOWERS KILLED by top govt. board, which calls instead for joint industry-govt. study; Louisville's WHAS-TV plans 2005-ft. tower (p. 3).

SENATE NETWORK-UHF PROBE STAFF gets dismissal notice as Democrats take over; snag possible in McConaughy nomination, resubmitted by Eisenhower (p. 3).

"NETWORKS' POWER OVER STATIONS" concerns Sen. Kilgore, preparing for TV monopoly inquiry; new members named to Senate, House committees (p. 5).

POLITICOS WHO OWN TV STATION interests relatively few in new Congress; only 2 Commerce Committee members have any TV connections (p. 5).

73 SET MAKERS, 63 TUBE MANUFACTURERS listed in upcoming TV Factbook No. 20 represent increase over 6 months ago, despite forecasts of attrition (p. 9).

TV-RADIO RETAILERS OPTIMISTIC at NARDA Chicago convention, feel they're winning war against discount houses (p. 9).

QUALITY OF COLOR PROGRAMS, not quantity, cited by NBC pres. Weaver as stimulus to set buying; more spectaculars and remotes planned (p. 8).

WBIR FAVORED IN KNOXVILLE initial decision for Ch. 8 over Scripps-Howard and non-radio group; Asbury Park, N. J. uhf seeks tiny vhf (p. 4).

NEW "FLAT" PICTURE TUBE only 3-in. deep, in experimental stage at west coast lab, excites curiosity of industry engineers as first details are revealed (p. 10).

CBS's PURCHASE OF WOKY-TV, Milwaukee (Ch. 19) approved by FCC, which favors entry into uhf of more entities with stamina and TV know-how (p. 14).

RCA HITS COLOR LOG-JAM WITH TUBE PRICE CUT: Prime color protagonist RCA, in another determined effort to quicken pulse of color TV and bring it out of the "hibernation" we discussed last week (Vol. 11:2), surprised industry this week by announcing it is cutting price of 21-in. color tube from \$175 to \$100.

Immediate industry reaction was an almost universal agreement that "this is a step in the right direction" -- accompanied with the opinion that "it still isn't enough, by itself, to generate a mass color market." There was considerable surprise, too, that move was not accompanied by cut in RCA's color set price (\$895).

Probably most concrete reaction was that of Sylvania, whose v.p. for sales, B.K. Wickstrum, stated company will join RCA in offering the tube for \$100. CBS-Hytron, only other producer which has offered color tubes in quantity, issued brief statement, pres. Charles Stromeyer saying that company had concluded production of 19-in. tubes last Dec., was now preparing to sample industry with 22-in. rectangular units. He declined to discuss price or production plans.

(For detailed comments of representative industry leaders, see p. 8.)

The price of \$500 still seems to be magic figure that must be reached, in the opinion of many manufacturers, before color sets will really sell -- but at least one prominent producer says he's beginning to wonder whether public will pay more than \$100 extra for color.

Many have hunch that RCA will also drop set price before long, though pres. Frank Folsom says greater production must be achieved before set prices can be cut. He said this goes for others as well as RCA, adding, however: "If a licensee wants to break the price, we're not tongue-tied; we're nimble enough to meet it."

Yet even price alone is not the answer, according to several major manufacturers. More color programming is demanded. One called for "at least one hour a night," another for "2-3 hours a day," a third for "not less than 25 hours a week." But both NBC's pres. Sylvester L. Weaver and CBS's v.p. Richard Salant reiterated

that they're doing all the color programming they can be reasonably expected to do -- that set makers should be willing to buy color programs if they think more are needed to demonstrate and sell color receivers.

RCA accompanied price cut with wide-open invitation to all other tube and set makers to join in -- and its Lancaster tube plant has been lately, and will continue to be, a "mecca" to all interested manufacturers. In making price announcement, RCA electronic products v.p. W.W. Watts stated:

"It is RCA's hope that this substantial price reduction on color picture tubes will encourage competing manufacturers in the industry to go into production promptly in the field of color TV." Reason for price reduction, he said, was the improvements in manufacturing techniques. "Shrinkage" rate (rejection of imperfect tubes) was said to be even better than RCA engineers had expected.

Watts also hit directly at CBS-Hytron's planned 22-in. rectangular all-glass tube, stating that RCA is convinced it has no advantage over 21-in. round metal-shell unit; that it's more costly to produce; that it produces neither better nor larger picture; that 21-in. round is "here today while the 22-in. rectangular is only a promise for the future."

RCA's action was also aimed at Philco, in the opinion of some -- an effort to cool any enthusiasm of those set makers who may be waiting for Philco's promised one-gun tube (Vol. 10:32) and perhaps to persuade Philco to renew patent agreement. Among major manufacturers, only Philco and Admiral haven't yet renewed.

RCA chairman David Sarnoff backed up Watts' announcement with statement to us: "Color is now out of the area of publicity, prediction and promise and in the area of practical performance -- and performance will speak for itself. I hope that this move on our part will encourage others to come along and help us advance color. We want as many manufacturers to build color sets and tubes as are able and willing to do so; we aren't keeping our developments to ourselves. We believe in color, but there's no way to get it off the ground except to make sets and tubes -- and we're going ahead and doing just that."

MINNEAPOLIS, LAS VEGAS & BOSTON STARTERS: Three widely separated vhf stations got going this week, one in Boston on a temporary test basis as an educational outlet that expects to start programs in April. They bring to 425 total number of stations on the air after subtracting the 4 uhf quitting air last week (Vol. 11:2); they bring uhf down to 117, fewer than year ago when 1954 began with 122 uhf on air -- due to fact 31 uhf have suspended or quit operation. This week's new starters:

KEYD-TV, Minneapolis-St. Paul (Ch. 9) started Jan. 9 as Twin Cities' 5th outlet (2 of them time-sharers), with DuMont affiliation. Its studios and 50-kw RCA transmitter are in Foshay Tower Bldg., also antenna site of WCCO-TV (Ch. 4) and time-sharing WTCN-TV & WMIN-TV. Morris Baker family, which owns building, also controls station, whose gen. mgr. is Lee L. Whiting, with Robert C. Fransen, operations & program mgr.; Harvey Headen, chief engineer. Base rate is \$600. Rep is H-R Television.

KLRJ-TV, Henderson, Nev. (Ch. 2), with studio-transmitter building located between that town and Las Vegas, began test patterns Jan. 13, becomes an NBC inter-connected affiliate Jan. 23, competing with KLAS-TV (Ch. 8) which started last July. It has 5-kw RCA transmitter, 275-ft. Ideco tower with 3-bay antenna. President and 75% owner is Donald W. Reynolds, who also controls KZTV, Reno & KFSA-TV, Ft. Smith, Ark.; he's also publisher of Las Vegas Review Journal and other newspapers in Nev., Ark. & Okla. Bob Gardner is gen. mgr.; Rick Williams, production mgr.; Stanley Sulek, chief engineer. Base rate is \$225. Rep is Pearson.

WGBH-TV, Boston (Ch. 2, educational) started test patterns Jan. 10, though it plans no regular programming before April. It's 12th educational station to take to the air, uses studio building opposite M.I.T. campus in Cambridge that houses WGBH-TV, also operated by WGBH Educational Foundation in cooperation with Lowell Institute Cooperative Broadcasting Council. Station has 10-kw RCA transmitter and 119-ft. tower and 6-bay antenna on Blue Hill. Parker Wheatley is gen. mgr.; Hartford N. Gunn Jr., operations director; A.W. Richardson, chief engineer.

NO TALL-TOWER BAN, NEW STUDY ORDERED: A cabinet-level board this week rejected the military-backed premise that any TV tower over 1000-ft. is an air navigation hazard, set up a joint TV-aviation-govt. committee to take another look at the problem -- and ordered airspace authorities in the meantime to continue judging applications for tall towers on their individual merits in conformance with past practices.

This action by Air Coordinating Committee Jan. 13 appeared to doom -- for the time being, at least -- efforts by military members of its Airspace Subcommittee to revamp FCC's allocation plan by proposing virtually to wipe out provisions which encourage tower heights of 2000-ft. or more. First application for full 2000-ft. tower will soon be filed by Louisville's WHAS-TV (see below).

Airspace Subcommittee, whose job is to pass on all tower applications and to inform FCC whether they involve menace to flying, last Nov. proposed the high-tower ban, which was then referred to ACC's technical div. Technical group couldn't make up its mind on proposal, tossed it to "top ACC" -- composed of undersecretaries of cabinet departments (Vol. 10:48-51) -- which this week rendered the verdict.

ACC decision was based on proposal filed Jan. 11 by Commerce Dept. (CAA), calling for a new aeronautical study. As outlined by ACC chairman Commerce Undersecretary Robert B. Murray Jr., the industry-govt. committee will:

- (1) "Identify, investigate and study the issues (legal, safety and economic) involved in the joint use of airspace between aviation and broadcasting industries."
- (2) "Recommend appropriate action, including legislation, which will establish the position of the Federal Govt. and be beneficial to the continued growth of the industries concerned, consistent with the primary requirements of our national economy and national defense."

Members of study group will be named next week, and have been ordered to report their findings and recommendations in 60-90 days. Though ACC announcement did not specify, it's understood co-chairmen of committee will be representatives of FCC & CAA, with such industry groups as NARTB, Assn. of FCC Consulting Engineers, Airline Pilots Assn. participating, along with military and other govt. agencies.

The joint study committee -- whose formation was predicted in these columns last month (Vol. 10:51) -- will be similar to group set up in 1952, which studied the tall tower problems and agreed present standards were adequate (Vol. 8:35).

Before closing doors and arriving at decision, ACC heard spokesmen of both TV and aviation industries. Of particular interest were presentations of WHAS-TV v.p.-director Victor A. Sholis and aeronautical consultant Lowell R. Wright, both appearing in behalf of the Louisville station -- and revealing plans to build 2005-ft. tower some 17 mi. from city, highest ever proposed. Next highest proposed: WSLA, Selma, Ala. (CP), 1864 ft.; WFAA-TV & KRLD-TV, Dallas (jointly), 1521 ft. Highest erected to date: KWTW, Oklahoma City, 1572 ft.

WHAS-TV, first station to hit 316-kw power (Vol. 9:6), now bids to be first to build 2000-ft. tower. A station spokesman said bids are now being taken for construction, which will cost an estimated \$1,100,000 and will take about 9 months. An application is to be filed with FCC in next 10 days.

Another high-tower proposal was filed with FCC this week -- by K GEO-TV, Enid, Okla., which plans to go to 1356-ft., using Emsco guyed tower, to cost \$118,400.

THE CHANGING FACE OF SENATE TV PROBE: "Democratic counsel" Harry Plotkin and "GOP counsel" Robert F. Jones of Senate Interstate Commerce Committee's special network-uhf investigation got their walking papers this week, effective Jan. 31.

It was a formality -- new Chairman Magnuson (D-Wash.) could reappoint them. But Plotkin planned to resign anyway, and Jones' return is doubtful. Plotkin wants to return to his private law practice, and whether Jones is reappointed to represent Republican minority on Committee depends on how hard ex-Chairman Bricker (R-Ohio), now ranking minority member, is willing to push for him.

The dismissal notices were letters from Magnuson notifying the "temporary employes" that the authorization under which they are employed expires at end of month. New Democratic-controlled Committee holds first meeting Jan. 16 (for new mem-

bership list, see p. 5) with 2 TV-radio issues already hanging over it -- the investigation started by Bricker, and President Eisenhower's renomination this week of Chairman McConnaughey to his FCC post.

Magnuson wants to continue the TV investigation -- but its direction and techniques may change markedly. Likely to influence future course of inquiry is report handed to Magnuson by Plotkin last week, and submitted in revised form this week. Jones is working on separate report, which he presumably will submit to Bricker.

One question raised by change in political tide is whether Magnuson will release the FCC from the requests made by Jones for confidential TV station financial data and voluminous individual station coverage maps and figures (Vol. 10:52).

* * * *

Committee approval of McConnaughey isn't a foregone conclusion. His appointment was blocked in special session last Nov. by Senate Democrats, who objected to weighing a "controversial" nomination during lame-duck session (Vol. 10:46). On the Commerce Committee, most Democrats seemed dissatisfied with his answers to questions during the brief hearing. They want to give him more thorough grilling.

Some Democrats are disposed to ditch McConnaughey and demand new Democratic appointee to Commission, inasmuch as McConnaughey would be 4th Republican on FCC, as against 2 Democrats and one independent. In light of fact that Congress is now controlled by Democrats, they feel GOP majority on Commission shouldn't be so topheavy. McConnaughey, incidentally, conferred with Magnuson this week.

(For other Congressional news, including reports on Judiciary Committee's "TV monopoly" investigation and new committee appointments, see stories on p. 5.)

KNOXVILLE initial decision, favoring WBIR for Ch. 10, plus a CP on Ch. 8 for KBTM in little Jonesboro, Ark., constituted Commission's action in the grant department this week. It also issued flock of allocations changes.

In choosing WBIR over Scripp-Howard's WNOX and non-radio Tennessee TV, examiner Herbert Sharfman ruled out Scripps-Howard because of its many TV-radio-newspaper interests, but he chose WBIR (Nunn & Taft families), despite their other TV-radio-newspaper holdings, because he felt it was superior to Tennessee TV, in "local ownership, civic participation, prior conduct and misconduct and integration." Tennessee TV is owned by Glazer family, headed by Guilford Glazer, owners of Glazer Steel Corp. and numerous construction & real estate enterprises.

In allocations actions, FCC finalized reservation of these educational channels in Michigan: Alpena Ch. 11, Escanaba Ch. 49, Houghton Ch. 25, Kalamazoo Ch. 74, Marquette Ch. 35. In Pennsylvania, Ch. 44 was substituted for Ch. 73 in Scranton, Ch. 48 for Ch. 44 in State College; change was at request of WTVU, Scranton (Ch. 73) which plans to shift to Ch. 44. Commission also proposed to substitute Ch. 14 for Ch. 41 in San Antonio, Ch. 30 for Ch. 14 in Seguin, Tex.—at request of grantee KCOR-TV which wants the lower channel.

Two more court appeals were filed: (1) WTRI, Albany, N. Y. (Ch. 35) challenged FCC's failure to hold up sale of WROW-TV (Ch. 41) to Lowell Thomas group. (2) WNET, Providence (Ch. 16) attacked FCC's decision dissolving WNET's protest of Ch. 12 grant to WPRO-TV.

CP for KLYN-TV, Amarillo (Ch. 7) was cancelled by FCC after grantee failed to prosecute its application for more time to build.

* * * *

Latest effort of a uhf station to get vhf is unusual allocation proposal of Walter Reade's WRTV, Asbury Park, N. J. (Ch. 58). Station petitioned for assignment of Ch. 8 to town, to operate with 1.44-kw, 300-ft., non-directional—to serve 5-mi. radius out to 76-82 dbu contour.

Station contends that departure from co-channel and adjacent-channel spacings, to permit the Ch. 8 assignment,

is justified to give community a local outlet—now that WRTV has given uhf a valiant and unsuccessful try. Petition shows that it will cut slightly into coverage of co-channel WNHC-TV, New Haven and adjacent-channel WABC-TV & WOR-TV, New York, but it contends that their coverage would be reduced no more than would be the case if it were possible to establish a station at minimum distance from them now permitted in FCC's rules.

Petition conflicts with the Ch. 8 proposal of defunct WFPG-TV, Atlantic City (Ch. 46), which asked for directional operation. WRTV hopes that Commission will like the non-directional aspects of its plan—since no directional operation has yet been authorized.

Resumption of Lamb hearing was postponed to Feb. 9 from Jan. 18 by examiner Herbert Sharfman at request of FCC Broadcast Bureau after conference between attorneys for both sides at which J. Howard McGrath, representing Edward Lamb, argued against any delay, and Broadcast Bureau asst. chief Joseph N. Kittner pleaded for postponement so that new counsel could familiarize themselves with case. Kittner, who has had important behind-the-scenes influence in Broadcast Bureau's case so far, will become top counsel for Bureau in remainder of proceedings, will share representation at hearing with Thomas Fitzpatrick and Edward J. Brown. Latter was named as attorney following resignation of Walter R. Powell to join NARTB legal staff (Vol. 11:2). Broadcast Bureau this week asked Examiner Sharfman to deny Lamb counsel's motion to call off hearing and render decision immediately, saying it had not completed presenting its evidence in that it had reserved right to call and question ex-Communist Louis Budenz later and also to "call witnesses in the event the cross-examination brings out any matters which would call for such."

Settlement of \$12,000,000 anti-trust suit brought by now bankrupt Liberty Broadcasting System against 13 major baseball clubs (Vol. 8:8) for \$200,000 has been accepted by both sides in dispute, according to American League pres. Will Harridge. Proposal to settle 3-year-old suit is now before bankruptcy court in Dallas.

CONGRESSIONAL committees with jurisdiction over TV-radio got some new members this week as both parties made appointments to Senate committees and Democrats picked their House committee members, the Republicans to follow early next week. Senate Interstate & Foreign Commerce Committee holds first meeting Jan. 16 (see p. 3), when it is expected to name subcommittees and their chairmen—with Sen. Pastore (D-R. I.) the likely choice to head communications subcommittee.

Democrats departed from tradition, put 2 freshman Senators on important Senate Committee, shifting majority leader Lyndon Johnson (D-Tex.) and Sen. Clements (D-Ky.) to posts on vital Appropriations and Agriculture Committees. The new Senate Interstate & Foreign Commerce Committee:

Democrats—Magnuson (Wash.), chairman; Pastore (R. I.), Monroney (Okla.), Smathers (Fla.), Daniel (Tex.), Ervin (N. C.), Bible (Nev.), Thurmond (S. C.). Latter 4 are new Committee members, latter 2 first-term Senators. Republicans—Bricker (Ohio), Schoepel (Kan.), Butler (Md.), Potter (Mich.), Duff (Pa.), Purtell (Conn.), Payne (Me.)—all re-appointees.

Democrats named to House Interstate & Foreign Commerce Committee—Priest (Tenn.), chairman; Harris (Ark.), Klein (N. Y.), Granahan (Pa.), Carlyle (N. C.), Williams (Miss.), Mack (Ill.), Roberts (Ala.), Moulder (Mo.), Staggers (W. Va.), Dollinger (N. Y.), Rogers (Tex.), Dies (Tex.), Friedel (Md.), Flynt (Ga.), MacDonald (Mass.), Hayworth (Mich.). Latter 7 are new Committee members.

Democrats who were on House Committee last session but have been replaced are Rogers (Fla.), who died Dec. 1, and Thornberry (Tex.), now assigned to Rules Committee. Republicans will appoint 14 members to Democrats' 17.

Preparing for "TV-radio monopoly" investigation, Judiciary Committee Chairman Kilgore (D-W. Va.) conferred again this week with broadcaster-consultant Howard Chernoff and expressed concern about "the networks' life-&-death power over stations." He's particularly interested in their power to switch affiliation from one station to another in the same market (Vol. 11:2), according to Chernoff, who has been in east for last few weeks meeting with industry officials. Kilgore issued statement this week saying "the facts Mr. Chernoff is developing as the result of the conversations he is having with key people in the industry should provide us with an excellent background upon which to decide the extent and course of our inquiry." Chairman of monopoly subcommittee, which will conduct investigation, has not been selected, but it may be Kilgore himself.

Two Senators and a Congressman—Wyoming's Barrett (R) & O'Mahoney (D) and Nebraska's Rep. Miller (R)—conferred Jan. 10 in Washington with representatives of National Park Service in effort to get approval of antenna site for satellite KSTF, Scottsbluff (Ch. 10) atop Scottsbluff National Monument in western Nebraska. Station will be owned by KFBC-TV, Cheyenne (Ch. 5) and will rebroadcast its programs (Vol. 10:51). Rep. Miller wasn't optimistic about outcome of conference, said Park Service appeared determined to stick to its rule against any private commercial use of national park.

FCC has eliminated Detroit regional office of Field Engineering & Monitoring Bureau, putting District 19 (Detroit) under Chicago Regional Office 6 and District 20 (Buffalo) under New York Regional Office 1.

Swiss Broadcasting Co., after considering experiments in telecasting being carried out since Aug. 1953 by Post Office Dept. in Zurich & Basel, proposes to take TV over next fall and to operate it commercially.

POLITICOS identified with TV station ownerships are relatively few on Capitol Hill this session, though there are quite a few ex-officeholders in the telecasting business. With Senate majority leader Lyndon Johnson (D-Tex.) now off Interstate Commerce Committee, only member of that group with TV interest—very small—is new chairman, Sen. Magnuson (D-Wash.), who has long held 3.2% of stock of KIRO, Seattle, applicant for Ch. 7, controlled by longtime figure in state's Democratic politics, Saul Haas.

Sen. Johnson does not himself own any TV-radio stock, but Mrs. Johnson owns KTBC-TV, Austin, Tex. (Ch. 7) and recently acquired uhf KANG-TV, Waco (Ch. 34). Sen. Kerr (D-Okla.) and family own uhf WEEK-TV, Peoria, Ill. (Ch. 43) and about 43% of KVOO-TV, Tulsa (Ch. 2). Publishing family of Sen. Knowland, Republican minority leader, has 5% interest in Ch. Two Inc., applicant for Oakland, Cal.

On House Interstate & Foreign Commerce Committee, only veteran Rep. R. W. Hoffman (R-Ill.) has any TV interest, his Cicero radio station holding CP since Jan. 1953 for uhf WHFC-TV, Chicago (Ch. 26). In the House, Rep. Harris Ellsworth (R-Ore.) is part owner of a newspaper with a radio station in Roseburg, but it has never sought TV. Rep. Alvin Bentley (R-Mich.) owns one-third of uhf WKNX-TV, Saginaw, Mich. (Ch. 57), and Rep. O'Konski (R-Wis.) recently gave up CP for uhf in Wausau.

Ex-Democratic Sen. McFarland, now Gov. of Arizona, owns 40% of new KTVK, Phoenix (Ch. 3); ex-Gov. Roy J. Turner, Okla., owns 12½% of KWTW, Oklahoma City (Ch. 9); ex-Gov. Hildreth, Maine, controls WABI-TV, Bangor (Ch. 5) and has 35% interest in new WMTW, Poland Spring, Me. (Ch. 8); ex-Gov. Murphy, N. H., owns WMUR-TV, Manchester (Ch. 9); ex-Gov. Noe, La., owns KNOE-TV, Monroe (Ch. 8) and his radio WNOE is Ch. 4 applicant in New Orleans.

The Cox newspaper interests, headed by James M. Cox, once candidate for President, own TV stations in Dayton & Atlanta and are co-applicants in Miami; ex-Ambassador to Cuba Robert Butler controls a station in Minneapolis; ex-Sen. Gordon Gray, who also was former Secretary of the Army and is now pres. of the U of North Carolina, owns TV-radio stations in Winston-Salem—among other ex-officeholders identified with the industry.

Note: Ownerships and stockholdings in all TV stations are set forth in detail in Directory of TV Stations in *TV Factbook No. 20*, due to be delivered to subscribers in about 2 weeks.

In politics, TV makes the world go round. That was lesson of 1952 political conventions and campaigns, and politicians are well aware of this in laying 1956 plans. For one thing, conventions will probably be held in late Aug. or early Sept., instead of the traditional June-July—to get bigger TV viewership and to permit more concentrated political campaigning via TV between conventions and Election Day. This week, TV industry laid down a few rules for political parties to follow if they want optimum coverage of their conventions. Bill Henry, chairman of convention committee of Radio-TV Correspondents Gallery, told both parties that the 2 conventions should be held in same city and as close to the same time as possible. Republicans have been considering bids by Chicago, Philadelphia & Atlantic City, but Henry urged veto of Atlantic City because of lack of TV facilities. He pointed out that it cost TV industry \$750,000 to set up facilities for 1952 convention and it probably will cost more next time. If the 2 parties hold conventions in different cities, it will cost at least \$1,500,000, he added. Color TV poses special problems, he reported, such as heavy duty air-cooling machinery to keep convention hall climate bearable.

Personal Notes: Donald G. McGannon resigns as asst. director of DuMont Network and as gen. mgr. of its owned-and-operated stations . . . Larry Wynn, ex-WABD (DuMont) sales mgr., joins WABC-TV, N. Y. . . Sig Mickelson, CBS v.p. in charge of news & public affairs, guest of honor at reception being given by Earl Gammons, CBS Washington v.p., in Washington's Sheraton-Carlton Hotel, Jan. 17 . . . Chris Witting, pres. of Westinghouse Broadcasting Co., subject of encomium headed "Ready, Witting & Able" in Jan. 12 *Variety*, which calls his rise a "one-year-after saga," referring to year since he resigned as head of DuMont Network . . . John T. Murphy, v.p. in charge of Crosley TV stations, named northeastern membership committee chairman of Television Bureau of Advertising (TvB) . . . Michael R. Hanna, gen. mgr. of Cornell U's commercial WHCU, Ithaca, elected pres. of N. Y. Assn. of Radio & TV Broadcasters . . . Robert E. Dunville, pres. of Crosley Bcstg. Co., elected to board of trustees of Greater Cincinnati TV Educational Foundation, operating WCET (Ch. 48) . . . Ridley Bell named asst. mgr. of WRBL-TV & WRBL, Columbus, Ga., under exec. mgr. J. W. Woodruff Jr.; George Gingell becomes TV program-production mgr., George Jenkins TV sales mgr., Chick Autry asst. TV production mgr. . . Gilbert Graham appointed asst. production mgr., WBBM-TV, Chicago, succeeding Eugene McClure, now sales traffic mgr. . . Wally Sherwin named gen. mgr. of KVVG, Tulare, Cal. by M. B. Scott Corp., which has purchased station from Sheldon Anderson . . . Hubert W. Hobler named v.p., Teleprompter National Sales Corp., under pres. A. M. Gilbert . . . John Kinsella, recently gen. sales mgr. of WGTH-TV & WGTH, Hartford, rejoins WXEL, Cleveland . . . Joan Carol King promoted to mgr. of adv. & promotion, WRC-TV & WRC, Washington . . . Bob Hart resigns as commercial mgr., KFEL-TV, Denver, to join KLZ-TV . . . Franklin Jay Wiener named asst. adv. & sales promotion mgr., WCBS-TV, N. Y. . . Pete Maddux, onetime WOR-TV v.p., named TV-radio director, C. L. Miller Adv., N. Y. . . Bob Hayward, ex-KTTV & Foote, Cone & Belding, joins Brisacher, Wheeler & Staff as San Francisco TV-radio director . . . Wm. Taylor, ex-KBIF, Fresno, joins Hollywood office of Foote, Cone & Belding as TV-radio supervisor . . . Donald E. Tomkins resigns as TV-radio director of Grant Adv. to resume consulting practice . . . Paul Mensing, ex-Christal & Crosley, recently NBC Spot Sales mgr. in Detroit, promoted to radio mgr., NBC Spot Sales central div., Chicago; Wm. B. Buschgen, from N. Y. office, takes over Detroit post . . . Frank R. Bowes, ex-WBZ, Boston, heads new Television Network Sales, 370 Lexington Ave., N. Y., set up by Eugene Bernald, pres. of Pan American Broadcasting Co. to act as N. Y. & Chicago network sales & service office . . . Tom Cadden named TV-radio director, Krupnick & Assoc., St. Louis . . . John L. Zimmer named mgr., commercial TV production, Compton Adv. . . Martin Katz, ex-WCAU-TV & WOR-TV, joins Blair-TV as director of special sales project dept. . . Lionel Baxter, ex-gen. mgr. of new WSFA-TV & WFSA, Montgomery, joins WBRC, Birmingham, as sales mgr. . . Wm. A. Chalmers, ex-TV-radio v.p., Kenyon & Eckhart, now TV-radio director, J. P. Shelley & Assoc., Los Angeles.

— ■ —
 We were wrong: Our story on rate trends last week ("The TV Rate Structure Is Settling Down") reported that WWJ-TV, Detroit, doubled its rates to \$2000 during the last 6 months. Actually, the increase was from \$1600 to \$2000. We regret the error.

New reps: WDTV, Pittsburgh, now owned by Westinghouse and about to change call letters to KDKA-TV, to Free & Peters (from DuMont Spot Sales); WJNO-TV, W. Palm Beach, Fla., to Venard, Rintoul & McConnell (from Meeker).

Station Accounts: General Teleradio's repeat-performance idea, which it calls *Million Dollar Movie* and under which each of the 30 feature films it purchased last year from Bank of America is repeated as often as 16 times in one week on WOR-TV (Vol. 10:37), has spread to 64 U. S. markets and several in Canada. Sponsors of cut-in spots are mainly local merchants, banks, utilities, etc., but list of sponsorships reported by WOR-TV v.p. Gordon Gray includes some national spot accounts like Chesterfields, Sheaffer Pens, Phillips Milk of Magnesia. Success of series impelled General Teleradio this week to purchase package of 10 more feature films from Moulin Productions for more than \$500,000, to be released after next Nov. 1 . . . Procter & Gamble, for new Pin-It home permanent, plans 52-week spot campaign starting Feb. 1, thru Benton & Bowles . . . John Andre Co. (Tress-Kit hair conditioner) testing spots in 25 markets, thru Product Services Inc., N. Y.; if successful, it plans 13-week campaign . . . Canada Dry signs with WJBK-TV, Detroit, to sponsor "High School Athlete of the Week," as selected by local sportswriter judges, as part of *Chuck Davey's Sports Digest* Mon.-thru-Fri., 6:50-7 p.m. . . Among other advertisers currently reported using or preparing to use TV: S. S. S. Co., Atlanta (SSS Tonic), thru Day, Harris, Mower & Weinstein, Atlanta; Coty Inc., N. Y. (cosmetics, perfumes), thru Franklin Bruck Adv. Corp., N. Y.; Centaur-Caldwell Div. of Sterling Drug Inc., N. Y. (Fletcher's Castoria, ZBT baby powder), thru Carl S. Brown Co., N. Y.; Hamburger Co., Chicago (Martin's Sheranova wine), thru Olian & Bronner, Chicago; Ben-Hur Mfg. Co., Milwaukee (farm & home freezers), thru Walker B. Sheriff, Chicago; Gerity-Michigan Corp., Adrian, Mich. (Dishmaster dishwasher & bath room accessories), direct.

Network Accounts: Falstaff Beer this week switched its major league baseball "Game of the Week" from ABC-TV to CBS-TV for next season, starting with pre-season exhibition game March 19, thru Dancer-Fitzgerald-Sample. Weekly Sat. game is set for some 70 stations thus far, with major league cities blacked out . . . Biggest one-shot payoff in TV history is the \$100,000 Bob Hope will receive as m.c. of General Motors' *Motorama* on NBC-TV Jan. 19, Wed. 10-11 p.m. . . Revlon to be alt. sponsor (with Philip Morris) of *Public Defender* on CBS-TV starting March 10, Thu. 10-10:30 p.m., thru Sullivan, Stauffer, Colwell & Bayles . . . Winston Cigarettes to sponsor 15 min. segment 3 out of 4 Thu. on *Feather Your Nest* on NBC-TV, Mon.-thru-Fri. 12:30-1 p.m., thru Wm. Esty & Co. . . Kent Cigarettes to drop *Father Knows Best* on CBS-TV in April, but will retain the Sun. 10-10:30 p.m. period for another show . . . Geritol (drugs) drops *The Stranger* on DuMont Fri. 9-9:30 p.m.

— ■ —
 Fourth highest base rate in TV now is that of KRCA, Los Angeles, which raises Class A (7:30-11 p.m. Mon.-Sat., 5-11 p.m. Sun.) to \$3200 as of Feb. 1; it's NBC-owned, and network rate card now quotes it at \$3200, \$1920 & \$1280 per hour, half hour, 15-min., respectively. Highest rate on books is the \$6200 Class AA hour of WRCA-TV, New York (10:30-11 p.m. daily, 6-7:30 p.m. Sun.); \$6000 Class A of WCBS-TV, New York (7:30-10:30 p.m. Mon.-Sat.; 6-11 p.m. Sun.); \$3300 Class A of NBC's WNBQ, Chicago. New NBC network rate card adds WBRE-TV, Wilkes-Barre to basic interconnected group (now 52 stations) at \$475, \$285, \$190; raises WFMJ-TV, Youngstown, to \$400, \$240, \$160; raises WOC-TV, Davenport, Ia., to \$800, \$480, \$320. (For complete rate cards of the TV networks, including Canadian Broadcasting Corp., see upcoming new *TV Factbook No. 20.*)

Rate decrease: KTVU, Stockton, Cal., Feb. 1 cuts base hour from \$385 to \$175, min. \$75 to \$35.

Telecasting Notes: TV is a natural for promoting and advertising movies—so why don't exhibitors make more use of it? Delving into this question, AB-PT (United Paramount) has just completed exhaustive study, questioning theatre chains all over the country, came up with 41-p. report with these comments and recommendations: Use of TV by theatres is limited because movie makers don't supply the proper "tools to work with." Movie trailers for TV should "differ from theatre trailers as such," and borrow techniques used by other film commercials, such as cartoons, personal appearances by stars, etc. TV trailers should be pre-tested by advertising experts before release. Studios should make entertainment TV films, plugging movies, for free TV distribution . . . Test of TV's effectiveness in promoting movies will be made by UPT in group of "twin towns" in connection with release of 2 forthcoming films. The "twin towns" will be communities of comparable size in same part of country—such as New Haven & Hartford, Conn., Memphis & New Orleans. In one "twin," entire promotional effort will be concentrated on TV-radio, in other on newspaper, lobby displays, trailers, etc. . . . 20th Century-Fox setting up subsidiary organization to make films for TV under company's exec. production mgr. Sid Rogell. Biggest movie maker yet to turn to TV film production, company announced it will turn out own program series as well as renting space at its Western Ave. studio to other TV producers and supplying studio & acting personnel when required . . . J. Arthur Rank Organization, for first time offering oldies to TV, now inviting bids on package of 52 played-out British features, including the classic *39 Steps*, *Fanny by Gaslight*, *Blackmail*, etc. . . . Flamingo Films to distribute 26 feature films owned by Princess Films (Burt Balaban), including 13 made especially for TV; Robert Wormhoudt,

who headed sales distribution of the Princess package when it was handled by Vitapix, now has same job with Flamingo . . . Use of canned music by producers with AFM contracts now permitted by union boss Jimmy Petrillo as long as producer uses live music in at least part of one series—important policy change which may induce some long-time holdouts to sign union pacts . . . "Movie spectacular" may be in the cards at NBC-TV; trade scuttlebutt has it that network is negotiating with certain independent producers (David Selznick, Mrs. Sam Goldwyn) for a top-notch theatrical film—preferably in color—never before shown on TV, to fill one of its 90-min. "spectacular" segments . . . George Gobel may go on film next season, has approval of NBC to do one of his shows that way as experiment first . . . Ed Murrow's latest smash-hit, film interview with J. Robert Oppenheimer on his Jan. 4 *See It Now*, is being made available in one-hour version by Fund for the Republic, is also going to be released in Britain's big Granada Theatres chain in 90-min. and 2-hour version . . . Ex-President Truman has agreed to let Murrow's *Person to Person* show emanate from his home in Independence, Mo., March 4 . . . No live TV but more film coverage of President Eisenhower's news conferences being considered by White House; effort is being made to work out system whereby portions of actual conference can be filmed and released for TV and newsreels . . . Book-of-Month Club's current best-selling novel, Mac Hyam's *No Time for Sergeants*, gets TV treatment well ahead of movies; it goes on Theatre Guild's *U. S. Steel Hour* on ABC-TV, March 15. . . . Earth's warmth will heat and cool new modern building which will house *South Bend Tribune's* WSBT-TV (Ch. 34) & WSBT; plant, which begins rising in spring, will use "heat pump" principle for heating & air conditioning. Pereira & Luckman are architects.

PROJECTED second million-watt station in Wilkes-Barre, WILK-TV (Ch. 34), was still operating below 1-megawatt level at week's end, while enthusiastic coverage reports continued from first 1000-kw starter WBRE-TV there (Ch. 28), an RCA installation due to be followed by similar ones (Vol. 11:2). As described by a GE official, the standing wave ratio on WILK-TV's waveguide was still more than 1.1 and engineers were reluctant to increase the power until this could be rectified, although he said power has been pushed higher than 500-kw for intermittent tests.

RCA shipped 25-kw transmitter Jan. 12 to upcoming KLOP, Portland, Ore. (Ch. 12), due in Feb.; 2-kw transmitter Jan. 13 to KFIF, Fairbanks, Alaska (Ch. 2), which has Feb. target; 12½-kw amplifier Jan. 7 to WKOW-TV, Madison, Wis. (Ch. 27). Earlier it shipped 50-kw transmitter, with 2-kw transmitter for standby, to KTTV, Los Angeles (Ch. 11).

DuMont shipped visual unit of 25-kw transmitter this week to KUTV, Salt Lake City (Ch. 2), and reports station will use own composite aural unit.

GE reported no shipments this week, but announced new line of 13 high-power vhf batwing antennas, said to feature better voltage standing wave ratio than previous models. Gain of new antennas is same as their former counterparts, but use new techniques in cable grounding for high power capability and reliability, according to GE announcement.

International Standard Electric Corp. (IT&T) announces sale of 7½-kw TV transmitter to joint Azcarraga-O'Farrill interests for XEQ-TV (Ch. 9), atop 13,405-ft. Cortez Pass, about 35 mi. south of Mexico City, which will operate as a satellite of XHTV, Mexico City (Ch. 4) with microwave beam transmitting the latter's programs for rebroadcast

More opposition to Bryson bill (HR-1227), which would outlaw beer & wine advertising on TV & radio (Vol. 10:42), came this week from film producer Ziv TV, from the Wine Institute of America and from American Brewing Assn. First to reply to letter from House Interstate & Foreign Commerce Committee asking views of leading film producers, Ziv wrote that breweries are chief sponsors of 4 of its leading film series—*I Led Three Lives*, *Favorite Story*, *Eddie Cantor Comedy Theatre*, *Mr. District Attorney*—and that all commercials are handled with good taste. Wine Institute wrote committee in support of NARTB's opposition to Bryson bill, saying "it is our desire—and we believe this is in accordance with the objectives of your committee—to coordinate the voluntary activities of the broadcasting industry." American Brewing Assn. stated that the \$30,000,000 which brewers spend annually for TV-radio advertising "buys front-row seats for countless millions of Americans" at sports events. NARTB pres. Harold Fellows, whose recent report to committee showed 3% of TV programs and 2% of radio programs were sponsored by beer & wine advertisers in year ended Aug. 31 (Vol. 11:1), told Miami convention of U. S. Brewers Foundation Jan. 11 that TV code review board's monitoring and reporting service would be expanded in move to check further and eliminate any offensive commercials. A study of TV viewer attitudes toward beer & wine commercials is also being considered, he said.

Roland Gillett, Briton who has been producing TV films in U. S., named controller of programs (program director) of Associated-Rediffusion Ltd., Stratton House, Stratton St., London, one of 4 commercial program contractors of new Independent Television Authority whose 3 new stations get under way in Sept. (Vol. 10:45). The other contractors: Associated Broadcast Development Co., York House, Queen Sq.; Granada Theatres, 36 Golden Sq.; Kemsley-Winnick, 18 St. George St.—all London.

REACTION in industry to RCA's reduction of color tube price from \$175 to \$100 (see p. 1) ranged from vigorous approval to relative indifference — with a general feeling that move is one important step of several which must be taken before color begins to sell. Here are representative comments:

Robert W. Galvin, Motorola exec. v.p.: "I'm delighted with the RCA move. I hope it will encourage other responsible manufacturers to get into the swim. Color TV is definitely on its way. The initial 6 months at the market place will prove to have been the hardest. Motorola is in an enviable position, having been first to introduce large-screen color receivers. We probably produced and sold more receivers these past 6 months than all our competitors combined, and out of this has come experience and know-how that others are now acquiring."

No immediate set price reduction was possible, said Galvin, because "with today's bill of materials and labor costs, the only way that a \$100 picture tube could be reflected in lowered retail prices at this time is for the manufacturer to absorb a loss." Asserting that more color programming is essential, he added: "A minimum of 25 hours a week is necessary for color to establish itself. At least part of these hours should be in the daytime, enabling dealers to demonstrate receivers. The next move is clearly up to the networks."

B. K. Wickstrum, Sylvania sales v.p.: "We'll supply this 21-in. metal tube to the industry at \$100. We have shipped some samples, but it will take some months to supply any large order. We'll do our best to get out receivers with the tube, too. It's our feeling that price of the set shouldn't be cut from \$895. The tube is a major part of the set, but other components are still too high, compared with black-&-white—so it's difficult to reduce the price. It's our feeling that this tube is the most promising now, but we'll make other kinds if there's a demand for them."

James H. Carmine, Philco pres.: "The important thing is not price of the tube, but to be sure you have the right tube. Some in the industry are convinced the shadow-mask tube isn't it. The RCA action doesn't affect the Philco color time-table." He said he expects color to begin to move this fall, but not to "really get off the ground" until fall of 1956. As for receiver price needed to move sets, he said: "As a salesman, I know what price I'd like to see, and that's \$495"—but he wouldn't estimate when that price would be reached.

Richard Orth, Westinghouse tube div. v.p.: "It won't affect our operations; we still feel that the rectangular is the right kind of tube and we lean towards glass. We're still watching and waiting."

Color Trends & Briefs: It's the kind of color programming, rather than quantity, that determines stimulus to set-buying public, in opinion of NBC pres. Sylvester L. Weaver. Answering set makers' demand for more hours of color programming, he stated:

"Our spectaculars, the things that excite people and become 'conversation pieces,' are much more influential than a mere increase in the number of programs. We're going ahead with these, and there's enough interest among advertisers to indicate we'll probably increase the number of them this fall. As for increasing the frequency of other shows in color, that's up to the advertisers. I hope and believe there will be an increase. For this summer, we intend to produce some important remotes in color."

Daytime color programs aren't the thing to whet purchasers' appetites, either, Weaver said. "Sure, they're better in color," he said, "but the thing that makes people

Benjamin Abrams, Emerson pres.: "This is all to the good. It brings the possibility of lower prices. We're making some sets now and we expect to be producing on a reasonably large scale by July or August. We hope to have the price down to about \$600 then. I wouldn't be surprised if prices are down to \$500 or so by this fall and winter. We have to have more programming—at least 2-3 hours a day—to really awaken public interest. The quality of sets now is satisfactory as beginning, but we still have a ways to go."

Seymour Mintz, CBS-Columbia pres.: "The price cut will have an effect only if there's mass production and sale of sets. If RCA follows through with lower receiver prices and more shows, then color could move. We have enough sets in inventory to take us through the first quarter. We're not producing any more now, and we're not cutting the price! Price cutting is not the answer; if someone wants a color set for the novelty and prestige, he'll pay \$1000. There must be more programming—at least an hour a night. If the average man had no TV, and color was offered at \$500, he'd be interested. TV wasn't made by the rich people."

H. Leslie Hoffman, Hoffman Electronics Corp. pres.: "Now is the time to get going on color. We need color to push our billings and our profits up, and here's an opportunity for leadership and for the good old American free enterprise system to demonstrate what it can do. We've proven to our own satisfaction that the 21-in. tube with the new simplified chassis works well, and we plan to ship some models to our distributors in March & April. That should make us the first, and I'm not talking mere pilot run either. We need less negative selling now and more exposure—and I'm solidly on the side of RCA in this development."

T. J. Newcomb, Westinghouse TV-radio gen. mgr.: "We've made no final decision yet on basis of the price cut. We haven't built any 21-in. and we're not making any more 19-in. I doubt whether the price cut will make color sets a mass item. The tube is an important part, but it's a relatively small part of the total price of the set."

One manufacturer, who chose not to be identified, put it this way: "RCA has probably been losing money selling the tube for \$175. I guess they figure they might as well lose more if it helps get color going. Another angle is that they're spending millions on research and engineering and getting nothing back; if they cut the price to \$100 and get a little back—that's better than nothing. I'm beginning to wonder whether \$500 is the right price for a set. I think that if a customer is ready to buy a new set, he might be talked into spending \$100 just to be ready if color comes—and he must get a good black-&-white picture on the set."

want to buy is the nighttime attraction. If dealers want color shows in the daytime merely to adjust receivers, they can arrange for those themselves."

In *New York Times* interview this week, Weaver envisioned rebirth of "neighborhood TV parties," thrown by fortunate owners of color sets and reminiscent of black-&-white's early days. Article also quotes NBC exec. v.p. Robert Sarnoff on extent of color programming as follows: "I don't think that any set manufacturer has the right to say color programming is lagging unless he buys time himself." A CBS spokesman said: "I agree with him 100%."

* * * *

Jan. 17 week network color schedules: NBC-TV—Jan. 19, *Norby*, 7-7:30 p.m. CBS-TV—Jan. 20, *Shower of Stars*, Chrysler "extravaganza," 8:30-9:30 p.m.

Contest offering 50 RCA 21-in. color sets as prizes is being planned by Kraft Foods for Parkay margarine.

NEW DIRECTORIES OF TV SET & TUBE MAKERS: With 73 entities currently manufacturing and/or assembling TV receivers in the U.S., and 24 TV-radio manufacturers in Canada, compared to 71 in U.S. and 25 in Canada 6 months ago, it's plain the oft-predicted swift attrition in set makers simply hasn't materialized. That's the central fact which stands out in analyzing new directories of TV set & tube makers, which are featured in our spring TV Factbook No. 20, due later this month. There are 63 firms making vacuum tubes of all kinds, compared to 56 six months ago.

Only elimination from list of U.S. set makers during the last 6 months was Stewart-Warner, which quit last day of 1954 (Vol. 10:52). Three were added during the period: Kent Television Inc., Brooklyn, returning after 3-year absence; Walsco Electronics Corp., Los Angeles, a maker of antennas & other components; Browne TV, El Monte, Cal. -- none a big producer. A few other companies in the list are operating under bankruptcy court orders. Canadian list drops Arcan Corp. and Crystal Radio, but adds Racine Mfg. Co., Granby, Ont., in TV business under Olympic license.

Additions to tube manufacturers' list are Central Sales & Mfg. Co., C.R.T. Electronics Corp., Electronic Tube Corp., Hughes Aircraft, Midland Mfg. Co., Progressive Electronics, Reon Tube Corp., Resitron Labs, Texas Electronic Mfg. Co. Two companies left business -- Arcturus Electronics Inc. (by bankruptcy) and National Union Electric Corp., whose tube facilities were sold to Sylvania (Vol. 10:45).

Note: Added to TV Factbook No. 20 are directories of British TV-radio & tube manufacturers, with addresses and principals.

RETAILERS ALSO FIND THE 1955 OUTLOOK GOOD: TV-radio-appliance dealers, no less than the nation's retailers at large, seem to be sharing the business community's general spirit of confidence in 1955 -- but they're not going overboard in their optimism. Such was the prevailing mood, as we sensed it in speeches, panel discussions and corridor conversations at NARDA's annual convention in Chicago this week.

"Let's All Think Bigger" was title of Philco pres. James H. Carmine's speech -- and that just about epitomized the 3-day conclave. Delegates were more seriously intent on business sessions than ever before. And particularly noteworthy was the decline of traditional gripes about low profit margins.

This time, there was acceptance of simple and transparent fact that dealer, distributor & manufacturer right now are in the same boat so far as narrowed profit margins are concerned. Moreover, they have the common problem of discounters.

"Let's not be too darn optimistic," said Carmine, whose talk was easily the highlight of the NARDA meeting. Said the dynamic Philco president: "The emphasis must be on creative selling in a more competitive year. But the business will be there for you to find."

"Remember that Americans now hold \$210.2 billion in cash or its equivalent in liquid purchasing power. We can look forward to a stabilized economy that, over the next 10 years, will see gross national product go up to an annual \$500 billion. All of us -- manufacturers, distributors & retailers -- should gear our business for a 30% increase in the next decade. That's our economic underpinning."

Carmine predicted retail sales of 7,000,000 TVs, 10,000,000 radios this year, roughly equivalent to 1954. He attributed continued high volume of unit sales to low prices, said it's hard to see how they can go much lower, shied away from any forecasts of large-scale increases. As for color, he counseled a policy of caution. (For his remarks on color, see p. 8.)

As for discount houses, subject of many discussions, there was far less fear expressed than year ago. General conviction seems to be that "legitimate" dealers are winning the battle against them. Discounters are going out of business at fast

rate, it was noted. And as more open up in a community, they cut into each other's per capita share, and they haven't either reputation or economic staying power.

NARDA members' biggest advantage, servicing, was a primary subject of discussion. "Sell service, not merely the product," is one of NARDA's battle cries.

* * * *

Big National Retail Dry Goods Assn., meeting in New York this week, discussed some of same problems as NARDA -- notably the discounters. NRDGA, too, got encouraging analyses of the nation's economic health from its speakers. Dept. stores and specialty shops also were adjured to adjust to changing conditions. For example, Macy's senior v.p. David L. Yunich, who takes over at Bamberger in Newark Feb. 1:

"Technological advancements and the ready availability of money have all but knocked the props from under theory that eventually a saturation point is reached," he said. "As long as there is something new and better, on the market, there will hardly be a saturation point for any product."

"People are not only buying more, but more people are buying...In the next 10 years we will have some 3,500,000 more people over 65 and nearly 6,500,000 more people between the ages of 46 & 54. And the daring fresh youngsters from 10 to 19 will account for almost 40% of our total population. And that, gentlemen, is going to call for some substantial changes in retailing."

Discount houses were hotly argued at NRDGA convention, but no action taken. The association itself bucked demands of several members for a formal declaration against them. Irwin Wolf, exec. committee chairman, said the organization would continue to confine itself to alerting individual stores to the discount problem, which he called "a passing phase."

Note: The highly authoritative Sales Management Magazine, in Jan. 1 issue, forecasts "a great year" in 1955. It estimates over-all retail sales will average 4% ahead of 1954. Its "Board of Analysts of Future Sales Ratings" gives TV a 1955 rating of "4 stars" (meaning very good relative outlook) and radio "3 stars" (good to medium). Top rating is 5 stars (best relative outlook).

* * * *

TV production got off to fast start first week of 1955, totaling 190,896 for 5 days ended Jan. 7. It compared with 106,525 in first week of 1954. Radio production totaled 278,371 (10,847 auto), compared to 225,481 corresponding week year ago.

NEW "FLAT" PICTURE TUBE, shaped like a big rectangular "glass sandwich"—only 3 inches deep—has been built and operated by Willys Motors electronics div. in Palo Alto, Cal. Long rumored but carefully kept under wraps, the laboratory tube—which uses radically new method of scanning—was invented by Wm. Ross Aiken, now research director of Willys' west coast electronics lab and formerly with U of California radiation laboratory.

It's still classified as "experimental," and Willys spokesmen won't say how close it is to practical stage—but they do indicate they may release further information "within the next month." It's being developed principally for TV industry, but word of it—and some details—leaked out this week when Navy revealed it hopes to use tube to simplify instrument flying in aircraft, with first experimental flights due in about 3 years. At insistence of Navy, Willys "very reluctantly" released some of the details this week.

Tube industry engineers got wind of the flat tube as long as 1½ years ago, but were unable to get any details. Those we contacted took "show me" attitude, but didn't discount possible importance of the invention if it can be made to work as well as current TV picture tubes and can be produced at reasonable cost—a couple of big "ifs."

Willys Motors owns patents and all rights to tube, hopes to license tube manufacturers to build it, on non-exclusive basis, when it is ready. A company spokesman

would not say whether any tube makers have seen it, but those we contacted had not—and they were eager to get further details.

It's known that a 6-month-old version has been demonstrated privately to military officials in Washington, using an off-the-air TV picture. One Kaiser-Willys official who saw demonstration at that time was enthusiastic—saying picture was "sharper and had more contrast than regular TV, almost a 3-dimensional effect." However, one TV manufacturer said a military officer who had seen tube in action 6 months ago told him the brightness level was not high enough for commercial acceptance at that time. The model demonstrated then, and shown this week to air-frame industry at El Segundo, Cal., had 15-in. viewing screen, was 3-in. thick and transparent—about size and shape of big-city phone book. Several larger models have since been built "as part of their commercial development," according to Willys. Tube's neck can be extended either horizontally or vertically along same plane as face of tube.

Tube could be step toward oft-predicted "picture-on-the wall" TV, although its approach is entirely different from GE's and RCA's light-amplifier systems. If used in TV set itself, it could make possible considerably smaller cabinets. It's described as "compact and portable, employing only electrostatic principles, which eliminate necessity of using conventional magnetic components, which are heavy, costly and require greater electrical power."

In most complete account to be made public yet, Willys describes tube and its deflection system thus:

"[It] consists of a phosphor screen sandwiched between glass plates. It functions by electronically exciting selected areas or spots on the phosphor screen. This is accomplished by the following means: An electronic beam is injected along a horizontal edge of the tube. This beam flows in a field-free region along said edge of the phosphor screen and adjacent to a row of transverse deflection plates. Through control of the voltages on these deflection plates, the beam is bent vertically at any desired place along the edge of the tube. The beam then flows vertically in a second field-free region between a series of transparent deflection plates and the electrically charged phosphor screen.

"Deflection of the beam into the screen at any desired vertical level is made possible by controlling the voltages on the transparent deflection plates. Through the above means, then, the position of the spot created by the deflection beam may be exactly controlled.

"The tube is controlled by circuit means capable of changing the voltage on horizontal or vertical deflection plates in a sequential manner; that is, all plates are at a high voltage except those plates opposite the position at which it is desired to bend the beam.

"One of the advantages of the above-described deflection system is that it has very powerful focusing ability; that is, the convergence angle is large and beam blow-up, which normally occurs in other TV picture tubes, is not a problem in this new tube.

"This powerful focusing action in the new tube makes possible a very small spot on the phosphor screen, which results in high definition and brightness because a large amount of beam current may be concentrated in a small area."

Navy is interested in tube as means of simplifying aircraft instruments. As described this week, and as shown in mock-up form at Douglas Aircraft's El Segundo plant, aircraft of future will use 2 of the tubes — one mounted directly in front of pilot and the other below it just inside cockpit rim. Upper tube, being transparent, would not interfere with pilot's vision during contact flight, but on instrument flight would depict altitude, speed & position of aircraft, together with physical features such as mountains, etc. Second instrument would show radar-like map of features of earth below, together with such other essential information as fuel, distance to pilot's base, etc.

Spurious radiation report, submitted to FCC by RETMA, states that RETMA's radiation limits for TV receivers are practical and recommends that all manufacturers meet vhf standards (50 uv/m for Ch. 2-6, 150 uv/m for Ch. 7-13) by June 30, 1955. Uhf standard (500 uv/m) is more difficult, it says, but it recommends that standard be met by Dec. 31, 1956. "Task forces" of RETMA also reported on other devices — carrier current, power line, fixed & mobile radio, community antennas, AM-FM sets, transmitters, etc.—and GE's Dr. W. R. G. Baker, director of RETMA engineering dept., recommends that Commission form industry-FCC groups to continue work on devices needing more study. He suggests that each group include FCC and industry engineers plus a commissioner. In addition, he suggests that an over-all coordinating committee be created, comprising FCC chairman (or his appointee) and 2 or 3 industry representatives. Report also calls attention to increased imports of foreign radio sets, some of which are serious radiators—produced by manufacturers outside influence of RETMA.

Dr. Gordon K. Teal, head of materials & components research, handling transistors, placed in charge of research dept., Texas Instruments Inc., Dallas.

Trade Personals: Thomas J. Lloyd, asst. to Admiral exec. v.p. John B. Huarisa, also elected v.p. of Admiral International, replacing George Kende, resigned; Joseph F. Woodward, export sales mgr., named Admiral International sales director; George W. Bradley, ex-RCA International, named adv. director . . . Louis Hausman, CBS-Columbia v.p. and ex-CBS Radio administrative v.p., appointed to corporate staff of parent company as v.p. for special assignments . . . Don G. Mitchell, Sylvania chairman, named N. Y. State chairman of Crusade for Freedom, sponsored by American Heritage Foundation . . . David K. Elwell, from Seneca Falls plant, named mgr. of Sylvania's new CR tube plant at Hatboro, Pa., recently purchased from National Union (Vol. 10:45,48) . . . Nello Coda promoted to chief engineer, Erie Resistor electronics div. . . James W. Stafford, ex-Sylvania, named Andrea sales mgr. . . Herman Fialkov, ex-MBS, Emerson & Radio Receptor Co., elected pres. of General Transistor Corp., Jamaica, N. Y. . . Kenneth V. Curtis, with Navy Bureau of Ships last 2 years, rejoins Raytheon as marine products planning mgr. . . Raymond W. Andrews, ex-Sylvania, named mgr. of customer order & sales service, Westinghouse tube div., Elmira, N. Y. . . John A. Burnett, ex-Raytheon, named Admiral southwest regional mgr., Houston; Joseph L. Metzler, ex-Philco, named northwest regional mgr., Minneapolis . . . Edward Hoffman named Erie Resistor sales rep for Dakotas & Minn., headquartering in St. Paul . . . Robert G. Lynch, from Chicago office, named asst. eastern regional mgr., Sylvania equipment sales, Teterboro, N. J. . . George P. Lohman returns to N. Y. area as an RCA field sales rep in N. Y.-N. J. . . Frank B. Rogers Jr., v.p. since 1951 and ex-Ampro v.p., named exec. v.p., Soundcraft operations, Reeves Soundcraft Corp. . . Herbert Cornelius promoted to sales mgr., Littelfuse Inc., Des Plaines, Ill. . . Edward Berliant, pres. of Berliant Assoc. (audio equipment), acquires control of Instruments for Service, Baldwin, N. Y. ("Cap-Check" capacitor checkers); Edward Bluestone, ex-RCA, named chief engineer . . . Kenneth C. Meinken Jr., ex-National Union Electric, named commercial sales v.p., Automatic Mfg. Co., Newark (parts) . . . J. H. Goar promoted to Niagara branch mgr., Canadian Westinghouse apparatus div., succeeding R. T. Houlihan, now mgr. of London, Ont. branch . . . Paul F. Dixon promoted to national sales mgr., Peter H. Whelan to adv. & sales promotion mgr., Motorola-Canada Ltd., Toronto . . . Lawrence E. Kearney promoted to sales mgr., La-Pointe Electronics, Rockville, Conn. (antennas) . . . Burrill B. Mitchell promoted to antenna sales mgr., Chisholm Ryder Co., Niagara Falls, N. Y. . . Ned Marandino resigns as mgr. of Sylvania TV plant in Batavia, N. Y. . . Samuel Olchak, ex-Regal Electronics & Tele King, named DeWald Radio sales mgr., replacing Herbert Frank, now sales mgr. of Hinnens-Galanek Radio Corp. . . Sol Magdoff resigns as Majestic Radio sales consultant . . . Timothy P. Haworth promoted to asst. director of industrial relations, International Resistance Co.

New NARDA officers, elected at Chicago convention this week: chairman, Mort Farr, Upper Darby, Pa. (re-elected); pres., Harry B. Price Jr., Price's Inc., Norfolk; secy., John K. Mooney, Broyle's Electric Co., Marion, Ind.; treas., Victor Joerndt, Joerndt & Ventura, Kenosha, Wis. Elected v.p.'s were Emerson Dole, Wichita; Carl Hagstrom, General Appliance Co., San Francisco; Don Gabbert, Gabbert's Inc., Minneapolis.

IRE appoints to board, at meeting this week: A. N. Goldsmith; A. V. Loughren, Hazeltine; Howard Vollum, Tektronix Inc. Reappointed: IRE secy. Haraden Pratt; treas., Dr. W. R. G. Baker, GE; editor, John R. Pierce, Bell Labs.

Topics & Trends of TV Trade: TVs and automobiles—seemingly “production twins” because their output curves frequently run amazingly parallel in numbers (Vol. 10:6, 19)—didn’t run as parallel as usual in 1954. TV’s greatest expansion came in last 6 months of year, when 4,600,000 sets were turned out to bring year’s total to 7,350,000, as estimated by RETMA. Greatest auto-truck output, on the other hand, was in first half of year, with production trailing off in last 6 months to year’s total of 6,550,000, as estimated by Automobile Manufacturers Assn.

Estimated retail TV sales were nearly 7,000,000, while auto-truck sales were about equal to production of 6,550,000. Autos enjoyed greatest sales movement in spring, TVs strongest in pre-Xmas sales.

There’s no more acceptable explanation of disparity in 1954 than of similarity in preceding years. But for what they’re worth—for economic interpretation or mere curiosity—here are the month-by-month 1954 production breakdowns of both:

	TV	Auto-Truck
January	420,571	551,134
February	426,933	534,145
March	599,606	633,003
April	457,608	631,769
May	396,287	588,562
June	544,142	598,876

Totals (est.) ...	7,350,000	6,550,000

* * * *

Picture tube sales in first 11 months totaled 8,904,106, valued at \$188,660,782, compared to 9,194,851 worth \$219,922,667 in first 11 months of 1953, reports RETMA. Nov. sales were 1,157,866 worth \$27,140,693 vs. 1,269,674 at \$26,597,702 in Oct. and 693,396 at \$16,794,812 in Nov. 1953. Receiving tube sales in first 11 months totaled 347,180,564, valued at \$248,606,987, compared to 413,687,529 worth \$285,842,926 in same 1953 period. Nov. sales were 38,781,863 at \$27,618,868 vs. 42,347,794 at \$29,228,992 in Oct. and 31,606,971 at \$22,514,227 in Nov. 1953. [Note: Tabulation of picture tube sales by years, 1947-54, and receiving tube sales, 1949-54, with breakdowns for initial equipment, renewal, export, govt. & dollar value will be included in our upcoming *TV Factbook No. 20*, due later this month.]

Tax advisory committee was formed this week by RETMA to aid its fight to halve the 10% excise tax on black-&-white sets and eliminate it on color receivers. Pres. Glen McDaniel said appeals will be made shortly to Congress for relief on the tax program. Gerard M. Ungaro, Magnavox, was elected chairman. Other members: Robert S. Bell, Packard-Bell; Paul V. Galvin, Motorola; L. F. Hardy, Philco; H. L. Hoffman, Hoffman Electronics; Wm. H. Kelley, DuMont; L. W. Teegarden, RCA.

Liberalized dealer finance plan was disclosed this week by Raytheon, which committed itself to repurchase all merchandise repossessed by retailers. Under inventory finance plan, 10% down payment is required and remaining 90% is financed by Raytheon and dealer’s bank for initial period of 90 days, with option to extend financing to 180 days. Dealer’s bank is protected by Raytheon against credit frauds or conversion of financed merchandise.

Arvin’s TV-radio distributor convention is scheduled July 10-17 at Estes Park, Colo.

Electric & Musical Industries Ltd., reputedly Great Britain’s largest electronics firm, has contracted to purchase control of Capitol Records Inc., one of the “big four” record producers in U. S., for about \$4,350,000. Capitol’s 3 controlling stockholders—pres. Glenn E. Wallichs, singer-song writer Johnny Mercer & composer George (Buddy) DeSilva—will sell their 248,435 common shares (out of 476,230) to EMI, presumably at current price of about \$17.50. Sale is conditioned on an offer by EMI to all other stockholders at same price and on tenders of two-thirds of the common stock outstanding. With subsidiaries in 24 countries, EMI—sometimes called “the RCA of the British Empire”—produces TVs, radios, sound equipment and military & industrial electronic equipment as well as records. Its American subsidiary distributes classical records under “Angel” label.

National Radio & TV Week will be sponsored by NARDA, in cooperation with RETMA & National Assn. of Electrical Distributors, in week beginning Sept. 18. At that time, concentrated effort will be made to sell TV & radio receivers by public display of merchandise in local auditoriums by manufacturers, listing all franchised dealers in that community. It will be backed by intensive ad campaigns stressing value of TV-radio receivers. In some markets, banquets featuring local TV-radio celebrities will kick off promotion.

Annual plant layoffs, somewhat traditional in first quarter, began this week with total of about 1000 furloughed by Philco and CBS-Hytron. Philco dropped 700 at TV plants in Philadelphia, explaining they were hired last fall for special jobs in effort to accelerate production following 45-day strike. Hytron laid off 275 at Newburyport, Mass., resulting from shift of black-&-white tube production to new plant in Kalamazoo, Mich.

Trav-Ler Radio bought Hallicrafters Canada Ltd. this week for undisclosed sum, will take over Toronto plant Feb. 1. Plant will turn out TV-radio sets under both Trav-Ler & Hallicrafters labels for distribution through outlets of each company. Trav-Ler pres. Joe Friedman said he expected Canadian plant’s billings in 1955 to total \$7,000,000. It’s Trav-Ler’s first entry in Canadian market.

Canadian Admiral has introduced a 17-in. table model in walnut at \$220, mahogany & blonde \$230; 24-in. maroon table \$300; 21-in. open-face console in walnut at \$330, mahogany & blonde \$340; 24-in. walnut wood table \$350, mahogany & blonde \$360; 24-in. open-face console in walnut at \$400, mahogany & blonde \$410.

Liquidation sale of Stewart-Warner TVs & radios, featuring 31-55% off list price, was offered by Macy’s, big N. Y. dept. store, in full-page ad in Jan. 9 *New York Times*. Stewart-Warner recently left TV-radio business in U. S., its distributorships taken over by Hoffman Electronics (Vol. 10:52).

Westinghouse increased price by \$10-\$50 on nearly all new models introduced in closed-circuit telecast Dec. 29 (Vol. 11:1). Company said boosts will result in longer discounts of 2-6% for distributors & dealers. Price leader remains 17-in. brown metal table at \$150.

Top-ranking “ham” operator of the year, chosen to receive GE’s Edison Radio Amateur Award for outstanding public service in 1954, is 35-year-old Benjamin S. Hamilton, 8447 Denton St., LaMesa, Cal. (W6VFT), a junior college electronics teacher selected because he provided San Diego County with “an outstanding Civil Defense and disaster emergency radio network.” Judges were Val Peterson, Civil Defense Administrator, who will present the award in Washington Feb. 10; E. Roland Harriman, pres. of American Red Cross; FCC Comr. E. M. Webster; ARRL pres. G. L. Dosland.

Electronics Reports: Annual informational smorgasbord for electronics engineers, the 1955 IRE National Convention, will be held March 21-24 in New York, featuring 700 engineering exhibits at Kingsbridge Armory and 55 technical sessions and symposia at Waldorf-Astoria Hotel. Highlighting meeting, for TV-radio engineers, will be papers on video tape recorders, reproducing color TV images on black-&-white film, new vhf & uhf transmitting antennas, pocket-sized transistorized broadcast receiver, color projection receiver, new parallax mask color tube, experimental RCA tricolor vidicon camera tube, as well as panel discussions and symposia on such subjects as extended range vhf & uhf propagation and "some problems associated with telemetering and remote control of a space station."

* * * *

Color-TV microscope which can project tiny living cells on 6-ft. screen was demonstrated Jan. 14 in New York by CBS Laboratories. Device can enlarge a specimen 15,000 times, according to CBS Labs pres. Peter Goldmark, but there is no increase in resolution over the optical system, which can magnify 2000 times, the pictures being similar to photographic enlargements of pictures taken through microscope. Images were described as 100 times brighter than has been previously possible. Color microscope will be manufactured by CBS-Columbia and by GE, which is CBS licensee for field sequential color.

C. A. Boadway, Ontario Hydro Electric Power Commission, elected 1955 pres. of the Canadian Radio Technical Planning Board, succeeding Ralph A. Hackbusch, Hackbusch Electronics Ltd. H. S. Dawson, Canadian GE, elected v.p.; Stuart D. Brownlee, Canadian RTMA, re-elected secy.-treas.

Texas Instruments Inc., Dallas, which began commercial production of silicon transistors last May, this week cut prices 25% on 5 types of silicon transistors, which now range from \$9.65 to \$30. It also reduced silicon junction diodes by about 30% to \$2-\$3.85 each.

Portable Geiger counter, the "Countmaster," will be introduced this month by Hoffman Laboratories Inc., subsidiary of Hoffman Electronics. Priced at \$250, it will be distributed through mining supply companies and Hoffman TV distributors.

Jerre D. Noe appointed asst. director, engineering research, Stanford Research Institute, under director Thomas H. Morrin. Dr. Byron J. Bennett named mgr., computer laboratory; Dr. Kenneth R. Eldredge, mgr., control systems lab.

Dr. Cuthbert C. Hurd named director, electronic data processing machines, International Business Machines Corp.; Thomas E. Clemmons is sales mgr. of division.

SEAC electronic computer, developed by Bureau of Standards, now being used by Defense Dept. to determine low bidders on govt. contracts.

Axe Science & Electronics Corp., new investment fund whose primary object is long-term capital growth in the electronic and atomic fields, on Jan. 13 filed SEC registration covering proposed offering of 2,500,000 common shares at \$10 per share. Principal underwriters are W. E. Hutton & Co.; Hemphill, Noyes & Co.; Kidder, Peabody & Co. Shares would be redeemable at 99% of liquidated value within 6 months after corporation has received \$20,000,000. Investment adviser is E. W. Axe & Co., 730 Fifth Ave., N. Y.

Vision of America's future 25 years hence—technological, economic and political—is sketched by RCA chairman David Sarnoff under title "The Fabulous Future" in first of series of articles by distinguished Americans, in Jan. *Fortune Magazine*. It has been reprinted as a booklet.

Financial & Trade Notes: Emerson Radio had record sales of \$80,559,994 in fiscal year ended Oct. 31, up 6.1% from previous year's record \$75,926,546. Net income declined, however, to \$1,884,976 (97¢ a share) from \$2,988,432 (\$1.54). Earnings before taxes dropped to \$3,449,209 from \$6,499,485. Net working capital rose as of Oct. 31 to \$23,363,793 from \$14,088,041. Net worth was at record \$20,447,485, up from \$19,718,053 on Oct. 31, 1953.

Pres. Benjamin Abrams' annual report explained that "the keenest competition ever experienced in the industry took place during the last 12 months, which brought about lower prices which in turn had an adverse effect on profits." Wide publicity given color TV, he stated, caused many people to hesitate to buy black-&-white receivers until prices got more attractive. Lower prices stimulated sales, and unit sales were highest in history with the possible exception of 1950.

It was Emerson's first year in air-conditioning, which he described as satisfactory; but competitive conditions resulting primarily from a late and unusually cool summer reduced prices and hence profits.

* * * *

Among officers' and directors' stock transactions reported by SEC for Dec.: Wallace C. Johnson bought 120 Admiral, holds 2100; Orphie R. Bridges bought 200 Arvin, holds 786; Eldo H. Stonecipher bought 100 Arvin, holds 1300; Irving G. Rosenberg bought 100 DuMont Labs, holds 100; Percy M. Stewart bought 800 DuMont Labs, holds 1000; Benjamin Abrams, thru trusts & foundations, bought 600 Emerson, holds 219,800 personally and 89,239 thru trusts & foundations; Wm. R. Herod sold 300 GE, holds 5538; Monte Cohen bought 3000 General Instrument, holds 3718; Joseph C. Chapman, thru C. C. Collings & Co., bought 2481 I-T-E Circuit Breaker, sold 2492, holds 1800 personally and 10 thru C. C. Collings & Co.; Bruce R. Tuttle sold 100 Olympic Radio, holds none; James T. Buckley sold 1700 Philco, holds 16,227; Harold W. Butler sold 2000 Philco, holds 7408; Thomas A. Kennally sold 1000 Philco, holds 11,032; Wm. Gammell Jr. bought 600 Raytheon, holds 15,010; Harold C. Mattes sold 4000 Raytheon, holds 16,934; Sidney R. Curtis bought 300 Stromberg-Carlson, holds 1336; Frank E. Devans bought 100 Stromberg-Carlson, holds 112; Wm. Fay bought 500 Stromberg-Carlson, holds 511; Curtis A. Haines bought 484 Sylvania, sold 384, holds 484; C. E. Headlee bought 1000 Westinghouse, holds 2116; James H. Jewell bought 3100 Westinghouse, sold 1800, holds 1100; W. O. Lippman sold 200 Westinghouse, holds 1800; E. W. Ritter bought 1200 Westinghouse, holds 1315; Harry E. Seim sold 1000 Westinghouse, holds 1444.

* * * *

General Instrument Corp. reports \$91,739 net profit after taxes (12¢ per share) for third 1954 fiscal quarter ended Nov. 30, when sales were \$7,083,933, up 42% from second quarter's \$4,986,833. Profit for comparable 1953 quarter was \$160,172 (26¢) on sales of \$8,019,764. Present indications, said chairman Abraham Blumenkrantz, are that fourth quarter operations may also be profitable on somewhat higher sales. Effect of third quarter profit was to reduce company's cumulative 9-month loss, after tax credits, to \$158,207 on sales of \$16,755,171. This compares to net profit of \$871,571 (\$1.14) on sales of \$27,159,024 in corresponding 9 months of 1953. Steady growth at company's subsidiary plant in Waterloo, Ont., just opened, was also reported by Blumenkrantz.

Bell & Gossett Co., the Chicago pump company now in electronics, which recently sold 300,000 shares of \$2 par common stock at \$13.50 to bring total outstanding to 1,243,000, is reported working on a military developmental contract believed to be a tape or page printer that operates by wire or radio.

CBS's FIRST foray into uhf got go-ahead this week when FCC approved its \$335,000 purchase of WOKY-TV, Milwaukee (Ch. 19), Comrs. Hennock & Bartley dissenting. This makes CBS's 4th TV. It owns vhf's WCBS-TV, New York; WBBM-TV, Chicago; KNXT, Los Angeles. It is seeking to buy WSTV-TV, Steubenville, is applicant for Ch. 11, St. Louis, and has said it would seek another uhf.

FCC's approval is further implementation of its intention to give uhf impetus by attracting major broadcasting entities to the band. It has already approved Storer's 2nd entry (Vol. 10:51) by letting him buy WFTL-TV, Ft. Lauderdale (now WGBS-TV, Miami, Ch. 23), and NBC has demonstrated its serious interest by proposing to buy WKNB-TV, New Britain, Conn. (Ch. 30) and build 1000-kw transmitter for it on Mt. Higby (Vol. 11:2).

In conjunction with WOKY-TV purchase, CBS has bought physical facilities of Lou Poller's WCAN-TV, Milwaukee (Ch. 25) for \$650,000, selling to WCAN-TV the facilities of WOKY-TV for \$256,000. Poller is also selling radio WCAN to WEMP for \$250,000. CBS will take over on or about Feb. 13, start carrying most of its network feeds about 3 weeks later. It is asking for new call letters WXIX (Roman numeral 19), and mgr. will be Edmund C. Bunker, ex-KNXT sales mgr.

Comr. Hennock's reasons for dissenting were that CBS would increase its control of communications; that move doesn't help uhf elsewhere; that there will be overlap with CBS's Chicago station. Comr. Bartley said he wasn't convinced sale is in public interest or that it would help uhf—particularly since an unused uhf channel is available in Milwaukee.

FCC's patent-filing proposal, which looks toward requirement that parties asking for any kind of rule-making tell Commission their patent interests in subject involved (Vol. 10:50), received its first industry comment this week—from Skiatron, through counsel James M. Landis & Philip Bergson. Having asked for rule-making to start pay-as-you-look TV (Vol. 10:38), Skiatron said FCC should have the patent information but recommended that the data be submitted by parties at time of hearing, rather than when petition for rule-making is filed. Since actual rule-making hearing frequently comes long after request for rule-making is filed, Skiatron said, information filed with original petition would be "stale and useless."

Trouble-beset KVVG, Tulare, Cal. (Ch. 27) and its radio counterpart KCOK (1-kw on 1270 kc, MBS) are reported to have been sold to M. B. Scott Corp., which has dispatched Wally Sherwin from Los Angeles to take over management. However, no application for transfer has yet been filed at FCC on behalf either of owner Sheldon Anderson or representatives of creditors. Recently, trustee H. B. Thorpe resigned and stated that, while the financially-hit stations are still operating, hoped-for quick sale has not materialized. Last Oct., FCC approved deal whereby Los Angeles interests would acquire stations for \$175,000 plus assumption of indebtedness not exceeding \$478,000, but deal was called off later (Vol. 10:41).

TV-Radio Correspondents Assn. (Congressional gallery) elects these 1955 officers: pres., Wm. Costello, CBS; v.p., Joseph McCaffrey, McCaffrey Reports; secy., Gunnar Back, ABC; treas., Robert Hurleigh, MBS. Elected to exec. committee were Julian Goodman, NBC; Wm. T. Corrigan, CBS; Ann M. Corrick, Corrick Productions. Annual banquet honoring President Eisenhower will be Feb. 5 at Statler Hotel, Washington.

Mutual Broadcasting System reports gross time billings for 1954 totaled \$20,430,377, representing 74 sponsors handled by 57 agencies. MBS's 1953 figure was \$23,158,000, according to PIB.

Most inexpensive type of satellite yet proposed, a sort of cross between booster and satellite, has been authorized experimentally, FCC this week granting application of Manson Community TV Co., Manson, Wash. (Vol. 10:51). Grantee plans merely to "translate" Ch. 4 signals of KXLY-TV, Spokane, retransmit them on uhf Ch. 16 without demodulation. It's expected that experimental operation will be permitted to continue on commercial basis when Commission finalizes proposed low-power satellite rules (Vol. 10:51). Operation is 200-watts ERP, with identification automatically by Morse code, no operator required to be on duty. Comr. Webster dissented partially, frowning on lack of requirement that public be advised that operation is experimental. Comr. Hennock dissented from grant on grounds satellite would extend service of vhf station. From Washington, meanwhile, comes word that operators of illegal boosters, subject of FCC-Congressional meetings (Vol. 10:47), have retained a noted former U. S. Senator as counsel.

Control of KXEL, Waterloo, Ia. (50-kw on 1540 kc, ABC) was sold this week by mgr. Joe Dumond group (58%) and late Horace Lohnes' estate (18%) to owners of radio WOPA, Oak Park, Ill., who hold CP for WOPT, Chicago (Ch. 44). Purchasers are Egmont Sonderling, radio producer identified with foreign-language programming in Chicago, 25%; Richard Goodman, attorney, 55%; Mason Loundy, banker, 20%. Dumond group gets \$187,000 for 85,000 shares, Lohne estate \$56,000 for 25,500. About 15 other stockholders have offer to purchase at \$2.20 per share. Sonderling will assume management upon FCC approval of transfer.

This week's 2 applications were typical of those filed in recent months—both aimed at penetration of hinterlands. Spokane's KHQ-TV (Ch. 6) filed for 1.44-kw satellite operation on Ch. 5 at Walla Walla, with transmitter on Pikes Peak. For Watertown, S. D., KWAT (controlled by Midland Life Insurance Co., F. L. Bramble, chairman), seeks Ch. 5, proposing to build 100-kw outlet. [For further details about applications, see *TV Addenda 20-A* herewith, which starts new series of addenda to "blue pages" of forthcoming *TV Factbook No. 20*, due off presses this month.]

Commenting on pay-as-you-look TV—a rare action for anyone associated with a major movie producer—Warner Bros. producer Frank P. Rosenberg stated this week that he visualized subscription TV taking a position similar to "subsequent run" theatres but never replacing first or second run houses. It's generally conceded that major movie producers are by far most important consideration in whole speculation about fee TV, but majors have been pointedly silent about subject, naturally desiring not to upset exhibitors.

FCC budget of \$6,700,000 is requested by President for fiscal 1956, starting July 1, 1955—compared with \$6,544,400 authorized by Congress last year. Amounts earmarked for major functions: field engineering & monitoring, \$2,269,709; executive, staff & service, \$1,341,456; broadcast, \$1,205,764; common carrier, \$732,022; safety & special, \$724,375; research & frequency allocation, \$431,174.

Criminal anti-trust charges against *Kansas City Star* and its pres. Roy A. Roberts, growing out of allegations of monopolistic newspaper practices, embracing also TV-radio rates of its WDAF-TV & WDAF, were dismissed by Federal Judge Duncan Jan. 14 on motion of Govt. Civil action, however, remains in effect and trial was to begin Jan. 17 before Judge Duncan.

Power increases: WTVW, Milwaukee (Ch. 12), Jan. 2 to 316-kw; WALA-TV, Mobile (Ch. 10), Jan. 5 to 316-kw; WGBS-TV, Miami (Ch. 23), last week end to 12½-kw transmitter.

SUMMARY-INDEX OF THE WEEK'S NEWS—January 22, 1955

TRIUMPH IN ELECTRONIC JOURNALISM seen in success of President Eisenhower's first fully-filmed and telecast press conference (p. 1).

COX-KNIGHT-TRAMMELL GROUP favored for Miami Ch. 7 grant in examiner's initial decision; KSIX favored for Ch. 10 in Corpus Christi (p. 2).

WILMINGTON'S WDEL-TV IS SOLD for \$3,712,500 to Paul F. Harron, operator of WIBG, Philadelphia; its 316-kw will give coverage of both cities (p. 3).

137 FOREIGN STATIONS, 6,600,000 SETS shown in new Directory of TV Sets in Foreign Countries; 58 new stations added during 1954 (p. 3).

NETWORK CONTROL OVER AFFILIATES looms as key issue in Senate Commerce Committee investigation, as Plotkin recommends monopoly study (p. 4).

LEXINGTON'S WLEX-TV STARTS, year's first uhf, bringing U. S. total to 426; new CKX-TV starts in Brandon, Man., Canada's 25th (p. 8).

TRADE WARNED INVENTORY DANGER ISN'T OVER, despite decline of 100,000 to 200,000 in last 6 weeks; total now estimated at 2,000,000 (p. 10).

FCC WARNS IMPORTERS ON RADIATION—they must meet same standards on spurious emissions as domestic receivers; chief targets AM & FM sets (p. 10).

OLD COLOR WAR MOVES into new battleground as RCA and CBS-GE give physicians pitch on virtues of respective systems for closed-circuit use (p. 9).

FCC PATENT-FILING PROPOSAL attacked, called "vague, unnecessary"; comments filed by AT&T, Collins, Raytheon, Stromberg, Skiatron, Sylvania (p. 9).

MILITARY BLOCKS 1610-ft. TOWER in New Mexico, indicating intent to veto all proposals for TV masts over 1000-ft.; appeal probable in test case (p. 8).

REJECTED TV APPLICANTS APPEAL to court in Tampa and Petersburg, Va. cases; uhf grantees seeking lower channels, more want 1000-kw power (p. 14).

ELECTRONIC JOURNALISM—A MAJOR TRIUMPH: It was White House secretary Jim Hagerty's idea that President Eisenhower's press conferences should be filmed in full (just as they are tape-recorded) and that selected excerpts be released to TV and movies -- and enormous success of the first venture Jan. 19 should endear him to the industry and public alike. For it's one of the biggest-time features yet made available to the TV industry which, like radio, has had to fight its way through the barriers of printed journalism to establish the rights of electronic journalism.

Even the newspapers are reviewing the initial effort with enthusiasm, and it looks like the camera setup in the old State Dept. Bldg.'s treaty room is there to stay. Some newsmen actually wore blue shirts, because they had heard these televise better, though the President himself looked quite all right on the TV screen wearing brown suit & white shirt. He said he didn't find the cameras disconcerting at all.

Not much chance of the newsmen playing up to the cameras, either, for only their backs are seen as they rise to ask questions.

You'll be seeing lots more of these conferences. First was put on by all networks that same evening virtually in full, nothing of importance having been edited out of a film that ran about 28 minutes.

You'll hear lots about them, too. For there will be squawks that they're a political platform for the President, who happens to be superbly telegenic; that if he gets so much free time, so should the opposition party; that the White House can edit the content and thus the context of the film to suit its fancy; even that the newsmen are lending themselves as "performers" without compensation.

But here's how one of electronic journalism's great reporters, Eric Sevareid, sized things up in his Jan. 19 broadcast. After admitting that the White House news secretary does indeed "sit as controlling editor of what may actually be seen and heard later," he observed:

"It would be too much to expect for him to release those segments of Presidential speech in which the Chief Executive does not perform at his best. It may be

argued by some that under this system free journalists are lending themselves to the uses of calculated official propaganda, but that would be stretching journalistic Calvinism a bit too far. For the journalists of all media will watch what portions of film are released and they will feel perfectly free to make news of the fact that other portions are held back when that seems a newsworthy point to make."

No worshipper at anyone's shrine, Severeid reflects a point of view we think most of public will applaud: "Today's baptism of camera coverage went off smoothly, with no distraction to the main business of getting at the news, thanks to efficient staff arrangements. One wild fear was not borne out: that the temptation to be an actor, for the benefit of the normal ego, or the benefit of the home office, would prove too much for some among the journalists, and thus clutter up and ham up the proceedings. This did not really happen; the few awkward or loaded questions were no more than par for the regular course.

"The truth is that the words of the Chief Executive of the world's greatest power are still more compelling of attention than any amount of cameras, and I had the feeling that most in attendance forgot all about the gadgets present."

COX-KNIGHT-TRAMMELL FAVORED FOR MIAMI GRANT: One of the big TV hearings came to a head this week when chief examiner James Cunningham recommended that Miami's Ch. 7 be awarded to Biscayne TV Corp., owned by Cox and Knight newspaper-radio interests (42.5% each) and headed by ex-NBC president Niles Trammell (15%). Cunningham chose Biscayne over 3 other applicants -- none with radio or newspaper interests.

Other actions included examiner H. Gifford Irion's initial decision recommending grant to Vann Kennedy's KSIX of Ch. 10 in Corpus Christi, Tex. over 2 others in bitterly fought case; and FCC's grant to KGMB-TV, Honolulu, of satellite CPs for outlets on other islands -- Ch. 9 in Hilo, Ch. 3 in Wailuku.

Cunningham's reasoning in Miami case was that Cox and Knight had demonstrated ability to serve community through operation of WIOD and WQAM (latter would be sold if final CP is awarded) and because of Trammell's great experience. The 3 losers are bound to press vigorous attack on Cunningham's decision, particularly his rejection of "diversification" arguments. Here's how he put it:

"It is pertinent to observe that the record does not reveal the presence of unlawful practices or any evils in the Cox-Knight newspaper and broadcast operations; and that, with reference to the Miami area, they receive competition from several sources in the matter of disseminating news, information and ideas. Indeed, the finding is appropriate that, in connection with these operations, there has been rendered a creditable public service at national and local levels.

"In the circumstances here present, to disqualify Biscayne on this ground or find it less qualified as a TV applicant than its adversaries, would be to inflict penalty without warrant and deprive Miami of a TV service from the applicant herein found best equipped to deliver it. The Commission's view is that radio and newspaper ownership by an applicant for TV facilities is not a factor fatal to it, but is one to be weighed with other matters in comparative proceedings. Biscayne's clear superiority otherwise having been demonstrated, the finding is compelling that in the circumstances here present, this factor may not be resolved adversely to it."

Also due for attack by losers is fact that Trammell is a consultant to NBC. Cunningham noted that his contract with NBC stipulates that "he will not engage in any activities which might be in conflict with the interests of NBC and he must be available at all times for consultation with its officials. Similarly, it appears to be understood that he will not be called upon by NBC to perform duties which would conflict with those incumbent upon him at Biscayne."

The 3 proposed to be denied are: (1) East Coast TV, headed by Charles Silvers (aluminum products, real estate, race horses) and D. Richard Mead (construction, real estate, insurance, mortgages). (2) South Florida TV, whose principal stockholders are Jack Stein (printing, liquor); James Lawrence Fly (former FCC chairman); Bernard A. Mayer (frozen foods). (3) Sunbeam TV, whose largest stockholders are Sidney D. Ansin (shoe manufacturer), Catchings Therrell (attorney) and Charles L. Clements (savings & loan association, insurance).

In Corpus Christi case, examiner Irion chose KSIX over KEYS and Superior TV (Jack Wrather and Helen Maria Alvarez) because of KSIX's "initiative, imagination and a sensitive appreciation of community service displayed both in practice and in promise." Furthermore, he said, grant to KSIX would promote diversification -- as against KEYS theatre tieup and Wrather-Alvarez' other station ownership.

(For other FCC actions this week, see p. 14.)

STEINMANS SELL WDEL-TV FOR \$3,712,500: The first big TV sale of 1955, expected to be another big year for ownership transfers, was this week's deal whereby the Steinman brothers sell their WDEL-TV, Wilmington, Del. (Ch. 12) for \$3,712,500 to Philadelphia radio station owner and business man Paul F. Harron. WDEL-TV's new 316-kw plant is now under construction about halfway between Wilmington & Philadelphia, 25 mi. apart, and is certain to provide Grade A coverage in both cities.

WDEL-TV was founded pre-freeze (1949) by Clair R. McCollough, as gen. mgr. of TV-radio interests of J. Hale & John F. Steinman, who publish Lancaster New Era and Intelligencer-Journal, own 2 other TV stations, 6 radio stations and hold big interests in various other enterprises, including coal mines. They retain all other TV-radio properties, including WGAL-TV, Lancaster (Ch. 8) and WLEV-TV, Bethlehem (Ch. 51). Radio WDEL, Wilmington (5-kw, 1150 kc, NBC) was spun off the TV deal and sold for \$250,000 to Steinmans' new wholly-owned Delmarva Broadcasting Co.

Under terms of Wilmington deal, Steinmans get \$2,212,500 cash, rest in notes payable \$250,000 every 6 months from time FCC approves transfer. Mr. Harron owns about 86% of WIBG, Philadelphia independent (10-kw, 990 kc) which he has managed since acquiring mgr. Joe Lang's interest recently. Last fall (Vol. 10:46) he bought out interest of John B. Kelly family, including holdings of film star Grace Kelly.

Mr. Harron's radio company also owns 84% of 1953 Ch. 23 uhf grant to WIBG-TV, Philadelphia, along with Philadelphia Daily News 10%, Lemuel Schofield 3%, Jack Lit 3%. This CP presumably will now be dropped.

Note: More station sales are known to be in the making, though none ready to disclose. One more uhf each are to be acquired by CBS & NBC, though they haven't indicated whether they will be by purchase, as in case of their respective Milwaukee & Hartford acquisitions, or by application for new facilities. Both NBC and Storer this week denied published reports network was buying KPTV, Portland, Ore. (Ch. 27), Storer stating formally: "We are most happy operators of KPTV as an NBC affiliate."

(For complete tabulation of all major TV station ownership transfers since 1949, with prices paid, see upcoming TV Factbook No. 20, pp. 29-32.)

137 FOREIGN STATIONS, 6,600,000 SETS: Considering the tremendous impact of TV as a medium of information, entertainment and advertising, its progress throughout the world so far seems singularly slow -- except in the U.S.

There are now 137 TV stations in 35 foreign countries -- most of them now on regular programming basis, but some still experimental or intermittent. There are slightly fewer than 6,600,000 TV sets to receive them, as against some 34,000,000 in U.S. Last year, 58 new foreign stations went on air.

These figures are taken from foreign section of new spring edition of our semi-annual TV Factbook, due off the presses next week. On pp. 238-242 is a completely revised and up-to-date Directory of TV Stations in Foreign Countries -- in handy tabular form, giving location, ownership, frequency and power of stations on air, under construction and planned. Added feature this year is estimate of sets-in-use for each country, based on most reliable figures from all sources.

Six countries began TV service for first time last year -- by coincidence, all of them using some form of commercial operation. They are Colombia, French Morocco (2 stations each), Thailand, Luxembourg, Saar, Monaco -- the latter 3 trying to attract sponsors from France, where TV is govt.-owned and non-commercial.

Second only to U.S. in number of stations -- though far behind our total of 426 -- is Canada, where commercial govt. and private stations both operate, but are not allowed to compete in same community. Canada has 25 stations, compared with 7 at start of 1954. West Germany is No. 2 with 17 stations (though most are little

more than satellites), up from 7 in one year. Great Britain now has 12 govt. non-commercial stations, up from 8, plans first 3 commercial outlets this year.

Italy now has 9 govt.-owned stations, increase of 4 during year, plans to sell commercials in next few months. Cuba, which just year ago had more stations than any other foreign country (10), now ranks 5th with only 8 (including 4 satellites). Russia credits itself with 8 stations. France has 7 stations, up from 3, Mexico & Japan have 6 each, Brazil 4, East Germany, Switzerland & Venezuela 3 each, and 22 other countries have one or 2 each.

Some 85% of the 6,600,000 sets-in-use outside the U.S. are in Great Britain and Canada -- Britain having 4,000,000 and Canada 1,150,000. Next, in order, is probably Russia, which most reliable sources estimate has about 600,000 small-screen receivers; then Cuba with 150,000, Brazil 125,000, France 120,000, Mexico and West Germany 100,000 each, Italy 90,000. No other country has over 35,000.

FUTURE COURSE OF SENATE INVESTIGATION: Network-station relationships will probably be a key issue in the reborn investigation of TV under Sen. Magnuson's Interstate & Foreign Commerce Committee -- and though Harry Plotkin's tenure as counsel ends on Jan. 31, his influence is likely to be reflected in probe's future course.

His voluminous "memorandum" to Sen. Magnuson outlines results of his 4-month staff-level investigation, and contains recommendations which indicate the direction of the inquiry may veer somewhat from Sen. Bricker's originally announced plan to "study the feasibility and practicality [of placing] radio and TV networks under the jurisdiction of the FCC, as well as the whole vhf-uhf problem" (Vol. 10:34).

Though Plotkin report hasn't been made public, it's understood to take a dim view of network affiliation contracts and practices and to recommend that they be referred to Justice Dept. and FCC to determine whether they violate anti-trust laws. One target of Plotkin report is network option time (which stations must reserve for network programs), which Plotkin recommends should be abolished. He also suggests further inquiry into AT&T line charges as grist for any future probe.

Key questions in the future investigation may well be: To what extent do the networks control stations? How much freedom of action do individual stations have? How much should they have? Touching on programming issues, Sen. Magnuson is known to feel that his committee should examine the question of whether stations are free to reflect all viewpoints in the community -- and to what extent, if any, networks hamper freedom of expression over local stations.

Scope of Commerce Committee's probe appears to be very close to territory which Judiciary Committee Chairman Kilgore (D-W.Va.) has indicated he wants to cover in "TV monopoly" investigation he has proposed for his Committee's monopoly subcommittee. It will be at least 30 days before either investigation can get going.

Magnuson's resolution to continue investigations already under way (Vol. 11:2) was approved this week by Commerce Committee, which proposed investigations budget of \$200,000. Kilgore is ready to ask \$100,000 for his TV monopoly inquiry, is said to be planning questionnaires to the TV networks as first move.

Harry Plotkin, Democratic counsel for the Commerce Committee's investigation under GOP regime, returns Feb. 1 to law firm of Arnold, Fortas & Porter. GOP counsel Robert F. Jones, who will submit his own separate report on the investigation to date, may be retained by Committee as minority counsel, if ranking Republican Sen. Bricker, who appointed him, wants a minority counsel. Otherwise, he'll probably return to law firm of Scharfeld, Jones & Baron.

Commerce Committee investigation will come under jurisdiction of Magnuson's full committee -- not its communications subcommittee, which was named this week.

Sen. Pastore (D-R.I.) is chairman of subcommittee, with Monroney (Okla.) and Ervin (N.C.) the other Democratic members. Republican lineup was something of a surprise, harking back to last year's feud between then Committee Chairman Bricker (R-Ohio) and subcommittee chairman Potter (R-Mich.) over Potter's uhf investigation (Vol. 10:31-32). In new subcommittee, GOP members are Bricker himself and Potter -- communications being only subcommittee to which the Committee's ranking GOP member has assigned himself. Nick Zapple continues as communications counsel.

Personal Notes: James L. Knipe elected chairman & pres. of C. E. Hooper Inc., succeeding the late founder and head of that organization . . . Harold E. Fellows, NARTB pres., named national vice-chairman of 1955 Red Cross campaign . . . Robert W. Sarnoff, NBC exec. v.p., named chairman of entertainment committee of Salvation Army's 1955 Appeal . . . Robert D. Wood, from CBS-TV Spot Sales, N. Y., appointed sales mgr. of KNXT, Los Angeles, replacing Edmund C. Bunker, who becomes gen. mgr. of CBS's new WOKY-TV, Milwaukee (call to be changed to WXIX) . . . James J. Rue, asst. head of USC telecommunications dept., named CBS & KNXT asst. director of sales promotion, succeeding Byington Colvig, who goes to WOKY-TV . . . Ade Hult, with Mutual since 1934, resigned Jan. 21 as sales v.p. . . Ernest de la Ossa assigned to new post of mgr. business development, WRCA-TV & WRCA, N. Y., his job of station mgr. being abolished and his duties assumed by gen. mgr. Hamilton Shea . . . Alvin Sussman, director of film procurement for Crosley stations, has resigned . . . Harry LeBrun, ex-WCPO-TV, recently named asst. mgr. of WLWT, Cincinnati, in charge of sales, transferred to WLWA, Atlanta, as gen. mgr., succeeding Wm. P. Robinson, now heading specialized sales plans unit in Cincinnati . . . Glenn Marshall Jr., pres. of WMBR-TV & WMBR, Jacksonville, elected to board of Florida National Bank . . . Leslie C. Johnson, v.p. & gen. mgr., WHBF-TV & WHBF, Rock Island, Ill., renamed to board of advisors of State Dept. of Aeronautics . . . Dr. Leon Arons, ex-Wm. Weintraub Co., appointed research director of Television Bureau of Advertising (TvB) . . . Lynn Cleary resigns as business mgr., DuMont Network; she's now Mrs. Charles A. Christenson and retires to private life . . . Joe Merino resigns as mgr. of KFSD-TV, San Diego . . . Don H. McGannon, ex-DuMont mgr. of owned-&-operated stations, joins Westinghouse Broadcasting Co. as v.p. . . E. James McEnaney Jr., ex-radio WEAN, Providence, named gen. mgr. of WNET there, succeeding Abraham Belilove . . . Edward G. Sherburne Jr., ex-TV production chief of Navy Special Devices Center, Port Washington, N. Y., and recently consultant to educational KETC, St. Louis, named program director of new WGBH-TV, Boston (educational); Paul Rader promoted to production director . . . Edward J. DeGray, with CBS 17 years, most recently as director of radio station relations, joins Vitapix as director of station relations . . . Walter Jacobs, program director of WLWC, Columbus, O., now producer at WLWT, Cincinnati . . . Walter Engels, mgr. of news & special events, WPIX, N. Y., named associate professor of journalism, Columbia U . . . James M. Trayhern, ex-WHAM-TV, named TV-radio director, Charles L. Rumrill & Co., Rochester, N. Y. . . James A. Wethington, ex-Wm. G. Rambeau rep firm, named sales mgr. of KONA, Honolulu, replacing Jack Irvine, resigned . . . Joe Morris promoted to managing editor, *Radio-Television Daily*, succeeding Bill Noble, resigned.

Former FCC Comr. George E. Sterling has taken on job as consultant to Northwest Radio & TV School, which has headquarters in Portland, Ore., branches in Hollywood & Chicago, plans new branch in Washington, D. C. School offers courses in technical operation, announcing and writing for stations.

Federal Communications Bar Assn. elects Percy H. Russell Jr. as 1955 president, succeeding Vincent B. Welch. Other officers: George O. Sutton, 1st v.p.; George S. Smith, 2nd v.p.; Ben C. Fisher, secy.; Dwight D. Doty, treas.; Wm. C. Koplavitz & Thomas W. Wilson, exec. committee.

William F. Coleman, broadcasting pioneer and first chief operator of WTIC, Hartford, when it started in 1925, died this week in W. Hartford. He leaves widow and 2 daughters.

COMPETITION OF TV for advertising dollar isn't threat once feared, according to speaker at Newspaper Advertising Executives Assn. convention in Chicago this week—yet big newspaper rep Moloney, Regan & Schmitt on Jan. 17 took occasion once again to open up its guns against TV as a competitor. In full-page ad in *New York Herald Tribune*, headlined "Newspaper advertising is best for your sales," it directly compared the media—stating primary role of newspaper is to inform, with advertising welcomed by reader, but that TV is an entertainment medium in which advertising is resented by viewer. Ad also slapped at TV by stating "only 30,000,000 of the 46,500,000 U. S. homes have TV sets"—though sets-in-use figure was 33,500,000 as of Jan. 1, 1955.

At newspaper admen's convention, the chairman of ANPA's Bureau of Advertising, Joyce A. Swan, v.p. & gen. mgr. of *Minneapolis Star* and *Tribune* (Cowles), whose \$3,950,000 purchase of 47% of WCCO-TV & WCCO there pends FCC approval (Vol. 10:45) remarked: "TV is like sex. Both are exciting, stimulating, provocative and expensive, when we first become aware of them. Later, whether we like it or not, sex takes its place as one of life's many interests." He said establishment of Television Bureau of Advertising (TvB) is a "clear indication" that TV is becoming harder to sell.

"TV, a fine new entertainment and advertising medium, has had a position of attention out of proportion to its contribution to the advertiser. But now, as the new Television Bureau of Advertising implies, TV is assuming a place in the media of communication . . . where it can and will be properly appraised."

TV is already flying "hurricane warnings" for 1955, though it probably will continue to gain, he said. Swan didn't specify what "hurricane warnings" he had in mind—but it's hard to square such forebodings with TV's demonstrated solid growth, having just concluded a \$900,000,000 advertising year (Vol. 10:48), with NBC exec. v.p. Robert W. Sarnoff predicting \$1.3 billion for 1955 (see p. 7).

As evidence of newspapers' continuing hold on public, Swan cited recent readership survey by *Minneapolis Tribune* disclosing that 3 out of 4 readers depend on newspapers for news, one out of 4 on radio, one out of 8 on TV. Some 60% said they would prefer TV and radio without advertising, 70% indicated they would disapprove of newspaper without ads.

These officers were elected: pres., Wilson W. Condict, *St. Louis Globe-Democrat* (KWK-TV), succeeding Donald M. Bernard, *Washington Post and Times Herald* (WTOP-TV, Washington & WMBR-TV, Jacksonville, Fla.); first v.p., Karl T. Finn, *Cincinnati Times-Star* (WKRC-TV, Cincinnati & WTVN-TV, Columbus); second v.p., G. P. Swanson, *Spokane Spokesman-Review and Chronicle* (KHQ-TV).

Milton L. Greenebaum, veteran station operator and majority owner of Saginaw Bestg. Co., this week got permission to sell WSAM, Saginaw, Mich. (250-watts, 1400 kc, NBC) & WSAM-FM for \$140,000. He thus disposes of last properties, Saginaw Bestg. having recently sold its 1/3 interest in WNEM-TV, Bay City (Ch. 6) to James Gerity Jr. for \$155,000 (Vol. 10:50). New WSAM owner is WKHM Inc., applicant for Ch. 10 in Parma-Onondaga, Mich., near Jackson, and operator of Michigan radio stations WKHM, Jackson; WKMF, Flint; WKMH, Dearborn.

Protestant TV-radio center, erected at cost of \$400,000 on site donated by Emory U, was dedicated this week at 1805 Clifton Rd. NE, Atlanta—owned jointly by United Lutheran, Protestant Episcopal, Methodist, Presbyterian USA (Northern) and Presbyterian US (Southern) denominations. Dr. John M. Alexander heads staff, already plans to raise \$150,000 to expand TV production facilities.

Telecasting Notes: Skyrocketing talent costs—of which Jackie Gleason's recent \$11,000,000 deal (Vol. 10:52 & 11:2) is most extreme example—is subject of Jan. 17 column by Herald Tribune Syndicate's John Crosby, mostly based on interview with Ethel Winant, in charge of casting for *Circle Theatre & Justice*. "A year ago Teresa Wright could be hired for a half-hour for \$1500; today she wants at least \$2500," Crosby quotes Mrs. Winant. "Even \$500 people now want \$1500; we call people we used 6 months ago and find the price has tripled" . . . Crosby finds TV "the greatest repertory theatre of all time," in column praising this season's TV tendency to showcase such classics as Shakespeare plays, Victor Herbert operettas, Dickens novels and Broadway hits of decade or more ago. "The TV producers are very thoroughly looting the classics of the past," he says. "I think it's a perfectly splendid idea" . . . Shakespeare on TV (Maurice Evans-Judith Anderson in *Macbeth* on the NBC-TV Hallmark Sunday afternoon period) got Nielsen rating of 25.5, regarded exceptional since top Niensens are 40-50 for night shows; that means 6,449,000 homes and, counting 2 viewers per set, it's calculated that the play was seen by more people than saw Edwin Booth on the stage in his whole lifetime. A Broadway playhouse seating 1000, playing 8 times per week, would require 32 years for that big an audience . . . Another classic which may soon be on TV is *Peter Pan* in the new musical version starring Mary Martin, scheduled to end Broadway run Feb. 26. NBC is negotiating to color-cast the production on its *Producers' Showcase* spectacular March 7 . . . "Indie telefilm producers have had a field day this season in placing their properties on the networks," notes Jan. 19 *Variety*—"a far cry from the situation a year ago when every producer, agent and agency was raising the cry of monopoly and 'restraint of trade' re the networks' propensity to clear time for their own shows alone." *Variety* reports total of 19 new independently produced and owned TV film series on 3 major networks this season,

Battle against subscription TV by theatre owners waxed hotter this week with adoption of 4-point program by Joint Committee on Toll TV, backed by allocation of \$150,000 to finance drive. Meeting this week at Sheraton Astor Hotel in N. Y., committee hired Harold Wolff & Assoc., N. Y., as public relations counsel "to combat the propaganda of the protagonists of toll TV," and announced it had hired legal counsel to represent it in FCC hearings, would get "expert engineering service" and would establish a Washington office if the matter becomes "a legislative issue." Its policy was announced in joint statement by Trueman Rembusch and Alfred Starr, co-chairmen of committee: "The public must be informed that toll TV is economically unsound, that it will deprive the public of free TV and that it will create a government-sponsored monopoly." Meanwhile, Zenith pres. E. F. McDonald wrote NARTB pres. Harold Fellows charging him with trying to align broadcasters with theatre owners in opposition to subscription TV, referring to Fellows' letter to FCC Jan. 4 urging Commission not to waive any rule-making procedures on subject (Vol. 11:2). At week's end, FCC still had not acted on subject.

The competitive attitude: RCA's Gen. Sarnoff and NBC decline invitation to participate in Ed Sullivan's CBS-TV *Toast of the Town* Jan. 30 when it features "Cavalcade of Radio, 1920-1955." Reasons: (1) NBC artist contracts prohibit appearances on other networks. (2) RCA-NBC don't want to help high-rated *Toast of the Town* opposite own high-rated Colgate periods. (3) With Dept. of Justice, Senate Committees, FCC, et al, constantly looking down their throats to detect "monopoly," they can prove again (as if proof were needed!) that competition really does exist in the business.

compared with only 7 during 1953-54 season. One reason is said to be this year's hefty swing toward film and the fact that it would be impossible for any network to produce all its own filmed shows . . . Fu Manchu returns in \$4,000,000 across-the-board TV-radio-movie deal by Republic Pictures, which plans to produce 78 half-hour shows featuring the Sax Rohmer character, as well as 3 full-length movies and half-hour radio series . . . New "Million-Dollar Movie" negotiations reportedly being carried on by General Tele-radio with Arthur Lyons for group of 15 "A" pictures, including foreign-made Ingrid Bergman and Buster Keaton starrers never shown in U. S. theatres, as well as such classics as *The Bowery* (Wallace Beery), *Disraeli & House of Rothschild* (George Arliss), *Call of the Wild* (Clark Gable) . . . N. Y. State Bankers convention in New York Jan. 24 will view TV program as part of panel session on public relations; it's WATV's *Coffee Club*, which will feature discussion on "housewives and banks," to be picked up off-air and shown on projection screen at Commodore Hotel.

"WVEC-TV Breaks into Black as Many UHF Stations Fold," headlines front-page story in Jan. 19 *Wall Street Journal* detailing "success story" of Thomas P. Chisman's Norfolk-Hampton Ch. 15 outlet. As quoted in story, Chisman gives credit to cooperation with trade in pushing low-cost promoters, personal visits to Madison Ave. to sell clients, and free merchandising services to sponsors. He's quoted as estimating that about 53% of area's 200,000-plus sets can now receive uhf, and *Journal* tells this financial story: "In Sept., only 6 national advertisers used WVEC-TV, spending a total of \$1900. Then in Oct. the picture changed. The number of national advertisers using the station jumped to 10; in Nov., 16 spent \$9000 plugging their wares and in Dec. the number of national clients had risen to 18. In Nov. & Dec. the station operated in the black for the first time. For the first 9 months of 1954, it lost \$83,698."

"JWT-TV" could be mythical call letters of J. Walter Thompson's closed-circuit Ch. 3 in N. Y.—only station that shows nothing but commercials. Demonstrated to press this week, method is JWT's way of pre-testing commercials for benefit of clients and agency men seated in auditorium 2 blocks away from its headquarters at 420 Lexington Ave., N. Y., where the "trial" commercials originate. It's designed to substitute a comparatively inexpensive live test for expensive completed film.

John Laux is selling WJLL, Niagara Falls (1-kw, 1440 kc) for \$85,000, according to application filed this week. New owners are motel-hotel operator James T. Sandonato, holding 75%, and WJLL sales mgr. Thomas W. Talbot, 25%. Laux is v.p. and has minority interest in Great Lakes Television Inc., applicant for Ch. 7, Buffalo; owns 10% of WSTV-TV, Steubenville, O. (sale pends to CBS); has interest in radio stations WPIT, Pittsburgh, WFPG, Atlantic City & WBMS, Boston.

Republican members of House Interstate & Foreign Commerce Committee (all re-appointees), named this week: Wolverton (N. J.), Hinshaw (Cal.), O'Hara (Minn.), Hale (Me.), Dolliver (Ia.), Heselton (Mass.), Bennett (Mich.), Hoffman (Ill.), Beamer (Ind.), Springer (Ill.), Bush (Pa.), Schenck (O.), Carrigg (Pa.), Derouian (N. Y.). Democrats named their 17 members last week (Vol. 11:3).

Proposal to ban Communists as holders of commercial or amateur radio operator licenses is scheduled for oral argument March 7 by FCC. Any member of organization on Attorney General's subversive list of 1950 would be ineligible, as well as any person convicted of a felony. Requests to participate in hearing will be received at FCC up to Feb. 21.

Network Accounts: Advertising expenditures on TV (time, talent, production, etc.) will gross \$1.3 billion this year (compared to estimated \$900,000,000 in 1954 and \$600,000,000 in 1953), according to NBC exec. v.p. Robert W. Sarnoff, addressing Allentown-Bethlehem Sales Executives Club Jan. 17. He thus reiterated his forecast of last Aug. (Vol. 10:34), when he predicted TV would get \$1.3 billion in 1955 (14% of \$9.2 billion total U. S. ad budget); \$1.9 billion in 1956 (20% of \$9.7 billion). Sarnoff cited experience of Dow Chemical Co. to illustrate impact of TV advertising. When Dow started advertising Saran Wrap (plastic wrapping paper) on NBC-TV in Nov. 1953, sales were about 120,000 rolls a month; by Jan. 1954, they went up to 600,000 rolls and by last Oct. were 3,800,000 . . . Bristol-Myers to sponsor *Stage 7* on CBS-TV starting Jan. 30, Sun. 9:30-10 p.m., thru Young & Rubicam . . . Brillo to sponsor *Star Tonight* on ABC-TV starting Feb. 3, Thu. 9-9:30 p.m., thru J. Walter Thompson . . . General Foods to use special telecast of Ringling Bros. and Barnum & Bailey circus performance on NBC-TV March 29, Tue. 8-9 p.m., to introduce a new product—Apple Jell-O, which is going national after extensive midwest tests; agencies are Benton & Bowles and Young & Rubicam . . . Noxzema & Helene Curtis to be joint sponsors of *Professional Father* on CBS-TV, Sat. 10-10:30 p.m., thru Sullivan, Stauffer, Colwell & Bayles and Earl Ludgin Inc., Chicago . . . Nash to sponsor *Disneyland* in all Canadian markets starting Feb. 12, thru McKim Adv., Montreal . . . Falstaff Beer's sponsorship of major league baseball game-of-the-week on CBS-TV (Vol. 11:3) starts April 2, Sat. 1:55 p.m., thru Dancer-Fitzgerald-Sample.

Prediction of things to come? Richard Pinkham, NBC v.p. in charge of participating programs, told Harvard Business School Alumni Assn. that success of *Today*, *Home & Tonight* will permit greater experimentation with programs to break down the "straitjacket" of strictly 30-min. or hour TV shows. This was his glimpse of future: "For example, perhaps 5 years from now, NBC would have a program schedule which is not predictable on a week-to-week basis but each evening would be assigned to a different top producer. Every Monday night might be Leland Hayward night, Tuesday Max Liebman night, Thursday Josh Logan night. Given a really free hand, free of client, free of clock, some pretty wonderful things might appear. One night it might be Milton Berle for 9 minutes, followed by the Sadlers Wells for 1¼ hours and then a prizefight. The next night might be 2 solid hours of a bullfight in color direct from Madrid, followed by a visit to the Modern Museum of Art."

Predicted CBS affiliations for Meredith stations (Vol. 1:2) were confirmed this week, with disclosure that KCMO-TV, Kansas City (Ch. 5) will replace KMBC-TV (Ch. 9) on basic network next Sept. 27 and that WOW-TV, Omaha (Ch. 6) replaces KMTV (Ch. 3) in mid-1956. In Kansas City, KCMO-TV leaves ABC, in Omaha WOW-TV leaves NBC. Meredith's WHEN-TV, Syracuse (Ch. 8) is already on CBS-TV, but its KPHO-TV, Phoenix (Ch. 5) recently lost CBS affiliation to Gene Autry's KOOL-TV (Ch. 10) & KPHO-TV will operate as independent in that 4-station market. In radio, Meredith's KCMO switches from ABC to CBS next Dec. 1; WHEN from ABC to CBS April 1, 1956; WOW from NBC to CBS next June 1. Note: Official CBS release states that both KCMO-TV & WOW-TV become CBS secondary affiliates as of Jan. 24.

Educational TV bill, introduced in California Assembly Jan. 14, would permit educational institutions to purchase time on TV stations, spend money for TV programs, use TV facilities and accept gifts of money to buy TV facilities—but would not authorize use of state funds to secure or operate TV stations.

Station Accounts: Jax Beer buys Ziv's upcoming *Eddie Cantor Comedy Theatre* in 18 southern markets, thru Fitzgerald Adv., New Orleans; to be released Jan. 23, film is now sold in 180 markets in U. S. & Canada, where Coca-Cola is sole sponsor, thru D'Arcy . . . Dow Chemical and Shwayder Bros. to share cost and time of 2-min. commercial on *Mr. District Attorney* to promote Shwayder's Samsonite Ultralite luggage, made of Dow magnesium, thru Grey Adv. . . S. A. Schonbrunn & Co. (Medaglio d'Oro coffee) first sponsor signed on new 2½ hours daily Italian program schedule on WATV, Newark; first comes 90-min. first-run film, which opens day at 9:30 a.m., followed by Italian variety shows, Mon.-thru-Sat., with live dramatic show Sun. 9:30-12 noon . . . Icelandic Airways and Grolier Society (Book of Knowledge) sponsor *Mr. Executive*, new filmed series explaining American business & its executives, on WRCA-TV, N. Y. starting Jan. 22, Sat. 1:30-2 p.m., thru Doyle Dane Bernbach, N. Y. . . Harris Upham & Co., brokers, sponsoring Fulton Lewis Jr.'s new *Exclusive*, filmed interviews being offered by General Tele-radio, on WOR-TV, Sat. 7:15-7:30 p.m., with repeat Sun. same time . . . Retitled *Strange Adventure*, the high-rated Procter & Gamble *Fireside Theatre* series is now being distributed as re-runs by United Producers-Distributors for local sponsorship by any products except soaps, detergents, cooking fats . . . G. N. Coughlan Co., W. Orange, N. J., introducing Cops, its new sponge copper pot cleaner, with TV-radio spot campaign in 30 major markets in spring, thru Riedl & Freede, Paterson, N. J. . . Congress of Motor Hotels, motel & resort association, plans TV in campaign handled by Caples Co., Los Angeles . . . Commonwealth Edison buys Chicago TV spots, along with other media, in Jan. campaign to promote better wired homes, thru Leo Burnett Co. . . Among other advertisers currently reported using or preparing to use TV: W. F. Young Inc., Springfield, Mass. (Absorbine liniment), thru J. Walter Thompson Co., N. Y.; McIlhenny Co., Avery Island, La. (Tabasco sauce), thru Scheideler, Beck & Werner, N. Y.; Happiness Tours, Chicago (all-expense tours), thru Weiss & Geller, Chicago; Roger & Gallett, N. Y. (toilet articles & soap), thru Dowd, Redfield & Johnstone, N. Y.; Wate-On Co., Chicago (Wate-On for gaining weight), thru O'Neil, Larson & McMahon, Chicago; Manchester Hosiery Mills, Manchester, N. H. (Ironwear & Lady Hampshire hosiery), thru Bahn Adv., Boston; Sweet-Orr & Co., N. Y. (work clothes), thru Peck Adv., N. Y.; Dr. Pepper Co., Dallas (soft drink), thru Grant Adv., Dallas.

AAAA's *Recommended Practices for Advertising Agency People in Their Relations with Broadcasters*, drafted by committee on broadcast media and released as 4-page pamphlet this week, makes these major points: (1) Broadcasters should be encouraged to publish any special rates that may be quoted, as soon as they are made available to any client. (2) Agencies should not seek free merchandising services in excess of what is generally regarded by broadcasters as "proper." (3) Broadcaster has sole decision on whether publicity items should be broadcast, and agencies should not attempt to influence him by pressure tactics or by trying to use "clearly commercial" publicity as free "public service" program material. (4) Commercials should observe spirit and letter of AAAA & NARTB codes in avoiding excessive length, repetition and any inference of bad taste. Pamphlet is being distributed by AAAA & NARTB; copies available from them.

Rate increases: WNAC-TV, Boston, adds new Class AA (7:30-10:30 Mon.-Fri. & 6-11 p.m., Sat.-Sun.) at \$2000 an hour, \$420 min.; KCOP, Los Angeles, raises base hour from \$900 to \$1250, min. \$215 to \$250; KALB-TV, Alexandria, La., from \$200 to \$250 & \$40 to \$50; WRDW-TV, Augusta, Ga., from \$200 to \$250 & \$40 to \$50.

WLEX-TV, LEXINGTON, Ky. (Ch. 18) is first uhf to start this year, putting on test patterns Jan. 18 and planning to start with NBC and other network shows next month. It's in heart of famed bluegrass country, 70 mi. east of Louisville, 73 mi. south of Cincinnati. It uses 1-kw Continental transmitter, purchased through GPL, with 600-ft. Stainless tower and RCA antenna. Majority owners are H. Guthrie Bell & J. D. Gay, with Earl L. Boyles as gen. mgr.; James Pennock, sales mgr.; James Robertson, chief engineer. Base rate is \$150. Rep is Forjoe.

Kentucky station is 426th on air in U. S., of which 118 are uhf. This week, too, CKX-TV, Brandon, Manitoba (Ch. 8), located about 125-mi. west of Winnipeg, began test patterns with 5-kw GE transmitter, 304-ft. Stainless tower, 4-bay antenna. It's Canada's 25th station, 18th privately owned. John B. Craig is pres. & gen. mgr.; Archie Olson, sales mgr.; Douglas Lee, program director; E. H. Davies, chief engineer. Base rate is \$150. Reps are Weed & All-Canada.

* * * *

Only shipments reported this week were RCA 25-kw amplifier to KPTV, Portland, Ore. (Ch. 27), and 2-kw transmitter to upcoming KTVF, Fairbanks, Alaska (Ch. 11), which has Feb. target.

Reports on new-station construction are down to a trickle, and our continuing survey of upcoming stations brought only these from U. S. & Canadian principals this week:

WBRZ, Baton Rouge, La. (Ch. 2) began construction of 750-ft. Emsco tower this week, having just received 12-bay RCA antenna. But there's no more definite on-air target yet than "spring of 1955," according to gen. mgr. Roy Dabadie. RCA 10-kw transmitter has been partially wired, along with projection equipment and consoles. City's other outlet, WAFB-TV (Ch. 28) began in April, 1953. WBRZ is owned by Manship family, publisher of *Baton Rouge Advocate* and *Star Times*. It's already selling local time, has signed as NBC-ABC affiliate. Base rate will be \$250. Rep will be Hollingbery.

WEDB, Birmingham (Ch. 10, educational) which had hoped to start this month, now doesn't expect work to begin on transmitter for another month, according to consultant Thad Holt. It will rent old WBRC-TV facilities from Storer for \$1 a year, including use of transmitter house, loan of 5-kw RCA transmitter and 150-ft. tower with 6-bay antenna. Alabama Educational Television Commission already is operating WEDM, Munford (Ch. 7). Both outlets will share Birmingham studios, with WEDB duplicating "about 50% or more" of Munford programs.

* * * *

CKBB-TV, Barrie, Ont. (Ch. 3) plans start by Aug. 31, reports owner Ralph T. Snelgrove. It now has license, from Dominion Transport Dept., after being delayed by *Toronto Telegram's* protest (Vol. 10:44) to CBC's recommendation for TV last Sept. Make of equipment and rep not reported.

Application for new Ch. 12 station in Jonquiere, Que. has been filed by Radio Saguenay Limitee (Henry Lepage, pres.), operator of radio CKRS there. It's asking permission to operate with 20-kw visual, 11-kw aural, with antenna 312-ft. above av. terrain. Jonquiere is about 20-mi. W of Chicoutimi at headwaters of Saguenay River. CBC Board of Governors has it on agenda for Feb. 17 meeting.

Power increases: All 5 of ABC's owned-&-operated TV stations are scheduled to go to full 316-kw power Jan. 25. All on Ch. 7, they are WABC-TV, New York; WBKB, Chicago; KABC-TV, Los Angeles; KGO-TV, San Francisco; WXYZ-TV, Detroit. KUTV, Salt Lake City (Ch. 2) Jan. 20 switched to 25-kw transmitter. WSAZ-TV, Huntington, W. Va. (Ch. 3) Jan. 21 began telecasting from new antenna 1253-ft. above average terrain.

DETERMINED TO BAR any future high towers, despite rebuff last week by top-drawer Air Coordinating Committee (Vol. 11:3), military members of Airspace Subcommittee served notice this week they intend to block each high tower application individually as it comes up for approval.

The subcommittee, composed of govt. aviation authorities—civilian and military—is charged with screening all tower applications and informing FCC whether they involve hazard to flying. Late last year its military members pushed through a new policy proposal classifying virtually all towers over 1000-ft. high as "hazards." This proposal was rejected last week by ACC, which ordered industry-govt. committee to study TV-aviation airspace problems—and, in the meantime told airspace subcommittee to continue acting on individual tower proposals on case-to-case basis as it has done in the past.

In a split decision this week, Washington Airspace Subcommittee rejected 1610-ft. tower proposed by KSWs-TV, Roswell, N. M.—even though it had previously been cleared by regional airspace subcommittee in Los Angeles. Military members of Washington subcommittee—Army, Navy & Air Force—opposed tower on grounds it would be "physical and mental hazard to civil and military aircraft." Representatives of CAA & CAB, however, voted to approve the tower.

Military representatives' tactics of opposing towers just because they are high could block all future over-1000 ft. towers, unless each individual case is appealed to FCC for hearing—in which case military representatives would have to attend hearing and state reasons for their objections. If military continues to follow this policy, test case is expected to go to FCC for hearing.

Meanwhile, Rep. Hinshaw (R-Cal.) this week introduced bill (H.J. Res. 139) to "limit the height of radio & TV antenna towers." In speech on floor, Hinshaw made it clear he considers most towers over 1000 ft. to be hazardous. Bill itself provides that FCC "shall not grant a license for the construction of a radio or a TV station using an antenna tower extending over 1000-ft. above ground, and shall not renew the license for such a station, unless the Commission makes a special finding, after due consideration of the views and recommendations of the Dept. of Defense, the CAA, the ACC and any other interested party, that such tower, due to being shielded by existing obstructions, or for other reasons, is not a hazard to air navigation."

— ■ —

Congratulating industry for progress in implementing international allocations established at Atlantic City conference in 1947, FCC Comr. Webster, in speech before Armed Forces Communications Assn. in New York Jan. 20, urged continued improvement in equipment design and stressed need for educating users to make most efficient use of facilities. "When I was here 5 years ago," he said, "the probability of full implementation of the Atlantic City allocation table appeared almost hopeless. The significant aspect of the progress achieved is the fact that it was accomplished at international level."

Bartlett T. Miller has been named v.p. in charge of AT&T's new merchandising dept., Sanford B. Cousins succeeding him as public relations v.p. Before joining AT&T, Miller was v.p.-gen. mgr. of New England Telephone & Telegraph; Cousins comes from Omaha, where he was pres. of Northwestern Bell.

National Closed Circuit System Inc. is new group headed by Allan D. R. Stern, ex-DuMont operations dept., which will act in sales service capacity for DuMont closed circuit facilities. Morris Mayers is gen. mgr. of DuMont closed circuit operations.

Color Trends & Briefs: The old compatible vs. incompatible color battle moved into a new arena this week—closed-circuit (industrial, medical, military, etc.). Site was Armed Forces Institute of Pathology in Washington, and pitch was between RCA on one hand, CBS & GE on the other.

RCA conducted 3-city demonstration of a biopsy. At U of Pennsylvania hospital, one camera televised (live) removal of breast tumor, while another was focused on microscope showing specimen from the tumor. Doctors at WBAL-TV studios in Baltimore and at AFIP in Washington were asked to comment on cells seen on 21-in. screens. They agreed cells were clearly cancerous. RCA also televised demonstration of preparation of heart models, etc. from Baltimore, plus a color film showing dissection of an elephant.

CBS portion was microwaved from nearby Naval Medical Center in Bethesda, Md., showed variety of microscopic slides, examination of diseased organs, live micro-organisms. These were seen at AFIP on 4½x6-ft. projection screen, 19-in. tri-color tube and a 12-in. disc-type set—all signals being field-sequential. Projection unit had 7-in. tube, 22-in. Schmidt optical mirror, 36-in. rotating disc.

After demonstrations, pathologists were asked to comment on value of what they had seen. They seemed to agree it was a good start; that system was tremendously useful for certain kinds of instruction and examination; that there may be great future in observing live organisms under low light levels and with polarized light. They shied away, however, from attempting final diagnosis of difficult situations via TV; they all wanted to put slides under their own microscopes, examine them under their own procedures, under known conditions.

Dr. Alfred N. Goldsmith, RCA consultant, urged standardization on compatible system, stating that medical profession stands to benefit quickly from industry's efforts to improve equipment for station and home use; that kine and magnetic recordings are being developed for compatible system, that network facilities are adapted for compatible system, etc.

In opposition, GE's gen mgr. of commercial equipment dept., Wm. J. Morlock, urged that field-sequential equipment is cheaper to buy and maintain, simpler to operate. He pointed to smaller camera, simple one-tube large screen projector, less complex associated electronic equipment.

CBS v.p. Dr. Peter C. Goldmark said CBS is going into manufacture of closed-circuit color equipment, in

addition to having licensed GE to make it, and will shortly offer color camera chain at "under \$20,000."

RCA engineering products v.p. Theodore Smith, countered the price-size arguments of CBS and GE by disclosing that RCA would shortly offer a 3-vidicon color camera for closed-circuit use.

A national conference in Chicago Feb. 5 has been scheduled, meanwhile, designed to keep physicians informed of TV's medical uses. Top medical and TV figures will participate.

* * * *

Improved monochrome signal from color picture is advantage claimed by GE for its colorcasting equipment, disclosed for first time this week. As explained by GE design engineer Pierre H. Boucheron to joint SMPTE-IRE meeting in Chicago, new method permits studio pickup of separate black-&-white image, to which color picture is then added. He explained that sharper picture under new GE method is accomplished "by forming the luminance, or black-&-white picture, directly from a sequential color camera before registration problems are met. The black-&-white picture is then fed, unchanged, through a conversion device at the station. At the same time, the color signals which were also picked up by the sequential camera, are encoded for the simultaneous color signal as required by FCC. The two independent signals—one black-&-white, the other color—are mixed and transmitted as one signal."

Latest aiming for strong identification with color is Raytheon, whose TV-radio v.p. Henry F. Argento this week told distributors meeting in Boston that Raytheon plans to build 25-30,000 of the 300,000 color sets he estimates will be produced this year. Raytheon has 19-in. sets selling for \$995 & \$1095, but Argento said he visualizes no cut in price soon, predicated on drop in tube price (Vol. 11:3), because price cut was anticipated. He said he expects it will be about 3 years before color sets drop to \$500 range. Demand for transistor radios (Vol. 11:2) has been greater than expected, Argento said, adding that production schedules have been increased.

Unusual comparative demonstration of color TV and color film has been scheduled by western New York subsection of SMPTE for Jan. 26, at studios of WHAM-TV, Rochester. Eastman-sponsored *Norby* will be picked off-air and displayed on color and black-&-white receivers simultaneously with directly-projected 16mm color film in studios. Engineers will have direct phone line to NBC-TV, New York, so they can synchronize film projection with telecast.

PATENT-FILING proposal issued by FCC, to cover rule-making proceedings (Vol. 10:50), was generally opposed by the 7 parties filing comments last week and this—AT&T, Collins, Raytheon, Skiatron, Stromberg-Carlson, Sylvania, Central Committee on Radio Facilities of the American Petroleum Institute.

Most felt that FCC's aims and language weren't clear; that it was seeking material it didn't need or couldn't use; that Commission should ask for specific patent data only when it's obvious that information has bearing on subject.

AT&T said FCC's proposal could be an "unreasonable burden," requiring submission of voluminous data which would be useless in most rule-making proceedings—such as those affecting types of emission, spurious radiation, allocations, bandwidths & separations, ERP, height & location of towers, etc. It suggested that FCC staff make engineering analysis of specific problems then determine whether patent data is needed.

Petroleum group said it believes underlying aim of FCC is good but it wants until Feb. 18 to study proposal further. Collins felt that patent data would be "entirely

irrelevant" in most cases; that patent questions should be initiated by FCC or interested parties only when they are obviously significant.

Stromberg-Carlson stated that patent situation is important only in very few cases and said that rule-making should be decided on merits rather than on patents. Raytheon termed FCC's language "extremely general," suggested that proposal be re-drafted "with elaboration supplied regarding precisely the information to be filed."

Sylvania felt that if FCC wants detailed information on patents, its proposal is "too vague, indefinite, ambiguous, unduly burdensome, ill-advised, impractical and unnecessary." It said that FCC is seeking "to achieve by indirection that which the Commission has no authority to do directly"; that proposal is "unreasonable and unlawful invasion of a person's privacy"; that it may conflict with Invention Secrecy Act of 1951 (HR 4687). Last week, Skiatron suggested that patent information should be sought at time of actual rule-making hearing rather than when petition for rule-making is filed—to avoid collection of "stale and useless" information.

FCC WARNS IMPORTERS ON SET RADIATION: FCC moved in on imported receivers this week, to make sure they meet same standards on spurious radiation that domestic sets do. Commission hasn't yet finalized radiation rules (Vol. 11:3), but it wants to be certain that foreign-made sets don't undo progress laboriously achieved over the years by U.S. manufacturers. At the moment, principal targets are FM & AM sets, because imports of TV receivers are insignificant (Vol. 11:1).

The way Commission went about it was to address letter to the importers of foreign-built radio and TV receivers, calling their attention to pendency of rule-making on spurious radiation, noting:

"It has come to the attention of the Commission that foreign-made receivers imported into this country may be in violation of standards which may be adopted by the Commission and that, in such event, steps toward the enforcement of the Commission's Rules may be necessary."

When FCC does finalize its rules, it won't be able to force foreign manufacturers to go through certification procedures, nor will it be able to move directly against importers. However, it's believed that public can be made to shy away from sets not certified to meet U.S. radiation standards.

Trouble with foreign sets was called to FCC's attention by RETMA, which has achieved improvement in U.S. sets only through long and strenuous effort. It is presumed that if foreign manufacturers want to continue sales in U.S. they'll move to bring sets into line. Though this will probably make sets most costly, RETMA feels it would not eliminate need for greater tariff protection for U.S. manufacturers -- principally because components makers, not set makers, are hardest hit by imports of foreign-made goods. It's expected RETMA will continue efforts to get current 12½% tariff restored to 35% (Vol. 11:1).

FCC's letter will be directed, presumably, to following companies which are known or believed to be importers of radios or related electronic items: American Elite Inc., N.Y. (Telefunken radios); D.R. Bittan Co., N.Y. (electronic equipment); British Industries, N.Y. (high-fidelity equipment); Leru Laboratories Inc., Paterson, N.J. (Siemens radios); International Standard Trading Corp. (IT&T subsidiary, products unknown); North American Philips Inc., N.Y. (Philips radios); N. Pickens Import Co., N.Y. (Blaupunkt radios); Remco International, N.Y. (Tonefunk radios); Wilcox-Gay Corp. (Metz and Grundig radios).

TRADE WARNED INVENTORY DANGER NOT OVER: Those high TV inventories in December, which prompted authoritative warnings that there's danger ahead if production continued to outstrip public demand (Vol. 10:49-50), have come down slightly since then -- but not enough for one of our leading authorities to modify his note of caution.

Inventories are currently estimated at 2,000,000 at all levels, down between 100,000 & 200,000 from Dec. 1. Though encouraging, the reduction wasn't as great as it normally is in Dec. -- consequently, inventories must come down even further in first quarter of this year to put industry out of danger. Traditionally, however, inventories have gone up in the first quarter to prepare for sales push later.

TV production is still too high, says our informant, one of the industry's top trade experts -- though it dipped to 166,522 in week ended Jan. 14, compared to 190,896 in first week of year. Ideal weekly rate this time of year is regarded as 130,000. For first quarter, it's reckoned, production of about 1,650,000 would be just right, permitting inventories to be worked off gradually. It would also be more in keeping with retail sales pattern, which usually sees 26% of TV sales in the first quarter of year, 17% in second, 22% in third, 35% in fourth.

"Seasonal patterns seem to be forgotten in the industry," we're told. "We should know by now that we can't support that high production rate in the spring and

summer. A lot of manufacturers wail about price-cutting, dumping, and so forth, but they seem to do nothing to avoid those evils. One thing they can do right now is to cut down on production to work off those inventories. But you know what the problem is -- it's always the other guy who's at fault."

* * * *

Statement this week by Sylvania chairman Don G. Mitchell reaffirms our theme that industry's No. 1 task this year is to tap the second-set & replacement markets (Vol. 11:1-2). Pointing out that only 16,400,000 homes in U.S. are currently without TV, as contrasted to 23,000,000 at start of 1954, he remarked:

"Virtually untapped is the field of the second-set home. It is in this area where we may start to make big gains, if we use the right approach, by selling sets for the den, the children's bedroom, the upstairs sewing room. It seems to me that 1955 is the time to begin creating such a new market to offset the fast-dwindling ranks of first-time buyers."

* * * *

Radio production totaled 267,544 (153,822 auto) week ended Jan. 14, compared to 278,371 in first week of 1955.

Trade Personals: Wm. H. Oelkers, general purchasing agent of Philco since 1952, appointed v.p. in charge of purchasing . . . J. F. O'Brien named manager of theatre & industrial marketing department, RCA engineering products division . . . Louis G. Pacent Jr., manufacturing v.p. of Emerson subsidiary Quiet Heat Mfg. Corp. (air conditioners), appointed works mgr. of parent company, replacing Edward J. Kelly, resigned . . . Inwood Smith, ex-sales v.p. of RCA Estate Appliance Corp., named sales mgr. of GE Appliances Co., Louisville, distributing subsidiary for GE major appliances; he succeeds Jack H. O'Toole, resigned . . . T. Stanton Fremont, Admiral appliance sales mgr., gets new post of appliance merchandise mgr. . . . Harry H. Martin promoted to mgr. of Sylvania TV receiver plant in Batavia, N. Y., replacing Ned Marandino, resigned . . . George McCumber, from Ottawa, O. plant, named supervisor of product engineering at Sylvania's CR tube plant in Hatboro, Pa., recently purchased from National Union (Vol. 10:45, 48) . . . Dr. A. Melvin Skellett, ex-National Union Electric & Bell Labs and holder of more than 70 electronics patents, named director of Tung-Sol color tube planning & development . . . Harry B. Price Jr., Norfolk, NARDA pres., elected a trustee of National Foundation for Consumer Credit, headed by Philco exec. v.p. John M. Otter . . . Joseph Mann promoted to administrative services mgr., DuMont receiver sales div. . . . Milton Binstock appointed v.p.-sales director, Frank Ferdinand sales mgr., Sheldon Electric Co., Irvington, N. J. (tubes) . . . Wm. C. Bainbridge promoted to director of automation, Aerovox Corp. . . . Harold M. Zimmermann promoted to CBS-Columbia purchasing director, reporting to Will James, operations director . . . Harold Desfor, RCA Victor publicity director, Camden, resigns to join public relations dept. of Food Fair Stores Inc., Philadelphia . . . Robert K. Hunsicker, ex-Wickes Engineering & Construction Co., named mgr. of General Precision Labs' new west coast sales office at 21 N. Santa Anita Ave., Pasadena; Thurston LeVay, ex-Hazeltine, named director of military programs at new office . . . N. B. Muir promoted to gen. sales mgr., Northern Electric Co. Ltd., Montreal . . . Lawrence T. LaPatka promoted to mgr. of Burroughs Corp. electronic instruments div., Philadelphia . . . Jack Rife named east central district mgr., Morris F. Taylor Co., 9431 Georgia Ave., Silver Spring, Md. (high-fidelity components) . . . Robert E. Cheshire resigns as Hoffman Electronics southwestern regional mgr. . . . Richard F. Gorman, ex-Foote, Cone & Belding, named Admiral asst. sales promotion mgr. . . . Harold L. Blom, with GE since 1925, appointed mgr. of marketing administration for communica-

tions equipment under marketing mgr. Lacy W. Goostree . . . Wm. J. McCluney, ex-Moore Bros. Distributors Co. & J. A. Walsh Co., Houston, named district merchandiser there for Stromberg-Carlson TV-radio div. . . . Leonard A. Rooney, ex-Raytheon, joins Sylvania on special assignment covering satellites and new products . . . Mrs. Charlotte S. De Armond, ex-Pacific Airmotive Corp., named Hoffman Electronics public relations director.

RCA Victor's annual awards of merit for distinguished service to the company were presented to 20 officers and employes at banquet Jan. 22 in Philadelphia's Barclay Hotel. Gold watches were presented by W. Walter Watts, exec. v.p. for electronic products. Winners: Robert A. Seidel, exec. v.p. for consumer products; Emanuel Sacks, v.p.-gen. mgr. of record div.; Wm. L. Jones, v.p., technical products service, RCA Service Co.; Sidney E. Baker, mgr. of consumer products service in western area, Service Co.; James P. Bannon, field sales engineer, TV div.; E. Gerald Bowman, administrator of plant community relations; Louis A. Connelly, mgr. of govt. dept., engineering products div.; Harry J. Cravens, electronic equipment specialist, Service Co.; Arthur N. Curtiss, mgr. of Los Angeles engineering products plant; Alfred E. Hindle, custom record sales mgr. of Chicago region; Leo F. Holleran, gen. marketing mgr., tube div.; Andrew L. McClay, gen. plant mgr., record div.; Alan B. Mills, merchandise mgr., TV div.; Maxmilian J. Obert, mgr. of transformer development group, parts engineering; John F. O'Brien, mgr. of theatre & industrial marketing; George H. Ritter, mgr. of Indianapolis tube plant; Harry R. Seelen, mgr. of color kinescope operations, tube div.; Joseph Toyzer, mgr. of manufacturing engineering at Indianapolis plant; Nelson J. Van de Lester, operations mgr., RCA Victor Distributing Corp., Chicago.

Brig. Gen. Peter C. Sandretto (USAF) and A. G. Clavier have been named asst. vice presidents of Federal Telecommunications Labs (IT&T)—former as general coordinator for military research & development projects, latter as general coordinator for company-sponsored research & development activities. Both were previously technical directors.

West Coast Electronics Manufacturers Assn. has elected Varian Associates gen. mgr. H. Myrl Stearns president for 1955, succeeding E. P. Gertsch, Gertsch Products Inc. Other new officers: Gramer Yarbrough, American Microphone Co., v.p.; D. C. Duncan, Helipot Corp., secy.; Calvin Townsend, Jennings Radio Mfg. Corp., treas.

Topics & Trends of TV Trade: RETMA's talking points in its plea to Congress to halve the 10% excise tax on black-&-white receivers (and radios & phonographs), and eliminate it altogether on color TV sets, boil down to these main considerations: (1) TV-radio-phonograph industries were victims of discrimination last spring when Congress gave them no relief in voting to halve excise taxes on refrigerators, freezers & other appliances (Vol. 10:14), despite fact that their products are sold in open competition with white goods. (2) Price of \$1000 color set can be reduced by \$100, and color TV development stimulated, by elimination of tax—in keeping with traditional policy of withholding excise on new industries and products.

RETMA officials generally feel they have a better than 50-50 chance of winning at least part of their tax objectives, though they naturally hesitate to go on record with their sentiments.

RETMA's arguments, threshed out at first meeting of its new tax advisory committee in Washington Jan. 18, will be brought before House Ways & Means Committee as soon as bill incorporating RETMA's goals is introduced. RETMA is currently drafting such a measure, which probably will be discussed at next meeting of tax committee in mid-Feb. Following meeting this week, RETMA sent letter to Rep. Cooper (D-Tenn.), chairman of House Ways & Means Committee, asking chance to explain its excise tax reforms as part of any overall tax bill which committee may consider.

Principal spokesman for RETMA's monochrome proposals before Congress probably will be Magnavox's Gerard M. Ungaro, chairman of tax advisory group. The color spokesman has not been determined.

* * * *

TV shipments to dealers totaled 6,147,135 in first 11 months of 1954, when production was 6,513,292, according to RETMA state-by-state tables released this week (county-by-county tables available from RETMA to members on request). Total compared with shipments of 6,043,678, production of 6,765,000 in first 11 months of 1953. New York led in shipments, with 576,344; California second, 440,233; Pennsylvania third, 402,346. Nov. shipments were 774,379, compared to 903,160 in Oct. and 701,628 in Nov. 1953. [State-by-state, year-by-year tabulation of shipments to dealers, 1950 through first 10 months of 1954, plus cumulative totals, will be included in upcoming spring 1955 *TV Factbook*, due off presses this week.]

Capehart-Farnsworth currently has 80 distributors serving over 10,000 retailers, including 78 of largest dealers in country, regional distributors convention in St. Louis was told this week by E. W. Gaughan, v.p. & gen. sales mgr. Shown at convention were 4 new 21-in. TV models—a brown leatherette table at \$180; mahogany & bisque finish table, \$230 & \$250; mahogany & bisque finish table, \$290 & \$310; de luxe open-face mahogany & bisque console, \$340 & \$360. Gaughan also said production will start in June on 3 large-screen color sets, one of them a table model.

Raytheon introduced new line of 41 models at distributors convention in Boston, sets ranging from 17-in. ebony metal table model at \$140 to 21-in. open-face maple console at \$380. Sets have top controls and vertical chassis. Also introduced were 10 radios ranging from mahogany plastic table model at \$20 to leather transistorized portable at \$80. Latter was shown at recent Chicago furniture marts (Vol. 11:2).

Jan. 24 week network color schedules: NBC-TV—Jan. 26, *Norby*, 7-7:30 p.m.; Jan. 30, *Max Liebman Presents*, 7:30-9 p.m.

DISTRIBUTOR NOTES: Hoffman Electronics appoints Sievert Distributing Co. Inc., Milwaukee; Allied Electric Distributing Co., Pittsburgh; Curle Radio Supply, Chattanooga; East Tennessee Wholesalers, Knoxville; Kinde Distributing Co., Bay City, Mich. All except Allied Electric had been Stewart-Warner distributors, whose franchises Hoffman assumed when Stewart-Warner left TV-radio business in U.S. Dec. 30, 1954 (Vol. 10:52) . . . Admiral establishes factory branch at 5000 Baum Ave., Pittsburgh, replacing Keps Electric Co. . . CBS-Columbia establishes factory branch at 2201 Glenwood Ave., Philadelphia (Lester E. Steinman, mgr.), replacing Judson C. Burns, now out of TV-radio business . . . Specialties Distributing Co., Detroit (Leonard F. Turnbull, pres.) relinquishes DuMont franchise . . . Dahl-Conger Inc., Denver (Capehart-Farnsworth) names John Conger pres., replacing Lou Dahl, now with Larson Distributing Co., Denver (Crosley-Bendix); Dahl has sold interest in old firm . . . Maryland Wholesalers Inc., Baltimore (Admiral) names Wm. Oppenheim gen. mgr. . . Lynn Stewart Co., Chicago (Emerson) appoints Reuben R. Schoenberg exec. v.p., Eugene Abrams sales mgr. . . Cannon Distributing Co., Charlotte (Capehart-Farnsworth) appoints Lawrence L. Miller gen. mgr. . . George Spencer Inc., Minneapolis (Admiral) appoints Ray L. Deetz adv. & sales promotion mgr. . . Stuart F. Louchheim Co., Philadelphia (Zenith) promotes Herb Lieberman to adv. & sales promotion mgr. . . Macy's, N. Y., promotes Gerald Levy to TV-radio mgr., succeeding Herbert I. Wexler, now TV-radio merchandise administrator . . . Olympic of Connecticut moves to 210 Forbes Ave., New Haven.

DuMont's "Signature" series of 21-in. custom-cabinet consoles, to be marketed exclusively in N.Y.-N.J. area (Vol. 10:52), comprises: Metropole, cherry & cordovan mahogany \$500, amber mahogany \$525, blonde \$550, ebony \$575; Christina, cherry mahogany \$575, amber mahogany & blonde \$600, ebony \$625; Antoinette, glazed fruitwood \$650, antique white \$675; Normandie, glazed fruitwood \$1400, antique white \$1500.

IT&T's Capehart-Farnsworth Co., TV-radio manufacturing & distributing subsidiary, will be expanded, definitely will not be sold, said IT&T pres. Maj. Gen. Wm. H. Harrison at distributor meeting in N. Y., Jan. 21. Rumors that it was going out of TV-radio fields arose when IT&T recently sold subsidiary Coolerator Corp.

Philco creates factory service subsidiary, Philco Service Corp., for Chicago only, in setup similar to RCA's national organization. Philco spokesman said that new subsidiary was set up to meet special situation in Chicago, and that national service organization is not contemplated.

RCA Victor Ltd., Montreal, is now having first washing machine made to its specifications and for its brand name by Easy Washing Machine Co. Ltd.—leading to renewed speculation that parent U.S. company, which now markets Estate ranges, may soon enter that field, too.

Philco to sponsor *Phonorama Time*, disc jockey show with Johnny Desmond as m.c., on 565 Mutual radio stations starting Feb. 19, Sat. 11:30-11:55 p.m. in Eastern, Mountain & Pacific time zones, 10:30-10:55 p.m. in central zone.

Sparton introduced 7 new models at showing in New York's Copley Plaza Hotel, sets ranging from 21-in. mahogany table model at \$170 to 21-in. blonde "low-boy" combination at \$310.

Miami Beach's swank Bal Harbor Hotel, where many TV-radio executives stay, has installed 17-in. Admiral table receivers in each of its 147 rooms.

Zenith Radio shifts TV-radio receiver advertising from Young & Rubicam to Chicago office of BBDO.

Electronics Reports: Printed circuits, which make possible big savings in direct production labor, may be responsible for an even bigger economy in "indirect savings." So said engineering mgr. M. R. Johnson of GE light military electronic equipment dept. in paper delivered Jan. 20 at RETMA printed circuit symposium in Philadelphia. Drawing on his plant's experience in turning out thousands of printed wiring boards for airborne radar, he cited one case in which use of printed circuitry not only lowered manufacturing cost of end product, but cut drafting man-hours by one-third. In another equipment, use of a printed wiring design cut the number of drawings needed from 55 to 22, saving of almost 60%. Square footage of drawings was cut almost 50%, and the new design required but one special part compared with 9 for conventional wired chassis.

"There is less emphasis and need for detail draftsmen in printing wired designs," Johnson stated, "but there is a greater demand for individuals who can translate vividly and rapidly a schematic or elementary diagram into a circuit." He said standardization of components for printed wiring boards is "possibly the greatest single challenge to management of our electronics industry today."

* * * *

"South's first major TV-radio components plant" is being constructed by General Instrument Corp. at Statesboro, Ga. The \$1,500,000 facility, with 106,000-sq. ft. of floor space, is due for completion around June 1—6th GI plant. It will employ 400-500 within a year, with an eventual goal of about 1000. GI chairman Abraham Blumenkrantz called the new facility part of company's "expansion and dispersion for the future," pointing out that it is equally adaptable to military or civilian production. Plant's design and 33 acres of ground will permit its expansion without loss of production.

Sylvania establishes new electronic systems div. at Buffalo, its 9th operating division, with Henry Lehne, ex-director of Sylvania electronic defense lab, as gen. mgr. New division's present operations are concerned primarily with development and production of electronic systems and equipment for military, but will expand into commercial and industrial fields.

Aircraft Radio Corp., Boonton, N. J. (W. F. Cassidy Jr., pres.) this week acquired Orion Industries Inc., Richmond, Va., paying 10,000 shares of its common stock plus about \$83,000 cash. Orion makes aircraft course directors and related instruments.

Dr. Vincent Salmon, manager of Stanford Research Institute's sonic section, appointed editor of *Journal of the Audio Engineering Society*, succeeding Lewis S. Goodfriend, now editor of *Noise Control*, published by Acoustical Society of America.

New IT&T patent licensing agreement with RCA, effective for 5 years from Jan. 1 and covering IT&T's U. S. patents for commercial radio apparatus and tubes, was announced Jan. 19 by IT&T pres. Gen. Wm. H. Harrison.

Capt. W. H. Beltz, who before World War II headed RCA engineering products on west coast, has returned to duty as director of Naval Research Lab, Washington, after 4 months on sick list.

Vidaire Electronics Mfg. Corp., Lynbrook, N. Y. (TV accessories) reports that pres. George Miller has purchased all outstanding shares and that Joseph DeRosa is no longer with the company.

Douglas C. Lynch, exec. v.p., elected pres. of Brush Electronics, as W. Russell Burwell, vice chairman of parent Clevite Corp., devotes fulltime to that position.

Servomechanisms Inc. leasing 48,000-sq. ft. building at Los Angeles International Airport for \$500,000, replacing 5 smaller structures at El Segundo, Cal.

Financial & Trade Notes: If you want handy statistical references to just about every important TV-electronics manufacturer in the business, we commend the listings headed "Financial Data on Major TV-Electronics Manufacturers" published in our next semi-annual *TV Factbook No. 20*, due off the presses in a few days (432 pp., \$4). It details capitalization, debt, shares issued of 62 different companies, indicates whether and where they are listed for trading, tabulates sales, pre-tax earnings, net per share, dividends, total assets, price ranges for years 1950 through 1953, separately, and for first 3 quarters 1954. This department is compiled and edited for us by Edgar N. Greenebaum Jr., Chicago financial consultant in electronics.

* * * *

Aerovox Corp. has advised stockholders that it will pay no cash dividends for 2 years until Nov. 1 under plan approved by Prudential Life Insurance Co., which will waive loan repayments during that period. Program, pres. W. Myron Owen stated, is calculated to add in excess of \$1,500,000 of working capital, and directors have decided to pay a stock dividend, based on 1955 earning performance, toward end of this year. Company recently acquired Henry L. Crowley Co., W. Orange, N. J., maker of powdered iron cores, microwave components & ceramic-permanent magnet bodies, in exchange for 130,000 shares of common stock; included in acquisition were Crowley's current net assets of \$418,000 plus plant & equipment appraised in excess of \$2,000,000. Aerovox engineers have been perfecting a new revolutionary type of continuous duty A.C. electrolytic capacitor for power factor correction, Mr. Owen stated, and this could add \$10,000,000 to \$15,000,000 of annual sales volume.

Magnavox borrowed \$3,000,000 this week from New England Mutual Life Insurance Co. and Massachusetts Mutual Life Insurance Co. While company is well able to finance current volume of business, said pres. Frank Freimann, 12-year loan is intended to provide for expanding TV, radio & phonograph business. Govt. contracts, he reported, currently aggregate \$25,000,000 backlog, financed by a \$12,000,000 V-loan credit, of which \$6,500,000 is now being used. Only equity capital consists of about 759,000 shares of common stock, small issue of preferred having been retired last year. Jan. 21 *Wall Street Journal* states small stock dividend, perhaps 5%, may be authorized by Magnavox before end of current fiscal year, June 30—this in addition to continuation of \$1.50 dividend rate; firm paid 10% stock dividend in 1949 and 20% in 1946 & 1947. Last fiscal year's total sales were \$62,974,430 (Vol. 10:40); this year's may be somewhat lower but earnings are expected to be higher than the \$2.77 a share of fiscal 1954.

LaPointe Electronics Inc. sales were \$1,982,094 in fiscal year ended Oct. 31, reports pres. J. H. Stillbach, compared with \$3,719,688 for preceding year. Loss from operations were \$23,770 vs. loss of \$489,762 preceding year.

John Slezak, who resigned last week as Undersecretary of the Army to return to presidency of Turner Brass Works, Sycamore, Ill., and his other business interests, including directorship of Illinois Bell Telephone Co., has been elected a director of Hazeltine Corp., which recently elected former Wisconsin Gov. Philip F. LaFollette as pres.

Simon H. Rifkind, onetime Federal judge, now partner in Paul, Weiss, Rifkind, Wharton & Garrison, nominated to board of directors of Emerson Radio, which holds annual meeting in New York's Waldorf-Astoria, Feb. 2. He would succeed the late Richard C. Hunt.

Arthur Godfrey and 2 Cincinnati industrialists, Walter E. Schott & Harrison O. Ash, have purchased the Kenilworth Hotel, Miami Beach, which will continue to be operated under lease by Kirkeby Hotels Inc.

COURT ACTIONS are becoming more and more frequent as defeated applicants for TV facilities refuse to let FCC decisions go unchallenged. Latest are those filed in U. S. Court of Appeals for District of Columbia this week by *St. Petersburg Times'* WTSP (Nelson Poynter) contesting Ch. 8 grant to *Tampa Tribune's* WFLA-TV, due on air next week; and by Louis H. Peterson's radio WSSV, Petersburg, Va., fighting Ch. 8 grant to Tom Tinsley's WLEE, Richmond.

Shift of lawyers at FCC will undoubtedly follow increase in court appeals—more going to office of gen. counsel Warren Baker, just as personnel was shifted from applications processing to hearing div. as applications traveled through FCC.

Also increasing is incidence of uhf stations seeking lower channels. Two more were filed this week: WJMR-TV, New Orleans (Ch. 61), asking move to Ch. 20 and stating that GE stands ready to ship it 1-megawatt transmitter, while CP-holder WBID-TV, Detroit (Ch. 62), which also plans 1-megawatt operation, asked for move to Ch. 50.

Another kind of shift was turned down by Commission when it denied request of KGTW, Des Moines (Ch. 17), that it be permitted to operate on educational Ch. 11 until an educational station began on the channel, as yet unasked for. Request of WKST-TV, Newcastle, Pa. (Ch. 45), to move to Youngstown was opposed by WFMJ-TV, Youngstown (Ch. 21), which asserted third station in town would dilute revenues and harm all TV service there.

Crackdown on TV-radio "pitchmen," who are sometimes accused of cloaking misrepresentations in their fast-talking spiels on behalf of advertisers, was started in N. Y. area Jan. 21 with "invitations" to all networks and to 7 TV & 16 radio stations to send representatives to Kings County (Brooklyn) Federal Court Jan. 24, when Judge Samuel Leibowitz charges a special rackets grand jury which will investigate charges of fraudulent TV-radio advertising. The judge said he wanted to charge the jury "in the presence of these people who make it possible to advertise such bargains." The "invitations" are not summonses and involve no penalty if ignored. Grand jury will receive evidence obtained in 8-month probe by Brooklyn District Attorney Edward S. Silver, who said housewives have been "suckered" out of millions of dollars in high-pressure sales of sewing machines, upholstery services, storm windows, vacuum cleaners, deep freezers, food plans. During his investigation, teams of policemen & police-women posed as married couples and concealed tape recorders in their homes when salesmen of such advertisers called in person. The recorded conversations, he said, showed salesmen evaded promises of "bargains" advertised on TV-radio and tried to sell more expensive merchandise.

Edward Lamb attorneys withdrew motion to call off hearing and render decision immediately (Vol. 11:2) this week, in latest of series of legal maneuvers between counsel for Lamb and for FCC's Broadcast Bureau. In effect, here's what happened: Last week Broadcast Bureau said Lamb dismissal motion was premature because Broadcast Bureau hadn't completed presenting its evidence (Vol. 11:3). This week, Lamb counsel withdrew its motion, will now seek to have Broadcast Bureau complete its evidence before Lamb's side takes over for cross-examination. Presumably, Lamb counsel intends to re-file dismissal motion as soon as Broadcast Bureau finishes presenting its direct case. Oral argument on subject is scheduled Jan. 26 before examiner Herbert Sharfman. Hearing is due to resume Feb. 9.

CBS-TV joined Television Bureau of Advertising (TvB) this week—first network to sign up with fledgling promotion organization. NBC-TV is expected to join soon.

President Eisenhower's televised press conference (see p. 1) gave further impetus to demands that House Speaker Rayburn (D-Tex.) change his adamant stand against televising House committee meetings. Questioned by reporters following the Eisenhower press conference, Rayburn reiterated his opposition to TV or film cameras in hearing rooms. Praising President's use of TV at press conference, Rep. Meader (R-Mich.) Jan. 20 addressed House on behalf of his H. Res. 99 which would authorize each House committee to control use of TV or radio at its own hearings, as is the practice in the Senate. Meanwhile, Oregon joined the list of states recognizing TV-radio as legitimate forms of journalism entitled to treatment equal to that accorded press. State's House & Senate passed new rules setting up broadcast facilities and press rooms, permitting use of TV & radio in certain proceedings. Legislature's opening ceremonies were filmed by KOIN-TV, Portland, then shown on TV for first time.

Cancellation of sale of radio KQV, Pittsburgh, currently in 5-way hearing for Pittsburgh's Ch. 4, to Tele-Trip Policy Co. for \$750,000 (Vol. 10:44) was disclosed this week, following disagreement over retention of some KQV staff members. KQV is owned by Earl Reed & Irwin Wolf, who bought back 45% interest from CBS for \$236,250 in Oct. when latter disposed of station to meet FCC's multiple ownership rule. KQV's CBS affiliation, however, has been extended to June 15, 1957. Tele-Trip, an aviation insurance company headed by John M. Shaheen, owns radios WTAC, Flint & KPOA, Honolulu.

Another satellite application—2nd for Walla Walla, Wash.—was filed this week by KIMA-TV, Yakima (Ch. 29), which also operates satellite KEPR-TV, Pasco, Wash. (Ch. 19). This week's application is for 3.04-kw repeater on Ch. 8. Last week's Walla Walla application, for Ch. 5, was filed by Spokane's KHQ-TV (Vol. 11:3). [For further details about applications, see *TV Addenda 20-B* herewith; complete listings of all grants, new stations, applications, etc., will be found in *TV Factbook No. 20*, due off presses soon.]

KLFY-TV, Lafayette, La. (Ch. 10) this week got FCC permission to buy out share-time CP-holder KVOL-TV for \$45,000 out-of-pocket expenses incurred by grantee *Lafayette Advertiser* and KVOL gen. mgr. George H. Thomas (Vol. 10:49). Presumably, KLFY-TV owners—headed by Paul & Thomas DeClouet—now will begin construction.

New KDKA-TV call letters for Westinghouse's Pittsburgh station, recently bought from DuMont (Vol. 11:2), will be used for first time Jan. 31. Change from WDTV will be announced with appropriate fanfare.

1955 AM-FM Station Directory

All subscribers to the full TV-AM-FM services of *Television Digest* in the next few days will receive copies of our *1955 AM-FM Station Directory*, revised to Jan. 1, loose-leaf, printed on single sheets so that changes and corrections may be added on opposite blank pages as they're reported in our weekly AM-FM Addenda. New directory lists not only all North American AM-FM stations by states and cities (with company names, addresses, frequencies, powers, FM antenna heights, network affiliations) but also includes lists of AM & FM stations by frequencies, AM & FM applications by states & frequencies pending as of Jan. 1, AM & FM stations alphabetically by call letters. It's only handy volume of its kind, and carries no advertising. Extra copies cost \$7.50 each.

JAN 31 1955

SUMMARY-INDEX OF THE WEEK'S NEWS—January 29, 1955

20th EDITION OF TV FACTBOOK on way to subscribers, along with 1955 TV map of U. S. & Canada, new list of stations equipped for colorcasting (p. 1).

NO DANGER OF MILITARY INROADS on TV channels, say top govt. authorities, including Harold M. Botkin, ODM, and Adm. Ammon, naval communications chief (p. 2).

TAMPA TRIBUNE'S WFLA-TV (Ch. 8) begins operating, first vhf in area; 427 stations now on air, 7 more starters due during Feb. (p. 3).

BITNER FIRM BUYS MINNEAPOLIS-ST. PAUL time-sharing stations, paying \$1,900,000 for WTCN-TV & WTCN, \$1,235,000 for WMIN-TV (p. 3).

ALLOCATIONS ACTIONS large part of FCC agenda; Beaumont & Tampa CPs reaffirmed; Court acts in Portland, Providence, Albany & Sacramento cases (p. 5).

SEN. MAGNUSON TO GIVE VIEWS on TV-radio problems and further investigations; hearings on McConnaughey before Feb. 21 unlikely (p. 5).

CONSUMER INVESTMENT OF \$13.5 BILLION for receivers in TV's 9 commercial years of 1946-54; Jan. sales continued strong pace (p. 9).

SETS-IN-USE CENSUS PROMISED by NARTB by next fall, board approving plan; Florida code meeting seeks improved liaison with film producers (p. 6).

ANOTHER MILLION-WATT UHF station on air with reports of better local pictures, null fill-in, distant coverage; Hawaii satellites plan April start (p. 8).

ONE-YEAR PICTURE TUBE WARRANTIES once again become standard in industry, as RCA, GE, DuMont,ylvania return to plan this week (p. 11).

CBS TO SPLIT STOCK 3 FOR 1, reports record 1954 earnings of \$4.85 per share; stock more than doubled in last year, growth since 1950 traced (p. 12).

ADMIRAL SIGNS WITH RCA, plans to make & lease automation equipment; RCA denied change of venue in Dept. of Justice anti-trust case (p. 12).

ALMANAC OF THE INDUSTRY—20th EDITION: To our full-service subscribers, we send our Television Factbook No. 20 this week -- latest of the semi-annual reference volumes which we were the first to publish and which are often called "the bible of the industry." It's 432-pp., as contrasted with the preceding edition's 404-pp. and with the original 4-p. Directory which we published in 1947.

New 1955 TV wall map, 43x29-in. and in color, goes with each Factbook. It shows all TV cities as well as all existing and projected AT&T and private network interconnections, all cities peculiar to the TV allocation plan, all other cities of more than 10,000 population. Printed thereon is a handy log of stations & channels.

More than 75 reference departments are brought up to date in the Factbook. These are newly added features: stations equipped to telecast color, Armed Forces TV stations in U.S. and abroad, British set & tube manufacturers, bibliography. Among the major features: Directories of U.S. & Canadian stations & networks, with rates, personnel, facilities; lists of all new-station construction permits outstanding and applications pending; channel allocation tables; TV & radio income by years; top advertisers & agencies; educational, newspaper, theatrical, multiple ownership of stations; sales and transfers of stations, 1946-55.

Financial tables covering 62 major electronics manufacturers, along with up-to-date directories of TV set, tube and station equipment manufacturers and complete list of community antenna systems are carried. Trade directories cover FCC, engineers and attorneys, research services, labor unions, trade associations, etc.

One copy of the TV Factbook and one map go to all full-service subscribers; extra Factbooks cost \$4, extra maps \$1. Note: Published last week also was our 1955 AM-FM Directory logging all U.S. radio stations & applications, plus all Canadian, Mexican, Cuban and other American stations -- by states and cities and separately by frequencies. Loose-leaf, punched for binding, it costs \$7.50 per copy.

NO DANGER OF MILITARY INROADS ON TV CHANNELS: "Such reports are wholly without foundation. I would hate to see the TV industry get upset by any such talk, because, as everyone knows, it has had enough problems with allocations."

That's reaction of Harold M. Botkin, asst. director for telecommunications, Office of Defense Mobilization, to published reports that stations operating on TV Channels 2 to 6 may be in danger of eviction due to military demands. The stories in question indicated that the Navy is demanding spectrum covering Ch. 2-6, plus FM frequencies, for communications between widely dispersed ships.

Rear Admiral W.B. Ammon, director of naval communications, had this comment: "The report is totally without basis. I have no knowledge of any such request for frequencies on the part of the Navy."

The two responses are typical of those we obtained at all responsible levels of Govt. when, at the urging of some disturbed telecasters, we undertook to check the basis for the implications that Ch. 2-6 are in jeopardy. IRAC members (that's the Interdepartmental Radio Advisory Committee) denied it as well as ODM, FCC and other military authorities. Their denials were just as unequivocal.

An ex-AT&T executive, Mr. Botkin is the one govt. official in a key position to know, for he sits in the strategic post once occupied by Haraden Pratt and by the broadcasting industry's own William A. Porter. His purview embraces the whole gamut of govt. communications, military as well as civilian. William Plummer, chairman of IRAC, reports to him; he in turn reports to ODM director Arthur Flemming, who is responsible directly to the President. Said Mr. Botkin:

"I've been over the matter pretty carefully, and I know of no work whatsoever going on which would take frequencies from television." Asked if any such efforts could be going on in the military departments without coming to his attention, he stated: "If there is, the Govt. should be looking for a successor to me."

"There has always been a problem of increasing demands for spectrum space, inside and outside the Govt.," Mr. Botkin said, "but the situation today is no different from 6 months ago, a year ago, 2 years ago or 4 years ago."

All FCC commissioners confess they're baffled by the reports. Both Comr. Webster, who sits in on inter-govt. consultations, and his alternate Comr. Lee, say they know of no Navy move to take over TV channels.

During time of war, the President has authority to commandeer any part of the radio spectrum he deems necessary for defense. But that has always been the case -- and all broadcasters know it. However, all responsible govt. officials maintain that no peremptory usurpation of Ch. 2-6 is in prospect. Admiral Ammon puts it this way: "Such action isn't accomplished in any arbitrary manner. You'll recall that there was a Board of War Communications in World War II to see to that."

Engineering authorities agree that the 50-100mc range could be useful for intership communications over long distances, but they argue that even if such use is eventually proved to be essential the frequencies can be shared without problems.

* * * *

Constant crowding of spectrum is what prompts frequent speculation that various services may be shifted around. Recently, FCC Comrs. Bartley & Lee dissented from a proposal which would split 25-50mc and 152-162mc into narrower bands for mobile services to accommodate more users. Their reasoning was that proposal would be a mere palliative; that better allocations can and should be made; that closer look into govt. use of radio may well find that military is squatting on frequencies which could be used by commercial services -- notably vhf TV. Last year, Bartley argued before Potter Committee that Congress should sponsor study of whole spectrum.

Both Bartley and Lee say they know of no move on part of military to take vhf away from TV. Their argument is that they don't know what use military does make of its allocations and that such allocations should be continually justified -- perhaps through system similar to broadcast renewals.

Congress has shown no outward response to this suggestion. However, Sen. Magnuson, new chairman of Commerce Committee, does have strong feelings about conserva-

tion of natural resources -- and he does have a spectrum study in the "think" stage.

Magnuson likens radio situation to that of Columbia River, bordering his state of Washington. It has been studied by govt. engineers for some 30 years, and they have come up with comprehensive plan promising to use it efficiently. Luckily, he says, no "little beaver dams" have been constructed on the river through the years; therefore, long-range plans can be made without hindrance.

Magnuson concedes that radio does have such "beaver dams" and that they may deter any substantial re-allocation. He gives as example 72-76mc band between TV channels 4 & 5; it's too narrow to form a TV channel but too hemmed in by TV to be widely used for the services to which it's assigned -- police, industrial, etc.

Question of spectrum utilization embraces much more than TV -- though any Congressional study would undoubtedly play up TV for its "sex appeal," as one official puts it, and because of uhf stations' difficulties. If Magnuson committee goes into matter, it will be as an extension or modification of current network study. NARTB board got excited enough about encroachment "threats" this week to direct pres. Harold Fellows to get the facts and, if necessary, take preventive action.

TAMPA BAY AREA'S FIRST VHF ON THE AIR: Tampa Tribune's WFLA-TV (Ch. 8) began test operations Jan. 26 preliminary to mid-Feb. debut as an NBC basic. It's the first vhf operation in Tampa-St. Petersburg area, which has been served since May 1953 only by City of St. Petersburg's uhf WSUN-TV (Ch. 38).

Ownership interlocks with Richmond Times-Dispatch and News-Leader, whose WRNL is also a TV applicant. WFLA-TV pres. is John C. Council, publisher of Tampa Tribune and George W. Harvey is gen. mgr. Other station executives are Wm. B. Faber, ex-Headley-Reed, sales mgr.; Paul M. Jones, program mgr.; Paul P. Bergquist, production mgr.; Joe H. Mitchell, chief engineer. RCA 50-kw transmitter and 12-section antenna on 1054-ft. Ideco tower put out 316-kw ERP. Base rate is \$400. Rep is Blair.

That makes 6 starters in Jan., total of 427 now on air, 118 of them uhf. Next starters are expected to be KRCG, Jefferson City, Mo. (Ch. 13) and WTVY, Dothan, Ala. (Ch. 9). These also are scheduled for Feb. debuts: KLOR, Portland, Ore. (Ch. 12); KBET-TV, Sacramento, Cal. (Ch. 10); WDXI-TV, Jackson, Tenn. (Ch. 7); KFIF (Ch. 2) & KTVF (Ch. 11), Fairbanks, Alaska. Also on Feb. calendar, though uncertain, are educationals WTLC, Champaign-Urbana, Ill. (Ch. 12) and WEDB, Birmingham, Ala. (Ch. 10).

BITNERS BUY TWIN CITIES TIME-SHARERS: Two more time-sharing stations are being sold and merged -- the Ch. 11 WTCN-TV, Minneapolis & WMIN-TV, St. Paul -- and that will leave only one other such operation. That one is in Rochester, N.Y., where Gannett Newspapers' WHEC-TV and the Ervin Lyke group's WVEC-TV continue to share Ch. 10, as they have since joint debut in Oct. 1953. Two other time-sharers on a single transmitter -- Ch. 8 KSBW-TV, Salinas, Cal. & KMBY-TV, Monterey -- are also being merged, former's purchase of latter awaiting soon-expected FCC approval (Vol. 10:45).

The new Harry M. Bitner firm, Consolidated Television & Radio Broadcasters Inc., part of whose stock was recently offered publicly (Vol. 10:48), is purchaser of the Twin Cities outlets in deal closed this week and arranged by Philip L. Kelser Assoc., N.Y. Total price is \$3,135,000 after finder's fees -- \$1,900,000 being paid for WTCN-TV and WTCN (5-kw day, 1-kw night, 1280 kc, ABC) and \$1,235,000 for WMIN-TV alone. Studios of WTCN-TV will be used, with joint transmitter on Foshay Tower.

Radio WMIN (250-w, 1400 kc) was also recently sold by the N.L. Bentson group to Wm. F. Johns family for \$75,000. Control of WTCN-TV & WTCN is owned by Minneapolis industrialist and onetime Ambassador to Cuba & Australia, Robert Butler. Personnel under new ownership awaits FCC approval of transfer. ABC network is retained.

Harry M. Bitner Sr., onetime publisher of Hearst's Pittsburgh Sun-Telegraph, founded WFBM-TV, Indianapolis (Ch. 6) in 1949. He and son Harry M. Jr. purchased WOOD-TV, Grand Rapids (Ch. 8) for \$1,382,000 in 1951, were unsuccessful applicants last year for Ch. 12 in Flint, Mich. Company is now headed by young Bitner, also owns radio stations in those 3 cities and an AM in Evansville, Ind. Operations have been consistently profitable, according to financial data in the stock prospectus (Vol. 10:48) -- revenues being \$5,124,186 and profit \$962,589 in 9 months ended Aug. 30, 1954. For fiscal year ended Nov. 30, 1953, revenue was \$6,480,208, net \$824,253.

Personal Notes: James C. Shelby, ex-director of TV-radio, McCann-Erickson, Chicago, now v.p. & TV director, MacFarland, Aveyard & Co., Chicago . . . Herminio Traviesas, TV-radio account executive on American Tobacco Co. account, promoted to BBDO v.p. . . . Gayle V. Grubb, ex-gen. mgr. of WJBK-TV & WJBK, Detroit, has opened San Francisco national sales office at 111 Sutter St. for Storer Broadcasting Co., serving all Storer stations as west coast sales v.p. in collaboration with regular reps . . . John V. Poor, Mutual v.p. & gen. counsel, now exec. v.p. of network; Herbert Rice, program v.p., joins General Tele-radio in program capacity, and B. J. Hauser, v.p. in charge of cooperative programming, becomes network programs v.p. . . . Raymond E. Nelson, ex-NBC & MBS, recently head of own Keystone Adv., N. Y., named director of national spot sales, Television Bureau of Advertising (TvB) . . . Harry E. Travis promoted to gen. mgr. of WNEM-TV, Bay City, Mich., succeeding John H. Bone, resigned . . . Stanley Wilson, ex-v.p. & gen. mgr. of KFDD-TV & KFDD, Amarillo, named asst. gen. mgr., Texas State Network . . . Wm. Balaban, asst. program mgr. of WABC-TV, N. Y., named mgr. of ABC-TV's new closed-circuit dept., reporting to program director Robert Lewine . . . Leon Levine named TV-radio director of Columbia University . . . John M. Borghese named director of TV-radio div., Magna Theatre Corp. . . . Jack O'Mara, promotion & merchandising mgr. of KTTV, elected to board of directors of Electric League of Los Angeles to represent all telecasters . . . Howard Wormser, ex-KTLA, Los Angeles, appointed MCA-TV director of public relations, N. Y. . . . Stephen Strassberg named publicity mgr., Miss Harriet Feinberg adv. & promotion director, WABC-TV & WABC, N. Y. . . . Dale Morgan promoted to program mgr. & film buyer, KFEL-TV, Denver, succeeding Duncan Ross, who joins sales staff . . . Norman Blackburn quits as exec. director, Screen Gems, to devote fulltime to new TV series; Selmer Chalif, from N. Y. office, transfers to Hollywood to replace him . . . George B. Smith, ex-KEDD, Wichita, named chief engineer of WNDU-TV, Notre Dame-South Bend (Ch. 46), which hasn't set on-air target yet . . . I. E. (Chick) Showerman, who resigned as mgr. of NBC central div. in 1951 to enter national spot sales & film fields, named mgr. of WISN, Milwaukee, succeeding Harry D. Peck, resigned; Hearst Radio, owner of WISN, recently made deal to buy new Ch. 12) WTVW, Milwaukee (see adjoining column).

Milwaukee's CBS-owned uhf WXIX (Ch. 19), when it starts network programs Feb. 20, effective date also of change in call letters from WOKY-TV, will have the following key personnel, according to new gen. mgr. Edmund C. Bunker, ex-KNXT, Hollywood: Leon Drew, ex-KNXT, program director; Theodore F. Shaker, ex-CBS-TV Spot Sales, N. Y., gen. sales mgr.; John Lathrop Viemeister, ex-CBS-TV, N. Y., business mgr.; Arthur F. Schoenfuss, ex-CBS-TV, N. Y., director of operations; By Colvig, ex-KNXT, promotion-publicity director. Offices and studios are at 5445 No. 27th St., transmitter atop Schroeder Hotel.

Station Representatives Assn. pres. Adam J. Young Jr. names these 1955 committee chairmen: Ward Dorrell, research; Robert Eastman, station rates; Arthur McCoy, radio sales; Jack Brooke, TV sales; George Brett, trade practices; John P. Blair, nominating; Joseph J. Weed, dues; Robt. Mceker, development of station representation.

Myron L. Broun, TV director, Sterling Adv., leaves for England Feb. 6 to take similar post with Colman, Prentis & Varley Ltd., London.

Norman L. Sper, 59, the football forecaster whose sports films have been syndicated to TV, died Jan. 22 in Hollywood.

Lou Poller's uhf WCAN-TV, Milwaukee (Ch. 25), whose physical facilities he sold to CBS for \$650,000 while retaining the channel and call letters for independent operation (Vol. 11:3), earned a net profit of \$174,047 in the 10 months from Jan. 1 to Oct. 31, 1954. Radio WCAN during same period lost \$20,152. This was disclosed as transfer papers were filed this week with FCC for sale of radio WCAN (5-kw, 1250-ke) to the owners of radio WEMP for \$250,000. WEMP proposes to take over the WCAN wavelength & power in lieu of its 250 watts on 1340 kc, retaining WEMP call; application to buy current WEMP facilities for \$200,000 also was filed this week by Foster & Assoc. Inc., owned by Gordon McLendon family, James Foster & Bill Weaver, latter to be mgr. Poller-controlled Midwest Broadcasting Co. is shown to have total assets of \$984,676, long-term liabilities (notes, etc.) of \$697,880, current liabilities \$163,451. CBS acquired the WCAN-TV studios, etc. when it purchased WOKY-TV, Milwaukee (Ch. 19) for \$335,000 (Vol. 10:43), turning over the WOKY-TV studios to Poller. CBS has received FCC approval to take over WOKY-TV, call letters of which will be changed to WXIX.

Hearst Radio's purchase of WTVW, Milwaukee (Ch. 12) for \$2,000,000 (Vol. 11:2) is being protested by one of the stockholders in selling company, theatreman L. F. Gran, whose counsel Marcus Cohn advised FCC Jan. 27 that Gran Enterprises Co. is preparing an application for CP to operate on Ch. 12 in Milwaukee, also will file petition asking that CP assignment to Hearst be designated for hearing. Mr. Gran's equity in sale deal is 11.64%, and his counsel states that he not only objected to sale at board meeting of last Jan. 7 but offered to purchase the station "on terms and conditions comparable to those of the Hearst Corp." He resigned from board Jan. 26. Around \$900,000 cash would be paid by Hearst, remainder being assumption of liabilities and obligations. Station is ABC primary, is operating from interim 300-ft. tower, holds CP for 316-kw and plans 1105-ft. tower.

Honolulu's KONA (Ch. 11), in filing with FCC this week for switch to Ch. 2, disclosed that its operating losses since new owners acquired it in June 1953 have approximated \$177,107 but that income revenue has increased monthly and losses decreased until net profit ran \$3100 in Oct., \$3700 in Nov., \$8000 in Dec. Projection of 1955 net profit before taxes is \$125,000. Profit-&-loss statement for Jan. through Nov. 30, 1954 shows \$406,122 revenues (about \$238,000 local, \$32,000 network, remainder spot) and \$436,143 expenses (\$378,000 operating, \$58,000 depreciation) for net loss of \$73,818. During Nov., total revenue was \$42,799, total expenses \$39,070, net profit \$3728. Station, which started Dec. 15, 1952 and is NBC affiliated, was practically bankrupt when purchased in 1953 from Herbert Richards' founding group by *Honolulu Advertiser* (KGU), 50%, and J. Elroy McCaw & John D. Keating, 50% (Vol. 9:26).

CBS pres. Frank Stanton gets full words-&-photo treatment in Jan. *Architectural Forum Magazine*, which devotes 6 pages to his and other CBS executive offices. Elsewhere in magazine, he's cited as one of 3 who planned unusual design of Center for Advanced Study in the Behavioral Sciences, of which he is chairman, located near Stanford U, Palo Alto, Cal.

Ex-Gov. Howard Pyle, of Arizona, who used to be a radio executive himself (KTAR, Phoenix), appointed White House administrative asst., \$15,000 post, serving with Bryce Harlow as presidential liaison with the Federal departments & agencies.

Paul Sanche, NBC correspondent captured by Costa Rican rebel forces at outbreak of war, was released unharmed Jan. 19 after captors took his camera, notes & personal possessions.

ALLOCATIONS matters, piled up during Christmas holidays, constituted bulk of FCC actions this week—though several important actions affecting CPs were made. The grants for KFDM-TV, Beaumont (Ch. 6) and WTVT, Tampa (Ch. 13), “stayed” by FCC pending oral argument (Vol. 10:49), were given final go-ahead to complete construction, though not without dissents. In addition, Commission granted Ch. 5 CP to WORA, Mayaguez, P. R.

In Beaumont case, Commission again rejected KRIC-Enterprise’s argument that it had better programming proposals; that it was being discriminated against because it’s a newspaper; that post-decision option of W. P. Hobby (KPRC-TV and *Houston Post*) to buy 32½% of KFDM-TV changed whole character of grantee. Comr. Hennock dissented, said FCC should weigh Hobby option.

In Tampa case, FCC reaffirmed its grant to WTVT (W. Walter Tison, et al.), concluding it was best applicant. Comrs. McConnaughey and Doerfer dissented, former issuing no statement, latter saying that he’d prefer *Tampa Times* and that record of Tison’s radio WALT shows his program promises can’t be relied upon.

On allocations front, the Commission: (1) Rejected petition of grantee KOKE, El Paso (Ch. 13) that it be shifted to educational Ch. 7, saying there’s “no basis for distinguishing between Ch. 7 and Ch. 13.” (2) Turned down petition to add Ch. 13 to Princess Anne (Norfolk), Va., filed by WTOV-TV (Ch. 27), now off air, on grounds sufficient need hasn’t been shown. (3) Rejected petition of KALE, Richland, Wash. to shift Ch. 3 from Lewiston, Ida., stating that bona fide application for the channel in Lewiston has been filed by operators of KIMA, Yakima (Ch. 29) and KEPR-TV, Pasco (Ch. 19). (4) Vacated its proposal to shift Ch. 11 & 6 between San Juan and Caguas, P. R., because Dept. of Education has found new site for San Juan that makes shift unnecessary. (5) Granted shift of Ch. 14 from Annapolis, Md. to Washington and allocated Ch. 53 to Annapolis, at request of grantee WOOK-TV, Washington (Ch. 50), on grounds there’s temporary difference in uhf channels from equipment standpoint; it turned down WOOK-TV’s petition that it be shifted automatically to Ch. 14. (6) Began rule-making shifting uhf channels so that WKNY-TV, Kingston, N. Y. (Ch. 66) can move to Ch. 21 and specify Poughkeepsie as location. In this case, FCC pro-

posed to give station “show cause” order allowing the change in channel and city.

New allocations changes requested this week were: (1) Petition by WMVT, Montpelier, Vt. (Ch. 3) to shift its channel and main studios to Burlington. (2) Petition of KONA, Honolulu (Ch. 11) to change to Ch. 2 and to get permanent authority, instead of STA, to operate at present site. (3) Petition from Suncoast Cities Bestg. Corp. to add Ch. 10 to New Port Richey, Fla., about 30 mi. north of St. Petersburg. Request conflicts with *Jacksonville Journal’s* petition to add Ch. 10 to Bunnell, Fla., near Daytona Beach. Principals of Suncoast are W. H. Holland (attorney), Ed C. Wright (real estate) and Harry R. Playford (banker), who plan to file application. Each bought 1/6 of radio WNEW, N. Y. last year (Vol. 10:16).

* * * *

Court of Appeals acted on several hard-fought cases this week. On Jan. 24, it denied motion of Columbia Empire Telecasters that KLOR, Portland, Ore. (Ch. 12) be kept from going on air pending appeal.

After hearing oral argument Jan. 27, Judges Bazelon, Bastian & Washington turned down motion for stay filed by WNET, Providence, R. I. (Ch. 16), seeking to keep WPRO-TV (Ch. 12) from starting. Court said: “While there has been an insufficient showing of injury to the public to warrant a stay, there are substantial and serious questions presented [and] the Court will entertain a motion to expedite the filing of briefs and argument herein.”

Court also denied petition of WTRI, Albany (Ch. 35) that sale of WROW-TV (Ch. 41) to Lowell Thomas group be stayed, stating: “While there are substantial and serious questions in these cases which should be promptly resolved, there is no sufficient showing that the Commission abused the authority conferred by Sec. 309(c) of the Communications Act in finding that the authorization involved is necessary to the maintenance or conduct of an existing service.”

Acting in McClatchy’s appeal in Sacramento Ch. 10 case, Court granted ANPA permission to file amicus curiae brief on question of FCC’s attitude toward newspapers.

Continuing fight against grant of WJRT, Flint (Ch. 12), WFDF and Butterfield Theatres told FCC its Broadcast Bureau acted illegally in granting WJRT more time to build recently.

SEN. MAGNUSON will outline his views on TV-radio and the future course of Senate investigation of network practices and uhf next Wed., Feb. 2, when he’s scheduled to release report by special counsel Harry Plotkin detailing staff work to date and making recommendations (Vol. 11:4). Magnuson, chairman of Senate Commerce Committee, is due to release own statement on investigation and answer questions of the press.

Sen. Bricker (R-O.), the Committee’s ex-chairman who initiated the investigation and named ex-FCC Comr. Robert F. Jones as GOP counsel, was invited by Magnuson to participate in next week’s press conference, but at week’s end his aides did not know whether he would attend. Jones is due to submit his report to Bricker Mon., Jan. 31, and Bricker’s staff said the Senator will decide at that time whether to make it public along with Magnuson’s release of Plotkin report.

Committee’s next regular meeting is scheduled Feb. 9—when it may discuss hearings on President Eisenhower’s nomination of Chairman McConnaughey to the FCC. Since Sen. Magnuson wants to give 10 days advance notice of any hearing, it’s unlikely there will be hearings before Mon., Feb. 21, at very earliest. Meanwhile, House Commerce Committee announced it will begin orientation hearings next week on the various agencies over which it has juris-

dition, but Committee staffers said appearance of FCC probably would be delayed until Senate has acted on McConnaughey.

Judiciary Committee, headed by Sen. Kilgore (D-W. Va.), who wants to investigate “monopoly in TV radio industry,” holds regular meeting Jan. 31, at which time subcommittees may be named. The Senator has announced that TV investigation would be conducted by monopoly subcommittee—but Kilgore aides say this group’s members and chairman have not yet been determined, despite published reports to the contrary.

* * * *

Congressional staff appointments: Frank Pellegrini, specialist in admiralty law and close friend of chairman Magnuson, Feb. 1 becomes the chief counsel of Senate Interstate & Foreign Commerce Committee. Martin W. Cunningham, ex-Armed Services Technical Information Agency and CAA, named to staff of House Interstate & Foreign Commerce Committee.

Pope Pius has approved formation of new pontifical commission to study TV-radio-film problems, with Bishop Martin J. O’Connor, of Scranton, Pa., rector of the Pontifical North American College in Rome and president of old film commission, to serve for 6-year term as president of new commission.

SETS-IN-USE CENSUS under NARTB auspices, one of industry's most pressing needs, looks like it will at long last get under way this fall, it was indicated this week following pre-testing progress report submitted to NARTB's TV board meeting in Hollywood, Fla. by research mgr. Richard M. Allerton.

Board approved Allerton's report and authorized continuance of pre-testing field work being conducted for it by Alfred Politz Research Inc., N. Y. It was indicated that all pre-testing would end in June, when further report will be made to board, which presumably will appropriate funds for census at that time.

Meanwhile, in separate action, board authorized expenditure of \$3000 to participate in TV-radio census being planned by Advertising Research Foundation, whose most recent study of TV-radio homes as of May 1954 was released last fall (Vol. 10:39).

Board also defended recent action of NARTB pres. Harold Fellows in urging FCC to observe all rule-making procedures on subscription TV (Vol. 11:2). Zenith pres. E. F. McDonald last week charged Fellows thereby attempted to align broadcasters with theatre owners in opposition to subscription TV (Vol. 11:4).

TV board chairman Clair McCollough wrote McDonald to deny the charge, stating: "It has been the continuing policy of the association since the formative days of the organization, when you served it as president, to encourage appropriate regulatory procedure on all subjects relating to use of the broadcast spectrum when it has become clearly apparent that the public interest was involved."

Code Review Board, also meeting in Florida, approved plan to improve liaison with film producers in effort to get them to comply more closely with code. It was recommended that station operator be given the right in all contracts with film companies to alter any which in his judgment did not conform to code. Also adopted was resolution commending code chairman John E. Fetzer. It was also decided to publish a second "report to the people" this spring on activities of code board.

Mark Ethridge, v.p. of WHAS-TV & WHAS, Louisville, was named to receive NARTB's keynote award at convention in Washington week of May 22. Previous keynote awards went to NBC chairman David Sarnoff and CBS chairman William S. Paley.

Agenda for convention includes address by Ethridge May 24, luncheon address by FCC Chairman McConaughy same day, round table discussion that afternoon, to be addressed by as yet unselected govt. official. TV Day is May 26, with sessions on employer-employee relations, managerial problems and Television Bureau of Advertising objectives. Annual banquet will be held that evening. Radio Day is May 25.

Board also authorized appointment of a special committee to establish a system of 8 regional meetings this year, instead of 17 as in past. It's estimated this action will result in savings of approximately \$12,000 in travel expenses by NARTB officials alone.

A general fund budget of \$760,000 for fiscal year beginning April 1 was voted. An additional 27 TV stations were approved for active membership, bringing total to 264 stations and 4 networks. Radio membership totals 1480 stations, 3 networks.

NARTB creates educational committee to serve as liaison with public and private educational organizations in training qualified students for employment in TV-radio and in bringing needs of industry to attention of educators. Committee members: Herbert L. Krueger, WTAG-AM, Worcester, Mass., chairman; Lee Ruwitch, WTVJ, Miami; Rex Howell, KFXJ-TV, Grand Junction, Colo. On Feb. 9-10, at NARTB's Washington headquarters, committee will meet with 3 educators whose schools offer major TV-radio facilities: Leo A. Martin, chairman of communication arts div., Boston U; Sidney Head, TV-radio dept. chairman, U of Miami; Russell Porter, TV-radio director, U of Denver. Meeting is designed to set up permanent training organization, to be known as Assn. for Professional Broadcasting Education (APBE).

Telecasting Notes: The 5000 marketing men who comprise *Tide Magazine's* "Leadership Panel" and are queried periodically on advertising trade problems give TV rather poor ranking for both public and trade relations. Best public relations they find among magazines, ranked 48%; next, newspapers, 29%; TV, 17%; radio, 14%; outdoor, 1%. Best trade relations: magazines, 70%; newspapers, 12%; TV, 8%; radio, 6%; outdoor, 2%. . . . What's wrong with TV? Each medium got a thorough raking-over, says *Tide*, but none got such sizzling epithets as TV. "The biggest complaint was with TV commercials; the Panel insisted that networks and stations should police them and weed out those which insult the intelligence or talk down to the public" . . . Also condemned were "bunching" of commercials at station breaks, crowding them into too little time. NBC's "shoving" *Voice of Firestone* out of accustomed time slot was cited as typical of a "high-handed supercilious attitude toward advertisers and agencies" . . . Bankers Life Co. ad mgr. Edwin P. Leader is quoted thus: "TV has not given visible evidence of a desire to do the self-policing job needed to overcome public resentment" . . . Old-style commercial announcers, handling multiplicity of products, may be on their way out in favor of "a new breed—most of them entertainers by profession—who have tied their commercial destinies to specific products." So says Jan. 31 *Time*, which notes that "the new look in announcers" is being supplied by such entertainers as singer Vaughn Monroe (RCA), movie actor Wm. Lundigan (Chrysler), ballet dancer Dorothy Jarnac (Stopette) and, most notably, *Toast of the Town's* Ed Sullivan (Lincoln-Mercury) who spends lots of his time with dealers and

even gives wives of big-name guests gift Lincolns . . . Are talent agencies responsible for skyrocketing TV costs? That question has been coming up with increasing frequency in last few weeks (Vol. 10:52 & 11:4). *Sponsor Magazine* seeks answer in 2-part series which began in Jan. 24 issue—worth reading . . . Movie exhibitors are taking an entirely new view of TV, principally as a result of *Disneyland*, which not only has shown old features in their entirety, but scenes and behind-the-scene shots from new ones. Far from killing Disney films at boxoffice, this has proved tremendous hypo—both to *The Living Desert* (in second runs at theatres when excerpts were shown) and *20,000 Leagues Under the Sea* (heavily promoted on TV show before and during first run) . . . Recent National Theatres survey in Kansas City and Denver during runs of *There's No Business Like Show Business* and *20,000 Leagues* produced these results: Of former picture, 61.6% of patrons said they were influenced by newspaper ads, 12.3% word-of-mouth, 11.1% TV promotion. Of latter, 38.5% credited TV for attracting them, 35.1% newspapers, 11.8% word-of-mouth . . . Survey prompted National Theatres to urge producers to utilize TV to greater degree in pre-selling movies—particularly on "programs having established high ratings." As to local TV: "It has value, but is far too costly for the result." (In other words, exhibitors want the plugs free, not paid) . . . Will MCA-TV enter feature film distribution field through deal with Republic to handle old Gene Autry and Roy Rogers films, recently made available to TV after long court battle (Vol. 10:24, 43)? Unconfirmed reports have MCA-TV paying about \$30,000 each for distribution rights to the 138 oldies.

Station Accounts: New daytime program concept—predicated almost exclusively on entertainment rather than on conventional drama, cooking or panel shows—was launched this week by WABC-TV, ABC key. New program, appropriately titled *Entertainment*, starts Feb. 28, Mon.-thru-Fri. 12:30-3 p.m. It will cost station estimated \$30,000 a week to produce, originating from Little Theatre on 44th St., which has been dark for nearly a year. Ted Oberfelder, v.p.-gen. mgr., said program will feature comedy, sketches, etc. by personalities in show business. It will be sold on partic. basis, with tentative provision for 25 one-min. partic. per day, plus station breaks & IDs. Separate production & sales staff will be set up by station, which already has signed first sponsor—one partic. daily for 52 weeks for Raleigh Cigarettes, thru Russell M. Seeds Co., Chicago . . . Bethlehem Steel, in first TV sponsorship on regular basis, buys INS sports show, *This Week in Sports*, WFIL-TV, Philadelphia; WTTG, Washington; WBAL-TV, Baltimore—thru Jones & Brakeley, N. Y. . . A&P Food Stores is sponsor on WRCA-TV of MCA-TV's syndicated *Guy Lombardo & His Royal Canadians*, starting Jan. 27, Thu. 7-7:30 p.m., thru Paris & Peart, N. Y.; it's in addition to his *Guy Lombardo Show* on WRCA-TV Fri. 7-7:30 p.m. . . . National City Bank of N. Y. apparently likes its 3-year experience in TV, signed this week to sponsor *11th Hour News* on WRCA-TV for next 3 years, Mon.-thru-Fri. 11-11:10 p.m., at reported cost of \$2,000,000 for time-&-talent, thru BBDO . . . Necchi-Elna Sewing Machine Sales Corp. spending \$4,500,000 this year for TV and other media, to back intensive selling effort, thru Grey Adv., N. Y. . . Indiana Bell Telephone Co., which last year paid \$10,000 guaranty of reduced boxoffice, this season is again sponsoring Indiana high school basketball tournament at Butler U, Indianapolis, but has cut guarantee to \$7500 . . . F. A. Gosse Co., Seattle (Red Breast Blueback salmon) to use partic. in several women's TV programs in Feb. to back heavy newspaper campaign, thru Fairfax Inc., N. Y. . . Lay's Potato Chips places TPA's *Ramar of the Jungle* in 21 Southern markets, thru Liller, Neal & Battle, Atlanta . . . Libby, McNeill & Libby (food products) and Harold F. Ritchie & Co. Ltd. (Scott's Emulsion) sign as alt. week sponsors for 52 weeks of General Teleradio's repeat-performance *Million Dollar Movie* in 17 Canadian markets, where it's retitled *Movie Nite*, thru McConnell, Eastman & Co., Toronto, and Atherton & Currier, Toronto . . . Among other advertisers currently reported using or preparing to use TV: Burnham & Morrill Co., Portland, Me. (B&M baked beans), thru BBDO, Boston; Texon Inc., South Hadley Falls, Mass. (shoe & luggage material), thru Fuller & Smith & Ross, N. Y.; Louis Sherry Inc., Long Island City, N. Y. (dietetic jelly), thru Paul Smullen Adv., N. Y.; American Home Foods Inc., subsidiary of American Home Products Corp., N. Y. (George Washington broth & seasoning), thru Charles W. Hoyt Co., N. Y.; International Molded Plastics Inc., Cleveland (Brookpark plastic dinnerware), thru Product Services Inc., N. Y.; Kordol Corp. of America, N. Y. (Kordolin arthritic & rheumatic pain reliever), direct; Excel Mineral Co., Los Angeles (Excel-Litter deodorized material for pets' beds), thru Robert B. Selby & Assoc., San Francisco; Golden Gift Inc., Deland, Fla. (orange juice), thru Harris & Whitebrook Advertects, Miami Beach; Schaper Mfg. Co., Minneapolis (plastic games), thru Mullen & Assoc., Minneapolis; Marlo Packing Corp., San Francisco (canned foods), thru Roy S. Durstine Inc., San Francisco; Dura Electric Co., Newark (Dura-Flash bulbs), thru Albright Assoc., N. Y.

NARTB has voted to appoint 9-man ad hoc committee to investigate "reasonableness and validity" of intercity common carrier tariffs filed with FCC.

Network Accounts: Whopping success of NBC-TV's partic. trinity—*Today*, *Home*, *Tonight*—is evidenced by billings of \$10,391,000 already on books for 1955—only \$3,000,000 under 1954's total of \$13,000,000. NBC now estimates 3 shows will gross combined \$17,000,000 in 1955. Of the \$10,391,000 in advance billings, \$4,786,000 is for *Home*; \$4,000,000 for *Today*; \$1,165,000 for *Tonight*. *Home* charges \$6700 per one-min. partic.; *Tonight* \$5100, *Today* from \$1900 to \$5500 . . . California Packing Co. (Del Monte canned foods) is latest sponsor on *Today*, *Home & Tonight*, buying 3 partic. a week for 26 weeks, starting in mid-Feb., thru McCann-Erickson, Los Angeles . . . Revlon (cosmetics) buys 104 partic., starting Feb. 9, on CBS-TV's *Morning Show*, Mon.-thru-Fri. 7-9 a.m., thru Wm. H. Weintraub & Co.; Kendall Co. (textiles), 12 partic. starting April 4, & Hoover Co. (vacuum cleaners), 5 partic. starting April 18, both thru Leo Burnett Co., Chicago; Mullins Mfg. Corp. (kitchen fixtures), one partic. Feb. 25, thru Brooke, Smith, French & Dorrance, Detroit . . . Bristol-Myers, currently sponsoring *Stage 7* on CBS-TV Sun. 9:30-10 p.m., is negotiating with movie producer Alfred Hitchcock for series of films in that time period, thru Doherty, Clifford, Steers & Shenfield; company may use new series to promote its new deodorant, Ban, which is expected to start national distribution about March 15—though CBS, as mysterious on subject as a Hitchcock thriller, could not confirm the plans . . . Lever Bros.' sponsorship of *Uncle Johnny Coons* on CBS-TV will be expanded to 31 stations Feb. 19, Sat. 1:30-2 p.m., thru McCann-Erickson . . . Revlon to drop *Pantomime Quiz* on ABC-TV, Sun. 9:30-10 p.m., effective March 6, asks for another time period . . . Whitehall Pharmacal Co. cancels alt. sponsorship (with Carter Products) of *Name That Tune* on CBS-TV, Thu. 10:30-11 p.m.

Rules governing announcement of mechanical video & audio recordings should be amended, NARTB told FCC this week, to limit such announcements only to such programs "in which the element of time is of special significance and presentation of which would create, either intentionally or otherwise, the impression or belief on the part of the listening or viewing audience that the event or program being broadcast is in fact occurring simultaneously with the broadcast." Such announcements are of no significance to many kinds of programs, NARTB said, stating: "Certainly, the time, energy, ingenuity, and expenditure implicit in the production of a high-quality program should not be allowed to be dissipated through the imposition of required announcements of no affirmative value." Assn. requests amendments of Sections 3.188, 3.288 & 3.653.

Army's \$1,000,000 advertising contract for fiscal year starting July 1, 1955, is now open to competitive bidding, letters of invitation to briefing at Pentagon Feb. 8 having been sent this week to the 102 agencies which have annual billings over \$5,000,000. Primarily for recruiting purposes, contract for current fiscal year is held by Dancer-Fitzgerald-Sample.

First U. S. network telecast originating in Mexico will be Feb. 6 *Colgate Comedy Hour* (NBC) pickup of jai alai championship from Tijuana, across border from San Diego. Feed will be made from Tijuana's XETV, which regularly broadcasts jai alai games.

Long standing \$12,000,000 suit against 13 major league baseball teams by now bankrupt Liberty Broadcasting (Vol. 8:8 & 11:3) was settled this week for \$200,000 upon approval of federal bankruptcy referee D. M. Oldham.

Canned soup, yes; canned laughs, no. Campbell Soup Co., sponsor of filmed *Dear Phoebe* on NBC-TV, Fri. 9:30-10 p.m., has ruled out laugh track on program pending results of current audience reaction survey.

SECOND MILLION-WATT TV station went on air early Sunday morning, Jan. 23, and at end of first week of telecasting at maximum power reported it had received reports of "good reception" as far as 100 mi. and more. ABC-affiliated WILK-TV, Wilkes-Barre (Ch. 34) was first station to use new GE 45-kw transmitter, following by less than a month the debut of RCA's 25-kw uhf transmitter, now providing full 1-megawatt power for NBC affiliate WBRE-TV on Ch. 28 in Wilkes-Barre (Vol. 11:1-3).

WBRE-TV's enthusiasm over improved coverage (Vol. 11:3) is matched by that of WILK-TV managing director Thomas P. Shelburne, who reports better long distance coverage, better picture in former fringe areas. He's particularly pleased by "fill-in of former shadow areas close-in." He also says contrast and quality of picture received on local TV sets have improved since the new equipment was put in service. Though no distance measurements have been made by station or by GE, Shelburne quotes report from Allentown, 50 air miles, indicating strength of 3000 uv/m, as well as reports of vastly improved service from such towns as Danville and Mifflinburg, Pa. 60 & 70 mi.

GE this week shipped 50-kw amplifier and 8-bay antenna as part of \$430,000 equipment package ordered by upcoming KBET-TV, Sacramento (Ch. 10), which has March target. RCA shipped 2-kw standby transmitter Jan. 25 to KARK-TV, Little Rock (Ch. 4) and 50-kw transmitter Jan. 28 to WTVT, Tampa (Ch. 13), due mid-March.

* * * *

In our continuing survey of upcoming new stations, these are the latest reports received from principals:

KFIF, Fairbanks, Alaska (Ch. 2), having received 2-kw RCA transmitter via air freight last week, plans test patterns Feb. 10, programming by March 1, writes A. O. Bramstedt, gen. mgr. of Midnight Sun Bestg. Co., which recently acquired control of KFIF, along with KFIA, Anchorage (Ch. 2), from Richard R. Rollins (Vol. 10:47 & 11:1). This week, RCA 3-bay superturnstile antenna is being installed on guyed tripod tower atop Lathrop Bldg., giving it height of 200-ft. above ground. Base rate will be \$150. Reps will be Weed and Moore & Lund (Pacific Northwest).

WDXI-TV, Jackson, Tenn. (Ch. 7), plans Feb. 20 test patterns, hopes to start programming March 1, reports pres.-gen. mgr. Aaron B. Robinson, who also controls radio WDXI and 5 other Tennessee AMs and publishes *Corinth* (Miss.) *Corinthian*. It has 10-kw Federal transmitter on hand, will use 500-ft. Stainless tower with

12-bay antenna. Only TV outlets within 100 mi. are 2 vhf's in Memphis, 77 mi. away. It has signed for CBS Extended Market Plan, has set tentative \$150 base rate. Rep. will be Burn-Smith.

KRCG, Jefferson City, Mo. (Ch. 13), now plans Feb. 1 test patterns, programming Feb. 13, according to owner Mrs. Betty G. Handy, whose family also controls local radio KWOS and *Jefferson City Capital News & Post Tribune*. Studios & transmitter will be at model Callaway Hills Farm, 10 mi. SE of U of Missouri's commercial KOMU-TV in Columbia. Stainless 500-ft. tower is ready, installation of 10-kw RCA transmitter and 12-section superturnstile antenna is under way. Base rate will be \$200. Rep will be Meeker.

WTVT, Tampa, Fla. (Ch. 13), whose CP was reinstated this week after being held up by protests (Vol. 10:49), plans March 15 test patterns, April 1 CBS programming, reports v.p.-gen. mgr. W. Walter Tison, also operator of Tampa radio WALT. It's third area outlet, WFLA-TV (Ch. 8) having started this week, WSUN-TV (Ch. 38) in 1953. It has transmitter house ready for 50-kw RCA unit due Feb. 1, will use 12-bay antenna on 838-ft. Ideco tower scheduled for completion Feb. 10. Tison is largest individual stockholder with 20%, other principals including politicians ex-Gov. Doyle E. Carlton, pres., 15%; ex-state sen. David E. Ward, secy.-treas., 10%; ex-Clearwater mayor H. H. Baskin, 10%; ex-circuit judge O. K. Reaves, 5%. Base hour will be \$400. Rep will be Avery-Knodel.

Satellites of KGMB-TV, Honolulu, on islands of Maui and Hawaii, will begin operation next April using RCA transmitters, reports v.p.-gen. mgr. G. Richard Evans. First to start will be at Wailuku, Maui (Ch. 3), KGMB-TV planning to send live cameras there in order to telecast ceremonies marking its April 3 debut. RCA transmitter has been ordered and antenna will be 100-ft. above ground atop guyed steel tubular mast on slope of 10,000-ft. Haleakala crater. Maui outlet is expected to improve reception on Molokai and Lanai, according to Mr. Evans. Hilo, Hawaii (Ch. 9), has April 10 target, using KGMB-TV's original equipment, including 500-watt RCA transmitter, with installation already underway. Antenna will be located on radio Hilo's KHBC tower. One technician will be added to KHBC staff to help operate Hilo TV; Maui will have engineering staff only. Stations will be sold only in combination with KGMB-TV. Rep will be Free & Peters.

Industry-govt. study of high towers and issues involved in joint use of airspace by TV and aviation industries—ordered 2 wks ago by govt.'s Air Coordinating Committee (Vol. 11:3)—may get under way next week with organizational meeting. All interested organizations have been invited to name representatives. FCC Comr. Webster is expected to be named chairman or co-chairman, with CAA administrator F. B. Lee slated as co-chairman if group has 2 heads. Other members already named: Joseph Adams, CAB; Rear Adm. W. L. Rees, Navy; Maj. Gen. W. D. Ganey, Air Force; Robert Kennedy, Assn. of FCC Consulting Engineers; A. Prose Walker and Vincent T. Wasilewski, NARTB; Robert M. Booth, FCC Bar Assn.; Cyril Braum, JCET. Other agencies and groups invited to participate, which have not yet named representatives: Army, Air Transport Assn., National Business Aircraft Assn., National Assn. of State Aviation Officials, Aircraft Operators Council, Aircraft Owners & Pilots Assn., Air Line Pilots Assn.

RCA takes over distribution of Ideco towers manufactured to its specifications, to be marketed under RCA brand.

Broadcasters drew praise of law enforcement officials in N. Y. this week for their cooperation in trying to crack down on so-called "pitchmen" whose spiels are currently subject of grand jury investigation of fraudulent on-air advertising (Vol. 11:4). Federal Judge Samuel Leibowitz, in charging grand jury Jan. 24 in Kings County (Brooklyn) Court, commended their public-spirited response in accepting his invitation of last week to witness his charge to the jury. All stations and networks in metropolitan N. Y. sent representatives in reply to invitation. District Attorney Edward S. Silver, who had been conducting own investigation, also thanked broadcasters for attending, saying they shared desire to "clear out the unscrupulous few who would prey on the unsuspecting public." He said: "I have not the slightest doubt that the broadcasters are just as anxious as I am to clean out the fakers." In his charge, Judge Leibowitz outlined laws and penalties covering misrepresentation. On Jan. 27, station representatives met with Silver to assure him of their "full cooperation." Stations told him they would work closely with local Better Business Bureau to stamp out the practice.

PUBLIC'S TV INVESTMENT—\$13.5 BILLION: Illustrative of TV's dynamic growth, which in 9 commercial years from 1946-54 has seen sets go into 70% of America's homes, is investment of about \$13.5 billion by the consumer for receivers during that period. Though figures are necessarily unofficial, they may be broken down as follows:

Retail value of receivers, \$9 billion (projected from the cumulative factory sales of \$6.451 billion); servicing, \$2 billion; components, antennas, etc., \$1.5 billion; receiving tube replacements, \$518,230,000; replacements of picture tubes, \$435,251,000. Tables setting forth set production, sales & inventories year by year are in our TV Factbook No. 20, released this week.

Average retail price of the 33,500,000 sets in hands of public on Jan. 1 is estimated at \$270 for the 9-year period, average having come down from the \$500-plus of 1946 to about \$200 in 1954. That's the consensus of trade statisticians, some saying \$270 average is too high, others too low. In marking up factory sales to \$9 billion, account has been taken of narrowed margins & the trade's seemingly perpetual 3 Ds -- distress, discounts, dumping.

* * * *

TV sales performance in Jan. gave all levels of trade a shot in arm, though there's still the 2,000,000 inventory to contend with (Vol. 11:4). Pending analysis of retail statistics, which normally trail factory and distributor data by week or two, there's ample reason to believe TV sales were at least as good as in Jan. 1954, when 525,257 TVs were sold by factories, 612,622 by distributors, 731,917 by dealers. And that was considered a comparatively good month.

The sales picture takes on added rosiness when it's remembered that many in trade had their fingers crossed about Jan. sales, worried lest TV would suffer a bad letdown after racking up a record 7,300,000 retail sales year in 1954. No letdown beyond normal seasonal adjustments apparently has materialized thus far.

How much of those sales represent second-set buys? That question is being kicked around a lot these days among trade's marketing experts -- and judging from their replies to our queries, we'd say 10% would be a very conservative estimate. It's somewhat higher than that, of course, in big metropolitan pre-freeze markets but, nation-wide, a 10% average is considered fair right now.

Low prices, quality merchandise, big promotions and sluggishness of color -- those are the major reasons being advanced for public's apparent willingness to go for the second set much sooner than many had anticipated. Said one set maker:

"We're really stealing sales from the future these days. The sales we are making today are the ones we figured on making 6 months or even a year from now. They're second-set purchases, as we've determined from our own surveys. Now I do not mean to imply that everybody's on the second-set bandwagon. Far from it. We do know, however, that there has been a perceptible rise in second-set purchases over the last 6 months -- many in the low-end categories -- and I feel that this constitutes enough of a trend to make the outlook for 1955 quite promising."

* * * *

TV-radio made a good showing at Western Winter Mart in San Francisco this week, judging from reports. The handful of manufacturers who showed reported brisk ordering by dealers -- generally better than year ago. "Special deals" were reported harder to find than in previous years. Of particular interest, too, were the high-fidelity displays, which claimed a spotlight of their own.

Discount house competition gave dealers at mart plenty to talk about, as it does whenever 2 or more dealers meet nowadays. New NARDA pres. Harry B. Price Jr., in first major address since election 2 weeks ago, told dinner meeting at mart that

TV-radio-appliance dealers are in a paradox of higher volume and lower profit in competition with discount houses. He commented:

"The war is on. At the manufacturers' level, it is be competitive or die. At distributors' level, it's justify your existence or close up. And at the level of the dealer, we must recognize the change and adjust to it...

"The doing away with list price isn't shocking. Retailers who have been selling below list did away with list price a long time ago. We all must understand -- neither you, your distributor nor your manufacturer establishes the ultimate selling price of our products. The public determines what it will pay. Decide now you will adapt yourself to a changing market. There never will be a substitute for integrity, value or service, but if someone develops a more economical way to deliver all three -- watch out! It is a human shortcoming to resist change. However, failure to recognize sound progress can relegate one to failure."

* * * *

TV production totaled 150,985 week ended Jan. 21, third week of current year, compared to 166,522 preceding week and 190,896 week ended Jan. 7. Three-week total is slightly over 500,000. Radio production totaled 262,949 (147,313 auto) in week ended Jan. 21, compared to 267,544 preceding week and 278,371 in week before. For 3 weeks, radio production was slightly over 800,000.

Trade Personals: F. P. (Fritz) Rice, mgr. of DuMont CR tube div., appointed to new position of director of manufacturing & purchasing—supervising instrument, CR tube, communication products, govt. contracts & receiver manufacturing divisions . . . Herbert E. Taylor Jr., ex-mgr. of DuMont communications products div., named commercial sales mgr., Federal Telephone & Radio Co., under J. A. Frabutt, gen. sales mgr.; company plans expansion in microwave and other industrial fields . . . Joseph A. Lagore, gen. mgr. in charge of operations, Philco govt. & industrial div., and James D. McLean, gen. sales mgr. of that division, promoted to v.p. manufacturing and v.p. sales, respectively . . . Alfred A. Medica, Admiral sales mgr. of national accounts, assumes added duties of radio sales mgr. . . . J. M. Tenney, ex-Admiral, named mgr. of Kelvinator's new major dealer div. . . . Henry Lehne, director of Sylvania electronic defense lab, named mgr. of new electronic systems div., Buffalo, concentrating on developing electronic systems & equipment for military . . . Gilbert Hoffman, comptroller of CBS-Columbia's N. Y. factory branch, appointed comptroller of all branch distributing operations . . . Clarke Latimer, from TV div., named service mgr. of Hoffman Electronics Sales Corp., succeeding Hal Grey, now field engineer of Hoffman's KOVR, Stockton, Cal.; John Charlesworth named Hoffman sales promotion mgr. in San Francisco area . . . Edward K. Doherr promoted to asst. director of Raytheon govt. field engineering dept., Waltham, Mass., handling field service requirements; G. Edward Dodge named govt. field engineering supervisor . . . Jack Ravdin, Olympic Radio engineering v.p., placed in charge of all manufacturing operations; Benjamin Parzen promoted to Olympic director of engineering & research . . . J. J. O'Connor resigns as Sylvania southwestern district sales mgr. to form own merchandising rep firm in Dallas . . . Wm. Horn, adv. mgr. of Philco air conditioner & electric range divs., named adv. & merchandising mgr., accessory div. . . . Robert N. Gillmor promoted to mgr. of new GE materials & processes lab, Syracuse . . . Robert H. Newton, ex-RCA Service Co., named mgr. of new gen. service dept., RCA Victor Co. Ltd., Montreal . . . F. J. Gaffney, ex-Fairchild Engine & Airplane Co., elected engineering v.p. of Marion Electrical Instrument Co., Manchester, N. H. . . . Dan Roseman named asst. sales mgr., James B. Mannion exec. asst. of sales dept., Sheldon Electric Co., Irvington, N. J. (tubes) . . . Joseph Kerr, ex-GE & Motorola-New York, named N. Y. district mgr., Granco Products Inc.

DISTRIBUTOR NOTES: Hoffman Electronics, continuing national expansion program, appoints Independent Distributors Inc., Denver; Wabash Distributing Co., Terre Haute; Boetticher & Kellogg Co. Inc., Evansville, Ind.; Ferguson Co., Paducah, Ky.; Triangle Supply Co., Bowling Green, Ky. . . . Capehart-Farnsworth: Lehigh Valley Distributors, Hazleton, Pa. (O. J. Mannen, pres.) . . . Long's Distributors Inc., Binghamton, N. Y., relinquishes Motorola franchise . . . Gould-Farmer Co., Syracuse (GE) elects Charles H. Wittenburg pres., succeeding Earland M. Farmer, who moves up to chairman . . . Westinghouse Electric Supply Co., Charlotte, plans to move about Aug. 1 to new site on W. Morehead St. . . . Raymond Rosen & Co., Philadelphia (RCA) names James Davis adv. director, succeeding Jack Moses, retired.

* * * *

Shakeup of Westinghouse consumer products personnel, including TV-radio div., was disclosed this week, with these changes: Edward J. Kelly, ex-Emerson production v.p., named TV-radio div. mgr., replacing T. J. Newcomb, whose new assignment has not been disclosed; John F. Myers, pres. of Westinghouse Electric Supply Co., appointed v.p. & gen. mgr. of consumer products, reporting to John M. McKibbin, who remains as group v.p. of consumer products; Victor D. Kniss, gen. sales mgr. of consumer products, named pres. of Westinghouse Electric Supply Co., succeeding Myers. The changes disclosed this week follow in wake of several recent transfers and resignations and reports persisted that more changes would follow, as company fights for bigger share of consumer products market—particularly TV-radio.

H. Ward Zimmer, 57, a 36-year veteran of Sylvania who rose through ranks to presidency in April 1953, died Jan. 28 at New York Hospital after 2-month illness. He became operations v.p. in 1947, exec. v.p. in 1950. He was a native of Emporium, Pa.

W. Paul Jones, 53, ex-pres. of Servel Inc. and v.p. in charge of all Philco appliance operations from 1939-49, died last week in Evansville, Ind. of heart attack. At time of his death, he was pres. of Kellett Aircraft Corp., Camden, N. J. (helicopters).

George A. Rogers, 48, ex-mgr. of operations of Westinghouse TV-radio div. and formerly with Emerson Radio, died Jan. 25 in Cornell Clinic, N. Y. Survivors are his widow, a son, 2 daughters.

Topics & Trends of TV Trade: Flat one-year warranties on picture tube replacements sold through distributors—an on-again off-again proposition for last 6 months or so—have once again become standard in TV industry. RCA, GE, Sylvania & DuMont this week disclosed they have gone back to outright one-year warranties because of competitive reasons—citing fact that other unidentified manufacturers, including rebuilders, had refused to change with them. Distributors were notified this week of the return to one-year warranties.

RCA last July had adopted a 12-month pro-rata warranty policy similar to that in effect for automobile batteries, in which value is diminished each month. Sylvania likewise had adopted a 12-month pro-rata policy recently. GE and DuMont had previously changed to a flat 6-month warranty.

Primary reason for switch from one-year warranties was that picture tube no longer represents as large an investment as other parts and consequently should not have the extended warranty protection.

* * * *

“A deliberate lie, intended to injure unjustly the reputation of Mr. Wasserman” was the way the prosecutor Arthur McLaughlin characterized the sensational testimony of Arthur A. Mills, an ex-convict from N. Y., that George Wasserman, owner of George’s, big Washington retail chain, hired him to rob George’s safe on Labor Day week-end. Mills was convicted by a Federal court jury in Washington of the safecracking, in which \$20,000 in cash and \$3500 in jewels were taken. Wasserman denied ever having seen Mills.

Radio shipments to dealers, excluding auto radios, totaled 5,128,337 in first 11 months of 1954, according to RETMA’s state-by-state tabulation released this week. Nov. shipments were 711,554, compared to 639,624 in Oct. Comparisons with 1953 are not possible because only quarterly compilations were made then.

CBS-Columbia added 9 basic models to line at regional distributor meeting Jan. 25 at New York’s Plaza Hotel. Prices range from \$180 for 21-in. ebony table model to \$260 for 21-in. open-face blonde console. Two of new models will be priced by distributors according to local conditions. New models consist of 6 tables, 3 consoles.

British TV-radio sales set record in 1954—TV sales estimated at slightly higher than 1953’s 1,145,000 and radio at about 1,500,000, or double 1953 figure. British TV sets-in-use now total more than 4,250,000. In France, 1954 TV sales were estimated at 80,000, compared with 37,000 in 1953.

Individual TV speakers with own volume control are now being marketed at \$13.95 list under name “TV Hush” by Aer-Vue Industries, 1460 Bushwick Ave., Brooklyn. Rectangular-shaped gadget is placed on chairside table to permit viewer to listen without disturbing others in house and to vary volume without leaving chair.

Business failures in 1954 were at a higher rate among TV-radio-appliance dealers than any other group of retailers, reports Dun & Bradstreet’s Feb. *Service Magazine*. Rate of failure was 162 per 10,000 dealers vs. 116 per 10,000 in 1953. Actual number of failures was not disclosed.

One of bright young men mentioned in Feb. 4 *Collier’s* article “How to Think Your Way to the Top” is Milton J. Shapp, 43, pres. of Jerrold Electronics Corp., manufacturer of TV distribution equipment for community antenna systems, hotels, etc.

National Assn. of Music Merchants scheduled annual convention and trade show July 18-21 at Chicago’s Palmer House. Advance registrations may be made at NAMM headquarters, 25 E. Jackson Blvd., Chicago.

PROPOSED MERGER of Hoffman Electronics Corp. and Packard-Bell Co., both of Los Angeles, was subject of serious negotiation during the last week—but the negotiations were terminated Jan. 25. Said joint statement by H. Leslie Hoffman and Herbert A. Bell, presidents:

“Consideration of a merger agreement whereby shareholders would exchange 2½ shares of Packard-Bell common stock for one share of Hoffman Electronics common stock has been under discussion by representatives of the two companies for the past ten days. Inability of the two companies to reach a mutually satisfactory agreement was responsible for Hoffman’s and Bell’s decision to end the negotiations.”

Hoffman’s assets as of Sept. 30 were about \$17,043,043, Packard-Bell’s \$9,358,050. Hoffman, recently admitted for trading on the N. Y. Stock Exchange, showed net profit of \$1,139,421 on sales of \$32,750,904 for 9 months ended last Sept. 30 compared to \$1,115,553 on sales of \$38,153,871 for same 1953 period (Vol. 10:44). Packard-Bell’s fiscal year ended last Sept. 30 with sales of \$17,744,136 and profit of \$164,295 compared to sales of \$32,152,749 and profit of \$1,139,642 in same 1953 period (Vol. 10:52). This week, Packard-Bell reported net profit of \$217,237 (31¢ a share) on sales of \$5,855,831 for its first quarter ended Dec. 31, compared with \$269,575 (39¢) on sales of \$6,333,922 for same 1953 period.

Reorganization petition of Wilcox-Gay Corp., parent of Majestic Radio & Garod Radio, will be argued March 21 when creditors meet with Referee Chester C. Woolridge in Grand Rapids Federal Court. Signed by chairman Leonard Ashbach, petition for reorganization under Chapter X of Bankruptcy Act was approved last week-end by Grand Rapids Federal Judge W. Wallace Kent. It lists assets of \$5,990,606 and liabilities of same amount as of Nov. 30, 1954. It contends company is solvent and can pay current debts, but cannot continue to do so under pressures exerted by Garod’s creditors, one of whom has levied a \$39,000 judgment against company’s bank accounts and has forced Brooklyn TV plant to shut down as result. Wilcox-Gay stated it is directly affected by Garod’s losses, as guarantor of all contract obligations of its subsidiary. Petition contends Garod was forced to sell TV sets at a loss to obtain operating capital. Another factor was termination of several of Garod’s govt. contracts, it is stated. Company proposes to consolidate all operations at Charlotte, Mich. headquarters and asks court permission to continue in business, citing \$1,000,000 worth of present and prospective U. S. orders at Garod and a Wilcox-Gay contract with an unidentified electronic manufacturer for delivery of 10,000 private-label tape recorders in first quarter of 1955, at selling price of about \$900,000. Wadsworth Bissell, Grand Rapids, was appointed trustee, with authority to file list of creditors by Feb. 15.

Industry figures included in recent Honors List published by Queen Elizabeth: R. C. McCall, BBC asst. director of TV (C.M.G.); E. H. Clarke, BBC appointments officer (O.B.E.); Miss Frieda V. Lingstrom, BBC head of children’s TV programs (O.B.E.); A. J. Clarricoats, gen. secy., Radio Society of Great Britain (O.B.E.); V. M. W. Roberts, commercial mgr., electronics dept., British Thomson-Houston Co. (O.B.E.); Miss Ruth M. Cockerton, BBC pictorial publicity officer (M.B.E.); M. M. Dewar, BBC asst. to director of home sound broadcasting (M.B.E.); J. J. Sarche, chief inspector, Ultra Electric Ltd. (M.B.E.).

National Retail Dry Goods Assn., 100 W. 31st., N. Y., issues new *Expense Center Accounting Manual*, setting up new accounting procedures to enable retailers to keep closer check on expenses. NRDGA anticipates new system will become standardized in retail trades by mid-1955.

Financial & Trade Notes: Columbia Broadcasting System Inc., which has shown steady increases in gross and net, its stock going from a 1954 low of 41% to a high this week of 93%, will propose to April 20 stockholders meeting that shares be split 3 for 1 and that authorized stock be increased from 3,000,000 to 12,000,000 shares, of which half will continue to be Class A and half Class B. Board meeting this week decided such a split-up would make possible wider distribution of the stock, which Chairman Paley said was desirable because, in addition to its broadcasting activities, CBS manufactures consumer products through its various divisions: CBS-Columbia div. (TV-radio sets); Columbia Records (Columbia, Epic, Okeh & Playtime label phonograph records and Columbia phonographs); CBS-Hytron (picture & receiving tubes, semi-conductors). There are no present plans to issue any shares other than those required for the stock split-up.

Mr. Paley revealed that sales & profits for fiscal year ended Jan. 1 will be largest in company's history, preliminary figures indicating net earnings of approximately \$4.85 per share, up \$1.05 per share from 1954. In addition, some \$5,300,000 of non-recurring capital gains have been realized. Audited figures will be released in March.

Last CBS report, for first 9 months of 1954, showed gross sales up 18% to \$263,746,543 from previous record of \$223,109,649 in same 1953 period; net earnings after \$8,970,000 taxes up 14% to \$7,299,130 (\$3.12 a share) from \$6,411,343 (\$2.74) after \$8,550,000 taxes (Vol. 10:46). Company's 1953 gross was \$313,908,771, net \$8,894,642 (\$3.80); 1952, gross \$251,594,490, net \$6,445,506 (\$2.75); 1951, gross \$192,384,608, net \$6,360,097 (\$3.10); 1950, gross \$124,105,408, net \$4,105,329 (\$2.39).

CBS split its stock 2 for 1 in March, 1937 and 5 for 1 in Feb. 1934, and last Dec. 20 declared a 2% stock dividend. Last year it paid 40¢ quarterly cash dividends on both A & B stock plus a special 30¢ dividend on Dec. 10. First dividend this year is 50¢ payable March 11 to stockholders of record Feb. 25.

* * * *

Magnavox earned \$1,532,408 (\$2.02 a share) on sales of \$28,019,000 in 6 months ended Dec. 31, compared to \$1,702,354 (\$2.24) on \$35,921,000 in corresponding period of 1953. For 3 months ended Dec. 31, earnings were \$1,200,679 (\$1.58) on \$17,671,000 vs. \$779,006 (\$1.03) on \$19,869,000 in same 1953 quarter. Pres. Frank Freimann estimated earnings for current fiscal year ending June 30 will exceed the \$2.77 a share earned in preceding fiscal year. He said several research & development contracts are expected to boost company's volume substantially.

Cornell-Dubilier pres. Octave Blake predicts that sales for current fiscal year ending Sept. 30 will increase slightly over last year's \$37,149,778, though profit margins may be narrowed slightly due to price competition. He told annual meeting that sales for quarter ended Dec. 31 declined to \$9,950,000 from \$11,434,918 in like 1953 period. He gave no report on earnings. Company will redeem March 1, \$175,000 principal amount of 3% debentures due 1972 at par plus accrued interest to redemption date. Chase National Bank is trustee.

Dividends: Television-Electronics Fund, 8¢ payable Feb. 28 to stockholders of record Feb. 1; International Resistance, 5¢ March 1 to holders Feb. 15; Weston Electrical Instrument, 25¢ March 10 to holders Feb. 25; Servomechanisms, 10¢ Feb. 15 to holders Feb. 1; Cornell-Dubilier, 20¢ extra & 30¢ quarterly, March 25 to holders March 8; Mallory, 50¢ March 10 to holders Feb. 18; Stewart-Warner, 40¢ March 5 to holders Feb. 11; Westinghouse, 50¢ March 4 to holders Feb. 7; CBS "A" & "B," 50¢ Feb. 25 to holders Feb. 12; Aircraft Radio, 20¢ Feb. 24 to holders Feb. 11; Avco, 10¢ Feb. 27 to holders Feb. 7; Standard Coil Products, 25¢ Feb. 17 to holders Feb. 7.

ADMIRAL SIGNED RCA patent license renewal this week, at same time reporting that it has also licensed RCA for 5 years under its own patents, including automation equipment. Pres. Ross Siragusa revealed Admiral is currently contemplating setting up a division to make and lease automation equipment for the rest of the industry. The Admiral signature leaves Philco the only major entity in the field (with exception, of course, of litigating Zenith) which has not signed the RCA renewal, and Philco officials are saying nothing about their plans.

Change of venue in Dept. of Justice's civil anti-trust patent suit against RCA (Vol. 10:47) was denied Jan. 20 by Judge John C. Knox in U. S. court for the southern district of N. Y. He stated: "If I could, in good conscience, transfer the trial of this suit to the District of Delaware, I would gladly do so. However, the Government's complaint had to do with defendants and transactions that have taken place subsequent to the litigation that was held in Delaware some 21 years ago." Next step in this suit is RCA answer, which is due March 25.

In Zenith-Rauland \$16,000,000 triple damage counterclaim suit against RCA, based on anti-trust charges in connection with patent pooling, Federal Judge Igoe in Chicago this week took under advisement RCA motion for dismissal and indicated he would rule next week.

Philco has been granted extension until Feb. 14 for its answer in Dept. of Justice suit charging illegal restrictions on distributors and dealers (Vol. 10:51). Anti-trust suit was filed Dec. 15 in Federal court for eastern district of Pa., and Judge Thomas J. Clary approved agreement of counsel on the extension.

Note: Full texts of complaints in both the RCA and Philco suits were published by *Television Digest* as Special Reports last Nov. 20 & Dec. 18, respectively.

Edward J. Noble, chairman of AB-PT finance committee, chairman of Life Savers Inc. and onetime chief owner of ABC, has given 200,000 shares of AB-PT common stock, valued currently at about \$4,500,000, to the Edward John Noble Foundation, his charitable endowment. This reduces his AB-PT common stock holdings to 8949 shares; he also holds 324,601 shares of 5% preferred. In Dec. (Vol. 10:51), Mr. Noble gave \$5,000,000 and in 1953 he gave \$2,000,000 to the Foundation, which he organized in 1940.

Hartley Baird Ltd. major British TV-radio manufacturer, has acquired Ambassador Radio & Television Ltd., which continues under own name as wholly owned subsidiary with R. N. Fitton remaining as managing director and joining Hartley-Baird board as director in charge of TV & radio. Ambassador shareholders received 1,000,000 shares of HB, which will also issue 100,000 shares of 7% second cumulative £1 pfd. shares.

Electrical & Musical Industries Ltd., big British electronics firm which has contracted to purchase control of Capitol Records Inc. for about \$4,350,000 (Vol. 11:3), will finance it by offer of 3 million £1 (\$2.80) cumulative second preference shares at 5½% to EMI stockholders.

Norden Laboratories Corp. stockholders have voted to merge with Ketay Instrument Corp. on basis of one Ketay common for 4 Norden and one Ketay common for each 2.7 Norden Class B; plan is to change name to Norden-Ketay Corp.

Daystrom Inc. has acquired or holds voting rights to 214,212 shares, or more than half of the 428,221 outstanding, of Weston Electrical Instrument Corp., Newark, according to Daystrom pres. Thomas Roy Jones.

Storer Broadcasting Co., now traded over the counter, expected shortly to apply for N. Y. Stock Exchange listing. Wall Street rumors are it may also split stock.

Color Trends & Briefs: Implementing his color "blockbuster" theory—that of stimulating public interest in color through occasional major 1½ & 2-hour spectaculars rather than through simple increase in miscellaneous color programming (Vol. 11:3)—NBC pres. Sylvester L. Weaver is busily lining up bigger & bigger names and programs. Items:

(1) Complete uncut version of current Broadway play *Peter Pan*, starring Mary Martin, is to be presented 7:30-9:30 p.m. March 7—an extra half-hour being added to regular *Producers' Showcase* period. Price reported: about \$300,000.

(2) Sol Hurok, the concert manager, has been retained to develop "new production ideas and artistic vehicles" for *Producers' Showcase*, colorcast every 4th Mon. He has left for Europe to scout talent.

(3) Dedication of NBC's new west coast color studios in Burbank, Cal. March 27 is to be marked with major spectacular built around "cavalcade of show business" motif—to be produced by Tony Miner, feature big names, include comments on color by RCA chairman David Sarnoff.

(4) Actor Maurice Evans has agreed to present eight 90-min. plays in color this fall, one every 4th Sun. afternoon, starring in 2 of them himself—in *Hamlet* and either *Man and Superman* or *The Devil's Disciple*. Jack Rayel will be exec. producer, George Schaefer director.

* * * * *

Though drop in color set prices from current \$895-\$1000 level was declared by many manufacturers to be impractical, despite RCA's reduction of 21-in. picture tube price from \$175 to \$100 (Vol. 11:3), Magnavox pres. Frank Freimann has announced plans to begin shipping sets using the RCA tube by July and stated "we're shooting for a price somewhere between \$650 and \$695." Only other set maker talking about that price range is Emerson pres. Ben Abrams, who said he hopes to have price down to about \$600 by July-August (Vol. 11:3). This week, Admiral started shipments, quantity undisclosed, of \$895 receivers using RCA tube.

Eastman Kodak, unhappy about Wed. 7-7:30 p.m. time period for its color film series *Norby*, has asked NBC-TV to give it a segment later in evening. It contends a \$3,000,-000 investment in film is not justified on current period.

Jan. 31 week network color schedules: CBS-TV—Feb. 2, *Best of Broadway*, 10-11 p.m. NBC-TV—Feb. 2, *Norby*.

Our recent roundup—"The Color Doldrums—Whys & Wherefores" (Vol. 11:2)—prompted *Washington Star* TV-radio columnist Harry MacArthur to give his analysis in Jan. 16 column, and he puts blame squarely on insufficient programming. "It ought to be clear now," he writes, "that the broadcasters cannot wait until the country is flooded with color sets before flooding their channels with color TV. A look at the list of color programs scheduled for this or any other week is ample answer to any puzzlement over the general public reluctance to wax enthusiastic over tint TV . . . Even when the price comes down, those color TV sets are going to gather dust in the showrooms until they can be used regularly to receive color programs."

Two color notch filters, to attenuate radiations of stations transmitting color, are now being offered by DuMont. Also offered are new spurious emission filters. Both types are designed to meet FCC requirements. Additional device announced this week is a multi-channel waveform monitor for displaying 4 video signals simultaneously on a single multi-gun CR tube. It's said to be particularly useful for stations transmitting color—permitting monitoring of all 3 color signals and encoded output of one color channel.

As test of dealer interest in color, *Retailing Daily* asked its subscribers whether it should continue weekly listings of color program schedules. TV-radio editor Martin P. Rosenblum tells us: "The reaction has been overwhelming. Frankly, we were quite surprised. Oddly enough, the bulk of the response was from small cities I have never heard of, like Ravenna, N. Y. and Huron, O., etc. Because of the size of the response we intend continuing the listings."

Live color programming experience of 3 stations, with 16 pages devoted to each, constitutes most of RCA's Dec. *Broadcast News*. Stations covered are the local color-casting pioneers WKY-TV, Oklahoma City; WBAP-TV, Ft. Worth; WTMJ-TV, Milwaukee. Articles include considerable detail on major aspects of live color originations.

CBS's technique for equalizing and terminating coaxial cables for color in studios is described by W. B. Whalley in January *Journal of the SMPTE*.

Latest 3-V color film camera shipments reported by RCA were to WFIL-TV, Philadelphia; WTVR, Richmond; WJAC-TV, Johnstown, Pa.

GE has opened new "systems center" at Syracuse for its heavy military electronic equipment dept. New 100,-000-sq. ft. 2-building center will house 700 of dept.'s 3300 employes in Syracuse area and will coordinate military development and production programs in such fields as radar, communications, anti-submarine warfare, missile control, radiation instrumentation, air navigation, traffic control.

Long-distance vhf & uhf propagation experiments at Bureau of Standards' Cheyenne Mt. (Colo.) facilities area described in new publication, *Cheyenne Mt. Tropospheric Propagation Experiments*, National Bureau of Standards Circular 554, available for 30¢ from Govt. Printing Office, Washington 25, D. C.

Another big company expanding into electronics field is Studebaker-Packard Corp., which this week announced it has acquired Aerophysics Development Corp., Los Angeles research firm specializing in guided missiles.

Marvin Hobbs, ex-Harvey Wells Electronics v.p. and former electronics advisor to chairman of Munitions Board (Defense Dept.) Jan. 31 becomes director of marketing, American Machine & Foundry Co. electronics div., Boston.

Dr. Mervin J. Kelly, Bell Labs exec. v.p., named chairman of Air Force Scientific Advisory Board, succeeding Dr. Theodore von Karman, resigned.

Electronics Reports: First public demonstration of a 2-color radar tube was conducted this week at Washington's National Airport by Chromatic TV Labs, developer of Lawrence tube. As shown, one kind of information (a map, in this case) was displayed in yellow, aircraft in orange. Chromatic research director Robert Dressler explained that many demonstrations had been conducted for the military, using different colors to distinguish between friendly and enemy planes, etc. Contrast between the 2 colors was quite good, and Dressler said that a good green long-persistence phosphor had been developed by GE and would be tried—to get even more contrast. Conventional P7 & P17 phosphors were employed because of their availability. Plans are to add a third color to give other kinds of information on same tube. Advantage claimed for Chromatic tube over 3-gun tubes for radar, according to Dressler, is that former is undisturbed by earth's magnetic field and man-made noise—particularly advantageous in aircraft. Device was developed under Navy contract.

Comdr. Clifton Shumaker, 48, Naval member of the Electronics Production Resources Agency, joint service board, pioneer in radio and formerly with electronics design section, Bureau of Ships, died Jan. 20 at his home in Alexandria, Va.

NCAA's 1955 football TV program will be completed next month, NCAA exec. director Walter Byers announced this week after first meeting of 12-man TV committee. Headed by new chairman E. L. (Dick) Romney, Skyline Conference commissioner, committee "came to no conclusions" at first meeting Jan. 27, hopes to hold hearings Feb. 10-11 in New York to get ideas for new control plan, draw up program Feb. 17-18 in Chicago and poll NCAA members by mail Feb. 25 on plan. Meanwhile, U of Michigan pres. Harlan Hatcher, addressing Detroit Athletic Club Jan. 27, attacked "game of the week" plan as "folly" and said "all the collegiate sports will be telecast in the near future, along with other university activities." He reiterated hints made by other Big Ten and Pacific Coast Conference spokesmen of withdrawal from NCAA if 1955 plan is as rigid as previous ones. However, he opposed bills pending in 6 state legislatures to force state-supported colleges to televise their games. Legislative committee in a 7th state, Maryland, killed resolution to seek telecasting of all U of Maryland games after coach Jim Tatum told it such a move would embarrass the university and probably prove unprofitable.

Quantity of documents made available to public by FCC is being cut down to permit issuance of additional material. Commission has been mimeographing 800 copies of all decisions, etc., giving them out freely. Demand for documents covering services other than broadcasting has become so great that Commission is cutting number of copies of documents to 200, limiting number to be taken by each person or firm. Extra copies may be obtained only upon specific request and in restricted numbers. Commission states that its distribution of documents will still be far more liberal than that of other govt. agencies. New fields to be covered in releases will be weekly lists of applications and grants for public coast stations, aeronautical stations, airdrome control stations, radiopositioning stations in 1750-1800 kc band, disaster communications stations, operational fixed stations. Also to be issued are lists of certain petitions affecting rules in Safety & Special services. FCC consulted bar and engineering groups before making the changes.

Georgia's ex-Gov. E. D. Rivers Sr. is selling CP for WCTV, Thomasville, Ga. (Ch. 6) for \$88,700 to John H. Phipps, of Phipps polo-playing family, who will also take over \$331,464 GE equipment contract. Rivers gets \$74,000 as partial reimbursement for \$82,000 out-of-pocket expenses and remainder for equipment he acquired from Storer following sale of his CP for WMIE-TV, Miami (Ch. 27), which Storer now operates as WGBS-TV (Ch. 23). Phipps' home base is Tallahassee, Fla., where he operates radio WTAL, about 30 mi. from Thomasville; he also operates WTYS, Marianna, Fla. Contingent on transfer of TV, application also was filed for Rivers to buy Thomasville radio WKTG (1-kw, 730 kc) from Fred Scott Jr. and family for \$100,000. Rivers still holds 60% of CP for WOBS-TV, Jacksonville, Fla. (Ch. 30).

KSBW-TV, Salinas, Cal. (Ch. 8), is selling KMBY, Monterey (250-watts, 1240 kc, CBS) for \$70,000, according to application filed this week. Buyer is veteran radio engineer Frederick A. Gwynn, now with NBC, Hollywood. Sale is part of merger deal whereby KSBW-TV is buying out time-sharing KMBY-TV, Monterey, along with KMBY for \$230,000 (Vol. 10:45). In order to retain KSBW (1-kw, 1380 kc, MBS), it must sell Monterey radio outlet.

Now interconnected to Bell System TV network lines are 359 stations in 233 American cities, latest being KLRJ-TV, Henderson, Nev., which began network programming last week end. Next on schedule: WMVT, Montpelier, Vt. (replacing private link), Feb. 1; KRCG, Jefferson City, Mo., Feb. 13; WMFD-TV, Wilmington, N. C., Feb. 14; WFLA-TV, Tampa, and KBET-TV, Sacramento, Feb. 15.

NBC's total assets are placed at \$68,931,262 as of last Nov. 30 in formal application filed with FCC this week in connection with proposed acquisition of WKNB-TV, New Britain-Hartford (Ch. 30), its first venture into uhf ownership (Vol. 11:2). Earned surplus is listed as \$34,577,630. Network's plant & equipment are placed at \$41,652,617. In addition to \$606,000 cash, NBC assumes responsibility for liabilities not to exceed \$840,000 as at last Oct. 31, acquiring total assets of \$855,185 of which \$618,636 is in real estate and equipment. WKNB-TV liabilities on that date were: current, \$180,435; long-term notes, \$110,607; debenture bond, \$260,287. Capital as of Oct. 31 was \$303,856, earned surplus \$49,193. Sale agreement also includes provision whereby chief stockholder Julian Gross, Hartford adman, gen. mgr. Peter B. Kenney and secy. Wm. B. Ray will be employed for 3 years—first 2 at \$15,000 yearly, Ray at \$9000.

First concrete FCC action on subscription TV came Jan. 26 when Commission instructed staff to draft notice of proposed rule-making. Draft should be ready in about 2 weeks, will be issued any time thereafter. As expected, notice will be in broad, general terms, designed to elicit industry response to many controversial questions, such as: (1) Does FCC have legal authority to authorize fee TV? (2) Is it common carrier or broadcasting? (3) Should hours of operation be specified? (4) Should rules differ according to size of market and number of stations? (5) Should it be restricted to uhf? (6) Should a patent issue be interjected? (7) Should single or multiple system be authorized? It's obvious from Commission's approach that it is in no hurry and that consideration of matter will take many months, if not years, even without complications such as intervention of Congress—which is always a possibility.

Request by Edward Lamb's attorneys to order FCC Broadcast Bureau to complete its direct case before Lamb's side begins cross-examination (Vol. 11:4) was turned down this week by examiner Herbert Sharfman after conference with attorneys for both sides. Philip Bergson, representing the Toledo broadcaster-industrialist, also asked Sharfman to require FCC attorneys to disclose whether they plan to call more witnesses. Examiner said he would decide whether they could call new witnesses if and when they announce plans to do so. Hearing is scheduled to resume Feb. 9.

Bill to remove Communists and front members from equal time provision of Communications Act was introduced this week by Sen. Butler (R-Md.) on behalf of himself, Sen. Jenner (R-Ind.) & Sen. Potter (R-Mich.). S-771 would allow TV-radio stations to deny political time to any candidate convicted of espionage, treason, sabotage or subversive activities, or any member of any group determined to be communist-controlled or infiltrated.

Authority to look into purchasing defunct KFAZ-TV, Monroe, La. (Ch. 43), for possible use as educational station, was granted Louisiana supt. of schools this week by state board of education. It's an authorization only; funds must be appropriated by legislature. KFAZ-TV went dark May 1, 1954 after 9 months on air (Vol. 10:19).

Strike of 770 CBC employes represented by NABET (CCL-CIO) was threatened this week after Canada's Federal Conciliation Board was reported to have rejected wage and other demands. Though decision hasn't officially been announced, NABET was said to be planning strike vote Feb. 2.

Power Increases: WXEL, Cleveland (Ch. 8) Jan. 18 to 316-kw; WKNB-TV, New Britain-Hartford (Ch. 30) Jan. 25 to 210-kw.

Teleprompter Corp. signs long-term contract with NBC-TV, similar to one last year with CBS-TV, reports chairman Irving B. Kahn.

FEB 7 1955

SUMMARY-INDEX OF THE WEEK'S NEWS—February 5, 1955

FAR-REACHING NETWORK CHANGES proposed in Plotkin memorandum to Senate Committee—but neither FCC nor Congress is seen disposed to go along (pp. 1 & 8).

SENATE'S INVESTIGATION OF TV may run gamut from programming to free TV to newspaper ownership, but its keystone is controversial Plotkin memorandum (p. 2).

4 UHF's GOING OFF AIR—Milwaukee's WCAN-TV, Albany's WTRI, Charleston's WKNA-TV, Oklahoma City's KMPT. New VHF's in Alaska and Missouri (p. 4).

ELECTRONIC MUSIC SYNTHESIZER is most remarkable of electronic developments disclosed in progress report by RCA's Gen. Sornoff at AIEE meeting (p. 5).

CUSTOM-BUILT TRANSMITTER and camera chains for new Tupelo, Miss. station; Howii vhf satellite and Detroit uhf educational transmitters shipped (p. 8).

FCC GRANTS 3 CP's—in Savannah, Anderson, Ind. and Son Juan, P. R.—as struggles over decisions, channel shifts and sales grow more bitter (p. 10).

SET SALES EXCEED NORMAL SEASONAL PACE, some TV makers reporting shipments of or near record; Philco raises price of 4 models (p. 12).

DR. ALLEN B. DuMONT scans electronic horizons, reports combination TV-film camera almost ready, speculates on "electronic learning" (p. 10).

STANDBY PRICE & WAGE CONTROLS apparently aren't going to be requested by President now, in effort to avoid war "psychology" (p. 14).

LONG-DISTANCE WAVEGUIDE successfully tested over 40-mi. distance by Bell Labs, which sees eventual use for carrying network programs to stations (p. 15).

NBC EXECUTIVES PUSHING COLOR, making gross-roots speeches; Robert Sornoff urges set makers to pioneer color sponsorships in self interest (p. 15).

NETWORK TV BILLINGS IN 1954 show tremendous advance over 1953—\$320,154,274 vs. \$227,585,656—according to full-year PIB report (p. 16).

'PLOTKIN MEMORANDUM' STIRS TEMPEST: The far-reaching changes in networking practices as suggested by its counsel Harry Plotkin in his report to Senate Interstate & Foreign Commerce Committee this week are unlikely to find wholehearted endorsement by any sizeable segment of the current Congress or by the FCC.

The memorandum submitted by the former FCC asst. gen. counsel on basis of 4-month study for the committee is a staff report, signed only by Plotkin himself, and without stamp of committee approval. Nevertheless, memorandum does have deep significance -- and the key word for the future is "study." It is destined to become a focal point for \$100,000 Senate inquiry (see story, p. 2), a rallying point for many stations and a target for the big networks and some of their affiliates.

Neither Congress, FCC nor Justice Dept. can be expected to fall all over itself to comply with Plotkin's recommendations. On Commission level, it should be remembered that the present members have shown no disposition to support any such substantial changes in the status quo. Obviously, Plotkin himself hardly expects his recommendations to be adopted unchanged. Even during his tenure on Commission staff -- with a chairman, Wayne Coy, who frequently saw eye-to-eye with him -- he was unable to get FCC majority to go along with many of his ideas.

Much depends on the fervor with which Sen. Magnuson pushes for the recommendations. It's known he has received much mail from station operators and others -- but this is his first year as a "TV specialist." Plotkin's principal targets -- CBS & NBC -- are certain to get their innings before the committee, to tell their side of the story. Another critical factor is the new staff for the investigation; with Plotkin gone, the direction may change again.

Plotkin's most controversial proposals: (1) Modify or ban network option time. (2) Require networks to make affiliations available to any station serving "substantially different area" than that served by regular affiliate. (3) Restrict amount of time any vhf station in a market with fewer than 4 vhf outlets can devote

to each network. (4) Bar networks from acting as station reps. (5) Change affiliation contracts which "favor the networks," and make terms of contracts public.

He recommended further study of: (1) Whether networks should be permitted to own stations other than those required for origination of programs. (2) Multiple ownership rules, with suggested 3-station limit. (3) Divorcing TV & radio networks from common ownership.

As to the uhf problem, he said all-uhf allocation would have been preferable in the first place, but it's too late for that now. He strongly backed principle of "selective de-intermixture" and recommended that FCC reconsider all de-intermixture petitions which it has "summarily denied."

He asked that Justice Dept. study whether present network practices violate anti-trust laws and called on FCC to institute formal proceedings looking into AT&T cable-microwave line charges.

To increase uhf set circulation, Plotkin proposed modified form of the bill backed last fall by Potter communications subcommittee to exempt from excise tax all receivers containing uhf tuners. Plotkin version would provide exemption only if the manufacturer devotes entire TV output to all-channel sets, with certificate from a govt. agency required as proof that set will get all channels in home use.

[We have a limited number of copies of full text of Plotkin memorandum, and will send them to subscribers on request, on first-come-first-served basis while they last. For further details of report's highlights, see pp. 8-9.]

* * * *

Sen. Magnuson sent copies of report to FCC and to Justice Dept. for comments. Justice was asked to respond within 30 days, FCC to make "first preliminary report" in 30 days, interim progress reports at 60-day intervals, final report in 6 months.

Commission was asked if it agrees with report -- and if not, what corrections should be made. If it agrees it has authority to carry out recommendations, it's requested to report what it has done so far and to "furnish a detailed schedule showing specifically what further steps are planned for the future." If it doesn't believe it has authority, it's asked to recommend legislation.

* * * *

Only network comment on Plotkin memorandum came from CBS pres. Frank Stanton, who branded its network proposals as "mistaken, impractical and unwise." If they were adopted, he said, "network TV as it is known today would be gravely crippled and the public's investment of \$13.5 billion in receivers would be substantially depreciated." He added: "The failure to test theories against facts has resulted in unrealistic and extreme proposals. The memorandum attempts to resuscitate concepts and approaches which during the last decade have been specifically and uniformly repudiated by the Congress and the FCC."

Other networks declined comment, though one NBC official stated: "This is a report by one staff member, with no endorsement by any official group."

FCC Chairman McConnaughey will be questioned on Plotkin report when Committee holds hearings on his nomination, Magnuson indicated. He said an "early hearing date" will be set by committee next week, and that both he and Sen. Monroney (D-Okla.) have questions they want to ask McConnaughey.

TV PROBE PACED BY PLOTKIN MEMORANDUM: Sen. Magnuson's guarded endorsement of stern medicine for networks, as proposed in Plotkin memorandum (see story above), heralds a rough-&-tumble year ahead in Congress for telecasting industry.

Fanning the controversy will be next week's release of report by ex-FCC Comr. Robert F. Jones, co-counsel for the Senate inquiry under the aegis of former committee Chairman Bricker (R-O.). Jones is expected to push common carrier concept of networks and reiterate his dissent from FCC allocation plan -- and it begins to look as if industry's legislative representatives will be kept busy this session of Congress. Bricker, incidentally, has re-introduced his bill to give FCC control over networks (S-825), which was starting point for the whole investigation.

In his first public comments on TV problems, Chairman Magnuson (D-Wash.) gave

the distinct impression this week that TV investigation will be the major project of his Interstate & Foreign Commerce Committee.

The Senator's principal concern -- as he told press conference -- is for "the owners of the more than 30,000,000 TV sets, 55% of which have been purchased on credit." He is disturbed, he says, lest TV sets be "obsoleted even before they are taken home from the store" -- presumably by developments in uhf, color and fee TV.

More than \$100,000 will be spent for investigations of TV and other communications matters, Sen. Magnuson indicated this week -- or over half of the \$200,000 approved by Senate this week for 1955 Commerce Committee "studies & investigations." Senate's action permits the hiring of staff of 9 to investigate TV-communications, at total salaries of \$60,929 for year. Headed by chief counsel -- whom Magnuson says will be appointed within 2 weeks -- staff will include asst. counsel, research analyst, technical consultant, communications rate consultant, clerical employes.

Committee's TV investigations will cover just about everything from "abuses within the FCC" to televised boxing, according to Magnuson pronouncements -- but the contents of Plotkin report are expected to be keystone. While the Senator's formal statement on the report was non-committal, in answer to a question he declared: "I would say offhand that I approve a lot of it."

Neither Plotkin nor Jones will remain on staff for new investigation, both having returned to their private communications law practices. Inquiry is not due to begin until both FCC and Justice Dept. have had 30 days to give their opinions of Plotkin memorandum. But Magnuson's statements indicate the directions he currently wants the investigation to take.

He already has asked ex-Sen. Clarence Dill (D-Wash.), co-author of original Communications Act, to "take the Plotkin memorandum and make legislative recommendations for changes in the Communications Act." This assignment may well put Dill in a pickle, since Plotkin says in his report that he feels no legislation necessary, that FCC and Justice Dept. have "ample authority under present statutes."

* * * *

These are the phases of TV which need study, according to Magnuson's written and spoken views on the subject:

(1) FCC -- "It is now more than 2 decades since the Communications Act of 1934 was enacted. No comprehensive study or analysis -- no survey broad enough to appraise the developments in this field during the past 20 years -- has, to my knowledge, taken place during that time. [Congress and FCC have] a continuing responsibility to insure that law and regulations are kept abreast of the growth of the industry and the needs of the American people; that procedures do not serve bureaucrats and lawyers first and the people second or last..."

"I, myself, have been distressed by the delays in getting decisions from regulatory bodies like the FCC...I am informed that some Commission hearings have taken years to complete and that rules of evidence are followed which result in irrelevant and unnecessary testimony." Magnuson also said he was "concerned" about FCC's attitude toward newspaper ownership, but did not elaborate.

(2) Programming -- "This inquiry -- I suppose, one facet of it -- will go into programming," he told press conference. "We might have some very salient recommendations as to types of programming." He later modified statement to say that "the industry does a remarkable job of policing itself," and that his concern was mainly with "availability of programs."

(3) Spectrum utilization -- Military vs. civilian use of frequencies is "one of the things we're going to look into," he said at press conference. "What use are the military making of the parts of the spectrum suited to TV?"

(4) Subscription TV -- "It is already clear that many hundreds of American towns and cities will never have their own TV stations under the existing system... One proposal that has been advanced, with the support of many TV station licensees, is to authorize a fee system whereby viewers would pay for some programs...This toll TV (applications have been before the FCC for more than a year) will require some

study by this committee since it is pertinent to the uhf problem in particular and since the economic health of the entire TV industry is involved."

(5) Line charges -- "The committee also believes that constant surveillance must be maintained over common-carrier communications operations, such as the telephone service. It has noted in the past 2 years a mounting number of complaints from broadcast licensees on the high cost of interconnections for TV stations, coupled with an inadequacy of services to cities which do not lie athwart transcontinental cable and microwave lines."

* * * *

There's an aura of rivalry between Commerce Committee and Judiciary Committee, whose Chairman Kilgore (D-W.Va.) has announced "TV monopoly" investigation, which would appear to cover much the same ground as Magnuson's inquiry. Magnuson said this week he had conferred with Kilgore Feb. 1, and was assured latter's probe would be concerned only with "legalistic monopoly features" of network field. Magnuson speculated that Judiciary Committee does not have jurisdiction over much of the territory it has announced it will cover.

"There's bound to be considerable duplication," he said -- and then asked rhetorically: "Will the Rules Committee approve an appropriation for the Judiciary Committee after it has already approved one for Commerce for the same purpose?"

4 UHF's LEAVING AIR AS 2 VHF's BEGIN: New stations went on air in Jefferson City, Mo. and Fairbanks, Alaska, this week -- even as uhf WTRI, Albany, went dark, and Lou Poller's WCAN-TV, Milwaukee, and other uhf outlets in Oklahoma City and Charleston, W.Va. indicated they intend to call it quits, at least temporarily. Number of on-air stations thus will be reduced to 425, of which 114 are uhf. Week's starters:

KRCG, Jefferson City (Ch. 13), which becomes CBS affiliate Feb. 13, started test patterns Feb. 3, wires owner Mrs. Betty G. Handy. Call letters are in memory of her late father, Robert C. Goshorn, who applied for the channel before freeze. Family also controls local radio KWOS and Jefferson City Capital News & Post Tribune. RCA 10-kw transmitter and 500-ft. Stainless tower with 12-bay antenna are located at Callaway Hills Farm, 10 mi. SE of Columbia, where U of Missouri operates commercial KOMU-TV. Mrs. Handy is gen. mgr.; Ralph Rose, program director; Ed Schuelein, ex-WDAF-TV, Kansas City, chief engineer. Base rate is \$200. Rep is Hoag-Blair.

KFAR-TV, Fairbanks (Ch. 2) began test patterns Feb. 2, plans program debut on March 1, wires Al Bramstedt, gen. mgr. of licensee Midnight Sun Bcstg. Co. Station changed its call letters this week from KFIF, claims to be "northernmost TV station in the world by 150 ft." Second Fairbanks outlet, KTVF (Ch. 11), is due to start in week or so. Midnight Sun recently bought control of KFAR-TV and KFIA, Anchorage, for \$100,000 from Richard R. Rollins, who retains 19% (Vol. 10:47 & 11:1). Principal owner is Lathrop Co., operating 4 Alaska AM stations and other Territory enterprises. KFAR-TV has 2-kw RCA transmitter, 3-bay antenna on guyed tripod tower atop Lathrop Bldg. Base rate is \$150. Reps are Weed and Moore & Lund (Pacific northwest).

* * * *

Network problems and vhf competition are blamed for week's uhf casualties. WTRI, Albany-Schenectady-Troy (Ch. 35) attributed its Jan. 31 suspension to loss of CBS affiliation to WROW-TV (Ch. 41). Headed by Col. Harry C. Wilder and half-owned by Stanley Warner Theatres, WTRI started last Feb., later built new studios, bringing investment close to \$1,000,000. WTRI has been protesting sale of WROW-TV to group headed by Lowell Thomas, alleging that he had "secret" agreement with CBS to switch affiliations. Last week, in appeals court, WTRI counsel Paul Porter sought stay of sale, stating WTRI would go off air if switch in affiliation went into effect Feb. 1. Court denied stay. FCC is considering protest, has scheduled oral argument Feb. 14.

WCAN-TV, Milwaukee (Ch. 25) plans to suspend operation Feb. 20, when new CBS-owned WXIX (Ch. 19) starts operating there under mgr. Edmund C. Bunker, ex-KNXT, Los Angeles (Vol. 11:5). Managed and principally owned by Lou Poller, WCAN-TV as a CBS affiliate was reputed to be one of most successful uhf operations, having earned net profit of \$174,000 in first 10 months of 1954 (Vol. 11:5). CBS crew takes over WCAN-TV studio and transmitter site under \$650,000 deal to purchase its physical facilities

coincidental with CBS purchase of WOKY-TV (Ch. 19) for \$350,000 (Vol. 10:43). Though WOKY-TV's former studios go to Poller, he has gone to Florida until April, has dismissed mgr. Burt Levine and staff as of Feb. 20. Last week Poller asked FCC permission to sell unprofitable radio WCAN to owners of local WEMP (Vol. 11:5).

WKNA-TV, Charleston, W.Va. (Ch. 49), which went on air in Sept. 1953, reverts to CP status Feb. 12. Owner Joe L. Smith blamed vhf competition and difficulties of uhf propagation in mountainous terrain. "We've got to stop and take bearings," he asserted. "After all, it's very hard to try to shoot a bear for yourself if you're armed with a BB gun and the rest of the party have high-powered rifles -- especially when you're after the same bear." Smith said he will not dispose of his equipment, in hopes of resuming telecasting. He says he has no immediate plans to exercise 40% option he holds for WOAY-TV, Oak Hill (Ch. 8), with which he had joint time-selling arrangement. He intends to concentrate on his AMS in Charleston and Beckley.

KMPT, Oklahoma City (Ch. 19), which has been in receivership for nearly year, got FCC permission Feb. 4 to go off air. Local attorney Everett Cotter is receiver. Station went on air in Nov. 1953, was headed by Byrne Ross (KLPR), principally owned by theatreman R. Lewis Barton.

PUSHING BACK THE ELECTRONIC FRONTIER: "Electronic music synthesizer" -- a startling new device that can create any sounds known or imagined by man, including those produced by voice or by any musical instrument -- was unveiled this week by RCA chairman David Sarnoff, speaking before the American Institute of Electrical Engineers.

It was a startling addition to progress reports on 3 devices which in 1951 (Vol. 7:39) he challenged RCA scientists to develop by 1956 when he observes his own 50th year in electronics, namely: (1) TV tape recorder. (2) Light amplifier. (3) Electronic air conditioner.

Gen. Sarnoff disclosed progress on the tape recorder in 1953 (Vol. 9:49) and on the light amplifier last year (Vol. 10:52). They literally indicate reality out of fantasy -- but his demonstration of the "synthesizer" via film and tape recording produced effects that left observers awestruck.

Wrote N.Y. Times music critic Howard Taubman: "The piano tone this observer heard in an excerpt from a Chopin Polonaise was like that of a Steinway grand. A Bach excerpt was close enough to a clavichord to be credible. 'Holy Night' was played as though an electric organ had been used. A Stephen Foster medley was made to sound as if it came from a believable hillbilly band."

"It can mimic any instrument electronically," wrote Herald Tribune's J. S. Harrison, "and only an extremely sensitive ear could detect discrepancies in tone. There were moments when the peculiar sonority of an electronically produced tone was discernible...But in the simulation of instruments of the piano family, the synthesizer performed like a concert grand."

* * * *

Everyone's imagination was jarred into action. Some visualized creation of a complete symphony without musicians, or an aged singer re-creating his voice in the full vigor of his prime -- or even the fabrication, for psychological warfare, of a speech that was never delivered, in the voice of any desired person. Others looked for more immediate uses in helping the deaf to speak, in teaching musicians, in recording and reproducing sound, in improving communications of all kinds.

Principle of synthesizer is that any sound can be broken down into specific components -- frequency, intensity, growth, duration, decay, etc. -- and that these can be created individually and combined electronically to produce any sound. The "composer" presses series of keys, like those on typewriter keyboard, punching a tape. Tape activates some 300 circuits, producing the sound.

System is very complicated at present, involves some 2 tons of equipment. The sound of only one instrument or voice can be produced at one time -- so it would require tedious re-runs of tape to build up effect of orchestra or choir.

Despite capabilities of the synthesizer, Gen. Sarnoff carefully reminded: "The vital factors of correct 'interpretation' of the music written by the composer

-- the heart, the soul and the mood of the composition -- will continue to be the task and function of the human being who synthesizes the music from the score."

Development was under direction of Dr. Harry F. Olson, the genius in acoustics who also supervised work on TV tape and recently described method of reducing noise by projecting sounds out of phase with the noise.

* * * *

An electronic cooler without moving parts, also disclosed by Gen. Sarnoff, was of greater commercial interest. Employing principle discovered more than 120 years ago by French physicist Jean Charles Peltier, RCA scientists have built a device capable of making 6 oz. of ice. It was made clear that commercially practicable refrigerator, freezer or air-conditioner is still in future.

Peltier discovered that a cooling or heating effect was produced when electric current passed through dissimilar metals. This has remained only a "scientific curiosity," Sarnoff said, until recent discoveries in solid-state physics and new alloys made possible greater and greater cooling effects.

Memorandum submitted by RCA's Nils E. Lindenblad stated that best performance achieved prior to RCA's work was temperature drop of 9 degrees Centigrade. "The new alloys developed by RCA," he said, "achieve a temperature drop several times greater, and our continuing quest for improved materials so far has discovered no indication that a limit has been reached." At present, running water is used to carry away heat produced in cooling process, but Lindenblad reported "encouraging progress" in development of a closed system would make possible self-contained unit such as is used in standard room air-conditioner. Goal is to dispense with moving parts completely -- even eliminating fan in air-conditioner.

* * * *

Prototype TV tape equipment is now being installed at NBC, Gen. Sarnoff said, and he stated that "TV tape recorders for home use are certain to be developed in the future. These will enable the TV set owner to accumulate a library of favorite TV programs which can be seen whenever desired, in the same way that a library of phonograph records now makes it possible to hear favorite records at will."

Dr. Olson's memorandum outlined 3 areas in which tape has been improved: (1) System can now accept and reproduce standard NTSC color signal. (2) Tape speed has been cut from 30 to 20 ft. a second, bringing in sight goal of 19-in. reel with 15-min. program. (3) Fidelity, steadiness and freedom from noise are improved.

Light amplifier was discussed only briefly, having been described recently (Vol. 10:52). Visualizing "mural television," with thin screen on wall, Gen. Sarnoff stated: "Indeed, simplicity, compactness and flexibility will be the features of TV in the future. The electronic light amplifier and tiny transistors...will eliminate the need for using the picture tube and all other electron tubes in a TV set."

Summarizing his report, Gen. Sarnoff told the engineers: "You may wonder what philosophy prompts me to reveal these new developments publicly while they are still in the experimental stage...We welcome competition. It spurs our own activities and increases the possibilities for earlier achievement of desired results...Whether we succeed in completing an invention before others whom we stimulate to work along similar lines, is not as important as it is to bring a new product or a new service into existence and use.

"In helping industry grow and prosper, we believe that we contribute to the public benefit and in the long run, our own as well. If an organization is to progress it must not stand in fear of obsolescence or competition."

Transatlantic TV cable, made possible through use of transistors, is definitely in realm of possibility, Bell Labs pres. M. J. Kelly told AIEE meeting in New York this week. Such cable, he said, "is a long-range goal worthy of serious study and by no means to be dismissed as impractical of eventual attainment." Phone company officials say transatlantic cable now being laid has much too narrow bandwidth for TV.

Next closed-circuit sessions are Feb. 8 and 9, both featuring talks by President Eisenhower. On Feb. 8, ABC is handling 35-city hookup for Crusade for Freedom. On Feb. 9 Smith, Kline & French pharmaceutical labs is sponsoring one of most elaborate hookups to date, handled by TNT—a "Videoclinic" feeding President's talk and clinical sessions to physicians in 31 cities, with originations in Boston, Cleveland, Washington and New York.

Personal Notes: Linus Travers, who resigned Dec. 1 as Yankee Network exec. v.p., in charge of WNAC-TV, Boston, among other General Teleradio properties, named exec. asst. to John C. Dowd, pres. of ad agencies John C. Dowd Inc., Boston, and Dowd, Redfield & Johnstone Inc., N. Y. . . . Luther Alva Pierce Jr., ex-CBS, N. Y., named technical operations mgr., WBBM-TV, Chicago, succeeding Joseph Novy, who recently bought radio WJOL, Joliet, Ill. . . . Robert Heuberger, from CBS, N. Y., named chief engineer of CBS's new uhf WXIX, Milwaukee (formerly WOKY-TV) . . . Wm. Alcine promoted to production mgr. of KNXT, Los Angeles, succeeding Leon Drew, now program director of WXIX; Miss Alberta Hackett named KNXT production coordinator . . . James Denning, from legal dept., named mgr. of NBC talent & program contract operations, reporting to v.p. Gus Margraf . . . Jay Eliasberg, ex-ABC and Foote, Cone & Belding, named CBS research projects supervisor, reporting to research director Oscar Katz . . . Stanley H. Durwood, pres. of KEDD, Wichita, takes over as gen. mgr., as John North resigns to return to east . . . John H. Reese named mgr., WATE, Knoxville . . . Shaun F. Murphy, ex-WFIE, Evansville, Ind., named station mgr., WTVP, Decatur, Ill. . . . Red Barber resigns as CBS sports consultant to devote full-time to free lance sportscasting . . . Andrew P. Jaeger, onetime DuMont film director, promoted to sales v.p., Prockter Television Enterprises Inc. . . . Robert Marchman, ex-WMBR-TV, Jacksonville, named asst. chief engineer, WFLA-TV, Tampa . . . George C. Castleman, ex-mgr. of sales development, CBS Spot Sales, joins reps Free & Peters . . . Claude Garneau heads CBC's new centralized TV-radio casting & auditioning bureau in Montreal . . . Robert Nashick, ex-Loew's MGM, named adv. mgr., WGBS-TV, Miami . . . Keith Baldwin resigns as sales mgr., WAKR-TV, Akron . . . Victor M. Ratner, McCann-Erickson v.p., conducts seminar on communications at U of Chicago starting Feb. 21 under title "Six Levels of Communications" . . . Don Staley, mgr. of Weed & Co. San Francisco office, promoted to west coast operations mgr., Hollywood, replacing late Lincoln P. Simonds . . . George Prideaux named TV-radio director, Michael Newmark Adv., N. Y. . . . Garfield C. Packard resigns as Raymer v.p. & gen. mgr., Chicago, to become pres.-gen. mgr. of radio KICA, Clovis, N. M., purchased last year from DeWitt Landis . . . Howard Garland, ex-KFMB-TV, San Diego, named program director of KCMC-TV, Texarkana, Tex. . . . Robert S. Kieve, special asst. in White House and onetime CBS-TV promotion dept., named special asst. in office of Theodore C. Streibert, director of U. S. Information Agency.

John Dunn, ex-program director, CBOT, Toronto, now asst. to CBC director of program coordination, has been awarded the Imperial Relations Trust Bursary for 1955, enabling him to study operations of BBC and European broadcasting organizations under an endowment designed "to strengthen the ties that bind together the countries of the Commonwealth." He sails for England Feb. 8. The bursary previously was held by S. R. Kennedy, now CBC regional director for the Maritimes; J. D. Nixon, program director for British Columbia; Almont Tilden, CBC Toronto announcer.

Co-equal winners of Voice of Democracy essay contest, sponsored by RETMA & NARTB for high school students for 5-min. script on subject "I Speak for Democracy," are: Judy Abramson, 17, Yuba City, Cal.; Avron Maletsky, 16, Schenectady, N. Y.; Catherine Styles, 18, Minneapolis; Dwight Walker, 17, Oskaloosa, Ia. Each will get \$500 check toward college scholarship, TV receiver donated by a manufacturer and will be guests of RETMA & NARTB in Washington & Williamsburg, Va. week of Feb. 17. Annual awards luncheon will be Feb. 23 in Washington's Shoreham Hotel.

"Jones Report" to Senate Interstate Commerce Committee, due to be submitted next week by ex-FCC comr. Robert F. Jones (see p. 2), is expected to attack FCC's allocation plan and reiterate his dissent from the plan. In dissent, Jones contended that best allocation would be a "triangular lattice" with stations spaced equidistant throughout country. As if to anticipate Jones' report, FCC Broadcast Bureau chief Curtis Plummer this week had this to say about such a plan, during speech on allocations at AIEE meeting in New York this week: "If we had drawn up our assignment plan in 1945 in this manner, I don't think you would have had 35,000,000 receivers in circulation today. In fact, TV probably would never have gotten off the ground. In 1945, prospective TV broadcasters were gun-shy. Only a few operators were willing to take the gamble and then only in the largest cities." If starting from scratch now, would "lattice" be best? Plummer said: "In addition to geographic objections, such as utilization of favorable sites and avoidance of airplanes, we would be confronted with the desirability of placing the strongest signal in the cities, to overcome man-made noise. Unfortunately, our cities are not uniformly spaced."

Determined to get unused FM frequencies for industrial use, National Assn. of Manufacturers petitioned FCC to allocate FM channels on geographical shared basis permitting use of 92-108 mc by manufacturers and other mobile radio users. It is claimed that 621 FM frequencies are unused; that 235 of these could furnish 732 mobile radio channels while leaving 293 for additional FM stations. Petition was filed by radio committee chairman Victor G. Reis and exec. asst. Frank M. Smith, through counsel Jeremiah Courtney and consulting engineer George Adair. Last year (Vol. 10:6), Commission turned down group's efforts to obtain use of 460-462 & 468-470 mc. If Commission shows any disposition to take frequencies from FM, TV interests are bound to compete with manufacturers in effort to obtain them.

WTOV-TV, Norfolk, Va. (Ch. 27), off air since last Oct. 3, is being sold to Baltimore auto dealer Temus Bright (Tim Brite Inc.) for \$16,500 plus assumption of \$63,021 RCA equipment debt. Application filed with FCC lists equipment as having book value of \$87,810 after allowing nearly \$48,000 for depreciation. Bright also agrees to pay \$15,000 for lease-purchase option for tower site WTOV-TV has been leasing from operators of Portsmouth's WAVY. Plans are to return station to air "for a limited period using only test patterns, film & network, if available." Purchaser plans to resume regular programming "as soon as satisfactory arrangements are made for studios, and the assignee is satisfied with the quality of transmissions."

Congressional probe of fraudulent TV-radio advertising, similar to current local investigation by grand jury in N. Y. (Vol. 11:4-5), was urged this week by Rep. Dollinger (D-N. Y.) in resolution (H.Res. 127) referred to House Rules Committee. His proposal would call for investigation by House Commerce Committee to determine (1) extent of "false, fraudulent, misleading and deceptive advertising"; (2) what steps are being taken by TV-radio stations to stop it; (3) policy of FCC in renewing licenses of stations which "make no effort to protect the public."

Charged with one more station than it believes it should be under multiple ownership rules, Westinghouse asked FCC to amend rules so that director Dillon Anderson's 2.8% of KTRK-TV, Houston, isn't counted. It requested that rules be changed so that a stockholder's interest isn't counted if he owns (1) 1% or more in a company with more than 50 stockholders, or (2) 5% or more in a company with 50 or less stockholders, or (3) "be shown to control, or have a substantial voice in the control and management." KTRK-TV has 34 stockholders.

BUILDING OWN transmitter and studio equipment, WTUV, Tupelo, Miss. (Ch. 9)—headed by 2 TV industry engineers—is aiming for Sept. 1 test patterns and Sept. 15 programming. Mgr. and partner F. K. Spain, engineering director of WHEN-TV, Syracuse, writes: "We propose using a custom-built 5-kw transmitter which has been constructed and is presently undergoing engineering tests and adjustment. We expect to deliver this transmitter to our site in Tupelo by May 15. We are also building 4 live camera chains in our shop in New York City along with custom design video switching and special effects equipment." Group is negotiating to buy existing building for studio and transmitter housing, plans to use GE antenna on 300-ft. self-supporting tower. Director of engineering, also a partner, is J. G. Petit, N. Y. TV development engineer for NBC. Rep hasn't yet been chosen.

RCA shipped 2-kw transmitter Feb. 3 to KGMB-TV, Honolulu, for upcoming Ch. 3 satellite at Wailuku, Maui, due on air in April. Also shipped Feb. 3 was RCA 2-kw standby transmitter for WGR-TV, Buffalo (Ch. 2). GE shipments this week were 12-kw transmitter and 5-bay helical antenna to upcoming educational WTUVS, Detroit (Ch. 56), and 12-bay antenna to KVTU, Sioux City (Ch. 9). GE reports order for 5-kw transmitter and 12-bay antenna for WSJS-TV, Winston-Salem, N. C. (Ch. 12).

* * * *

In our continuing survey of upcoming stations, these are latest reports received from principals:

KFDM-TV, Beaumont, Tex. (Ch. 6), which got FCC go-ahead last week after being "stayed" by protests, now plans test patterns last week in March, April programming as CBS basic, also using NBC & ABC shows. Exec. v.p.-gen. mgr. C. B. Locke reports 10-kw RCA transmitter

installed and foundations ready for 608-ft. Emsco tower, due for completion with 12-bay RCA antenna early in March. It will be first local competitor for KBMT (Ch. 31), which began last April. Base hour will be \$300. Rep will be Free & Peters.

KLIX-TV, Twin Falls, Ida. (Ch. 11), plans mid-March test patterns, according to v.p.-gen. mgr. Frank C. McIntyre. Frank Carman-Grant Wrathall group owns 50%, also has interest in KUTV, Salt Lake City and CP for KWIK-TV, Pocatello (Ch. 6). KLIX-TV found going too slow when it tried to build all equipment in Salt Lake City workshop operated jointly by Carman-Wrathall stations, has purchased from RCA the 5-kw DuMont transmitter and RCA 6-bay antenna formerly used by WFAA-TV, Dallas. It also has old GE microwave link from WBKB, Chicago. All studio gear has been installed and 250-ft. tower furnished by Salt Lake City workshop is ready on Flat Top Butte. Base rate will be \$120. Rep will be Hollingsbery.

* * * *

CHEX-TV, Peterborough, Ont. (Ch. 12), now plans March 1 test patterns, March 10 programming, writes mgr. Don R. Lawrie. It had RCA 10-kw transmitter due Jan. 15, and Canadian Bridge Ltd. is scheduled to have 400-ft. tower with 12-slot wavestack antenna ready Feb. 20. Owners Senator W. Rupert Davies (51%) and publisher-broadcaster Roy Thomson also operate CKWS-TV, Kingston, Ont. Sen. Davies publishes *Peterborough Examiner* and *Kingston Whig-Standard*. Mr. Thomson recently was reported bidding for commercial TV in Scotland, where he publishes the *Glasgow Scotsman* (Vol. 10:50). CHEX-TV tentative base rate is \$170. Reps will be Weed and All-Canada.

HIGHLIGHTS of proposals contained in memorandum submitted by special counsel Harry Plotkin to Chairman Magnuson of Senate Interstate & Foreign Commerce Committee and sent to FCC and Justice Dept. for comments (see pp. 1-4):

De-intermixture—"The Commission should be requested to re-examine the petitions for de-intermixture which have heretofore been rejected and to report back to the committee within 30 days whether there are any public-interest factors involved in rejecting these petitions [together with] a detailed statement setting forth the specific steps it proposes to take with respect to the uhf matter."

Uhf receivers—Favors proposal to grant excise tax relief only to manufacturers who market all-channel sets exclusively, with certificate from govt. agency required as guarantee that set "is in fact capable of receiving all TV channels under normal home viewing conditions."

Network exclusivity & contracts—Discards common-carrier concepts as unworkable, out of keeping with American broadcasting system and destructive to networks. Favors "Associated Press case" approach, citing Supreme Court decision in AP case. "The same reasoning would compel the conclusion that network TV service likewise should be made available to all applicants on a non-discriminatory basis, subject only to the exception that the network need not make an affiliation available where to do so would be to create a substantial duplication of that network's service. . . ."

"Networks should be required to publish and file with FCC the standards they purport to follow in determining what is excessive duplication in the awarding of affiliations. FCC should approve, disapprove or modify the standards so submitted. Any station complying with the published standards would be entitled to an affiliation on a non-discriminatory basis so far as compensation

and other terms of the affiliation are concerned. The Commission should set up a procedure to insure that network programs not carried by a regular affiliate should be made available to other stations." Serious consideration should be given to opening for public inspection some of the reports and information filed with FCC by licensees and networks—including affiliation contracts. "The present policy as to confidentiality impairs the bargaining ability of affiliates in their dealings with the networks. . . ."

Exclusivity of affiliation—"Some reasonable restriction on station choice as to network programs must be devised if we are to have the maximum utilization of TV in the public interest . . . The Commission should undertake to enumerate those markets in the U.S. with fewer than 4 facilities of relatively equal desirability, whose availability are important for network operation. [Then], provision should be made that not more than a certain percentage of the station's time in each of the segments of the broadcast day [may] be made available to the 2 dominant networks, NBC & CBS, for the purpose of carrying their programs."

Time options—"It cannot be gainsaid that we would have a healthier situation if some means could be devised whereby the sources of good programming could be expanded so that the dependence which TV stations now have on the networks could be mitigated . . . If the national spot advertiser could be assured that once his program was placed on a station it could not be displaced to make way for a network program, it is entirely possible that more time, money and effort would be expended by national advertisers in developing good programs that would be available on a national spot basis . . . Present time-clearance arrangements give an artificial advantage to the network. If the vulnerability of national spot business were removed and if time availability for such business could be made as firm as it is now for advertisers

using the networks, an incentive would be created for advertisers, agencies the national spot representatives, the producers of film for TV and others to develop good programs for presentation on a national spot basis as well as for network purposes. If that should occur, the sources of good program material would become much more diversified and stations could be relieved in great part of the present dependence on the networks . . . In order to make this objective possible, the option-time rule should be modified or abolished. . . ."

Networks as spot reps—"The national spot representatives and networks are competitors for the advertising business of the national advertisers." CBS's & NBC's practice of serving as representatives for some of their affiliates "effectively denies to national advertisers in many markets any opportunity of dealing with 2 vigorous competitors each seeking business for his medium — network or national spot — and limits the advertisers' choice to one organization representing both media." Practice is also unfair competition to national spot representatives.

Line charges—"The Commission should undertake at the earliest practicable date an examination of the reasonableness of the telephone company charges relating to broadcast operations and of the proposals for cheaper services to sparsely settled areas."

AM-TV network ownership—"The Commission should give continuing consideration" to question of ordering separation of AM & TV network ownerships, although it may be too early for such a move.

Network ownership of stations—"If the networks are correct in insisting that ownership of stations is essential in order to support the operation of networks, there is no substitute for injecting the Govt. into the role of specifying the rate of return the networks are entitled to earn. We believe that this is not the basis upon which network ownership of stations should be considered. Ownership of stations in talent centers like New York, Chicago and Los Angeles has historical justification. Most careful consideration should be given as to whether the ownership of additional TV stations by the networks is justifiable."

Multiple ownership—"Serious consideration should be given by the Commission to a re-examination of its policy with respect to ownership of stations so as to determine whether 3 TV stations are the maximum which any one group should be permitted to own. In addition, a careful study should be undertaken as to whether multiple owners have abused the power inherent in the ownership of multiple stations by securing desirable affiliations by methods which constitute violations of the anti-trust laws."

Duration of network contracts—"Present regulations of the Commission permit a maximum of 2 years for network affiliation contracts—although the license period is 3 years. It is quite common for the networks to use a form of contract which binds the affiliate for the maximum period but which permits the network to cancel before the end of the term. It is difficult to see how such lack of mutuality can be justified."

Implementation—"It is our present opinion that legislation is not needed since the agencies of the Govt. have ample authority under present statutes to deal with the problems . . . We believe that the matter should be referred to the FCC and Dept. of Justice for appropriate action. This conclusion is reinforced by the fact that the implementation of the solutions suggested here requires large trained staffs. Both the Commission and the Dept. of Justice have such staffs which are accustomed to dealing with these problems. The Senate Committee on Interstate & Foreign Commerce does not have such facilities. . . ."

Network Accounts: New Walt Disney film program, *Mickey Mouse Club*, which debuts on ABC-TV Oct. 3, Mon.-thru-Fri. 5-6 p.m., got first sponsors this week—General Mills and Campbell Soup each signing for 15-min. segments across board. In addition, Derby Foods, currently alt. sponsor of *Disneyland* on ABC-TV, is reportedly interested in third 15-min. segment . . . **Plugging children's shows**, ABC-TV also has asked Burr Tilstrom, whose *Kukla, Fran & Ollie* is sold as co-op on network, to draw up a new puppet program aimed at youngsters for Sat. morning . . . Nestle Co. to sponsor *Stage Show* on CBS-TV starting in fall, Sat. 8-8:30 p.m., thru Bryan Houston Inc., N. Y.; starring Dorsey brothers, show is produced by Jackie Gleason Enterprises and will precede Gleason's own show, *The Honeyymooners*, 8:30-9 p.m., for which Buick recently signed \$11,000,000 2-year sponsorship contract (Vol. 10:52) . . . **Comedy & more comedy** is NBC-TV's weapon in upcoming battle with Jackie Gleason for ratings in Sat. 8-9 p.m. period this fall; it tentatively plans to shift *George Gobel Show* from current 10-10:30 p.m. to 8-8:30, with 8:30-9 period filled by such guest stars as Jimmy Durante, Larry Storch and others—or, as alternative, it's considering new single comedy show from 8-9 . . . Procter & Gamble, after 6 years of continuous sponsorship, to cancel *Fireside Theatre* at end of current season on NBC-TV, Tue. 9-9:30 p.m., plans to replace it with comedy show, thru Compton Adv. . . Crane Co. (plumbing equipment) buys one partic. a week for 25 weeks on *Panorama Pacific* on CBS-TV's Pacific network, starting Feb. 22, Mon.-thru-Fri. 7-9 a.m., thru Leo Burnett Co., Chicago; Kretschmer Corp. (breakfast cereal) 2 partic. a week for 13 weeks, starting Feb. 7, thru Gleason Adv., Detroit . . . CBS-TV retains *Life with Father* for 13 more weeks as sustainer, *Pet Milk* having dropped out as sponsor Jan. 4, when it switched to *Red Skelton Show*.

Non-consumer industries should undertake major TV campaigns in support of the end products of their customers—and color is a good place to start. So said NBC pres. Pat Weaver this week in address to Detroit Economic Club urging automotive industry suppliers to lead the way in color, which he said would play a "key role in enriching the nation's economic and social life." He defended concept of irregularly scheduled programming, citing high ratings achieved by color spectaculars and such black-&-white shows as *Martha Raye Show*, *Bob Hope Show*, etc. He added that NBC, through flexibility in sales and programming patterns, is building system which will permit advertisers of all sizes to tailor TV to their budgets.

Influence of TV was a major factor in Supreme Court's ruling this week that boxing is subject to anti-trust laws, setting stage for monopoly suits by Govt. against International Boxing Club. Court ruled that widespread use of TV-radio & motion picture contracts by boxing promoters put sport in interstate commerce. Philip Elman, special asst. to attorney general, had argued that promoters get most of their income from rights to interstate TV and as far as they were concerned "fights might just as well be put on in TV studios."

Lucky Strike is first sponsor to sign for CBS-TV's "Extended Market Plan" for network programs to small-city affiliates at minimum cost to station & sponsor (Vol. 10:49), buying all 15 stations which have signed for EMP for its *Jack Benny Show* & *Private Secretary*, which alternate Sun. 7:30-8 p.m., thru BBDO. It's effective Feb. 6.

Rate increase: WKOW-TV, Madison, Wis., on March 1 raises base hour from \$200 to \$250, min. \$40 to \$50. Rate change: WFMZ-TV, Allentown, Pa. (Ch. 67) reports its current base hour is \$120, rather than the \$440 reported in *Factbook No. 20*; latter is a projected rate predicated on future 100% conversion of 110,000-200,000 sets.

NEW CPs ARE RARE nowadays, but FCC managed 3 of them this week. WSAV was awarded Savannah's Ch. 3, in final decision over WJIV, while Great Commission Schools Inc. (religious education) was granted commercial Ch. 61 for Anderson, Ind. and Puerto Rico's Dept. of Education received CP for educational Ch. 6 in San Juan. Also issued this week was examiner Isadore A. Honig's initial decision recommending grant of Ch. 5, Bristol, Tenn.-Va. to WCYB over WOPI.

FCC chose WSAV in Savannah because of "its past performance as a licensee in the Savannah area; the fact of local residence of its principals considered in connection with their participation in community affairs; and the integration of its owners with the management and operation of the proposed station." Commission concurred partially in WJIV's charge that WSAV had started construction before getting CP, told WSAV it couldn't use 3 steel sleeves installed on Liberty National Bank Bldg.

Though Honig found that WOPI had better program proposals and greater civic activity, he felt there were "deficiencies" in its past operations. In addition, he considered WCYB superior in local ownership, management-ownership integration, diversification of media ownership.

Way was cleared for Ch. 7 grant to WDBJ in Roanoke, meanwhile, when WROV agreed to dismiss upon payment by WDBJ of \$245,021 for assets of defunct WROV-TV (Ch. 27). Agreement calls for \$81,674 payment upon dismissal of WROV application, \$163,347 within 10 days after grant to WDBJ.

First efforts of theatreman L. F. Gran to block sale of WTVW, Milwaukee (Ch. 12) to Hearst Radio (Vol. 11:5) were rebuffed by FCC when it returned Gran's application for Ch. 12, stating that channel had already been granted and that Gran still owns part of WTVW. At Hearst's request, meanwhile, Commission dismissed its application for Ch. 6 in nearby Whitefish Bay, Wis.

In 3-way contest for New Orleans' Ch. 4—WWL, WNOE and WTPS competing—FCC's Broadcast Bureau asserted that WNOE principal ex-Gov. James A. Noe hadn't shown he was financially qualified to build. Noe's counsel argued that his net worth of over \$1,800,000 is ample evidence of financial ability.

Albany, N. Y. battle became even more acrimonious this week. WTRI (Ch. 35) has gone off air (see p. 4). GE

objected vigorously to WTRI's de-intermixture proposal to shift WRGB from Ch. 6 to Ch. 17. GE asserted that public would be great loser if shift were made, that station lost 7 times the \$300,000 loss reported by WTRI before WRGB turned profit corner. WMGT, Adams, Mass. (Ch. 19) objected to proposal of WROW-TV (Ch. 45) that Ch. 10 be assigned to nearby Vail Mills, N. Y. Another contender in the battle royal appeared, meanwhile, when Walter C. Neals, who has worked for several Albany area radio stations, heartily urged the Ch. 10 allocation, said he'd form group to apply for it if it were assigned.

NBC's projected purchase of WKNB-TV, New Britain, Conn. (Ch. 30) doesn't look as if it will breeze through—what with New Haven's WNHC-TV (Ch. 8) and several uhfs in area planning to protest to FCC, objecting strenuously to losing NBC-TV programs. Due to handle protest is Paul Porter, who is counsel for WTRI in its fight against CBS.

In other areas, there were more attempts of uhf operators to obtain vhf or to move to bottom of uhf band. KEDD, Wichita (Ch. 16) sought assignment of Ch. 8 to Hutchinson, said it would apply for the channel if it's assigned. It would accomplish changes by shifting Kansas State College's grant from Ch. 8 to Ch. 58, substitute Ch. 8 for Ch. 18 in Hutchinson, Ch. 58 for Ch. 8 in Manhattan, Ch. 35 for Ch. 8 in Woodward, Okla. KEDD claimed that transmissions of KAKE-TV, Wichita (Ch. 10) interfere seriously with reception of KEDD on sets with strip converters.

KCCC-TV, Sacramento (Ch. 40) hopes to shift to Ch. 16, asking Commission to assign Ch. 16 to Pittsburg-Antioch, substituting Ch. 15 for Ch. 16 in Red Bluff and Ch. 56 for Ch. 16 in Santa Cruz.

Another determined effort to achieve de-intermixture was made this week by WFIE, Evansville, Ind. (Ch. 62) and WEHT, Henderson, Ky. (Ch. 50), when they petitioned Commission to reconsider its action denying their request that Evansville's Ch. 7 be made educational. This time, they also asked that Ch. 9 be deleted from Hatfield, Ind.

Application of WJMR-TV, New Orleans, to shift from Ch. 61 to Ch. 20 was granted along with authorization to hike power to 1000 kw, while grantee WOOK-TV, Washington, D. C. (Ch. 50) applied for newly-assigned Ch. 14.

D. R. ALLEN B. DuMONT gave his imagination free rein this week when he delivered speech titled "The Look Ahead With Electronics" to Los Angeles Chamber of Commerce Feb. 2. He covered not only current TV-electronic developments but even most distant possibilities—and insisted we're living in the "Electronic Age" rather than the "Atomic Age." Among topics discussed:

(1) "Piggy-back" combination TV-film camera. Stating he believes DuMont has technical problems licked, he said: "When we complete our work, it will be possible for motion picture companies to operate with the technical efficiency of TV studios—reducing picture costs by a fantastic amount." Similarly, he added, TV networks will be able to distribute high-quality film versions of live shows instead of kines; latter is one of DuMont Network's main hopes for maintaining technical quality of service to affiliates despite heavy cutbacks in live network hook-ups (Vol. 11:1).

(2) Industrial TV. "The future uses of TV in fields other than entertainment are, in my opinion, greater than the actual on-the-air medium," Dr. DuMont said. "At DuMont we are building a complete sales force to tell the story to industry of what industrial TV can accomplish in commerce, education, industry and in medicine."

(3) Color. "Cost problems relative to the picture tube

and the entire receiver have got to be brought into line so that color sets can be priced no more than \$200 over comparable black-&-white sets," Dr. DuMont stated. "Color for almost every American home will become a reality," he said, but he declined to predict when.

Venturing into military potentialities of electronics, Dr. DuMont said: "Every new weapon of destruction that has been perfected in the past has been followed by some defense apparatus to equalize the gain. In my opinion, the time is not far off when electronic devices will provide an almost certain defense against atomic attack."

Turning to auto traffic problems, he stated: "It is surprising to me that such small use of electronics has been made. . . . A number of proposals have been made which would control the speed and separation of cars on the highways, allowing the passengers complete relaxation while traveling with much greater safety than at present."

Dr. DuMont even conjectured that electronics may be employed to influence the mysterious workings of the brain itself. "There are indications," he stated, "that electrical impulses are generated by the brain and also that electrical impulses cause the brain to perform certain functions. Possibly with further knowledge, an electronic process may be found that is able to impart information to the brain which would greatly simplify learning processes."

Telecasting Notes: A \$13,000,000 deal whereby Guild Films purchased exhibition contracts of Matty Fox's Motion Pictures for Television, representing distribution of 700 feature films and with it MPTV's entire sales force, was disclosed this week. Signed by Fox and Guild pres. Reub Kaufman, agreement establishes a new Guild subsidiary, MPTV Films Inc., which now can offer to stations—especially its collaborating Vitapix group—TV's biggest library of features, including some of Hollywood's top names. MPTV v.p. Erwin Ezzes moves over to Guild as v.p. in charge of feature film operations, reporting to sales v.p. Manny Reiner. MPTV henceforth will function only as producing and investing organization . . . Two more major studios will be in TV film production by midyear and within 2 years "every studio in Hollywood will be making pictures for TV," says AB-PT pres. Leonard Goldenson after 2 weeks of conferences with top studio officials. Though Goldenson didn't name the 2 studios, *Variety* identified them as Warner Bros. & MGM. He said TV could serve as a "proving ground" for young talent, who would then "graduate" to movies . . . Biggest attraction on TV: radio. Ed Sullivan's tribute to radio Jan. 30 pulled 51.8 Trendex (for second half-hour), all-time record for the 7-year-old show . . . Rating phenomenon of year, ABC's *Disneyland* jumped up a couple more notches in Jan. to cop 4th place in both Nielsen & ARB surveys, with 47.8 & 46.3 respectively . . . Best daytime viewing period is 4-5 p.m., according to new Advertest survey of N. Y. area, which found 48% of "daytime TV homes" watch during that hour; 10-11 a.m. is second choice (47.5%), noon-1 p.m. third (45%). In 50% of homes, TV is viewed before 5 p.m., and about half of this group watches daytime TV daily . . . "Too sexy" was unofficial explanation for sudden cancellation of widely publicized (but unsponsored) *Voluptua Show* on KABC-TV, Los Angeles, though station's official explanation was "too expensive." Show featured shapely Gloria Paull who appeared clad in negligee as mistress of ceremonies on weekly program of feature films. Program lasted 6 weeks, stirred "boycott" threats . . . Venturing into hinterlands following recent originations from Miami, NBC's magazine-type shows and *Comedy Hour* planning several future excursions—*Tonight* to originate from Dayton Feb. 11, *Comedy Hour* from New Orleans Feb. 20, with latter picking up jai alai championship from Tijuana, Mex. Feb. 6 (Vol. 11:5). Also reportedly in the works are originations of *Home* from Mexico City and resorts in the Canadian Laurentians . . . Ford Foundation is financing pilot film of new TV series featuring cartoonist Al Capp and stressing principles of Americanism . . . TV's killing pace: Two comedy stars "retired" this week, Bob Hope reportedly turning down "fabulous" offer from GM for regular program next fall, saying he's "tired, run down and wants to rest" by laying off TV for year; Joan Davis received release from her contract with GE (*I Married Joan*) because she is "worn out" after making 98 TV films in last 3 years . . . General Teleradio, flushed by success of *Gangbusters*, its first feature-length theatrical picture, plans to expand production and possibly enter distribution of films for theatres—backed by promotion on Mutual's 580 radio stations.

Distribution rights to \$5,000,000 in new TV film shows were acquired by ABC Film Syndication, pres. George T. Shupert announced this week end. ABC will have exclusive distribution rights to *Douglas Fairbanks Presents, Sheena—Queen of the Jungle, Life Can Be Beautiful* and will arrange for production and distribution of at least 2 additional TV shows in conjunction with Hal Roach Jr. under banner of Rabco TV Productions.

New reps: WTTG, Washington, D. C. to H-R Television (from Blair TV).

End of inter-union dispute this week opens way for NBC-TV & ABC-TV to join CBS-TV in producing their own films. Provision in new contract signed Jan. 31 by NBC & ABC with National Assn. of Broadcast Employees & Technicians calls for NABET to relinquish jurisdiction over film production to International Alliance of Theatrical & Stage Employees, which functions strictly as film craft union for networks and others. NABET had previously claimed jurisdiction over film in some areas and had refused to handle film made by IATSE on network equipment and using network personnel. CBS-TV already has right to film own shows under agreement with IBEW, now produces *You Are There & Phil Silvers Show*. NABET retained jurisdiction over kines only. Signed only few hours before expiration of old contract, 3-year pact calls for wage increases up to 10% by third year. NABET also won pension agreement from NBC only. Meanwhile, however, NABET threatened to strike against CBC if agreement on wage increase is not reached by Feb. 16. Union says average wage of its Canadian members is \$63 a week and wants 30% increase.

Serious interest in British TV is evidenced by more and more U. S. organizations as Sept. debut of commercial TV there approaches (Vol. 10:45). This week, CBS reported agreement with Anthony C. Bartley's Jersey Productions, London, for latter to handle all CBS overseas film sales and to produce special series for both European and U. S. markets. For 5 years, Bartley has been producing TV films for U.S., e.g., for Douglas Fairbanks, MCA-TV, *Fireside Theatre*. His first series to be produced with CBS tieup will be *March or Die*, with Foreign Legion background, starring Errol Flynn in his TV debut. BBC is currently using kines of some of Edward R. Murrow's *Person to Person* series.

Sale of KMBY-TV, Monterey, Cal. (Ch. 8), along with radio KMBY, to share-time KSBW-TV, Salinas (Vol. 10:45), was approved this week by FCC. Sellers' major stockholders are Kenyon Brown, George Coleman and actor Bing Crosby. Also approved was ownership change for KSBW-TV whereby name changes from Salinas Bestg. Corp. to Salinas Valley Bestg. Corp., and John C. Cohan & Wm. M. Oates each reduces 50% holdings to 25%, other 50% to be held by 13 local citizens. KSBW-TV paid \$230,000 and assumed some of the liabilities in order to begin full-time operation; last week it filed to sell radio KMBY, Monterey for \$70,000 to veteran radio engineer Frederick A. Gwynn in order to retain KSBW (Vol. 11:5).

Sale of McClatchy's KWG, Stockton, Cal. (250-watts, 1230 kc, ABC) for \$75,000 to co-partners KWG program director James E. Longe and Dr. Lewis B. Saslaw ran into snag this week when FCC questioned financial qualifications of purchasers. McClatchy wants to sell in order to buy KBOX, Modesto (1-kw, 970 kc), also for \$75,000 (Vol. 10:50), as companion to its KBEE (FM). This deal also has been held up by FCC which questions possible overlap with McClatchy's KMJ, Fresno and KFBK, Sacramento.

Copies of report on experimental uhf booster, duplicates of one submitted to FCC, are available to those interested, from Adler Communications Laboratories, 1 Le Fevre Lane, New Rochelle, N. Y. Report is description of booster built to fill hole in coverage of WATR-TV, Waterbury, Conn. (Ch. 53); Adler states that unit added some 50,000 viewers to station.

Sign of the times: London's historic Adastral House, occupied by British Air Ministry since 1919, to be renamed Television House by Associated Rediffusion Ltd., which leases building beginning in May. Company is one of the program contractors selected to produce TV shows and sell time for new commercial Independent TV Authority which is scheduled to go into competition with BBC next fall.

SET SALES EXCEED NORMAL SEASONAL PACE: There's an unmistakable jauntiness about the TV-radio trade these days, reflecting a movement of sets somewhat greater than normal for the first quarter of the year. Though official industry statistics on sales at any level of trade thus far this year have yet to be released, several top-ranking manufacturers are reporting TV set movements at or near all-time records.

Illustrating bullishness of current TV market, Philco this week raised price of four 21-in. table models by \$10 -- a step rarely taken by manufacturers in first quarter, when tendency is to keep prices firm or even lower them slightly in hope of stimulating sales. Though Philco itself gave usual explanation of "increase in cost of components" for price hike, one of its competitors observed:

"This shows how strong the market is right now. In past years it would have been suicide for any of us to raise prices in this season. But the way things are going, Philco knows it can get away with it. I wouldn't be at all surprised to see other manufacturers take the gamble and increase prices shortly."

The mix of sales is also encouraging in several respects. The 17 & 21-in. receivers, of course, continue as the bread-&-butter sellers -- taking in the initial sales and a steadily-increasing volume of second-set sales. One trade marketer last week estimated second sets currently constitute 10% of total retail sales (Vol. 11:5). And in pre-freeze metropolitan markets particularly there is definite upswing in the 24-in., primarily as replacements -- good for greater profit margins.

All sorts of reasons are being advanced for state of market. Among them are low prices and truly excellent values, improvement in programs, inability of color to get down to mass-market prices yet, frigid weather which has kept people indoors.

Radio is also showing renewed evidence of vitality. Production and inventory are in better balance than in some months -- and sales are showing a steady rise under the impetus of bigger and better promotions.

* * * *

TV production totaled 154,421 week ended Jan. 28, compared to 150,985 units preceding week and 166,522 week ended Jan. 14. It was year's 4th week and brought January production to 665,000, compared to 420,571 in Jan. 1954. Radio production totaled 226,054 (110,799 auto), compared to 262,949 preceding week and 267,544 week before. It brought Jan. to about 1,033,000, compared to 871,981 in Jan. 1954.

Revised 1954 production figures released by RETMA this week show 7,346,715 TVs, 10,400,530 radios turned out. It was second highest TV production year, below 1950's record 7,463,800 but ahead of 1953's 7,215,827. Radio total compared with 13,386,556 in 1953 -- decline due largely to auto radio drop. The breakdowns:

	<u>1954 Production</u>		<u>1954 Radio Production by Types</u>			
	<u>Total TV</u>	<u>Total Radio</u>	<u>Home Sets</u>	<u>Portables</u>	<u>Clock</u>	<u>Auto</u>

Trade Personals: Kendrick R. Wilson Jr., Avco v.p. & asst. to chairman Victor Emanuel, elected a director and member of corporate executive committee . . . Frank B. Powers promoted to operating v.p., P. R. Mallory & Co.; George M. Arisman Jr. named controller . . . Karl van Gessel promoted to gen. mgr., Sylvania international div. . . . Ramon J. Hartung named controller of Sylvania TV-radio div., Buffalo . . . Leonard J. Corti, ex-Polarad Electronics, named CBS-Columbia mgr. of contract administration for govt. & industrial operations . . . Ray E. Nugent, ex-Atlanta sales mgr., named gen. sales mgr., Philco parts & accessory div., replacing late Robert McKinney; Wm. J. Horn, from appliance div., named merchandising & adv. mgr. . . . David W. Potter promoted to components div. sales mgr., Federal Telephone & Radio Co.; Frederick K. Hankinson named sales mgr. of transformer dept. . . . E. L. Taylor resigns as sales mgr. of Stewart-Warner Electric, now out of TV-radio business in U. S., though continuing in Canada . . . Herman L. Weckler, v.p.-gen. mgr. of Clevite Corp., elected to board . . . Charles E. Griffith, gen. sales mgr., & John M. Zimmerman, works mgr., promoted to v.p.'s, International Resistance Co.; Miss Norma L. Testardi named adv. mgr. . . . Philip J. Wood, ex-Stewart Warner Electric & RCA, named asst. to H. C. Bonfig, Zenith TV-radio sales v.p. . . . Grant R. Loomis promoted to asst. gen. traffic mgr., Stromberg-Carlson . . . Sol Listerneck promoted to Olympic Radio export sales mgr. . . . Herbert K. Rollins named mgr. of product planning, Russell N. Leisz service mgr., RCA Estate Appliance Corp. . . . Doug Carpenter, JFD Mfg. Co., heads special RETMA committee to revise Article 810 of National Electric Code, applying to antenna installations; request for revision came from National Fire Protection Assn. . . . C. A. Winder returns to Moffat's Ltd., Toronto (major appliances) as asst. gen. mgr. after year in auto industry; Moffat's is now Avco of Canada subsidiary . . . Thomas C. Piddington, ex-Kelvinator, named Andrea district mgr. for N. J., Pa. & upper N. Y. state . . . Donald B. Smith, ex-Lewyt Corp., named Crosley-Bendix appliance sales promotion director, replacing George Simonds, resigned . . . C. A. Calhoun named Raytheon govt. contracts mgr., headquartering in Chicago.

Emerson introduced new 17-in. table model which can operate on AC or DC without use of inverter or converter, listing at \$150. Automation techniques are currently being used in radio production, will be extended eventually to TV, said pres. Benjamin Abrams at company's annual meeting. He also said company would market a completely transistorized radio within 60 days. He doubted that more than 100,000 color sets would be produced this year but was "hopeful" that 1,000,000 will be turned out in 1956.

U. A. Sanabria's American Television Inc., now selling custom-built "De Forest" & "De Forest-Sanabria" brand TVs through own retail outlets in Chicago, Cleveland, Detroit, St. Louis & Oklahoma City, plans shortly to set up new retail outlets in Philadelphia, Milwaukee, Los Angeles & San Francisco. Firm is now producing and selling 1000 sets per week, says Sanabria, some 21-in., mostly 24 & 27-in.

Kent Television Inc., 505 Driggs Ave., Brooklyn, manufacturers & designers of custom TV receivers, plans biggest production & sales year in its 5-year history in 1955, output having increased steadily each year, reports pres. J. D. Mendelson. Its current line starts at \$550 for 21-in. full-door console.

Philco increased price by \$10 on four 21-in. table models—ebony \$160 to \$170, mahogany metal \$180 to \$190, blonde \$190 to \$200 & mahogany wood \$200 to \$210.

DISTRIBUTOR NOTES: Admiral establishes Admiral Distributors Corp., a wholly-owned subsidiary, to conduct its 19 branch distributing operations. W. C. Johnson, Admiral sales v.p. who heads new subsidiary, said it should attain sales of approximately \$100,000,000 in 1955 . . . DuMont: Wolverine Distributors, 1501 Miami Road, Jacksonville, Fla. (Edward Johnson & Charles L. Francisco, partners) . . . Crosley-Bendix: Lloyd Distributing Inc., Omaha (Lloyd W. Sleezer, pres.), replacing own factory branch . . . Stromberg-Carlson: Anderson-O'Donnell Co., 1452 Galapago St., Denver (Bob Anderson & Ray O'Donnell, principals) . . . Raytheon: L&P Electric Co., Brooklyn (Louis Lidsky, pres.), replacing Dorfman Distributing Corp. . . . Olympic Radio: Coby Distributors Inc., Wilkes-Barre, Pa. & Metropolitan Distributors, Roxbury, Mass. . . . Raymond Rosen & Co., Philadelphia (RCA) names W. Russell Zacharias sales supervisor of Lehigh Valley market area; he's ex-pres. of Luckenbach Inc., Philco distributor in Pottsville, Pa. . . . Boyd Distributing Co., Denver (Philco) names Larry Costa service mgr. . . . CBS-Columbia of Philadelphia appoints Albert A. Yannelli credit mgr. . . . Westinghouse Electric Supply Co. names W. A. Phillips Chicago-Rockford TV-radio sales mgr. . . . Hallicrafters: Barre Television Supply Co., 343 S. Main St., Wilkes-Barre, and Fleischer Distributors, Monticello, N. Y. (Roy G. Fleischer, pres.).

A 2-6% "additional dealer discount" plan to stimulate TV trade-ins was disclosed this week by CBS-Columbia pres. Seymour Mintz. Additional discount, based on quantity purchases, varies from market to market, where distributors have authority to put it into effect. Contributions to additional discount will be made by both factory and local distributor. Mintz also disclosed that CBS-Columbia is shooting for 5% of national radio market in 1955, its first full year in radio.

Typical TV service charges, as estimated by Motorola service mgr. Russ Hanson in *NARDA News*: replacement of 21-in. picture tube, \$7.50; 24 & 27-in. tubes, \$8.25-\$9; replacement of power transformer, \$8-\$10. NARDA itself says average of 4.56 calls per set are made annually under service contracts, 2.2 calls on C.O.D. basis; average cost of C.O.D. call, including labor and parts, is \$10.50; from 80-90% of all calls are completed in customers' homes.

TV-radio-appliance dealers will enjoy increases in both unit sales and dollars in 1955 over last year, predicts Richard E. Snyder, NARDA's economic consultant, in his Feb. *National Markets Analyst*, 11 S. LaSalle St., Chicago. He foresees a unit increase of 6.5% and sales of \$4.127 billion, compared to \$3.875 billion in 1954. He predicts these dealers will spend 2.5% of their 1955 sales volume on advertising.

Motorola is buying 18-acre tract in Phoenix for new engineering and "light manufacturing" facilities. Pres. Paul V. Galvin said transistors and other "small and highly precise items" would be produced; about 400 would be employed. Company already has electronics research lab there, employing 800, headed by ex-Washington consulting engineer Joe Chambers.

Crosley introduces "Custom V" series of 6 TV models as adjunct to its "Super V" line. New models have chassis with one more tube than "Super V" receivers, range from 21-in. mahogany table model at \$180 to 21-in. blonde "low-boy" combination at \$320.

The Radio Craftsmen Inc., 4401 N. Ravenswood Ave., Chicago, manufacturer of high-fidelity components, will sell its products directly to consumer by mail order, eliminating all dealers, effective March 1.

Annual High-Fidelity Show, sponsored by International Sight & Sound Exposition, will be held in Chicago's Palmer House, Sept. 30-Oct. 2.

Topics & Trends of TV Trade: Those standby price & wage controls, which President Eisenhower first indicated he planned to seek from Congress, apparently aren't going to be requested now—bringing a sigh of relief from TV as well as other industries. At news conference this week, President said standby authority to freeze prices & wages might be advantageous but that the psychological effect of such action on the economy, possibly resulting in "scare buying," must also be considered.

President's apparent go-slow attitude prompted a hurriedly-called meeting of Central Council of National Retail Assns. to postpone any public re-examination of its flat opposition to all controls on basis that the very discussion of controls might produce inflationary pressures. NARDA was represented at meeting by chairman Mort Farr. The Central Council is one of 2 major wings of the American Retail Federation.

President said that if Congress sees fit to enact such controls, he could live with them. But he cautioned that approval of such controls might imply that his Administration would want to go all-out to put country on war footing in current Formosan crisis, a step the President said he is taking pains to avoid.

* * * *

Appeal for excise tax relief came this week from H. Leslie Hoffman, pres. of Hoffman Electronics, who said industry's excise tax bill last year was \$105,000,000. Speaking at Electronics Day gathering in Los Angeles, Hoffman said: "Assuming that the industry showed a net profit after taxes of 3% at the factory level last year, 2% at wholesale and 3% at retail, the industry as a whole made \$84,000,000 while paying \$201,000,000 in taxes." Meanwhile, big Canadian Retail Federation has joined Canadian RTMA in urging elimination of excise tax on TV-radio-appliances in Dominion. In brief submitted to Govt., CRF said further it was unfair to use excise tax funds to finance state-owned CBC since TV is no longer confined to small area in Canada.

TV set sales by Canadian factories totaled 619,428 at average price of \$341 in 1954, when production was 593,856, reports Canadian RTMA. It brought Canadian sets-in-use to about 1,125,000 at year's end. In 1953, some 422,951 sets were produced, 365,400 sold. Inventory at year's end was 43,261, compared to 63,905 at start of year. Projected production estimate is for 207,256 more sets in Jan.-March period. Montreal led in 1954 sales with 166,881; Toronto second, 107,013; Prairies, 72,624; British Columbia, 60,195; other Ontario, 54,707; Ottawa & eastern Ontario, 40,751; Hamilton-Niagara, 36,158; Quebec City, 35,012; Maritime Provinces, 27,193; Windsor, 16,130; other Quebec areas, 2764. Dec. sales were 89,078, production 93,928.

Big export business in white goods, particularly in Latin America, was disclosed this week by both Westinghouse and GE. At distributors convention in N. Y., Albert B. McClosky, consumer products mgr. of Westinghouse International, said major appliances account for 35% of all Westinghouse sales overseas. Company set export sales record in 1954 and is aiming for 15% increase this year, he said. Stressing Latin America as most fertile market for appliances, he said such countries as Venezuela and Colombia include air conditioners and other electrical appliances as standard equipment in new construction. W. R. Herod, pres. of GE International, said his company had increased sales last year by 25% over 1953 volume and had budgeted unspecified increase for 1955.

New 5-in. projection tube, to be used with receivers throwing pictures up to 8x6 ft., is being offered by RCA. Tube is type 5AZP4, uses 40,000 volts.

Financial & Trade Notes: Among officers' and directors' stock transactions reported by Securities & Exchange Commission for Dec.: Irving B. Babcock sold 1000 Avco, holds 7897; Parker H. Erickson sold 600 Avco, holds 400; Dr. Allen B. DuMont sold 400 DuMont Labs, holds 39,800; Benjamin Abrams, thru trusts & foundations, bought 1000 Emerson, holds 219,800 personally and 89,639 thru trusts & foundations; Max Abrams, thru trusts & foundations, bought 500 Emerson, holds 80,400 personally and 70,760 thru trusts & foundations; Wm. H. Miller sold 1300 Gabriel Co., holds 11,710; Willard H. Sahloff sold 273 GE, holds 2010; Clarence C. Walker bought 1125 GE, holds 1728; Louis Scadron sold 600 General Instrument, holds 2928; F. Robinson sold 1000 Hazeltine, holds 400; Joseph C. Chapman, thru C. C. Collings & Co., bought 1632 I-T-E Circuit Breaker, sold 1621, holds 1800 personally and 21 thru C. C. Collings; Charles M. Hofman sold 1000 Raytheon, holds 2560 personally and 2009 jointly with wife; Harold C. Mattes sold 1400 Raytheon, holds 15,534; Theodore L. Bowes bought 100 Stromberg-Carlson, holds 126; George E. Eyer bought 250 Stromberg-Carlson, holds 932; Arthur F. Gibson bought 500 Stromberg-Carlson, holds 599; Myron J. Hayes sold 100 Stromberg-Carlson, holds 110; Gordon G. Hoit bought 667 Stromberg-Carlson, holds 1080; Charles W. Pritchard bought 167 Stromberg-Carlson, holds 167; Anthony G. Schifino bought 500 Stromberg-Carlson, holds 823; Daniel G. Schuman bought 334 Stromberg-Carlson, holds 384; John H. Voss bought 167 Stromberg-Carlson, holds 197; Walter J. Maytham Jr. sold 500 Westinghouse, holds 127; John M. Schiff bought 2500 Westinghouse, holds 10,000; Harry E. Seim bought 1500 Westinghouse, holds 2944; C. S. Weber sold 300 Westinghouse, holds 582.

Storer Broadcasting Co., at special stockholders meeting Feb. 15, will ask them to approve board action of Jan. 26 proposing share-for-share distribution of common stock and of Class B common as of Feb. 25. First, however, they must ratify proposed amendment to increase the authorized outstanding common from 1,500,000 to 3,600,000 shares and Class B from 1,500,000 to 2,500,000. There are presently outstanding 262,750 shares of common and 843,250 Class B, which will be increased to 525,500 & 1,685,500 shares, respectively. Also proposed is public sale, at discretion of board, of not more than 262,750 shares of common which would be used to reduce the company's outstanding long-term indebtedness and to redeem all or part of 15,000 shares of 7% cumulative preferred now outstanding. Release of stockholders' preemptive rights to the 262,750 shares is deemed desirable to broaden the stock's market and thereby increase opportunity for its listing on the N. Y. Stock Exchange.

Emerson Radio & Phonograph Co. earnings in first quarter of fiscal year ended Jan. 31 "may be better" than the \$449,231 (23¢ a share) earned in corresponding period year ago, pres. Benjamin Abrams told company's annual meeting Feb. 3. For current fiscal year ending Oct. 31, 1955, both profits and sales should exceed the \$1,884,976 (97¢) earned on sales of \$80,559,994 in fiscal year ended last Oct. 31, he said. Emerson booked more orders for TV receivers in 3 months ended Jan. 31 than in any comparable period in its history, he declared. Abrams said he thought it unwise to increase dividends now above 1954's 60¢. Ex-Federal Judge Simon H. Rifkind, now member of law firm of Paul, Weiss, Rifkind, Wharton & Garrison, was elected a director, replacing late Richard C. Hunt.

Sidney B. Lurie, industrial and market analyst who since 1942 has specialized in electronics for Paine, Webber, Jackson & Curtis, joins Josephthal & Co., 120 Broadway, N. Y., member of N. Y. Stock Exchange, as partner in charge of research dept.

Electronics Reports: Long-distance waveguide has been "used successfully in experiments," Bell Telephone Labs reported this week—with the guarded prediction that the new waveguide "might, when fully developed, join coaxial cable and radio relay as an everyday transmission medium for the Bell Telephone System." The new system, first described by Bell at 1952 NARTB convention (Vol. 8:14), uses carrier frequency of about 50,000 mc, far above super high frequency (shf) range, may someday "simultaneously carry tens of thousands of cross-country telephone conversations along with hundreds of TV programs," Bell scientists believe.

New waveguide is hollow tube constructed of tightly coiled thin copper wire, can carry signals around corners. Tube is 2-in. in diameter, but engineers foresee use of even higher carrier frequencies resulting in waveguide no thicker than a fountain pen. In recent experiments at Bell's Holmdel, N. J. laboratory, engineers bounced signals back and forth in copper pipe 500-ft. long for distances of 40 mi. They calculated that in comparison, the same waves could have traveled only 12 mi. in a coaxial cable with same loss of strength. Bell scientists point out that in the new waveguide the higher the frequency the less the loss through attenuation—exactly the reverse of other forms of transmission.

* * * *

RCA's "automated" production machine, which "triggers" punches of virtually any pattern for components in electronic printed circuit panels, was disclosed this week. RCA will use machine in own plants and sell it to others in industry for about \$14,500, with delivery in about 6 months. T. A. Smith, v.p. & gen. mgr. of engineering products div., said new device, known as RCA Printed Circuit Board Programmed Punching Machine, will result in substantial savings in time and money. As example of savings, he said that in quantities over 1000, punching of printed-circuit boards by automated machine costs average of 5¢ each, compared to \$1.73 & \$1.10, respectively, for punching boards by drill and punch-die methods. Machine, said Smith, "is operated by a glass-based cloth tape into which 'master' holes are punched to produce any combination of component holes." Machine's punches are uniformly "triggered" in pattern dictated in tape, he said. Within 6 minutes, operator can switch from one circuit pattern to another, merely by changing tapes in machine. He said machine will perforate, in 45 seconds, any combination of holes in any number of circuit patterns contained on board up to 6x17.6-in., at rate of 12,000 holes per minute. He said machine needs only one operator who can be trained "in a matter of minutes."

New "type acceptance" and "type approval" rules for non-broadcast transmitting equipment, adopted by FCC recently (Vol. 11:2), this week brought expression of serious concern from RETMA, which urged Commission to stay effectiveness of rules for 90 days and to establish Govt.-industry committee to study problems. The rules, RETMA said, "will be unnecessarily burdensome and disruptive to production processes with ultimate increased costs to the general public and they will not achieve the objectives for which they were written." RETMA stated that there are no clearly defined measurement techniques and standards with which to implement rules, said it believed they could be drawn up in 2 months for modulation characteristics, 6 months for spurious emissions, 1 year for bandwidth. The approval procedures specified, RETMA said, have no time limits and would seriously disrupt production schedules because manufacturers would never know when FCC approval would be forthcoming.

Arma Corp., electronics manufacturing subsidiary of American Bosch, Springfield, Mass., elects W. Gerard Tuttle, ex-Hughes Aircraft, industrial relations v.p.

Color Trends & Briefs: NBC executives are going all out in their color pitches nowadays. While pres. Sylvester L. Weaver Jr. was speaking in Detroit, urging manufacturers of non-consumer goods to make use of TV generally, color specifically (see p. 9), exec. v.p. Robert W. Sarnoff was in Rochester, N. Y. addressing Transportation Club and stating that best way set makers can stimulate color is by sponsoring color shows.

In Dallas, meanwhile, special events director Barry Wood held out promise to Salesmanship Club that Texas state fair would be colorcast this year if a sponsor came forward—scenes to go on projected *Wide, Wide World* series. Then, at Radio & TV Executives Society luncheon in New York, Richard A. R. Pinkham, participating programs v.p., stated that color will be sold primarily on a participating basis because few advertisers will be able to afford full-hour shows. He said that most color shows will be sold on same basis as *Today, Tonight* and *Home*.

In Rochester talk, Sarnoff stated: If color is to grow with the speed it should, more set manufacturers must go into color set production now." Then, he said, they should sponsor color programs to stimulate demand. He recalled that in early days of radio, set producers were the first sponsors. In early days of black-&-white TV, he said 10 leading receiver manufacturers were pioneer sponsors. But now, however, only RCA and Westinghouse are sponsoring color, he said. "Surely it is reasonable to expect the others," he declared, "to join in priming the pump for a new industry that one day will contribute so much to their own welfare."

Sarnoff disclosed that survey by Psychological Corp. showed that by last Nov. some 4,500,000 people had seen color programs—over twice as many as he had estimated at the time. During next 5 years, he said, it's estimated that public will spend \$3 billion more on color sets than it did on black-&-white during last 5 years.

* * * *

Competition to sell color equipment for closed-circuit medical use continued this week, following recent demonstrations by RCA and CBS in Washington (Vol. 11:4). Using field-sequential system and projector, as did CBS, GE demonstrated magnification of microscopic details to AMA conference on medical TV in Chicago. GE's Ralph S. Yeandle urged that field-sequential system had advantages over compatible system for closed-circuit use. From Dage, meanwhile, comes word of its first sale of 3-vidicon color camera for use with microscope—to C. F. Kettering Foundation, Yellow Springs, O.

One of best documents to date on color TV for station engineers is 151-page compilation of 13 papers read at last year's NARTB's engineering conference. Prepared by engineering dept., under mgr. A. Prose Walker, it has been distributed to NARTB members—first copy free, additional copies \$6 each.

Three-day color clinic, conducted by WCAU-TV, Philadelphia, drew some 100 representatives of advertisers and agencies who placed their products before color cameras. Cameras will be available an additional week.

Boon to color photography was seen in color TV by Paul L. Gittings, former pres. of Photographers' Assn. of America. When public becomes accustomed to color TV, he said, "the photographic industry will be hard pressed to keep pace with the consequent demand for color photos."

Feb. 7 week network color schedules: NBC-TV—Feb. 7, *Producers' Showcase*, "The Women," 8-9:30 p.m.; Feb. 9, *Norby*, 7-7:30 p.m.

Color set sales in Kansas City totaled 87 as of Jan. 1, according to city's Electric Assn.

RCA reports 3-V color film camera shipped Feb. 2 to upcoming WTVT, Tampa (Ch. 13), due on air mid-March.

NARTB LIBRARY

Network TV-Radio Billings

December 1954 and January-December 1954
 (For November report, see *Television Digest*, Vol. 11:1)
 (For preceding years, see *TV Factbook No. 20*, p. 39.)

HUGE JUMP in network TV billings in 1954 is strikingly detailed in the full-year figures released by Publishers Information Bureau this week—showing total of \$320,154,274, vs. \$227,585,656 in 1953 and \$180,794,780 in 1952. CBS-TV alone reached \$146,222,660—well over the radio billings of all networks combined, which were \$137,641,169. NBC-TV achieved \$126,074,597, ABC-TV \$34,713,098, DuMont \$13,143,919.

December was record month in TV for both CBS-TV and NBC-TV, former with \$15,060,653, latter with \$13,047,419. ABC-TV had \$3,994,832, only slightly down from record of \$4,134,103 in Nov., while DuMont had its best month of the year with \$1,457,436.

Network radio's \$137,641,169 compared with \$160,534,544 in 1953, \$163,453,466 in 1952. NBC and CBS suffered greatest drop, while ABC almost held its own and MBS incurred less severe cut. The complete PIB tables:

NETWORK TELEVISION

	December 1954	December 1953	Jan.-Dec. 1954	Jan.-Dec. 1953

* Revised as of Feb. 2, 1955.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers' Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 40%. However, they're generally accepted in the trade as an index.

Sets-in-use totaled 33,816,000 as of Jan. 1, 1955, reports NBC research director Hugh M. Beville Jr., increase of 6,000,000 for year. Beville estimated 169 stations were capable of transmitting color as year opened.

Television Bureau of Advertising (TvB) reports 83 stations, plus CBS-TV & rep Blair-TV, are charter members of promotion organization, having signed prior to Feb. 1 deadline.

Large portion of President's press conference this week—nearly two-thirds of it—was cleared for TV film release, following precedent set 2 weeks ago (Vol. 11:4). TV was subject of press conference questioning this week, with 2 reporters for *New York Post* querying Eisenhower on whether "only exchanges favorable to the Administration and the Republican Party" would be released for showing on TV. President grinned and replied: "Well, I think that is an item you can talk over with my technician, who is Mr. [James] Hagerty"—White House press secretary, who does the film cutting. He recalled that 28 minutes of the first conference were shown on TV, "and I couldn't think there could be much room for censorship there." Another question dealt with whether cutting of the films involved freedom of the press. "No head of any broadcasting company has yet protested to me," he replied, "and I can't very well make any answer until I get their protests and the reasons for it."

Radio's 1954 time sales dropped to \$453,385,000, or 5% off 1953 record of \$477,206,000, according to estimates in the 1955 *Broadcasting Yearbook and Marketbook* released this week. All classifications were down save local. The trade journal's figures: national network, \$76,219,000 in 1954 vs. \$92,865,000 in 1953; regional network, \$4,666,000 vs. \$5,192,000; spot, \$121,935,000 vs. \$129,605,000; local, \$250,565,000 vs. \$249,544,000. Local is shown to account for 55.3% of radio business, spot 26.9%, national network 16.8%, regional network 1%. Figures are for net time sales, after all frequency and promotional discounts but before deduction of commissions to agencies, reps, etc.; they thus anticipate the annual FCC revenue figures, based on station reports, which won't be made available until later this year (for 1946-53 FCC figures, see p. 34, *TV Factbook No. 20*).

House debate on televising Congressional committee sessions turned into a farce this week, with Congressmen exchanging humorous comparisons on their telegenic personalities. Debate was started by Rep. O'Brien (D-N. Y.), ex-newspaperman & TV-radio commentator in Albany, who said he supported ban on cameras by Speaker Rayburn. But 79-year-old Rep. Hoffman (R-Mich.) said House has a number of "young, eloquent" men who would look well on TV. Amid the exchange that followed, Hoffman said he was in favor of abolishing telecasts of wrestling matches because of poor "refereeing service."

TV was important influence in Democratic Party subcommittee's recommendation this week to hold party's 1956 presidential convention in Chicago, probably starting Aug. 13. Lack of network facilities doomed Atlantic City as convention site, party spokesman said, narrowing choice to Chicago and Philadelphia. As between those cities, Chicago was chosen because of more hotel space, he said. Republican National Committee meets in Washington Feb. 17 to select date and site of its convention—probably in Chicago in early Sept.

Influence of TV in the 1952 presidential election is subject of comprehensive 177-p. monograph by members of marketing dept., Miami U, Oxford, O., released by Joseph C. Seibert, chairman. Conclusion: "The results apparently would have been the same, with or without this new, and as yet untested, means of political communication."

Opposing legislation to limit tower height (Vol. 11:4), NARTB this week wrote Chairman Priest (D-Tenn.) of House Commerce Committee that 2 identical bills (S-138 & 139) introduced by Reps. Harris (D-Ark.) & Hinshaw (R-Cal.) are "unnecessary because presently established regulatory procedures are adequate."

Tennessee State Senate is latest to pass law relieving TV-radio stations from liability for on-air defamatory statements made by anyone not connected with stations. Bill had backing of Tennessee Assn. of Broadcasters.

SUMMARY-INDEX OF THE WEEK'S NEWS—February 12, 1955

FORMAL SUBSCRIPTION-TV PROCEEDINGS under way as FCC issues rule-making, giving industry 3 months to answer questions on problems (p. 1 & Special Report).

DENVER'S KBTB SOLD FOR \$1,000,000 to John Mullins, Tulsa, and Frank Leu, Nashville; Westinghouse-NBC swap of Philadelphia-Cleveland outlets cooking (p. 2).

MORE NEW TV AREAS OPENED UP as first stations go into Jackson, Tenn., Dothan, Ala. and Fairbanks, Alaska; total on air now 427 (p. 3).

JONES REPORT ON NETWORK-UHF problems, due next week, expected to take calm approach, urge further study; explosions over Plotkin Memo continue (p. 3).

PLOTKIN REPORT MAY BE SYMPTOM of antagonisms of "uhf losers" and of discarded affiliates, blaming networks for their woes (p. 4).

ECONOMICS OF SATELLITES vary widely, operators report, giving analyses of Lufkin, Tex.; Scottsbluff, Neb.; Walla Walla, Wash.; Hilo & Wailuku, T. H. (p. 6).

UHF EXCISE TAX EXEMPTION up again in Congress, Plotkin report reviving plan killed last session; bill in House would provide \$7 credit on uhf sets (p. 12).

SQUEEZE ON MILITARY CONTRACTS felt by TV-radio firms as aircraft companies enter electronics production in big way with govt. encouragement (pp. 12 & 15).

AFL ATTACKS NEWSPAPER - BROADCASTING ownership "concentration." Sen. Thurmond asks revision of "protest rule." FCC makes 4 small-town grants (p. 9).

MORE REPEATS OF LIVE PLAYS that are hits seen in Kraft experience. Warner Bros. may be getting ready to release part of film backlog (p. 9).

NATIONAL & REGIONAL SPOT accounts averaged 74 on 232 stations reporting to Rorabaugh, who lists top 25 spot advertisers (p. 10).

LAMB CASE THROWN INTO CONFUSION as govt. witness does flip-flop, repudiating previous testimony and accusing FCC attorneys of using "coercion" (p. 16).

FCC PREPARES TO HEAR PAY-TV PROS & CONS: An official FCC look at subscription TV is finally in the works. With issuance of notice of proposed rule-making this week, Commission made its first move just as expected (Vol. 11:5) -- laying before entire industry every question it could imagine and inviting comments thereon, but without committing itself to slightest degree on pros or cons of pay-as-you-see TV.

Wording of FCC's notice (full text herewith as Special Report) shows why vote on it was unanimous, with all 7 members present. Despite some members' instinctive predilections one way or other, they had no trouble agreeing to ask questions.

Thus, after literally years of lobbying -- principally by Zenith pres. E.F. McDonald -- proponents of fee TV finally managed at least to get Commission's ear.

Long and bitter war is in prospect. Commission has given until May 9 for industry to file comments. An additional month has been allocated for replies to those comments. After that, FCC staff will take several months to digest reactions, come up with recommendations to Commission. FCC then will have several alternatives:

(1) Seek more information. (2) Drop proposal altogether. (3) Issue a specific proposal aimed towards final commercialization. (4) Shift decision to Congress. Commission leaves its course of action completely flexible. With the possibility, even probability, of Congressional intervention and court appeals, a final decision may very well be delayed for years.

Notice was issued at Commission with air of excitement -- virtually everyone there feeling FCC has opened door on one of the most significant and controversial measures it has ever considered -- one having even more impact than the vicious color war or the monumental 4-year TV freeze and allocations proceeding.

You can expect battle cries to mount in shrill crescendo from now on. Movie exhibitors sounded the alert several months ago and have worked up to state of all-out emergency, prodded by the sledge-hammer promotion of subscription TV proponents. Now, with an official govt. forum, all other industry elements are expected to come forth, take a position. Comments can be expected from broadcasters, networks, movie

& TV film producers, manufacturers, sports promoters, theatrical unions, legitimate play producers, sponsors, ad agencies, et al.

Lobbying at Congressional level will become even more intense -- and Congress may well take ball away from Commission, which it can do if it chooses. This is more likely in case of pay-as-you-look TV than it was in color, because the issue is something everyone can understand, whereas color TV became obfuscated with technical complexities which few Congressmen took time to master. Sen. Magnuson has already promised that his Interstate Commerce Committee will look into matter (Vol. 11:6).

There are clear differences of opinion among the FCC members. At one end, Comr. Webster has maintained steadfast doubt, arguing that decision is up to Congress. At other end, Comr. Lee definitely leans toward approval; he has no objections at all to concept of paying directly for programs. Others have avoided giving any impression that they're for or against.

Text of FCC's proposal speaks for itself. It's simply a list of questions, answers to which it would like from all levels of industry. They're grouped into 3 sections: law, fact, public interest. They cover Commission's legal jurisdiction, technical data, patents, costs, programs, methods of operation, movie industry's role, impact on sponsored TV, hours of operation, safeguards needed, monopoly, impact on dissemination of news and controversial opinions, etc.

Though Zenith's petition for immediate commercialization was turned down, pres. McDonald said he was "delighted" because FCC chose one of the alternatives Zenith requested. International Telemeter stated "we welcome the notice [and] have always favored this broad approach." Skiatron stated that Commission action "should be welcomed with relief and utmost enthusiasm of all those who have the true interest of the television industry at heart."

DENVER'S KBTW SOLD, OTHER DEALS COOKING: Another big-city station was sold this week -- KBTW, Denver (Ch. 9) -- and it's evident that more deals are in the making. Not only are purchaser John C. Mullins of Tulsa and partner Frank Leu of Nashville paying \$1,000,000 for the Denver ABC-TV basic, but Mullins is currently dickering for still another station in the midwest, identity undisclosed.

There's also good chance that long-rumored swap of Westinghouse's TV-radio outlets in Philadelphia for NBC's in Cleveland will be consummated soon, and further personnel layoffs at DuMont Network have revived rumors that its WTTG, Washington (Ch. 5) and possibly WABD, New York (Ch. 5) may be sold. Neither Westinghouse nor NBC is confirming anything, nor will DuMont.

It's an open secret that the network and Westinghouse have been dickering and that Westinghouse is pursuing a policy of owning stations in areas where it has big manufacturing operations. That was one reason given for paying record \$9,750,000 to DuMont recently for its WDTV, Pittsburgh (Ch. 2), now KDKA-TV (Vol. 10:49-50).

If swap is made, it's good guess there will be an added quid pro quo on NBC's part in consideration of fact that Philadelphia area stands 4th, Cleveland 10th in U.S. Census Bureau market rankings. Westinghouse would give up Ch. 3 WPTZ, for which it paid Philco \$8,500,000 in 1953 (Vol. 9:8) and radio KYW (50-kw, 1060 kc) and take over NBC's Ch. 3 WNBK with radio WTAM (50-kw, 1100 kc). NBC is also hell-bent to get into San Francisco, 7th market, has unavailingly tried to buy KRON-TV (Ch. 4).

For the Denver station, Mullins and Leu are paying \$900,000 cash, assuming notes and mortgage adding up to another \$100,000 after deducting assets. They buy the TV company from 17 stockholders (see TV Factbook No. 20, p. 80), one of whom (9.32%) is Aksel Neilsen, friend of President Eisenhower who visits his Colorado ranch frequently. Stockholders W.D. Pyle & T.V. Eckram retain their radio KVOD.

The TV station has operated in red mostly since losing CBS affiliation to KLZ-TV in Nov. 1953, but lately has had some profitable months. Mgr. Joe Herold and staff will be retained. For John Mullins it's a return to TV, for it was he who took over tottering KPHO-TV, Phoenix (Ch. 5) in 1949 from group of Texas oilmen, put it on its feet, then sold it to Meredith for \$1,500,000 (Vol. 8:18).

Note: While most deals are usually hushed until at least the handshake, one station openly on market is Barton Pitts' KFEQ-TV, St. Joseph, Mo. (Ch. 2).

Proposed Rule-Making On Subscription Television

Beginning Exploration of Major Questions and Problems

including

Request for Industry Responses on Questions of Law, Fact and Public Interest

Noticed of Proposed Rule-Making Issued Feb. 11, 1955 as FCC Public Notice 55-165, Mimeo 15728

Comments Due by May 9, 1955 (see *Television Digest*, Vol. 11:7)

In the Matter of

Amendment of Part 3 of the Commission's Rules and Regulations (Radio Broadcast Services) to provide for Subscription Television Service

Docket No. 11,279

NOTICE OF PROPOSED RULE MAKING

1. Notice is hereby given of rule making in the above-entitled matter.

2. The Commission's present rules and regulations do not authorize subscription television operations. Television stations under our existing rules may not transmit programs for reception by the public on home receivers where such programs can be received only by those members willing to pay a specified fee. The current general practice in the television field is the indirect payment for programs by advertisers. The purpose of this proceeding is to determine whether the Commission should amend its rules and regulations to authorize television stations to transmit programs paid for directly on a subscription basis.

3. The successful operation of a subscription television system depends in large part on its ability to confine the reception to subscribers. A number of different methods for accomplishing this objective have been devised, and the Commission has during the past five-year period authorized the experimental testing of several systems. Data with respect to the results of these experimental operations has been made available to the Commission. These methods differ principally (1) in the manner of "scrambling" the picture so that when transmitted by the station it will be unusable by the general viewing public, and (2) in the manner of collecting payments for the programs received. Three subscription television systems have received experimental authorizations from the Commission. These are: "Phonevision," developed by Zenith Radio Corporation; "Subscriber-Vision," proposed by Skiatron TV, Inc.; and "Telemeter," advanced by International Telemeter Corporation. Phonevision contemplated the use of telephone lines to transmit the correcting signal to the home receiver, with the subscriber billed by the telephone company for the various programs ordered; however, work is being done on methods for providing the decoding signal without the use of telephone lines. In the "Subscriber-Vision" system, customers would purchase punch cards which, when inserted in the receiver, would actuate the decoding apparatus. Under the "Telemeter" method, subscribers would pay for each program as it is viewed by means of a coin box attached to the receiver which would actuate the decoding apparatus.

4. Petitions for the authorization of subscription television have been filed by Zenith Radio Corporation, proponent of "Phonevision," and Skiatron TV, Inc., proponent of "Subscriber-Vision." In addition, petitions have been filed by a number of television licensees and permittees urging that rule-making proceedings be instituted looking toward the authorization of a subscription television service.¹

5. The petitions presently before the Commission urge the authorization of a subscription television service. The petitioners submit that subscription television would open new vistas of entertainment and information to the indus-

try by making available to the viewing audience programs that could not otherwise be broadcast by the various stations in light of operating economics or program restrictions. They urge that the quality of programs that would become available under subscription television would enable UHF stations and non-network stations to compete with VHF stations and network affiliates for a larger share of the television audience. The petitioners submit that where UHF stations can present high quality programs, through the medium of subscription television, UHF set conversions would follow as a matter of course, thereby strengthening the status of the UHF. The petitioners allege that field tests of the various subscription television systems conducted during the past several years demonstrate that a subscription television service is both technically feasible and practicable; that such a service would not conflict with the present system of television broadcasting; and that a majority of the public would be willing to make direct payments of reasonable charges for the privilege of receiving high quality television programs of a type not currently available. In addition, some of the petitions presently before us urge that subscription television be limited for a time to UHF operations, or that they be limited to small markets.

6. On November 29, 1954, Zenith Radio Corporation and Teco, Inc., filed a substitute petition concerning subscription television. Zenith and Teco now urge that the Commission (1) without further proceedings, declare that Section 3.682 (transmission standards) and Section 3.687 (transmitters and associated equipment) do not prohibit subscription television by a commercial television station and will not be so interpreted or applied by the Commission where the transmissions and transmitting equipment to be effected and used by a station have been approved by the Commission upon specific application therefor by a commercial television licensee; or (2) that the Commission, without further proceedings, declare that it will waive the above requirements in cases where, upon specific application by a commercial television station, the Commission has approved transmissions and transmitting equipment designed to effect a system of subscription television; or (3) that the Commission, after "simplified and limited rule-making proceedings," modify the above requirements so that the rules "expressly contemplate the rendition of subscription television service by commercial television stations where such transmissions and transmitting equipment have been approved by the Commission upon specific application therefor by the holder of a commercial television station license." Mr. Harold E. Fellows, President of the National Association of Radio and Television Broadcasters (NARTB) submitted a letter dated January 4, 1955, in connection with the Zenith-Teco petition and, although not commenting on the merits of subscription television, urges that the Commission give this matter its consideration in a full rule-making proceeding. On January 6, 1955, the

¹ Zenith Radio Corporation filed a petition on February 25, 1952, urging adoption of its Phonevision system. Skiatron TV, Inc. filed a petition on September 14, 1954 with respect to Subscriber-Vision. In addition, petitions by various existing television stations supporting the adoption of subscription television have been filed by Home News Publishing Company, Pennsylvania Broadcasting Company, Stamford-Norwalk Television Corp., Connecticut Radio Foundation, Inc., Eastern Broadcasting Corporation, Big Spring Broadcasting Company, Appalachian Company, Northwest Television Company, Matta Enterprises, Peoples Broadcasting Company, and Joseph Brenner.

Joint Committee on Toll-TV² filed an Opposition to the Zenith-Teco petition, urging that a "a full public hearing" be held on the substantive matters raised by the petition.

7. The Commission does not believe that it would be appropriate at this time to authorize subscription television operations on a case-to-case basis as requested by Zenith Radio Corporation and Teco, Inc. The Commission feels that, before it would adopt such a significant change as subscription television, the matter should be considered in a general rule-making proceeding in which all phases of the problem may be afforded detailed and careful consideration. In response to the petitions submitted, the Commission is instituting a subscription television rule-making proceeding, in order that all interested parties may have the opportunity of submitting their views with respect to this matter and that the Commission may be apprised of such views prior to taking further action.

8. The Commission desires that the comments submitted in this proceeding be directed to the following questions and issues and present information and data with respect to the following aspects of subscription television:

I—Questions of Law

A. Whether the Commission has the authority under the Communications Act of 1934, as amended, to authorize and regulate subscription television operations.

B. Whether subscription television constitutes "broadcasting" within the meaning of Section 3(o) of the Communications Act of 1934, as amended; and if it is not "broadcasting," whether subscription television constitutes a common carrier or other type of service, and whether the Commission has the authority to permit subscription television to employ channels assigned to television broadcasting.

C. If, under the Communications Act of 1934, as amended, the Commission does not have the authority to authorize and regulate subscription television, what amendments to the Act would be required in order to permit the Commission to authorize and regulate such a service?

D. What rules and regulations of the Commission would have to be amended in order to permit the Commission to authorize and regulate subscription television operations?

(Comments with respect to the foregoing questions of law should be submitted in the form of a brief or memorandum of law and should specify with clarity the provisions of law and legal precedents relied upon for authority.)

II—Questions of Fact

Information and data should be submitted with respect to the following matters:

A. Technical data relating to the operation of proposed subscription television systems, including information as to the complexity and the dependability of the equipment to be employed in the systems proposed.

B. The extent, if any, of the degradation to the quality and character of the primary broadcast service, either monochrome or color, that would result from subscription television operations, as well as any interference that would be caused by such operations to other stations on the same channel, adjacent channels, or other pertinent frequencies. Information should be included relating to any adverse effect that would be caused to receivers now in the hands of the public by subscription television operations.

C. Data relating to the cost of equipment, including the cost of necessary modification of existing transmitters and receivers for subscription television operations.

D. Data with respect to the cost of the proposed subscription television service to the viewing audience.

E. Information with respect to the means, methods and organization to be employed by the proponents of subscription television systems in their use of the television broadcast frequencies, including complete information with respect to the plans and proposals of interested persons who intend to engage in subscription television operations.

F. Information with respect to the needs of the television broadcasting industry for additional revenue and program resources that would become available through the medium of subscription television.

G. Information relating to the extent that certain in-

²The Joint Committee on Toll-TV is an association composed of the following organizations: Allied States Association, Theatre Owners of America, Texas Drive-In Theatre Owners of Texas, Southern California Theatre Owners Association, the Kentucky Association of Theatre Owners, The Independent Theatre Owners Association of New York, and The Metropolitan Theatre Owners Association.

formation, events and entertainment are now unavailable to the public over existing television broadcast facilities including the current trends in this respect, as well as the anticipated capacity of subscription television to increase the use of television broadcast frequencies as a medium for bringing such material to the public.

H. Information relating to the anticipated nature and extent of the use of time on commercial television stations by subscription television operators.

I. Information relating to the length of time anticipated to be required for establishing subscription television in existing markets.

J. Information indicating who controls the patents on the devices to be used in transmitting and receiving equipment for subscription television; and information with respect to the arrangements that will be employed for the licensing of such patents for the competitive manufacture of subscription television equipment.

K. Information disclosing the role to be played by the motion picture industry in subscription television.

L. Information disclosing the role to be played by the networks in subscription television.

M. Information indicating who will control the production and distribution of programs to be employed in subscription television operations.

N. Information indicating the types of programs that will be available for transmission on subscription television.

III—Questions and issues relating to public interest considerations to determine:

A. Whether the authorization of subscription television and its regulation by the Commission would "generally encourage the larger and more effective use of radio in the public interest" within the meaning of Section 303(g) of the Communications Act of 1934, as amended.

B. The impact that subscription television will have on advertiser-sponsored broadcasting.

C. The effect that subscription television will have on the broadcast of news and the dissemination of diverse views on controversial issues; as well as the safeguards, if any, that will be required in order to insure that the broadcast of such information will continue to be available to the public without charge.

D. The safeguards, if any, which would be necessary to insure that the public in all areas of the country will continue to be provided with well-balanced programming without charge.

E. The safeguards, if any, that would be necessary to prevent the possible monopolistic control of subscription television operations.

F. The means that should be provided, if any, to insure that subscription television service will be available to all stations on a non-discriminatory basis.

G. The nature and extent of regulation required in order to insure that the public interest would be served, both during the early stages of subscription television operations, and after the system has been established, particularly with respect to:

1. Whether subscription television operations should be limited to a single system, or whether general standards should be provided within which a number of systems can operate.

2. Whether subscription television transmissions should be limited as to the number of hours or the segment of the broadcast day; whether such operations should be permitted on more than one station in a community; whether such operations should be limited in communities with only one station in operation; etc.

3. Whether subscription television should be limited only to UHF stations, or to stations in small markets.

4. The rules, if any, that would be required to insure that the public would be protected from possible injury due to obsolescence of subscription television equipment.

5. Any other amendments of the rules and regulations that would be required to permit the operation of a subscription television service.

9. Authority for issuing this notice is contained in Sections 4(i), 301, and 303(a), (b), (e), (f), (g), (i), and (r) of the Communications Act of 1934, as amended.

10. Any interested party desiring to file written comments with respect to the above matters should submit such comments on or before May 9, 1955. Comments in reply to the original comments should be filed on or before June 9, 1955. In accordance with the provisions of Section 1.764 of the Rules, an original and 14 copies of all comments shall be furnished to the Commission. The Commission will specify in subsequent notices such further proceedings as may be necessary, including oral hearings and the time and nature of any demonstrations or tests.

[Comr. Frieda Henneck issued separate statement terminating FCC action "salutary" but urging that Commission schedule oral hearing instead of requesting written comments.]

STILL MORE NEW TV AREAS OPENING UP: Three new vhf stations -- 2 of them opening up new TV areas in the South, one starting in Alaska -- have begun test operation. They bring on-air total to 427, of which 114 are uhf. Latest starters:

WDXI-TV, Jackson, Tenn. (Ch. 7), planning March 1 CBS interconnection, is all set for Feb. 12 test patterns, reports Washington attorney D.F. Prince, 6 2/3% owner. Nearest other outlets are in Memphis, 75 mi. distant. It uses 10-kw Federal transmitter, 500-ft. Stainless tower, 12-bay antenna. The gen. mgr. & majority owner is Aaron B. Robinson, who also controls radio WDXI and 5 other Tennessee AMs and who is publisher of Corinth (Miss.) Corinthian. Jack Murphy is sales mgr.; Larry Crenshaw, program mgr.; James Thomas, chief engineer. Base rate is \$150. Rep is Burn-Smith.

WTVY, Dothan, Ala. (Ch. 9) starts programming Feb. 12, having tested for 2 weeks, wires mgr. F.E. Busby. Near Ga.-Fla. border, it's 75 mi. from Panama City, Fla., 77 from Albany, Ga., nearest with stations. Owners are local group headed by builder Charles Woods. It uses 500-watt DuMont transmitter, 420-ft. Stainless tower, 6-bay RCA antenna. Base hour is \$150. Rep is Adam Young.

KTVF, Fairbanks, Alaska (Ch. 11) is now testing, plans commercial start in 10 days. It's competing with KFAR-TV (Ch. 2), which has also just made debut (Vol. 11:6) in town whose last reported pop. figure was mere 5771 (1950). A.G. Hiebert, pres.-gen. mgr., also operates KTVA, Anchorage (Ch. 11). KTVF has 2-kw RCA transmitter, 6-bay GE antenna. Mgr. is Walt Welch, ex-KTVA. Rep is Alaska Radio-TV Sales.

THE BIG SWITCH—JONES & PLOTKIN MEMOS: The loud noise you just heard was a backfire.

Webster has several definitions of "report" -- but perhaps the one which best fits the report submitted to Senate Commerce Committee last week by Harry Plotkin is: "an explosive noise; fireworks, an explosive report of a rocket." That's true, at least, insofar as the networks have reacted, publicly and privately.

When it first became known last summer that Sen. Bricker (R-O.), then chairman of the committee, intended to put ex-FCC Comr. Robert F. Jones in charge of a new investigation of network controls and the uhf situation, the networks hit the ceiling. But their fears were considerably allayed when Democratic committee members succeeded in getting former asst. FCC general counsel Harry Plotkin installed as "minority counsel" for the investigation.

They hit the ceiling again when Plotkin submitted his now "majority counsel" memorandum last week, favoring far-reaching changes in network practices (Vol. 11:6), which some observers saw as opening the doors to classifying networks as "common carriers." Jones' report -- which was not released this week as scheduled -- on the other hand, is due to be a surprise for the note of calmness it sets.

While Jones was the one generally expected to embrace the common-carrier concept, as well as call for re-allocation, his report -- now due for release next week -- will urge further study by Commerce Committee before conclusions are reached.

Last-minute revisions of Jones report were responsible for its delay. While report is not expected to "answer" Plotkin proposals, it is believed to have been toned down and the emphasis changed as result of the subject matter of the Plotkin Memorandum and the explosive reaction to it. Jones report will stress lack of information available on which to make sound decisions, citing inadequacy of data made available by FCC and the networks. It will urge further study at the Congressional level of network-station relations and the entire uhf problem.

Report itself is 30-pp. (as opposed to Plotkin's 44-pp.), also contains some 40-pp. of appendices, including factual tabular data obtained from FCC, networks, etc. Dipping into previously released FCC statistics, Jones report expresses alarm that 80% of annual TV revenue goes to stations in first 50 markets. Though report is understood to take a few swipes at allocation plan, it does not propose a reallocation at this time, but merely further study.

The alarm created in network circles by Plotkin Memorandum apparently took Commerce Committee Chairman Magnuson (D-Wash.) by surprise. In attempt to pour oil on troubled waters, he sent this letter to presidents of the 4 TV networks Feb. 9:

"When the memorandum prepared by Harry Plotkin [was] released last week, I stated that the Committee had not taken formal action on the memorandum and would

not until it had heard from the appropriate agencies and all interested parties.

"I want to assure you that adequate opportunity will be afforded you to present your views as soon as a definite schedule is prepared by the Committee. In the meantime, I am enclosing a copy of the memorandum and if you care to submit any comments or observations they will be appreciated."

A "scientific cross-section" of 27 CBS-TV affiliates from small, medium and large markets met this week in New York, meanwhile, to prepare a counter-attack (for list of those attending, see p. 8). In what was described as extremely harmonious discussion, they decided to take action to "inform the public" of their side of the question and discuss the matter with "appropriate govt. officials." No dissenting voices were heard. Following 7-hour meeting, group issued this statement:

"The proposals of Mr. Plotkin, if adopted, would jeopardize TV's most popular live entertainment and public service programs as they are presented today, and seriously interfere with future program planning. Every TV set owner should be most concerned with the possible consequences of these proposals."

Reaction to Plotkin Memorandum wasn't all unfavorable -- far from it. Mail to Commerce Committee was heavy, and almost without exception favored at least some of Plotkin's recommendations. Much of it was from uhf operators.

Public hearings are due to begin in March, with testimony by FCC and Justice Dept. The chief counsel for the network-uhf inquiry hasn't been selected.

Preview of hearings will come Feb. 23, when Committee will hold hearing on President Eisenhower's nomination of Chairman McConaughy to FCC. He has been serving on interim appointment. Senators are expected to put him on the spot by asking his opinion of Plotkin and Jones reports.

* * * *

Another prospective TV investigation -- by anti-trust & monopoly subcommittee of Senate Judiciary Committee -- took another step forward this week when Committee Chairman Kilgore (D-W.Va.) took over chairmanship of subcommittee. Other members are Democrats Kefauver (Tenn.), Hennings (Mo.), O'Mahoney (Wyo.) and Republicans Wiley (Wis.), Langer (N.D.), Dirksen (Ill.).

Subcommittee hopes to "keep out of non-monopoly issues which would normally come under the purview of the Interstate & Foreign Commerce Committee," a Kilgore aide said. He added that present plans are to take up the TV monopoly question as "part of a group of inquiries into a number of industries," with some indication the probe may concentrate -- at the outset, at least -- on "monopolistic practices" in the manufacturing end of the TV industry.

Fears of possible overlap between the 2 investigations weren't dispelled by clarification offered Feb. 4 on Senate floor by Sen. Magnuson in debate over appropriation for Commerce Committee (Vol. 11:6). Under questioning by several Judiciary Committee members about conflicts between the committees on a number of inquiries, he said: "I wish to make it clear that in the study now being conducted and continued regarding radio, TV, and the Dixon-Yates contract, if any evidence of monopoly in those fields should be developed, it is my intention to send such evidence to the Committee on the Judiciary, which I think has jurisdiction over monopoly questions."

SOME PROVOCATIONS BEHIND PLOTKIN'S REPORT: There aren't many loud rooters for the provocative Plotkin Memorandum, which is generally regarded as a revived manifestation of the strict-control policy of unlamented New Deal days as against the laissez faire policy now more or less prevailing.

But whether the networks like it or not, the fact is that letters to Senate committee, mostly from "uhf losers," are heavily weighted on the side of Plotkin's recommendations; that the national station sales representatives, with their purse-string influence, would love to see the networks yanked out of the rep field; that the film syndicators would like to see option time abolished.

Bitterest antagonists of the networks seem to be the uhf and small-town operators, who blame them for much of their woes -- often unfairly, in fact, though it is true that 37 uhf stations have gone off air since July 1953. If the networks had

been freer in making affiliations with uhf stations, had kept hands off promoting the advent of vhf into uhf-pioneered markets, some of them think they might have fared better. They're looking for a "fall guy," of course, though it's evident some uhf projects were ill-fated economically from the start.

NBC retorts that FCC has been urging the networks to go into uhf, offering inducement of extra-2 ownership; that it has 5 primary uhf affiliates, plans super-power uhf operation of own on Mt. Higby, Conn. (Vol. 11:2); that it plans another at yet unselected site. CBS also has uhf affiliates, and itself is about to tackle the ownership of a uhf station (WXIX) in intermixed Milwaukee. And, so far as the small-town telecaster is concerned, CBS can point proudly to its efforts on their business behalf via its new Extended Market Plan (Vol. 10:49-51).

* * * *

Biggest detractors of network power -- though by no means full subscribers to Plotkin's ideas -- are station operators who lost affiliations through what they regard as no fault of their own. Affiliation pullaways got so serious lately that the trade journal Broadcasting-Telecasting reported this gag rampant at recent NARTB board meetings in Florida: "You can't tell your affiliation without a scorecard; get today's morning lineup." For some, it was pretty grim humor.

Those who lost or stand to lose major network affiliations are so bitter that some have gone to their Senators & Congressmen. On this score, CBS's record is the most easily assailed, notably on the score of its recent switches in Indianapolis, Cleveland, Kansas City, Omaha, Phoenix, Albany. Only last week it shifted away from U of Missouri's KOMU-TV, Columbia, to the new KRCG, Jefferson City, causing consternation at that commercially-operated university station.

There were business reasons behind each switch -- but that didn't conduce to make friends for CBS at Scripps-Howard, whose Cleveland outlet it forsook in favor of one newly purchased by Storer; in Kansas City, where it switched away from a station it helped put together less than 1½ years ago in order to tie up with Meredith whose Phoenix station it had abandoned in favor of Gene Autry's newly combined outlet; in Albany, where it dropped the uhf owned jointly by the veteran Col. Harry C. Wilder and powerful Stanley Theatre interests in order to switch to the uhf owned by a group headed by Lowell Thomas (now seeking switch to vhf channel).

NBC got into TV earlier, has enjoyed somewhat more steadfast loyalties, stemming in part from fact that it prodded so many of its affiliates into TV when video was still a risk venture and while CBS was still advising some of its oldest radio affiliates to stay out. Yet NBC's New Haven vhf affiliate is assailing it and threatening to go to court because NBC plans to make that area its major uhf proving ground, which means dropping that long-standing vhf affiliation. NBC plans another uhf, says it knows none worth having that it can acquire without losing an existing affiliate.

* * * *

After CBS's Albany switch, the Wilder-Stanley uhf quit the air last week (Vol. 11:6), darkening a plant said to represent \$1,000,000 investment. This move appears to be an obvious prelude to an anti-trust action, which means triple damage demands. Counsel for the Wilder station -- ex-FCC chairman Paul Porter, himself a onetime CBS lawyer and one of heads of the law firm in which Plotkin is a member -- is openly threatening legal action on grounds that Lowell Thomas used his bargaining position as a contract performer to gain an undue competitive advantage in another field.

CBS is not undisturbed by the cries of havoc it has evoked, but its position is that it is shifting and switching as matter of simple business prudence, not mere ruthless whim or caprice -- and that it is impelled by competition to seek best possible outlets it can get for its advertisers. There's no gainsaying that argument.

Yet there's no denying, either, that network loyalties are becoming more tenuous, more strained, as the TV child grows up and as more TV stations are born; that "divorces" and "remarriages" occur at the drop of a termination clause; that many affiliates, signing contracts for the FCC-imposed limit of 2 years but terminable on notices as short as 30-60 days, quake in fear of losing their network program bloodstream no less than they have always quaked at the powers of the FCC, no less indeed

than the whole industry has always stood in awe of the influence of Congress -- and especially of the Senate Committee on Interstate Commerce and its chairman.

Network loyalties are only dollar deep, it has been said -- and cold economic factors, not sentiment, have perforce dominated the competitive struggle ever since it became evident that dollar stakes had grown enormously as result of the "revolution" that TV has wrought in the business of broadcasting.

* * * *

The Plotkin report, Congressional probes, possible court suits -- everything seems to point up the inescapable fact that the networks, more especially NBC & CBS, exercise a life-or-death power over many affiliates -- much more so in TV than ever in radio -- albeit they are intense competitors; that ABC is coming along slowly as a competitive factor, still running a poor third; that DuMont, if it survives as a network at all, is likely to be on the side of stricter control, as it has been in the past, inclined to blame the other networks for its poor fourth position and wanting the Govt. to do something about it.

And the fact is that their very bigness, their huge profitability, their keen sense of political relations and sensitivity to political blandishments, make the networks convenient whipping boys for everyone with a gripe.

MANY VARIATIONS IN SATELLITE PATTERN: Big question about satellites is economic -- how they can be made self-sustaining, let alone profitable. FCC has given its go-ahead and proposes to relax rules even further -- to permit mere 100-watt outlets (Vol. 10:51) -- but the revenue-expense picture is still by no means clear.

We've spot-checked those who have grants or applications for satellites, and who propose little or no local originations initially, and find that their thinking varies considerably -- depending entirely on local conditions.

Most interesting operation proposed is that of KTRE-TV, Lufkin, Tex. (Ch. 9), due on air by Sept. 1. Though most proposed satellites are being built by metropolitan stations seeking to extend their coverage to smaller towns, KTRE-TV ownership is completely independent of KPRC-TV, Houston, from which it will get programs, including full NBC schedule. Agreement between the 2 is due to be signed shortly, so details aren't yet available, but general principle is that KTRE-TV will be able to insert slide and film commercials.

Mgr. Richard Lewin is greatly enthused over prospects, predicting that setup will furnish blueprint for bringing top-notch programming to small towns over the entire nation. "The economic base is assured," he said. "We have enough business committed from Texas advertisers alone to see us through the first year." Station will have 6 employes in addition to the 12 of radio KTRE. Lewin estimates he'll be able to operate at \$8000 or less per month.

Quite different approach is that of Richard O. Dunning, pres. of KHQ-TV, Spokane, Wash., which has applied for Ch. 5 in Walla Walla. Recently, a competing application for the channel was filed by KIMA-TV, Yakima, Wash. (Ch. 29), which operates satellite KEPR-TV, Pasco, Wash. (Ch. 19) and this week obtained non-satellite CP on Ch. 3 in Lewiston, Ida. Here is Dunning's outlook:

(1) "Satellites will be programmed by already existing network stations and therefore the programming costs, which normally are severe in television, are reduced to an absolute minimum.

(2) "If the satellite is located properly within the mother station trade territory, both network national spot and local rates can be increased as the satellite markets develop in sets-in-use.

(3) "Local announcements sponsored by business firms in the satellite communities can be sold at the satellite level in unoccupied announcement periods of the main station." Summarizing, Dunning says:

"At best, I personally do not see any great profit emanating from any satellite operation. In its final sense, it amounts to delivering TV service to a satellite market on a cost basis by the mother station. The only thing that would produce greater income and profit would be expansion and growth of the satellite

market, which would enable it eventually to be programmed partially on a local basis and sold on a local basis to local advertisers in the satellite market."

* * * *

Still another viewpoint is that of the small-city operator to whom even a small increase in sets-in-use is extremely important. Wm. C. Grove, mgr. of KFBC-TV, Cheyenne, Wyo., now constructing satellite KSTF, Scottsbluff, Neb. (Ch. 10) notes:

"It is an unalterable fact that the national advertiser, both spot and network, looks primarily at the cost-per-thousand. And so, any station must get its cost-per-thousand in line. KFBC-TV has had gratifying support from national spot advertisers during its less than one-year operation. Network programming, too, has come along very well. We are currently carrying approximately 15 commercial network shows per week. However, it is our desire to continually expand our hours of operation. This means more network programs are needed, and more national spot advertising, both for the programming and the revenue.

"By constructing KSTF at Scottsbluff, we will nearly double our set count, and we believe this is the way for small-town TV stations to do the job."

* * * *

A totally different problem confronts KGMB-TV, Honolulu, which now holds CPs for satellites KHBC-TV, Hilo (Ch. 9) and Ch. 3, Wailuku (no call letters yet). It's a matter of fantastically rugged terrain, v.p. C. Richard Evans points out.

Entire population of all the Hawaiian Islands is 500,000, with 3/5 of the people living within 10 mi. of KGMB-TV transmitter. "Economically," Evans says, "it is far easier to operate a successful TV station in a market of 500,000 people than it is in one of 300,000 and for this reason we are adding our new satellites." Job of reaching those other 200,000 can be done only by satellites, he adds. "The population outside of Honolulu is so widely scattered that an independently operated TV station would not be economically feasible at any out-island location. Community antenna systems are impractical. One example of the reason is that on the island of Hawaii you have a total of 65,000 people scattered along 200 mi. of coastline."

Evans points out that 35,000 live in Hilo district behind a 13,000-ft. volcano, another 35,000 on Oahu behind two 13,000-ft. volcanoes, 35,000 more in Maui valley between 10,000-ft. and 5000-ft. mountains, etc.

The only answer is satellites, Evans says, and if anyone talks of "monopoly" and "unfair competition," he adds, "it should be noted that these satellites are an added expense that many stations are not called upon to bear in order to render service and succeed economically. All 3 will be quoted on a single rate card."

From cost standpoint, only Hilo and Wailuku operations approach the popular concept of satellites. KGMB-TV's estimate for Hilo is \$33,035 for plant, \$9360 for yearly operating expenses; Wailuku would run \$24,435 to build, \$21,000 to operate. Estimate for Lufkin is \$133,554 for plant, \$75,000 for operating; Walla Walla, \$136,626 plant, \$31,200 operating; Scottsbluff, \$67,000 plant, \$48,000 operating. Even if the Commission relaxes rules to permit 100-watt operations with no minimum height, as expected, no drastic cost reduction is anticipated.

* * * *

Only one true satellite is actually operating today -- KEPR-TV, Pasco -- but no report on its operations has yet been supplied. Only one other satellite CP is outstanding -- KPAR-TV, Sweetwater, Tex. (Ch. 12) -- to be fed by KDUB-TV, Lubbock. There are 2 applications for Ch. 3 satellite in Mayaguez, P.R., filed by WKAQ-TV and WAPA-TV, San Juan. Competing with them is application for regular station filed by owners of WJMR-TV, New Orleans.

Term "satellite" should be used with caution. For example, both Scottsbluff and Lufkin will start with some local film and slides, and will expand as they can afford to. FCC itself meticulously avoids using the term -- because it wants to encourage expansion of local programming and not give impression it's setting up a separate class of stations from which it expects no local programs indefinitely. Worth noting is that virtually all applications and grants are for vhf.

Personal Notes: Thomas A. McAvity, NBC-TV network programs v.p., promoted to v.p. in charge of TV network; Richard A. R. Pinkham, v.p. in charge of participating programs dept., elevated to TV network programs v.p.; Earl Rettig, v.p. in charge of TV network program production & business affairs, moves up to TV network services v.p.; Mort Werner promoted to director of participating programs, Wm. V. Sargent to director of TV network business affairs . . . Sylvester L. (Pat) Weaver, NBC pres., leaves Feb. 12 on month's European vacation . . . Selig J. Seligman, asst. to ABC western div. v.p., named acting mgr., KABC-TV, Los Angeles; Amos Baron, named mgr. last fall, returns after siege of illness to former job of mgr. of radio KABC, with John Hansen becoming asst. to Elton Rule, KABC-TV sales mgr. . . . George A. Koehler promoted to new post of station mgr., WFIL-TV, Philadelphia, reporting to gen. mgr. Roger W. Clipp; Sherman Gregory advanced to TV sales mgr. . . . Jack L. Mohler, ex-WOR, N. Y., named director of sales development, CBS-TV Spot Sales; John Donald Foley promoted to director of sales promotion . . . David Williams, ex-International News Service, named eastern mgr., CBS-TV station relations dept. . . . Edwin R. Borroff, ex-v.p. in charge of old Blue Network's western div., later sales mgr. of Westinghouse Radio Inc., joins NBC central div. radio sales . . . Robert J. Kolb named regional sales mgr., WOR-TV, N. Y. . . . John Eichorn promoted to asst. to Otto Brandt, v.p.-gen. mgr. of KING-TV & KING, Seattle, replacing Robert Priebe, resigned; Fred Von Hofen succeeds Eichorn as mgr. of radio KING . . . Thomas E. Howard promoted to engineering v.p. of Jefferson Standard Bestg. Co. (WBTW & WBT, Charlotte; WBTW, Florence, S. C. & 16% of WFMY-TV, Greensboro) . . . Wm. Thomas Hamilton, ex-CBS, named sales mgr., WNDU-TV, Notre Dame station at South Bend (Ch. 46), which hasn't set on-air target yet . . . Dick Halloway, ex-WTRC, Elkhart, Ind., named national sales mgr. of WSBT-TV, South Bend, succeeding Robert H. Elrod, who resigned to join NBC, Chicago . . . John E. Hill, on leave from radio KDKA, Pittsburgh, appointed program mgr. of KTRK-TV, Houston . . . John Kelly promoted to station mgr., KRBC-TV, Abilene, Tex., Steve Cowan succeeding him as program director; Larry Fitzgerald promoted to production director . . . R. H. Rollinson appointed eastern sales mgr. of Quality Radio Group, tape network headed by Crosley's Ward Quaal . . . Stanley B. Cohen, associate of TV-radio attorney Leo Resnick, Washington, resigns as of March 8 . . . Burt Lambert, ex-WNEW, veteran of broadcasting industry, joins Ziv-TV . . . Jerry Cotter, ex-ABC, named director of TV research, National Legal Aid Assn., 36 W. 44th St., N. Y. . . . Frank W. McMahon named adv. & promotion mgr., MCA-TV film syndication div. . . . James Blair, mgr. of Philadelphia office, promoted to asst. national sales mgr., Teleprompter Corp. . . . Gordon A. Hellman, CBS-TV director of sales presentations, elected pres. of Johns Hopkins Club of N. Y.

Vitapix Corp. reelected WKZO-TV's John Fetzter as chairman, KWFT-TV's Kenyon Brown as pres., at N. Y. stockholders meeting this week, where it reported 6 new members had brought total to 53. Other officers: Edward Hall, exec. v.p. & gen. mgr.; Joe Baudino, Westinghouse, v.p.; Paul O'Bryan, Washington counsel, secy.-treas. Directors: Charles Crutchfield, WBT; William Fay, WHAM-TV; Edward Wheeler, WWJ-TV; Richard Borel, WBNS-TV; Howard Lane, KOIN-TV; Leonard Reinsch, WSB-TV; Robert Swezey, WDSU-TV; George B. Storer Jr.; Clair McCollough, WGAL-TV.

Comdr. Raymond Asserson Sr., 64, USN ret., 1913 graduate of the Naval Academy and onetime asst. chief engineer of FCC, died Feb. 4 at his son's home in St. Thomas, Virgin Islands.

Top executives of 27 CBS affiliates from 22 states, representing both vhf & uhf stations and comprising what CBS described as "a cross-section of the largest, median and smaller TV cities in the U. S.," attended N. Y. strategy meeting Feb. 9 to discuss Plotkin Memorandum (see stories, pp. 3-6). More than 20 executives of CBS, headed by CBS Inc. pres Frank Stanton and TV pres. J. L. Van Volkenburg, participated in meeting lasting from 10 a.m. to 5 p.m. Station people attending: E. K. Jett & Wm. F. Schmick Jr., WMAR-TV, Baltimore; Thomas O'Neil, John Poor & Gordon Gray, WNAC-TV, Boston; John W. Runyon, Clyde Rembert & A. Jackson, KRLD-TV, Dallas; George Storer Sr. & John McCoy, WJBK-TV, Detroit; Bruce McConnell, WISH-TV, Indianapolis; Wm. J. McNally, WCCO-TV, Minneapolis; Richard Slocum & D. W. Thornburgh, WCAU-TV, Philadelphia; Chris J. Witting & John Steen, KPIX, San Francisco; John Hayes, WTOF-TV, Washington; John M. Rivers, WCSC-TV, Charleston, S. C.; Robert Ridder, Walter Ridder & Rodney Quick, WDSM-TV, Duluth-Superior; Dorrance Roderick & Dick Watts, KROD-TV, El Paso; Edward A. Allen & Philip P. Allen, WLVA-TV, Lynchburg, Va.; Mrs. Jean Gannett Williams & C. E. Gatchell, WGAN-TV, Portland, Me.; Humboldt Greig, WHUM-TV, Reading, Pa.; John E. Fetzter, KOLN-TV, Lincoln, Neb.; John T. Griffin & Edgar Bell, KATV, Pine Bluff-Little Rock, Ark.; Franklin D. Schurz & Neil B. Welch, WSBT-TV, South Bend; Glenn P. Warnock, WAIM-TV, Anderson, S. C.; Wm. C. Grove, KFBC-TV, Cheyenne, Wyo.; Wm. B. Smullin, KBES-TV, Medford, Ore.; Donald W. Reynolds, KZTV, Reno; John B. Johnson, WCNY-TV, Watertown, N. Y.; Charles Lemke & George Frechette, WSAU-TV, Wausau, Wis.; W. C. Blanchette, KFBB-TV, Great Falls, Mont.; Ivor Sharp, J. W. Wright, Lenox Murdoch, KID-TV, Idaho Falls; John Boler, KCJB-TV, Minot, N. D.

New communications legislation introduced in Congress: By Chairmen Magnuson (D-Wash.) and Priest (D-Tenn.) of Senate & House Commerce Committees, S-950 & HR-3461, at request of Attorney General Brownell, prohibiting transmission of gambling information in interstate commerce, but specifically exempting TV-radio and printed media from liability in transmitting reports of "sporting events or contests, which might be gambling information"; by Sen. Langer (R-N. D.), S-923, to ban beer and liquor advertising in interstate commerce; by Rep. Miller (R-Md.), HR-3789, identical to Butler-Jenner-Potter Bill S-771 (Vol. 11:5), to deny Communists and subversives political "equal time" privileges.

Competition of TV is cited by Ben Marcus, pres. of big Allied States Assn. of Motion Picture Exhibitors, as reason for declining to run for re-election. In statement at exhibitors' convention in St. Louis this week, the owner of theatres in Milwaukee area said: "The heavy penetration of new TV stations in our area during this past year has created a tremendous pressure and demand on my time."

First educational fold-up, Los Angeles' uhf KTHE turned in its CP Feb. 9—5 months after quitting air following withdrawal of support of wealthy backer G. Allen Hancock in dispute with U of Southern California over station's operation (Vol. 10:26, 32). It was second educational station to go on air.

Television Bureau of Advertising reports \$365,000 out of its \$400,000 budget for calendar 1955 has been contributed by its 125 charter members. Pres. Oliver Treyz says he expects the \$400,000 figure to be exceeded shortly by additional members.

Due for network interconnection by AT&T during Feb.: KRCG, Jefferson City, Mo., Feb. 13; WFLA-TV, Tampa, Feb. 14; WMFD-TV, Wilmington, N. C., Feb. 18.

POLITICAL INTEREST in FCC procedures stepped up this week. AFL executive council, meeting in Miami Beach, voted to file with FCC and Congress a protest of what it termed the "tendency to concentrate the ownership of newspapers, radio and TV" in the hands of a few people. Action was initiated by Dade County (Miami) Central Labor Union, which is objecting to proposed decision favoring Ch. 7 grant in Miami to combination of Cox and Knight newspaper-broadcasting interests (Vol. 11:4).

On another front, Sen. Strom Thurmond (D-S. C.), member of Interstate Commerce Committee, made public letter to Chairman Magnuson in which he asked that something be done about "protest" section of Communications Act. Citing example of WSPA-TV, Spartanburg (Ch. 7), which has been prevented from going on air because of protests by WAIM-TV, Anderson (Ch. 40) and WGVL, Greenville (Ch. 23), he said Committee should reconsider law "which is enabling existing stations, and even broadcast interests, to jeopardize and hamper the work of the Commission and thereby delay needed TV service."

Commission granted 4 CPs meanwhile: Lewiston, Ida., Ch. 3, to operators of KIMA-TV, Yakima (Ch. 29) and KEPR-TV, Pasco, Wash. (Ch. 19); Hastings, Neb., Ch. 5, to Seaton Pub. Co. (Fred A. Seaton, Asst. Defense Secy.); New Bern, N. C., Ch. 13, to Nathan Frank, owner of WHNC, Henderson, N. C.; Sunbury, Pa., Ch. 38, to WKOK.

NBC's projected purchase of WKNB-TV, New Britain, Conn. (Ch. 30) ran into formal opposition this week when WNHC-TV, New Haven, petitioned Commission to set sale for hearing. Station submitted several charges, alleging that application for sale failed to disclose ade-

quate information on stockholdings of RCA-NBC officers; that "trafficking in licenses" is involved; that there will be overlap with WRCA-TV, New York; that chain regulations would be violated; that RCA has history of anti-trust violations, etc.

Commission again turned down application of Orange Belt Telecasters for Ch. 30, San Bernardino, Cal. First denied because of inadequate financial and technical qualifications, group amended application but FCC ruled that it still fell short.

Laborious efforts of defunct KFAZ, Monroe, La. (Ch. 43), which finally got Ch. 13 assigned to Monroe, ran into trouble when State Supt. of Education petitioned FCC to have the channel reserved for education.

Commission initiated rule-making on petition of WKST-TV, New Castle, Pa. (Ch. 45) which asked that Ch. 73 and Ch. 45 be switched between New Castle and Youngstown and that WKST-TV be permitted to move to Youngstown.

Another uhf switch is in prospect, WTVI, Belleville, Ill. (Ch. 54) filing this week to switch to off-air KSTM-TV's Ch. 36, proposing to move over to latter's plant, assuming equipment payments and dropping own facilities completely.

License of WBTW, Charlotte, N. C. was renewed this week, over objections of Comr. Hennock who complained that owner Jefferson Standard Life Insurance Co. has too many interests in area, through holdings in WBTW, Florence & WFMY-TV, Greensboro; that Commission should frown on Jefferson Standard's ownership of preferred stock of Storer Bestg. Co., etc.

Telecasting Notes: Kraft TV Theatre's superb live play *Patterns* on NBC Feb. 9, repeated just 4 weeks after smash-hit performance on same network same hour, proves that there can be good audience for repeat performances of top-hole shows. Certainly there was tremendous popular enthusiasm for the second as well as the first show, which the critics had acclaimed—*Time Magazine* stating it made the film *Executive Suite* "look like *Little Women*," as indeed it did . . . Many more such repeats can be expected henceforth to satisfy demands of audience that didn't catch originals—and the repeats, especially if they win such spontaneous critical reaction as this one did, and are given such exceptional buildups as this one was (full page ads), should enjoy even bigger audiences than the first show . . . Feature films are played over and over again on the same station or in same city—viz., *Million Dollar Movie*, shown 16 times in one week on WOR-TV—and they often get good enough ratings to please their sponsors. We recall one station manager in TV's early days who was so dead set against repeats of anything whatsoever, live or film, that he let a rival with an inferior network affiliation steal that ball away; he's no longer manager of the station, which lost money under his aegis and which now repeats aplenty . . . Warner Bros., queried direct, won't confirm or deny *Billboard's* Feb. 12 report that it's preparing to release all its 1933-44 sound pictures to TV, estimated to embrace 200 features. That would be biggest block since Monogram's 199 oldies were sold. Wires Warners' Mort Blumenstock from Hollywood: "Mr. [Jack L.] Warner has nothing to add at present time to *Billboard* story on TV" . . . Hollywood trade press, apparently also checking *Billboard* story, came up with stories, also unverified, that Warner may release 175 shorts, not features . . . It's apparent something is in the wind, and if Warner Bros. releases any of its features it might well trigger similar action by the other major producers. Only "official" news from Warner Bros. is that it's setting up new film subsidiary, to be headed by Jack M. Warner, son of production v.p. Jack L. Warner, following example of Columbia Pictures (Screen Gems). MGM is

said to have similar plans (Vol. 11:6) . . . Success of General Teleradio's syndicated *Million Dollar Movie* series, bought in Bank of America foreclosure, is one reason *Billboard* sees the exhibitors' attitude toward release of the oldies softening; that and Walt Disney's free use of his old films on ABC-TV's *Disneyland*, which has proved a tremendous boxoffice buildup for his current pictures . . . Another reason is that attendance at movies is up (average rose to 73,700,000 per week in late summer of 1954 from 34,400,000 in 3rd quarter 1953) which theatremen are citing as proof that the "TV novelty" has worn off. And there's hard fact that black-&-white oldies will lose much of their value if color TV ever catches fire . . . There's big money in re-runs, apparently, and surveys have proved they garner nearly as big audience as first (viz., *Dragnet*, reissued as *Badge 714*). Thus Screen Gems is now offering 5 separate 30-min. film packages for summer replacements—2 comprising re-runs of this season's *Ford Theatre*, 3 from this year's *Fireside Theatre* . . . Ten educational stations are now carrying Dr. Frank Baxter's first semester course on *Shakespeare on TV*, an origination of CBS Hollywood, which "discovered" the telegenic USC professor; the films are distributed free through Educational TV-Radio Center, Ann Arbor, Mich. . . . NBC buys assets of Martin Stone's Kagran Corp., including all rights to *Howdy Doody*, *Author Meets Critics*, other TV-radio properties.

Anti-trust suit against 12 major motion picture studios to compel them to release 16mm films to TV and other non-theatrical outlets (Vol. 8:34,39), has been set for trial starting Sept. 6 in Los Angeles Federal Court. In pre-trial hearing this week, 6 theatre exhibitor organizations were named as co-conspirators: Allied States Assn., Independent Theatre Owners Assn., Metropolitan Motion Picture Theatres Assn., So. Cal. Theatre Owners Assn., Pacific Coast Council of Independent Theatre Owners, Council of Motion Picture Organizations. Theatre Owners of America had previously been named as co-conspirator at its own request.

Station Accounts: Average of 74 national & regional spot TV accounts was carried on each of the 232 reporting stations during fourth quarter of 1954, according to quarterly *Rorabaugh Report on Spot TV Advertising* released Jan. 25. Top markets were New York, 7 stations reporting average of 101 accounts; Chicago, 4 stations av. 124; Los Angeles, 7 av. 111; Philadelphia, 3 av. 145; San Francisco, 3 av. 156. Top 25 national spot advertisers for the quarter, in order of number of stations used for all products, are listed as Procter & Gamble, Brown & Williamson (Kool & Raleigh cigarettes), National Biscuit Co., General Motors, Colgate-Palmolive, R. J. Reynolds Tobacco Co. (Camels), General Foods, Ford Motor, Bulova Watch, Miles Laboratories (Alka-Seltzer), National Carbon Co., Block Drug, Grove Laboratories, Du Pont, Chrysler, Carter Products, Anahist, Vick Chemical, B. T. Babbitt, Peter Paul, Chesebrough, Northern Paper Mills, Maybelline Co., Borden, Folger's Coffee . . . Lewyt Corp. (vacuum cleaners) has budgeted \$2,000,000 for all-media spring campaign, starting March 15, thru Hicks & Greist, N. Y. . . . Royal Crown Cola, in unusually large single-sponsorship deal, buys MCA-TV's 15-min. weekly *Ames Brothers Show* in Class A time on 195 stations starting April 1, for 26 weeks, thru BBDO . . . Ohio Oil Co., concluding 26-week sponsorship of Official Films' *Secret File U.S.A.*, buys Procter's *Man Behind the Badge* in 12 midwest markets . . . Mennen Co. to be alt. week sponsor (with El Producto Cigars) of *Professional Boxing* on WABD, N. Y. for 13 weeks starting Feb. 21, Mon. 9-11 p.m., thru McCann-Erickson . . . Iberian Airlines of Spain signs for 13 weeks as full sponsor of *Operation Success* on WRCA-TV, N. Y., starting Feb. 2, Sat. 5:30-6 p.m.; with narration by Quentin Reynolds, program depicts growth of American business and its executives . . . Max Factor (cosmetics) plans \$1,500,000 TV spot campaign in 53 cities, thru Doyle Dane Bernbach, N. Y. . . . Toy Guidance Council plans big 1955 TV-radio campaign somewhat in excess of the \$500,000 spent last year, will make series of 15-min. films, thru Friend-Reiss-McGlone, N. Y. . . . Nestle Co., pushing its "all-climate" Instant coffee, emphasizing it's soluble in cold as well as hot water, lines up west coast spot campaign as testing ground, thru Bryan Houston Inc., N. Y. . . . Norwegian Cannery Assn. adds 8 major markets to its all-media campaign for 1955, thru McCann-Erickson, N. Y. . . . American Chic Co. introducing new product, Rolaides, with spot campaign in several major markets for 26 weeks starting March 7, thru Ted Bates & Co. . . . Among other advertisers currently reported using or preparing to use TV: Bymart-Tintair Inc., N. Y. (Lanair creme color hair dressing), thru Kaster, Farrell, Chesley & Clifford, N. Y.; Brown & Haley, Tacoma, Wash. (Mountain Bar candy), thru Honig-Cooper Co., Seattle; A. J. Canfield Co., Chicago (carbonated beverages), thru Wesley Aves & Assoc., Chicago; Ironite Inc., Mt. Clemens, Mich. (ironers), thru Brooke, Smith, French & Dorrance, Detroit; Morton Packing Co., Louisville (frozen beef pot pie), thru Ted Bates, N. Y.; Karl Seiler & Sons, Philadelphia (Gooseneck liverwurst), thru Lavenson Bureau of Adv., Philadelphia; Harriet Andre Inc., N. Y. (Tress Kit hair conditioner), thru Product Services, N. Y.; Durham-Enders Razor Corp., Mystic, Conn. (safety razors), thru Fletcher D. Richards, N. Y.; Aluminum Cooking Utensil Co., New Kensington, Pa. (Wear-Ever aluminum foil), thru Fuller & Smith & Ross, N. Y.

Sponsor Magazine has issued new *Television Dictionary-Handbook for Sponsors*, compiled by Herbert True of Notre Dame English and adv. dept., with aid of 37 contributors; 50-p. booklet defines 2200 trade terms, costs \$2.

Broadcast Information Bureau, 535 Fifth Ave., N. Y., has published new edition of its *Directory of "Free" TV Film*, listing 700 new titles of public relations films available to TV stations.

Network Accounts: Shared sponsorships on top-flight shows will be intensified this fall on NBC-TV, which is planning to break up several of its big-name programs into segments of 15-min. or less as answer to advertisers' complaints of soaring costs. Though final decision hasn't been reached, plans are to start by offering 8-9 p.m. time period on Sun., Mon. & Tue. for multiple sponsorship. Mon. is filled by *Caesar's Hour*, Tue. by Milton Berle & Martha Raye, Sun. by a new comedy show to replace *Colgate Comedy Hour*. Known as "Criss-Cross Plan," it will permit sponsor to be represented on all 3 shows on rotating basis, if he wishes . . . ABC-TV says it expects to gross \$13,000,000 in time-&-talent for 52-week run of Disney's new *Mickey Mouse Club* starting in fall, signing Colgate & Borden's for 15-min. segments this week; Campbell's Soup & General Mills have already bought quarter-hours . . . H. J. Heinz Co. to sponsor filmed *Captain Gallant of the Foreign Legion* on NBC-TV starting Feb. 13, Sun. 5:30-6 p.m., thru Maxon Inc. . . . Admiral buys alt. sponsorship (with Sheaffer Pens) of *Who Said That?* on ABC-TV, Wed. 9:30-10 p.m., thru Russel M. Seeds Adv., Chicago . . . Jackie Gleason, who recently signed \$11,000,000 2-year sponsorship contract with Buick starting in fall (Vol. 10:52), this week lost a sponsor—Sheaffer Pen Co., which decided that since it couldn't have Gleason next fall, it wasn't worth the money to continue after March 26 as one of his 4 sponsors . . . National Biscuit Co. & International Harvester to cancel *Halls of Ivy* on CBS-TV Tue. 8:30-9 p.m. at end of current season . . . General Mills & Ovaltine switch *Captain Midnight* on CBS-TV to Sat. 11:30 a.m.-noon starting March 5, replacing filmed *Abbott & Costello*, which was dropped by Campbell Soups . . . Green Giant Peas & Pillsbury drop Mickey Rooney film, *Hey Mulligan!* on NBC-TV Sat. 8-8:30 p.m. . . . GE drops Wed. 8-8:30 time period on NBC-TV, occupied by *I Married Joan*, following star Joan Davis' temporary retirement from TV because of health.

New frequency discount plan, whereby an advertiser who buys fourteen 10 or 20-sec. station breaks during Sun.-thru-Sat. week receives 50% discount on those breaks in Class D or C time, was launched Feb. 13 by WRCA-TV, NBC's N. Y. flagship. Titled "14-50 Plan," discount arrangement applies to station breaks before 5:59 p.m. and after 11:15 p.m., including *Tonight* series, and on one-min. partic. in designated programs. "If 10 or 20-second station breaks in AA, A or B time are part of the 14, all breaks contribute," station announced, "but the A or B only receive those discounts earned. The 14-50 Plan provides, however, that if the advertiser employs at least one ID or 20-second on a 7-day basis in D and/or C time, the advertiser earns an additional 10% discount on those 10's or 20's he may be running in A or B time." Partic. programs also included in plan are: *Big Matinee* (Mon.-thru-Fri. 2-2:30 p.m.); *Sunday Theatre* (Sun. 9-10 a.m.); *Channel 4 Theatre* (Sat. 1-2 p.m.); *Charity Bailey* (Sun. 10-10:30 a.m.); *Junior Champions* (Sat. 5-5:30 p.m.)

Broadcasting & Film Commission of the National Council of the Churches of Christ in U.S.A. meets March 1 to approve 1955 TV-radio budget of \$1,400,000. The Commission's *This Is the Life* is currently on 235 TV stations as sustainer, according to Rev. Dr. S. Franklin Mack of N. Y., exec. director. On Oct. 1 a new filmed series of interviews with outstanding Christian spokesmen will be launched. In addition, it plans to expand TV-radio workshops and will urge appearances of more ministers on TV. Commented Dr. Mack: "It can be said with confidence that any pastor appearing once on a local TV station can be assured of an initial audience in excess of the aggregate audience in the pews of his church in a year's time."

Robert W. Sarnoff, NBC exec. v.p., named chairman of 1955 fund drive of National Multiple Sclerosis Society.

BIBLE SCHOOL owners of projected new WCBC-TV, Anderson, Ind. (Ch. 61), won't accept beer or cigarette advertising and will carry no programs "which place undue emphasis on violence, crime or sex." Grantee is Great Commission Schools, owned by denomination known as Church of God and operating Anderson College & Theological Seminary. It's the third station owned by a religious institution to be projected as a commercial outlet, others being Norbertine Fathers' WBAY-TV, Green Bay, Wis. (Ch. 8), and Notre Dame's upcoming WDNV-TV, South Bend, Ind. (Ch. 46).

WCBC-TV has RCA 1-kw transmitter and studio equipment bought from John L. Booth's now defunct WBKZ-TV, Battle Creek, Mich. (Ch. 64), and is shooting for May 1 target. Anderson, pop. about 50,000, is 7-mi. from Muncie, where WLBC-TV operates on Ch. 49, and 32-mi. from Indianapolis, with 2 vhf. Local high school gym will first be used for originations, but plans are under way for 20 x 40-ft. studio. Worth S. Rough, from radio WCBC, will be gen. mgr.; Fred M. Mullen, ex-WAVE-TV & WFBM-TV, program director. Rep has not yet been chosen.

GE reports order for 50-kw amplifier from upcoming WPRO-TV, Providence (Ch. 12), and shipment of 1-bay helical antenna to WOKY-TV, Milwaukee (Ch. 19), which becomes WXIX Feb. 27 when CBS takes it over. DuMont shipped 50-kw amplifier Feb. 9 to WLVA-TV, Lynchburg, Va. (Ch. 13). RCA shipped 25-kw amplifier Feb. 9 to WMBV-TV, Marinette-Green Bay, Wis. (Ch. 11).

* * * *

In our continuing survey of upcoming stations, these are latest reports received from principals:

KTRE-TV, Lufkin, Tex. (Ch. 9), planning to operate as satellite of KPRC-TV, Houston, doesn't expect to begin tests until next Aug., with programming Sept. 1, according to pres. R. W. Wortham Jr. It hasn't ordered equipment yet, plans to file with FCC for new and higher site and increased power. Base rate will be \$150. Rep will be Venard, Rintoul & McConnell.

KWTV-TV, Waco, Tex. (Ch. 10), granted last Dec., plans March 20 test patterns, April 1 programming, according to mgr. M. N. Bostick. It will use 461-ft. Andrews tower, has ordered RCA equipment for new studio-transmitter building, which is scheduled to be ready by March 1. It will be city's second outlet, KANG-TV (Ch. 34) having begun in Oct. 1953. Base rate will be \$200. Rep not yet chosen.

Oklahoma Educational TV Authority, grantee of educational stations KETA, Oklahoma City (Ch. 13) and KOED-TV, Tulsa (Ch. 11) has funds available for 10-kw transmitters, writes director John W. Dunn, in charge of U of Okla. radio KNAD, Norman. But it's contemplating 50-kw for KETA, 25-kw for KOED-TV, consequently is "holding off" target dates, he adds. KETA already has 14-section RCA antenna on commercial KWTV's 1572-ft. tower; KOED-TV has an identical antenna for installation on KOTV tower, which it will lease along with studio space for \$1 a year. Construction will be financed by bond issues; operating funds must come from legislature.

President's televised press conferences, while a highly desirable development, need better facilities to take full advantage of TV cameras, in opinion of *New York Times'* veteran political writer James B. (Scotty) Reston. He writes that "facilities for putting on the weekly show are something right out of the McKinley Administration." The old State Dept. treaty room, where the conferences are held, is "beyond question, the most ornate antiquity" in Washington, lighting is poor, cameras are stuck on improvised platform in back of room and all the "visible electronic paraphernalia detracts from the business at hand."

National Community TV Assn. has established 12-man standards and practices committee to set up code covering community antenna operations — an effort designed to meet scattered complaints from subscribers and to show state utilities commissions industry can be self-regulating. Last year, Wyoming commission took over regulation; currently, Vermont & Maryland commissions are investigating reports of irresponsible operations. Chairman of committee is attorney George Barco, operator of system in Meadville, Pa. Other members: Charles E. Brown, Richland, Wash.; Ned W. Cogswell, Oil City, Pa.; Wm. Daniels, Casper, Wyo.; Raymond Hedge, Tyler, Tex.; A. J. Malin, Laconia, N. H.; Paul McAdam, Livingston, Mont.; Fred J. Stevenson, Fayetteville, Ark.; W. R. Tucker, Florence, Ala. Manufacturer members: H. M. Diambra, Entnon; Milton J. Shapp, Jerrold; Fitzroy Kennedy, Spencer-Kennedy. Advisers: Glen McDaniel, RETMA pres. and counsel for Fox, Wells & Co., operators of several systems; E. Stratford Smith, NCTA exec. secy. & counsel.

Among out-of-town station executives attending dinner of Radio & Television Correspondents Assn. for President Eisenhower in Washington Feb. 5: Spencer Allen & Bruce MacFarlane, WGN-TV, Chicago; Fred Allman, WSWA-TV, Harrisonburg, Va.; Hoyt Andres, KSWO-TV, Lawton, Okla.; James Bormann & Larry Haeg, WCCO-TV, Minneapolis; J. E. Campeau, CKLW-TV, Windsor, Ont.; Charles Crutchfield & Jack Knell, WBT, Charlotte; Tom Eaton, WTIC, Hartford; Robert C. Embry, WITH, Baltimore; Robert Dunville, Terry Flynn & Peter Grant, WLWT, Cincinnati; Michael Goode, WNHC-TV, New Haven; E. K. Hartenbower, KCMO-TV, Kansas City; Payson Hall, Meredith stations; Otto Brandt & Florence C. Hoff, KING-TV, Seattle; Clair McCollough, WGAL-TV, Lancaster, Pa.; George B. Storer, WGBS-TV, Miami; Russ Van Dyke, Des Moines; Seymour Siegel, WNYC, N. Y. Besides cabinet officers, FCC members and other Washington brass, the networks had large delegations—ABC's led by Edward Noble, Leonard Goldenson & Robert Kintner; CBS's by Frank Stanton & Jack Van Volkenburg; DuMont's by Keeton Arnett; MBS's by Tom O'Neil; NBC's by Pat Weaver & Robert Sarnoff.

Lower-cost microwave TV service, based on off-air pickups (Vol. 10:51), is being pursued actively by AT&T, whose officials met with FCC staff recently to give general outline. AT&T has been lambasted by hinterlands TV stations who claim that they don't need AT&T's "gold-plated" service and that they can provide own microwave links at far lower cost. AT&T officials didn't indicate what new service would cost or when it would start. That it would be substantially less, however, is clear from fact that off-air service would eliminate station connection charges and local loops. Connection charges alone run \$500 monthly for monochrome, \$450 extra for color.

Conversion kit for air-cooled operation of RCA TT5A water-cooled TV transmitters was announced this week by Standard Electronics Corp., Newark, which claims these advantages for air-cooled operation: tube changing in minutes, simple cooling, improved accessibility of parts, easy maintenance, lower tube costs based on long-life tubes replaceable at \$275 each, possibility of expanding to higher power supply by adding air-cooled Standard amplifier stages, elimination of difficulties due to leakage, sedimentation, etc. Cost of conversion is \$10,500, including engineering service, materials, tubes, transportation, living expenses, etc.

Jake (Greasy Thumb) Guzik, member of old Capone gang, has asked FCC to revoke license of WBKB, Chicago, stating that it was preparing to telecast a libelous biography of him. It's expected Commission will reply that it's forbidden to censor programs.

ARMS CONTRACT SQUEEZE HITS TV MAKERS: An alarming situation -- for which no real remedy is in sight -- is rapidly developing in military aviation electronics. It has already affected some old-line electronics manufacturers, and it seems certain that TV-radio manufacturers will be among the hardest hit.

Though there's been no slowdown in military electronics procurement, many small and marginal companies -- as well as larger firms specializing in TV-radio, particularly those in east & midwest -- are finding Air Force contracts and subcontracts harder to get. And there's ample evidence that this is only the beginning.

The reason: Aircraft manufacturers are going into electronics in a big way, encouraged by Air Force procurement policies. First definitive survey in this field, made by McGraw-Hill's authoritative Aviation Week, shows that one out of every 5 engineers now employed by aircraft manufacturers is in electronics -- and that the aircraft manufacturers are planning to double their electronics engineering staffs within next 5 years (for further facts & figures, see Electronics Reports, p. 15).

Emphasis in Air Force procurement is now shifting to guided missiles. Dollar-wise, as much as 75% of a guided missile contract may go for electronics. And the airframe manufacturers are anxious to get bigger share of these contracts. At the same time they're tooling up to produce more of the electronics gear required in conventional piloted military planes. This equipment is being developed in big new laboratories, some of them built with govt. money.

Air Force procurement policies for the guided missile age are helping aircraft companies achieve their goal of getting electronics as well as airframe procurement and research dollars. Principal of these new policies is the "weapons system" concept, which gives one manufacturer full responsibility for design & integration -- and more responsibility for procurement -- of all components going into such military aircraft end-items as guided missiles.

Because Air Force is more inclined to deal with aircraft manufacturers, they generally get weapons-system contracts. The aircraft makers thus have inside track on electronic items going into the end products, through their control over specifications and general design.

Only 4 weapons-system contracts, to our knowledge, have thus far gone to companies identifiable as essentially electronics manufacturers -- to Western Electric (for the first "Nike" order), to Hughes Aircraft (which now considers itself an electronics rather than airframe manufacturer) and to Raytheon and Philco. The remainder have been awarded to companies in the business of building airframes.

RETMA has not yet established a policy on the problem. Its electronics industry committee is studying and reviewing whole question.

UHF EXCISE TAX EXEMPTION UP AGAIN: You've heard a lot about the "Plotkin Memorandum" (p. 3) -- may have assumed it relates only to the business of broadcasting. But it has some important implications for the manufacturing-distribution field, too, which undoubtedly will be aired further in future Senatorial hearings.

Plotkin revives the excise tax proposal which was unsuccessfully espoused in the last Congress by then Sen. (now Colo. Gov.) Edwin Johnson, backed whole-heartedly by Sen. Potter's communications subcommittee and Sen Bricker's Commerce Committee, emasculated by Finance Committee, and finally killed by Congressional inaction. In his provocative 44-p. report now being attacked bitterly by the networks, Plotkin outlines 2 possible exemption proposals, indicates preference for method No. 2:

"If the idea of tax relief is acceptable, the question remains as to what form it should take. One form is to grant an exemption for all-channel receivers only. Another method is to grant relief only if the manufacturer undertakes to market in the United States all-channel TV receivers only."

Proposal received only lukewarm industry support when last proposed -- due in part to squabbles over definition of "all channel receiver." Most controversial part of Plotkin's excise tax proposal is this recommendation:

"It is entirely too easy for a manufacturer to label a receiver as an all-channel set but that is no assurance that it will work in the home. It is therefore imperative that some certificate from a govt. agency should be required certifying that the all-channel set in question is in fact capable of receiving all TV channels under normal home viewing conditions. Only such a procedure would guarantee that the receiver being offered for sale would in fact contribute to the building of uhf as well as vhf circulation."

Manufacturer would be able to sell vhf-uhf set as cheaply or even cheaper than vhf-only set under terms of both Plotkin proposals & Sen. Johnson's bill. Senate Finance Committee, at end of last session, eliminated tax exemption, substituted a \$7 tax credit for sets equipped for uhf. This is measure which died with Congress.

The \$7 tax exemption has been proposed again in new excise tax bill introduced this session by House Majority Leader McCormack (D-Mass.) as HR-1814. Because the bill contains other excise tax provisions being pushed by special interest groups, it may get relatively prompt consideration. So Congress may be faced with voting on uhf excise tax relief before Magnuson Committee even gets around to discussing it.

Just 1,383,486 uhf-equipped sets were produced during 1954, or 19% of total TV production of 7,346,715, down slightly from the 1953 output of 1,459,475, which was 20% of that year's total of 7,214,784. These figures do not include strips, external converters, or internal conversions made outside the factory. Thus at least twice that number -- probably more than 6,000,000 sets which can receive uhf -- are now in use in the United States.

* * * *

TV production totaled 171,624 week ended Feb. 4, up from 154,421 preceding week and 150,985 in week ended Jan. 21. It was year's 5th week and brought output for year to date to about 835,000, compared to 530,000 in similar period of 1954.

Radio production totaled 264,693 (151,449 auto), compared to 226,054 in week ended Jan. 28 and 262,949 week before. It brought 5-week radio output to 1,270,000, compared to 1,100,000 in corresponding period year ago.

Retail TV sales of 7,317,034 in 1954 set all-time annual record, RETMA report this week confirmed, exceeding the 6,370,571 TVs sold in 1953. In fact, retail sales almost equalled the 7,346,715 sets produced last year. TV production in 1953 totaled 7,215,827. Retail radio sales in 1954 totaled 6,430,743, excluding auto radios. The latter are not included in RETMA data, as most are sold directly to auto producers. Production of auto radios was 4,100,000 -- and nearly all are estimated unofficially to have been sold. In 1953, some 7,031,293 radios (excluding auto sets) were sold.

Trade Personals: Leonard F. Cramer resigns as Avco v.p. & gen. mgr. of Crosley TV-radio div., which henceforth will be more closely integrated with home appliances div. under exec. v.p. Parker H. Ericksen . . . Goddard Lieberson, executive v.p., Columbia Records, named head of Yale advisory committee to help build up university's collection on the American musical theatre; on his committee are Cole Porter, Noel Coward, Ira Gershwin, Richard Rodgers, Oscar Hammerstein II and other musical notables . . . Dr. Rudolf G. E. Hutter, physical electronics mgr. of Sylvania lab at Bayside, N. Y., promoted to lab mgr. . . . Adam Abel upped to Bendix Radio director of engineering & research, succeeding Arthur C. Omberg, now asst. to gen. mgr. of missile section . . . A. D. Adams re-elected to 4th term as exec. secy. of Phonograph Manufacturers Assn., N. Y. . . . H. B. Seabrook named commercial sales mgr., RCA Victor Co. Ltd., Montreal, succeeded as engineering div. mgr. by J. G. Sutherland . . . Don L. Davison named Hallcrafters Cleveland district sales mgr.; James H. Baine Jr., Memphis; M. L. Judd, Allen Park, Mich. . . . Ralph D. Atkinson, ex-Washington, D. C., named Stromberg-Carlson northwest district merchandiser, Seat-

tle . . . Joseph H. Gibbs promoted to asst. sales mgr., Blonder-Tongue Labs, reporting to sales mgr. Joseph H. Kerner . . . Harold Brown and S. Joseph Mansker named DuMont Miami district mgrs.

Rear Adm. Wm. B. Ammon Feb. 28 completes tour of duty as director of naval communications, becoming commander of battleship div. 2, Atlantic Fleet. Rear Adm. Henry C. Bruton, now deputy chief of naval operations (administration) takes over Ammon's post early in March, with asst. director Capt. Gordon L. Caswell taking over post between time of Ammon's departure and Bruton's assumption of new duties.

William E. Robinson, member of RCA board of directors, onetime publisher of *N. Y. Herald Tribune* who left to become chairman of Robinson-Hannagan Assoc., public relations firm founded by the late Steve Hannagan, has been elected president of Coca-Cola Co., succeeding H. B. Nicholson, now chairman.

Hugo Cohn, exec. v.p., elected pres. of Radio Receptor Co., succeeding Ludwig Arnson, who continues as a director and consultant. Harold R. Zeamans elected secy.-treas.

Topics & Trends of TV Trade: Record industry leaders this week reviewed results of their widespread price reductions up to 40% at start of year (Vol. 11:1)—and only RCA Victor, which was first to cut prices, expressed complete satisfaction. Emanuel Sacks, v.p. & gen. mgr. of RCA Victor record div., said retail unit sales of its classical long-playing records in month ended Feb. 3 increased 100% over corresponding period of 1954 while dollar volume increased 32%. He also announced that the price cuts would be guaranteed by RCA through July 31.

Other companies do not share Victor's enthusiasm. In Feb. 6 *New York Times*, business writer Alfred R. Zipser Jr. quotes Columbia Records pres. James B. Conkling as stating that unit sales increased 10-15% over Jan. 1954, but that dollar volume remained about same. He said dealers had expressed disappointment about profit margins. W. H. Fowler, sales v.p. of Capitol Records, said: "There have been very few indications to date that our price cuts have resulted in any sizable increases in sales to consumers." Decca Records spokesman had similar comment.

* * * *

Picture tube sales in 1954 set new record of 9,913,504, valued at \$209,182,344, compared to 9,839,138 worth \$234,861,041 sold in 1953, reports RETMA. Dec. sales were 1,009,398, valued at \$20,521,562, compared to 1,157,866 worth \$27,140,693 in Nov. & 644,287 at \$14,801,856 in Dec. 1953. Receiving tube sales in 1954 totaled 385,089,458, valued at \$275,998,903, compared to \$437,091,555 at \$303,675,313 in 1953. Dec. sales were 37,908,894 worth \$27,391,916 vs. 38,781,863 at \$27,618,868 in Nov. & 23,404,026 at \$17,832,387 in Dec. 1953. [Note: Tabulation of picture and receiving tube sales, 1947-54, with breakdowns by initial equipment, renewal, export govt. & factory value, is included in our newly issued spring *TV Factbook No. 20.*]

Discount houses are here to stay, and "legitimate" retailers might as well recognize the fact and stop fighting them, in opinion of noted economist Vergil D. Reed, J. Walter Thompson Co. research v.p., member of Market Research Council & ex-pres. of American Marketing Assn. Addressing National Assn. of Wholesalers in Washington, he said: "You should spend your time better shoveling smoke or trying to contain gas in a rubber band than in fighting the discount house and in fighting for price fixing under the misleading headline of 'fair trade.'" He said fair trade laws are unenforceable in a buyer's market.

Philco was granted extension this week until March 2 to file its answer in Philadelphia Federal Court to recent Justice Dept. anti-trust complaint charging company's distributor franchise agreements are illegally restrictive (Vol. 10:51). Reply was originally due Feb. 14.

Kaye-Halbert's suit against Caltech Electronics Corp., charging secret information on 100% printed circuit chassis had been pirated by several ex-Kaye-Halbert employes now with Caltech (Vol. 10:25, 29), was dismissed this week at plaintiff's request.

National Video Corp. is now fully relocated at new headquarters, 4300 W. 47th St., Chicago, with factory capacity of 4000 picture tubes a day, reports gen. mgr. Don C. Stixrood.

Trav-Ler Radio Corp., to pay off existing bank loans, is reported planning a \$1,500,000 bond issue (6%) in March through Straus, Blosser & McDowell, Chicago.

Feb. 14 week network color schedules: NBC-TV—Feb. 16, *Norby*, 7-7:30 p.m. CBS-TV—Feb. 17, *Shower of Stars*, 8:30-9:30 p.m. On Feb. 23, Kraft TV Theatre will present *Emperor Jones* in color, first time a sponsor has put one of its regular shows in color since NBC ended its "introductory year" wherein each sponsor had at least one of his regular shows in color.

DISTRIBUTOR NOTES: Hoffman Electronics purchases its Fresno distributor, Kinney & Faust, will establish it as factory branch; E. Edward Faust remains as gen. mgr., Wendell H. & Roland T. Kinney retiring from business . . . Olympic Radio: Midwest Radio & Supply Co., Terre Haute . . . DuMont: Graybar, 850 W. Jackson Blvd., Chicago (Wm. E. Guy, district mgr.), replacing own factory branch; Graybar formerly handled Hoffman . . . Kaye-Halbert reopens factory branch at 3885 Pacific Coast Blvd., San Diego (Wm. Tremlein, district mgr.) . . . Gross Distributors Inc., N. Y. (Stromberg-Carlson) appoints George F. Barth, ex-Olympic Radio, as adv. & sales promotion mgr. . . . Motorola Sales Ltd., Montreal, promotes James M. Kind to branch mgr. . . . Joe Thiele Inc., San Antonio (Zenith) appoints Addison J. Marts sales mgr., Elmo Bohmann service & parts mgr. . . . Graybar transfers E. R. Yonkers from Detroit to Cleveland district mgr.

Indiana Steel Products Co. calls special meeting of stockholders Feb. 15 on proposal to increase authorized common shares from 200,000 (\$1 par) to 500,000 and to grant option for stock purchases to key executives & employes. Proxy notice reveals company has "under consideration" plan to split 143,149 outstanding common shares 2-for-1 but has reached "no definite conclusion." Stock option plan gives board of directors right to select executives & personnel eligible to buy up to aggregate of 14,000 shares at 100% of fair market value of stock on date option is granted. Notice reveals these remunerations to officers in 1954: pres. Robert F. Smith, \$45,333; v.p. John H. Bouwmeester, \$34,666; v.p. Charles A. Maynard, \$32,666.

Sears, Roebuck & Co., part owners of receiver manufacturers Warwick Mfg. Corp., Chicago, & Pacific Mercury TV Mfg. Corp., Sepulveda, Cal., has acquired control of Electronica Mexicana, Mexico City, for production of TVs, radios & cabinets. It's currently constructing factory comprising 2 buildings of approximately 25,000-sq. ft. each, expects to be in full production by June. About 150 will be employed. Edward S. Donnell is pres. of Sears' Mexican subsidiary, which operates 8 stores and is building 2 more.

FCC's new type-approval and type-acceptance rules, covering non-broadcast transmitters (Vol. 11:6), won't go into effect until May 16. Commission ruled this week, acting on petitions of RETMA, GE, DuMont & Collins. FCC said it would give industry time to form committee, including Commission personnel, with goal of improving rules. But it turned down industry's requests for additional time to standardize measurement techniques.

RETMA's midwinter industry conference Feb. 14-17 at New York's Roosevelt Hotel will consider report by pres. Glen McDaniel on organization's strategy in urging Congress to halve 10% excise tax on black-&-white sets and eliminate it on color (Vol. 11:4). All committees meet first 2 days, with board meeting final day.

RCA Victor's line of portable radios, priced from \$25 to \$50, features new "Impac" plastic cases in 5 of the 7 new models, guaranteed for 5 years against breakage. James M. Toney, gen. mgr. of RCA Victor Radio & "Victrola" Div., said "market surveys indicate that the industry will sell 1,500,000 portables this year."

Bill striking at discount houses (HR-567), under which manufacturers would be required to make same terms for quantity discounts known and available to all their customers, has been introduced by Rep. Patman (D-Tex.) and referred to House Judiciary Committee.

DeWald Radio introduces 7 new TV models, ranging from 21-in. mahogany table at \$190 to 24-in. open-face blonde console at \$395.

Trav-Ler Radio introduces 24-in. mahogany veneer table model at \$200.

Electronics Reports: How deeply the aircraft manufacturers are getting into electronics—and how much further they intend to go—is shown in these startling figures from a recent survey by *Aviation Week* (see p. 12):

Some 20% of all engineers employed by aviation companies are in electronics. Whereas in 1939 there were but 200 electronics engineers in the entire airframe industry, today there are more than 6200, and the top aircraft manufacturers estimate there may be more than 11,000 within 5 years. About 55% of aircraft industry's electronics engineers are working on guided missiles, 43% on piloted aircraft, remaining 2% on miscellaneous jobs.

Clue to aircraft industry's electronics plans is this breakdown of duties of that industry's electronics engineers: Of those working on piloted aircraft, 20% are assigned to developing equipment in their own labs, 13% supervising outside vendor developments, 47% in installation engineering, 15% in flight test & instrumentation, 5% in miscellaneous jobs. In guided missiles, 45% are developing equipment in own labs, 14% supervising outside vendor developments, 20% in installation engineering, 19% flight test & instrumentation, 2% miscellaneous.

Aircraft industry's big push into electronics production hasn't even started yet. But fact that more than 2000 airframe industry electronics engineers are assigned to "in-house" research & development is strong indication aircraft industry is making big effort to produce items now supplied by established outside electronics companies. There are even indications that some aircraft manufacturers may even be preparing to move into non-military and non-aircraft electronics fields.

Path is not entirely clear for aircraft industry's headlong plunge into electronics. For one thing, comparatively few of the industry's electronics items have reached full-production stage—and electronics industry is quick to point out that airframe manufacturers lack the production know-how built up over many years by old-line electronics firms. Too, Air Force weapons-system contracts contain clause intended to prohibit govt. financing of new production facilities for weapons-system contractors. Its effectiveness is open to dispute.

* * * *

Daystrom Inc., Elizabeth, N. J., already deeply in electronics through its Daystrom Electric Corp. (Crestwood tape recorders) and its control of Weston Electrical Instrument Corp., recently completed purchase of Heath Co., Benton Harbor, Mich., maker of Heathkit do-it-yourself electronic instrument, radio and amplifier kits. Latter company was acquired for undisclosed price from Helen C. Anthony, widow of late pres. Howard Anthony. Daystrom is subsidiary of American Type Founders Inc.

Elgin National Watch Co., which recently purchased Neomatic Inc., Los Angeles (subminiature relays), this week announced purchase of American Microphone Co., Pasadena, owned by F. A. Yarbrough and maker of microphones, phono pickups, cartridges, etc. At Neomatic Inc., it has named Edward C. Carlson as sales mgr. for electronics components.

International Resistance Co., which purchased Circuit Instruments Inc. last Oct., announces that its wholly-owned Fla. subsidiary, Van Dyke Instruments Inc., will now be known as Circuit Instruments Inc. Officers of St. Petersburg firm: Irwin W. Braun, pres.; Jesse Marsten, v.p.; Edward A. Stevens, secy.-treas.

American Electronics, Los Angeles, manufacturer of miniature high-frequency drive motors, power supply units and blowers, has merged with Berlant Associates, Los Angeles (tape recording equipment). Bert Berlant continues as pres.-gen. mgr. of new Berlant Instruments, subsidiary of American Electronics.

SPREAD OF AUTOMATIC production techniques in TV-radio-electronics plants and implications for labor drew increasingly restive reaction from unions this week—particularly IUE and its parent CIO, which would be most directly affected. There were these developments:

(1) CIO pres. Walter Reuther, testifying before Joint Congressional Committee on the Economic Report, urged Congressional investigation of "social and economic" implications of automation. He accused Eisenhower Administration of complacency over unemployment and failure to analyze consequences of automation.

(2) IUE pres. James B. Carey, declaring guaranteed annual wage is even more necessary now because of automation, told meeting of his union's 30-man exec. committee: "The examples of automation that have come to light show that this is not merely another improvement in efficiency. It is an entirely new concept in which the machine tender is almost completely eliminated."

(3) IUE called conference of 70 locals in Ft. Wayne's Van Orman Hotel March 4-6 to assess automation developments and plot strategy for upcoming wage negotiations in that light. A union subcommittee has been studying automation problem and is expected to report that while it does not wish to stop progress, it believes automation is a direct threat to employment.

U. S. Steel chairman Benjamin Fairless, in address Feb. 11 at Johnstown, Pa., hit back at labor's contentions, citing recent examples where mechanization has increased employment. Despite widespread installation of dial telephones, he said, number of telephone operators increased 79% between 1940 & 1950. In accountancy field, number of accountants increased 71% in same period despite development of automatic business machines and new "electronic brains." In automotive industry, where mechanization has grown tremendously, number of employees has doubled in last 14 years.

Contracts for \$175,000,000 in foreign-made military electronic equipment have been awarded by U. S. from 1952-54, reports Feb. *Electronics Magazine*, which notes that only one-fifth of the equipment had been delivered in fall of 1954 and that 75% of offshore procurement funds went for Mutual Defense Aid Program for use by allies. European procurement boxscore (through June 30, 1954) shows France in No. 1 position with \$58,300,000 in U. S. military electronic orders, United Kingdom with \$54,300,000, Italy \$21,800,000, Germany \$9,800,000, Belgium-Luxembourg \$8,900,000, Netherlands \$3,400,000, Japan \$1,900,000, Yugoslavia \$200,000.

More diversification into electronics: Mack Trucks Inc. acquires White Industries Inc. and Radio Sonic Corp., N. Y. manufacturers of electronic items for aviation, industrial & military applications; it will operate them as division, with ex-pres. Robert G. Kramer of White and ex-pres. Emerson Pray of Sonic in key executive positions.

New London Instrument Co., New London, Conn., has acquired Atlantic Transformer Corp. and American Eastern Electronics Corp., which it will operate as divisions.

"Automation Dictionary" for laymen published this week by Brown Instruments div. of Minneapolis-Honeywell Regulator Co., Philadelphia.

Charles J. Pannill, 75, ex-pres. of Radiomarine Corp. of America and of RCA Institutes, who retired in 1947 and has been invalided the last few years, died Feb. 8 in N. Y. Associated with the pioneer inventor Reginald Fessenden, he tapped out the first radio message sent across the Atlantic in 1906, later was with the old Marconi company which merged with RCA. During World War I, he was asst. director of naval communications.

A SILVER-HAIRED BOMBSHELL threw the Edward Lamb hearing into utter confusion this week as testimony resumed after a recess of nearly 3 months. She was Mrs. Marie Natvig, 50-year-old Miami grandmother, who had previously testified for FCC against Lamb, and who this week was put on stand by Lamb attorneys.

In 3 days of hearings, she proceeded to deny virtually every bit of testimony she had given previously—and to charge that FCC attorneys had “coerced” her into making false statements. Her accusations were directed mainly at former Broadcast Bureau attorney Walter Powell, who she said “threatened” her with perjury prosecution and told her it was against the law to talk to Lamb’s attorneys.

Powell, who left Broadcast Bureau to join legal staff of NARTB, is confined to his home as result of coronary occlusion suffered Feb. 3. He branded Mrs. Natvig’s testimony as “obviously the boldest kind of falsification.” Joseph Kittner, asst. chief of Broadcast Bureau, now top FCC counsel on case, jumped to Powell’s defense, called him “one of the finest people who ever worked for the Govt.”

Mrs. Natvig said she voluntarily called on former Attorney General J. Howard McGrath, Lamb’s business partner and attorney, at his Palm Beach home and told him she wanted to retract her previous testimony. Under questioning by Lamb counsel Russell M. Brown and by Kittner this week, she denied that she had ever been a Communist and that she ever had any indication that Lamb was in sympathy with Communist objectives. She accused FCC attorneys of telling her what to say on the witness stand.

During Mrs. Natvig’s first testimony last fall Brown had called her an “out-and-out lunatic,” and he offered Feb. 11 to stipulate that her entire testimony had been false from the time she took the stand last Oct. But Kittner refused to enter into such an agreement, saying he is interested in the circumstances under which she changed her testimony. She will return to witness stand Feb. 14.

A second govt. witness brought back Feb. 11 for cross-examination, Clark Wideman, Columbus real estate man, said under questioning by Brown that before he testified previously FCC attorneys gave him list of questions and answers and he corrected them to make them “as accurate and true as possible.” He said Lamb “emphatically and positively denied” he was a Communist when he asked him about it in 1934, and that he investigated Lamb in 1948 while a reporter for *Columbus Citizen* and found no evidence Lamb was engaged in Communist activities. He said he told this to Broadcast Bureau attorneys, but they said he should testify anyway. Two other previous govt. witnesses—Wm. Cummings and Lowell Watson—are to be recalled by Lamb attorneys for cross examination.

— ■ —

Ten armed forces TV stations will be in operation overseas within a year, according to present plans. Defense Dept. Office of Armed Forces Information & Education (AFIE) so informed advertising agencies and networks in letter reporting on workings and plans of the low-power govt. stations (Vol. 9:52 & 10:19, 44). Currently in operation are pilot installation at Loring Air Force Base, Maine and stations at Lajes Field, Azores & Wheelus Field, Tripolitania. Next ones to begin regular operation will be at Sidi Slimane, French Morocco & Keflavik Airport, Iceland, followed by Greenland installation. Defense Dept. is entering into agreements with networks, TV sponsors and agencies for use of kine recordings or films of their programs—including commercials—on the stations. So far, 102 agencies and sponsors have given clearance for use of programs, and during week of Dec. 10 Defense Dept. shipped 41 CBS shows, 29 NBC, 3 DuMont, 11 ABC, 5 Guild Film shows for overseas TV use. These are augmented by industrial films, armed forces information films and a few feature pictures furnished by motion picture industry and TV film producers.

Still another census of TV ownership is in the works—this time bearing official imprimatur of U. S. Census Bureau, though it will not supply ever-increasing need for a continuing monthly county-by-county census acceptable to industry. That must await start of NARTB’s long-awaited count, now expected to begin in fall (Vol. 11:5). As a stop-gap pending that start, and Advertising Research Foundation group spearheaded by CBS’s Oscar Katz is currently seeking total of \$24,000 from networks, AAAA, RETMA and other interested organizations to finance insertion of question “Do you own a TV set?” in survey conducted monthly by Census Bureau among a scientifically-selected sample of 20,000 families to update its decennial data. The \$24,000 would cover 2 such monthly surveys—one in April or May, other in early fall. NARTB has already contributed \$3000 as its share. From a 20,000 sample, regarded as very accurately representative of all ages and economic levels, Census Bureau would project TV ownership for nation as a whole, with breakdowns by 4 geographic areas. Result would be made known within 6 weeks after count.

Study of TV’s sociological impact on Americans, a vast survey which would probe public’s reaction to TV in all its forms, is under consideration at NARTB, which recently received report on pilot study by unidentified research organization on methods of conducting such survey. Full report on project will be submitted to next TV board meeting in Washington in latter June. Pres. Harold Fellows said it was anticipated that a private research organization or foundation would conduct one-shot survey as industry-wide project (rather than under NARTB tent), if and when it’s authorized. It would seek to measure how TV programming and commercials have affected family living habits, viewer reactions to certain types of programs, effect on children, etc. Results would be of special benefit to Code Review Board as guidance for future code amendments, said Fellows.

Senate Juvenile Delinquency Subcommittee may reconsider its plan to put out special report on TV. Chief counsel Herbert W. Beaser and exec. director Richard Clendenen have resigned, subcommittee disclosed this week, after they came under fire for writing series of articles about subcommittee for *Saturday Evening Post*. New chief counsel James H. Bobo said decision whether or not to issue special report on TV investigation probably will be made next week. Columnist Drew Pearson Feb. 11 published excerpts from what he said was “preliminary Senate report”—highly critical of TV programs. He said TV networks “have been quietly pressuring [the Committee] to tone down their report.” Bobo declined to comment on Pearson’s quotations and charges.

“Program of the year,” chosen by National Assn. for Better Radio & TV (NAFBRAT), in 3rd annual awards, is ABC’s *Disneyland*, which also won award in children’s category. Other NAFBRAT awards in TV: drama, *U. S. Steel Hour* & *Elgin Hour* (ABC); family situation, *Father Knows Best* (CBS); education & information, *Now & Then* (CBS); comedy, *Halls of Ivy* (CBS); news interpretation, *See It Now* (CBS); interviews, *Person to Person* (CBS); popular music, *Your Hit Parade* (NBC); classical music, *Voicic of Firestone* (ABC); quiz, *What’s My Line?* (CBS); public service, *The Search* (CBS); daytime, *World of Mr. Sweeney* (NBC). Radio program of the year award went to CBS’s *Man’s Right to Knowledge*.

Assn. for Professional Broadcasting Education, composed of NARTB members and colleges offering comprehensive professional courses in broadcasting, will be created during NARTB’s annual convention in Washington week of May 22. It will seek to improve training of qualified students for employment in TV-radio and act as liaison between industry and educators.

SUMMARY-INDEX OF THE WEEK'S NEWS—February 19, 1955

JONES REPORT ASKS MORE STUDY of all phases of network-uhf problems; Bricker and Jones score "network domination" of TV industry (pp. 1 & 6).

METAMORPHOSIS OF DuMONT NETWORK seen shopping around new film camera technique; hookup and stoff now trimmed to bare bones (p. 3).

BLACK-&WHITE RECEPTION FROM COLORCASTS improving steadily as telecasters gain experience; NTSC leaders reiterate that color standards are sound (p. 4).

NEWSPAPER PEOPLE SELL OUT interests in WSFA-TV, Montgomery, Ala. to Oklohomon in rare instance of newspaper owners getting out of TV (p. 5).

TALLEST MAN-MADE STRUCTURE, 2003-ft. Louisville TV tower, proposed to FCC—despite Pentagon's intention to block all towers over 1000 ft. (p. 6).

KTBS CHOSEN OVER KWKH FOR SHREVEPORT'S Ch. 3, FCC citing "diversification" and ownership integration; Boston Ch. 5 hearing gets nasty (p. 8).

END OF VHF-ONLY SET PRODUCTION seen as one sure way to help uhf, as Congress gets bill to exempt all-channel sets from 10% Federal excise tax (p. 12).

RETMA LEADERS ASSAY MARKET AND PROBLEMS, chairman Mox Bolcom predicting 6,300,000 TV sales this year, 25% being second & replacement sets (p. 11).

UPCOMING NEW STATIONS—latest reports from principals include Green Bay shift from uhf to vhf, plans of Providence's WPRO-TV to take to air (p. 9).

CBS OBJECTIVE 3-3½ HOURS OF COLOR weekly, starting in April; NBC gives heavy promotion to 2-hour "Peter Pan" scheduled March 7 (p. 10).

GREATER USE OF CONSUMER CREDIT should be promoted by industry as means of stimulating higher-priced set sales, help move color (p. 13).

FEE-TV GETS CAUTIOUS SUPPORT from educators as exhibitors evince more alarm and producers remain silent; Paramount in anomalous position (p. 16).

PROBING TV—THE BRICKER-JONES APPROACH: Senate Interstate Commerce Committee came up with another controversial document this week -- GOP-backed Jones Progress Report, companion volume to the Democratic-sponsored Plotkin Memorandum (Vol. 11:6-7).

The remarkable thing about the Plotkin Memorandum was its full-blown list of New Dealing recommendations for sharp changes in network practices and business methods. Remarkable thing about the Jones Report is not what it recommends -- but the information it seeks to elicit: namely, almost every conceivable detail about the finances, coverage, sponsorship, time clearances, affiliation contracts, etc. etc. of every TV network and station.

If the equivocal Jones Report and the all-too-positive Plotkin Memorandum are opposites in one respect, they're strikingly similar in another: Both convey authors' conviction that networks have too much purse-power over the telecasting industry. Both hit out at FCC, its allocation plan, its post-allocation behavior.

Gist of Jones Report is: Senate Committee needs far more information before it can make any concrete findings. One effect of Jones Report -- though obviously not sole motivation -- is to take backhanded slap at Plotkin's very definite recommendations as "akin to announcing results of an election before ballots are counted."

Former Committee Chairman Bricker (R-O.), who hired Jones to conduct study, appears more positive than Jones in his diagnosis of industry's ills. At joint press conference this week, Bricker plugged for his bill (S-825) to give the FCC explicit jurisdiction over networks -- though Jones conceded there's not enough information yet available to justify this step (and Plotkin said FCC already has the power).

"I don't think the FCC has the authority now," said Bricker -- "at least it doesn't have explicit authority, and certainly it hasn't exercised much."

Characterizing uhf and network probe as "the most pressing problem that we will have before us during this session of Congress," Bricker said he didn't know whether investigation could be completed this year.

Bricker's present thinking on network regulation comes close to common-carrier

or public-utility concept. In answer to press conference question, he suggested that perhaps Govt. should require extension of network service to certain areas, even if it's not profitable at first. He pointed out this is govt. practice in transportation industry, where carriers must serve unprofitable as well as profitable stops.

Jones carefully avoided giving impression he favors common-carrier type regulation for networks, both at press conference and in his report. But the voluminous information he wants from stations, networks and the FCC was interpreted by some as tip-off that he may be eyeing such ideas as regulation of affiliation, distribution of programs to stations, and even rate regulation.

* * * *

Ex-FCC Comr. Robert F. Jones' 30-pp. report (with 40-pp. of appendices) was "transmitted" to Committee by all 7 GOP members, accompanied by letter from Bricker praising it as "a professionally competent compilation of facts and recommendations which can be used as a guide in the continuing investigation." In letter to Chairman Magnuson (D-Wash.), Bricker gave this interpretation to Jones Report:

"The report shows clearly that the 4 TV networks, together with their wholly owned TV stations located in the top market areas, garner a disproportionate share of the total revenues for the entire TV industry. As a result, the objective of the Communications Act to provide for a nation-wide competitive TV system is threatened with defeat. Power of TV networks to affiliate or not affiliate amounts practically to power to control the number of TV stations which can subsist financially."

Though report dwells at length on network and big-station dominance, it pins much of blame on FCC. Allocation plan gives all the breaks to vhf at expense of uhf, it says -- and at same time "sets the stage for dominance by 2 networks" because it provides only 35 three-&-four-station vhf cities. Jones concludes that allocation plan is now an established fact and attempts to change it -- i.e., de-intermixture, etc. -- would probably do more harm than good.

[We have a limited number of copies of the Jones Report, and still have some copies of Plotkin Memorandum, which we will send to subscribers on request. For highlights of Jones Report, see pp. 6-7; details on Plotkin Memo, Vol. 11:6.]

* * * *

Jones' recommendations are relatively mild, and should be read in full context of report for fullest appreciation of what he's driving at. In brief, they are:

(1) "Uhf must be enabled (by law or regulation) to overcome the artificial economic and technical advantages resulting from FCC's 6th Report." He suggests that networks could help uhf and small-market vhf stations "on a voluntary basis" by adopting more liberal affiliation policies and offering sponsors discount advantages for buying time over entire station lineup.

(2) "A means should be found to channel additional revenue [to] smaller markets which serve great land areas of the country."

(3) Removal of Federal excise tax from all-channel sets "conceivably could be of some benefit," but some plan offering greater incentive should be devised. (See separate story on all-channel receiver proposals, p. 12.)

(4) Each network should adopt "a uniform and impartial affiliation policy which will take into consideration the basic objective of the Communications Act to serve all the people of the nation." Jones Report says networks have no consistent affiliation policies. (Incidentally, CBS this week sent to affiliates an outline of the "criteria" it follows in awarding affiliation contracts.)

(5) Whether networks should be permitted to own stations, and whether networks should be brought under FCC control, can't be determined on basis of available data.

(6) FCC should require uniform financial reports from networks and stations, in much greater detail than at present. It should also require each station to file data showing measured coverage, as it did before adoption of 6th Report.

(7) Committee should act to force FCC to turn over individual financial data on networks and stations. Committee should also give FCC the \$25,000 which Commission said would be required to prepare station-by-station coverage data and maps requested by Jones (Vol. 10:52).

Only network to comment on Jones Report was CBS, whose pres. Frank Stanton had vigorously assailed Plotkin proposals (Vol. 11:6). He said merely that the Jones Report "is so tentative in most of its conclusions and proposals that we believe it premature to make any detailed comment. CBS agrees, however, with the conclusions of Sen. Bricker and Mr. Jones that it is unwise to make final proposals for new laws and regulations at this time before all the facts and views are in."

FCC is giving high priority to its response to Plotkin Memorandum's proposals re de-intermixture, meanwhile -- because many pending petitions and rule-making proceedings depend on whether present Commission policy (generally anti-deintermixture) is changed. What FCC is going to say, no one knows. Presumably, Commission will make no decisions affecting de-intermixture, vhf drop-ins, change in Zone I height ceiling, etc., before replying to Senate Committee. Situation is about same as it was during Potter hearings -- when FCC held up many major allocations actions.

Question of network investigation came up this week in closed-door meeting of House Appropriations subcommittee (Rep. Thomas, D-Tex., chairman) which queried FCC officials about proposed new budget. FCC was asked about network situation, replied that for years it has sought appropriation to conduct network investigation but that funds have always been denied by Congress and/or Administration. Meeting was affable -- perhaps one reason being that Comr. Lee is former chief of the Appropriations Committee's professional staff.

Sen. Kilgore's monopoly subcommittee, which plans to look into "monopoly in TV industry," meets Feb. 21, and is expected to ask appropriation of \$250,000 for all its anti-trust studies, without specific breakdown as to industries.

METAMORPHOSIS OF THE DuMONT NETWORK: More drastic changes are due at DuMont Network before the summer is out. Key to changes is what Dr. Allen B. DuMont calls the "piggy-back" camera -- a combination TV-film camera shooting film at same time that a live show is televised. Just how this will be employed hasn't been disclosed.

Now linking only 15 "main line" cities plus a few off-air "feeders" ranging from New York-Chicago & New York-Washington (Vol. 11:1), except for occasional bigger hookups for Bishop Sheen and for sports shows, the DuMont Network has now been reduced to such skeleton proportions that it can scarcely be ranked as a national chain any longer. Sponsored and sustaining shows are down to a handful, and staff further reduced to what a spokesman describes as an "absolute working nucleus."

Scuttlebutt of ex-employees, added to trade reports that DuMont's remaining 2 owned stations in New York & Washington may go the way of WDTV, Pittsburgh, sold to Westinghouse recently for record \$9,750,000 (Vol. 10:49), have again forced managing director Ted Bergmann to reiterate:

"We have no intention of going out of the network business."

* * * *

The most anyone has said about new TV-film technique was Dr. DuMont's statements during recent speech before Los Angeles Chamber of Commerce, titled "The Look Ahead With Electronics" (Vol. 11:6).

Discussing the interdependence of movies and TV, he foresaw "an increase in the future of film programming on TV as against live production," and remarked that it's inevitable the motion picture industry "must be re-tooled from top to bottom." As far as equipment is concerned, it's still working in the Dark Ages, he said, by contrast with the electronic cameras and other superior equipment of TV.

It must modernize itself, he went on, on the basis of electronic techniques which will cut costs and shooting schedules, yet at the same time improve quality. He mentioned equipment which "can make possible the viewing of a scene on the set, as it is being played, with the images of 2 or 3 or 4 cameras all on a panel before the eyes of the producer and director and cameramen and their respective staffs.

"DuMont Laboratories recently demonstrated together with a major film company a piggy-back miniature TV camera mounted alongside a motion picture camera so that the director & technicians would have simultaneous viewing on TV monitors of exactly what is being filmed.

"A technically perfected combination TV and motion picture camera has vast

implications for the TV industry as well. We are vigorously pursuing this problem in our own laboratories and we believe we have the problem licked. When we complete our work, it will be possible for motion picture companies to operate with the technical efficiency of TV studios -- reducing picture costs by a fantastic amount.

"By the same token, TV networks will be able to present a live show let us say from New York to Los Angeles, and at the same time a true quality film version of the show is made simultaneously. These would be actual top quality films -- not teletranscriptions or kinescopes. Through use of film in this manner, the differences in time zones between various parts of the United States would be bridged."

Will the DuMont Network evolve essentially into a producer & seller of film shows, shot at its own studios or those of others? Does DuMont propose to become a "packager" primarily? Will he keep new techniques to himself or license others? How good is the new equipment, actually? We should have the answers fairly soon.

TELECASTERS IMPROVE COLOR COMPATIBILITY: Complaints of "compatibility" aspects of colorcasting -- the sometimes poor pictures seen on ordinary black-&-white sets -- have diminished lately, but there are still occasional blasts. A few months ago, there were even appeals to FCC to "do something about it."

Fact that complaints have fallen off is ample evidence that there's nothing inherent in the technical color standards that means an inferior monochrome picture should come from colorcasts. Such complaints have had long-distance repercussions.

Britain has been arguing, for example, over merits of various color standards and influential Wireless World states: "The compatible system which has now been tried out in America has not proved quite so successful as was at first hoped, and it appears to have one or two technical disadvantages, such as 'buzz' on sound and dot patterns on the screen, which would not be very acceptable in this country."

We have never heard the aforementioned "buzz" nor have we ever found a layman who has even noticed the dots; most sets scarcely show them. Justifiable complaints have resulted largely from poor lighting practices and camera misregistration.

We've asked the chairman and vice chairmen of NTSC, which set up color standards, to comment on compatibility aspects -- and they've scotched notion that the standards are at fault. Here's statement of NTSC chairman, GE's Dr. W.R.G. Baker:

"Since the first color broadcasts under the NTSC standards, there has been decided improvement in the quality of pictures on monochrome receivers from color broadcasts. Essentially, I believe, this is due to both improvement in equipment and to experience gained by broadcast engineers. The NTSC standards provide the basis for a good monochrome picture from color broadcasts. Color broadcasting is, of course, more complicated than standard monochrome broadcasting. But certainly some of the very recent color broadcasts have presented excellent black-&-white pictures on monochrome receivers."

Hazeltine's A.V. Loughren, an NTSC vice chairman, puts it this way: "Color TV programs broadcast using the FCC standards are capable of giving excellent picture quality on monochrome TV receivers; an overwhelming array of evidence was amassed during the field tests which preceded adoption of these present standards by the FCC in demonstration of this fact.

"Perhaps the key phrase in the foregoing statement is 'capable of'. Now, when a broadcasting channel carries a color signal, it is more completely filled than when it carries only a monochrome signal; and a friend of mine has pointed out, facetiously but most wisely, that a nearly full bucket must be carried more carefully than a half empty one if nothing is to be spilled.

"In their studio & control room operations, the broadcasters are still learning to carry the nearly full bucket. Sometimes they carry it perfectly, and sometimes they spill a little. Monochrome TV receivers are also involved in the carrying of this bucket; a receiver which is in good operating condition will not spill any of its contents (figuratively) into the viewer's lap, but a receiver whose operating conditions have developed some deterioration may show some impairment."

Comments from the other 2 NTSC vice chairmen -- RCA's Dr. E.W. Engstrom and Philco's David B. Smith -- weren't available this week.

Telecasting Notes: Warner Bros., it now develops, has released 191 of the *Looney Tunes* and *Merrie Melodies* cartoons of its short-subject subsidiary Sunset Productions. William Morris Agency negotiated deal with Reub Kaufman, pres. of Guild Films, who will give Vitapix stations first crack at them. Package includes *Porky Pig*, *Daffy Duck*, *Buddy's Adventures*, *Bosko's Antics*. It's third such unloading of cartoons to TV, Matty Fox's MPTV owning the Walter Lantz series produced by Universal and Hygo having the *Krazy Kat* cartoons acquired from Columbia . . . Does this mean Warner Bros. is simply "feeling" its way before releasing backlog of features? Says *Billboard*, which has consistently predicted the majors will open their vaults and which last week said Warner's would do so (Vol. 11:7): "The deal also is regarded by traders as Warner's means of testing out the vidfilm field. Possibility exists that some of its feature films may be brought into the market later if the firm is satisfied with the way the cartoon deal works out" . . . 20th Century-Fox authorizes revamping of 10 stages & theatres on Hollywood Western Ave. lot for production of TV film; Sid Rogell, exec. producer, in charge . . . Decision to move into TV production impelled *Film Daily's* Chester B. Bahn to comment Feb. 17 that it's "merely another straw in the video wind that is fast gathering velocity in this industry of ours" . . . Fox is taking the "only possible course consistent with sound business policy," adds Bahn. "It is evident—as Columbia's delighted stockholders learned at their last annual meeting [see Financial & Trade Notes]—that there is money to be made in TV production; so Fox is moving in" . . . Mary Pickford, who with husband Buddy Rogers owns one-third of Winston-Salem's WSJS-TV as an investment, is currently litigating sale of Samuel Goldwyn studios in Hollywood because she's interested in acquiring them for TV and feature film production, according to Pickford Corp. v.p. Richard Polimer . . . Arche Mayers' Unity TV Corp. has acquired 13 new 1953-54 "first-run" feature films, U. S. & British, which brings its feature catalog to about 400; titles in new package, called "Lucky 13": *Operation Diplomat*, *House of Blackmail*, *This Was a Woman*, *Dangerous Cargo*, *Blue Parrot*, *Private Information*, *Profile*, *Burnt Evidence*, *The Corpse Finds a Clue*, *Men Against the Sun*, *Final Appointment*, *The Delavine Affair*, *Mystery Man vs. Scotland Yard* . . . "Sneak preview" of a theatrical movie—via TV before it is even filmed—is novel idea of producer Les Hafner, who will try it with *Thousand-Dollar Window*, last of late Mark Hellinger's screenplays. Show will be presented live in one-hour version over ABC-TV's *Elgin Hour*, with some 5000 theatre owners invited to send in their comments on special cards. Hafner keeps right to kines, plans to begin shooting theatrical version next summer . . . Ed Murrow cancels plans to film opening night of *Porgy and Bess* at La Scala in Milan for his *See It Now* because Actors Equity demanded week's salary for entire cast; co-editor Fred W. Friendly said nobody is ever paid to appear on *See It Now* . . . Robert Sherwood was released from his NBC-TV playwriting contract so he can devote fulltime to movie & stage commitments; 2 of the 9 original TV plays for which he had contracted with NBC have been presented.

Universal C.I.T. Credit Corp., subsidiary of C.I.T. Financial Corp., 1 Park Ave., New York City, in cooperation with Internal Revenue Bureau, is releasing gratis to all TV stations three 4½-min. film shorts on *How to Make Out Your Income Tax Return*.

TV Fashion Service, 50 E. 56th St., N. Y., has been set up as modern-dress rental service for shows and commercials featuring women performers, with no credit lines required for the rented clothes.

UNUSUAL INSTANCE of newspaper interests selling a TV property—the FCC-approved sale this week of WSFA-TV, Montgomery, Ala. (Ch. 12)—points up fact that newspapers have been frequent buyers but seldom are sellers of TV stations. Sellers of 50% interest in WSFA-TV were R. F. Hudson, publisher of *Montgomery Advertiser* and *Journal*, his son R. F. Hudson Jr. and son-in-law Sebie B. Smith. The younger Hudson was to have become manager when station began operation, but became ill. Other 50% was sold by ex-mayor, now probate judge David E. Dunn and H. S. Durden; Judge Dunn also has been ill, though he undertook to run the station when it started last Nov.

Purchaser is the *Oklahoma City Oklahoman* family (E. K. Gaylord), who founded pre-freeze WKY-TV and operate radio WKY there. Purchase price for the Montgomery TV station, along with radio WSFA (1-kw N, 5-kw D, 1440 kc, NBC), was \$562,598 cash plus assumption of more than \$600,000 in obligations, including \$500,000 owed on equipment. Total deal involves \$1,200,000. New mgr. is Hoyt Andres, ex-WKY.

Radio WSFA, incidentally, was originally owned by the Persons family and managed by Gordon Persons, recently Gov. of Alabama, whose brother is Gen. Wilton Persons, aide to President Eisenhower. Gov. Persons has been mentioned prominently for the Democratic vacancy on FCC to be created next June 30 when 7-year term of Comr. Frieda Hennock expires, but he recently suffered a serious heart attack and has been confined to his home in Montgomery ever since.

Miss Hennock was one of the 3 commissioners (others: Bartley & Lee) voting against transfer. Record in case included protest from Oklahoma City's KWTW (Vol. 10:50) objecting because of alleged unfair discriminations by the Gaylord newspaper in its news columns, which led FCC to add rider to grant stating: "Approval in this case does not necessarily foreclose Commission from considering past conduct as cumulative should any issue arise in the future."

FCC's predilection is for local ownership, sometimes unattainable, and it likes to know a grantee means to stay in the business. Study of the 75 or more major TV station transfers recorded since 1949 (see *TV Factbook No. 20*, pp. 29-32) shows that in the few instances where newspaper interests have sold out they were absentee interests more often than not. For example, *New York Post* publisher Dorothy Schiff Sonneborn sold old KLAC-TV, Los Angeles, now KCOP, to Copley Press; Ft. Smith publisher Donald Reynolds sold his half of KRTV, Little Rock, to Kenyon Brown; *Erie Dispatch* publisher Edward Lamb sold his WTVN-TV, Columbus, to Taft interests (*Cincinnati Times-Star*); *Lancaster New Era* publishers, the Steinman brothers, sold WDEL-TV, Wilmington, to Paul F. Harron of Philadelphia; Hearst Corp. sold back its 25% interest in KING-TV, Seattle, to Mrs. Scott Bullitt.

Only outright sales by newspaper interests were those of KOB-TV, by aged publisher T. M. Pepperday (*Albuquerque Journal*) to Time Inc.-Wayne Coy; and of merged *Atlanta Journal-Constitution* interests' WLWA to Crosley, forced so that Journal's WSB-TV might be retained.

While newspapers were prominent among the pre-freeze grantees who relinquished CPs (*Factbook*, p. 31), there are none among the owners of the 44 stations that have gone off the air (*Factbook*, p. 28, plus TV Addenda to date). Value of TV-radio outlets as adjuncts to newspapers has been recognized ever since the beginnings of broadcasting and telecasting; their "constancy" as operators is one of the arguments being advanced in refutation of opposition to newspaper ownership.

Personal Notes: William H. Fineshriber Jr. resigns as NBC v.p. in charge of radio network, effective March 1, his duties to be assumed by exec. v.p. Robert W. Sarnoff; an exec. v.p. of Mutual before joining NBC in March 1953, he'll vacation month in Caribbean before announcing future plans . . . Wm. S. Paley, CBS chairman, named to Committee for the White House Conference on Education . . . Edgar Peterson, CBS-TV mgr. of story & script dept., assigned to Hollywood as associate producer of *Climax!* succeeding Elliott Lewis, working on new shows . . . Thomas Means appointed director of promotion service for CBS-owned TV stations, succeeding John Donald Foley, now director of sales promotion, CBS-TV Spot Sales . . . Liel Tanenholz, DuMont Network personnel mgr., resigns to return to research engineering . . . George Jaspert, WCCM, Lawrence, elected pres., W. C. Swartley, WBZ-TV, Boston, v.p., Mass. Broadcasters Assn. . . Roy A. Smith named operations mgr., WLAC-TV, Nashville . . . A. B. McPhillamy promoted to sales mgr., KHOL-TV, Kearney, Neb. . . Elaine von Grimmenstein transferred to Storer's WGBS-TV, Miami, succeeded by Pat Elliott as promotion mgr., WJBK-TV, Detroit . . . Luellen Stearns resigns as NBC Spot Sales eastern div. mgr. . . Stephen W. Pozgay, ex-WTVP, Decatur, Ill., now TV-radio director, Biddle Adv., Bloomington, Ill. . . Alexander R. M. Griffen, TV-radio director, upped to v.p., Al Paul Lefton Co. . . L. S. (Duke) Weitzman, ex-WABC, named ABC mgr. of audience promotion . . . Elmer Hanson joins KXJB-TV, Valley City-Fargo, N. D., as mgr. of Grand Forks studio, now under construction.

Ford Pearson, the veteran Chicago announcer lately with Geoffrey Wade Agency, now a resident of Sherman Oaks, Cal., has acquired radio KVON, Napa, Cal. (500-watts, 1440 kc, daytime); FCC approved \$45,000 purchase this week.

HIGHLIGHTS OF JONES Progress Report prepared for Senate Interstate & Foreign Commerce Committee (see pp. 1-3):

Allocation plan: "Whatever advantage the 6th Report [gave] to vhf over uhf, and whatever unfair opportunities for success it may have created for any 2 of the 4 networks and their affiliates in major markets, it is now an accomplished fact. [We] have to live with the results of the allocation plan that the Commission adopted in 1952. . . . The artificial scarcity of vhf channels in a few major markets could be alleviated by a little relaxation of the Commission's rules. On the other hand, such relaxation would tend to make the plight of uhf stations even worse in those areas given vhf assignments, even though such an action could help ABC or DuMont's competitive network situation."

De-intermixture: "The proposal to shift all vhf to uhf is impractical . . . Any action to make uhf service areas competitive with vhf would require a wholesale reassignment of vhf channels and entail staggering capital expenditures by vhf permittees and licensees. De-intermixture also would entail staggering capital expenditures by every vhf station located in proposed uhf-only cities and by millions of vhf-only set owners in the proposed de-intermixed uhf-only service areas."

FCC actions and uhf: "Past actions of the FCC have served to accentuate, rather than alleviate, the economic and operational difficulties of uhf telecasting as compared with vhf telecasting. For example, the Commission has permitted satellite operation of uhf stations by vhf stations since this investigation was initiated. If vhf stations located in the larger markets of the nation use uhf stations as satellites in order to extend their vhf service areas, then, indeed, uhf individual operators will have a further economic hurdle thrown in their path . . ."

THE 2003-ft. tower, for which WHAS-TV, Louisville, is still seeking airspace clearance, is now officially on file with FCC. Application proposing move to Waterford Pike, 2 mi. north of Mt. Washington, states that cost of complete project would run \$1,241,000—including \$925,000 for tower & antenna, \$205,000 for new 50-kw GE transmitter, \$60,000 buildings, \$50,000 land, \$1000 furniture. Kind of tower isn't specified, except that it will be triangular guyed structure.

Station apparently faces tough fight getting airspace clearance, since military members of Washington Airspace Subcommittee are arbitrarily rejecting as "hazards" all requests for towers over 1000 ft. (Vol. 11:4). Latest such tower to be rejected by subcommittee was 1356-ft. structure planned by KGEO-TV, Enid, Okla., to replace present 816-ft. and endorsed by regional airspace subcommittee.

Industry-Govt. Committee, set up by top-level Air Coordinating Committee to study whole tall-tower problem (Vol. 11:3), will probably hold first formal meeting week of March 4, with CAA chairman F. B. Lee and FCC Comr. Robert E. Lee as co-chairmen.

WHAS-TV's 2003-ft. tower would be far & away tallest man-made structure in the world—surpassing 1572-ft. tower of KWTW, Oklahoma City, which now holds record. Third tallest would be 1521-ft. tower of WFAA-TV & KRLD-TV, Dallas, for which ground was broken last week. Latter is unique "candelabra" structure, with each antenna mounted at end of cross-arm at top of tower (Vol. 10:14). RCA is prime contractor for whole \$2,000,000 project, which includes 2 transmitter buildings, and completion is expected late this summer.

Another tall tower, already cleared by Airspace Subcommittee, is due to begin rising in week or so. It's 1085-ft. tower of KCRG-TV, Cedar Rapids, Ia., to be built by Dresser-Ideco.

Uhf receivers: "The proposed removal of Federal excise tax from all-channel receivers . . . appears an insufficient incentive for the increased production and successful marketing of such sets [although it conceivably could be of some benefit]. The committee might well consider some other means to encourage manufacturers of TV receivers to shift to production of all-channel receivers only."

Uhf & networks: "A means must be found to place uhf on a competitive basis with vhf in all markets. Specifically, uhf must be enabled (by law or regulation) to overcome the artificial economic and technical disadvantages resulting from the FCC's 6th Report and allocation plan and the natural economics which concentrate network operations in populous centers. A large share of the total revenues of the broadcast industry must be channeled to uhf outlets in the smaller markets. Also, it must be remembered that there are vhf station operators in smaller markets facing financial difficulty. It is felt the individual networks could do much on a voluntary basis to support the TV economy outside the larger markets by (1) adoption of a more liberal and impartial policy toward affiliation and (2) offering price discount advantages to national advertisers to buy time over all outlets of [the] network rather than selected stations in large markets."

Network control: "Information available to date is insufficient to justify bringing networks under regulation by the FCC. There is justification for further study of the proposal."

Broadcast revenue distribution: "The pattern for 5 years (1948-53) established the predominance of the revenues of the networks and their owned-&-operated TV stations in relation to those of the entire TV industry when it is considered that the 4 networks and their compara-

tively small number of wholly owned stations have consistently maintained a 52.6 to 56.6% share of the revenue received by the entire TV industry during a period of rapid growth throughout the country. It is noteworthy that 2 of the 4 networks account for approximately 85% of all TV network billings, a fact which serves to emphasize the tremendous hold and influence of the 2 predominate networks (CBS-NBC) on the TV industry."

Even excluding revenues from owned-&-operated stations, the 4 networks in 1952 had broadcast revenue of \$130,764,000 or 40.33% of entire industry's total of \$324,200,000, while their broadcast expenses were \$135,511,000 or 50% of industry total of \$268,700,000. In 1953, network broadcast revenues (again excluding o-&o stations) were \$161,363,000 or 37.3% of industry's \$432,700,000, while network expenses were \$161,239,000 or 45% of industry total of \$364,700,000.

Nationwide TV system: "In 1953, the 80 TV stations in 22 selected [large] TV markets received 41.13¢ out of each dollar received by the entire TV broadcast industry and paid 34.71¢ out of each dollar of expense paid by the entire TV broadcast industry as the cost to participate. On the other hand, the 254 TV stations located in 199 cities (other than the 22 selected TV markets) received only 21.59¢ out of each dollar received by the entire TV broadcast industry and they paid 20.25¢ out of each dollar of expenses paid by the entire broadcast industry . . .

"The share of total broadcast revenue received by all stations in other than the top-ranking markets is insufficient to support a nationwide competitive TV system. In the public interest, a means should be found to channel additional revenue to these smaller markets which serve great land areas of the country."

Affiliation policies: "Information submitted by the networks shows clearly that [they] have no consistent affiliation policy which they apply uniformly. Nor have they proven any rational basis for past decisions to affiliate or reject affiliation with individual TV stations. It is urged that each network adopt a uniform and impartial affiliation policy which will take into consideration the basic objective of the Communications Act to serve all people of the nation."

Station Accounts: WCBS-TV's filmed *Late Show* (11:15 p.m.-12:30 a.m.), which celebrates its 4th anniversary Feb. 26, reports gross billings of \$4,000,000 for the 4-year period, representing 8120 partic. spots for 178 sponsors. Show uses both new & old feature films, has no hesitancy whatever about repeats. For Feb., it has 192 one-min. spots on books representing \$115,000 (at \$600 per spot), and foresees gross of \$1,350,000 this year. Further, despite recent competition of Steve Allen's NBC-TV *Tonight* on WRCA-TV, show's Telepulse rating has never dipped below 7. Though show is owned by WCBS-TV, some 50 or so CBS affiliates carry local film programs under same title . . . Keebler Biscuit & Buitoni Macaroni are first to sign for WRCA-TV's new "14-50" frequency discount plan for 14 or more station breaks in a single week (Vol. 10:7), former thru McKee & Albright, Philadelphia, latter thru Albert Frank-Guenther Law Inc., N. Y. . . . All Yankee & Giant games on WPIX, as well as pre-game & post-game shows, have been signed up for sponsorship—by Chesterfield, Ballantine, White Owl, Camel, Cities Service, Krueger Beer; multiple sponsors of WPIX's *Liberace* series (10 half hours a week) are Simoniz, Toni, Gold Seal, Best Foods, Old Dutch Coffee, American Bakeries, Proctor Electric, Tea Council . . . Olympia Brewing Co. buys Ziv's new filmed *Science Fiction Theatre* in Los Angeles, San Francisco, Seattle, Spokane, Portland, San Diego & Boise, thru Botsford, Constantine & Gardner, Seattle . . . Coca-Cola to test its new 10, 12 & 26-oz. "king size" bottles with TV

FCC record-keeping: "There appears to be an obvious need for the establishment by the FCC of a uniform accounting procedure providing for the submission by networks and individual TV stations of reports embracing greater detail. It is felt the Commission should set up a uniform pattern under which the networks would allocate network and operation expenses for wholly-owned stations. Your staff found in its investigation that the Commission had less information in its files than the radio stations it purports to regulate or the networks.

"It is recommended that the Commission require each TV station licensed by it to file a proof of performance which will show the measured coverage of each such station. Such information was kept for all TV stations prior to adoption of the 6th Report."

Network ownership of stations: "On the basis of information currently available, your staff cannot determine whether networks need to, or should, own broadcasting or TV stations to subsidize network operations."

Further study: "Your staff is in possession of only a modicum of the information needed to formulate any comprehensive program of reform. To attempt to do so on the basis of the information thus far gathered and analyzed would be akin to announcing the results of an election before the ballots are counted." Jones also:

Recommended that committee make available to FCC the \$25,304 which FCC estimated would be required to supply information requested, including tables and maps of technical data and service areas of pre-freeze and post-freeze stations, in operation or authorized, as of April 15, 1952 and as of Oct. 1, 1954.

Recommended that committee "take such action as may be necessary to obtain from the FCC financial information on the individual networks and TV stations, which information the Commission has advised the committee it cannot furnish except by specific direction."

Appended to report 12 pp. of questions proposed to be sent to the 4 TV networks, asking exhaustive financial & technical data concerning networks and each of their TV, FM & AM affiliates. In addition, he set forth series of 5 tables to be filled in by individual TV stations, designed to elicit financial, coverage, technical and network data.

spot campaigns in Boston, Detroit, San Francisco & Columbus, thru D'Arcy Adv., N. Y. . . . Union Pacific Railroad buys alt. week sponsorship of NBC Film Div.'s *His Honor, Homer Bell* in Los Angeles, Portland, Seattle & Omaha, thru Caples Adv., Chicago . . . Economics Laboratory Inc. will add spots to *Garry Moore Show* on CBS-TV to promote Feb. 18-31 write-in contest for users of its Soilax cleaner, thru J. M. Mathes Inc. . . . Pineapple Growers Assn. in 1955-56 promotion plans use of TV-radio homemaking programs, thru J. Walter Thompson, San Francisco . . . Columbus Automobile Club (AAA) sponsoring "driving school" for 13 weeks on WLWC . . . Among other advertisers currently reported using or preparing to use TV: North American Mushroom Co., Tinley Park, Ill. (steak sauce), thru M. M. Fisher & Assoc., Chicago; Coffee Time Products Co. of America, Jamaica Plains, Mass. (Coffee-Time syrup & sparkling soda), thru Bresnick Co., Boston; Arizona Brewing Co., Phoenix (A-1 Pilsener beer), thru Erwin, Wasey & Co., Los Angeles; Orange Fruit Corp., Newark (Orange Blossom fresh orange juice), thru Sterling Adv. Agency, N. Y.; Glamur Products Inc., Syracuse, N. Y. (car upholstery cleaner), thru Moser & Cotins, Utica; Valspar Corp., Ardmore, Pa. (paints, stains, enamels), thru Brooke, Smith, French & Dorrance, N. Y.; Mace Labs, Neenah, Wis. (ZMO oil), direct; A. Brioschi & Co., Fairlawn, N. J. (anti-acid preparation), thru David J. Mahoney, N. Y.

D'IVERSIFICATION and ownership-management integration were FCC's major reasons for choosing KTBS over KWKH in final decision granting Shreveport's Ch. 3—sole CP of the week. In affirming examiner Basil Cooper's initial decision (Vol. 10:25), Commission found the 2 applications about equal in other respects, but it concluded that KWKH (Ewing-Bronson families) would have too great control over media in area. KWKH principals hold interests in 50-kw AM in Shreveport, *Shreveport Times*, 50-kw KTHS in Little Rock, Ark., *Monroe* (La.) *World and News-Star*, Ch. 11 CP for KTHV, Little Rock. Wray family has no media ownership other than KTBS.

Boston's 5-way Ch. 5 fight took unusual turn this week. Recently, there were allegations that cartoonist Al Capp, whose Fosdick Productions has subscribed to 1.92% of Massachusetts Bay Telecasters, was responsible for pornographic drawings. This week, applicant offered amendment to delete Capp as stockholder, pointing to action of National Cartoonists Society suspending cartoonist Ham Fisher for failing to prove he didn't "doctor" Capp's drawings in effort to discredit Capp. Capp said he was offering to withdraw to keep rest of stockholders from getting involved in a remote "cat and dog fight."

Fight became more complicated immediately. All 4 of Massachusetts Bay's competitors filed joint opposition to the amendment. They referred to "patently false statements" by Capp; to 3 Boston policemen who had been prepared to testify regarding "a lewd and obscene incident in the life of Mr. Capp"; to FCC's consideration of re-opening record because of what police were expected to say, etc. They asked that hearing be re-opened and that 14 people, including Capp, be subpoenaed.

* * * *

Several allocations petitions were filed with FCC this week. KWAT, Watertown, S. D., applicant for Ch. 3, submitted plan for keeping Ch. 3 in Watertown and adding Ch. 10 to Bradley, S. D. Recently, Hills Bcstg. Co., Florence, S. D., also an applicant for Watertown's Ch. 3, had asked that Ch. 3 be shifted to Bradley, Ch. 10 allocated to

Watertown. KWAT proposes that Ch. 7 be substituted for Ch. 9 in Aberdeen, S. D., Ch. 9 for Ch. 7 in Jamestown, N. D., Ch. 9 for Ch. 10 in Pierre, S. D.

KSEM, Moses Lake, Wash., asked that Ch. 8 be added to town by substituting Ch. 11 for Ch. 8 in Walla Walla.

Another shift downward was sought by a uhf station—WHUM-TV, Reading, Pa. aiming to move from Ch. 61 to Ch. 15. It would achieve this by substituting Ch. 61 for Ch. 15 in Lebanon, Pa., Ch. 23 for Ch. 30 in Cumberland, Md., Ch. 30 for Ch. 46 in Chambersburg, Pa., deleting Ch. 29 from Philadelphia.

* * * *

Efforts of KGTV, Des Moines (Ch. 17) to obtain use of educational Ch. 11 were renewed this week. Station had been turned down on request that it be permitted to occupy Ch. 11 for 3 years, because educators weren't using it. This week, it submitted 8 alternative plans—such as temporary operation on both channels, temporary operation on Ch. 11, experimental operation on both, operation of Ch. 11 as satellite of Ch. 17, rule-making to make Ch. 11 commercial with KGTV permitted to use the channel pending rule-making.

Complicated fight over Storer's WGBS-TV, Miami (Ch. 23) will go to oral argument Feb. 28. Miami grantee WMFL (Ch. 33) and radio WINZ had protested moves whereby station was established and Storer obtained NBC affiliation (Vol. 10:51). Commission ruled that protestants are entitled to be heard.

Pinning hopes on Plotkin Memorandum's statements regarding de-intermixture (Vol. 11:6), WKOW-TV, Madison, Wis. (Ch. 27) urged FCC to reconsider denial of petition requesting that city's Ch. 3 be designated educational.

First to endorse FCC's proposed low-power satellite rules (Vol. 10:51) are the educators. Approval came from Clair L. Taylor, Michigan supt. of public instruction; John D. Millett, pres. of Miami U, Oxford, O.; George W. Starcher, pres. of U of No. Dakota. All thought inexpensive low-power operations would foster educators' early entrance into TV.

Network Accounts: High value of re-runs (Vol. 10:7) is sharply illustrated this week by ABC-TV's plan to give 10 *Disneyland* shows a third-run this summer with continued backing of hit program's current sponsors—Nash, American Dairy Assn., Derby Foods. It's something new in network repeats; only in syndication has third-run been vogue. If successful, ABC-TV plans to do same thing next summer with Disney's new *Mickey Mouse Club* (Mon.-Fri. 5-6 p.m.) which debuts in fall . . . Dave Garroway's *Today* goes to west coast via "quick kine" starting Feb. 28 for full 7-9 a.m.; since Sept. 27, it has been on west coast 8-9 only . . . Budweiser Beer to sponsor Screen Gems' *Damon Runyon Theatre* on CBS-TV starting April 16, Sat. 10:30-11 p.m., thru D'Arcy Adv. . . Kent cigarettes to sponsor *Adventure Theatre* as replacement for *Father Knows Best* on CBS-TV starting April 3, Sun. 10-10:30 p.m., thru Young & Rubicam . . . General Mills & CBS-Columbia to be alt. week sponsors of 2 CBS-TV shows starting first week in April—*Willy* (Thu. 10:30-11 p.m.) & *Life With Father* (Tue. 8-8:30 p.m.), former thru Dancer-Fitzgerald-Sample, latter thru Ted Bates & Co. . . CBS-TV's Sun. night lineup for next fall was strengthened considerably this week when Bristol-Myers signed Alfred Hitchcock to produce new comedy-mystery series 9:30-10 p.m. . . Dixie Cup to be alt. sponsor (with Mars Candy) of *Super Circus* on ABC-TV starting in March, Sun. 5-6 p.m., thru Hicks & Greist, N. Y. . . Corn Products Refining Co. (Mazola oil) buys Wed. 10:30-10:45 a.m. portion of *Arthur Godfrey Time* simulcast and Wed. 2-2:15 p.m. portion of *Robert Q. Lewis Show* on CBS-TV starting Feb. 23,

thru C. L. Miller Co., N. Y. . . Procter & Gamble to take over sponsorship of 15 min. of *Jackie Gleason Show* which Sheaffer Pen dropped last week, effective April 2, on CBS-TV Sat. 8-9 p.m., thru Compton Adv. . . ABC-TV drops TV version of *Breakfast Club* simulcast Mon.-thru-Fri. 8-9 a.m., following cancellation by Quaker Oats, sole surviving TV sponsor.

— ■ —

AT&T continues interest in network TV, including color, but has made no decision to buy a TV show yet—according to N. W. Ayer's Vance Babb, who handles account. NBC's projected *Wide, Wide World* (Vol. 11:6) has been considered but no commitment made. This week, in her Scripps-Howard column, Faye Emerson stated that movie director Frank Capra is shooting color series and Bell System "is said to be picking up the tab." She adds that release isn't due for 3 years, pending growth of color set circulation. Babb said that Capra has made some film for AT&T; that he doesn't know whether it will be used for TV, and presumes some of it is in color.

Rate increases: WBNS-TV, Columbus, on March 1 adds new 8-10 p.m. daily Class AA \$825 hour, \$175 min., Class A hour remaining \$780; WDEF-TV, Chattanooga, raises base hour from \$350 to \$400, min. \$70 to \$90; WWLP, Springfield, Mass., from \$300 to \$350 & \$60 to \$70; KOLN-TV, Lincoln, Neb., from \$250 to \$300 & \$50 to \$60; WFBG-TV, Altoona, Pa., April 1 raises base hour from \$500 to \$600, min. \$100 to \$120. Rate revision: WTVY, Dothan, Ala. lowered base hour from \$150 to \$100 before Feb. 12 commercial start.

EX-OWNERS OF UHF WNAM-TV, Neenah, Wis. (Ch. 42), who now control WFRV-TV, Green Bay (Ch. 5), hope to get the new vhf station on air with test patterns April 15, ABC & DuMont programs week later, writes v.p. Don C. Wirth. Target dates depend on FCC approval of merger deal between owners of off-air WNAM-TV and CP-holders for WFRV-TV (Vol. 10:49 & 11:2). WFRV-TV is due to receive 25-kw DuMont transmitter March 1, has leased building and 463-ft. tower of defunct WJPG-FM on Scray's Hill next to Norbertine Fathers' WBAY-TV (Ch. 2), says it can start on short notice since only work necessary is installation of transmitter and RCA 5-bay antenna. Neenah studios of WNAM-TV will be used to supplement Green Bay facilities. Base hour will be \$300. Rep will be Headley-Reed.

No transmitter shipments were reported this week, but DuMont reports order for 50-kw amplifier to be shipped in 30 days to KCRG-TV, Cedar Rapids, Ia. (Ch. 9).

* * * *

In our continuing survey of upcoming new stations, these are latest reports received:

KWTX-TV, Waco, Tex. (Ch. 10), now plans April 1 start, reports mgr. M. N. Bostick. RCA equipment is on hand, but studio-transmitter building won't be ready until then. RCA antenna is scheduled for installation about March 1 on 461-ft. Andrews tower. It will be city's second outlet, KANG-TV (Ch. 34) having begun in Oct. 1953. Earl B. Huff will be chief engineer; Gene Lewis, program director. Base rate will be \$200. Rep not chosen.

KSTF, Scottsbluff, Neb. (Ch. 10), seeking National Park Service approval of new site atop Scottsbluff National Monument, has set back test pattern target to April 1, reports Wm. C. Grove, gen. mgr. of parent KFBC-TV, Cheyenne, Wyo. (Ch. 5). KSTF will be 79 mi. southwest of Cheyenne, plans to rebroadcast KFBC-TV programs, but will also have some film originations. It has ordered RCA transmitter and 6-bay superturnstile antenna. KFBC-TV chief engineer R. C. Pfannenschmidt will go to Scottsbluff to take charge of 4-man operation. Time will be sold only in combination with KFBC-TV. Rep for both is Hollingbery.

ANOTHER GOVT. WITNESS in Lamb case swore this week that he had given false testimony against the Ohio broadcaster-publisher-industrialist last fall. Put on stand by Lamb attorneys for cross-examination, Lowell Watson, ex-Communist now employed by Justice Dept. as consultant, declared his false testimony was due to "constant and consistent coaching, conditioning and misleading conversation" by former FCC attorney Walter Powell, FCC investigator Robert Leahy and Wm. G. Cummings, govt.'s first witness in case who testified he was employed as FCC "consultant." Watson said he testified falsely last fall when he swore Lamb was on advisory committee of International Labor Defense and when he said he was present when Lamb gave money to Communist causes.

Examiner Herbert Sharfman this week said he considers turnabout witness Mrs. Marie Natvig (Vol. 11:7) "a completely incredible witness" and indicated he will give no weight to her testimony. On the stand earlier this week, Mrs. Natvig testified: (1) FCC attorneys once conceded to her that they were "no match" for Lamb attorney Russell M. Brown and were seeking to have him barred from practice before the FCC; (2) FCC lawyers called Sharfman a "weak sister," and said one Commissioner inquired as to whether Sharfman could be taken off case.

Widely publicized Natvig testimony stirred demands for investigations. Chairman Magnuson (D-Wash.) said his Senate Commerce Committee will take a "careful look at what happened in this case." He indicated that question may be handled in special probe by communications sub-

committee headed by Sen. Pastore (D-R. I.). But there were also strong signs that whole issue of FCC's handling of Lamb case will be explored by Committee Wed. Feb. 23 during confirmation hearings on Chairman McConnaughey as member of FCC.

Attorney General Brownell, in answer to press conference question this week, said Justice Dept. had no plans to take action against Mrs. Natvig. This drew rebuttal from Senate investigating subcommittee chairman McClellan (D-Ark.), who said: "I think if there is any violation of the law, the Justice Dept. should take notice of it and I say with equal emphasis that it is the duty of the FCC to refer it to the Justice Dept."

— ■ —

Published reports that WGR-TV, Buffalo (Ch. 2), was being considered for purchase by Storer led station's board of directors to release resolution Feb. 17 stating that station is not for sale and will not release any figures to anybody preposing to submit bid. If Storer should acquire another station, as indicated by original story, it's presumed he would dispose of either his WAGA-TV, Atlanta (Ch. 5) or WBRC-TV, Birmingham (Ch. 6).

"Lack of diligence" in construction of WHTT, Wilmington, N. C. (Ch. 3) was cited by FCC in setting grantee for hearing starting March 18. Commission said it wasn't satisfied with CP-holder's explanation that it couldn't build because of "conspiracy" between CBS and Jefferson Standard Bestg. Co.

* * * *

CKBB-TV, Barrie, Ont. (Ch. 3), which recently got license after being delayed by *Toronto Telegram's* protest (Vol. 10:44), hopes to start programming Sept. 15, reports owner Ralph T. Snelgrove. It will use Stainless tower, hasn't ordered other equipment yet as chief engineer Jack Mattenley plans U. S. trip to check equipment being used by smaller stations. Canadian rep will be Paul Mulvihill.

CBC is now working on permanent studio-office building for its CBHT, Halifax, N. S. (Ch. 3), now operating from Old College St. school building. The L-shaped structure at Bell Rd. & Summer St. will include 40x60 studio.

WPRO-TV, Providence, R. I. (Ch. 12), hoping to get going after being held up for over a year by protests of WNET (Ch. 16), applied for STA this week. Request was filed after both FCC and court turned down WNET's appeal that WPRO-TV be kept from starting—though court ordered expedited hearing to be held early in April because of "substantial and serious" questions involved. WNET has filed opposition to WPRO-TV's latest request for STA. WPRO-TV is requesting permission to build interim 557-ft. Blaw-Knox tower, use 12-bay GE antenna; 50-kw GE transmitter is on order.

KCOR-TV, San Antonio, Tex. (Ch. 41), awaiting FCC action on request for Ch. 14 allocation, has changed test pattern target to first week in May, according to chief engineer Marvin L. Fieldler. Work on 558-ft. Truscon tower begins early in March; RCA 1-kw transmitter is due about March 15. It plans to be all-Spanish outlet, using films and kines from Mexico and other Latin-American countries to supplement U. S. films. Base hour will be \$250. Rep will be Richard O'Connell.

WNDU-TV, Notre Dame-South Bend, Ind. (Ch. 46), begins construction next week, has test patterns scheduled for late June-early July, followed by programming July 15, writes v.p. & gen. mgr. Bernard C. Barth. It will use 500-ft. tower, has RCA equipment, including 2 field camera chains, ordered for delivery within 60 days. Base rate not set; rep not chosen.

Color Trends & Briefs: Far from cutting colorcasting schedule, CBS-TV's current objective, according to pres. Jack Van Volkenburg, is to hike output to 3-3½ hours a week. He emphasizes that this is an objective, not yet definitely fixed. Aim, he says, is 2 night color shows a week, plus something every day in daytime hours, starting in April and running rest of year. Schedule will probably comprise existing shows converted to color.

NBC-TV is pursuing policy of "big" color shows, meanwhile, and is currently giving tremendous buildup to March 7 *Peter Pan* on *Producers' Showcase*. Two-hour show, starring Mary Martin and Cyril Ritchard, is being transferred bodily from successful Broadway run to color studios. As part of promotion, some 5000 dealers for sponsors Ford and RCA were invited to studios of 83 stations which carried closed-circuit colorcast Feb. 15, featuring appearances of show's stars, NBC exec. v.p. Robert W. Sarnoff and NBC-TV network v.p. Thomas A. McAvity.

It's presumed NBC-TV will increase color schedule if CBS-TV does, and many hope that ABC-TV will get into color swim—at least to extent of colorcasting portions of the tremendously popular *Disneyland*, some of which is already on color film.

* * * *

Technical quality of color transmission, meanwhile, has so improved in recent months that poor or even fair results are exception. NBC's efforts have been uniformly quite good for some time, but CBS's improvement after rather rough start has been particularly noteworthy.

Among recent shows, NBC's "The Women" on *Producers' Showcase* Feb. 7 and "Pinafore" on *Max Liebman Presents* Jan. 30 drew high critical praise while CBS's "The Show Off" on *Best of Broadway* Feb. 2 was excellent, vastly improved over CBS shows year ago. CBS's *Shower of Stars* Feb. 17 had some of finest color seen to date—exceptional fidelity, lighting and registration, with cameras almost perfectly matched. NBC's film show *Norby* has been spotty, some sequences very good, others below the quality one would expect from sponsor Eastman Kodak. Eastman is currently considering whether to "go live" and whether to continue show in color.

Principal defect in color today remains improper balance between cameras. Even in best transmissions, at least a slight difference is perceptible—but engineers have whittled variations down so that they're seldom objectionable. Officials don't deny problem exists, but they point out that much of problem lies in receiver adjustment rather than solely in cameras. O. B. Hanson, RCA operations engineering v.p., notes that average viewer has tendency to turn contrast and chroma controls too high, accentuating camera differences. Our own experience bears that out. Natural tendency is to use a heavy hand with color controls. Experimentation proved, however, that conservative dial-twiddling produces much more natural results.

* * * *

Color TV is too hoity-toity for mere beer guzzlers, according to New York's Paramount Hotel. In its new "Curtain Call Lounge," it has installed RCA 21-in. color set and invites viewer to partake of "malt beverages from no less than 9 nations" so that he won't be "just another ordinary beer drinker."

Enterprising Klaus Landsberg, v.p.-mgr. of Paramount's KTLA, Los Angeles, says he's willing to feed colorcast of next April's A-bomb test to networks if they're interested. KTLA has handled 3 previous blasts, micro-vesting them from Nevada test sites.

Feb. 21 week network color schedules: NBC-TV—Feb. 23, *Norby*, 7-7:30 p.m., and *Kraft TV Theatre*, "Emperor Jones" starring Ozzie Davis, 9-10 p.m.; Feb. 27, *Max Liebman Presents*, "Big Time" starring Milton Berle, Martha Raye & Ray Bolger, 7:30-9 p.m.

"Commprovision"—a wired TV system similar to community antenna systems except that it's to originate all programs locally—is latest project for reaching communities in dead spots or otherwise beyond the range of stations. New company organized to exploit field is Trans-Community Television Network Inc., 141 El Camino, Beverly Hills, Cal. Pres. is Jerome L. Doff, attorney, who states that it's strongly backed; only other principal disclosed to date is Allen Lane, ex-McClatchy and onetime Ventura (Cal.) station operator, who is working on technical details with RCA, from whom equipment is being ordered. According to Doff, first test town is Bishop, Cal. (pop. 2891), now blanked out by Mt. Whitney, and 20 or more additional communities will be disclosed in a few weeks. Doff contemplates that networks, ad agencies and packagers will make shows available for such "captive" audiences. Subscribers are to be charged \$80 for installation plus not more than \$10 monthly fee. As advertising revenues rise, Doff says, plan is to drop fee to \$2 or \$3 monthly. Systems are to originate all programs through live & film cameras and slide equipment—unlike community TV systems which receive all their programs from regular TV stations and relay them to subscribers through cables. Among community antenna systems, there's one exception, apparently precisely what "Commprovision" has in mind. It's system in Ketchikan, Alaska (see *TV Factbook No. 20*, p. 408) which feeds some 350 subscribers solely with own originations—using Dage cameras and Holmes 16mm projectors. Cost of each "Commprovision" installation is estimated at \$35,000, including first-year operation; no licensed operators are required, and no FCC authorization is needed, inasmuch as operation is purely intrastate, involving no radiation.

Uhf propagation study of NBC's old experimental station in Bridgeport, Conn., has been published by FCC as TRR Report No. 2.4.13. Commission made field strength studies of 534.75-mc transmissions at 30-240 mi. with help of RCA, Bureau of Standards, U of Connecticut and FCC monitoring bureaus. Copies are available from Technical Research Div., Room 7358, New Post Office Bldg., Washington.

A "summer incentive plan" to encourage partic. purchases on *Today*, *Home* or *Tonight* during summer was disclosed this week by NBC-TV. Under plan, an advertiser who buys at least 7 partic. on one or combination of the 3 shows between May 30 and Sept. 2 will be given additional free partic. during summer. Number of free spots is based on scale of paid purchases, ranging from one free partic. for 7-11 paid spots to 18 free partic. for 52-54 paid.

Tackling conversion problem, Storer has named Ralph C. Powell, TV trade veteran, as "director of trade" for WGBS-TV, Miami (Ch. 23). He has charge of program to boost conversion and uhf set sales, involving fixed conversion price of \$29.95 arranged with local dealers and promoted through WGBS-TV newspaper ads and on-air spots.

First organization of kind is new Southern California Color TV Dealers Assn., group of some 100 dealers aiming to promote public attendance at dealer color demonstrations, increase number of color shows, etc. Officers: Everett M. Wren, Barker Bros., Los Angeles, pres.; Herman Kennedy, Whittier Radio & TV Co., Whittier, v.p.; Marvin Stuthein, Marvin's TV & Appliance Co., Fullerton, secy.-treas.

RCA reports 3-V color film cameras shipped Feb. 4 to WSAZ-TV, Huntington, W. Va.; Feb. 9 to KRON-TV, San Francisco and WCHS-TV, Charleston, W. Va.; Feb. 14 to WSM-TV, Nashville.

RETMA LEADERS ASSAY MARKET AND PROBLEMS: RETMA chairman Max F. Balcom told the N.Y. Society of Security Analysts this week that at the end of last year "7 out of 10 families had become customers of our industry." He went on:

"By the end of this year, it will approach 8 out of 10. Lest you think our potential is shrinking, let me quickly add that we look forward to a rising market for replacement and second sets. For example, during 1955 we expect nearly 25% of the estimated 6,300,000 TV set sales to the public to be to former customers.

"Moreover, there are still about 15,000,000 households without any TV sets. So we are still far short of saturation. As advances in automation, printed circuitry and transistors take place, lower costs will bring TV to an increasing number of families. Nearly 1,000,000 new families arise each year to broaden our market."

There you have the judgment of at least one of the ablest of industry leaders -- and he's joined by many others. This week, more than 200 RETMA members gathered for their annual midwinter conference in N.Y. They discussed the market outlook, prices, color -- and such critical problems as the proposed removal of excise tax on uhf receivers (see story, p. 12), fight to halve 10% excise tax on monochrome sets and eliminate it entirely on color sets, suggestion for additional tariff relief.

It was generally conceded that the 7,300,000 TV sales of 1954 probably will not be equalled this year -- not unless second set and replacement sales show an unexpectedly high upturn. This despite good start in production, with some 700,000 TVs sold by the factories in Jan. as against 500,000 in Jan. 1954.

As for prices, it's still too early to detect any upward trend on industry-wide basis -- albeit Philco and Hoffman have raised a few sets. Hiking prices in first few months of year seems to go against the grain of many set makers. But if the market holds up, they indicated, it's altogether likely that prices will edge upwards to alleviate today's admittedly tight price structure at all levels.

Color continued to evoke bearish comment -- nobody seeing much chance of moving many sets this year in face of high costs, insufficient programs and public apathy. There seemed to be agreement that the real merchandising of color was at least a year or 18 months away even if the excise tax on color sets is removed.

* * * *

President Glen McDaniel's report on RETMA's efforts to get the 10% excise tax cut in half -- as some other appliances succeeded in getting from last Congress -- was reported out of closed sessions to have been quite gloomy. So was his estimate of the prospect of eliminating tax on color sets. He discerned little disposition in Congress to cut any excises this year, but held out some hope that that proposal to do away with tax on color might be more favorably received.

On seeking tariff relief to offset recently accelerated influx of foreign products (Vol. 11:1), RETMA board considered recommendation to ask Dept. of Commerce to split up its single tariff schedule on TV-radio-components into several groupings so that RETMA can ask relief only on radios and parts, on which the competition from overseas, particularly Britain and West Germany, has been greatest.

But RETMA officials expressed doubt that an impressive case for relief could be made out for an industry which, over-all, is enjoying something of a boom.

* * * *

TV production totaled 171,434 week ended Feb. 11, almost same as the 171,624 turned out in preceding week but up from 154,421 in week ended Jan. 28. It was 6th week of year, brought output to 1,000,000, compared to 630,000 in same 1954 period.

Radio production totaled 261,827 (145,136 auto), compared to 264,693 in week ended Feb. 4 and 226,054 week before. It brought 6-week radio output to 1,530,000, compared to 1,300,000 in corresponding period year ago.

NEW CONGRESS PUSH FOR UHF-VHF SETS: One way to help uhf now is to stop the flow of vhf-only sets into the marketplace. There's virtually unanimous agreement on that -- though there are vast differences of opinion as to how much it would help.

Exemption of all-channel sets from 10% Federal manufacturers excise tax is most widely espoused method of accomplishing that objective -- and because it has garnered wide industry support it will be pushed immediately by TV-wise lawmakers.

Still, it's likely to meet strong opposition from economy-minded Congressmen -- because it's "special interest" legislation. Nevertheless, Capitol Hill observers believe it can be passed this session if public support is strong enough.

Bill was introduced this week by Rep. Ikard (D-Tex.), embodying proposal made last year by Sen. Johnson (D-Colo.) and endorsed by Senate Commerce Committee. Ikard measure (HR-4070) would exempt from excise tax any TV receiver "which, at the time of sale, is capable of receiving TV broadcasts in all of the uhf channels." Bill also provides that if set is a TV-radio combination, tax shall not apply to TV portion of set. Also pending is HR-1814, introduced by Rep. McCormack (D-Mass.), embodying all excise tax proposals which died with last Congress, including plan for \$7 tax credit for every set containing a uhf tuner (Vol. 11:7).

Ikard is in good position to push the tax-exemption proposal -- since he is member of Ways & Means Committee, which has jurisdiction over tax legislation.

Tax-exemption proposal was endorsed by recent Plotkin report (Vol. 11:6-7), got less hearty support in this week's Jones report (see p. 1). While Jones conceded such a plan "conceivably" could benefit uhf, he said it offers "insufficient incentive," and urged development of "some other means to encourage manufacturers of TV receivers to shift to production of all-channel receivers only." He didn't elaborate, but both he and Sen. Bricker said at press conference this week that they oppose extra "subsidies" for all-channel sets as well as laws against interstate shipment of vhf-only receivers (as proposed by Comr. Hennock and others).

NARTB was quick to offer support for HR-4070, pres. Harold Fellows writing Rep. Ikard he was "deeply gratified" by bill, and that he was in favor of anything which relieved the burden on uhf stations and would provide for widest expansion of broadcasting. RETMA's set div. exec. committee under H. Leslie Hoffman, meeting in New York this week, also endorsed excise tax exemption for all-channel sets.

Other plans are in the works for promotion of all-channel set program. Chairman Magnuson (D-Wash.) of Senate Commerce Committee is now considering revival of the Potter subcommittee's plan to meet with set makers and get voluntary agreements to discontinue output of vhf-only models.

This was hottest topic of discussion among set makers at RETMA's midwinter conference this week -- as word leaked out that Magnuson may seek meeting with manufacturers. Consensus of the set makers was: (1) As long as it costs more to make all-channel set than vhf-only set, we can't agree to turn out the higher-priced units exclusively. (2) We must be extremely cautious not to enter into any agreement that smacks of restraint of trade. (3) If excise tax were removed, production of vhf-only receivers probably would end.

As to "restraint of trade" worries, it's not clear just how a conference of manufacturers called by a legislative body could be construed as violation of anti-trust laws. There's no question that a Senate committee has authority to ask the manufacturers to appear. Question of "restraint" was raised last year, and Potter asked Justice Dept. clearance for such a meeting and agreement.

Veteran Wireless Operators Assn., at 30th reunion banquet in N. Y. Feb. 19, conferred awards on ex-President Herbert Hoover, along with these industry notables: Monte Cohen, General Instrument Co.; Arthur Batcheller, FCC; Capt. V. H. C. Eberlin, USN; F. L. Henderson, American Cable & Radio Corp.; Harry W. Houck, Measurements Corp.; Col. A. H. Read, communications officer, British Embassy; E. H. Rietzke, Capitol Radio Engineering Institute; F. M. Ryan, AT&T; T. P. Wyncoop, Radiomarine Corp. of America.

RETMA set div. this week elected as directors Parker H. Ericksen, Crosley, replacing Leonard F. Cramer, resigned, and Lawrence G. Haggerty, Capehart-Farnsworth, replacing Fred Wilson, now IT&T industrial relations v.p. Seymour Mintz, CBS-Columbia, was elected to exec. committee, replacing Louis Hausman, now CBS Inc. v.p.

Market dates to remember: Western Summer Market, July 18-22 at Western Merchandise Mart, San Francisco; Western Electronic Show & Convention, Aug. 24-26 at San Francisco Civic Auditorium.

Topics & Trends of TV Trade: One way to sell more higher priced TV sets—perhaps even more color receivers—is to promote greater use of consumer credit, in opinion of Wm. J. Cheyney, exec. v.p., National Foundation for Consumer Credit, Washington, who tells us he's trying to get TV-radio-appliance manufacturers to join in series of institutional magazine ads stressing that purchases can be made on credit. Also planned by his organization is campaign of TV-radio spots on 200 stations designed "to develop understanding and intelligent use of credit and to awaken the doubting Thomases to the fact that credit is part of our private economy and not a firecracker explosive, a dangerous adjunct to be avoided."

Mr. Cheyney estimates some 65% of current TV-radio-appliance purchases are on credit, but believes number of purchases and percentage of those using credit could be substantially increased by proper promotion. "There are 10,000,000 families in America who refuse to buy any consumer durable goods on credit," he said, "so many of them are simply doing without TV, radio, appliances and other items which have become almost necessities. And they're not poor people, either. Many have incomes between \$7500 and \$10,000 a year."

* * * *

CBS-Columbia within last few months has gotten \$5,000,000 in govt. contracts, its first since acquiring old Air King operation about 3 years ago and, according to pres. Seymour Mintz, intends to become a major factor in govt. business. First items are a new hand-held transceiver for the Army Signal Corps and a new shipboard transmitter for the Navy. These were developed by CBS Laboratories Div., headed by Dr. Peter Goldmark. Handling govt. sales is Robert K. Hartman, ex-Polarad, who served as a contracting officer with the Signal Corps during World War II and the Korean War.

Company's current quarter sales as a whole, according to sales v.p. Harry Schecter, are best in its history, will be 50% better second quarter. While the "CBS" brand on TV sets hasn't taken hold as fast as expected, accent now is on building up a distributor organization, mainly independent but in some cases company-owned. Own branches are now operated in New York, Boston, Philadelphia, Detroit, Dallas. One of dealer inducements is so-called ADD plan (Additional Dealer Discount) whereby 2-6% added discounts are given, according to volume purchased, to provide more liberal trade-in allowances on purchases of new CBS sets (Vol. 11:6). Firm's avowed aim is gain of 5% of the TV market.

* * * *

Lower Canadian TV set prices would be immediate result of removal of 15% excise tax, Canadian RTMA told Finance Ministry last week in formal brief presented by gen. mgr. Stuart D. Brownlee & W. H. Jeffrey, Philco, chairman of Canadian RTMA's govt. acts & regulations committee. With 25 or more manufacturers competing in Canadian TV market, brief noted, these price reductions "will bring TV within reach of hundreds of thousands of Canadians" who cannot now afford it.

Philco increased price by \$10 on its only 17-in. table model, raising mahogany version from \$150 to \$160, blonde \$160 to \$170. It was its second price increase in 2 weeks, four 21-in. table models having been previously raised by \$10 (Vol. 11:6). Added to line this week were a 24-in. grain mahogany console at \$280 & open-face grain mahogany console at \$330, blonde \$340.

Hoffman Electronics raised prices by \$10-20 on several 21-in. models introduced last month, gen. sales mgr. Walter L. Stickel citing need for wider profit margins by factory, distributor & dealer.

A "mint of money" can be made in high-fidelity by the dealer who can merchandise it intelligently, in opinion of Wybo Semmelink, mgr. of radio div., North American Philips Co., N. Y., distributor of Philips of Eindhoven radios & phonographs. Addressing southeastern regional conference of National Assn. of Music Merchants, he advised dealers to forget about high-fidelity components business and concentrate instead on selling established lines of complete high-fidelity phonographs in a variety of qualities and prices. He described typical "hi-fi" fans as "fiends to a great extent" because they are never satisfied with what industry has to offer but are constantly seeking new gimmicks to accentuate tones which are purposely subdued. Such fans, he said, buy almost exclusively from parts jobbers and are little more than headaches for dealers who seek their patronage. Far better, he said, to stock complete high-fidelity phonographs selected with "your ear as a listening post." Even when high-fidelity instruments are on floor, "be prepared for the worst," he cautioned. "In your long career, you have never sold anything that has created such numbers of experts." Wm. Gard, exec. secy. of NAMM, disclosed that Washington law firm of Ford, Bergson, Adams & Borkland has been retained to represent music trades in urging Congress to repeal 10% excise tax on musical instruments.

TV set servicing in Britain is treated in January *Radio & TV News*, in article by John D. Burke, former New York serviceman who has worked on sets in London for 1½ years. He notes ease of servicing sets equipped for one channel and oriented to one station, says vertical polarization minimizes airplane flutter. AM sound and very simple sync circuits also contribute to ease of servicing. On other hand, variety of receiving tubes is so great as to produce headaches. Serviceman rarely goes out on call; whole set is usually brought to shop. Set owner pays a full day's wages of serviceman for job, regardless how small. As for working conditions, Burke likes 9-6 hours, no night work. Though wages are very low by U. S. standards (\$4.20-\$5.60 a day), he writes "one can live quite comfortably" because living expenses are relatively small. Servicemen earn more than bus drivers, railroad engineers, many factory workers.

Muntz TV has earned \$300,000 after taxes since March 1954, when court proceedings began on its petition for re-organization under Chapter X of Bankruptcy Act (Vol. 10:10), said pres. Earl W. Muntz this week in personal report to U. S. District Court in Chicago. He said Chicago plant's "most feasible economic capacity" is about 500 TV sets a day, or 10,000 a month. Muntz currently has about 100 independent exclusive dealers, of whom about 4 handle 50% of company's sales, he said. He said too that company has spent no money for advertising and does not plan to do so through March, although some of its dealers are conducting very extensive advertising campaigns. About 1,115,000 shares of Muntz common are outstanding, of which 400,000 are held by general public, balance distributed among Mr. Muntz (who holds 150,000), investors, co-workers and friends.

New line of German radios is being marketed in U. S. under "Nora" brand name by Heliowatt Werke, Berlin. Maruth Laboratories, N. Y., has been appointed import agent, has in turn created Nora Electronics Inc., 351 Bleecker St., N. Y. (H. Marshall Scolnick, pres.) as exclusive U. S.-Canadian sales agent. First offering of "Nora" radios comprises 3 table models, console combination & chair-side high-fidelity phonograph. Prices were not disclosed.

Special TV set, using only 3 receiving tubes and designed for community TV systems, is described in Feb. *Wireless World* of London by EMI's E. J. Gargini.

Trade Personals: John K. McDonough, ex-Sylvania TV-radio gen. mgr., joins General Instrument Corp. as v.p. of its F. W. Sickles div. and sales director for both parent company & subsidiary; Edward A. Freed continues as gen. sales mgr. . . . Rollie Sherwood, ex-Hallicrafters v.p., has organized Sherwood Sales Inc., manufacturers reps, 230 N. Canal St., Chicago, with branches in N. Y., Cleveland & San Francisco; associated with him are Robert E. Rathford, ex-General Dry Batteries Inc. and R. G. Sidnell . . . W. O. Spink promoted to equipment sales mgr., Sylvania electronic products sales div., N. Y., reporting to gen. sales mgr. D. W. Gunn . . . Leonard Maher named NARDA field secy. in charge of member services, replacing Mrs. Irene Brown, resigned . . . Charles Condikey, ex-DuMont & RCA, named Westinghouse TV-radio district mgr. for upper mid-Atlantic region, Philadelphia; Charles J. Klein, ex-CBS-Columbia & Motorola, named mgr. of lower region, Baltimore . . . Robert Windt, CBS-Columbia director of public relations & sales promotion, takes on additional duties of radio sales mgr. . . . Phil Stone, ex-Philco, resigns as CBS-Columbia regional mgr. in Denver, to enter distribution business in Phoenix . . . George R. Mather and Wm. Holroyd, both ex-Canadian GE, have formed Broadcast & Communications Consultants Ltd., Toronto . . . Wm. Balderston, Philco chairman, re-elected to National Industrial Conference Board . . . Wm. Paton named purchasing agent for all DuMont manufacturing divs. . . . Raoul Frye resigns as engineering v.p., National Co., Malden, Mass.; Eugene F. Grant, ex-W. L. Maxson Corp., N. Y., named engineering director . . . Sam F. Arn, ex-GE & Majestic Radio, named engineering sales mgr., Packard-Bell technical products . . . W. R. Armstrong named sales mgr., photoswitch div., Electronics Corp. of America, Boston; Thomas Weldon named ECA European sales director, headquartering in Frankfurt, Germany . . . Charles R. Lane, ex-Gabriel Electronics, named regional mgr. of Andrew Corp., in charge of new branch office at Westwood, Mass. . . . Arthur C. Davis, founder & chief engineer of Cinema Engineering Div., named managing director of Aerovox's new west coast research lab . . . B. G. H. Rowley, ex-Marconi representative in U. S. & Canada, appointed mgr. of its maritime div., Chelmsford . . . Wm. Dubilier, founder & first v.p. of Cornell-Dubilier, awarded first annual Gano Dunn medal by Cooper Union for outstanding professional achievement by an alumnus . . . Carl G. Steinecke, ex-GE, named purchasing agent, A. S. Backus works mgr., Mycalex Corp.

DISTRIBUTOR NOTES: CBS-Columbia establishes new factory branch, CBS-Columbia of Detroit, replacing Rutherford Distributing Co., whose pres. Wm. C. Rutherford remains as gen. mgr. . . . DuMont: Elliott-Lewis Corp., 16th & Hamilton Sts., Philadelphia (T. H. Lewis Sr., chairman) . . . Bendix Radio: Max Fischman Co., 1141 Penn. Ave., Pittsburgh, & Kilsby Refrigeration Co., 633 Sheridan St., Honolulu (Herbert Stielau, gen. mgr.) . . . Olympic Radio: Master Equipment Co., Washington, Pa. . . . Cunningham Distributing Inc., Albuquerque (Admiral) establishes branch at 2225 Mills St., El Paso (Jack Burnett, mgr.), replacing Irion Co. . . . O'Donnell Distributing Co., Syracuse (Crosley-Bendix) opens branch at 72 N. Union St., Rochester (Ward O'Hara, mgr.) . . . Admiral Distributors Corp., Pittsburgh, appoints Larry L. Malin gen. mgr.; he's ex-gen. mgr. of Admiral Baltimore distributor, Maryland Wholesalers Inc. . . . Midwest-Timmermann Co., Des Moines (DuMont) elects C. J. Herkes sales v.p. . . . Hamburg Bros., Pittsburgh (RCA) appoints Carl Hamburg sales director . . . Harold N. Lieberman Co., Minneapolis (Capehart-Farnsworth) appoints B. F. Mondale sales mgr. . . . Westinghouse Electric Supply Co., Chicago, moves consumer products div. to 6500 W. Cortland St.

Financial & Trade Notes: One of reasons why picture people aren't worrying so much any more about the inroads of TV: Columbia Pictures, for 6 mo. ended last Dec. 25, first half of its current fiscal year, showed net profit of \$2,823,000 (\$3.40 per share) compared with \$1,910,000 (\$2.24) in 26 weeks ended Dec. 26, 1953. And the bible of show business, *Variety*, prints this table Feb. 16 showing uptrends in gross revenues accruing to major film & theatre companies over 5-year span—noting that “the drop in circuit tallies was due to shrinkage in theatre holdings in accordance with divorcement and divestiture court decrees and does not reflect business conditions”:

	1950	1953	1954
Columbia	\$ 57,200,000	\$ 60,300,000	\$ 80,200,000
Loew's	179,300,000	177,600,000	183,100,000
National	67,800,000	63,900,000	64,400,000
Paramount	81,800,000	110,300,000	115,000,000
Stanley-Warner	71,200,000	48,900,000	66,200,000
20th Century-Fox	90,800,000	105,700,000	107,000,000
Universal	55,600,000	70,500,000	77,900,000
Warner Bros.	68,400,000	68,900,000	70,100,000
TOTALS	\$672,100,000	\$716,100,000	\$763,900,000

The 1954 figures, says *Variety*, are estimates in the cases of Paramount and 20th Century-Fox; intentionally omitted was American Broadcasting-Paramount Theatres because the AB-PT merger made comparisons impossible.

* * * *

Consolidated Television & Radio Broadcasters Inc., Bitner firm which placed some of its stock on market in Nov. (Vol. 10:48), earned net profit of \$1,253,660 after taxes of \$1,407,500 in fiscal year ended Nov. 30. Newly issued report shows broadcasting and other revenues were \$6,777,194, operating expenses \$2,728,427, selling, administrative & other expenses \$2,671,256. It was first annual report for new company, but same group showed operating revenues of \$6,480,208, net income of \$824,253 in 1953 fiscal year, according to SEC prospectus which also listed revenues & earnings for each year from 1947 (Vol. 10:48). Firm's latest acquisitions are share-time Ch. 11 stations WTCN-TV & WMIN-TV, with WTCN radio, in Minneapolis-St. Paul, which it proposes to combine (Vol. 11:5).

Dividends: Avco, 10¢ payable Feb. 24 to stockholders of record Feb. 7; Tung-Sol, 25¢ March 2 to holders Feb. 15; Zenith, 50¢ March 31 to holders March 10; Canadian Marconi, 6¢ May 2 to holders March 15; Radio Condenser Co., 5¢ March 21 to holders March 1; Philco, 40¢ March 12 to holders March 1; Magnavox, 37½¢ regular quarterly plus 5% stock March 15 to holders Feb. 26; Clevite Corp., 25¢ March 10 to holders Feb. 28; Indiana Steel Products, 100% stock plus 22½¢ on new March 10 to holders Feb. 28; Storer Bestg. Corp., 30¢ on new March 1; Cornell-Dubilier, 30¢ regular plus 20¢ extra March 8; Hazeltine, 35¢ March 15 to holders March 1; American Bosch Arma, 25¢ April 15.

Official Films Inc. pres. Harold L. Hackett, reporting company now has 3000 stockholders, states in Feb. 4 letter to them that both sales and earnings for fiscal year ending next June 30 will be larger than those of preceding year, when sales were \$656,401, net income \$317,172, deficit in earned surplus \$400,062 (Vol. 10:39). Currently, it's distributing *My Hero*, *Secret File U.S.A.*, *Colonel March of Scotland Yard*, *Terry and the Pirates*. Latest properties acquired are *Robin Hood*, *The Scarlet Pimpernel*, *This Is Your Music*, *The Star & the Story*.

P. R. Mallory & Co. earned \$1,071,803 (\$1.20 a share) on sales of \$54,630,091 in calendar 1954, compared to \$2,547,813 (\$3.72) on \$70,874,347 in 1953. For quarter ended Dec. 31, earnings were \$550,755 (76¢) on \$15,167,317 vs. \$390,074 (54¢) on \$15,462,676 in corresponding 1953 period.

Income from TV-radio operations of General Tire & Rubber Co. subsidiaries, principally General Teleradio, totaled \$1,376,855 (\$1.12 a share) last year, reports pres. Wm. O'Neil.

PROCEEDINGS AND DEBATES OF THE 84th CONGRESS, FIRST SESSION

Vol. 101

WASHINGTON, MONDAY, FEBRUARY 14, 1955

No. 26

Television in Great Britain

EXTENSION OF REMARKS OF

HON. CHARLES E. POTTER

OF MICHIGAN

IN THE SENATE OF THE UNITED STATES

Friday, February 11, 1955

Mr. POTTER. Mr. President, recently Martin Codel, publisher of *Television Digest*, an authoritative news service specializing in the broadcast and electronics field, visited Great Britain and had an opportunity to look over the television and electronics developments in that country.

On his return to the United States, Mr. Codel wrote a number of articles on this subject for his publication. I ask unanimous consent to have printed in the Appendix of the *Record* several articles that appeared in the November 6, 1954, issue of *Television Digest*, which deal with television in England.

There being no objection, the articles were ordered to be printed in the *Record*, as follows:

[From the *Television Digest* of November 6, 1954]

BRITISH TO PROFIT BY UNITED STATES EXAMPLE

Booming Britain is currently enjoying a flourishing TV trade that's virtually certain to be stimulated even further by the introduction of commercial TV as an additional service, scheduled for September 1955.

First competition against British Broadcasting Co.'s one-channel service, more choices of programs, greater opportunities for talent and personnel, probably even an expanded program day from the present 3-10:30 p. m.—all this should, if the American experience means anything, bring about increased set sales and bigger audiences.

More license revenues, at £3 year (\$8.40) for a TV plus radio, might even permit the noncommercial BBC to undertake its own cherished plans for a second service, eventually giving Britons a choice of 3 programs.

It's our conviction, after many talks with many people in all walks of British life during a 5-week, 1,600-mile tour of England, Scotland, and Wales, that the citizenry and the business community preponderantly welcome a fair try for the new ITA (Independent Television Authority) recently authorized to set up TV stations and lease time segments to program contractors who in turn will sell commercials to sponsors.

They want it despite strong opposition by the Labor Party and high churchmen to legislation passed by Winston Churchill's Conservative government. They want it because they dislike monopoly no less than do their American cousins—and, any way you spell it, Government-chartered BBC is a monopoly often accused, fairly or unfairly, of giving the people what it thinks is good for them rather than what they may want. Moreover, the British are an ad-minded people—so much so that—

1. They watch film and slide commercials in theaters, big and little, into which they have paid admission—and they seem to like them. These are hardly different from the kind they will soon see on TV; indeed, piled

on top of one another, they're much more blatant in the theater than are most of our TV spots.

2. They're accustomed to commercial radio from Normandy and Luxembourg, with British advertising dominant. This audience is greater than seems apparent, for the European wavelength interference problem is so great, aggravated by Russia, that much of Britain gets poor AM signals—so much that 9 new FM transmitters have been projected by the BBC in the 88-95-megacycle band. The example of FM in Germany, with 94 stations, is said to apply much more realistically than that of the United States.

3. They've heard a lot about the achievements of competitive American TV; they like such American programs as they occasionally see on BBC; they enjoy American films and dote on our film personalities. Moreover, the Government is so determined upon a free-enterprise policy that it refuses to subsidize another BBC service, though BBC's 3 radio services aren't in any danger of going into private hands.

4. British industrialists and advertising folk, among the smartest in the world, know that commercial TV will be a powerful force for creating wants and moving goods. The director of one of England's biggest ad agencies told us:

"I shudder to think what this powerful advertising force is going to do to our distributive system. Some of our people don't realize it, but they're due for such a huge demand for their goods that neither the production nor distribution system at the outset will be geared for it. Our people have been starved for the good things of life so long, have known austerity so long, that demonstrations of modern products we will give them on TV are going to create vast changes in our economy."

His agency, incidentally, handles the British account of a popular American beverage which has long used TV and radio here with telling effect.

Even the newspapers aren't overtly fighting TV, in fact, seem to place more emphasis on it as a news subject, both as to progress of the industry itself and as to critiques of programs, than ours do. (Daily program listings, of course, take up only about a half-inch of agate type, and there's plenty of TV set advertising.)

And the intellectual aversionists and clergy, who testified in Parliament to their abhorrence of commercialism, seem to be looking forward tolerantly to the second service, now that the die is cast. One reason may be the high caliber of ITA and of the men chosen to run it.

The hope generally shared, though perhaps not by all within BBC, which has a payroll of some 12,000 and an inevitable quota of jealous bureaucrats, is that commercial TV in Britain will profit by the example of America while avoiding our excesses and borrowing from our best; moreover, that it will provide wider sway for the nation's own vast reservoir of entertainment talent and business ability.

It could be that TV can help cement the precious affinity with America that, thanks to common language and kindred heritage, has so long prevailed in literature, in all the arts, in government and in law.

While in Britain recently we talked with scores of people—from topkicks at BBC and ITA to industrialists, advertising folk, jour-

nalists, and man in the pub—and in the 10 days since our return we've compared notes with American confreres who also have had a look at British TV. Our conclusions are much the same:

The average Briton isn't much different from the average American and, once he tastes the sweet fruits of competition, not even the powerful BBC nor the politico-clerical opposition to commercial TV can stop it. That is, of course, unless the ITA, the sponsors and the ad men muffle the ball in the early stages of the game. Our guess is that they're much too shrewd for that.

You read occasionally of British visitors coming over to study our TV structure, and there will be a lot more of them. The big American ad agencies, with London branches, have been quietly swapping visitors and personnel and ideas ever since ITA was authorized, preparing for the advent of commercial TV.

ITA hasn't yet decided much more than that it will have its first stations in London, Birmingham, and Manchester; that there will be more than one program contractor, though whether there will be more than one on each station or more than one splitting time on the whole group is as yet undetermined; that the "magazine concept" will prevail, i. e., the contractors and not the sponsors shall own the programs and determine their order; that there will be no censorship of program content or commercials, but that there must be none of the horrendous "Yankee excesses" (not merely of distasteful advertising but of crime and horror stuff) which they've heard so much about.

Headquarters not unlike the usual temporary quarters for new Washington Government agencies has been set up at 16 Wood's Mews, in London's Mayfair district, with Sir Kenneth Clark as chairman and Sir Robert Fraser as administrative chief.

Sir Kenneth, 51, was in this country for the last few weeks, looking into TV but primarily to receive an honorary degree from Columbia University. The citation will give you some idea of the man: "Cultural counselor of the people; chairman of Great Britain's Art Council; England's custodian of priceless works in years past as keeper of the Department of Fine Arts in Oxford's Ashmolean Museum, as director of the National Gallery, and as surveyor of the King's pictures; Slade professor of fine art at Oxford; adviser to the Victoria and Albert Museum and Covent Garden Opera Trust; gifted scholar of our timeless treasures."

A long hair? Not really, say those who know him; essentially he's a fine administrator, they say, and he struck us as a knowledgeable and open-minded executive still rather puzzled by the strange new task set before him. He's expected to maintain the tone and prestige of the new agency while Sir Robert Brown Fraser, 50, a graduate of Fleet Street newspapers, recently chief of the government's information services, provides the practical know-how. Sir Robert talks like a Madison Avenue agency executive, seems as high strung as a network vice president, acts like he's rarin' to go. His philosophy of advertising, as enunciated before an agency conference in Birmingham last week:

"I can think of no subject about which there is more nonsense talked than advertising. The idea that advertising is inherently degrading has always seemed to be ludicrous. As a point of view for a great nation that lives or dies by selling goods—

or failing to sell them—it crosses the Imbecile and verges on the suicidal. [Advertising] will be an asset, worn as a bright feather in the cap of free TV, not as a soiled choker round the throat."

About his editorial concept of commercial TV, Sir Robert Fraser had this to say last month before the Institute of Practitioners of Advertising:

"Free television should now evolve on principles that will place it beside our free press, our free books, and our free arts as a normal part of the equipment of our free society. For this was, in essence, the great decision—to rest the future of TV, as far as initial physical shortages of transmitting stations permit, on the same foundations as those of a free press; to give freedom to individuals to offer TV programs to the public, as newspapers and entertainment are offered; to give freedom to the public to see the TV programs of their choice."

Backgrounds of the other members of the ITA board would seem also to assure a realistic and at the same time an adequate cultural approach: Sir Charles Colston, manager of Hoover, Ltd. (vacuum cleaners), vice chairman; Miss Margaret Popham, ex-principal of Cheltenham Ladies College; Miss Dilys Powell, movie critic of the Sunday Times; Lord Aberdare of Duffryn, president of Welsh National School of Medicine; Lt. Col. Arthur Chichester, chairman of big Moygashel textile concern; Sir Henry Hinchcliffe, director of Barclays Bank; Dr. T. J. Honeyman, director, Glasgow Art Gallery; G. B. Thorneycroft, director of the British Travel & Holidays Association; Lord Layton, publisher, News Chronicle and London Star.

ITA will run the stations and any day now should announce program contractors, but it will not have studios of its own or put on shows. Sir Kenneth Clark actually expects to run ITA with a staff of not more than 60, except for engineers who actually come under the postoffice department. His budget is £750,000 (about \$2,100,000) and he is expected to put the agency on a self-supporting and even profitable basis with that sum as the pump primer.

Commercial TV could profit the Government more than it realizes right now, for the fact is that many advertisers are itching for a crack at TV. Often cited is one experience of BBC. Though it is ever careful to avoid trade plugs, the name of a toy was inadvertently mentioned in a program; within a few days, it couldn't be had, and the toyshops were clamoring for more stock. Also, recently, BBC carried a tear-jerker about a stray pup; within 48 hours, just about every day pound in the country was emptied.

Ad men told us—and Sir Robert Fraser verified—that there were plenty of seekers after the program contracts. Someone said there were at least 25 applicants, all willing to take the risk in the face of the political dangers inherent in a system eyed askance by the Laborites and requiring that the contractor secure his own program originating equipment—all, that is, save transmitters. He must contract for studios, cameras, crews, programs, talent, etc., always unsure what a new government may decree. The applicants include theater men, newspapers, ad agencies, program builders, et al.

(EDITOR'S NOTE.—Since this article was written, ITA announced selection of the first 3 contractors: (1) Granada Theaters, operating a big chain of movie houses. (2) Broadcast Relay Services, operator of a widespread and vastly successful community antenna service, in association with Associated Newspapers, Ltd., publishing the Daily Mail and other papers. (3) Showman Maurice Winnick, in association with Kemsley Newspapers, Inc., publisher of the Sunday Times, Sunday Graphic, Sunday Chronicle and various other newspapers in England, Scotland, and Wales. They're all extremely well-heeled, but the fact that the newspaper owners are Tories has already provoked criticism that's expected to reverberate in Parliament. Two other major applicants, also strong in program fields, are Associated Broadcasting Development Co., headed by ex-BBC Chief, Norman Collins, and the newly formed Incorporated Television Program Co.,

which includes such stockholders as Alan Towers (Towers of London) and other big names in British entertainment. They await further decisions of ITA, and everybody still awaits details of plans for dividing the hours of the day or days of the week among the program contractors on its stations.)

So many eyes and ears will focus on their offerings, so outspokenly critical as a matter of habit are the British people and their influential press, so far committed is the Labor Party to doing away with commercial TV if and when it returns to power, that the burden is on industry as well as on ITA to do an acceptable job. If they do, we were told, no party in power would dare attempt to do away with commercialism. If they don't, a simple fiat of Parliament could switch the whole structure overnight to BBC.

As a writer in the News of the World of London put it: "The politicians were much more interested than the public in the why and wherefores of commercial TV during the endless debates in both Houses, and the public breathed a sigh of relief when at long last it proved possible to hand the demonaical babe over to the ITA. If the Cabinet now find the infant left on their doorstep overnight, I think we can expect a spot of bother."

Some 3,500,000 TV sets are in use in Britain today, most of them tunable only to 1 station. It's expected the total will be 4 million by end of this year, reach at least 5 million by end of 1955, then zoom to better than the current 1 million a year rate when the second service is under way. How much more, the set makers are reluctant to guess-timate. One told us, "We should have 10 million sets in use by 1960"—covering most of nation's nearly 15 million family units.

The American industry's postfreeze experience—that second stations in a community have invariably zoomed the rate of receiver sales and installations immediately—seemed to interest the British manufacturers greatly. But their native inclination is to move cautiously, to underestimate their market, not to pressure things. There are some who (familiar folk) don't like all this talk about color, mostly emanating from America and played up heavily in the British press, because it might rouse false hopes in the breasts of prospective buyers.

(The British color situation is a story in itself, about which more later. Suffice to state now that the post office department's TV advisory committee, under the chairmanship of Adm. Sir George Daniel, has been conducting closed hearings on the subject, figures a year or more of work ahead of it, can be counted on to take advantage of all of the American experience—without the pressure of politics, such as we had here, to bring color to Britain in a hurry.)

There is a problem, of course, of converting existing sets to receive 2 channels in lieu of one—but plans are afoot to do it at small cost, maybe as low as \$10 or \$15 and the fact that the second service's signals will come from the same towers as BBC's should help simplify the installation jobs. Most sets being sold today are equipped for the second channel, a hot selling point.

Some 30 receiver manufacturers share the 1 million annual output. They sell direct to retail outlets, for the most part. "Hire purchase," or installment selling, has only lately come back on a big scale, having been prohibitively restricted until recently.

Standard size is 14-inch, with trend lately to 17-inch. Only one 21-inch model was shown in the whole National Radio Show in London's Earl's Court in early September. There seems to be no push on to sell size, one manufacturer explaining that the extra cost isn't worth it for homes which mostly have small rooms.

We saw a scattering few TV shows while motor touring the country, but rarely did we find even the best-rated hotels TV equipped, although in a space of 3 weeks we were in a different one nearly every night. They seldom had TV's or radios in their lounges, and they looked at you as though you were crazy if you asked if they might be rented. Very few pubs had TV's either, though radios were commonplace in them.

Looks like the British TV industry is missing an extremely good marketing bet here.

Cost has been the major factor in set sales up to now—still is with most families, though the current high employment and prosperity wave, along with the vast publicity about TV in general and ITA and commercialism in particular, are making more and more people TV-minded. Receiver list prices have been brought down to an average of about \$150 for a 14-inch, \$200 for 17-inch, table models predominating. How can they priced that low in the face of a government exercise of 50 percent? The answer is much simpler for the British than for us, albeit we offer good 21-inch sets at \$200 and under. The girls on the assembly lines earn £5 a week (\$14) and the men at the parts-stamping machines very little more.

Workmanship is the finest. The 14-inch set we rented for our London hotel room gave us a picture (on British 405-line standard) that for clarity and contrast and all-around quality is vastly better than what we generally see in the United States (on 525 lines). Signals came from a multiplex antenna atop one of the tallest hotel structures (10 or 12 stories) in Mayfair. Receiver was a Koister-Brandes; remember the brand names from our old radio days here?

The explanation for the good picture seems to lie also in superb transmission facilities and plenty of power. Great Britain has magnificent engineers, second to none, and some of the best are in the BBC.

The programs you see are something again. By our lights, there's not on enough choice but a lack of pace and regard for timing that seems queer to American observer. The British people press are quite outspoken in criticism, sometimes unfairly so—for the fact is that quality and craftsmanship stand out in everything the BBC-TV people do; their dramatics are finished products, their news films excellent, their "outside" (remote) pickups extremely well done, especially sports.

But the day's program more often than not seems unbalanced, aiming at the few rather than the many. Consider these program listings for two different days, presumably typical, exactly as clipped from the London Times:

"3 p.m., Knights for a Day, British comedy film. 5, children's television. 7:25, weather. 7:30, news. 7:45, public inquiry: The trade unions—too much power, too little responsibility. 8:30, Music for You. 9:30, amateur boxing: London ABA versus Paris. 10:30, news (sound only).

"3 p.m., About the Home. 4, Watch With Mother. 5, children's television. 7:30, news. 7:55, Sportsview. 8:15, Down You Go. 8:45, Shakespeare's Troilus and Cressida. 11:5, news (sound only)."

The home and children's shows weren't particularly exciting, the latter going in for American cowboy films as part of a potpourri intended to interest different juvenile levels. The Shakespearean production, running well over 2 hours, was a repeat of the identical show also carried in prime night time the preceding week. The news films and sports pickups were excellent. The news via sound only at 10:30 (or thereabouts, depending on whether the preceding program ended at that time or a little earlier or later) seemed peculiar, to say the least.

Twice we viewed classical soloists, one a pianist, one an operatic singer—and in each case the camera was focused on the artist without shift for the entire 30 minutes. It was very dull viewing despite the excellence of the talent. One Sunday night we watched the British version of What's My Line?—very popular and as much fun as the CBS-TV show; 2 of its 4 panelists were American, and it offered no prize money.

NOTE.—The 5-6 p. m. Children's Hour is followed by a long gap until the weather at 7:25 and news at 7:30. We asked a top BBC official why. His reply: "So that the mothers may prepare dinner and put the children to bed without any distraction from TV. The children have had it, and if they know the screen is dark they make no fuss about staying up for more."

CBS's "brightest star" is TV, writes Malcolm D. Brown, analyst of R. W. Pressprich & Co., in article in Feb. 14 *Barron's*, which estimates that more than half its revenues now comes from TV, including package programs. Radio accounts only for about one-sixth, it's stated, the balance coming primarily from phonographs, recordings, radio sets & tubes. *Barron's* carries this handy table of CBS financial data for the years 1935-54:

	Net Sales (000,000)	Net Opr. Income (000,000)	Profit Margin	Class A & Class B Earn.	Per Share	
					(a) Div.	(b) Price R'ge
1954	\$280,00E	\$23,70E	8.5% ^E	\$4.85	(a) \$1.90	88½-415½
1953	236.97	21.48	9.1	3.80	1.85	50½-381½
1952	194.11	14.90	7.7	2.75	1.60	40¼-33
1951	129.69	13.42	10.4	2.72	1.60	35¾-25¾
1950	87.97	9.52	10.8	2.39	1.60	40¼-25½
1949	74.98	7.72	10.3	2.44	1.40	29¼-17½
1948	70.07	7.46	10.6	2.94	2.00	32½-20¼
1947	74.26	9.09	12.2	3.45	2.10	32½-21¼
1946	67.12	8.95	13.2	3.37	2.30	47-28
1945	59.41	10.52	17.7	3.11	1.80	50½-31
1940	36.04	7.42	20.6	2.92	2.00	26¾-16
1935	15.40	3.14	20.4	1.65	0.65	—

E (estimated). (a) 2% stock dividend Dec. 20. (b) Price range of Class A stock. Class A and Class B are identical except as to voting power. Each class elects half of the directors. Class A stock may be voted cumulatively.

* * * *

Avco Mfg. Corp., without breaking down data for Crosley Bestg. Co. or Crosley & Bendix home appliance divs., reports earnings of \$3,639,436 (37¢ a share) on sales of \$375,405,820 in fiscal year ended Nov. 30, compared to \$3,427,185 (34¢) on \$428,326,201 in preceding fiscal year. Backlog of defense orders totaled \$200,000,000 Nov. 30.

Gabriel Co. reports 1954 net loss of \$87,391 (including credit of \$27,400 and special charges amounting to \$63,000) on sales of \$18,310,269, compared to 1953 profit of \$14,642 on sales of \$21,976,182.

Sparks-Withington Co. reports for 6 months ended Dec. 31, 1954, net income of \$10,364 (\$2.85 a pd. share) on sales of \$14,140,508, compared to \$18,931 (\$5.20) on \$14,744,515 for same 1953 period.

Carel van Heukelom, of N. Y. office, named v.p. of Television-Electronics Fund.

Mass production of transistors came closer this week with announcement of 2 new developments: GE reported its mechanized production facilities and controlled manufacturing processes were in full operation at Syracuse, simultaneously announced 22-45% price cut on its entire transistor line—bringing new prices of cheapest transistors to less than \$2, most expensive to about \$4 each in quantity lots. Meanwhile, Bell Labs, inventor of transistor, announced development of new transistor production machine, called "Mr. Meticulous," which automatically makes 15 electrical and mechanical tests and production steps in 46 seconds without making a mistake. Humans take at least 5 minutes to do same job. Invented by Dr. R. L. Wallace and Dr. R. P. Riesz, machine is still in lab stage.

Hoffman Electronics Corp., continuing its expansion into non-TV fields, this week announced purchase of Analyzer Corp., Los Angeles manufacturer of analog computers, for undisclosed amount. Purchase agreement includes exclusive license to manufacture and sell Nordsieck integrator developed by U of Illinois' Dr. Arnold Nordsieck, said to make possible the first medium priced machine to be developed and sold commercially. Hoffman has set up computer engineering & production dept., with first production model due within 6 months. Albert S. Cahn, ex-pres. of Analyzer Corp., has been retained as consultant.

RCA scholarship grants of \$800 each have been awarded 26 university students from 21 states, all undergraduates majoring in science & engineering, reports Dr. C. P. Joliffe, RCA v.p. & technical director.

Douglas C. Lynch, exec. v.p., named pres. of Cleveland Corp.'s Brush Electronics Co., Cleveland. He was formerly with Crosley, Willys-Overland & Westinghouse.

Electronics Reports: Effects of atomic bomb blast on various types of electronic equipment will be studied in test at Nevada Proving Grounds tentatively set for mid-April. Some 29 manufacturers of electronic equipment and parts, along with RETMA, will participate. Purpose is to indicate types of post-disaster repair problems facing communications personnel and materiel. Information obtained from test will be made available to industry through RETMA, and to civil defense organizations. Among equipment to be exposed are one complete AM broadcast station, a variety of mobile equipment and associated base stations, radio receivers & special radio equipment, antennas & towers. A typical suburban telephone switchboard is also being installed in area for exposure.

Coordinating industry participation is a RETMA ad hoc committee headed by GE's R. H. Williamson. These manufacturers will participate: Admiral, American Phenolic, Andrew Corp., Antenna Specialists Co., Belden Mfg. Co., Bendix Aviation, Cook Electric Co., Corning Glass, Dale Products Inc., DuKane Corp., Erie Resistor, GE, Hallicrafters, Hughes Aircraft, Hydro-Aire Inc., IDEA Inc., JFD Mfg. Co., Jefferson Electric, Lenz Electric, P. R. Mallory, Motorola, North Electric Mfg. Co., Permoflux Corp., RCA, Remler Co. Ltd., Shure Bros., Simpson Electric, Speer Carbon, Stainless Inc.

* * * *

"The arts, the humanities, and politics" must be studied by scientists and engineers so that they "may discharge with competence their growing responsibilities," stated Dr. Elmer W. Engstrom, RCA exec. v.p. for research & engineering in speech before American Society of Mechanical Engineers in New York this week. "Given the proper exercise of these responsibilities," he said, "there is no apparent limit to the technological progress and consequent prosperity and well-being that lie ahead for all of us." He predicted that major advances in communications would come in 4 areas: solid-state devices, personal communications, efficiency of channel utilization, data handling machines for industry. In personal communications, he ventured that within early portion of next 75 years there would be instantaneous contact between individuals anywhere in the country—"perhaps in the world." He envisioned devices transferring spoken word directly to written form, and machines that could "analyze marketing and sales data, schedule production, order materials, control manufacturing processes, and schedule delivery of finished products."

Sprague Electric Co. wins third straight annual certificate of award for excellence in management by American Institute of Management, N. Y., which surveys thousands of U. S. & Canadian companies each year. Survey covers corporate structure, fairness to stockholders, health of earnings, research & development, directorate analysis, fiscal policies, efficiencies in production.

Morris D. Hooven, Montclair, N. J., engineer with Public Service Electric & Gas Co., Newark, nominated as pres. of American Institute of Electrical Engineers, tantamount to election. He would succeed Alexander C. Monteith, Westinghouse v.p. Julian D. Tebo, Bell Labs, named a director; Walter J. Barrett, Bell Telephone Co., renominated as treas.

Peter L. Stone, ex-Ludlow Mfg. Co., Boston, elected pres. of Allen D. Cardwell Electronics Corp., Plainville, Conn., replacing Ralph H. Soby, resigned; Richard O. Kennedy Jr. named v.p. Cardwell is subsidiary of Chesapeake Industries Inc., Cleveland.

Fourth general membership meeting of manufacturers of commercial & military electronic equipment in RETMA's Electronics Industry Committee will be held in New York March 20, preceding annual IRE convention.

SUBSCRIPTION TV promoters gained a degree of support from educators this week. Joint Committee on Educational TV issued cautiously worded statement, saying in part:

"Should one or more systems of subscription TV be authorized . . . the JCET will be deeply interested in exploring their educational possibilities. Proponents of subscription TV believe that it presents a method whereby TV may be made a more flexible and varied medium of communication, and whereby the viewers' range of choice may be greatly increased. These features are in harmony with educational methods and objectives, and accordingly the JCET will urged that the FCC take them into account in its consideration of subscription TV."

Meanwhile, theatre exhibitors are becoming more and more alarmed, now that FCC has begun official rule-making (Vol. 11:7). Theatre Owners of America board met in Washington this week, considered means of countering moves of toll TV principals. One technique under study is a film exposing "inherent fallacies" of fee TV, to be shown by theatres throughout country.

Though most movie producers are silent on subject, fearing to disturb exhibitors, Paramount Pictures has particularly ticklish job of soothing exhibitors while pushing subscription TV through subsidiary International Telemeter. Strategy of latter is to convince exhibitors they can find a place in the toll TV picture. Paul MacNamara, Telemeter v.p., is telling exhibitors they should aim to acquire local franchises to handle subscription TV.

Shorter campaigns and conventions in 2 different cities—Chicago & San Francisco—spell less revenue and higher costs for networks during 1956 political campaigns. Despite pleas of TV networks that holding nominating conventions in different cities would add about \$1,000,000 to their costs, Republican National Committee this week picked San Francisco's famed Cow Palace for big event starting Aug. 20. Democrats had previously selected Chicago's International Amphitheatre, starting July 23 or Aug. 13. GOP chairman Leonard Hall said he carefully considered requests of networks but other considerations outweighed theirs. In confining business sessions to 2-7 p.m., however, Hall said he was seeking maximum TV coverage in East, where sessions will be seen 5-10 p.m. Networks said it was too early to tell what effect the GOP decision will have on their coverage. It's certain, however, that if Democrats pick Aug. 13 starting date, networks will have to divide much of their equipment between the 2 cities. It's certain, too, that shorter campaign means less expenditures by the politicians for national time.

Sale of CP for KNAC-TV, Ft. Smith, Ark. (Ch. 5), to broadcaster-publisher Donald W. Reynolds (Vol. 10:52) was held up by FCC which informed sellers H. S. Nakdimen, et al, that hearing is indicated. Sale was protested by radio KFPW, Ft. Smith, which levied charges of trafficking in CP, concentration of media ownership by Reynolds, delay in construction. KFPW, which indicated it would apply for the channel if it's made available, has interlocking ownership (John T. Griffin, et al) with KATV, Pine Bluff and KWTW, Oklahoma City.

Among the 3 applications filed this week was another proposed satellite—for Ch. 12, Bismarck, N. D., filed by John Boler, owner of KXJB-TV, Valley City and KCJB-TV, Minot. Other 2 applications: Ch. 4, Reno, Nev., by Robert C. Fish, who has extensive real estate holdings and owns refrigeration business; Ch. 13, Twin Falls, Ida., by KIDO-TV, Boise (60%) & radio KTFI, Twin Falls (40%).

Irene Corbally Kuhn's highly laudatory article on TV's *Pat & Bob* (NBC pres. Pat Weaver & exec. v.p. Bob Sarnoff) in *American Mercury* released as reprint by the network.

Comparison of British, Canadian and American broadcasting systems was given by FCC Comr. John C. Doerfer in speech before San Francisco's Commonwealth Club Feb. 18, and he listed among "the fruits of our free enterprise system:" (1) One TV set in U. S. for each 5 people, one for 10 in Canada, one for 12 in Britain. (2) One radio for 1½ persons in U. S., one for 3½ in Britain. (3) BBC's 1953 net income of \$36,000,000 vs. U. S. broadcasters' \$908,000,000. In addition, he cited Britain's single TV service and 3 radio services vs. our 3200 radio stations and 426 TV stations. Doerfer stated that "substantial progress" in self-regulation is being made in U. S. through NARTB & AAAA codes and that TV-radio have undoubtedly contributed to marked rise in American interest in classical music and books. "There are some people who," he said, "although opposed to govt. operation of a broadcasting system, languish for stricter controls or more censorship. But allow me to remind you that we can just as easily and irretrievably lose some of our cherished freedoms through inadvertence as we can through intentional abandonment. In my opinion, we can gain nothing by compromising these fundamental principles."

Fund for the Republic Inc., headed by Robert M. Hutchins and endowed with \$15,000,000 fund from Ford Foundation, has commissioned three 15-min. pilot films featuring cartoonist Al Capp and is currently distributing to colleges and universities the one-hour film version of Edward R. Murrow's recent *See It Now* interview with Dr. Robert Oppenheimer, the physicist. Fund's TV plans are still undetermined; consultant is ex-W. Va. broadcaster Howard Chernoff. This week, Fund for the Republic announced TV writing contest with total awards of \$29,000, top 2 of \$5000 each for best one-hour drama and best half-hour documentary dealing with civil liberties. Judges are Julian Bryan & Alex Segal, producers; Elmer Davis & Eric Sevareid, commentators; Jacob Javits, N. Y. Attorney General; Prof. Allan Nevins, Columbia U; Charles P. Taft.

FCC's investigation of sabotage at KPIX, San Francisco (Vol. 10:51-52) has resulted in suspension of licenses of 3 operators on duty at transmitter when equipment was damaged: Roald W. Didriksen, Carlton R. Schwarz, Anthony Severdia. Commission will issue decision later regarding operators at studio. FCC also suspended licenses of 2 operators who were on duty at radio KEAR, San Mateo, Cal., when it went off air Oct. 5. They are Howard A. Chamberlin & Fred P. Muller. All 5 operators have 15 days in which to request hearing.

St. Louis' sole uhf survivor out of 3 starters, WTVI (Ch. 54), in applying to FCC for old KSTM-TV Ch. 36 assignment, reports net loss of \$163,000 for calendar year 1954. It listed total assets of \$661,701, of which \$545,732 are fixed; liabilities embrace deficit of \$521,943 at end of year, largest fixed item being about \$165,000 owed to GE-Graybar. Conditional on FCC approval of channel switch, WTVI has purchased transmitter & antenna, leased tower of old KSTM-TV.

TV's help to mentally ill has been proved to satisfaction of Dr. Rupert A. Chittick, supt. of Vermont State Hospital, Waterbury, Vt. GE reports hospital bought 12 sets, with funds supplied by voluntary contributors, after patients showed marked interest and pleasure watching last World Series on receiver supplied by an attendant. Dr. Chittick plans to equip each of hospital's 36 wards with a TV set.

Eight regional instead of usual 17 district NARTB meetings are proposed for this year as means of reducing burden on broadcasters—and NARTB has named Campbell Arnoux, WTAR-TV, Norfolk, and E. K. Hartenbower, KCMO-TV, Kansas City, as co-chairmen of planning committee.

SUMMARY-INDEX OF THE WEEK'S NEWS—February 26, 1955

SILENCE ON SUBSCRIPTION TV among networks and stations is temporary, but most are opposed or skeptical, as comments with FCC will show (p. 1).

McCONNAUGHEY DUE FOR CONGRESS OK, backs "selective de-intermixture" rule-making, amid strong signs Congress has taken policy reins from FCC (pp. 2 & 9).

FCC MULTIPLE OWNERSHIP CEILING scuttled by U. S. Court of Appeals in Storer case, ruling unanimously that numerical limits are illegal (p. 3).

UHF's IN BUFFALO & FAIRMONT GIVE UP—bringing "casualties" to 39 to date—as GE sparks plan to help "underprivileged" stations (p. 4).

WRVA FAVORED OVER WRNL for Richmond Ch. 12, as examiner cites past programming record; Broadcast Bureau asks reversal of Miami initial decision (p. 5).

LAMB CASE BUILDS TO CLIMAX as attorney files for end of hearings, McConnaughey pledges probe of procedure, Justice Dept. probes 2 FCC witnesses (p. 6).

GOVT. KEEPS ALOOF FROM DISCOUNT FIGHT, Federal Trade Commission ruling it lacks authority to help enforcement of state fair trade prices (p. 11).

6 NEW STARTERS DUE IN MARCH, 10 having gone on air thus far this year; Baton Rouge, Shreveport, Bluefield, W. Va. outlets plan spring-summer start (p. 10).

RCA RECORD 1954 VOLUME, \$940,000,000, included 24% govt. business and most TV set sales in its history; NBC up substantially, especially TV (p. 13).

CBS DESIGNATES PITTSBURGH MANAGER, anticipating approval of Steubenville shift; begins operation of its first owned uhf WXIX in Milwaukee (p. 6).

SATELLITE RULE-MAKING draws many comments, though deadline is moved to April 1; most respondents favor low power but fear big-city encroachment (p. 10).

SENATE TV INVESTIGATORS looking for special counsel; other TV-radio inquiries mark time pending organization, appropriations, etc. (p. 14).

TELECASTERS QUIET ON FEE TV—FOR NOW: The silent people in the subscription TV picture are operators of networks & stations -- but their silence by no means signifies indifference. Far from it, as their official comments will indicate, when filed by the May 9 deadline set by the FCC (Vol. 11:7).

Though telecasters have had little to say on subject in last few months, it may be assumed, with considerable confidence, that bulk of them are not only firmly opposed to social implications of pay-as-you-look but also harbor grave doubts as to its economic practicability. The most outspoken skepticism voiced by an industry leader was that expressed some 2 years ago by RCA-NBC chairman David Sarnoff, in keynote address at 1953 NARTB convention in Los Angeles. He said, in part:

"I sincerely believe that 'pay-as-you-see' TV on a national basis, or anything comparable to free TV as we know it today, will prove to be a snare and a delusion. I have no faith personally in the practicability of the establishment of that kind of service on a national basis.

"From a technical standpoint, however, I do not question the practicability of scrambling waves at the transmitter and unscrambling them at the receiver...That is no great trick...In our laboratories, we have been experimenting for some years with the different methods [and] we have developed a number of such systems without having made up our minds as to which is the best technically.

"My doubts [are] based on other aspects -- social, political, economic and artistic...First of all, it would be negation of the philosophy on which American radio broadcasting has been established -- freedom to listen, and in TV, freedom to look. It has become a part of the American heritage, and I do not think it likely to be disturbed. Furthermore, I have been unable to conceive how, in a national service of 'pay-as-you-see' TV, the competitive element so important to private enterprise can be preserved and at the same time avoid government regulation of rates and government control of operations."

CBS has never taken a public stand on the matter, to best of our knowledge.

Only statement on it, as well as we can remember, was pres. Frank Stanton's remark some years ago that subject should be explored -- that he was neither pro nor con at that time. AB-PT chairman Leonard H. Goldenson and ABC pres. Robert Kintner are on record, in testimony during ABC-United Paramount merger hearing before FCC, that they feel subscription TV is economically impractical.

Strongest stand taken by an individual telecaster is that of Henry Slavick, mgr. of WMCT, Memphis, who was a member of an NARTB committee on subscription TV. He blasted pay-TV proponents in article in May 1954 issue of Television Age Magazine, hasn't changed his mind since. He insists that subscription TV promoters "aren't honest with the public, advertisers or stations"; that they'd "run program costs up to 10 times what they are today"; that public bought its sets in expectation of not paying for programs; that allocation of most desirable channels is predicated on a free system; that there's serious danger of monopoly, etc.

A few desperate uhf operators and hopeful uhf CP-holders once petitioned FCC to commercialize fee TV. Presumably, some will come forth again, embracing any new technique which may promise revenues.

* * * *

Bitterness of telecasters toward one fee TV proponent, Zenith pres. E.F. McDonald, has diminished somewhat -- largely because he has abandoned his argument that advertising can never support TV. He now says free TV and fee TV can live in happy "peaceful coexistence." This change in attitude and improvement in relations may be attributed in no small part to fact that new Zenith counsel in Washington, Pierson & Ball, have many blue-chip telecasters as clients, know the temper of the industry well, and are themselves confirmed believers in the advertising concept.

Similar advice presumably came from ex-FCC chairman Wayne Coy, engaged by Zenith as consultant on pay TV after he left Commission; Coy now owns 50% (Time Inc. 50%) of KOB-TV & KOB, Albuquerque, N.M. Zenith's wide-ranging public speaker for Phonevision idea, Dr. Millard Faught, also now takes friendlier line toward commercial telecasting, and Zenith (now ranking among top 5 in TV set sales) has become one of 4 co-sponsors of "Omnibus" on CBS-TV, its first network use of the medium.

Opinions of telecasters will carry greatest weight of all, when it comes to final showdown at FCC. Commission knows them well, having dealt with them officially and personally all these years. Furthermore, telecasters are much more likely to be neutral than are fee-TV proponents, who have everything to gain and nothing to lose, or movie exhibitors, who feel they have everything to lose, nothing to gain.

Struggle will be ignored by no one, meanwhile, as more and more media of general circulation become intrigued. This week, for example, Newsweek Magazine made it subject of cover-headlined feature which leans somewhat toward fee TV and Zenith. By and large, articles in popular press seem to favor pay-as-you-look concept.

CONGRESS CALLING TUNE ON FCC POLICY: Hearing on confirmation of George McConnaughey as FCC chairman this week was latest in chain of events indicating that far more FCC policy is going to be decided on Capitol Hill this year than ever before.

Initiative in controversial policy matters -- particularly TV -- appears to have passed from Commission to the investigating Senate Commerce Committee. Pertinent case in point is McConnaughey's statement to Committee that he favours rule-making on de-intermixture of vhf & uhf channels in selected markets -- a sharp reversal of his own previous votes and those of Commission majority.

It's good bet that Commission majority, too, will go along on de-intermixture rule-making, on market-by-market basis -- as result of Capitol Hill pressures, not the least of which is Sen. Magnuson's request for an FCC report (due next week) on questions raised by the Plotkin Memorandum (Vol. 11:6-8).

These factors have set the stage for stronger-than-ever Congressional supervision of FCC: (1) A Democratic-controlled Congress desiring to keep sharp eye on a Republican administrative board. (2) Heavy pressure on Senators and Congressmen with regard to the uhf situation -- aggravated by 39 mortalities to date (see p. 4) -- and the fact that full-dress TV investigation is under way. (3) President Eisenhower's indecision last year about naming new Commission chairman, which stymied FCC on pol-

icy matters. McConnaughey's 4½-month tenure as chairman without Senate confirmation served to extend FCC's period of sterility on some critical decisions.

Having managed to avoid controversy during his 4½ months on the hook, Comr. McConnaughey gave definite impression at this week's hearing that he is looking to Congress for guidance. Outside of that, he gave no clear-cut indication of what kind of leadership he will provide, what course FCC will pursue under him.

His approval by committee -- probably next week -- and confirmation by Senate seem virtually certain. Though questioning by Democrats at all-day session Feb. 23 was sometimes sharp and his answers didn't always seem to satisfy them, they showed no inclination to fight against confirmation as they did during last fall's special session when Sen. Bricker (R-O.), then Committee chairman, forced early hearings for his "life-long friend" (Vol. 10:46-47).

* * * *

Brief summary of McConnaughey's views on important subjects, as expressed to the committee: Uhf problem -- endorsed rule-making on selective de-intermixture and Congressional removal of excise tax on all-channel receivers, hailed 1000-kw uhf stations as encouraging factor. Newspaper ownership -- felt newspaper ties shouldn't be held against a TV applicant unless there is undue concentration of media control. Educational TV -- urged "patience," opposed an investigation or any action aimed at opening reserved channels to commercial interests.

He plumped for reforms in FCC procedures, including modification of "protest" section of Communications Act, elimination of regulation which "insulates" commissioners in their dealings with certain staff members, development of uniform rules covering hearing procedures. He predicted FCC would turn out more final decisions on TV applications by July 1 than it did all last year, eliminate backlog in year.

Lamb case provoked hottest questioning, by Sens. Magnuson, Monroney (D-Okla.) and Kefauver (D-Tenn.), latter not on Committee but attending session to ask questions. McConnaughey said it would be improper to discuss issues in pending case, but in response to questions said he would make study of methods of obtaining witnesses, charges of coercion etc. after case is concluded.

For summary of McConnaughey hearing, see p. 9; for account of Senators' and McConnaughey's views on Lamb case procedures, see p. 6.

COURT NULLIFIES FCC OWNERSHIP LIMITS: The ceiling is off multiple ownership -- unless Supreme Court or Congress rules otherwise. In an unequivocal and unanimous decision this week, U.S. Court of Appeals for District of Columbia ruled in favor of Storer Bestg. Co., telling FCC that it has no authority to specify the number of TV, AM or FM stations any single entity can own. Rather, court said, each application must be considered on its own merits. Decision was rendered by Judges Wilbur K. Miller, E. Barrett Prettyman and David L. Bazelon.

Commission hasn't said whether it will appeal to Supreme Court, but it's free to do so -- and it could conceivably win reversal of lower court. It's conceivable, too, that Congress will decide to fix numerical limits -- which it has power to do. For the present, however, this week's decision completely wipes out FCC's limits of 7 TV, 7 AM and 7 FM stations (or fractions thereof) under common ownership. The sky is now the limit -- theoretically.

As a practical matter, however, it's expected that multiple owners will move very cautiously at first. With current investigations of TV-radio "monopoly" going on in Congress, any bold move to acquire additional prosperous vhf stations, on the part of those who have 5, is likely to precipitate Congressional moves to fix numerical limits by law. As it is, there will undoubtedly be demands that Congress put a ceiling on multiple ownership. There's a suggestion in Plotkin Memorandum, for example, that 3 TV stations might be reasonable limit (Vol. 11:6).

Court still leaves discretion on ownership entirely up to FCC. What court does say, however, is that Commission can't summarily dismiss an application simply because it's filed by a licensee already owning a certain number of stations. Such applications must be given a hearing, court stated. Here's court's view:

"It is conceivable that in some circumstances, common ownership of even 5 TV

stations, though permitted by the challenged rule, might be undue concentration of control; while in other circumstances, common ownership of a greater number might be compatible with the public interest. But whether so or not must be determined on an ad hoc basis, after consideration of all factors relevant in the determination of whether the grant of a license would be within the comprehensive concept of which the Act calls 'the public interest, convenience, or necessity.'

What it comes down to, then, is philosophy of majority of FCC at any particular time. Present Commission is something of a paradox. On the one hand, it has demonstrated time and again that it has no prejudice to "bigness" as such. On the other hand, it surprised everyone not too long ago by ruling that a 1% interest in a station should be counted as full ownership -- something that not even a New Deal Commission did. It's expected that the first to take advantage of this week's decision will be organizations like Westinghouse, which has been hampered in acquiring 5 TV stations because of one director's 2.8% interest in KTRK-TV, Houston.

If precedent means anything, it should be recalled that FCC had no numerical ceiling on AM ownership until just last year -- yet only one entity, CBS, ever got more than 7 AMs, and then only a minority interest in an 8th. Its efforts to go further were turned down by the Commission. Very few others ever sought to acquire even the full unofficial limit of 7.

Storer is only organization owning full TV complement permitted under the now-nullified rules permitting 5 vhf & 2 uhf. (For list of all groups owning more than one TV station, see Multiple Ownerships, TV Factbook No. 20, p. 61.)

The appeal had been brought by Storer after Commission dismissed its application for Miami's Ch. 10 on Nov. 25, 1953, on grounds Storer already had 5 stations. Storer challenged multiple ownership rules, didn't appeal dismissal of application. Since that time, a 4-applicant hearing has been conducted for Ch. 10, now awaits the examiner's initial decision. In its decision this week, court said that even though Storer didn't appeal denial of the application, Commission will "probably" grant Storer a hearing on the application on its own motion. However, it's doubted that Storer's application could be thrown into the now-concluded Ch. 10 hearing.

Storer pres. George B. Storer, pleased with decision, said: "Our position was that every applicant for a TV station has a right to be heard and should be judged on the merits of his ability and willingness to serve rather than on the basis of how many stations he may operate."

Interesting sidelight of case is that Storer, before he took the appeal, had opinions from 2 law firms that effort would be fruitless. Handling case for Storer were Albert R. Connelly and George B. Turner, of Cravath, Swain & Moore; Thomas H. Wall, Fred W. Albertson and Clair L. Stout, of Dow, Lohnes & Albertson; and John McCoy, counsel for Storer Bestg. Co.

Predictions now are just as diverse as before appeal was made. Competent lawyers insist FCC will appeal and Supreme Court will reverse lower court. Equally experienced attorneys vow that FCC won't appeal, or if it does, Supreme Court won't accept the case -- letting this week's decision stand.

2 MORE UHF GIVE UP, HELP PLAN PROBED: Hard hit by intermixture, unable to operate profitably without adequate network service, WBUF-TV, Buffalo (Ch. 17) and WJPB-TV, Fairmont, W. Va. (Ch. 35) have given up and signed off -- leaving only 112 uhf on the air (as against 313 vhf) and bringing roster of those which have quit to 39 to date (for complete list, see TV Factbook No. 20, p. 18, plus story in Vol. 11:6).

The Buffalo station has been operating since Aug. 1953, quit Feb. 23 after suffering losses of \$451,000 -- the losses running up to \$30,000 per month lately. Gen. mgr. Sherwin Grossman is still hopeful of getting Ch. 8 into city (Vol. 10:45) but has disbanded staff. Station is city's second uhf to go dark, WBES-TV (Ch. 59) having left air in Dec. 1953 after only 3½ months of operation.

WJPB-TV pres. Donn D. Baer, purchaser of 75% ownership last Nov. from J. Patrick Beacom, who claimed he founded station on record low capital outlay of \$118,000 (Vol. 10:12), told FCC: "A combination of factors has made it possible for vhf stations in Pittsburgh, Wheeling and Steubenville to beam serviceable signals into our

coverage area...We desire to hold our CP until such time as the Commission will take action on reallocation of a vhf channel to Fairmont or offer some sort of concession to uhf stations..." WJPB-TV was to sign off Feb. 28.

The demise of so many uhf outlets, some of whose owners have carried their troubles to Senators and Congressmen, especially in instances where they lost network affiliations to newcomer vhf stations or audience to vhf power increases, has already intensified interest in their behalf on Capitol Hill. There, FCC chairman George McConnaughey told Senate committee this week he favors rule-making on de-intermixture in selected markets (see pp. 2 & 9).

Disposition to "help uhf" -- especially inasmuch as its technical proficiency is conceded and particularly in view of its high power potential, illustrated by the recent 1-megawatt installations in Wilkes-Barre -- is manifest within the industry, too. There was report this week that GE is considering some kind of "bold measure" on behalf not only of uhf but of other "underprivileged" TV operations.

Inquiry at GE developed that project has nothing to do with easing equipment payments, encouraging more stations to hike powers, or the like; rather, it's considering a plan, as yet nebulous, to pool the buying & selling powers of such stations so as to effect economies for them, their suppliers and their advertisers. Something along lines of a "farmers' cooperative" is contemplated, it was revealed.

Said William J. Morlock, gen. mgr. of GE commercial equipment dept.: "Our analysis of many stations seems to indicate that a revision of management principles, availability of program material and better selling capabilities would do more to assist them than anything else." But he would divulge no more, except to say that an independent private corporation is being considered, operated by "responsible people not connected with GE."

SUPERIOR RECORD in radio was prime reason for examiner H. Gifford Irion's choice this week of Richmond TV Corp. (WRVA and Thalimer theatres) over Richmond Newspapers (WRNL) for Ch. 12. On the "diversification" theme, Irion said there was "approximate parity" between the broadcasting-theatre group and the broadcasting-newspaper interests.

Toting up past programming score, Irion stated: "While WRNL has shown evidence of a number of creditable programs, this quality of initiative has been by no means as pronounced as at WRVA. The conclusion must be made, therefore, that the past programming at WRVA betokens more promise for meritorious programming in the future than does that of its rival."

In Miami's Ch. 7 case, however, FCC's Broadcast Bureau believes diversification absolutely controlling. In sharply worded exception to examiner James Cunningham's initial decision, Bureau urged flat reversal of grant proposed by Cunningham to combination of Cox-Knight newspaper-radio interests headed by ex-NBC pres. Niles Trammell. Bureau stated that Cox-Knight radio history is not so outstanding as to outweigh fact that its 3 opponents have no media interests at all, and it concluded that Cunningham "failed to give proper weight to the overwhelming evidence in this record tending to show that an award to [Cox-Knight-Trammell] will seriously restrict the principle of diversification of the control of mass media in the Miami area and, further, that such an award would have a tendency generally to lessen competition in the broadcast field."

WKNB-TV, New Britain, Conn. (Ch. 30) and purchaser NBC (Vol. 11:2) struck back at WNHC-TV, New Haven, this week, charging that latter's protest of sale was made in "bad faith" and that its objective "is to perpetuate its present vhf monopoly; frustrate development of competition; and delay the expansion and development of uhf in the Connecticut Valley region." Joining their defense, grantee WELI-TV, New Haven (Ch. 59) told Commission it would be encouraged to build if NBC takes

over WKNB-TV and promotes uhf conversions in the area. It also reported, incidentally, that it believes it can build a uhf transmitter out of 2 FM transmitters on hand.

Running fight between WTRI and WROW-TV, Albany, continued in oral argument this week. WTRI counsel Paul Porter told commissioners that sale of WROW-TV to Lowell Thomas group was a "dark of the moon, back of the barn arrangement" and that hearing is mandatory. WROW-TV counsel countered that CBS doesn't control Thomas; that CBS is not Thomas' major source of revenue; that "I do not think that you want to put people who have been performers in the class with aliens." He had no objections to a hearing, and Commission said it would order one.

There was one unusual action this week, in which Commission reopened record and sent back to hearing the initial decision which favored WVMI over WLOX, for Ch. 13 in Biloxi, Miss. (Vol. 10:28). FCC decided that examiner Harold L. Schilz, who has since left Commission, erred in excluding pertinent testimony. It ordered further hearing and a new initial decision.

Another action, quite infrequent nowadays, was that of setting a new comparative hearing--contest for Ch. 3, Mayaguez, P. R., to start April 25 among owners of WKAQ-TV and WAPA-TV, San Juan, and WJMR-TV, New Orleans.

Two allocations changes were sought: (1) KHOL-TV, Kearney, Neb. (Ch. 13), asked assignment of Ch. 6 to Hayes Center, Kan. so that it can apply for satellite there. (2) KBID-TV, Fresno, Cal. (Ch. 53), now off air, sought lower channel, either Ch. 18 or Ch. 30. It asked that Fresno's educational Ch. 18 be declared commercial or that Ch. 53 and Ch. 30 be swapped between Fresno and Madera.

Power increases: WDEL-TV, Wilmington, Del. (Ch. 12) Feb. 20 to 316-kw; WKOW-TV, Madison, Wis. (Ch. 27) Feb. 18 to 162-kw.

NBC-TV affiliates will hold 1955 "convention" in New York's Waldorf-Astoria, April 21-22.

STORMY CASE of Edward O. Lamb built up to climax this week, with these developments, both inside and outside the hearing room:

(1) Lamb attorney Russell M. Brown demanded that FCC end its hearing and grant the Ohio broadcaster renewal of his WICU, Erie. Examiner Herbert Sharfman recessed hearings indefinitely and gave Brown until March 1 to file petition to end 44-day proceedings.

(2) FCC Chairman McConnaughey, answering battery of questions on Lamb case at Senate hearing this week (see p. 2), said he does not believe former FCC attorney Walter R. Powell "coerced" witnesses into testifying against Lamb, but he intends to "make a study" of procedures used in the case after decision is rendered. Three Democratic Senators criticized FCC handling of case.

(3) Attorney General Brownell announced Federal grand jury will begin investigation of turnabout witness Mrs. Marie Natvig Feb. 28, and Justice Dept. asked FCC for transcript of testimony of another flip-flop witness, Lowell Watson.

(4) President Eisenhower has discussed testimony in Lamb case with members of his staff, he told Feb. 23 news conference, but he added he would have to take a much closer look before making any comment.

Examiner Sharfman indicated at this week's hearing that he would disregard the conflicting testimony given by Watson during his 2 appearances on the stand. He previously said he will give no weight to any of Mrs. Natvig's testimony. Charging that Broadcast Bureau's case against Lamb was "complete and thorough failure," Russell M. Brown announced he will file motion for immediate renewal of Lamb's license. If Sharfman turns it down, he said, he will appeal to the commissioners. FCC counsel Joseph Kittner then announced that Broadcast Bureau may want to call Lamb to stand as part of its direct case. This touched off a shouted exchange between Kittner and Brown. Latter said Lamb had been "begging" to talk to FCC for a long time, but Commission did not accord him the "courtesy of a reply" when Lamb had offered to answer any questions on the charges long before hearings began.

Kittner protested that Brown was making an "irresponsible attack on the Commission"—to which Brown shouted: "I'll show you how irresponsible it was when you get up before Congress."

The case did come before Congress this week at Mc-

Connaughey hearings, with feelings running high among Democratic Senators—particularly Sen. Kefauver (D-Tenn.), who though not a member of committee, was permitted to ask questions of McConnaughey.

At outset of Senate hearing, McConnaughey explained that he is not permitted under the law to have contact with hearing examiners or Broadcast Bureau personnel on any pending hearing cases, and therefore he knew nothing about case except what he read in the newspapers. He said it would be improper to discuss issues in case, but Senators fired questions at him about "procedure."

In answer to questions, he said: (1) He didn't know Powell, didn't write a letter of recommendation for him when he left Broadcast Bureau to join NARTB. (2) He doesn't know how FCC gets witnesses, but intends to find out. (3) If anybody has done anything wrong in connection with the case, "he will be severely punished."

Sens. Magnuson and Kefauver both tried to pump McConnaughey as to the reasons for Powell's resignation, but got nowhere. "If these stories [about the Lamb case] are true, it could happen to anyone," said Magnuson. Sen. Monroney said he felt that renewal procedures should give great weight to licensee's "affirmative" side—record of service to the community, etc.—"as opposed to the Natvigs."

Hottest questioning came when Monroney and Kefauver quizzed McConnaughey about letter sent FCC July 19 expressing unanimous request of Committee that Lamb be sent "bill of particulars" and list of witnesses scheduled to appear against him. McConnaughey pointed out that he was not at FCC at that time, that this was first time he had heard of letter, but added: "I certainly think that counsel should receive the bill of particulars. . . . I think any lawyer is entitled to a list of witnesses and charges."

Kefauver continually questioned McConnaughey about Commission's change in allegations against Lamb—"charging him with being a Communist, then dropping the charge without apology or explanation." McConnaughey replied: "I think that is an extremely serious thing to do and I personally would not sanction such procedure."

This exchange led to sharp clash between Kefauver and Bricker, who said it was "unfair to ask the witness about cases that are pending." Kefauver replied, "I resent that statement," Bricker snapped back: "Go ahead and resent it."

PITTSBURGH, ranked 8th among market areas by U. S. Census Bureau, and Milwaukee, ranking 16th, are next expansions on the CBS-TV drawing board. This week, v.p. Merle S. Jones, in charge of CBS-owned stations, designated Frank F. Samuels Jr., mgr. of Pacific Coast Network Sales and ex-ABC western div. v.p., as gen. mgr. of projected new Pittsburgh area station pending FCC action on purchase of WSTV-TV, Steubenville, O. (Ch. 9). This week end, CBS-TV was due to put into operation its own first uhf station, WXIX, Milwaukee (Ch. 19), managed by Edmund C. Bunker, ex-sales mgr. of its KNXT, Hollywood.

Samuels' duties begin immediately in connection with planning the station, and this week he and Mr. Jones were in the Steubenville-Pittsburgh area to begin surveys preparatory to operation. WSTV-TV was purchased last Oct. for \$3,000,000 from the Berkman-Laux interests (Vol. 10:47), subject to approval of move of transmitter to point near Pittsburgh and main studio to Florence, Pa. Protests remain to be resolved (Vol. 10:49-52) before FCC acts on transfer application.

In Milwaukee, all is in readiness for FCC-approved new WXIX to assume the Ch. 19 formerly occupied by WOKY-TV, which CBS purchased from Bartell family

for \$335,000, at same time acquiring physical facilities of Lou Poller's WCAN-TV (Ch. 25) for \$650,000 (Vol. 10:47). CBS engineering v.p. Wm. B. Lodge, addressing 150 Milwaukee distributors-dealers last week, revealed network has spent \$1,500,000 in preliminary development, regards Milwaukee as "the nation's most promising uhf market since it is the largest city in the country in which the majority of homes has uhf conversion already."

WXIX is using former WCAN-TV studios and the WCAN-TV tower atop the Schroeder Hotel, starts Feb. 27 with 50-kw but by March 13 will go to 245-kw. WCAN-TV signs off day WXIX starts, though Poller retains the CP for Ch. 25 and owns old WOKY-TV studios. When Poller operated his WCAN-TV as a CBS outlet, it was highly profitable (Vol. 11:5), but it's regarded doubtful whether he will revive it as an independent and he has also sold his radio WCAN there (Vol. 11:5).

Milwaukee station is first of 2 uhf of own planned by CBS, second not yet revealed. NBC's first uhf of own will be on Mt. Higby in Connecticut (Vol. 11:2), network having purchased WKNB-TV, New Britain-Hartford (Ch. 30); this purchase still awaits FCC approval, faces opposition of NBC's vhf affiliate in area, WNHC-TV, New Haven (Ch. 8).

Personal Notes: Ted Cott resigns as operating v.p. of NBC radio network, week after William H. Fineshriber Jr. resigned as v.p. in charge of radio network (Vol. 11:8) . . . Thomas K. Fisher, member of N. Y. law firm of Donovan, Leisure, Newton & Irvine and onetime asst. U. S. attorney for southern district of N. Y., named asst. gen. attorney of CBS Inc. under attorney Julius F. Brauner . . . John H. Reber, NBC national TV sales mgr., named TV spot sales director; H. W. Shepard, new business & promotion mgr., named director of radio spot sales—both reporting to spot sales v.p. Thomas B. McFadden . . . Fred Shawn resigns as NBC-TV director of program production . . . Robert A. Kintner, ABC pres., chief speaker at Easton (Pa.) chamber of commerce dinner March 2 . . . Sylvester L. (Pat) Weaver, NBC pres., Arno Johnson, v.p. of J. Walter Thompson Co., and David Ogilvy, pres. of Ogilvy, Benson & Mather, among 9 candidates for *Tide Magazine's* "Marketing Man of the Year" . . . Ben C. Fisher, son of firm's founder and 1952 Harvard Law School graduate, this week became partner in Fisher, Wayland, Duvall & Southmayd; his father, Ben S. Fisher, pioneer Washington radio attorney, died last year . . . Edward F. Kenehan rejoins FCC staff, in office of general counsel; he resigned in 1948 to join firm of Welch, Mott & Morgan, left latter to join RCA legal staff in 1951; Mrs. Ann A. Mooney is now on 6-8 months leave of absence from office of general counsel . . . Leo Howard, from KGTW, Des Moines, named gen. mgr. of WEAU-TV, Eau Claire, succeeding Harry Hyett, resigned . . . Leslie C. Johnson, v.p. & gen. mgr. of WHBF-TV & WHBF, Rock Island, Ill., crowned "King" of area's 17th annual Mardi Gras . . . Bob Reed, ex-WSFA-TV & WCOV-TV, Montgomery, Ala., named production director of upcoming WBRZ, Baton Rouge (Ch. 2) due in April . . . Montez Tjaden, promotion mgr. of KWTW & KOMA, Oklahoma City, named "Outstanding Woman in Oklahoma Advertising" at Gamma Alpha Chi Founder's Day banquet . . . Wm. Straiton, from AM affiliate, named program director, CHEX-TV, Peterborough, Ont. (Ch. 2), due in March; Doug Manning promoted to commercial mgr. . . . Paul White, pres. of Paul White Productions & ex-pres. of Procter Syndications, retained as adviser to RCA Victor custom record dept. in developing 5-year expansion plan for TV film syndication branch of RCA Recorded Program Services . . . Robert Hess, CBS-TV White House cameraman, promoted to new post of mgr. of motion picture photography, newsfilm production dept. . . . John K. Rooke named editor of CBC-TV features editor, handling *CBC Newsmagazine* and replacing Harry Rasky, resigned . . . Mort Dank promoted to news editor of CBS-TV's *Morning Show* (Mon.-thru-Fri. 7-9 a.m.).

Andrew G. Haley, the Washington radio attorney whose hobby is rockets and who was 1954 pres. of American Rocket Society, is author of "Outpost in the Sky" in Feb. 20 *American Weekly* in which he urges colonizing a nearby asteroid. During World War II, he was pres. of Aerojet Engineering Corp.; currently he's writing book titled *All the World's Rockets* to be published next autumn.

Sports Broadcasting Assn. elects these 1955 officers: pres., Don Dunphy, succeeding Dean Miller, United Press Radio; 1st v.p., Jim McKay, CBS-TV; 2nd v.p., Les Keiter, WINS, N. Y.; secy., Frank Litsku, UP Radio; treas., Len Dillon, WFAS, White Plains, N. Y.

George F. Goodyear, ex-patent attorney and investment broker who is pres. of WGR-TV, Buffalo, revealed on CBS-TV's *I've Got a Secret* show Feb. 23 that he has read entire *Encyclopaedia Britannica*, said it took him 22 years.

Charles C. Kolster, New York regional mgr. of FCC engineering & Monitoring Bureau, retires after more than 40 years of govt. service, having started in 1913 as radio inspector in Commerce Dept.'s Bureau of Navigation.

Telecasting Notes: "Nobody has made an offer yet that really interests us." Thus Paramount Pictures v.p. Paul Raibourn, when asked to verify published reports that some 2000 Paramount short subjects are about to be sold for TV, including *Popeye* cartoons, *Grantland Rice Sportlights* and comedy shorts with Jack Benny, Robert Benchley, Eddie Cantor, Burns & Allen, et al. According to *Billboard*, which in the past has accurately forecast the release of movies to TV, the Paramount price tag is reported to be \$4,000,000 . . . By inference, of course, Raibourn's reply to our inquiry would indicate that the Paramount short subjects can be had—at a price. But it's also a fact that, having been written off long ago, they probably would have to be sold as a package rather than piecemeal in order that the big movie firm can cash in on them via capital gain. Right now, the movie industry is doing so nicely (see Financial & Trade Notes, Vol. 11:8) that there's no disposition to rent them out to TV or to enter into any profit-sharing deals covering their TV uses . . . If Paramount does sell its short subjects—and it would seem that it's bound to do so eventually—it would follow the recent example of Warner Bros., which has just sold 191 cartoons to Guild Films via the William Morris Agency (Vol. 11:8) and of Columbia Pictures and Universal. *Billboard* also predicts MGM will "spring open its vaults for TV via the Morris office" and observes: "With Paramount making a move now and other firms still to be heard from, there is no way of telling now whether the dam will burst entirely"—referring, of course, to pressures for release of backlogs of feature films . . . 20th Century-Fox's Sid Rogell told *Variety* in Hollywood this week that it's going into TV production in big way and "with full knowledge of its vast potential"; Western Ave. lot's 7 movie sound stages are being converted into 15 for TV, and study is being made of TV possibilities of such properties as *The Jones Family*, *Mr. Moto*, *Charlie Chan*, *My Friend Flicka*, *Mr. Belvedere*. Michel Kraike, ex-Screen Gems, named asst. to Rogell, in charge of TV . . . Ziv TV by April 1 will be completely located in newly acquired Hollywood studios, old National Studios, now being remodeled . . . Decca Records and sponsor Dow Chemical Co. have made tie-in, whereby recording of Victor Young's *Theme from the Medic* will be heavily promoted on TV, in displays, etc. and sent to disc jockeys with samples of *Saran Wrap* . . . Klaus Landsberg's KTLA, Los Angeles, will go it alone in covering 1956 GOP convention in San Francisco, handling own coverage via own lines rather than joining network pool.

Feature movies' hold on TV audience is reflected in Advertest Research's Jan. test of TV viewing habits, which shows 88% of N. Y. area TV families view such movies, 7 out of 10 saying they like TV movies as well as or better than other types of TV programs. Primary objections were too many old and too many poor movies and "too many commercials [always at] crucial moment." Types of preferences: 12 noon-5 p.m., westerns and musicals; 5-7 p.m., mysteries & musicals; 7-11 p.m., drama & mystery; after 11 p.m., drama & mystery.

Walt Disney has edited his 3 *Davy Crockett* TV films, each of which ran about 50 min., and will release them in June as a theatrical feature titled *Davy Crockett, King of the Wild Frontier*, running about 90 min. Though it's estimated 40,000,000 people have seen the films on ABC-TV *Disneyland*, 10% of the 8000 fan letters received were said to have asked when they might be seen in a theatre.

Reginald Clough, *Tide Magazine* publisher, joins *Reader's Digest* exec. staff March 14 in charge of information & sales development for advertising.

Paul Archinard, NBC correspondent, elected pres. of Anglo-American Press Assn., Paris.

Station Accounts: Farm programs on TV, though still in test stage, are proving profitable for the comparatively few national sponsors pioneering the field, reports *Tide Magazine* in 3-article series (Jan. 29, Feb. 12 & 26). It says 45% of stations now carry some sort of program aimed at farm audience, which usually are 2 types: (1) market reports, weather, other day-to-day news farmer needs to run his business; (2) features designed to increase efficiency, such as interviews with county agent, films on modern methods, etc. Most popular times are noon, early morning, early evening . . . Most sponsors are local feed mills, implement dealers, insurance agents—but experiences of 3 national sponsors are cited to prove it's worth cost: Murphy Products Co., Burlington, Wis. (livestock concentrates); Ralston Purina Co., St. Louis; Staley Milling Co., Kansas City . . . These stations are credited with "strong" farm programming: KFEQ-TV, St. Joseph, Mo.; WFBM-TV, Indianapolis; WMCT, Memphis; WHAS-TV, Louisville; WOW-TV, Omaha; KPRC-TV, Houston; KOIN-TV, Portland, Ore.; KATV, Pine Bluff-Little Rock; KLZ-TV, Denver; WHO-TV, Des Moines . . . DuMont-owned WABD & WTTG this week started carrying film of President's press conferences with before-&-after announcements that it was being shown under auspices of DuMont TV receiver sales div. on behalf of franchised dealers; they plan to continue practice weekly, White House press secy. having raised no objection to such "house ads" . . . Shulton Co. (Old Spice toiletries), buying first program after 2 years in spots, places MPTV's *Paris Precinct* in 35 major markets starting in March, thru Wesley Assoc., N. Y. . . Amoco switches Washington Redskins' football games from WMAL-TV to WTOP-TV as origination point for 15-station hookup this fall, thru Joseph Katz Adv., Baltimore . . . Though hard liquor is banned by the code, TV "saturation campaign" is announced for Jose Cuervo Tequila, popular brand of the Mexican drink, distributed in U. S. by Young's Market Co.,

Los Angeles. Agency is Tullis Adv., L. A. . . . Among other advertisers currently reported using or preparing to use TV: Towne Talk Co., Los Angeles (Pride toppings), thru Arthur Meyerhoff & Co., Beverly Hills; T. T. Keane Co., Washington (Mrs. Keane's beefsteaks), thru Courtland D. Ferguson, Washington; Harmless Sleepwell Products, N. Y. (Sleepwell capsules), thru Friend-Krieger & Rader, N. Y.; Omar Inc., Omaha (bakery goods), thru Bozell & Jacobs, Omaha; Brazilian International Airlines, Miami, thru Roland-Bowdee & Flint Adv., Miami Beach; Emaline Knitted Sportswear Co., N. Y. (ladies' sportswear), thru Dunay Co., N. Y.; Screen Gems Inc., N. Y. (commercial & industrial films), thru Joseph Katz Co., N. Y.; American Dietetics Co., Yonkers, N. Y. (Frenchette salad dressings), thru Harry B. Cohen Adv., N. Y.; Latter & Sons, Oakland, Cal. (Morehouse mustard & Morstang mustard), thru Bernard B. Schnitzer, San Francisco; Foster-Milburn Co., Buffalo (Doan's Pills), thru Street & Finney, N. Y.; Drug Research Corp., N. Y. (Sustamin 2-12 for pain), thru Dowd, Redfield & Johnstone, N. Y.; F. Schumacher & Co., N. Y. (Waverly Bonded fabrics), thru Lawrence Kane, N. Y.; Ball Bros. Co., Muncie, Ind., Consumer Products Div. (Bonnie Jonnie toilet bowl cleaner), thru Applegate Adv. Agency, Muncie, Ind.

Rate increases: WGR-TV, Buffalo, adds new 8-10 p.m. daily Class AA hour at \$950, min. at \$170, Class A hour remaining \$800; WCIA, Champaign, Ill. adds new 7:30-10 p.m. daily Class AA hour at \$550, 20-sec. at \$115, raising Class A hour from \$450 to \$500; WTRF-TV, Wheeling, W. Va., raises base hour from \$400 to \$450, min. \$80 to \$90; KFVS-TV, Cape Girardeau, Mo., from \$250 to \$300 & \$50 to \$60; WAGA-TV, Atlanta, Ga. raises Class A min. from \$135 to \$150.

Rate decrease: WEWS, Cleveland, which lost CBS affiliation, cuts base hour from \$1200 to \$950, 20 sec. from \$600 to \$300.

Network Accounts: NBC-TV's widely publicized women's show *Home* (Mon.-thru-Fri. 11 a.m.-noon) marks first anniversary March 1 with more than \$8,000,000 in gross billings during first year. By contrast, Dave Garroway's *Today* (Mon.-thru-Fri. 7-9 a.m.) grossed \$1,800,000 its first year. Roy Porteus, sales mgr. of NBC participating programs, said *Home* is running well ahead of its sales quota for 1955. Mort Werner, director of participating programs, said more originations from various cities are in prospect for 1955, along with special emphasis on homebuilding & remodeling . . . New Disney program, *Mickey Mouse Club*, debuts on ABC-TV Oct. 3, Mon.-thru-Fri. 5-6 p.m., having already signed as partic. sponsors Colgate, Borden's, General Mills & Campbell Soup; cartoon show 5 days a week is also being sought for fall by NBC-TV, which has started negotiations with several companies for pilot films . . . Brillo to sponsor *Star Tonight* on ABC-TV Thu. 9-9:30 p.m., thru J. Walter Thompson . . . Procter & Gamble seeking new program to introduce variety of new products on NBC-TV Sun. 10-10:30 p.m. this fall, thru Benton & Bowles . . . ABC-TV takes over *Johns Hopkins Science Review*, dropped recently by DuMont, as sustainer starting March 12, Sat. 7-7:30 p.m., though format will be changed to stress opportunities in science for youngsters.

CBS-TV's "Extended Market Plan" for extension of network programs to small-market affiliates at minimum cost (Vol. 10:49) got 2 more sponsors this week, bringing total of advertisers using all or part of plan to 28. Camels ordered all 15 stations added for *I've Got a Secret* (Wed. 9:30-10 p.m.) & *Topper* (Fri. 8:30-9 p.m.), thru Wm. Esty Co. General Foods (Instant Maxwell House Coffee) added all 15 for *December Bride* (Mon. 9:30-10 p.m.) thru Benton & Bowles. "EMP" stations: KBST-TV, Big Spring, Tex.; WMSL-TV, Decatur, Ala.; KGVO-TV, Missoula, Mont.; KVEC-TV, San Luis Obispo, Cal.; KFXJ-TV, Grand Junction, Colo.; WINK-TV, Ft. Myers, Fla.; KLIX-TV, Twin Falls, Ida.; WFAM-TV, Lafayette, Ind.; KVOS-TV, Bellingham, Wash.; WDXI-TV, Jackson, Tenn.; WBOC-TV, Salisbury, Md.; KLAS-TV, Las Vegas, Nev.; WKNY-TV, Kingston, N. Y.; KTAG-TV, Lake Charles, La.; WCBI-TV, Columbus, Miss.

NBC-TV's program service arrangement, whereby some big network shows are fed to optional affiliates as a circulation booster even though they are not ordered by sponsors (Vol. 10:49), picked up 2 more programs this week—*Caesar's Hour* starting March 14 and *George Gobel Show* starting March 19. Under this plan, *Howdy Doody* is currently fed to 65 optional affiliates, *Home* to 42, *Today* to 28, *Imogene Coca Show* to 25.

New reps: KFEL-TV, Denver to Hoag-Blair (from Blair TV); WTVO, Rockford, Ill. to Headley-Reed (from Weed); KFVS-TV, Cape Girardeau, Mo., to Headley-Reed. New rep offices: Free & Peters March 5 moves to 250 Park Ave., occupying entire 18th floor.

Curtis Circulation Co.'s new *TV Program Week*, launched as competitor of *TV Guide*, suspended publication this week after 8 weekly issues.

Canadian Broadcasting Corp. on April 1 raises Class A network rates of CPFL-TV, London, Ont., from \$300 to \$370; CKCO-TV, Kitchener, Ont., \$300 to \$360; CFCM-TV, Quebec City, \$200 to \$230.

G. M. Basford Co. absorbs industrial adv. div. of Sterling Adv., Sterling's Paul B. Slawter Jr. joining Basford March 1 as v.p. Sterling will concentrate on consumer accounts.

HIGHLIGHTS of hearing before Senate Commerce Committee on nomination of chairman George C. McConnaughey to FCC (see story, p. 2):

Uhf problems: Outlining steps to help uhf, McConnaughey stated: "As the Plotkin report indicated, I think it would be wise—thinking for myself now, not the Commission—for the Commission to consider rule-making, on a selective basis possibly, on de-intermixture. It is not easy, because there are many problems involved with reference to the public who already have hundreds of thousands of vhf receivers." He urged prompt removal of excise tax from all-channel sets, saw development of 1-megawatt transmitting plants as hopeful sign. He agreed with Sen. Pastore (D-R. I.), chairman of communications subcommittee, that FCC to date has not taken "positive action" to help uhf.

Chairman Magnuson (D-Wash.) urged Commission to take action immediately—"in this controversy in the markets between uhf & vhf frequencies." Even while his committee is conducting the investigation, he said, "you might take some places where the matter can be solved first, then take the more complicated ones later." McConnaughey replied: "I hope so, too . . . and I assure you the Commission has given that serious study."

Newspaper ownership: Under questioning by Sen. Daniel (D-Tex.), McConnaughey said newspaper ownership should not disqualify a TV applicant, but on the contrary, all other things being equal, "I think he ought to have a little bit in his favor because of experience and background." Questioned later by Sen. Kefauver (D-Tenn.), he said he didn't mean to say he would prefer the newspaper-owned applicant, but in some cases newspaper ownership "could be a favorable factor with reference to experience," although each case had to be judged on its individual merits. "Where it is the sole newspaper and they have the other methods of communication [too], that is a different situation," he added.

Monopoly: Kefauver hammered at "monopoly" issue, particularly "purchases of independent stations by groups." McConnaughey said he hadn't studied situation, but felt "no alarm," would make study of it as "already suggested by the committee."

License renewals: Much of hearing was devoted to

AT&T's promised lower-cost off-air microwave TV service for stations off the beaten track (Vol. 10:51) is ready to be offered, phone company informed FCC this week. As for costs, AT&T Long Lines operations director Ralph L. Helmreich said preliminary estimates indicate that "the charges in cases involving distances of 100 to 125 miles . . . probably will average about half of those which would apply for direct connections to the network. In individual cases, the differences may vary substantially from this average—tending to be larger for shorter distances." Exact charges won't be known until a customer comes to AT&T and latter files tariff with Commission. AT&T action is victory for small-town operators who insisted they didn't need AT&T's best facilities and that they could build and operate their own far more cheaply. Another prospect for easing network costs cropped up this week with disclosure that Western Union officials are seeking to interest telecasters in microwave service claimed to be less expensive than that of AT&T. FCC turned down similar effort of WU several years ago, on grounds its plans were too vague and uncertain. One source said WU's current proposal is "revolutionary." During Senate hearing on confirmation of FCC Chairman McConnaughey this week (see above), union official Joseph P. Selly, pres. of American Communications Assn. (Ind.), urged that WU be encouraged to compete with AT&T in TV network service.

questioning about procedures in Lamb case, Sens. Magnuson, Monroney (D-Okla.) and Kefauver asking the questions (see story, p. 6). "The whole question of [renewal] procedure should be reviewed in the near future," said McConnaughey. Magnuson then asked whether it would be advisable to issue TV-radio licenses for an indefinite period, remaining in effect until FCC gives notice to licensee. McConnaughey said he didn't know enough about it to give an answer.

Military frequencies: Reiterating his desire to investigate "the freezing of part of the TV band by the military," Magnuson asked McConnaughey whether military has "too much frequencies tied up." McConnaughey replied he didn't know, but that FCC's relations with military authorities had always been good.

Station financial reports: Magnuson questioned nominee about former investigation counsel Robert F. Jones' request for FCC to turn over individual station and network financial data (Vol. 10:52). At that time, FCC attorneys ruled this would violate Federal law. Magnuson quoted decision by Senate legislative counsel that it is "unlikely" that any FCC employe would be prosecuted for giving such data to committee. McConnaughey said he wants opinion from Justice Dept. before he does anything about it.

Past affiliations: Considerable questioning centered on McConnaughey's past activities as attorney for Ohio Bell Telephone Co. (AT&T) and Cincinnati & Suburban Telephone Co. (30% owned by AT&T). He said he felt his personal qualifications provided assurance he would act in public interest. Chicago attorney Harry R. Booth, representing Utility Users League, appeared in opposition to nomination on grounds McConnaughey has been "involved as an advocate upon the identical question on which he will now be required to pass for the FCC."

Sen. Bender (R-O.) made statement on behalf of McConnaughey, whose praise was also put in the record by committee members Bricker (R-O.) and Schoeppel (R-Kan.). Pres. Joseph P. Selly of American Communications Assn. (Ind.) also appeared to urge committee to probe McConnaughey's attitudes on "monopoly trends" in TV-radio, telegraph and international communications industries.

Another telecaster selling AM adjunct in order "to devote its full attention" to TV is Darrold A. Cannan, owner of KFDX-TV, Wichita Falls, Tex. (Ch. 3), who filed for transfer of KFDX (10-kw day, 1-kw night, 990 kc, ABC) to Grayson Enterprises for \$100,000. Purchasers are Sid Grayson (50%), v.p.-mgr. of KMID-TV, Midland, Tex.; Nat Levine, investments (25%); Meyer Raban, auto dealer (25%).

Merger of off-air WNAM-TV, Neenah, Wis. (Ch. 42) and grantee WFRV-TV, Green Bay, Wis. (Ch. 5), whereby former gets control of latter, was approved by FCC this week (Vol. 10:49, 11:2). WNAM's S. N. Pickard family will have control; largest interest retained by WFRV-TV stockholders will be 10.9% each held by George Nau Burrige & Clayton Ewing.

WINK-TV, Ft. Myers, Fla. (Ch. 11) & WINK are now wholly owned by Arthur B. and Edward J. McBride (50% each), parent company United Garage & Service Corp. having acquired, for undisclosed sum, the 50% held by Daniel Sherby estate. United Garage has home office in Cleveland where it operates Yellow Cab Co.

Approval of \$45,000 sale of WRRR, Rockford, Ill. (1-kw, 1330 kc), was sought in application filed this week by Boyd Phillips. Purchaser is Wisconsin radio group headed by Wm. E. Walker of WMBV-TV, Marinette-Green Bay, Wis. (Ch. 11).

SATELLITE PROPOSAL, in which FCC contemplates stations with powers as low as 100 watts and no minimum height (Vol. 10:51), drew quite a few comments on Feb. 25 deadline—though Commission, at last minute, extended deadline to April 1 at request of RETMA.

Most comments were from small operators—and most of them endorsed lower power while warning that big-city stations shouldn't be permitted to smother or preclude independent small-town stations through use of satellites.

Frank C. McIntyre, of KLIX-TV, Twin Falls, Ida., due on air next month, stated: "There is inherent danger that a nationwide system of local or area TV stations could never be established should satellite stations be authorized indiscriminately." He saw 2 circumstances wherein satellites should be permitted: (1) When city within normal range of a station is blocked by geographical barriers, provided city doesn't already have a station or CP. (2) When economics of a city preclude a local station, provided city doesn't already get adequate service.

E. B. Craney, operator of KXLF-TV, Butte, Mont., suggested that 4 kinds of satellites and boosters be authorized—tailored to each area's needs. They range from low-power station doing local originations to unattended on-channel booster serving logging camps, etc.

Louis Wasmer, KREM-TV, Spokane, Wash., said he didn't oppose power reductions, provided other rules remain substantially same. "The satellite," he said, "even though it is locally owned, should be required to produce locally originated programs. Otherwise, the smaller communities will have no outlets for local self-expression. Even though it did nothing but rebroadcast the programs of its parent, the operation of a satellite would block the construction on that channel of a station which would offer local programs."

Archer S. Taylor, of Montana U physics dept., endorsing low power, calculated that 9 stations using 100 watts and 100 ft. antennas could reach 217,000 people for half cost of reaching 258,000 in those cities with stations employing 1 kw and 300 ft.

WILK-TV, Wilkes-Barre, Pa., stated that it endorsed FCC's objectives, but asked for safeguards against "monopolistic practices." It suggested that signal level from distant stations determine whether a town should have satellite—as opposed to using a 50-mi. rule of thumb.

KFXJ-TV, Grand Junction, Colo., said it "believes that satellite low-power stations should be permitted in communities not presently receiving acceptable service and so low in population that it is not reasonably expected that they could support a station." It suggests 25,000 population limitation and location based on available service, not on distance from existing stations.

Radio WABR, Winter Park, Fla., said satellites shouldn't be authorized until local AMs and others have had "fair opportunity" to enter TV.

Sole large operator responding was Crosley, which stated: "Use of satellite or booster TV stations should be made upon a case-by-case and area-by-area basis in order to achieve the plan for this service."

Dage TV Div., Thompson Products, was only manufacturer submitting comment. It stated that questions of low power and of satellite operation are separate; that low power should be authorized immediately; that actual satellite approval should be deferred until small communities have reasonable time to establish low-powered stations programmed on regular basis; that minimum hours of operation should be waived. It estimated that low-power station capable of telecasting film and network would run \$34,904; for film, network and one live camera, \$45,865; for film, network and 2 cameras, \$51,382. These exclude tower, transmitter building and studio, which, Dage said, would be negligible for many AM stations.

TEN NEW STATIONS have started operating thus far this year—and March should bring these 6 more: KFOR, Portland, Ore. (Ch. 12); KBET-TV, Sacramento, Cal. (Ch. 10); WTVT, Tampa, Fla. (Ch. 13); KLIX-TV, Twin Falls, Ida. (Ch. 11); KWTX-TV, Waco, Tex. (Ch. 10); KFDM-TV, Beaumont, Tex. (Ch. 6). Also due in March is another in Canada—CHEX-TV, Peterborough, Ont. (Ch. 12). [For details about Jan.-Feb. starters, see Vol. 11:3-7.]

As number of starters declines, so do orders for new-station equipment. Only such order reported by GE this week was from Texas State Network's upcoming KFJZ-TV, Ft. Worth (Ch. 11), due on air this summer, for 5-kw driver, 20-kw amplifier, 12-bay antenna, 2 studio cameras, portable 2-camera chain, 2 vidicon film cameras, 2 projectors. To existing stations, GE this week shipped 5-kw transmitter to WSJS-TV, Winston-Salem (Ch. 12); 5-bay helical antenna to CBS's new WXIX, Milwaukee (Ch. 19); 3-bay antenna to KGBT-TV, Harlingen, Tex. (Ch. 4).

* * * *

In our continuing survey of upcoming stations, these are the latest reports received:

WBRZ, Baton Rouge, La. (Ch. 2), has April 1 test pattern target, plans NBC & ABC programming before April 15, reports gen. mgr. Roy Dabadie. It has 10-kw RCA transmitter wired & ready for dummy load; 750-ft. Ideco tower is about 25% built and 12-bay RCA antenna is scheduled for installation by March 20. It's owned by Manship family, publisher of *Baton Rouge Advocate* and *Star Times*. City's other outlet, WAFB-TV (Ch. 28), began in April 1953. Base rate will be \$250. Rep will be Hollingbery.

KTBS-TV, Shreveport, La. (Ch. 3), granted Feb. 16, plans to be on air by Aug. 1, reports pres.-gen. mgr. E. Newton Wray. It asked for equipment bids this week, plans 1151-ft. tower. It will be second local outlet, KSLA (Ch. 12) having begun in Dec. 1953. Patrick J. White will be promoted from radio to TV station mgr.; C. H. Maddox to chief engineer; Marie Gifford, national sales mgr. Rep not yet chosen.

WHIS-TV, Bluefield, W. Va. (Ch. 6), has changed target to May, reports mgr. P. T. Flanagan for grantee *Bluefield Daily Telegraph*. RCA equipment is on order and 100-ft. Ideco tower is due to arrive in 2 weeks. Rep not chosen.

* * * *

Grant of new Ch. 12 station in Jonquiere, Que. to Radio Saguenay Limitee (Henry LePage, pres.), operator of radio CKRS there, was recommended by CBC this week. Town is about 20 mi. west of Chicoutimi at headwaters of Saguenay River. CBC also recommended request of CJON-TV, St. John's, Newfoundland, to change from Ch. 2 to Ch. 4 and increase power to 21-kw ERP.

Feb. 28 week network color schedules: CBS-TV—March 2, *Best of Broadway*, "The Guardsman," with Claudette Colbert, Franchot Tone, Reginald Gardiner & Mary Boland, 10-11 p.m.; March 6, *Jack Benny Show*, 7:30-8 p.m. NBC-TV—March 2, *Norby*, 7-7:30 p.m. Starting April 6, *Norby* will be changed to live program in black-&-white for several weeks, to be reconverted to film after changes in format have been agreed upon. Eighteen of the films, sponsored by Eastman Kodak, have been made, and 13 will have been shown by end of March. Cost of each is estimated at \$45,000.

DuMont reports color scanner shipment this week to WDSU-TV, New Orleans, and receipt of order for March 20 delivery to WAGA-TV, Atlanta. RCA shipped 3-V color camera Feb. 22 to WNHC-TV, New Haven.

Britain's 4,000,000th TV set was licensed early in Dec., according to figures released by Postoffice Dept.

GOVT. KEEPS ALOOF FROM DISCOUNT FIGHT: The significance of Federal Trade Commission ruling this week that it has no authority to help states enforce fair trade laws is simply this: There won't be any action by FTC either to assist or curtail the activities of discount houses in TV-radio-appliances or any other commodity. Under fair trade laws, which are on books in 42 states, manufacturers and retailers can set minimum prices for designated merchandise sold within those states.

This FTC hands-off policy with respect to discount house competition means dealers can cut prices below list without fear of Federal intervention. In fact, FTC declared retailers can cut prices "with impunity" to meet discount houses if a manufacturer is lax in enforcing price-fixing contracts under state fair trade laws. Fair trading in appliances is quite extensive, comparatively limited in TV-radio.

Govt. ruling came in letter to unidentified retail jewelers assn., which had requested investigation of fair trade enforcement practices in its industry. But FTC said its ruling was a statement of policy on all discount house relationships.

Various means of "self-help" are available to retailers in competing with the discount houses, said FTC. Besides ignoring prices fixed by a manufacturer who does not enforce his state fair trade contracts against all retailers alike, FTC advised dealers to go into state courts to get injunction preventing discount houses from selling specific items at less than fair trade prices. In such cases, said FTC, the retailer would have to prove only that the discount house operator knew what the fair trade prices were and that he wilfully disregarded them.

The jewelry group said it was under "moral compulsion" not to engage in price wars with discount houses. To which FTC replied: "It cannot seriously be suggested that price competition is morally reprehensible. A retailer forced to cut prices to compete [with discount houses] could do so with impunity."

NARDA's reaction was that FTC decision "imposes a serious blow to fair trade because of the almost impossible task of uniform enforcement." Managing director A.W. Bernsohn doubted, however, that any widespread "price war" would result.

* * * *

A new Congressional investigation of franchise agreements in major appliances and electrical housewares, including a study of where discount houses fit in picture, will be undertaken in near future by a House Small Business subcommittee headed by Rep. Roosevelt (D-Cal.). He said it was not planned to cover TV sets unless specific complaints are received, but a committee spokesman said it was hard to see how any such study could fail to cover TV, so intertwined are TVs and appliances. He also added that Philco's franchise agreements, on which a Dept. of Justice anti-trust complaint has been filed (Vol. 10:51), may also come under study of subcommittee.

[Note: Philco's answer to that complaint is due to be filed in U.S. District Court in Philadelphia on or before March 2.]

Roosevelt explained scope of his probe at press conference: "We have plans for our program to include inquiry into the distribution of electric equipment and appliances. We want to know whether a freer and better distributive system can be evolved which will not only aid the small businessman and the consumer but will also impose no burden or hardship upon the manufacturer. We believe that in many cases the manufacturer will actually find it in his own self-interest to work with the committee to see that the fullest possible play is given to free enterprise.

"We shall be interested particularly in the deleterious effects and results flowing from terms and conditions imposed on purchasers, lessees & franchise holders by big suppliers. Also, we shall expose the facts regarding the practice and effects of price discriminations in the areas I have mentioned."

TV production totaled 176,030 week ended Feb. 18, compared to 171,434 units in preceding week and 171,624 in week ended Feb. 4. It was 7th week of year, brought output to 1,175,000 for year to date as against 730,000 in same period of 1954.

Radio output totaled 271,942 (151,136 auto), compared to 261,827 preceding week and 264,693 week before. It brought 7-week total to 1,800,000, compared to 1,700,000 in corresponding period year ago.

Topics & Trends of TV Trade: Shipments of TVs to dealers in 1954 totaled 7,161,362, compared to production of 7,346,715, according to RETMA state-by-state report released this week. They compared with 6,704,193 shipped in 1953, when production was 7,215,827. New York led, with 653,852; California second, 517,935; Pennsylvania third, 465,785. Dec. shipments were 1,014,227, compared to 774,379 in Nov. and 660,515 in Dec. 1953. Here's state-by-state report for full year (county-by-county tables available to members from RETMA on request):

State	Total	State	Total
Alabama	108,829	New Hampshire	34,876
Arizona	34,985	New Jersey	202,155
Arkansas	92,192	New Mexico	24,487
California	517,935	New York	653,852
Colorado	59,352	North Carolina	176,317
Connecticut	95,560	North Dakota	34,658
Delaware	15,960	Ohio	356,009
District of Columbia	47,895	Oklahoma	102,161
Florida	216,286	Oregon	84,913
Georgia	160,606	Pennsylvania	465,785
Idaho	41,679	Rhode Island	24,356
Illinois	439,127	South Carolina	99,891
Indiana	216,884	South Dakota	24,409
Iowa	157,285	Tennessee	152,683
Kansas	119,186	Texas	379,646
Kentucky	94,038	Utah	27,850
Louisiana	146,149	Vermont	26,324
Maine	92,954	Virginia	122,330

Massachusetts	190,475	West Virginia	80,735
Michigan	295,771	Wisconsin	191,612
Minnesota	145,082	Wyoming	8,088
Mississippi	59,239	U. S. TOTAL	7,147,953
Missouri	204,599	Alaska	3,166
Montana	26,588	Hawaii	10,243
Nebraska	75,443		
Nevada	8,596		
		GRAND TOTAL	7,161,362

DISTRIBUTOR NOTES: Emerson creates new factory branch, Emerson Radio of Buffalo Inc., headed by Emerson Radio of Ohio pres. Murray Gennis, replacing M&N Distributing Co.; Emerson Radio of Florida Inc. expands territory to include all of state, taking over Jacksonville-Orlando distribution from Peaslee-Gaulbert Co. . . . Admiral Chicago factory branch appoints Ray Peters TV sales mgr., succeeding Wm. Oppenheim, now mgr. of Baltimore branch; Admiral Pittsburgh names Irwin Schutzer, ex-Keps Electric Co., as sales mgr. . . . Arnold Wholesale Corp., Cleveland (Zenith) elects L. L. Gustafson pres., succeeding late Robert C. Hager . . . Westinghouse Electric Supply Co., San Francisco, names Martin B. Sauer western regional mgr. for consumer products, succeeding Louis G. Berger, now in charge of apparatus & supply div.; J. R. Achilles transferred from Dallas as consumer products sales mgr. . . . Arvin: Paige E. Mulholland Co., Ft. Smith, Ark. & Tulsa, replacing Wholesale Supply Co., Little Rock . . . Apollo Distributing Co., Newark (Crosley-Bendix) creates separate electronics div. for Crosley TV receiver merchandising, under v.p.-gen. mgr. Bernard Walsh . . . CBS-Columbia N. Y. factory branch names Jerome Rosner, ex-Motorola, as comptroller.

Allied Electric Products Inc., Irvington, N. J., on behalf of subsidiary Sal-Mar Laboratories Inc., this week filed civil anti-trust action against RCA in Federal district court in Newark. It asks for triple damages of \$2,250,000, alleging illegal pooling of patents and "onerous and illicit exactions, fees and royalties." Counsel are Arnold, Fortas & Porter, Washington, and Robert F. Colquhoun, Newark. Plaintiff also asks the Federal court to halt RCA suit for \$175,000 back royalties filed last Nov. in Hudson County Superior Court.

Trade Personals: Don G. Mitchell, Sylvania chairman since 1953, also resumes presidency vacated by recent death of H. Ward Zimmer; Frank J. Healy, Sylvania v.p.-operations, lighting div., elected a director . . . Robert C. Sprague, chairman, Sprague Electric, appointed director of Boston Federal Reserve Bank, term ending Dec. 31, 1957 . . . Kenneth C. Prince resigns as exposition mgr. of International Sight & Sound Exposition Inc., operators of annual high-fidelity shows, selling his stock to S. I. Neiman, show pres. . . . Ralph Walch promoted to asst. treas., Magnavox . . . Hal B. Cook appointed sales director, Columbia Records, succeeding v.p. Paul J. Wexler, reassigned as operations director of Columbia Electronics Products, a new div. for all of company's products other than records (phonographs, transcriptions, precision plastics); Cook is succeeded as sales mgr. of Capitol Records Inc. & v.p. of Capitol Records Distributing Corp. by John K. Maitland, Chicago district sales mgr. . . . James W. Safford, onetime Sylvania eastern sales mgr., resigns as Andrea Radio sales mgr. . . . Walter S. Lefebre retires as market development mgr., Sylvania TV-radio div. . . . Charles Butcher, chief engineer of CBS-Hytron plant in Newburyport, Mass., promoted to plant mgr. . . . Grant R. Loomis promoted to asst. gen. traffic mgr., Stromberg-Carlson TV-radio dept. . . . Allen B. DuMont Jr. transferred from DuMont CR tube div. to TV receiver sales div. as asst. merchandising mgr. . . . E. Eugene Ecklund, from instrument div., named DuMont mgr. of automotive test equipment sales . . . Robert J. Murray named service mgr., National Co., Malden, Mass., replacing Don Swain, resigned . . . Harvey Finkel, recently returned from military service in Korea, named gen. production mgr. of JFD Mfg. Co.—the 7th son of pres. Julius Finkel to join firm . . . Walter Jablon, ex-Freed Electronics & David Bogen Co., succeeds Burt U. Levy as sales mgr. of Radio City Products Co., Easton, Pa. (test equipment) . . . W. J. O'Brien named Canadian Marconi public relations mgr., Montreal . . . C. A. Parris, ex-National Electrical Mfrs. Assn., joins RETMA engineering dept. on military engineering problems & specifications . . . Joseph Martin resigns as music editor of *Billboard* to become eastern div. director of Mercury Records, N. Y.

Conviction of Jacob Freidus, onetime large stockholder in now-defunct Starrett Television Corp., on charge of falsely stating to RFC that Starrett had assets of approximately \$600,000 in connection with his proposed purchase of Kansas City juke-box maker Aireon Mfg. Corp. (Vol. 9:51), was voided this week by U. S. Court of Appeals in Washington. He was convicted in Dec. 1953, sentenced to 1-3 years in prison and fined \$10,000. Before that, he was convicted in N. Y. in separate case involving tax fraud and was sentenced to 4-year prison term.

Nathan Chirelstein, 55, chairman of board of Allied Electric Products Inc., whose Sheldon Electric Co. div. makes CR tubes, died Feb. 19 at Irvington (N. J.) General Hospital after a short illness. He founded Allied in 1933, was pres. until 5 years ago. He formerly headed Sonatron Tube Corp., Newark. Surviving are his widow, son and daughter.

Frank J. Feely, 63, wartime mgr. of Western Electric manufacturing operations, who retired in 1952, died of a coronary thrombosis Feb. 22. He leaves his wife, a son and daughter.

Electronics Reports: Leaders in the electronics manufacturing industry aren't only ones with penchant for forecasting miracles to come. From Dr. Vannevar Bush, pres. of Carnegie Institution of Washington, these possibilities for "improvement in communications" were suggested in address on that subject last week before American Society of Mechanical Engineers:

Televised telephone conferences among a number of persons at different time; a machine that "would type when we talked to it"; a system of coding messages that would make almost all mail sorting automatic; disappearance of metal type and a trend to national newspapers and more nearly current magazines; coded telegrams keyed to preselected data already in the hands of the recipient; domestic alarm systems that would automatically call the fire dept. whenever there is either undue smoke or excessive heat in any part of a house; a system that will permit the position of every airplane in the sky to be known centrally at all times, and possible extension of a similar system for freight shipments and trucks.

"Entertainment is a form of communication," said Dr. Bush. "I think that it is fortunate that entertainment and advertising have made possible the enormous growth of advertising and television. Together with the press and magazines, these media are producing an informed electorate and a united public opinion throughout the country beyond anything that was possible without them. Of course, there are and will be abuses so long as clever men try to sway multitudes for selfish purposes. But I suspect that a demagogue would have to be superhuman to put over a false act on the American people when he appears before them on their TV screens at so close range that they can almost count the hairs on his eyebrows.

"I also suspect, although perhaps I am overoptimistic, that the very weight of advertising that is thrown at the public today is developing a healthy skepticism, and that this may in time necessitate a greater reliance on reason and less on mere repetition. Bacteria, when they are attacked by an antibiotic, sometimes mutate and escape its destructive effects. A public attacked by slogans may find some equivalent protection."

* * * *

Emitron Television Ltd., of England, has changed name to EMI Electronics Ltd., which will be a controlling and coordinating company absorbing as subsidiaries EMI Engineering Development Ltd., EMI Factories Ltd., EMI Research Laboratories Ltd. Firm is managed by W. C. Morgan, is concerned with design, development & marketing of all electronic devices other than Govt.—including TV broadcasting equipment, TV transmitting tubes, microwave links, RF heaters, test equipment. It's also concerned with automation and color TV. Board comprises L. F. Lockwood, L. J. Brown, G. E. Condliffe, C. Metcalfe, J. B. Steveson, S. J. Preston.

Military equipment panel was established this week by RETMA engineering dept., under chairmanship of H. M. Hucke, Bendix Radio. It consists of 6 committees: components engineering coordination (S. W. Cochran, RCA, chairman); drawing standardization (W. J. Myers, GE); test equipment & procedure (E. H. Jones, Bell Labs); apparatus specification (A. M. Okun, Bell Aircraft); electronics systems (J. A. Biggs, Collins Radio); electronic applications (L. M. Clement, Crosley).

John R. O'Brien, ex-Corning Glass, lately head of own engineering services firm, named to new post of eastern div. mgr. of Hoffman Labs div., headquartering in Washington; he's in charge of electronic sales activities in East.

New junction transistors announced this week: 2N104, for low-power audio applications, by RCA; 2N82, high-temperature amplifier, by CBS-Hytron.

Financial & Trade Notes: RCA did \$940,950,220 business in 1954, bettering by 10.2% its previous high of \$853,054,003 in 1953—and tripling volume of only 7 years ago. No detailed breakdowns by divisions are disclosed in annual report, mailed to stockholders this week, but company's largest volumes are usually achieved in network-station operations and in set sales. Report disclosed that NBC billings went up 14.3% to new record; that TV set sales also reached record proportions, though amount is undisclosed beyond statement that RCA produced its 5,000,000th TV receiver and "sold a greater number of TV sets in 1954 than in any previous year"; that govt. orders accounted for about 24% of all sales.

Net profit in 1954, before Federal income taxes, was \$83,501,459; after taxes, \$40,525,459 (\$2.66). In 1953, corresponding figures were \$72,436,778 & \$35,021,778 (\$2.27). Gain in earnings was 15.7%. Report notes that all taxes actually totaled \$81,815,000 last year, including \$26,862,000 in excise taxes; this was equivalent of \$5.85 per common share, or more than double year's net profits.

Backlog of govt. orders was in excess of \$300,000,000 at year's end. Military and commercial electronic apparatus sales were reported up 29%. NBC-TV network was said to have gone up "substantially" while radio network showed "moderate decline in line with the industry trend." NBC spot sales were reported up 25% in TV, 14% in radio. RCA participated in industry boom in phonographs and records, and report predicts all-industry volume in records should rise to \$300,000,000 in 1955 from \$225,000,000 in 1954.

Total assets rose to \$548,325,244, new high, from \$493,624,730. Current assets were \$386,522,521, up from \$349,734,691; current liabilities rose to \$151,657,517 from \$120,794,396. Employees total 70,500, up 5500 in year.

* * * *

Western Electric Co., which is more than 98% owned by AT&T, achieved record gross sales of \$1,526,231,329 in 1954 compared with \$1,507,953,132 in 1953. Net of \$55,836,430 in 1954 compared with \$52,604,613 in 1953. Sales to Bell System were 67% of total, amounting to \$1,019,279,000; sales to Govt. were \$452,200,000, compared with \$440,204,000 in 1953. Company paid \$34,650,000 in dividends to AT&T in 1954.

Stromberg-Carlson Co. reports 1954 net earnings of \$1,981,754, or \$3.65 per share on 509,115 shares of common stock outstanding as of Dec. 31, 1954. This is up 19% from the \$1,667,308 of 1953, or \$3.40 on 484,551 shares. Sales totaled \$63,509,429, slightly under record \$65,241,861 of 1953. Pres. Robert C. Tait predicted increases in both sales and earnings this year.

ElectroData Corp., Pasadena, Cal., electronic computer affiliate of Consolidated Engineering Corp., will shortly file SEC registration statement covering common stock issue for about \$2,000,000 in new capital, according to pres. James R. Bradburn.

More on upturn in the movies (Vol. 11:8): Paramount Pictures shows 1954 net profit of \$9,003,000 (\$4.10 a share) vs. \$6,779,563 (\$3.06) in 1953. Republic Pictures for year ended Oct. 31 earned \$804,202 vs. \$697,217.

W. L. Maxson Corp. has authorized 2-for-1 stock split, pres. H. A. Leander announced Feb. 24.

—■—

Dividends: Consolidated Television & Radio Broadcasters Inc., 23¢ on common, 5¢ on "B" common, April 1 to stockholders of record March 15; WJR The Goodwill Station Inc., 10¢ March 10 to holders March 1; Stromberg-Carlson, 40¢ March 31 to holders March 15; Oak Mfg. Co., 35¢ March 15 to holders March 3; Sprague Electric, 30¢ March 14 to holders Feb. 28; Sylvania, 50¢ April 1 to holders March 11; Hoffman Electronics, 25¢ April 1 to holders March 15.

CONGRESSIONAL INQUIRIES into TV-radio marked time this week as committees laid ground-work, sought personnel, etc. Senate Commerce Committee's probe, which got under way during last session, won't resume actively until special counsel and other personnel are selected, although replies by FCC and Justice Dept. to issues raised in Plotkin Memorandum (Vol. 11:6) are due next week.

Chairman Magnuson (D-Wash.) has received batch of applications for top investigation job, and this week was "looking over some possibilities" in his home state. At present time, he favors selection of chief counsel from outside broadcasting industry, perhaps picking industry-oriented personnel for secondary jobs. Republican members of committee have been offered opportunity to select "minority counsel," but probably won't exercise that option if convinced that candidate selected by Sen. Magnuson is neutral.

Meanwhile, Senate Judiciary Committee's anti-trust subcommittee, headed by Sen. Kilgore (D-W. Va.), asked Senate for \$250,000 to carry out its all-encompassing "monopoly" investigation. While TV-radio industry probe was once highly touted by Kilgore, it now appears that it may be minor part of the overall investigation. Committee's request for funds mentions no specific industry.

Another Judiciary subcommittee—Sen. Kefauver's juvenile delinquency probers—asked \$150,000 for another look-see into causes of crime among youth, with additional hearings on TV's impact promised. Formerly headed by Sen. Hendrickson (R-N. J.), subcommittee had prepared draft report on TV, but never issued it.

House Commerce Committee, under Rep. Priest (D-Tenn.), this week received routine authorization from House to "make investigations and studies" into a number of matters, including "the allocation of channels to radio & TV stations, educational TV, subscription & theatre TV, the administration by the FCC of the statutes which it administers." A committee spokesman said no TV-radio investigations were currently in prospect.

Bill to exempt TV-radio stations from libel action for statements made by political candidates (S-1208) was introduced Feb. 25 by Sen. Butler (R-Md.), member of Senate Commerce Committee. Measure would free stations of liability for statements by "a legally qualified candidate for public office" unless they participate "wilfully, knowingly and with intent to defame." Butler said in statement accompanying bill: "Present law places the radio & TV industry at a distinct disadvantage. In effect, it also places the broadcasters in the unpleasant and un-American role of censor."

Long rivalry of Azcarraga-O'Farrill interests, which own all TV stations in Mexico City and hold most construction permits outstanding (see *TV Factbook No. 20*, p. 237), has ended with their merger into one big holding company as result of negotiations conducted since 1952 by Monte Kleban, ex-Texas broadcaster (Vol. 8:26 & 10:51). Theatreman-broadcaster Emilio Azcarraga and industrialist-publisher Romulo O'Farrill each owns 50%.

NARTB insurance committee reports more than 600 stations have taken out tower insurance since program began in July 1953. At meeting this week, committee voted over-all study of all insurance available to broadcasters and will continue special studies of libel and slander insurance by research mgr. Richard Allerton.

President Eisenhower has 11 TVs scattered around the White House, his Gettysburg farm and his vacation domiciles in Georgia & Colorado, reports *TV Guide*, impelling *Washington Star* critic Harry MacArthur to observe, "Man gets to be President he doesn't have any privacy at all any more."

TV-radio implications of *Kansas City Star's* conviction Feb. 22 by a Federal court jury on criminal anti-trust charges won't be determined until there's decision in the companion civil anti-trust suit which was also filed by Justice Dept. when the newspaper was indicted by grand jury Jan. 6, 1953 (Vol. 9:2). Civil suit demands newspaper company be required to dispose of its pioneer WDAF-TV & WDAF, but trial was held in abeyance pending outcome of criminal case. Under Communications Act of 1934, FCC has discretionary authority to revoke license of any firm convicted of anti-trust law violations. Earl A. Jinkinson, chief govt. counsel, said he was eager to complete action on civil suit and would seek a summary judgment on basis of evidence submitted during trial. Newspaper firm was given until March 21 to file motion for new trial. Its adv. director Emil Sees was also convicted of attempting to monopolize dissemination of advertising & news but was acquitted of actually monopolizing. Among charges on which *Star* was convicted: refusing or threatening to refuse space to advertisers who used competing media, or who purchased larger ads in other publications; discriminating on space and location of ads; attempting to coerce advertisers into buying unreasonable amounts of space in *Star*; requiring certain advertisers to buy space both in *Star* and in its morning edition, the *Times*, without giving them an option; refusing to sell subscriptions separately to *Star*, *Times* & *Sunday Star*. Commented pres. Roy A. Roberts: "The real and ultimate goal of the anti-trust division is to break down the *Star's* circulation plan of 13 papers a week—morning, evening & Sunday—for one subscription price."

Ugly business of blacklisting TV-radio personalities hit the headlines again this week with admission by Harvey Matusow, turnabout ex-Communist, that he had falsely accused persons of Communist associations on a blacklist he drew up for Lennen & Newell in 1952, for which he claimed he was paid \$150. Agency v.p. F. C. Barton Jr. promptly denied Matusow was paid for blacklist, said he was paid only for 3 years of back issues of *Counterattack Magazine*, an anti-Red publication for which he worked at the time. In testimony in N. Y. Federal Court this week, Matusow said he was commissioned by Lennen & Newell to draw up a blacklist because a Syracuse supermarket operator had threatened to boycott Schlitz Beer because of allegedly "objectionable" talent on its *Schlitz Playhouse of Stars*. He testified he also worked with BBDO on a blacklist also wrongfully accusing many performers. BBDO denied existence of any blacklist. Meanwhile, Ford Foundation's Fund for the Republic, which is currently backing full-scale investigation of blacklisting in the entertainment field being conducted by John Cogley, ex-editor of *Commonweal*, discloses it expects to release report in June. Fund pres. Robert M. Hutchins indicated at recent press conference that entertainment executives regard blacklist as a nuisance, want it dropped.

Industry's finest annual public service, Voice of Democracy essay contest for high school students (Vol. 10:38, 45) sponsored jointly by RETMA & NARTB, was climaxed at luncheon in Washington Feb. 23 when TV sets and \$500 scholarship checks were given to 4 national winners. Arvin. CBS-Columbia, Raytheon & Westinghouse receivers were given winners, who read excerpts of their essays on "I Speak for Democracy." Presentations of the sets were by RETMA exec. v.p. James D. Secrest, checks by U. S. Education Commissioner Brownell. All 52 state & territorial winners received TV sets donated by 26 firms.

AT&T network interconnection schedule for March: KTVK, Phoenix, March 1; KFOR, Portland, Ore., March 9; KBET-TV, Sacramento, March 13; WPRO-TV, Providence, March 15; WLEX-TV, Lexington, Ky., March 17.

MAR 7 1954

SUMMARY-INDEX OF THE WEEK'S NEWS—March 5, 1955

PHILCO DENIES ANTI-TRUST CHARGES in Justice Dept. civil suit on its franchise agreements, asks court to dismiss case (pp. 1 & 10).

METHODS OF HELPING UHF considered, with de-intermixture a major topic, as FCC works up comments on Plotkin Memo for March 18 submission (p. 2).

CANDIDATES MUST BE TELEGENIC and well-heeled, too; GOP and Democratic spokesmen voice views on TV's impact in next year's campaign (p. 2).

NEW SACRAMENTO & PORTLAND VHF's bring total to 427; Hearst's \$2,000,000 purchase of WTVW, Milwaukee approved by FCC subject to court action (p. 3).

5-MILE RULE FOR TRANSMITTER SITE proposed by FCC as answer to "market-straddling"; hearing indicated on sale to CBS of WSTV-TV, Steubenville, O. (p. 4).

VOICE OF AMERICA PLANS EXPANSION of services to growing number of TV stations abroad, will engage new director; Streibert on high-level board (p. 5).

TV OUTPUT, SALES & INVENTORIES in good balance, with retail sales during first 2 months roughly equal to the 1,350,000 sets produced (p. 9).

COLOR TUBE CUSTOMERS sought by RCA as it shows set makers progress at Lancaster plant, including "amazing" reduction in rejection rate to 20-30% (p. 9).

SWING TO FACTORY BRANCHES as distribution outlets in major markets likely to intensify this year as set makers seek tighter controls (p. 11).

ADDITIONS TO STOCK PORTFOLIO in last quarter reported by TV-Electronics Fund; DuMont, Storer, Tung-Sol and other 1954 earnings reports (p. 13).

HOUSE COMMUNICATIONS SUBCOMMITTEE headed by Rep. Harris to look into TV matters; Rules Committee hears pleas for reversal of House TV-radio ban (p. 7).

COMPROMISE NCAA FOOTBALL PLAN, providing for both national and regional telecasts, withdrawn as Big Ten spokesmen boldly hint bolt from NCAA (p. 14).

Full Text of Philco Reply to Dept. of Justice Complaint in Franchise Suit Published as Special Report With This Issue

PHILCO DENIES GOVT. ANTI-TRUST CHARGES: Philco lashed back at the Justice Dept. this week, emphatically denying charges in civil suit of last Dec. 15 that it violated anti-trust laws in distributor franchise agreements of last Aug. (Vol. 10:32,51). In answer filed March 2 in Philadelphia Federal Court, Philco asked exoneration on all charges, seeks dismissal of suit and requests final judgment entered in its favor.

Govt. has no intention of dropping any of the charges as a result of Philco's reply, a Justice Dept. spokesman told us. He said nothing in its answer changed any of the govt. allegations, as far as he could see.

Neither side is sure of next step in case. Both Govt. and Philco could await court action on latter's request for dismissal of charges and final judgment. Or Govt. could request a judgment in its favor. Or, as another alternative, they could proceed with pre-trial "discovery" process, in which depositions are taken on non-controversial aspects of case. Whole problem will have to be worked out in upcoming conferences of both parties, due to begin shortly.

Industry generally seems to be rooting for Philco, though other set makers obviously must refrain from public comment on case. Suspicion of many is that Govt. is on Philco's neck merely because its franchise agreements contain what a Justice official calls "police powers" -- meaning penalty provisions, such as requiring a distributor to buy back goods trans-shipped from his territory at cost & freight, cutting off shipments to a distributor when his inventory reaches a certain level. These provisions distinguish Philco's franchise agreements from others in industry.

Govt. suit asked court to void franchise agreements because of 3 provisions it contends are illegal: (1) Distributors are required not to sell Philco products to retailers outside their assigned territories. (2) Distributors must not deal in any product competitive with Philco. (3) Retailers "approved" by distributors must sell only to consumers in their territories, never to dealers.

(For continuation of this report, see Trade Report, p. 10.)

DE-INTERMIXTURE WEIGHED AS FCC PONDERES UHF: Puzzling how to help uhf, pressured by Senate Commerce Committee (Vol. 11:9), FCC held discussions this week, came up with nothing final. Commission asked Committee if it could delay its comments on Plotkin Memorandum until March 18 so that it could include statement on Jones Report, and delay was acceptable to Committee chairman Sen. Magnuson.

Of all "help uhf" projects, de-intermixture is the one most often mentioned. FCC Chairman McConnaughey told Senate committee he favors another look, and it's expected that a majority will go along with him -- but there's no telling whether Commission will actually vote to de-intermix.

There are 9 cities for which formal petitions for de-intermixture have been filed. All of them asked that the vhf channel or channels in town be designated educational or replaced by commercial uhf channels. In all cases, the vhf channels have at least gone through hearings, with most having initial decisions -- and in 2 cases, petitions ask that vhf operators shift to uhf.

Cities and channels involved in the petitions are these: Evansville, Ind., Ch. 7 and 9 (latter in Hatfield, Ind.); Peoria, Ill., Ch. 8; Madison, Wis., Ch. 3; Hartford, Conn., Ch. 3; Corpus Christi, Tex., Ch. 6 and 10; Waco, Tex., Ch. 10; Raleigh-Durham, N.C., Ch. 5 and 11; Tyler, Tex., Ch. 7; Schenectady, N.Y., Ch. 6.

Original petitions were denied in Evansville, Peoria, Madison, Hartford, Waco, Raleigh-Durham and Tyler. FCC has taken no action yet on Corpus Christi or Schenectady. Petitions for reconsideration of the denials are pending for Evansville, Peoria and Hartford; none has been asked for Waco, Raleigh-Durham or Tyler.

In giving reasons for denying de-intermixture petitions, Commission usually noted that vhf contestants had made heavy investments in hearings, relying on stability of allocation; that complete de-intermixture is frequently impossible because out-of-town vhf stations reach cities concerned; that petitions simply didn't make a convincing showing on how public interest would be served.

It's futile to speculate, at the moment, on Commission's ultimate actions on de-intermixture. It's even more speculative to guess whether FCC will explore even further -- into "extended de-intermixture," i.e., precluding the start of a second vhf in a city with one operating vhf, or taking the drastic measure of shifting any operating vhf stations to uhf.

Commission is deeply troubled and harassed, no doubt of it, as it reconsiders the allocation plan it fashioned during the 4-year freeze, and serious hitch that has developed in its efforts to provide a "competitive nationwide TV system."

It's pondering short-term and long-term problems -- of keeping existing stations going while providing a solid economic and engineering foundation that would support potential of thousands of stations rather than the hundreds now in prospect.

THEY MUST BE TELEGENIC--AND WELL-HEELED: Quite aside from the political pressures on Federal TV regulation, which have commanded so much publicity lately and which now point to the imminent blowup of the ill-conceived Edward Lamb "prosecution" by the FCC, with its share of turnabout ex-Communist witnesses (see p. 14), certain other aspects of the current Washington political scene are particularly significant to the industry. There's political, social and even commercial significance in:

(1) The candid statement by GOP national committee chairman Leonard Hall this week that his party, unable to hold a Congress majority in the last election, must pick, as he put it, "personable" as well as able candidates who must be able to "sell themselves over television." TV has changed everything about political campaigning, he told Republican women workers. "We can't go on the basis that anyone can win. Let's face it, we have to put our best foot forward."

The metaphor was somewhat mixed; he really meant "best faces forward" for in the next breath he urged the women to exert their influence to secure candidates who will appeal to the people when they appear in their living rooms via TV screens. It's impossible to assess how much of his acknowledged popularity with the voters President Eisenhower owes to his "telegenic personality," especially as evidenced in his new film-televised weekly press conferences -- but it must be considerable.

Philco Corp. Answer to Department of Justice Civil Action

Charging Anti-Trust Violations in Franchise Agreements

Filed in United States District Court for Eastern District of Pennsylvania, March 2, 1955

(For text of Justice Dept. complaint and story, see *Television Digest*, Vol. 10:51 and Special Report therewith)

IN THE UNITED STATES DISTRICT COURT
 FOR THE
 EASTERN DISTRICT OF PENNSYLVANIA

UNITED STATES OF AMERICA,
Plaintiff,

v.

PHILCO CORPORATION,
Defendant.

Civil Action No. 18,216

ANSWER

The defendant, Philco Corporation, answers the numbered paragraphs of the complaint as follows:

1. The jurisdiction of the Court is admitted. All averments of violation by Philco of the Sherman and Clayton Acts are denied.
2. Admitted.
3. Admitted.
4. Philco denies that it has violated the Sherman Act and further denies that any wholesale distributors of Philco products have participated as co-conspirators with Philco in any violation or violations of said Act.
5. Denied.
6. The averments of the first sentence are admitted. The averments of the second sentence are denied, except that it is admitted that Philco is one of a large number of companies which manufacture some or all of said products in quantity.
7. The averments of the first two sentences are admitted. The averments of the third sentence are denied except as hereinafter stated. Relatively few Philco Distributors sell Philco products in interstate commerce. Only an insignificant number of Retail Dealers sell Philco products in interstate commerce.
8. Denied, except as stated in answer to paragraph 7 and as hereinafter stated. Each Philco Distributor maintains a warehouse in the city or locality in which his place of business is located. The Philco products referred to are generally shipped in carload or truckload lots from Philco's manufacturing plants to the Distributor's warehouse, at which point the flow of interstate commerce comes to an end. Such products are subsequently sold by the Distributor in smaller quantities to Retail Dealers and delivered to the Dealer's place of business; and in the relatively few cases in which a sale in interstate commerce is involved, such commerce is terminated at the point of delivery. Individual units are subsequently sold and delivered to the consumer in intrastate commerce.
9. Denied.
10. Denied, except as hereinafter stated. The relationships between Philco and its Distributors and between the Distributors and their respective Retail Dealers who sell

Philco products are hereinafter described. Philco avers that these relationships and actions taken pursuant thereto are entirely proper and lawful, are fully justified by legitimate business considerations, and are reasonably ancillary and necessary to Philco's purpose of distributing its products in vigorous competition with numerous other manufacturers.

NATURE OF THE INDUSTRY

The radio-television and major home appliance industry in which Philco is engaged (hereinafter referred to as "home appliance" industry) is highly competitive. Philco is in direct competition with numerous television, radio, refrigerator, room air-conditioner, freezer, and electric range manufacturers; and its competitors include giant concerns, each having resources many times as large as those of Philco.

Substantial quantities of home appliances are manufactured for large retailers, chains and mail order houses under their own "private brand" trade names and are sold without the intervention of a wholesaler direct to the retailer. The balance and a majority of home appliances are nationally advertised and sold under the trademark and brand name of the manufacturer. They are usually marketed through specialized regional wholesale distributors who represent the manufacturer in a specific territory and have sufficient capital to do the necessary warehousing, to finance inventories and to provide credit extension to retailers. In some instances manufacturers set up wholesale distributing subsidiaries or use factory branches to perform these functions.

Home appliance wholesale distributors conduct their business in a different manner than jobbers who wholesale less complex "shelf" goods in the low-unit price field. Such goods present no installation, service or warranty problems and require no technical knowledge of the product and no training in servicing. Jobbers handling "shelf" goods almost invariably handle several competing lines. By contrast, in the home appliance industry the wholesaler is usually a true regional distributor who concentrates his merchandising efforts on the product of a single manufacturer of each type of home appliance that he handles.

Home appliances (except the "private brand" appliances) customarily move from the wholesale distributor's warehouses to retailers in the distributor's territory. The retailers resell them to consumers and in most cases handle installation, warranty and service. Nearly all retailers handle competing products of a number of home appliance manufacturers, and it is the duty and function of the distributor to persuade the retailer to promote the brand which he represents in preference to competing brands represented by other specialized distributors.

This system of distribution stimulates and does not restrain competition.

Home appliances of the types manufactured by Philco are characterized by increasingly complex mechanisms,

frequent style changes, and seasonal market variations. Retailers must carry in stock or have readily available a virtually complete line of the latest models, or sales will be lost to competing retailers. Any system of distributing home appliances, in order to be competitively effective, must accommodate itself to style and seasonal changes so as to make current models available to retailers and at the same time permit scheduling of factory production for maximum manufacturing efficiency and a minimum of fluctuation in factory employment.

Modern home appliances require skilled servicing, and, in most cases, both expert installation and instructions to the consumer. All manufacturers furnish warranties for the replacement of defective parts. The consumer expects the manufacturer to stand behind its products and to provide for their installation and service. The consumer regards the retailer from whom he purchases as the manufacturer's representative, and failure of the retailer to afford proper installation and effective service or to fulfill warranty obligations causes customer dissatisfaction with the manufacturer and all its products. Very considerable technological knowledge is required of the retailers in order to meet these obligations. One of Philco's largest competitors has sought to meet the problem by performing the installation, servicing and warranty obligations through a nation-wide subsidiary.

THE PHILCO DISTRIBUTION SYSTEM

Philco's system of distribution is universally accepted as lawful and is commonly used in industries in which the products merchandised require special technical knowledge and skilled service.

Since 1928 Philco has followed the principle of selecting a single regional Distributor to handle the wholesale distribution of its products in a specified and natural marketing area. Except in the four largest cities, where wholesale distribution is handled through a subsidiary, the Distributors chosen are independent local concerns. The marketing area assigned to each is as large as Philco and its Distributor agree can be adequately handled in the light of the size and ability of the Distributor's organization, as well as his working capital. It is also small enough for the Distributor to give close personal supervision and training to his Retail Dealers in the merchandising, installation and servicing of Philco products and the performance of warranty obligations.

Philco provides extensive and costly factory-training for its Distributors' servicemen, who, assisted by Philco experts, train the service organizations of the Retail Dealers; and the latter's installation and service activities are performed under the guidance and supervision of the Distributors. Replacement parts to fulfill warranty obligations are supplied by the Distributor to the Retail Dealer and by the latter to the consumer. Philco furnishes its Distributors and their respective Retail Dealers with information bulletins and service manuals which are kept constantly up to date.

Philco does not interfere with the Distributor's right to choose his Retail Dealers in his assigned territory. Philco does, however, urge its Distributors to select Retail Dealers who affirmatively desire to handle Philco products and feature them as a relatively important part of their total sales volume; who will provide honest retail salesmen trained to sell the customer an appliance suited to his needs; and who will willingly undertake and adequately perform their obligations to the consumer with respect to installation, warranty and servicing.

All Philco Distributors set up separate divisions of their business for distribution of Philco products; and many, acting upon their own volition, make the distribution of Philco products their major, if not their only, business activity. All have a common interest with Philco in the sale of its products.

Philco appoints only a single Distributor in each area and finds that the regional distribution system briefly described above is economical and efficient and produces sales of Philco products in larger volume than could be accomplished by any other method.

PHILCO'S CONTRACTS WITH DISTRIBUTORS

Since 1928 it has been Philco's practice to enter into a separate franchise agreement with each Distributor at the beginning of each calendar year. These uniform agreements set forth the terms of the arrangement for the ensuing year, but may be terminated with or without cause by either party at any time. While the form may vary somewhat from year to year, the substantive terms of the 1954 Distributor Agreement have been used for a number of years.

This form of franchise, insofar as pertinent, designated the Distributor's authorized territory and provided that Philco products would not be sold by the Distributor outside that territory. The Distributor agreed to maintain a separate department of his business for the sale of Philco products; to maintain an adequate sales force; to participate with Philco in promotion plans; to make expenditures for local advertising; to enter into retail agreements with aggressive and well financed Retail Dealers with adequate service facilities; and, in order to avoid overstocking and attendant evils, to make reports of sales and stock on hand.

The Distributor specifically agreed to be responsible for providing consistently high quality service for Philco products to Philco customers in his area and undertook to see that his Retail Dealers would maintain adequate servicing facilities and an adequate supply of service parts. The Distributor further agreed to be responsible for the placement of service work by Dealers who did not conduct service establishments of their own and to provide, at his place of business, permanent training facilities for Retail Dealers and independent servicemen, including shop and service clinics. The Distributor further agreed that if the Retail Dealer failed to discharge properly his warranty responsibilities, the Distributor would assume the Retail Dealer's unfilled responsibilities.

Under the regional plan of distribution the Distributor at all times knows what Retail Dealers are selling Philco products to consumers in his area, thereby enabling him to perform his obligations described above.

AGREEMENTS BETWEEN DISTRIBUTORS AND RETAIL DEALERS

Philco Distributors in turn enfranchise Retail Dealers to perform the retail function in the system of distribution. Philco suggests to the Distributors in January of each year a form of Retail Dealer Agreement for the year. Philco is not a party thereto but requests and generally receives copies of such contracts. Philco does not select or approve the Retail Dealers with whom its Distributors contract. The form of Retail Dealer Franchise suggested by Philco for 1954 was typical of those suggested in recent years. It set forth the Philco products the Retail Dealer would sell and the relations to exist between the parties for the coming year, but was terminable by either party at any time.

Insofar as pertinent, it provided that the Retail Dealer would display Philco products prominently, spend liberal amounts on local advertising, and participate in promotions; that the Retail Dealer would give expert service on Philco products by organizing and maintaining a service department or by contractual arrangement with a reliable service organization, and would follow the Distributor's reasonable recommendations with respect to the adequacy of his service organization; and that the Retail Dealer would fulfill his obligations in connection with the printed warranty issued by Philco to the original purchasers of Philco products.

MODIFICATIONS DURING 1954

In August 1954 Philco proposed to its Distributors an amendment to the 1954 Distributor Agreement and suggested a revised form of Retail Dealer Agreement for electronic products. Philco considered these modifications desirable to avoid the confusion in its regional distribution system that resulted when Philco products shipped to one Distributor's area were transshipped to other areas and sold to retailers not regularly franchised and not

trained in Philco's standards of sales and service. The amendment to the Distributor Agreement added to the territorial clause a provision that merchandise transhipped out of the Distributor's territory by the Distributor or his Retail Dealers for resale might be repurchased by Philco for the account of the Distributor. Said suggested Retail Dealer Agreement form contained a new sales function clause under which the Retail Dealers who signed would be bound not to sell the Philco products covered thereby to others than consumers at retail.

On December 7, 1954, Philco suggested a modification of said Retail Dealer Agreement form and a corresponding change in interpretation of its Distributor Agreements. These refinements further emphasized the functional responsibilities of the Distributors and Retail Dealers respectively. The suggested modification changed the sales function clause to provide that the Retail Dealer's function was the maintenance of a retail sales outlet and that if he should resell Philco products covered thereby at wholesale, he would furnish the Distributor with a written agreement by the retailer to whom the products were sold to assume and perform the usual service and warranty obligations with respect thereto. To make its Distributor Agreements consistent with this suggestion, Philco stated that it would interpret the repurchase provision added by the amendment of August 1954 as not applicable to products covered by the written service and warranty agreement of the retailer to whom they had been sold.

Further refinements were made in Philco's 1955 forms of Distributor Agreement and Retail Dealer Agreement, which supersede the various amendments of 1954. In the 1955 Distributor Agreement the territorial clause, after specifying the Distributor's territory, provides that if Philco products purchased by the Distributor should be resold by Retail Dealers within the territory to retailers outside the territory who do not maintain a competent service department or have not arranged with a reliable service organization to render service, the Distributor will reimburse Philco for costs incurred in assuring fulfillment of the usual service obligations, and that, if necessary, such resold products may be purchased by Philco for the account of the Distributor. The sales function clause in the 1955 suggested form of agreement between the Distributors and their Retail Dealers provides that the Retail Dealer's function in the distribution of Philco products shall be the resale of such products to consumers at a retail store maintained by the Retail Dealer.

Philco answers the lettered subparagraphs of paragraph 10 of the complaint as follows, such answers being qualified in their entirety by reference to the foregoing:

(a) Denied, except as stated above and hereinafter. During the period from August through December 1954, the amended agreement between Philco and its Distributors provided that the Distributor would not sell products purchased from Philco outside his territory. This agreement was reasonably ancillary to Philco's system of regional Distributors and to the discharge by the Distributors of their responsibility for the wholesale distribution of Philco products within their territories. Philco, through a subsidiary corporation, is aggressively engaged in foreign commerce. The Philco Distributors referred to in the complaint handle their own territories and do not wish and are not qualified to engage in foreign commerce. Products sold by Philco for use in the United States are not usable in many foreign countries by reason of differences in voltage, electrical specifications, and packaging requirements. Philco avers that any application its Distributor Agreement may have had to foreign commerce was incidental to Philco's lawful system of regional distribution and was not intended to, and did not materially affect such commerce.

(b) Denied. There is no such clause in Philco's agreements with its Distributors.

(c) Denied. There is no such clause in Philco's agreements with its Distributors. Although Philco believes that the form of Retail Dealer Agreement as suggested by Philco from time to time is in the best interests of the Retail Dealers and Distributors, Philco does not make any

requirement that its Distributors enter into any particular form of contract with their Retail Dealers.

(d) Denied, except as stated above in response to this paragraph 10.

(e) Denied, except as stated above in response to this paragraph 10.

(f) Denied. There is no such clause in Philco's agreements with its Distributors. Philco does not reserve or exercise the right to approve or disapprove the Retail Dealers or the classes or descriptions of retailers to whom its Distributors sell.

(g) Denied. Philco's so-called "inventory control" system, by coordinating the Distributors' reports of sales and stocks on hand with local and national sales trends, enables Philco to schedule its production and shipments efficiently and to stabilize employment and prevent lay-offs in its plants and the plants of its suppliers. The purpose of the system is to match inventory to sales; and the system does not restrict the sales volume of any Distributor or pertain in any way to the detection of violations of the Distributors' Agreements or to price cutting.

(h) Denied. Philco is not a party to any contracts between its Distributors and their Retail Dealers. The Distributors do not control the actions of Retail Dealers except to the extent that Retail Dealers have voluntarily entered into the contracts with them described above.

11. Philco denies all averments of conspiracy and illegality and further denies all averments of contracts, agreements and understandings except as stated in paragraph 10 hereof.

12. Philco denies all averments of conspiracy and illegality and further denies all averments of things done by Philco and others for the purpose thereof, except for things done in compliance with the agreements and for the purposes described in paragraph 10 hereof.

13. Denied.

14. Philco denies all averments of illegality and conspiracy and any implication of unreasonable restraint of interstate trade or commerce. Philco denies all other averments of the subparagraphs, except as hereinafter expressly stated.

(a) Philco Distributors are not equipped to perform their specialized wholesale functions except in their own territories and are not natural competitors of one another. Within their territories Philco Distributors encounter aggressive competition both from distributors, manufacturers' subsidiaries, and factory branches handling competing nationally advertised brands of home appliances at the wholesale level and from manufacturers who sell private brands direct to large retailers, chains and mail order houses. The allocation of territorial responsibility among Philco's regional Distributors relates solely to the wholesale distribution of Philco products, encourages and does not lessen competition, and has no adverse effect upon other manufacturers, their distributing organizations or the sale of competing products. As stated in response to paragraph 10, the arrangements between Philco and its Distributors were reasonably ancillary to Philco's lawful purpose of having its products distributed in aggressive competition with those of other manufacturers.

(b) Denied, except as stated in response to paragraph 10 and particularly subparagraph (a) thereof.

(c) The effect of the form of Retail Dealer Agreement for electronic products suggested by Philco from August through December 1954 (as described in response to paragraph 10), if such form had been accepted by all dealers handling Philco products, would have been that retailers in any region would have been required to look to the regional Philco Distributor as their source of supply if they wished to handle Philco products. Philco Distributors are at liberty to choose the Retail Dealers in their territories to whom they sell, and no retailers have been prevented from acquiring Philco products from their regional Philco Distributor except as the result of the exercise by the Distributor of his legal right to choose his

customers. The Retail Dealers who handle Philco brand appliances almost invariably handle similar appliances of competing manufacturers, and there are many thousands of dealers who handle other brands of appliances and do not choose to handle the Philco brand. The Philco distribution system affects only Philco products, does not substantially lessen competition in the sale of said products, and has no adverse competitive effect whatsoever upon other manufacturers, the distributing organizations or retailers handling their products, or the sale of their products. As stated in response to paragraph 10, the Retail Dealer Franchise forms suggested by Philco from time to time were reasonably ancillary to the lawful purpose of Philco and its Distributors to have Philco products distributed in aggressive competition with those of other manufacturers.

(d) Denied, except as stated in response to paragraph 10 and paragraphs 14(a), 14(b) and 14(c).

(e) Denied.

(f) Denied.

WHEREFORE, Philco Corporation respectfully prays that the complaint be dismissed and that final judgment be entered for it.

(2) Fear that the shorter campaign next year, with the Republican convention in San Francisco moved forward to Aug. 20 and Democratic in Chicago likely to come also in Aug. (Vol. 11:8), may kick off a rush for national and local TV time to pack in as many appearances as possible in the short space before the Nov. elections.

"At first blush," said Sen. Neuberger (D-Ore.) on the Senate floor the other day, "this [short campaign period] might seem a desirable objective. Yet I confess to the fear that it will make big money more dominant than ever in our political life. A short campaign will not reduce the sums available for politics; it will merely mean that these sums can be concentrated more decisively and effectively."

"TV is astronomically expensive," the Oregonian continued, noting that a national hookup may cost \$75,000 and asserting that in the last New York mayoralty election a leading candidate withdrew "because he confessed that soaring TV costs made a \$1,000,000 exchequer necessary to be elected." He concluded:

"I am disturbed over the total impact of TV upon our national life. Through TV, it is possible to introduce theatrical techniques into politics. When we give additional dominance to such a medium, through shortening the period of time for candidates to reach the people, I am alarmed. I wonder if a 'blitzkrieg' on TV will not shape the public mind before a less favorably financed nominee can get his message to the people by slower and less costly means..."

"Some day shorter political campaigns may well be possible and desirable, but I believe they will be premature until we have solved the urgent problem of making TV -- and perhaps other media -- equally available to candidates irrespective of their financial backing."

2 NEW STARTERS, HEARST GETS MILWAUKEE: You can add 2 more vhf starters to log of TV stations in U.S., bringing total to 427 (112 uhf). All set to begin test patterns as this was written are KBET-TV, Sacramento (Ch. 10), first vhf in the California capital, which plans debut as basic CBS outlet March 20; and KLOR, Portland, Ore. (Ch. 12), second vhf in that uhf-pioneering city, which begins testing this week end.

KBET-TV goes on the air despite appeal to U.S. Court of Appeals by McClatchy (Sacramento Bee) and friend-of-court brief about to be filed by American Newspaper Publishers Assn., charging FCC with undue discrimination against newspaper interests. New 50-kw GE station is city's 2nd TV, first having been uhf KCCC-TV (Ch. 40), which started in Sept. 1953. Owners are local business group headed by Wm. P. Wright, as pres., and John Schacht, v.p. & gen. mgr. George Kapel, ex-WGN-TV, Chicago, is sales mgr.; Roger Van Duzer, operations mgr.; Vince Williams, production mgr.; Peter K. Onnigian, chief engineer. Base hour rate is \$600. Rep is H-R Television.

KLOR becomes Portland's ABC primary March 9, reports gen. mgr. John Schile, ex-KUTV, Salt Lake City. NBC outlet is Storer's uhf KPTV (Ch. 27) and CBS's is the Oregonian-Ted Gamble group's KOIN-TV (Ch. 6). Station has 25-kw RCA transmitter. Its principal owners are Henry A. White, retired banker & shipbuilder; Julius L. Meier, dept. store executive; Wm. A. Healy, furniture manufacturer; Stephen Thompson, lumber & paper. Base rate is \$500. Rep is Hollingbery.

* * * *

Hearst Radio's \$2,000,000 purchase of WTVW, Milwaukee (Ch. 12) was approved by FCC this week, subject to any action by Court of Appeals in Gran Enterprises Co. suit to stay transfer. Theatreman L.F. Gran, holding 38.5% of stock in the ABC outlet which started operation last Oct., had offered to purchase station on same terms and conditions, then filed for Ch. 12 but was rejected by FCC (Vol. 11:6). Comr. Hen-nock dissented from sale approval, noting newspaper ownership (Milwaukee Sentinel), pointing to Gran offer, suggesting hearing should be held on local ownership, integration of ownership-management, concentration of mass media control. Comr. Bartley also dissented, noting his original opposition to merger resulting in WTVW "with particular reference to its impact on stimulating strike applicants and whether payoffs are involved." He stated: "I cannot agree with this transfer which involves a substantial profit to Milwaukee Area Telecasting resulting purely from the fact that it possesses a permit for an assigned frequency in which it has no ownership rights."

ALLOCATIONS PHILOSOPHY seems to be undergoing change at FCC. While thinking about de-intermixture (see p. 2), Commission this week issued notice of proposed rule-making which would require stations to place transmitters within 5 mi. of border of principal city to be served—unless good reason for waiver is shown.

Up to now, Commission's policy has been to let transmitters be located anywhere, as long as they comply with mileage separations specified in allocations plan. This week's action is aimed at halting "market-straddling" and construction of "area stations."

Action was on petition of WKNX-TV, Saginaw, Mich. (Ch. 57), which is seeking to keep WJRT, Flint (Ch. 12) from building at site 15-20 mi. from Saginaw. WKNX-TV asked that applications such as WJRT be held inactive pending rule-making, but Commission denied request, said it would continue to act on case-to-case basis.

Proposed rule provides that those seeking waiver of 5-mi. rule give reasons for asking waiver. In addition, they'd be required to disclose all agreements with networks regarding affiliation and their plans for studios and local programming. Proposal is Notice 55-268, Mimeo. 16546, Doc. 11297, copies obtainable from FCC or from us.

In same policy vein, Commission sent "McFarland Letter" to WSTV-TV, Steubenville, O. (Ch. 9), saying it couldn't approve move of transmitter to Pittsburgh and sale to CBS for \$3,000,000 (Vol. 10:47) without a hearing. Letter stated: "In proposing a transmitter location only 3.5 mi. from the business center of Pittsburgh, the application appears to seek to establish a station operating on a Steubenville-Wheeling channel in a manner and to a degree inconsistent with the purpose for which that channel was assigned . . ."

These moves are part of a pattern forced by Congressional pressures. Influence of Plotkin Memorandum—though it was view of only one staff member, not officially endorsed by Senate Commerce Committee — has had an obvious effect.

Personal Notes: Charles M. Underhill, ex-ABC-TV program v.p., joins TV staff of U. S. Steel, specializing on production of *U. S. Steel Hour* on ABC-TV; he replaces John Rust, who resigned to become independent TV producer . . . Wm. Thomson, formerly with Washington TV-radio attorney George O. Sutton, forms partnership, Adams & Thomson, with Albert F. Adams, ex-Ford, Bergson, Adams & Borkland, with offices at 800 National Press Bldg., phone National 8-0055 . . . Dr. Philip Eisenberg resigns as CBS research psychologist to form own research organization, Motivation Analysis Inc., 1140 Elberon Ave., Elberon, N. J. . . . Gordon Mills has resigned as DuMont Network midwest sales mgr., which has closed offices . . . Frank C. Oswald, administrative asst. to Edward Lamb and v.p. of WICU, Erie, recuperating at Toledo Hospital from severe heart attack . . . Robert F. Metzler assigned to NBC film div. as production supervisor for West Coast productions . . . Guy Runnion, ex-KABC-TV, Los Angeles, named news director of CBS-TV's new WXIX, Milwaukee . . . Gordon Moore promoted to national sales mgr., WMUR-TV, Manchester, N. H. . . . Wm. Carlier, ex-mgr. of radio WRBC, Jackson, Miss., named sales mgr. of WSLI-TV, same city . . . Ed Murphy, ex-WCAN-TV, Milwaukee & KSTM-TV, St. Louis, named operations director of upcoming WFRV-TV, Green Bay, Wis. (Ch. 5), due in April . . . Don McCune, from AM affiliate, named gen. mgr. of KFAR-TV, Fairbanks; John Miller, ex-WTPA, Harrisburg, Pa., named program director, Charles Gray chief engineer . . . Dennis Townsend, from radio affiliate, named program director, CHSJ-TV, St. John, N. B. . . . Lamont L. Thompson, ex-mgr. of CBS spot sales, San Francisco, now with network's TV spot sales in N. Y. . . . Wilbur M.

Ch. 8 CP in Des Moines is in the works, after agreement was reached this week between Cowles (KRNT) and Kingsley H. Murphy Jr. (KSO), whereby latter is to acquire 40% of grant. Cowles had obtained favorable initial decision last Aug. (Vol. 10:35). Under agreement, Cowles will contribute up to \$35,000 to buy stock options of Murphy employes. After 3½ years, Cowles has option to buy out Murphy at price to be negotiated then. Murphy counsel Benito Gaguine, of Fly, Shuebruk, Blume & Gaguine, will become a v.p. of grantee concern.

Another appeal was thrown into the court hopper this week when WJIV, Savannah, contested final decision granting Ch. 3 to WSAV. Prime contention is that WSAV had begun construction before getting CP.

Latest action in celebrated case of grantee WPRO-TV, Providence (Ch. 12) was grant of STA by FCC, permitting station to build temporary tower and begin operating. However, Commission said STA is subject to action of U. S. Court of Appeals which is to hear argument in April on merits of appeal by WNET (Ch. 16) which has protested grant. WPRO-TV management says it will go ahead and build.

In oral argument before FCC this week, Miami uhf grantee WMFL (Ch. 33) urged that Commission look into Storer's plans for promoting conversions of receivers to receive his WGBS-TV (Ch. 23). WMFL counsel Leonard Marks said that there are reports that Storer is encouraging single-channel conversions; that Storer bought WFLL-TV, Ft. Lauderdale solely to get NBC affiliation; that WMFL principals told Storer they wouldn't protest if he'd promote all-channel conversions and agree to joint use of his tower. Storer counsel John McCoy stated that WMFL's overtures were "purest kind of blackmail"; that WMFL didn't offer to pay anything for use of tower; that Storer wasn't promoting single-channel conversions or selling uhf converters; that Storer is spending \$10,000 monthly in newspaper ads to convert the 50% of Miami sets still incapable of getting uhf.

Fromm, ex-TV promotion supervisor, promoted to mgr. of adv. & promotion, NBC Spot Sales, N. Y. . . . John Kucera promoted to v.p. & director of broadcast media, Biow-Beirn-Toigo Inc. . . . J. Lingeman, ex-CBLT, Toronto named TV-radio director, J. Walter Thompson Co. Ltd. of Canada; Frank Flint remains Toronto TV-radio mgr., and Mariette Mineau heads French TV-radio, Montreal . . . Louis G. Bissell Jr. named TV-radio director, Reach, Yates & Mattoon Inc., N. Y. . . . Hal Thompson, ex-WFAA & KFJZ, named mgr. of Ft. Worth office of Free & Peters; Barney Kobres, ex-WLWA, Atlanta, recently TV-radio director of Quednau Adv., Tampa, named TV sales director, WSUN-TV, St. Petersburg; Fred H. Kenkel and Frank Stisser named v.p.'s, C. E. Hooper Inc. . . . Mann Holiner named head of Hollywood office, Ted Bates Inc., succeeding Austin Peterson, resigned, with Frank O'Connor named production mgr. . . . Eugene B. Dodson promoted to asst. mgr. of WKY-TV & WKY, Oklahoma City, in realignment of personnel following *Daily Oklahoman's* recent acquisition of WSFA-TV & WSFA, Montgomery, Ala.; Robert Olson named operations mgr. of WKY-TV, John Haberlan national sales mgr., Joseph Jerkins production supervisor.

J. M. Clifford, NBC administrative v.p., elected pres. of network's newly-acquired Kagran Corp., which controls rights to *Howdy Doody*, *Author Meets the Critics*, etc. (Vol. 11:7). Clifford later announced that Edward L. Justin, a Kagran official, would be retained in a "principal operating position."

Michigan State College's 5th annual TV Workshop for brief credit courses in TV programming, production & management, has been scheduled for Aug. 1-19.

Telecasting Notes: "TV, with its commercials, has apparently enhanced the impact value of theatre screen advertising," according to Sindlinger & Co. survey for Assn. of Theatre Advertising Companies; some 6650 interviews, testing recall, were conducted in test cities of Waterville, Me.; Fayetteville, N. C.; Bucyrus, O.; Belleville, Kan.; Bonham, Tex. It's estimated about 12,000 U. S. theatres show sponsored films, varying from spots to full-reel subjects, but a lot of this business has recently gone to TV . . . Whereas movie industry not long ago was bemoaning closedowns of many theatres, another Sindlinger survey, this one for Council of Motion Picture Organizations, puts number of active film theatres in U. S. at 19,101, up 1136 in year; of these, 4062 were drive-ins . . . Hal Roach Jr., 36, became sole owner this week, by purchase from his father, of 18-acre Hal Roach Studios in Culver City, including various features and short subjects which bring his new Hal Roach Enterprises to estimated value of \$10,000,000; Roach produces for TV *My Little Margie*, *Public Defender*, *The Erwins*, *Passport to Danger*, *Racket Squad*, and also made at his studio are *Life of Riley*, *It's a Great Life*, *You Are There*, *Amos 'n' Andy*, *So This Is Hollywood*, *Where Were You?*, *Waterfront* . . . ABC Film Syndication Inc. (Geo. T. Shupert, pres.) is now exclusive distributor of *Douglas Fairbanks Presents*, *Sheena Queen of the Jungle*, *Life Can Be Beautiful* and, with Hal Roach Jr., will produce & distribute at least 2 new series as yet untitled; current ABC properties include *Passport to Danger*, *Racket Squad*, *The Playhouse*, *John Kieran's Kaleidoscope* . . . "New Millions for Old Pix" are seen by *Variety*, reporting that General Teleradio's *Million Dollar Movie* package of 30 features, for which it paid Bank of America \$1,250,000, has grossed \$2,000,000 thus far from first-run playings (up to 14 repeats weekly for each picture) in 70 markets and "could well hit \$3,000,000" exclusive of sale to Libby, McNeil & Libby in all Canadian markets . . . TCF Television Productions is name of new 20th Century-Fox TV subsidiary just set up under Sid Rogell (Vol. 11:9); executives, headed by pres. Spyros Skouras, conferring currently with networks and agencies, have stated they're prepared to produce anything from short subjects to spectacles . . . Worthington (Tony) Miner, currently under NBC contract, producer of *The Medic* and other major TV shows, plans to film 3 new series for NBC: *Frontier*, a western; *Briefcase*, based on lawsuits, with cooperation of Calif. Bar Assn.; *Challenge*, with democracy theme, with cooperation of Fund for the Republic . . . North American rights to first showings of BBC's documentary series *War in the Air*, 15 half-hour films produced in cooperation with U.K. Air Ministry and telling story of impact of air power on world during last 20 years, have been acquired by CBC which is releasing them this month . . . Clete Roberts, who is subject of personality sketch in March 2 issue of *Fortnightly Magazine*, has formed Clete Roberts Productions Inc., 321 So. Beverly Dr., Beverly Hills, Cal., to handle own filmed *World Reports*; v.p. is attorney Joseph Brenner.

Authorized broadcasts of ball games do not constitute news in the public domain, N. Y. State Supreme Court held this week in granting injunction against Martin Fass, who allegedly used TV & radio broadcasts to compile play-by-play accounts of baseball games, which he sent by teletype of out-of-town radio stations. Complaint was brought by N. Y. Giants.

H. Leslie Atlass, CBS Chicago v.p., has filed petition in Tax Court of the U. S., Washington, challenging Internal Revenue Service demand for \$128,284 additional taxes for 1946-49. Revenue Service had rejected claims of \$121,423 losses on his Sunny Ridge Farm, also \$84,633 for entertainment, including \$42,959 for operation of yacht.

VOICE OF AMERICA's services to TV stations in foreign countries, now a sideline of the U. S. Information Agency's foreign propaganda operations, will be expanded to staff of 29 (from present 9) if Congress approves new \$1,100,000 program budget and \$160,000 personnel budget for fiscal 1955 starting next July 1. This would be part of \$18,200,000 radio budget in an over-all budget of \$88,000,000 sought this week from House Appropriations Committee by Theodore F. Streibert, USIA director.

There's no plan to operate TV stations in view of their limited scope of coverage, though Voice of America now operates 78 radio transmitters throughout the world with staff of 1617. Plan is to provide kinescopes, films and other material to the growing number of TV stations, govt.-owned or otherwise, in language areas where they would be acceptable. USIA already supplies some films, mostly newsreels, to 29 stations in 21 free world nations.

Growth of TV operations abroad, evidenced by log showing 137 stations in 35 foreign countries published in *TV Factbook No. 20* (pp. 238-242), to which more have been added since publication, impelled VOA industry advisory committee to set up TV subcommittee recently to advise on expansion into TV field. Subcommittee consisted of Howard Meighan, CBS; Chris Witting, Westinghouse stations; Jack Harris, KPRC-TV, Houston.

Expansion programs, it's planned, will be headed by a new top executive brought in from the industry. Present VOA services relating to TV are handled by Jack Gaines. Emphasis of USIA, of course, will continue to be on its vast radio broadcasting programs designed to pierce Iron Curtain, which report to Congress this week, covering July-Dec. 1954, shows are now going out in 34 languages.

* * * *

Theodore F. Streibert, director of U. S. Information Agency and onetime MBS pres., named by President Eisenhower to operations coordinating board of National Security Council, top-level policy group that succeeded old Psychological Strategy Board. Its chairman is Herbert Hoover Jr., Undersecretary of State; other members are Robert Anderson, Undersecretary of Defense; Allen Dulles, director of CIA; Harold Stassen, director of FOA; Nelson Rockefeller & Robert Cutler, special assts. to the President.

— ■ —

Alfred I. duPont Foundation, whose annual awards to TV-radio stations and commentator for outstanding performances in public interest will be presented at dinner March 25 in Washington's Mayflower Hotel, this week named to its awards committee Turner Catledge, managing editor of *New York Times*, and Dr. Susan B. Riley, pres. of American Assn. of University Women. Catledge replaces Ben McKelway, editor of *Washington Star*; Dr. Riley replaces Mrs. Oscar A. Ahlgren, pres. of General Federation of Women's Clubs. Other members: Mrs. Jessie Ball duPont, who established awards in 1942 in honor of her late husband; Dr. Hadley Cantril, director of Princeton's Office of Public Opinion Research; Dr. Francis P. Gaines, pres. of Washington & Lee U, which administers awards. O. W. Riegel is curator of Foundation.

Annual George Polk Memorial Awards for "distinguished achievements in journalism," created 8 years ago in honor of late CBS correspondent, go to commentator Eric Sevareid for his Washington radio coverage and his *American Week* on CBS-TV; NBC-TV public affairs dept., for atomic bomb documentary *Three Two One — Zero*; N. Y. municipal radio station WNYC, for distinguished community service. Awards will be presented April 7 at luncheon in New York's Roosevelt Hotel.

American Women in Radio & Television holds next national convention in Drake Hotel, Chicago, May 5-8.

Station Accounts: Good revenue producer, and an interesting & useful program besides, is *TV Classified* on WCSH-TV, Portland, Me., Mon.-thru-Fri. 3:30-3:45 p.m. & Sun. noon-12:15 p.m. At rates comparable to the local newspaper, usual type of classified and/or low-budget business messages is accepted—each set up on flip cards in special type, televised on live camera with staff announcer reading the copy as it appears and adding a commentary if time allows. Feature has been on about 5 months, carrying help wanted, positions wanted, lost & found, real estate, bank, auto, restaurant and what-have-you advertising—one ad even offering tailor-made dog collars! Says mgr. Jack S. Atwood: "Revenue-wise, it is worthwhile, besides making more potential advertisers aware of the value and effectiveness of low-budget TV advertising" . . . Alamac Knitting Mills Inc. ties in with Monsanto Chemical Co. (All detergent) and Norge washing machines to demonstrate washability of its synthetic knitted fabrics; TV-radio will be used in Aug. to back up magazine & newspaper campaign . . . Hi-V Corp. (orange juice) sponsoring alt. week *Ireland's Heritage*, folkways program produced with aid of Seton Hall U's Institute of Irish Culture, starting on WATV, Newark, March 10, Thu. 8-8:30 p.m., thru Franklin Bruck Adv., N. Y. . . . John Deere & Co. (farm implements) supplying its dealers with 27 one-min. films for local TV placement, prepared by Reid H. Ray Film Industries, St. Paul . . . Among other advertisers currently reported using or preparing to use TV: Cinch Products Inc., Los Angeles (cake mixes), thru Hixson & Jorgensen, Los Angeles; Ivano Inc., Chicago (Plumite drain cleaner), thru Ruthrauff & Ryan, Chicago; Milnot Co., Litchfield, Ill. (milk compounds), thru McCann-Erickson, Chicago; East Ohio Gas Co., sub. of Consolidated Natural Gas Co.,

Cleveland (ovens & burner units), thru Ketchum, MacLeod & Grove, Pittsburgh; Moto-Mower Co., Richmond, Ind. (power mowers), thru Clark & Bobertz, Detroit; Ideal Toy Corp., N. Y. (toys), thru Grey Adv. Co., N. Y.; Loma Linda Foods, Los Angeles (Gravy Quik instant gravy), thru Elwood J. Robinson, Los Angeles; Abbotts Dairies, Philadelphia (ice cream), thru Richard A. Foley Adv., Philadelphia; Brighton Fish Co., div. of Safeway Stores, San Francisco (Captain's Choice frozen seafood), thru Brooke, Smith, French & Dorrance, San Francisco; Carter Products, N. Y. (Bingo instant shave lather), thru Sullivan, Stauffer, Colwell & Bayles, N. Y.; Fradelis Frozen Food Corp., Los Angeles (frozen dinners), thru Mogge-Privett, Los Angeles; West Coast Airlines, Seattle, thru Miller, Mackay, Houck, Hartung Inc., Seattle; Chef Boy-Ar-Dee Foods Inc., N. Y. (spaghetti sauce), thru Young & Rubicam; Hills Bros., San Francisco (Red Can Brand coffee), thru N. W. Ayer, San Francisco; Effanbee Doll Corp., N. Y., thru Monroe Greenthal Co., N. Y.; Nu-Color Corp. of America, Los Angeles (Fabspray fabric spot remover), thru Edwards Adv., Los Angeles.

Broadcasting & Film Commission, National Council of Churches of Christ in the U.S.A., 220 Fifth Ave., N. Y. (Dr. S. Franklin Mack, exec. director) this week approved 1955 budget of \$1,405,000 for production of religious films and for TV-radio programs, up \$245,000 from 1954 budget. Newest TV program series planned will have outstanding churchmen in person-to-person interviews. About 1200 TV & radio stations carry Commission's various sustainer programs on behalf of 30 Protestant, Anglican & Eastern Orthodox communions, and Commission is considering whether to make them available for sponsorship.

TV techniques will be used to revitalize NBC Radio, whose top v.p.'s Wm. H. Fineshriber Jr. and Ted Cott both resigned within 2 weeks (Vol. 11:8-9). A new program concept, calling for 48-hour around-the-clock weekend network service of music & information, was disclosed by exec. v.p. Robert W. Sarnoff, in speech to Minneapolis Sales Executives Club, as first step in arresting what he called "the depressing downward trend of radio network revenue." He said new weekend service properly adapts network radio to age of TV, will use TV personalities and may be sold in partic. spots a la NBC-TV's highly successful *Today, Home & Tonight*. It may also use audio portions of some NBC-TV shows. "It will be a service that for the first time wipes away the artificial barrier between radio and TV, and brings the radio listener exposure to the great TV stars," he said. He cited fact that "the most popular individual radio network programs attract audiences of less than 4,000,000 homes; the top-rated TV shows reach up to 17,000,000 homes." Meanwhile, reports continued to circulate that Charles R. Denny, v.p. of NBC's o-&o stations, would take command of radio network, though NBC offered no comment. Note: Plight of radio was pointed up sharply this week when 2 big names, Edward R. Murrow and actor Edward Arnold, lost big sponsors. Ford Motor dropped its Mon.-Wed.-Fri. sponsorship of Murrow's Mon.-thru-Fri. 7:45-8 p.m. newscast on 121 CBS stations, while Hallmark Cards dropped its noted *Hall of Fame* on CBS Sun. 6:30-7 p.m., emceed by Arnold. On other side of coin, Doeskin Products, abandoning TV, will sponsor Dr. Norman Vincent Peale's religious program on NBC Radio starting April 4—first time his show has permitted commercial sponsorship in 20 years.

AT&T's new AM rates, filed with FCC this week, would permit purchase of network facilities on 8-hour-per-day basis instead of previous 16. Customer may now buy 8-hour service at \$4.50 per mile per month; up to now, cost has been \$6 for 16 hours or less. Next 3 hours after first 8 per day will cost 25¢ each; next 5 hours are 15¢ each.

"Play Marco" is no lottery, in opinion of attorneys for Paramount Pictures' KTLA, Los Angeles, whose license renewal has been held up by FCC pending study of the program (Vol. 10:52). The bingo-type program, KTLA informed Commission this week, requires public to submit nothing of value to station, sponsors or ad agency. Commission was concerned lest participants' visits to stores and making of toll phone calls constituted giving "something of value." KTLA counsel Arnold, Fortas & Porter stated that if participants give something of value to a third party—such as the price of a stamp to post office or payment to phone company for toll call—no lottery is involved. Ad agency Caples Co. said it had cleared program with local postal inspectors. Station reported that, although there have been telephone jams, there have been no complaints from official agencies such as police and fire departments, and that normal service was unaffected. Furthermore, it said, new system has eliminated jams.

"Television can sell soap, soup and cigarettes—it is our belief it can also sell salvation." Thus Rev. Dr. Louis H. Evans, of Board of National Missions of the Presbyterian Church in the U.S.A., announcing this week he has agreed to do 13-week half-hour films for commercial sponsorship this fall. Evangelist Billy Graham has also disclosed he's considering—and probably will accept—offers to appear on sponsored TV program comparable to that of Admiral-sponsored Bishop Sheen.

Rate increases: KPRC-TV, Houston, adds new Class AA hour (7-9:30 p.m. Mon.-Fri. & 6-9:30 p.m. Sat.-Sun.) at \$900, min. at \$180, Class A hour going from \$770 to \$750; KYTV, Springfield, Mo., raises base hour from \$200 to \$250, min. \$50 to \$60; WEHT, Henderson-Evansville, April raises base hour from \$200 to \$250, min. \$40 to \$50; WLOS-TV, Asheville, N. C., April 1 raises Class A min. from \$35 to \$50.

New reps: WSFA-TV, Montgomery, Ala. to Katz (from Headley-Reed); WINK-TV, Fort Myers, Fla. to McGillvra (from Weed).

Network Accounts: Fabulous success of ABC-TV's *Disneyland* and prospective competition of new Disney program, *Mickey Mouse Club*, which debuts on same network Oct. 3 (Mon.-thru-Fri. 5-6 p.m.), has sent both CBS-TV & NBC-TV scurrying to acquire their own film cartoon programs for children audience next fall. Both are currently negotiating with United Productions of America, among others, for cartoon series. UPA is one of best-known producers in animation field, having won many awards for its shows featuring "Mr. Magoo" as well as for its animated commercials. In addition to the kiddies' show, NBC-TV is also reported interested in a cartoon show depicting lives of famous contemporary artists . . . Chesterfields to sponsor *Mr. Citizen* as replacement for *Stu Erwin Show* on ABC-TV starting April 20, Wed. 8:30-9 p.m., thru Cunningham & Walsh . . . Camels to become co-sponsor of filmed *Phil Silvers Show* due on CBS-TV next fall in undetermined time period, thru Wm. Esty Co. . . GE, for its Slumber Cover electric blanket, buys 8 partic. on NBC-TV's *Today* starting May 4, thru Young & Rubicam; Armour buys 4 partic. on *Home* starting May 23, thru Henri, Hurst & McDonald, Chicago . . . Old Dutch Cleanser buys twice-weekly partic. for 13 weeks on *Panorama Pacific*, CBS-TV's Mon.-thru-Fri. 7-9 a.m. show on Pacific network, thru Weiss & Geller, Chicago; Lorraine Burton Salad Dressing once-weekly partic. for 13 weeks, thru Howard M. Irwin & Assoc., Los Angeles; Kendall Co. (Blue Jay corn remedies) 12 partic. thru Leo Burnett Co., Chicago; Pioneer Rubber Co. (Neoprene household gloves), 10 partic. thru Carr Liggett Adv., Detroit . . . NBC-TV extends *Pinky Lee Show* to 6 days a week starting March 5, adding Sat. 10-10:30 a.m. period to its Mon.-thru-Fri. 5-5:30 p.m. schedule; it replaces *Happy Felton's Spotlight Gang* on Sat. . . Kent cigarettes to sponsor *Appointment with Adventure* on CBS-TV starting April 3, Sun. 10-10:30 p.m., thru Young & Rubicam.

Parlay whereby owners of WEMP, Milwaukee, acquire facilities of Lou Poller's WCAN (5-kw, 1250 kc) for \$250,000, while selling their 250-watt, 1340-kc plant for \$200,000, received FCC approval this week. Buying old WEMP facilities, for which it will get new call letters, is Foster & Assoc. Inc., owned by Gordon McLendon family of Dallas, vitamin-chemical mfr. James H. Foster, and C. W. Weaver—latter to be mgr. Also approved this week was \$70,000 sale of KMBY, Monterey, Cal. (250-watts, 1240 kc, CBS) to Frederick A. Gwynn, required by terms of merger whereby KSBW-TV absorbed shared-time KMBY-TV and retained radio KSBW (Vol. 11:5).

Pleading for reversal of TV-radio ban in House of Representatives imposed by Speaker Rayburn (D-Tex.), 2 Republican Congressmen this week asked Rules Committee to adopt H. Res. 99 which would permit House committees to decide individually on whether to permit TV & radio at hearings, as Senate committees now do. Appearing in favor were Rep. Bronson (R-Ind.) and author, Rep. Meader (R-Mich.). In letter to Rules Committee Chairman Smith (D-Va.), NARTB pres. Harold Fellows urged passage of measure—but Committee members appeared cool to any move to overturn Rayburn's ruling.

New TV audience survey covering 140 medium & small markets (163 cities) for which no current TV data is now available, was announced this week by American Research Bureau, National Press Bldg., Washington. "Abilene-to-Zanesville" study, to be released annually beginning late this month, is designed to provide information on: (1) percentage of homes having TV, (2) percentage able to receive each available vhf & uhf station, and frequency of viewing, (3) stations viewed most in each market daytime and evening.

New House subcommittee on transportation & communications under Rep. Harris (D-Ark.), named this week by Commerce Committee Chairman Priest (D-Tenn.), is preparing to look into several TV problems, but plans no big "investigations." Harris told us his 11-man group hopes to hold hearings on bills introduced by himself and Rep. Hinshaw to limit height of TV towers (H. J. Res. 138 & 139, see Vol. 11:4, 6). Though subcommittee hasn't yet determined its course, Harris said he personally feels it should take another look at Communications Act, that there are indications "some sections need revising"—particularly the "protest" section, subject of complaints by FCC and broadcasters. Hinshaw's subscription-TV bill (HR-524) is pending before committee, but Harris said there are no plans to take it up, nor does his subcommittee plan to look into uhf situation while Senate Commerce Committee is investigating it. He said he was "very much interested in the spectrum problem," and subcommittee March 10 begins consideration of possible allocations conflicts between military radio use and civilian air navigation aids. Other subcommittee members are Democrats Williams (Mass.), Mack (Ill.), Dollinger (N. Y.), Rogers (Tex.), Flynt (Ga.); Republicans Wolverton (N. J.), Hinshaw (Cal.), O'Hara (Minn.), Hale (Me.), Dolliver (Ia.).

WTAP, Parkersburg, W. Va. (Ch. 15) has been sold for \$124,609 to Zanesville Publishing Co., majority owner of WHIZ-TV, Zanesville, O. (Ch. 18), by Frank Baer-Howard Chernoff group, subject to FCC approval. In application filed at FCC, Zanesville publisher Clay Littick (*Zanesville Times-Recorder* and *Signal*) reveals WHIZ-TV operated in black "4 out of the first 7 months of [fiscal] 1954-55," but WTAP balance sheet shows deficit of \$157,542 as of Dec. 31, 1954, of which \$128,088 was incurred in 1954. WTAP lists \$252,054 in total assets against liabilities of \$334,595. Zanesville Publishing Co., which owns 63% of WHIZ-TV, did not file WHIZ-TV balance sheet, but revealed that its TV losses put entire publishing venture into red in 1954. Station went on air in May 1953 and by end of year publishing company's share of the loss amounted to \$39,299. For entire year 1954, company lost \$74,368 on TV station—but for last half of 1954, its loss from TV was only \$5982. "Prospects are that this amount will be reduced by the second 6 months" of fiscal year, said Littick, pointing to 4 months of profitable operation.

Long anticipated theatre telecast of a legitimate stage attraction now seems close to reality with the booking of 35 theatres for Broadway's annual *ANTA Album* March 28. Closed-circuit telecast will be joint benefit for ANTA (American National Theatre & Academy) and CARE, consisting of revue featuring theatre's top stars. Another novel theatre-TV presentation still in exploration stage is special benefit show sponsored by Jesuit order, possibly featuring Mario Lanza, to raise funds for the more than 100 Jesuit colleges and prep schools in U. S.

W. A. Sawyer's Northwest Radio & Television School, which started in Portland, Ore. and now operates schools in Chicago and at former ABC studios in Los Angeles, opens Washington school May 1 in 1627 K St. N.W. studios being vacated by WWDC. Resident registrar is Harry R. Shank, and training will include script writing, announcing, set design, music librarians, camera assistants, projectionists, radio operators, TV-radio servicing. It will also operate placement service for graduates.

Former boxing greats Jack Dempsey, Jack Sharkey and Luis Firpo, as "friends of the court," have joined appeal by ex-fighter Al Ettore of Philadelphia district court ruling that showing of old fight films does not invade fighter's privacy (Vol. 10:49). Defendants in suit are sponsor Chesebrough Mfg. Co. (Vaseline) and WPTZ, Philadelphia. Sharkey also filed separate suit against Chesebrough in N. Y. Federal court.

Color Trends & Briefs: A single color standard for all European countries is one topic of discussion for March 21-April 6 international parley in Brussels. Though each country went its own way in black-&-white, tremendously complicating border reception and exchange of programs, members of CCIR study group 11 have agreed to talk about single color standard for operations in Band 4—above 470 mc. A second topic is exchange of programs in black-&-white, covering methods of transferring programs from one system to another.

U. S. is sending 3 representatives who will participate largely on an advisory basis on color, because our color standards have been fixed. CCIR study group 1, on transmitters, will meet at same time. U. S. participants will be Charles Hirsch, Hazeltine, heading group; John D. Coleman, RCA; Matthew Jones, State Dept. telecommunications attache at Paris embassy.

* * * * *

Color TV tape, demonstrated in Hollywood last week by Bing Crosby Enterprises (25% CBS-owned), will be commercially available in about 1½ years, according to exec. director Frank C. Healey. A 4-min. recording of *The Women* was shown, taken from KRCA's telecast. Crosby officials stated that system demonstrated had already been superseded by new system on which experiments were to start this week. Healey said BCE will shortly have equipment capable of recording 16-min. program on 15-in. reel. He estimated that tape stock for hour program would run \$300-\$400 vs. about \$4000 for color film stock.

"There is still a large variance in the estimates on the probable production in 1955 of color TV sets, which use a considerably greater number of capacitors and resistors than black and white sets. It is believed, however, that there will be a steady increase during the year in the production of color receivers. Thus, while information on hand appears to indicate that there will be a decline of roughly 10% in the production of all types of TV sets in 1955, the increasing percentage of color sets should enable your company to maintain or even possibly increase its sales of components to the TV industry."—From 1954 annual report, Aerovox Corp.

Honest-to-goodness color spectacular, in anyone's book, will be colorcast of a A-bomb blast from Nevada, to be carried by NBC-TV during week of April 3-10. It's understood NBC-TV will originate other color events from site during week.

Novel color receiver, employing 3 tubes and dichroic mirrors, was developed by RCA's A. V. Bedford, recently granted patent for it. Set employs 2 tubes of same size for red and green images, but smaller tube with magnifying lens is used for blue image.

New color dot-bar generator, for adjusting convergence and linearity on both 21-in. and 15-in. sets, is being offered by RCA at \$147.50. Also offered, without charge, is kit for converting earlier generators for 15-in. sets so they may be used with 21-in. receivers.

March 7 week network color schedules: NBC-TV—March 7, *Peter Pan*, 7:30-9:30 p.m.; March 9, *Home*, aquarium show, 11:03-11:11 a.m.; March 9, *Norby*, 7-7:30 p.m.; March 12, *Max Liebman Presents*, "Connecticut Yankee," 9-10:30 p.m.

■

Canadian Assn. of Radio & TV Broadcasters holds 30th annual convention in Quebec's Chateau Frontenac, March 21-23. Among speakers: Thomas F. O'Neil, MBS pres.; John Karol, CBS radio sales v.p., latter speaking on "Radio's Resurgence."

NBC gross income was \$200,423,000 in 1954, up from \$176,052,000 in 1953 and representing 21.3% of RCA's total income of \$940,950,000 (Vol. 11:9).

MIAMIS SECOND VHF, like St. Louis' and Pittsburgh's, looks like it will be an educational. New Ch. 2 WTHS-TV is expected to have old WTVJ Ch. 4 transmitter & antenna converted by end of March and to begin test patterns first week in April, reports Vernon Bronson, asst. director, Dept. of Radio & TV Education, Dade County Board of Public Instruction. However, programming will be developed "very, very slowly," he states, and won't go full scale until station finds "kind of educational program which will supply needs and service which cannot be supplied by the commercial broadcasters." Staff hasn't yet been announced. Granted Nov. 12, 1953, WTHS-TV was first educational CP to be questioned by FCC for lagging, then got 6-month extension (Vol. 10:41).

RCA shipped 12½-kw amplifier March 3 to WFAM-TV, Lafayette, Ind. (Ch. 59); on same day 25-kw amplifier went to KYTV, Springfield, Mo. (Ch. 3). GE shipped 35-kw amplifier this week to WRBL-TV, Columbus, Ga. (Ch. 4), and DuMont shipped 2-kw standby transmitter March 1 to WSPD-TV, Toledo (Ch. 13).

* * * * *

In our continuing survey of upcoming new stations, these are latest reports received from principals:

WFRV-TV, Green Bay, Wis. (Ch. 5), keeping to April 15 test pattern target, now hopes to begin May 1 as ABC & DuMont outlet, writes Don C. Wirth, v.p.-gen. mgr. It has new ownership setup following merger whereby owners of off-air WNAM-TV, Neenah (Ch. 42) get control (Vol. 11:9). RCA 5-bay antenna arrived this week and about mid-March will be installed on 463-ft. tower of *Green Bay Press-Gazette's* defunct WJPG-FM on Scray's Hill next to WBAY-TV (Ch. 2). DuMont 25-kw transmitter, now being checked out at factory, is due about April 1. Neenah studios of WNAM-TV will be used to supplement Green Bay facilities. Base hour will be \$300. Rep will be Headley-Reed.

WTVS, Detroit (Ch. 56, educational), has 500-ft. Stainless tower ready, plans to install 5-bay GE antenna early in March, reports exec. secy. Wm. E. Stirton, of Detroit Educational Television Foundation, which comprises 18 local organizations. Antenna and 12-kw GE transmitter are on hand, but "perhaps early next summer" is only answer as to target date. It will have studios at WDTR-FM, as well as at Wayne U and U of Detroit. Operating funds will come from fees paid by member organizations for time on air.

KFJI-TV, Klamath Falls, Ore. (Ch. 2) expects to start in late summer or early fall, reports mgr. Alan K. Abner for owner W. D. Miller. It has ordered 3-bay GE batwing antenna, already has 5-kw GE transmitter. Klamath Falls (pop. approx. 16,000) is about 55 mi. east of Medford's KBES-TV (Ch. 5). Rep will be W. S. Grant.

WIPR-TV, San Juan, Puerto Rico (Ch. 6, educational), granted Puerto Rico's Dept. of Education Feb. 2, hasn't ordered equipment yet, but plans Jan. 1956 start, according to Mariano Villaronga, Secretary of Education.

■

Status of FM spectrum was touched on by FCC Comr. Robert E. Lee in speech March 5 over radio WGMS, Washington, in conjunction with hi-fi fair. He said there's "no immediate danger" that other services will get FM frequencies, but warned: "We cannot indefinitely permit valuable frequency space to lay fallow, and the day may come when the public interest might conceivably require the consideration of some adjustment in the FM band." On other hand, he said, declining network revenues may induce AM operators to "take another look at the economics of FM," and decide that FM might be more attractive than maintaining "a multiple tower AM array tying up many acres of expensive, heavily taxed suburban real estate." National Assn. of Manufacturers recently petitioned FCC to let industry use unoccupied FM channels (Vol. 11:6).

OUTPUT, SALES & INVENTORY IN BALANCE: There's a heartening balance to preliminary TV figures for the first 2 months of 1955, which show retail sales roughly equal to the 1,350,000 sets produced. With sales and production thus "going steady," the inventories at all levels haven't risen above the 2,000,000 at start of year. The inventory situation is perhaps most encouraging aspect of a generally bright trade picture, in view of earlier warnings of an inventory buildup (Vol. 10:49-50, 11:4).

TV production totaled 176,887 in week ended Feb. 25, compared to 176,030 in preceding week and 171,434 in week ended Feb. 11. According to RETMA statistics, production in each of the 4 weeks of Feb. did not vary by more than 5000 units.

Radio production totaled 275,648 (149,023 auto), compared to 271,942 units week ended Feb. 18 and 261,827 week before. Radio production in Feb. was 1,070,000, against 770,000 in Feb. 1954. Two-month output was 3,000,000 vs. 1,640,000 in 1954.

RCA's PROGRESS IN COLOR TUBE PRODUCTION: Frankly soliciting color tube customers, RCA has been laying its cards on the table in series of 15 sessions at Lancaster, Pa. tube plant during last 3 weeks. Virtually all major set manufacturers have sent delegations and, though they're tremendously impressed by tube production progress, it's obvious that none is yet ready to make heavy commitments on tube purchases.

Story RCA is telling is this: Quality control has so reduced rejection rate that 7-8 out of every 10 tubes are good -- very close to black-&-white rate. Given even modest volume -- 250,000 or so a year -- RCA can make money at \$100 per tube and aim for cut in price before long. With present facilities, RCA could produce around 5000 tubes a month; this is much greater than was expected, thanks to the remarkable improvement in shrinkage. Goal for third quarter is a production rate of some 250,000 annually -- assuming there's demand for that many.

Part of RCA's basic pitch is to convince industry that 21-in. round metal-cone tube is "it" for the visible future; that rectangular may come eventually but isn't ready now. Among points made by RCA is that metal-cone tube provides its own shield from earth's magnetic field, whereas all-glass rectangulars need to add a metal shield. In addition, they say, rectangulars don't provide same savings in cabinet that they do for black-&-white sets, because of the magnets or coils needed around face of tube to control beams.

Along with report on tube progress, RCA engineers filled manufacturers in on improvements and simplification of components such as deflection yokes -- with price of these dropped as much as 50%.

Though delighted with cut of tube price from \$175 to \$100 a couple months ago (Vol. 11:1) and impressed with current production progress, set makers are still very cautious about color. Westinghouse pres. Gwilym Price reiterated opinion of many this week when he said mass market won't come until price drops to about \$500 -- and that he expects this won't happen until 1956-1957.

Emerson v.p. Dorman Israel said RCA showed "one of the best color pictures I've ever seen." He said that "RCA has an excellent engineering story," but he added that price and quality of the tube and its associated components are "only one factor" determining whether manufacturers will go into color heavily.

DuMont receiver mfg. mgr. Paul Eshleman stated: "The reduced shrinkage is amazing. From RCA's standpoint, if it can get any volume production -- say, some 300,000-400,000 units -- I wouldn't be surprised to see the price of the tube come down from \$100 to \$60. That could mean a saving of as much as \$120 in the manufacturing cost of the sets, but I don't see the set itself down yet."

CBS-Columbia pres. Seymour Mintz said: "\$100 is still too high a price for the picture tube to enable us to hit a production schedule for a mass market" and he added that "CBS-Columbia still has color sets to sell."

RCA itself has just about completed run of 3-4000 sets using 38-tube chassis

and adheres to originally stated plans to introduce the 28-tube "simplified chassis" set next quarter. Rate of production and price of latter have not been indicated. RCA officials say most of the 38-tube sets have been sold.

As for future prospects, RCA firmly believes color TV will take hold -- perhaps first as a "Cadillac class" item, then "sweeping the country." As a spokesman put it, "The industry is now in the Valley of Indecision."

PHILCO REPLY TO GOVT.—(Cont. from p. 1): Philco entered a sweeping denial of all the charges, contending that suit presents "a new and dangerous challenge to those manufacturers who are endeavoring to preserve the system of independent distributors. This was a reference to fact that Philco's 130 independent distributors were made "co-conspirators" in suit, while its 4 factory branches in New York, Chicago, Los Angeles & Philadelphia were exempted. Philco pres. James H. Carmine had previously implied that if Justice suit were successful, company might be forced into widespread factory distributorships operating directly under its control.

Philco's reply hit hard at charge of restricting competition, which is core of govt. suit. Far from restricting competition, Philco says its distribution system "stimulates competition." Rather than being illegal, it contends the agreements are "entirely proper and lawful, are fully justified and necessary to Philco's purpose of distributing its products in vigorous competition with numerous other manufacturers." Philco's competitors, the answer said, "include giant concerns, each having resources many times as large as Philco."

On territorial exclusivity, Philco said its distributors "are not equipped to perform specialized wholesale functions except in their own territories, and are not natural competitors of each other. Within their territories Philco distributors encounter aggressive competition from both distributors, manufacturers' subsidiaries and factory branches handling competing nationally advertised brands of home appliances at the wholesale level and from manufacturers who sell private brands to large retailers, chains and mail order houses."

Proper selection of retailers who can carry out all obligations to consumers is vitally important to any manufacturer, said Philco, and sales by untrained and unqualified dealers are harmful to the public and damaging to company's reputation.

"Modern home appliances require skilled servicing and, in most cases, both expert installation and instructions to the consumer," reply said. "The consumer expects the manufacturer to stand behind its products and to provide for their installation and service. The consumer regards the retailer from whom he purchases as the manufacturer's representative, and failure of the retailer to afford proper installation and effective service or to fulfill warranty obligations causes consumer dissatisfaction with the manufacturer and all its products."

In obvious reference to RCA, company said "one of Philco's largest competitors has sought to meet this problem by performing the installation, servicing & warranty obligations through a nationwide subsidiary." In this connection, it's interesting to note that Philco this week started own factory service -- in Chicago only. Spokesman said company has no intention of going into factory service nationally, a la RCA.

On controlling distributors' inventory, Philco said purpose of cutting off shipments after they reach certain level "is to match inventory to sales; the system does not restrict the sales volume of any distributor or pertain in any way to detection of violations of the distributors' agreements or to price cutting."

DuMont's "Decorator Ensemble" series, to be offered as spring line, consists of 4 basic 21-in. models with optional step-tables and swivel or caster bases. Norwood, table model with matching step-table & metal cabinet, lists at \$180 in cherry, \$200 in mahogany or blonde (step-table \$50 extra); Danver, table model \$210 in mahogany, \$220 blonde (step-table \$50 extra); Trevor, table model \$220 in walnut, \$230 mahogany, \$240 blonde (step-table or bases \$20 & \$50 extra); Lancaster, open-face console \$330 in mahogany, \$340 blonde (step-table or bases \$20 & \$50 extra).

Another price increase this week—this time by Crosley, which hiked its widely publicized 17-in. "Super V" table model from \$130 to \$140 in mahogany, \$140 to \$150 in blonde. It was third company in 4 weeks to hike prices, Philco and Hoffman having previously raised prices on several models by \$10-\$20 (Vol. 11:7-8).

Excise tax collections for TV-radio-phonograph industries totaled \$54,354,000 in period of July 1-Nov. 30, 1954, compared to \$55,748,000 in corresponding period of preceding year, reports Internal Revenue Service. Nov. collections were \$32,120,000 vs. \$33,128,000 in Nov. 1953.

Topics & Trends of TV Trade: Westinghouse's purchase of its N. Y. distributor Times Appliance Co. this week illustrates shift to factory-owned distributorships in major markets, a trend which has increased in last year or so and which figures to intensify even further rest of 1955 as some manufacturers seek tighter control under more competitive circumstances.

Admiral has been most active in replacing independent distributors with factory branches, adding 8 such branches in 1954 and one (Pittsburgh) thus far this year, for a current total of 20. Company recently set up subsidiary, Admiral Distributors Corp., to conduct its branch operations (Vol. 11:6). CBS-Columbia has replaced independent distributors with 5 factory branches. Emerson and Hoffman Electronics are among several companies which have been active in setting up branches recently.

RCA, Westinghouse & GE have wholly-owned nationwide distributing subsidiaries, supplemented by independent distributors. Philco and Motorola each has 4 factory branches, Zenith 3.

Main reasons for replacements of independent distributor are lack of sufficient capital to carry major lines and low profit margins as well as desire of manufacturer to control merchandise.

One manufacturer, anxious to preserve system of independent distributorships, tells us one solution to problem of undercapitalization might be smaller territories assigned to each distributor. All things being equal, he said he would prefer an independent distributor to a factory branch because the independent distributor is a businessman putting his own money into the operation and is anxious to protect that investment, plus fact that he's usually a local resident with some civic influence in the community he serves.

* * * *

Sparton's continuance in TV-radio business is in doubt, following union rejection this week of company's proposal to cut wages average of 18¢ an hour to reduce production costs. Sparks-Withington pres. John J. Smith, in letter to employes, presented 3 alternatives if employes rejected pay cut: (1) Get out of TV business. (2) Move plant from Jackson, Mich. to area where labor costs are lower. (3) Contract with other manufacturers to produce sets under Sparton brand. Charts attached to letters indicated Sparton workers are paid average of \$2.02 an hour, or 29¢ higher than industry average of \$1.73. Rejection of pay cut by members of Local 666, United Automobile Workers (CIO) was unanimous. Its contract with company expires in June.

All-channel receiver tax exemption bill (Vol. 11:7-8) will be considered by House Ways & Means Committee in "a month or 6 weeks," its author Rep. Ikard (D-Tex.) predicts. He says he's pleased with the manifestations of interest from the public so far, and he hopes to get enough background information from Treasury and other sources to "start getting it off the ground in the next week or so." His bill (HR-7040) is completely separate from current measure pending in Senate to extend some excise taxes (not including TV-radio-appliances) for another year.

Coin-operated 27-in. console will be introduced by Sentinel about May 1, for distribution through coin-machine outlets. To be produced in Los Angeles plant space recently acquired by Sentinel, set will give 15-min. of TV for 25¢, will be priced between \$1300 & \$1500, according to Art Welch, sales promotion mgr.

Shipments of radios to dealers, exclusive of auto radios, totaled 6,187,503 in 1954, compared to 7,243,073 in 1953, according to RETMA state-by-state report released this week (county-by-county tables available to members on request to RETMA). Dec. shipments were 1,059,166, compared to 711,554 in Nov.

Trade Personals: Merle S. Wick, CBS-Columbia financial administrator, appointed administrative v.p.; Will James, director of operations, named v.p. in charge of operations; Robert K. Hartman, director of govt. operations, promoted to v.p. in charge of govt. & industrial div. . . . Irving Sarnoff, Bruno-N. Y., and Mrs. Sarnoff leave March 15 for Tokyo, where they will visit son Pfc. Arthur Sarnoff; they will make tour of Far East, including Hong Kong, Bangkok, Honolulu . . . Louis G. Pacent Jr., Emerson works mgr., elected manufacturing v.p. . . . Gordon G. Hoit, Stromberg-Carlson exec. v.p., was chairman of American Management Assn.'s special electronic conference this week in N. Y. . . . Joe F. Dolland resigns as gen. mgr. of Magnavox TV-radio-phono plant at Greenville, Tenn. to become manufacturing v.p. of O. A. Sutton Corp., Wichita (air conditioners); W. T. Winter, ex-CBS-Columbia, named sales mgr. . . . Arthur G. Connolly, senior partner in Wilmington, Del. law firm of Connolly, Cooch & Bove and specialist in electronics patents, elected a director of Sprague Electric, which he has served as patent counsel since 1943 . . . T. J. Newcomb, replaced recently as Westinghouse TV-radio gen. mgr. by Edward J. Kelly, remains in div. as asst. to Kelly . . . Wm. S. Peters promoted to mgr. of Raytheon transistor sales, Chicago . . . W. E. Laswell, from Texas office, named Motorola southeastern regional sales mgr., Atlanta, replacing Dale Andrew, resigned . . . Lee Chism named Westinghouse TV-radio mgr. for Denver district, succeeding John Adams, transferred to Los Angeles as district mgr. . . . Edward L. Meehan, ex-Zenith, named CBS-Columbia midwest regional service mgr., Chicago; John Lewis, ex-DuMont, named southeastern service mgr., Atlanta . . . Paul H. Little, ex-Emerson Chicago, named sales promotion mgr., Waters Conley Co. (phonographs) . . . Wm. K. Headley, ex-Highway Safety Appliances Inc., St. Paul, named sales mgr., Spencer-Kennedy Labs Inc., Cambridge, Mass. . . . Ray E. Horner, ex-Air Force officer, joins GE as central district sales mgr. for light military electronic equipment . . . Alexander M. Poniatoff, pres. of Ampex Corp., Redwood City, Cal. (tape recording equipment) elected chairman, T. Kevin Mallen vice-chairman, G. I. Long pres. . . . John C. FitzMaurice named sales mgr. of GE tube dept. in Brooklyn-Long Island area, Theodore M. Weicker sales mgr. for Tucson-Salt Lake Phoenix-San Diego region . . . Charles Kriss, ex-RCA, Sylvania & Thomas Electronics, forms Kriss Electronics Inc., 191 Oraton St., Newark, to produce new & rebuilt CR tubes . . . Miss Marjorie E. Lenox, ex-Sylvania International, named asst. to Ernest A. Marx, director of DuMont international div. . . . John H. Pflieger, RCA mgr. of facilities accounting, corporate staff, elected vice chairman, facilities task committee, National Security Industrial Assn.

DISTRIBUTOR NOTES: Admiral appoints Southern States Distributors Inc., 1065 NW 71st St., Miami (Lawrence E. Murphy, pres.) . . . Stromberg-Carlson: Graybar, 60 Florida Ave., NE, Washington (F. F. Jaspersen, mgr.) . . . RCA Victor Distributing Corp., Buffalo, appoints Wm. J. Walsh appliance sales mgr. . . . Pittsburgh Products Tristate Co., Pittsburgh, appoints Jack Miller district mgr. for Crosley products . . . Kierulff & Co., Los Angeles (Motorola) promotes Arthur Eddy to radio merchandise mgr. . . . Canadian Westinghouse appoints F. Thomson consumer products sales mgr. of Hamilton, Ont. branch . . . Allied Appliances, Denver (Motorola) moves to 4425 E. 46th Ave. . . . Cooper Distributing Corp., Newark (Motorola) appoints Robert Barron sales mgr., replacing Frank Millman, resigned.

Raymond W. Durst Jr., 21, only son of the pres. of Hallicrafters Co., who in 1953 had to leave Notre Dame engineering college as a junior due to illness, died in Chicago's Passavant Hospital Feb. 27.

Electronics Reports: Licensing of industrial microwave, moving it out of developmental class, is current objective of FCC, which has called industry conference for March 14. During last 2 years, RETMA and other groups have been collecting data on microwave equipment and systems to aid Commission in formulating new rules (Vol. 10:41).

Growth of microwave has been orderly, despite "developmental" label, but demand is growing at such a rate that Commission believes specific rules are required. Oil and gas pipelines are heaviest users of microwaves, having some 75% of mileage, but other industries are moving in, finding large savings possible. So far, only intercity microwave is authorized, but such organizations as department stores are seeking intracity systems—for branch store credit checking etc.

Oliver J. Greenway, operations v.p. and director of International Resistance Co., Philadelphia, has been sworn in as consultant to Electronics Div. of Commerce Dept.'s Business & Defense Services Administration, headed by Donald S. Parris. His major assignment will be to confer with electronics manufacturers on industrial defense problems, "including steps which may be taken by manufacturers to protect their facilities against attack, sabotage or natural disaster and to provide for continuity of production and management under emergency conditions" (Vol. 11:1).

The 3 military services had unobligated balance Jan. 1 of more than \$1 billion on hand for aviation electronics procurement and an unexpended balance of \$2.38 billion, reports Feb. 28 *Aviation Week*. Obligations for aviation electronics and communication equipment July 1-Dec. 31, 1954 totaled \$420,263,000 for the 3 services; expenditures for same period totaled \$318,724,000. In addition, the 3 services had unobligated balance Jan. 1 of \$811,522,000, unexpended balance of \$1.84 billion, for guided missile procurement. Guided missile obligations during last 6 months of 1954 totaled \$411,006,000, expenditures \$232,447,000.

Thor Corp., big Chicago washing machine manufacturer, plans bigger plunge in non-consumer electronics, it was revealed this week by chairman Arnold H. Maremont following agreement whereby Bendix Home Appliances takes over production of automatic washers for Thor, effective March 31. Currently producing electronic relays and controls, Thor will use capital derived from sale of its automatic washer plant at Cicero, Ill. to expand in electronics. Buyer of plant has not been disclosed.

Hupp Corp., Detroit, announced it is negotiating for purchase of electronics business of Brown-Allen Chemicals Inc., parent company of Standard Piezo Corp., Carlisle, Pa. (crystals) and its subsidiaries Standard Transistor Corp. and Allied Mfg. Corp., West New York, N. J. (TV components). Brown-Allen's electronics properties are said to include "certain arrangements with Siemens & Halske," large German electrical & electronics firm.

Associated Missile Products Corp. is new Pomona, Cal. firm specializing in development & production of guided missile ground-handling and check-out equipment. Raymond Crisp is pres.-gen. mgr.; Dr. Joseph Tampico, v.p.-research & development; Samuel H. Depew, v.p.-customer relations; Earl R. Skaggs, v.p.-products engineering; Robert L. Hull, secy.-treas.

Melvin L. Jackson, ex-Airborne Instruments Laboratory, Mineola, L. I., named v.p., C.G.S. Laboratories Inc., Stanford, Conn. (components).

Chief Signal Officer Maj. Gen. George I. Back will address luncheon meeting of RETMA's electronics industry committee at New York's Roosevelt Hotel, March 20.

Do's and Dont's in management-union negotiations, submitted by TV-radio management consultant Richard P. Doherty in speech before American Management Assn. executive conference in Los Angeles recently: (1) Avoid negotiating against the clock. (2) Be wary of horse trading. (3) Beware of clauses which provide for "mutual" decisions or determinations. (4) Don't think only of settling immediate contract. (5) Don't treat each provision as separate document. (6) Don't negotiate a "blind" contract. (7) Don't permit union to introduce individual grievances during general contract negotiations. (8) Don't get perturbed by union contentions of "inequities." (9) Don't be alarmed by table pounding and strong language. (10) Don't underestimate significance of non-wage provisions. (11) Don't lack competent advisors. (12) Don't rely on oral agreements. (13) Don't make agreements with a negotiator who lacks binding authority. (14) Don't be afraid of a strike. (15) Don't forget your employes while negotiating a contract.

Dallas oilman H. L. Hunt's Facts Forum Inc. now has 4 TV-radio discussion shows on the air, is planning a fifth titled *The Infil-traitors*, and spends about \$4,000,000 a year on them—mostly for production costs, since more than \$3,000,000 worth of time is given free by stations with some 60 local commercial sponsors. Reputed richest Texas oil millionaire of them all, Hunt and his activities are subject of article headed "Where One Texan's Money Goes" in recent *U. S. News & World Report*. It discloses that weekly *Facts Forum* on film (30-min.) and sound recordings (15-min.) go to 80 TV & 265 radio stations; weekly 30-min. *State of The Nation*, 400 MBS radio stations; *Answers for Americans*, 50 TV & 138 radio stations; *Reporters' Roundup*, 350 MBS radio stations.

RETMA publishes 12-p. booklet, *Your Television Antenna System*, explaining in laymen's language need for antenna, description of basic types of antennas, installation practices and reasons for periodic inspections. Booklet is available free from TV dealers, service technicians & local Better Business Bureaus.

Illustrating crackdown on TV-radio repair "gyps," Brooklyn couple who operated Sutter TV Service Station were sentenced to 6 months in jail this week after being convicted of bilking customers of more than \$350,000 over 5-year period.

Nobel Prize for Dr. Lee deForest is being urged by Hugo Gernsback, the publisher, who is gathering testimonials from scientists, engineers, bodies of learning, industrial leaders and others for forwarding to the Nobel Fund, Stockholm.

New community operations div., headed by Wm. H. Miller, has been established by Jerrold Electronics Corp. to manage community antenna systems in which it holds interests.

Dr. R. Bowling Barnes, pres. of Olympic Development Co., will receive first \$1000 Beckman Award in Chemical Instrumentation at American Chemical Society meeting in Netherland Plaza Hotel, Cincinnati, April 2.

Maj. Gen. James O'Connell nominated as Chief Signal Officer of the Army to succeed Maj. Gen. George I. Back, whose term expires April 30.

Bonnell W. Clark, 71, retired Westinghouse v.p. in charge of sales, ex-pres. of National Electrical Manufacturers Assn. and of National Assn. of Electrical Distributors, died March 3 in Stamford, Conn. Surviving are his wife and 3 daughters.

Mervyn M. Millikan, 57, v.p. of Electronics Corp. of America, died in Cambridge, Mass. March 4 of a heart attack.

Financial & Trade Notes: DuMont Laboratories Inc. reports 1954 gross income of \$92,843,000 compared to \$91,450,727 in 1953. Net earnings were \$7,597,000, equal to \$3.17 per common share; this figure, however, includes \$6,727,000 profit after capital gains tax on recent \$9,750,000 sale of WDTV, Pittsburgh (now KDKA-TV), to Westinghouse (Vol. 10:49 & 11:2). Earnings from operations for 1954 were \$870,000, or 32¢ per common share. In 1953, net income was \$1,544,362, or 60¢ a share.

Arvin earned \$2,231,198 (\$2.50 per share) after taxes of \$2,399,395 on sales of \$53,372,757 in 1954, compared to \$2,255,000 (\$2.53) after \$2,437,146 on \$73,395,197 in 1953. TV-radio div. accounted for 29% of total income in 1954, compared to 34% in 1953. Chairman-pres. Glenn W. Thompson commented in annual report that 1955 will prove "a most satisfactory year," adding that growing number of 2-set TV homes and increasing number of stations are creating new sales opportunities. He also stated demand for popular-priced radios continues "surprisingly strong."

Aerovox Corp. consolidated sales were \$23,017,000 in 1954 compared to \$27,065,000 in 1953, while net profit after taxes was \$552,000 (77¢) after write-off of losses suffered at New Bedford plants during Hurricane Carol, compared to \$1,074,600 (\$1.54) in 1953. Damage claims have been partially settled, company receiving \$807,000 insurance against total estimated loss of \$1,428,000.

Storer Broadcasting Co. reports 1954 net earnings of \$3,680,779, equal to \$3.23 per share based on 1,100,000 common and Class B shares outstanding prior to 2-for-1 split Feb. 25, 1955. Earnings compare with \$2,186,415 (\$1.70) in 1953. For last quarter, earnings were \$1,324,804. Annual report, with further details, is due to be released in about 2 weeks.

Tung-Sol Electric earned \$2,077,062 (\$3.15 per common share) after taxes of \$2,225,000 on sales of \$39,052,458 in 1954, compared to \$1,780,882 (\$3.07) after \$2,112,000 on \$40,017,549 in 1953. Net working capital at end of 1954 was \$14,779,665, up from \$9,235,345 at end of 1953.

General Precision Equipment Corp. consolidated report for year ended Dec. 31, 1954 shows net sales rose to \$123,332,634 from \$37,763,925 in 1953 and \$54,326,849 in 1952. Net earnings were \$3,436,349 (\$6.49 per share) compared to \$3,436,349 (\$5.09) in 1953 and \$1,255,278 (\$1.88) in 1952.

Stewart-Warner 1954 net income was \$2,757,000 (\$2.05 a share) on sales of \$92,882,000, compared to \$4,081,000 (\$3.04) on \$128,798,000 in 1953—the drop due largely to reduced military shipments.

Dividends: Admiral, 25¢ payable March 31 to stockholders of record March 16; Arvin Industries, 40¢ March 31 to holders March 14; Wells-Gardner, 15¢ March 15 to holders March 4; American Phenolic, 12½¢ April 29 to holders April 14; GE, 40¢ April 25 to holders March 18; Capitol Records, 15¢ March 31 to holders March 21; Decca Records, 17½¢ March 30 to holders March 16; Olympic Radio, 5% stock April 15 to holders March 25; American Electronics, 12½¢ March 15 to holders March 9; Standard Radio Ltd. "A," 15¢ April 7 to holders March 18; RCA, 25¢ April 25 to holders March 15.

Allied Electric Products Inc., whose founder-chairman Nathan Chirelstein died Feb. 19, filed Chapter X petition in Federal district court in Newark this week, Judge Modarelli appointing pres. Charles Penk and attorney Martin Moroney as trustees to continue operation under \$50,000 bond. Judge's order states debts exceed \$250,000, stays civil suits by creditors of stockholders. Financial statement filed with court shows liabilities of \$1,884,872, assets \$2,970,139.

TELEVISION-Electronics Fund Inc. reports total net assets of \$79,231,366 (7,275,265 shares) as of Jan. 31, 1955, up from previous quarterly report showing \$55,868,018 (5,901,271 shares) on Oct. 31, 1954. During the quarter, it added 7000 shares of ACF Industries Inc. at market value of \$337,750; 5000 Consolidated Electronics Industries, \$176,250; 800 Consolidated TV & Radio Broadcasters Inc., \$19,400; 2600 Electric Controller & Mfg. Co., \$131,300; 30,000 Elox Corp. of Michigan "A," \$187,500; 15,000 Elox "B," \$93,750; 10,000 Food Machinery & Chemical Co., \$486,250; 10,000 Litton Industries Inc., \$150,000; 11,000 Ryan Aeronautical Co., \$363,000; 12,600 TelAuto-graph Corp., \$403,200. Eliminated from portfolio were 9000 American Bosch Arma Corp.

Fund added to its holdings in these stocks during the quarter: Addressograph-Multigraph, Allis-Chalmers, ABC-Paramount, American Chain & Cable, AT&T, Beckman, Bell & Gossett, Boeing, Borg-Warner, Bulova, Chemical Products, Columbia Pictures, Cornell-Dubilier, Corning Glass, Cutler-Hammer, Curtiss-Wright, Eaton Mfg., Eitel-McCullough, Garrett, General Controls, GE, General Tire, Globe-Union, Goodyear, Hammond Organ, Hoffman Electronics, IBM, International Nickel, I-T-E, Liquidometer, Magnavox, Minneapolis-Honeywell, National Acme, National Cash Register, North American Aviation, Northrop Aircraft, Paramount Pictures, RCA, Reliance Electric, Remington-Rand, Royal McBee, Sangamo Electric, Sperry, Sprague, Square "D," Stewart-Warner, Taylor Instruments, Texas Instruments, Thompson Products, Tung-Sol, 20th Century-Fox, Warner Bros., Worthington Corp.

Part of holdings in the following were sold during the quarter: Admiral, Burroughs, Clark Controller, Clevite, Emerson Radio, Theodore Gary & Co., General Dynamics, Hazeltine, IT&T, Robertshaw-Fulton, Stromberg-Carlson, Sylvania, United Aircraft, United-Carr, Western Union, Westinghouse Air Brake.

Bache & Co. Market Letter of Feb. 4 foresees "excellent growth prospects for the television and radio business" and suggests these as representative stocks that have substantial attraction for capital appreciation: Admiral, CBS, Hoffman, IT&T, Motorola, Philco, RCA, Raytheon, Sylvania, Tung-Sol, Zenith. In special study for its Feb. 14 edition, United Business Service, Boston, states it's "convinced of the excellent growth to come in the electronics field" and recommends every investor have a stake in it. UBS suggests that those who can afford to take greater risks might buy a few of the lesser-known electronics issues, listing the following: Aircraft Radio, Allied Control, American Electronics, Ampex, Eastern Industries, ElectroData Corp., Electronics Associates, Electronics Corp. of America, Hycon Mfg., Laboratory for Electronics, W. L. Maxson, Norden-Ketay Corp., Panellit Inc. In its fortnightly review of Feb. 21, Carl M. Loeb, Rhoades & Co., New York, refers to electronics as a "healthy billion dollar baby" and discusses RCA, Philips of Holland, Raytheon, Collins Radio, DuMont.

Walter Winchell's stock market tips on his Sun. night ABC-TV show, while strikingly demonstrating the "pulling power" of TV, drew such criticism at Senate Banking Committee's hearing on stock market operations March 4 that there's talk of some sort of curb on TV-radio. Even Sen. Bush (R-Conn.), onetime member of CBS board, urged steps to "put an end to this irresponsible business of giving out market tips." Winchell said he has no financial interest in any company, bought only U. S. bonds.

The record business is up, too: Capitol Records Inc. reports 1954 net income of \$733,718 (\$1.53 per share) compared to \$690,154 (\$1.43) in 1953.

American Bankers Assn. survey shows 247 banks will use TV advertising this year as against 180 in 1954.

COMPROMISE national-regional football TV plan was revealed this week, then suddenly withdrawn for revision when it was indicated Big Ten wasn't satisfied with it. NCAA TV committee's originally announced plan—which was not sent to member colleges for ratification this week as planned—was designed as compromise between eastern colleges' announced position in favor of national telecasting and Big Ten & Pacific Coast conferences' all-out push for regional TV.

The withdrawn proposal envisioned 5 nationally telecast "game-of-the-week" programs and 5 days of regional telecasts. Nation would be divided into 3 zones—eastern, central, far west—with no team permitted to appear on a regional or national network more than once and no regional games to cross zone lines. TV committee also said exceptions would be made for schools wishing to televise sellout games on a local basis—a bone of contention in former years.

The plan would have taken NCAA out of the business of negotiating with networks and sponsors, since it provided for free negotiation by each school to arrange terms of sponsorship with advertisers and networks.

NCAA TV committee is expected to revise its plan after further meetings next week in New York. Plan was withdrawn after U of Illinois athletic director, having heard details of NCAA proposals, told Illinois State Senate education committee that the Big Ten "may be divorced from the NCAA."

Low-power rule proposed by FCC, which contemplates construction of satellites and operation with 100-watts ERP, drew comments in addition to those reported last week (Vol. 11:9). GE favored rule but suggested Commission suspend requirement that lower side-band be attenuated, stating that this would "materially reduce the cost of a low-power transmitter" without appreciable degradation of signal. Gates Radio, endorsing rule, said it could supply the following for less than \$60,000: transmitter, 200-ft. antenna, transmission line, dual projectors, video control, sync generator, dual vidicon chain. It also suggested that one vhf channel be set aside for low-power operation, for "local" stations, as is done with several AM frequencies. Joint Committee on Educational TV said it's "highly in favor" of rule but suggested that low-power stations not be limited to cities with population under 50,000. U of Arizona said low power would permit it to start transmitting with 2-camera vidicon chain it now uses on closed circuit. Radio stations WCTC, New Brunswick, N. J. and WIRA, Ft. Pierce, Fla. spoke up against satellite principle, fearing invasion by repeaters of big-city stations.

Two TV applications were filed with FCC this week: for Walla Walla, Wash., Ch. 5, by J. Elroy McCaw, owner of KTWV, Tacoma (Ch. 13), 25% owner of KONA, Honolulu (Ch. 11), 75% owner of WINS, New York, with holdings in 5 other AMs; for Hattiesburg, Miss., Ch. 9, by Harold M. & Dave A. Matison Jr. (who hold interest in 5 Miss. & La. AMs) and clothier Milton J. Fine. Fine & Dave Matison formerly held stock in Hattiesburg Bcstg. Co., Ch. 9 applicant now scheduled for hearing. [For further details about applications, see *TV Addenda 20-H* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

Govt.-industry tall tower committee of Air Coordinating Committee (Vol. 11:4) held organization meeting March 4, plans second meeting soon, at which aviation industry spokesmen will state arguments against tall towers and TV spokesmen will give their side. FCC Comr. Robert E. Lee and CAA chairman F. B. Lee are co-chairmen.

End the Lamb hearing and renew license of WICU, Erie—that's substance of petition filed this week with FCC examiner Herbert Sharfman by attorneys for Edward O. Lamb, who argued Broadcast Bureau in 5½ months of hearings had "failed to make out a prima facie case" of its subversive-association charges against the Toledo broadcaster-publisher-industrialist. At same time, they asked Commission to delete from the hearing Lamb's countercharge that FCC personnel tried to induce false testimony against him and offered at least one bribe for false testimony. Broadcast Bureau is expected to reply to petition next week, and oral argument would be next step. Another pending motion by Lamb's attorneys would strike out testimony by Broadcast Bureau's first witness, ex-Communist Wm. G. Cummings. Meanwhile, Federal grand jury in Washington opened its secret investigation of the testimony of turnabout govt. witness Mrs. Marie Natvig by quizzing Broadcast Bureau attorney Thomas B. Fitzpatrick and investigator Robert D. J. Leahy.

Subscription TV became hot subject before N. Y. City Council this week, after Council pres. Abe Stark introduced resolution urging FCC not to approve pay-as-you-look TV. He said that such systems would leave low-income families watching "little more than mediocre shows and third-rate movies," while all good shows would have to be paid for. He said that poor free shows would tend to drive children out of the home, increasing juvenile delinquency. Fee-TV proponents immediately jumped Stark. Byron Bentley, pres. of National Theatre Arts Council, vowed that subscription TV would breathe new life into legitimate theatre. Skiatron pres. Arthur Levey said that pay-TV was no threat to TV; that it would bring into homes high-grade programs and events now out of reach of low-income groups. Zenith pres. E. F. McDonald stated that fee TV would merely supplement free TV and urged public to write to FCC and encourage favorable action.

National Assn. of Broadcast Employees & Technicians (NABET-CIO), representing some 2500 network engineers, script writers & editors, this week rejected new contract proposal from NBC-TV & ABC-TV (Vol. 11:6). Under proposal, NABET was to relinquish jurisdiction over film production to International Alliance of Theatrical & Stage Employes (IATSE), thereby opening way for both networks to join CBS-TV in producing own films. CBS-TV already has right to film own shows under separate agreement with IBEW. NABET pres. Cliff Rothery said there will be further attempts to negotiate a settlement before strike is called.

In wake of Storer decision by Court of Appeals last week (Vol. 11:9), in which FCC was told it couldn't limit ownership of stations to specific number, Commission will seek appeal to Supreme Court, provided Solicitor General concurs; consultations between the two will be held. Everyone else seems to be sitting tight, meanwhile, though Senate Commerce Committee is certain to consider whether or not it should establish numerical limits which FCC is now forbidden to set.

Edward Lamb Enterprises, Toledo, has purchased assets of Rasch Mfg. Co., Kansas City manufacturer of water heaters. Lamb interests about 2 years ago acquired White Products Co., Middleville, Mich., major manufacturer of electric & gas water heaters.

Action on McConnaughey nomination to FCC will be taken next Wed., March 9, by Senate Interstate & Commerce Committee, with confirmation by Senate expected shortly thereafter.

"Electronicam" may be name of new method being perfected by DuMont for shooting film at same time live show is being televised (Vol. 11:8).

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 11

SUMMARY - INDEX OF THE WEEK'S NEWS—March 12, 1955

BOOMING ELECTRONICS INDUSTRY headed for \$20 billion-a-year business by 1964, predicts industry expert, giving detailed breakdowns (p. 1 & Special Report).

NBC BUYS BUFFALO UHF WBUF-TV, which resumes operation; network will shift affiliation away from vhf WGR-TV when contract expires (p. 3).

BINGHAMTON & TUCSON STATIONS SOLD: Walter Annenberg buys WNBF-TV for \$3,000,000, Harry Maizlish group buys KVOA-TV for \$450,000 (p. 2).

COLOR GETS ITS BIGGEST BOOST to date from 2-hour "Peter Pan" telecast, probably most successful single show in history of TV (pp. 2 & 11).

JUSTICE DEPT. "ON THE ALERT" for network anti-trust violations; Commission still unable to agree on reply to Plotkin & Jones reports, due next Friday (p. 3).

UNWRITTEN TALL-TOWER "BAN", imposed by Pentagon, spurs demands for showdown on whether FCC or military has right to control tower heights (p. 4).

GUARANTEED ANNUAL WAGE, to compensate for automation, sought by labor this year in electronics industry; auto talks watched for guide (p. 12).

DISCOUNT HOUSES AND FAIR TRADE to get thorough review by Govt. in next month, with prospect of hot political fight in offing (p. 14).

CORPUS CHRISTI Ch. 6 grant to KRIS due after Baptists drop out; educators get Ch. 2 in Andalusia, Ala.; WTVI granted shift to St. Louis' Ch. 36 (p. 6).

TV'S OWN ACADEMY AWARDS, annual "Emmy" presentations, may soon outstrip moviedom's "Oscars" in popular interest; first award telecast a success (p. 7).

NEWSPAPERS INCREASINGLY CRITICAL of TV in speeches and ads, but ANPA spokesman says it's not part of organized campaign (p. 9).

CBS & NBC BILLINGS SET RECORDS in Jan. PIB report, with over \$33,000,000 in billings by 4 TV networks; network radio slips badly (p. 16).

THE ELECTRONICS INDUSTRY—WHAT'S AHEAD: Whether you're a telecaster, manufacturer, distributor, dealer or what-have-you -- certainly if you're interested in investment in one or the other facets of the electronics fields -- we commend to your attention this week's speech by Sylvania's finance v.p. W. Benton Harrison before the Financial Analysts of Philadelphia, which we send you herewith as a Special Report. In a field where marvels, even statistical, are becoming commonplace, Mr. Harrison, a one-time professional security analyst himself, who went to Sylvania from General Aniline in 1951, spells out the fiscal course the industry is taking better than anyone else has yet done, in our opinion. He had an assist, of course, from RETMA's statistical chairman Frank Mansfield, Sylvania's knowledgeable sales research director.

Read the whole thing to get its real import, especially if you're charting a course for your own particular field of electronics endeavor. Suffice here to note Mr. Harrison's confident remark that electronics as a whole "has a growth potential beyond the scope of most other industries" and that it's now a \$9 billion business which by "conservative estimate" should go to \$20 billion annually by 1964.

It's a rosy picture of a dynamic industry, altogether, which Mr. Harrison paints, based as he says on "realistic projections of sales trends that have become well established." For example, he reports that this will be an "excellent TV year" but hastens to show that better ones are ahead; that govt. business will go up from \$2.5 billion this year to more than \$4 billion by 1964 -- on peacetime basis; that markets for home radios, car radios, replacement tubes & components, servicing, etc. are consistently on rise; that wholesale & retail mark-ups, running about \$2 billion this year and last, should rise to \$4.2 billion in 10 years; that non-military & industrial uses and markets for electronics products & services have "no ceiling"; that broadcasting revenues (TV & radio) which last year aggregated \$1.14 billion will rise to \$3 billion in the years 1958-60, hit over \$5 billion by 1964.

BINGHAMTON & TUCSON STATIONS SOLD: Pioneer WNBC-TV, Binghamton, N.Y. (Ch. 12), only outlet in city, fed by all networks, was sold this week with its radio adjunct WNBC (5-kw, 1290 kc, CBS) to Triangle Publications, headed by Walter Annenberg, publisher of Philadelphia Inquirer. Price was \$3,000,000, less about \$300,000 in net quick assets, and station will be operated under the direction of Triangle's WFIL-TV mgr. Roger W. Clipp, with gen. mgr. Geo. Dunham remaining in that capacity. Howard Stark, broker, handled deal whereby John C. Clark interests, pre-freeze founders who control about 80% of stock, will leave TV-radio station field.

Among other station deals still cooking, one was disclosed this week -- sale of KVOA-TV, Tucson, Ariz. (Ch. 4) with radio KVOA (1-kw, 1290 kc, NBC) to partners Harry C. Maizlish, Frank Oxarart & Morton Sidley. They operate KFVB, Hollywood, are paying about \$450,000 for the properties, said to be on "borderline" of profitability. Sellers are KTAR Bcstg. Co., operating radio KTAR and TV station KVAR in Phoenix, whose principals are John J. Louis & family (Needham, Louis & Brorby, Chicago ad agency), with pres.-gen. mgr. R.B. Williams also selling his 10.13%.

'PETER PAN' MAY PROVE TO BE COLOR TRIGGER: The spark that will ignite color TV may have come this week in the form of NBC-TV's phenomenally successful Peter Pan program (see p. 11). It provided most widespread, longest (2 hours) and most pleasing exposure to color ever given to the public.

At every level of industry, there's hope and belief that this impact, if followed up promptly and properly, will give color the kind of impetus that first championship fights, World Series, political conventions, etc. gave to black-&-white in 1946-50. Networks are scurrying to find programs of comparable impact -- but they're mighty rare. Nevertheless, more big spectaculars are in the works, and, combined with more regular color shows promised by networks (Vol. 11:8), they could prove to be the stimulus everyone has been waiting for.

"The influence of Peter Pan," said Irving Sarnoff, of Bruno-N.Y., biggest RCA distributor, "gave TV in general and color in particular a stature it never before enjoyed. And we think it gave color its biggest shot in the arm yet." In week preceding Peter Pan, he said, Bruno-N.Y. sold more color sets than in the whole period since deliveries of 21-in. began in Dec. He said he'd obtained 350, sold them all -- with nearly all now in hands of consumers, not dealers.

"Sixty days ago you couldn't even talk to a dealer about color," he said. "They don't feel that way now. There's more faith in color, more enthusiasm for it, and I think nothing is going to stop it."

Brother of the RCA chairman, Mr. Sarnoff feels 3 elements are necessary to "trigger" color: (1) Combined efforts of whole industry. (2) Program continuity and quality. (3) Price. He said he didn't know price to be placed on new 28-tube sets to be delivered in April-May, but he doubted that it will be under present \$895.

Motorola exec. v.p. Robert Galvin termed show "the most significant single shot in the arm color has ever had." He said one eastern distributor sold 6 sets immediately after the show while other distributors have shown marked increase in enthusiasm for color. "Half dozen such shows would be wonderful," he said, "but I don't know how well the networks can afford them."

Another manufacturer with high hopes for color declared: "If we were able to announce more shows like Peter Pan, industry could sell 25,000 sets right away. But remember that this was a onetime shot -- and who knows how many more like it we can expect?" The things that will make color click in a big way, he said, will be a "\$495 price" and "a good program schedule" -- but he wasn't very hopeful about the price factor, at least in the near future.

RCA officials exude confidence and enthusiasm -- but they're very cautious about commenting on future plans. They say that all but a few dozen of the 3-4000 run of 38-tube sets have moved to distributors and that nearly all have been sold to public. "Right now," says an executive, "we could sell more sets if we had them, but of course we're waiting for the new 28-tube chassis next quarter. One phenomenon of the current situation is that, whereas we had hoped the dealers would keep at least demonstration models, most of them have sold out entirely."

NBC BUYS BUFFALO UHF, TO SHIFT FROM VHF: Faltering uhf got another hypo from NBC, again at expense of a vhf affiliation, when the network this week purchased recently silenced WBUF-TV, Buffalo (Ch. 17). NBC will affiliate it in lieu of 6½-month-old WGR-TV (Ch. 2) when that station's contract expires in Aug. 1956.

WBUF-TV quit the air 2 weeks ago (Vol. 11:9), second uhf in city unable to make a go of it, but resumed operation March 9 with ABC schedule and with film. It has no studios, having recently sold them to WGR-TV. NBC states it will continue under present management (Sherwin Grossman & Garry Cohen) who lost some \$450,000 in operating the station since Aug. 1953. NBC is paying \$312,000 cash.

WGR-TV ownership (George Goodyear, Myron Kirk, et al) was flabbergasted at sudden and unexpected turn of events, while NBC undertook to impress FCC and public with "further proof," as pres. Pat Weaver put it, "of NBC's faith in the future of uhf as a broadcasting medium...[This] will preserve the investment of millions of dollars which the people of the Buffalo area have made in uhf receivers.

"We believe our purchase will give encouragement to all uhf broadcasters and will eliminate the unfavorable implications which would have resulted from the failure of uhf to survive in Buffalo market. The full resources of NBC will be placed behind WBUF-TV to develop uhf service as comparable as possible to vhf."

NBC also recently purchased WKNB-TV, New Britain-Hartford (Ch. 30) in deal involving \$800,000 (Vol. 11:2) that's being held up by objections of its New Haven vhf affiliate WNHC-TV (Ch. 8). It's apparently intent, with RCA blessing, on getting further into uhf as quickly as possible and by precept and example in uhf operation stemming tide of failure that has engulfed 39 uhf stations (112 now operating).

There are several ironies in surprise deal, aside from fact that a network is forsaking assured vhf audience in favor of yet-to-be-built-up uhf. NBC becomes owner of an ABC affiliate, mainly GE-equipped, unless WGR-TV can stop transfer and unless WGR-TV elects to shift to ABC before NBC contract expires. Counsel for WBUF-TV is the ex-FCC stormy petrel, Harry Plotkin, who also is of counsel for the New Haven vhf which is fighting similar encroachment of the Connecticut uhf (Vol. 11:7).

Another interesting angle: NBC was unwillingly forced out of vhf affiliations in Buffalo and in Norfolk by CBS more than year ago, now is forcing 2 vhf affiliates out -- and vhf cries of "ouch" further emphasize how dependent TV stations are on network affiliations. As has CBS in Milwaukee, where it bought and now operates uhf WXIX (Ch. 19), NBC shows additional confidence in long-term growth of uhf; it also assumes burden of increasing receiver conversion in Buffalo, where up to 40% is now claimed, for sake of proving uhf is here to stay. It plans to hike the Buffalo uhf power, like one on Mt. Higby, to 1 million watts.

* * * *

Note: Sale of defunct WTOV-TV, Norfolk (Ch. 27), uhf which went dark last Oct. 3, was approved by FCC this week -- and new owner, Hyattsville (Md.) used car dealer Temus Bright (Tim Brite Inc.) states he plans to start it anew and run it as independent in 3 weeks or month. He paid about \$95,000 for station, including the assumption of \$63,000 owed RCA on equipment, acquires 3½ acres of ground, buildings and TV plant. His mgr. will be A.V. Bamford, ex-Oakland radio operator, recently in Hollywood programming, with Phil Bate, ex-Philco, as chief engineer. He may start another used car business in Norfolk as part of his new project, he said.

JUSTICE DEPT. ON NETWORK ANTI-TRUST: While FCC was trying to figure out what to say in its report next week to Senate Commerce Committee on questions raised in Plotkin Memo, industry leaders were trying to figure out exactly what Justice Dept. said in its report submitted to the Committee this week.

Justice Dept. pledged vigilance, revealed no specific plans -- and as result there was complete disagreement on how much reading-between-the-lines was called for. Network spokesmen said they regarded it merely as a pro forma reply.

"We emphasize that we regard the questions raised by Mr. Plotkin's Memorandum to be of great importance," said brief report submitted by Deputy Attorney General Wm. P. Rogers. "It is essential in a free society that access to a medium of com-

munication as influential as TV be limited only by the public interest and the inherent nature of the phenomena that make broadcasting possible."

All Federal anti-trust laws apply to networks -- that's Justice Dept.'s view as indicated in its report -- despite 1948 case in which Supreme Court upheld lower court decision "which intimated that different standards of accountability" apply to networks. But Rogers passed the buck to FCC in answer to Plotkin's question whether abolition of chain broadcasting regulations would promote freer competition and more effective regulation of networks.

Govt. is "on the alert for information indicating that any network is engaged in a violation" of anti-trust laws, said Rogers. "It would be inappropriate to report on any particular complaints, but you may be assured that we will continue to investigate any complaints submitted..." More complete report from Justice Dept. has been requested by Chairman Magnuson "as soon as convenient."

(Copies of Justice Dept. report may be obtained from Senate Interstate & Foreign Commerce Committee or we'll get one for you.)

* * * *

FCC has yet to come to agreement on how to respond to Plotkin & Jones memo-randa; another meeting is set for March 14. There may well be several different comments submitted because of inability of commissioners to agree. It's certain Comr. Hennock will have one, and it's likely one or more of the others will have separate views. The Commission's reply is due next Fri., March 18.

No one expects FCC to commit itself to drastic moves. Some members feel that "another look at de-intermixture" is warranted. Others claim that the amount of good to come from de-intermixture is negligible. As for wholesale moves to uhf, one member said: "If I were sure that were the answer I'd go for it -- but I'm not." His opinion is that de-intermixture would rob rural viewers of service, and he feels that FCC's first duty "is to provide at least one signal to everyone in the country before trying to create more competition in the big cities."

One top FCC staff member may have summarized majority view when he said: "It's obvious that there's no quick answer. In the long run, I think the FCC can improve the situation -- though I don't think it's as bad as some claim it is. But it should be remembered that the FCC is only one element in the whole picture. There are the advertisers at one end and the set manufacturers at the other. They operate in a normal free-enterprise manner, and that's the way it should be. I think the Senate committee could learn a lot by asking representatives of the top agencies and manufacturers to present their views."

SHOWDOWN DUE IN TALL TOWER STALEMATE? Exasperated applicants for high towers are looking to FCC to override the Pentagon's unwritten ban on towers over 1000 ft.

Showdown could come as soon as next week -- or in 6 months, or indeed not at all. While the Commission is anxious to encourage maximum coverage via high towers, at the same time it is fearful of overruling the military. It has authority to do so, and high-tower applicants are watching to see if it will stand up against what they consider "arbitrary and capricious" action by the Pentagon.

Though they deny their actions are arbitrary, plain fact is that the 3 military members of Washington Airspace Subcommittee (which advises Commission on the aeronautical aspects of tower proposals) have opposed all proposals for towers over 1000 ft. that have been advanced within the last 4 months.

This despite fact that Regional Airspace Subcommittee had given unanimous approval in every case -- and despite fact CAA & CAB representatives on Washington Subcommittee voted for approval in each case.

Military failed to get the 1000-ft. ban put in writing last January, when the top-level Air Coordinating Committee (ACC), parent of Airspace Subcommittee, couldn't agree on it, and instead ordered industry-govt. study of whole high tower situation (Vol. 10:48 & 11:3). Meanwhile, ACC ordered subcommittee to continue considering tower proposals on case-to-case basis, using same criteria as it has in past. The industry-govt. study finally got under way last week, may take 6 months.

Now pending before FCC are 3 tall-tower applications which lack unanimous approval by Airspace Subcommittee because of military opposition. FCC has 2 choices in these almost unprecedented cases: grant application despite Armed Forces' opposition (which it has never done before), or call hearing, letting the military appear and state their specific objections.

FCC is clearly not satisfied with the reasons given by the Pentagon for opposing recent high tower proposals. (In one case, tower merely was called "a mental and physical hazard".) Commission this week asked ACC to request subcommittee members to be more specific in listing their reasons for tower turndowns. ACC took up Commission's request, drew promise from Air Force to give more details.

The recent cases of military tower turndowns: WSLA, Selma, Ala., 1993-ft. tower; KSWB-TV, Roswell, N.M., 1610-ft.; KGE0-TV, Enid, Okla., 1356-ft. In Little Rock, Ark., KARK-TV recently made informal inquiries about possibility of building a tower higher than 1000 ft., was told it would be disapproved. Still unapproved is the 2003-ft. tower proposed by WHAS-TV, Louisville (Vol. 11:8), tallest yet.

Interesting sidelight on the 1000-ft. situation is case of WJRT, Flint, Mich. Originally it had planned 1049-ft. tower, but changed height to 999 ft. Its tower proposal breezed through Washington Airspace Subcommittee last week.

First test case may come next week when FCC considers request by KGE0-TV to make immediate grant for new tower, despite opposition by military.

The Enid, Okla. station now has 816-ft. tower 5 mi. from city airport, 12 mi. from Air Force base, less than 2 mi. from intersection of 2 air routes. It proposes 1356-ft. tower at new site 28 mi. from both airfields, 9 & 10 mi. from nearest air routes. Proposed new location was endorsed by city airport mgr. and air base commandant as safer than old one, is considered necessity by station since current site provides poor reception in Enid and station has consistently lost money (see p. 10).

Station wants immediate grant overruling military members of subcommittee, fears it can't hold out the 6 months or more it would take to wait for hearing.

* * * *

Adding to high tower blues are 2 Congressional resolutions, which not only would make it difficult or impossible to build any new tower over 1000 ft., but might effectively block renewal applications by stations with existing tall towers. H.J. Res. 138 & 139 were introduced by Rep. Harris (D-Ark.), chairman of House communications subcommittee, & Rep. Hinshaw (R-Cal.), member of that subcommittee, who is being considered for presidency of Air Transport Assn., trade group favoring tower ban.

SUBSCRIPTION TV's most ardent opposition, movie exhibitors' Joint Committee on Toll TV, is busily girding its loins for coming struggle before FCC. This week, it appointed new public relations counsel, Robert S. Tappinger & Assoc., N. Y., and offered its services to "other groups which already are interested in presenting the views of various public interests against the toll plan for home TV audiences." JCTT also announced that Cohn & Marks would continue as Washington counsel. In addition, it is considering hiring as economic consultant Dallas Smythe, ex-FCC, now a professor at U of Illinois, who has also worked for Joint Committee on Educational TV.

Meanwhile, the extraordinary success of NBC-TV's *Peter Pan* (see p. 11), led Zenith v.p. H. C. Bonfig, in speech this week before Chicago chapter of Robert Morris Associates, to predict subscription TV would bring 50 or more Broadway productions into the home each year—at a fraction of regular boxoffice prices. He ventured that pay-as-you-look TV has excellent chance of getting going this year.

Our recent report on the "silent men" of the pay-TV controversy—the operators of networks and stations (Vol. 11:9)—elicited prompt reaction from Leon P. Gorman Jr., mgr. of WABI-TV, Bangor, Me. (Ch. 5). Stating that he has been "carrying on a running battle with the subscription TV people since about 1948," he enclosed copy of letter he had written to NARTB recently, stating in part:

"It seems to me that these subscription people—and all their drum beaters—are living 'schmoos', walking, talking Al Capp-ish human beings who are everything to everybody. About the only thing they haven't promised is to stop the coming and going of the tides. If you're an educator, they promise educational shows; if you're a politician, be our guest and have a political program; if you're a housewife, then nothing but the finest of Hollywood's most lavish productions for you; if you're a sports fan, then it's Hialeah, ping pong, baseball, horseshoe pitching and bean bag throwing anytime you want it. There are stamp collecting shows for stamp collectors; poetry shows exposing Shakespeare for Baconian enthusiasts; and 'How-to-Find-Uranium-Without-Leaving-Your-Home' for the poor, the hungry and the hopeful. And, last but not least, to the poor beleaguered TV station man—be he uhf or vhf—they promise untold wealth and unlimited happiness and long life."

First permanently established and solely owned closed-circuit network for large screen business meetings" was announced this week by TNT Tele-Sessions gen. sales mgr. Fanshawe Lindsley. Tele-Sessions now has installations in 41 cities, using GPL projection equipment, operated under contract by RCA Service Co., available for use in theatres, hotels & auditoriums.

Personal Notes: I. E. (Chick) Showerman, onetime NBC central div. v.p., recently named gen. mgr. of Hearst Radio's WISN, Milwaukee, has taken over management of newly acquired Ch. 12 WTVW, Milwaukee (Vol. 11:10), with John J. McPartlin, ex-WNBQ, Chicago, named asst. mgr. this week by D. L. Provost, Hearst TV-radio v.p. . . . Vincent A. Francis, gen. sales mgr. of KGO-TV & KGO, San Francisco, winner of local Junior Chamber of Commerce's Man of the Year award in 1954, promoted to new post of sales mgr., ABC-TV western div., San Francisco . . . James H. Burgess, sales director of WLWC, Columbus, named national sales rep for all Crosley stations working out of Cincinnati; Charles R. Dodsworth, ex-sales chief at WLWD, Dayton, replaces him at WLWC and George Gray, ex-WKNA-TV, Charleston, W. Va., replaces Dodsworth . . . Thomas N. Dowd's name is added as Washington law firm, prominent in TV-radio, changes to Pierson, Ball & Dowd . . . Albert J. Feigen, ex-Federal Power Commission, joins Dempsey & Koplovitz, Washington attorneys . . . Wm. Fox, program director of KFMB-TV, San Diego, promoted to gen. sales mgr. . . . Winter Horton promoted to exec. director, KFSD-TV, San Diego . . . Jack Nedell promoted to commercial mgr., WGBI-TV, Scranton . . . George Turner, ex-DuMont film director, named exec. asst. to Herbert Jacobs, v.p. & gen. mgr. of TV Inc. . . . Stanley Chambers promoted to national sales mgr., KTLA, Los Angeles, Robert Mohr continuing as sales mgr. . . . H. Needham Smith, sales mgr. of WTRF-TV, elected pres. of Wheeling Ad Club . . . Stephen J. Machcinski Jr. promoted to gen. sales mgr. and coordinator of TV-radio sales, Adam J. Young Jr. Inc. . . . James C. McCormick, ex-sales mgr., Jack Douglas TV Productions, formerly with Ziv and Mayers Adv., joins Hollywood office of H-R Television Inc., which has new phone number: Hollywood 2-6453 . . . Richard B. Rawls, mgr. of KPHO-TV & KPHO, Phoenix, elected pres. of Arizona Broadcasters Assn., succeeding Charles Garland, KOOL-TV . . . Edward R. Beach resigns as v.p. & secy., Benton & Bowles, to become v.p. & a director of International Affiliates Inc., producer of foreign movies & TV films . . . David Y. Bradshaw named TV-radio mgr., Young & Rubicam . . . D. H. Humm named TV-radio time-buyer, Charles W. Hoyt Co., N. Y. . . . Pat Weaver, NBC pres., returned from Europe this week . . . R. A. Borel, director of WBNS-TV, Columbus, left March 9 for month in Germany . . . Frank E. Mullen, onetime NBC exec. v.p., now consultant with offices at 8949 Sunset Blvd., Hollywood, resigned this week as pres. of Vitapix-Guild Programs Inc.; Kenyon Brown, KWFT-TV, Wichita Falls, was elected pres. and Edward E. Hall exec. v.p. . . . John H. Dodge promoted to eastern administrative sales mgr., NBC-TV network sales dept., reporting to Walter D. Scott, administrative sales mgr.

Latest Armed Forces TV station is new Ch. 8 low-power installation at Keflavik Airport, Iceland. It's 4th station to be established by Armed Forces TV Service of Defense Dept.'s Office of Armed Forces Information & Education (Lt. Col. Mel Williamson, chief, TV branch). AFTS now ships 60 hours of film and kines to the stations weekly, hopes to have 10 stations on air by July 1. It already has approval for new TV installations at Thule, Sonderstrom Fjord and Narsassuak, Greenland and at Ramey Air Force Base, Puerto Rico (possibly uhf). Also being considered are stations in Okinawa, Guam and elsewhere. (For list of existing Armed Forces TV stations, see *TV Factbook No. 20*, p. 55).

George J. Podeyn, 65, who joined old WEAJ, New York (now WRCA) in 1923, helped develop the NBC network, was its Pacific Coast mgr., died March 8 in Greensburg, Pa., where since 1940 he had been mgr. of radio WHJB. Surviving are his wife and 2 sons.

CORPUS CHRISTI Ch. 6 grant soon is in prospect, with dropout this week of Baptist General Convention from competition with KRIS. In petition for dismissal, group said "no consideration" is involved, and reason for withdrawing is to get service going quickly. Cowles grant of Ch. 8 in Des Moines moved a step closer when FCC Broadcast Bureau recommended immediate grant, now that KSO has pulled out (Vol. 11:10).

There was one CP this week, educational Ch. 2 grant to Alabama Educational TV Commission, for Andalusia. Also authorized was shift of WTVI, Belleville, Ill. (Ch. 54) to St. Louis' Ch. 36, which was relinquished by now-silent KSTM-TV.

Channel shifting which would permit WWLP, Springfield, Mass. (Ch. 61) to move to Ch. 22 was issued as proposed rule-making, along with counter-proposal by Rhode Island Board of Education which would give WWLP Ch. 36 instead of Ch. 22. CP-holder KAKI, Visalia, Cal. (Ch. 43) asked that its channel be moved to Fresno, citing "economic reasons."

Three uhf CPs were turned back: WCNO-TV, New Orleans (Ch. 32); KMIV, Miami, Okla. (Ch. 58); WNAM-TV, Neenah, Wis. (Ch. 42).

Proposed purchase of WKNB-TV, New Britain, Conn. (Ch. 30) by NBC and its shift to Mt. Higby (Vol. 11:2) were endorsed in comments filed with FCC this week by Dr. F. E. Engleman, Connecticut commissioner of education, and General Teleradio-Hartford Times' WGTH-TV, Hartford (Ch. 18). Opposition was filed by WATR-TV, Waterbury, Conn. (Ch. 53) which feared NBC's ownership of station in area would make competition for major network affiliation too great.

Application of WHAS-TV, Louisville (Ch. 11) for 2000-ft. tower (see p. 5) was opposed by WLEX-TV, Lexington, Ky. (Ch. 18) which said that greater height would permit WHAS-TV to throw strong signal into predominantly uhf territory.

Petition of WRTV, Asbury Park, N. J. (Ch. 58) for assignment of Ch. 8 for low-power operation was opposed by WGAL-TV, Lancaster (Ch. 8), which objected to prospective interference, said that WRTV's reasons "do not warrant the radical departure from the allocation plan now in effect."

Efforts of KRIC-*Enterprise* to keep KFDM-TV, Beaumont (Ch. 6) from going on air pending litigation were turned down by Court of Appeals, but it asked FCC to hold up for the present approval of transfer whereby W. P. Hobby (KPRC-TV and *Houston Post*) acquires 32½%. KFDM-TV has April 1 target.

Consolidated TV & Radio Broadcasters Inc. (Bitner), which is paying \$3,135,000 for Ch. 11 time-sharing WTCN-TV, Minneapolis & WMIN-TV, St. Paul, along with radio WTCN (Vol. 11:5), in transfer papers filed with FCC this week disclosed that its profit for first month of new fiscal year (Nov. 30, 1954-Jan. 1, 1955) was \$118,115; that net after Federal taxes for preceding fiscal years ended Nov. 30 was: 1954, \$1,253,661; 1953, \$824,254. Also shown in transfer file were gross sales of \$187,500 by WTCN-TV & WTCN in 13 weeks ended Jan. 1, 1955.

FCC's loyalty proposal, aimed at weeding out subversives among licensed radio operators (Vol. 10:34, 40), drew renewed opposition this week from American Civil Liberties Union. Attorney Herbert M. Levy wrote Commission that proposal wouldn't help enforce security because licensed operators may constitute only small percentage of those having access to transmitter, but it might endanger civil liberties by causing licensees to fear expression of unpopular views lest they be considered pro-communist.

Telecasting Notes: Prediction: TV's annual Emmy awards (see list below) in not too distant future will outstrip movie industry's "Oscar" awards in popular interest. Reason is that more people have come to know the TV nominees as frequent "visitors" in their homes. They're just as glamorous and telegenic, too, as March 7 nation-wide NBC telecast of awards from Hollywood & New York proved. Certainly the TV show was handled better than the recent telecast of the nominations of the Academy of Motion Picture Arts & Sciences, though it's to be assumed the final movie awards on NBC-TV March 30, with Bob Hope as m.c., will be an improvement . . . Nominees and winners, most of whom were on hand, came in one big show as the TV "Emmies" were handed out. Fact that up-&-coming ABC got so many awards seems to epitomize growing strength of the once-tottering "third network"; fact that Studio City TV was only non-network syndicate to have own winner (though TPA produces the CBS Campbell Soup Co. winner *Lassie*) would seem to indicate the TV film syndicates have to do more self-promotion of their identities . . . Fact that Walt Disney and Loretta Young, both winners of movie "Oscars," were on the TV winners list points up growing affinity between the TV and movie media; there will probably be more such dual winners in years to come . . . Why "Emmy"? The word was coined as a sort of contraction of "image orthicon" (TV camera tube), obviously with thought of building up a running mate if not rival for "Oscar." Academy of Television Arts & Sciences has headquarters at 6525 Sunset Blvd., Hollywood; Don DeFore is pres., Isabelle Pantone, exec. secy. . . . End of stand-offish attitude of Hollywood majors toward TV, which persisted despite lead of Columbia's Screen Gems in going early into TV production and profit shown by Republic Pictures in releasing its oldies, is seen by *Variety's* Fred Hift in significant March 9 article in which he notes "every indication that Hollywood is getting ready to move the massive impact of its facilities, know-

how, talent and story reservoir into the TV field for what's seen as a mutual payoff." "The studios," he adds, "have stopped thinking in terms of the worst being good enough for their electronic competitor" . . . Warner Bros., which recently sold 191 cartoons to TV (Vol. 11:8) has been huddling with ABC, as has 20th Century-Fox, and both now have TV production units under way. There's persistent report, unverified, that Warners will soon break open its vaults and release batch of 1933-44 features to TV . . . "It would seem," states Hift, "that it was Walt Disney's plunge into the video pool, and the impressive ratings of his show, that cued the new Hollywood interest. There's still a degree of caution [so as] not to antagonize their exhib customers." . . . Newest batches of oldies being peddled to TV are said to be 37 Pine-Thomas features once released by Paramount, and 52 J. Arthur Rank features—with many more to come . . . RKO-Pathé is moving into TV, too, contemplating production in Bermuda of one series to be titled *Sarong*, with Dorothy Lamour, and another based on Philip Wylie's *Des & Crunch* stories in *Saturday Evening Post* . . . Feature film version of Paddy Chayefsky's TV hit *Marty*, first seen on *Philco Playhouse* (NBC-TV), due for N. Y. premiere April 11 (Sutton Theatre); it was produced for United Artists by Harold Hecht . . . Medicos are on air so much that new Caduceus Productions has been formed, headed by Dr. Wm. House, with Bernard Kowalski as v.p.; its first offering will be *GP* (general practitioner) being shot on Hal Roach lot.

—■—
Add telegenic politicians, among whom we rated President Eisenhower high last week (Vol. 11:10): March 14 *Newsweek*, in article on "The Changing Face of Politics," rates Eisenhower "tops" on TV, Adlai Stevenson "excellent," Vice President Nixon "good but not great," Secy. Dulles "fair to good," Sen. Kefauver "effective in a nice quiet way but not outstanding," Sen. Symington "fairly effective, could be much better."

ACADEMY of Television Arts & Sciences presented 7th annual "Emmy" awards on NBC-TV March 7 (see above) for outstanding performers & programs. In addition, awards for technical achievements on networks were subsequently announced. Winners:

ABC-TV: best variety series, *Disneyland*; best individual program, "Operation Undersea" (*Disneyland*); dramatic series, *U. S. Steel Hour*; situation comedy, *Make Room for Daddy*; best actor starring in regular series, Danny Thomas; news reporter-commentator, John Daly; film editing, Grant Smith & Lyn Harrison, "Operation Undersea."

CBS-TV: religious or educational program, *Omnibus*; children's program, *Lassie*; best actor in single performance, Robert Cummings in "Twelve Angry Men" (*Studio One*); best supporting actor in regular series, Art Carney (*Jackie Gleason Show*); best supporting actress in regular series, Audrey Meadows (*Jackie Gleason Show*); male singer, Perry Como; daytime program, *Art Linkletter's House Party*; art direction of live show, Bob Markell in "Mallory's Tragedy on Mt. Everest" (*You Are There*); art direction of film show, Ralph Berger & Albert Pike in "Christmas Carol" (*Shower of Stars*); best written dramatic material, Reginald Rowe in "Twelve Angry Men"; best direction, Frank Schaffner in "Twelve Angry Men"; choreographer, June Taylor in *Jackie Gleason Show*.

NBC-TV: outstanding new personality, George Gobel; best actress in single performance, Judith Anderson in "Macbeth" (*Hallmark Hall of Fame*); best actress starring in regular series, Loretta Young; mystery or intrigue series, *Dragnet*; audience, guest participation or panel program, *This Is Your Life*; female singer, Dinah Shore; sports program, *Gillette Cavalcade of Sports*; best direc-

tor of photography, Lester Shor in "I Climb the Stars" (*Medic*); best written comedy material, Hal Kanter, Jack Douglas, J. Allordice & H. Winkler for *George Gobel Show*; best technical achievement for network's color TV policy and Burbank, Cal. color plant; best engineering effects, 4-quadrant screen used in coverage of 1954 election returns; best sound editing, George Nicholson (*Dragnet*); best original music, Walter Schumann (*Dragnet*).

Studio City TV Productions Inc. received award in western or adventure series for its syndicated *Stories of the Century*, and of course Mike Sillerman's TPA is producer of *Lassie* on CBS-TV. In addition, Victor Young received an award for best scoring of dramatic or variety program, for *Diamond Jubilee of Light* on all TV networks.

—■—
Electronic film production system, which shoots film from high-definition closed-circuit TV monitors, will be in use in U. S. within a few months. Called *Electronscope*, it delivers finished 35mm or 16mm negative (or both simultaneously) said to be equal in quality to best 35mm negatives available today—at half the cost of conventional TV filming methods. System has been in use in England for some time. Developed by High-Definition Films Ltd. (Norman Collins, ex-BBC chief), U. S. rights have been acquired by TV film producer Gordon Levoy and ex-CBS-TV producer Alan Buckhantz.

Unusual display ad to sell TV station now off air was carried in March 9 *Wall Street Journal*, headed "Auction Sacrifice! Complete Half-Million Dollar Television Station." It set inspection time March 12, sale time 9 a.m.-5 p.m. March 14, at 420 W. Commerce, Oklahoma City, address of bankrupt KMPT (Ch. 19) which began operation Nov. 8, 1953 and quit air Feb. 3, 1955 (Vol. 11:6).

Station Accounts: Here's a tip for stations trying to get greater volume of dept. store advertising: encourage them to use still photographs of window displays as 20-sec. spots. Suggestion came this week from Oliver Treyz, pres. of Television Bureau of Advertising, in speech to Washington Ad Club. He said dept. store can saturate its market with "TV windows" by doubling its current window budget—"a comparatively minor investment in terms of coverage and sales impact." Stressing that many of the young couples who are best customers of dept. stores grew up in a TV-radio age, he commented: "If John Wanamaker, the man who vitalized retail advertising with new and daring concepts, were alive today, he'd probably 'televisionize' dept. store advertising. He would recognize immediately that the younger family represents the bulk of the buying power, but that few—if any—dept. stores are going after them with the medium that reaches most of them, TV" . . . Add successful farm programs (Vol. 11:9): Sat. noon-1 p.m. *Farm* on WAVE-TV, Louisville, carried live from own 350-acre model farm about 13 mi. from town; it will originate 25 min. of NBC-TV's *Home* March 21, having been selected as "typical American family farm home" to be visited first day of spring . . . National Gypsum Co. (Gold Bond building products) to sponsor *Fame*, new 15-min. weekly filmed series featuring high points in careers of famous Americans during last 50 years, on WRCA-TV Sat. 11:15-11:30 p.m., thru BBDO . . . Langendorf United Bakeries buys NBC film div.'s *Steve Donovan, Western Marshal* in 13 west coast markets starting week of April 4, thru Biow-Beirn-Toigo, San Francisco . . . American Express Co. mailing TV-radio promotional kits to branches as part of all-media campaign to promote travel, thru Kelly-Nason Inc., N. Y. . . Buick starts TV-radio spot campaign March 30, running to April 22, thru Kudner Agency, N. Y. . . South African Rock Lobster Assn. buys spots on homemaking shows in 10 markets, thru Caples Co., N. Y. . . Among other advertisers currently reported using or preparing to use TV: Beech-Nut Packing Co., Canajoharie, N. Y. (gum), thru Kenyon & Eckhardt, N. Y.; Centennial Flouring Mills Co., Seattle (pancake & waffle mix), thru Cole & Weber, Seattle; Sperry Operations, div. of General Mills, San Francisco (Sperry Wheat Hearts), thru Dancer-Fitzgerald-Sample, San Francisco; International Milling Co., St. Paul (Robin Hood flour), thru H. W. Kastor Agency, St. Paul; Doughboy Industries Inc., New Richmond, Wis. (plastic swimming pools), thru BBDO, Minneapolis; L. Lewis Cigar Mfg. Co., Newark (Seidenberg cigars), thru Lewis Adv., Newark; B. Filippone & Co., Newark (olive oil), thru Pettinella Adv., N. Y.; Felton, Sibley & Co., Philadelphia (paints), thru J. Cunningham Cox, Philadelphia; National Assn. of Auto Trim Shops, N. Y., thru Arpadi-Sarett Assoc., N. Y.

CBS-TV Spot Sales presentation, currently being shown to N. Y. agencies & advertisers and to be made generally available shortly, shows 6 times as many advertisers now using spot TV as in 1949, with dollar investment 19 times as large. Presentation is in 2 parts—"Best Spot in All Advertising," containing latest research on TV generally and unique advantages of spot, and "Best Spot in All Television," highlighting coverage of CBS-TV Spot Sales.

New "5-for-3" discount plan, whereby an advertiser who buys 3 spot announcements per week in times to be specified by station, will be permitted 2 additional announcements free, was disclosed this week by WLWC, Columbus, O.

MCA-TV creates station relations dept. to assist in audience promotion activities for stations carrying its 22 syndicated programs. Heyward Ehrlich is promoted to director of new dept.

ABC and Walter Winchell will end 25-year association by end of 1955, as climax of rift over contract terms. Commentator said he expects to continue on TV-radio with another network or on free-lance basis. He conferred March 11 with NBC officials, said he may move to that network next fall. Winchell said he was embittered to discover that his contract with ABC did not provide insurance against libel, shortly after he won recent \$800,000 suit against 2 men he called "cancer racketeers." Network said it regarded libel coverage as responsibility of insurance company. Winchell, whose stock market tips on air drew criticism at Senate Banking Committee's investigation of market last week (Vol. 11:10), also told AP he was once offered an option on 10,000 shares of ABC stock in lieu of salary raise but that the executive who offered it later reneged. Winchell said he requested release from 6-figure contract and was "very grateful" to ABC for granting it. ABC pres. Robert E. Kintner said: "An honest disagreement in our relations could not be resolved and ABC felt its long and mutually beneficial association with Mr. Winchell required consent to his request for a release from his ABC contract effective Dec. 25, 1955, or sooner if contractual details will permit." For last year, Winchell's Sun. 9-9:15 p.m. simulcast has been on 45 TV, 365 radio stations. Note: Settlement by mutual consent of \$1,525,000 damage suits brought against Winchell by *New York Post* and its editor, James A. Wechsler, was also disclosed this week. Terms weren't revealed.

Trying to end "bait advertising" on air, currently under investigation by N. Y. grand jury (Vol. 11:4-5), 24 TV & radio stations in N. Y. metropolitan area this week voluntarily adopted code of standards designed to curb misrepresentation by so-called "pitchmen." Lone exception was WCBS-TV & WCBS, which contended it never accepted "bait" ads in first place. Announced by N. Y. Better Business Bureau, which had leading hand in drawing up code, standards stipulate that advertised statements shall not only be truthful but shall not create a misleading impression; names of companies offering to demonstrate or to sell in listeners' homes shall be disclosed clearly; advertisers shall provide, upon request by station, data on background of company and its principals and proof of its ability to sell and deliver any advertised item and to fulfill satisfactorily all advertising claims; advertisers must state if they offer higher-priced models of types of production in addition to featured "leaders." State-wide conference on TV-radio fraud, called by Gov. Harriman, will be held March 15 in Albany.

Rate changes: WKRC-TV, Cincinnati, has issued new rate card effective April 1, with different time segments for winter & summer. It moves \$1000 base hour into new Class AA category with new \$190 min. rate. Winter Class AA times are 7:30-11 p.m. Mon.-Sat. & 5-11 p.m. Sun.; summer, 7-10 p.m. Mon.-Sat. & 5-10 p.m. Sun. Class A hour will be \$800 (winter, 7-7:30 p.m. Mon.-Sat.; summer, 10-11 p.m. daily); Class B hour remains \$675. Also April 1: WCSH-TV, Portland, Me. adds new Class AA hour (7:30-10:30 p.m. daily) at \$350, min. at \$70, Class A hour remaining \$300; WLVA-TV, Lynchburg, Va. raises base hour from \$250 to \$300, min. \$50 to \$60. Effective March 15, Crosley Ohio stations raise Class AA min. rate with WLWT, Cincinnati, going from \$160 to \$190; WLWC, Columbus & WLWD, Dayton, from \$140 to \$175.

Maurice Evans' 2-hour TV version of *Macbeth*, carried on *Hallmark Hall of Fame* (NBC-TV) last Nov. 28, being made available free on 16mm black-&-white to high schools & colleges thru Association Films Inc., Ridgefield, N. J.

Signs of times: New York's independent WPIX, lifted by its bootstraps since Fred Thrower became gen. mgr., had best month in its history in Feb., 27% ahead of Feb. 1954; it's reputed to be well in the black now.

Network Accounts: High-ranking shows aren't sacred to old sponsors, as evidenced this week by Philip Morris cancellation of alt. sponsorship (with Procter & Gamble) of *I Love Lucy* on CBS-TV Mon. 9-9:30 p.m., and Lipton Tea dropping of *Arthur Godfrey's Talent Scouts* on CBS-TV Mon. 8:30-9 p.m. Cancellations are effective in fall. Both shows quickly picked up new sponsors, General Foods taking over *Lucy* and CBS-Columbia backing Godfrey. It's no secret that Philip Morris found *Lucy* disappointing as sales stimulus, prompting it to give up full sponsorship 4 months ago (Vol. 10:46). It plans intensive TV spot campaign . . . Pabst weekly fights, fixture on CBS-TV since May 1950, move to ABC-TV June 1, Wed. 10-11 p.m., thru Warwick & Legler; sponsor had turned down CBS-TV request to air fights only twice a month next fall . . . Re-runs of 15 *Disneyland* programs start March 16 on ABC-TV, Wed. 7:30-8:30 p.m., under its 4 current sponsors: American Dairy Assn., thru Campbell-Mithun; Nash-Kelvinator Corp., thru Geyer Adv.; Hudson Motor Car Co., thru Brooke, Smith, French & Dorrance; Derby Foods, thru McCann-Erickson . . . Revlon to sponsor \$64,000 *Question* as substitute for *Danger* on CBS-TV Tue. 10-10:30 p.m., thru Wm. H. Weintraub; Nash-Kelvinator, current alt. sponsor with Revlon of *Danger*, may join as alt. sponsor . . . Quaker Oats to sponsor filmed series *Sergeant Preston of the Yukon* on ABC-TV starting Oct. 1, Sat. 7:30-8 p.m., thru Wherry, Baker & Tilden, Chicago . . . GE to be alt. sponsor (with Campbell Soup) of *Dear Phoebe* on NBC-TV, Fri. 9:30-10 p.m. . . Budweiser Beer to sponsor *All in Fun* variety show on CBS-TV April 2 & 9, Sat. 10:30-11 p.m., thru D'Arcy; it's interim show before Budweiser starts sponsorship of *Damon Runyon Theatre* in same period starting April 16 . . . Maytag buys *Martha Raye Show* on NBC-TV May 10, Tue. 8-9 p.m., and 8:15-9 p.m. portion of May 22 Frank Sinatra spectacular, thru McCann-

Erickson . . . Scott Paper drops *My Little Margie* on NBC-TV Wed. 8:30-9 p.m., is considering replacing it with *Father Knows Best*, thru J. Walter Thompson . . . Texaco drops *Donald O'Connor Show* at end of Aug. on NBC-TV Sat. 10-10:30 p.m., thru Kudner; O'Connor had requested cancellation to free him for other shows . . . Reynolds Metals to drop *Mr. Peepers* on NBC-TV in fall, Sun. 7-7:30 p.m., unless it gets later time same evening . . . Eastman Kodak to shift *Norby* live in black-&-white on NBC-TV to Wed. 8-8:30 p.m. starting April 13, replacing *I Married Joan*, going off air . . . NBC-TV to launch *Ted Mack's Matinee* as sustainer starting April 4, Mon.-thru-Fri. 3-3:30 p.m., shifting *Greatest Gift* to 3:30-4 . . . Sylvania Electric (Canada) Ltd. to be alt.-week sponsor of *I Love Lucy* on 21 Canadian stations starting March 23 . . . Gordon Baking Co. to sponsor special *Kuklapolitan Easter Show* on ABC-TV stations in N. Y., Chicago, Detroit & Elkhart, Ind. April 10, Sun. 6:30-7 p.m., offered also for co-op sponsorship on 110 other stations.

CBS-TV's "Extended Market Plan" to help small-market affiliates by feeding them network programs at minimum cost (Vol. 10:49), got 5 more members this week (4 of them grantees not yet on air), bringing total to 20. New member is WJDM-TV, Panama City, Fla. (Ch. 7), effective immediately. Grantees are KOTA-TV, Rapid City, S. D. (Ch. 3), effective June 1; KLFY-TV, Lafayette, La. (Ch. 7), July 1; WFLB-TV, Fayetteville, N. C. (Ch. 3), Aug. 1; KTVO-TV, Ottumwa, Ia. (Ch. 3), Aug. 1.

NBC-TV's "summer incentive plan," giving free spots as bonus to encourage partic. purchases on *Today*, *Home* or *Tonight* during summer (Vol. 11:8), picked up first sponsor this week—Sergeant's Dog Care Products Inc., Richmond, which bought 20 partic. on *Home* from May 31-Sept. 1, getting 4 free spots as result, thru N. W. Ayer.

NEWSPAPER interests, though they own outright or have stockholdings in some 3 out of every 10 TV stations on the air, have been unusually critical of the TV medium lately. This criticism by newspaper spokesmen, as in the early days of radio, seems to stem from competition for the advertising dollar and for public popularity, stimulated by TV's huge current upsurge. Even some newspaper interests owning or seeking TV have been participating in the attacks.

While acknowledging a recent increase in criticism of TV by some newspaper people, Harold Barnes, director of ANPA's Bureau of Advertising, tells us the attacks are not part of a concerted campaign against TV but are merely spontaneous actions by newspaper managements to protect their own interests.

"I can assure you there is no organized campaign against TV," says Barnes. "These attacks are based on independent decisions by the papers over which we have no control and should not have. In fact, we are proud that representatives of newspapers which own stations have the guts to attack TV's weaknesses."

The criticism is nearly always coupled with an admonition to newspapers to do a better job. This was typified by comment last week of ANPA gen. mgr. Cranston Williams that newspapers must cultivate readership of young people if they are to win "competitive fight" with TV and radio. He addressed a circulation clinic sponsored by N. J. Press Assn. at Rutgers U, New Brunswick.

Theme of self-improvement was also manifest in recent speech by Basil Walters, exec. editor of Knight Newspapers, which own 45% of WAKR-TV, Akron, holds 42½% of proposed grantee of Ch. 7 in Miami, and own 27.7% of uhf grantee WIND, Chicago. Addressing Inland Daily Press Assn., Walters called TV "a challenge, a peril and an opportunity." He said TV could excite interest in news, never satisfy it; challenged commercial spon-

sorship of TV news programs, asking how many in the audience had "heard any reports on TV about the controversy which has been raging the last year about cigarettes and cancer."

Because TV stations are licensed by the Govt., said Walters, the medium "must always be more or less subservient, consciously or unconsciously, to the politicians," whereas newspapers are protected by the Constitution from govt. interference.

Then he put this challenge to his newspaper colleagues to improve their product: "If we fail to fit our products to the TV age, we'll find our readers more and more turning to the national news magazines. Or unless we do the job better than do the TV newscasters, we'll let our readers get fooled into thinking they can get all their news over the air."

"We can do it better" idea was also driven home by research dept. of *Chicago Tribune* (WGN-TV) in recent presentation to gathering of *New York Daily News* sales officials. Called "Fantasy in TV Land," presentation used *Tribune's* survey of Chicago area to attack TV's claims of audience size, audience composition, coverage, attentiveness, cost per thousand, media flexibility. Survey's major points:

Vast majority of TV shows have very little audience, with only *I Love Lucy* seen by more than 50% of all homes while *Tribune* circulation goes to 50% of homes every day; Nielsen audience measurements are inflated by 20% generally, whereas ABC figures are deflated; children constitute large percentage of TV audiences—and they have no interest in commercials; newspapers are better equipped than TV to appeal to either men or women, through special sections (sports, society, financial); too many commercials between programs reduce effectiveness of all; Wheaties, Maxwell House & Colgate each showed sales declines after cutting newspaper ad expenditures to enter

TV, latter 2 showing sales increases after returning to newspapers.

Television Bureau of Advertising promptly hit back at *Tribune's* claims, calling them "some of the 'World's Greatest Nonsense'" from the "World's Greatest Newspaper." Saying TV has "already taken multi-million dollar bites out of advertising investments once earmarked for newspapers," TvB claimed *Tribune's* coverage charges were faulty.

"It points to ratings of less than 50 as a sure sign of TV weaknesses," said TvB. "Even the *Tribune* should know that commercials are repeated during a program, through a rebroadcast cycle, and through a broadcast schedule. This is one of the reasons why TV spot advertising, which the *Tribune* is frankly attacking, is so effective. Any media department junior knows that scheduling spots at various times of the day covers a vast net unduplicated audience far greater than indicated by any per telecast rating." TvB said, too, that children often have decisive influence on brand selection of many products, after seeing TV commercials, and charged that *Tribune's* selection of case-history "failures" were hand-picked and ignored competitive conditions in those industries which were far more important than TV advertising in reducing sales.

Plenty of criticism of TV by newspapers is reported by Feb. 26 *Tide Magazine* on basis of own survey in N. Y., Los Angeles & Chicago. It found most aggressive anti-TV line taken by *New York Post*, whose ads stress newspapers' guaranteed circulation vs. "random" audience of TV programs, with no sure way of knowing who's watching and where. In Los Angeles, *Mirror-Daily News* (owned by *Los Angeles Times'* Chandler family, which controls KTTV) uses Bureau of Advertising's new study, "Working Women," to show that working women don't have time to watch TV at night, prefer newspaper which they can read at leisure. *Chicago Sun-Times*, says *Tide*, makes extensive reference to TV's inexact audience measurements compared to newspapers' guaranteed circulation, often tells a prospective advertiser that dollar stretches further in newspapers and that written word "outlives" spoken word.

American Newspaper Publishers Assn. joined attack on FCC's "diversification" policy this week by filing *amicus curiae* brief bolstering appeal in McClatchy case. McClatchy newspapers have gone to U. S. Court of Appeals to challenge FCC's reasons for giving preference to Sacramento Telecasters in decision on Sacramento's Ch. 10. ANPA's brief asserts that Commission has no authority to discriminate against newspapers as a class—particularly when FCC agrees that newspaper applicant is superior in all other respects and when "monopoly or the threat of monopoly is not present." Brief cites court decisions to effect that though FCC is empowered to give some significance to fact that an applicant has interests in communications media, it doesn't have authority to give it overriding significance regardless of other factors.

Opposition to state-operated educational TV network was expressed this week by Joint Education Committee of Connecticut General Assembly in approving bill to appropriate \$150,000 for "pilot" educational TV programs on existing commercial stations. Little support was expressed for 3-station network proposed by State Board of Education, which holds CPs for WCTB, Bridgeport (Ch. 71); WEDH, Hartford (Ch. 24); WCTN, Norwich (Ch. 63).

Norfolk Newspapers Inc., owner of WTAR-TV & WTAR and publisher of *Norfolk Virginian-Pilot* and *Ledger-Dispatch*, this week bought control of nearby *Portsmouth* (Va.) *Star* from Norman R. Hamilton, who remains as pres. & publisher.

Peaceful coexistence of TV and newspapers—further proof that they are complementary, not competitive—was evidenced by disclosure that daily newspaper circulation in the U. S. last year rose to an all-time high of 55,072,480, continuing its steady postwar rise side-by-side with TV's development. *Editor & Publisher's* 1955 Yearbook reports total circulation last year jumped 600,000 over 1953—highest annual increase since 1950. However, the net loss of 20 newspapers during year—divided 10-10 between morning & evening—was greatest decline for any year since 1943, when 33 dailies went out of existence. There were 1448 evening, 317 morning newspapers as of Sept. 30, 1954, yearbook said. Evening newspaper circulation as of Sept. 30 was 33,367,044, a gain of 307,232 (.93%) over 1953; morning newspaper circulation was 21,705,436, a gain of 292,962 (1.36%). Total circulation of the 544 Sunday papers—same number as 1953—was 46,176,450, an increase of 227,896 (.49%).

Donald W. Reynolds is buying KOLO, Reno (1-kw, 920 kc, CBS) and KORK, Las Vegas (250-watts, 1340 kc, NBC) as companions for his KZTV, Reno (Ch. 8) and KLRJ-TV, Henderson-Las Vegas (Ch. 2), according to FCC applications filed this week. Sellers David McKay, H. G. Wells Jr. & H. Q. Joucken get \$150,000 for KOLO, \$50,000 for KORK. Also included is agreement to reimburse sellers \$40,000 for not re-entering Reno market, \$10,000 for Las Vegas—to be paid in quarterly installments over 5-year period in each case. Reynolds, head of Southwestern Publishing Co., Ft. Smith, Ark., also operates KFSA-TV & KFSA there, as well as several radio stations.

Tower costs go up sharply after the 1000-ft. level, according to Orrin W. Towner, engineering director of Louisville's WHAS-TV, planning to build 2003-ft. tower Vol. 11:8). He estimates these total costs for towers of various heights, including cost of transmitter house, antenna, installation, etc.: With 600-ft. tower, \$250,000-\$300,000; 1000-ft. tower, \$340,000; 1500-ft., \$900,000; 1800-ft., \$1,000,000; 2000-ft., \$1,250,000. On basis of bids received by WHAS-TV, he estimates 2000-ft. tower alone, with fittings but without antenna, would cost \$800,000-\$1,100,000 installed.

Urging immediate grant of new tower site despite opposition by Pentagon (see p. 4), KGEO-TV, Enid, Okla. (Ch. 5) this week told FCC it has operated at total deficit of \$43,715, with revenues totaling \$100,749, from Oct. 1954 through Jan. 1955 because of poor antenna location. Secy. George Streets, mayor of Enid, told Commission stockholders are willing to invest another \$250,000 if site change is approved, listed these monthly operating deficits: Oct. \$8777, Nov. \$10,562, Dec. \$9912, Jan. \$14,464. During that period it cut staff from 44 to 30.

TV cuts into newspaper reading time, too, reported *Birmingham News* Sunday editor James H. Couey Jr. at recent seminar of American Press Institute at Columbia U. Based on study of 5000 families in each of 2 southern cities—one within range of 4 TV stations, other with no TV coverage—he reported families in TV areas averaged 55 min. reading daily paper, those in non-TV areas 1 hour & 58 min. Seminar concluded newspapers should capitalize on reduced time by concentrating on more interesting writing which could be quickly understood.

Educational TV gets sympathetic treatment in March 12 *Saturday Evening Post* article by Joe Alex Morris, titled *TV Without Terror*, stressing its programming potential and progress thus far but warning: "To survive, each station must demonstrate that it can provide entertainment as well as enlightenment, that it can be a forum for unbiased discussion shedding light on the people's problems and that it can serve the best interests of the community that supports it."

Color Trends & Briefs: As aid to color set servicing, RETMA has asked FCC to approve minor addition to color standards to permit telecast of color stripe at right edge of picture during black-&-white transmissions. Similar to technique introduced by RCA (Vol. 10:12), transmission wouldn't affect monochrome signal but would give servicemen almost all he needs to adjust color sets. Currently, servicemen must wait for the infrequent color programs — unless stations telecast special color test signals. RETMA stated that each station need spend only about \$500 for equipment, which has 11 tubes and fits in standard rack about 9-in. high. RETMA said that proposal has been studied by many in industry and there are no substantial objections.

Urging FCC concurrence, RETMA said: "A color TV receiver can thus be installed at any time with positive assurance that the antenna and feedline installation is satisfactory for color operation without the necessity of waiting for an actual color TV broadcast." Besides aiding installation, color stripe can be used for checking (1) setting of master chroma phase control, (2) action of color killer, (3) action of color demodulating and matrixing circuitry. It's expected FCC will approve.

* * * *

Only major TV-radio manufacturer not signing new patent license agreement with RCA, Philco in 1954 annual report released this week (see p. 15) again takes indirect slap at RCA color system by plumping for its own, which it states is based on new principles, and offers "many advantages over the type of equipment previously demonstrated by other companies . . . employs only one-gun tube as contrasted with the current 3-gun tubes, and provides a 21-in. rectangular color picture of remarkable brightness and quality." Report adds:

"Philco has demonstrated its color system and tube to many leading scientists of the industry. They are enthusiastic about its possibilities and the prospect it offers of a simplified, less expensive color service. However, further development work still remains to be done on the new Philco system. It is our opinion that color TV will not become important commercially until a lower cost system than any now available has been developed and perfected." GE, Westinghouse, Sylvania & Avco have taken licenses covering tube & system, report states, and company has also entered into broad cross-licensing agreement with Western Electric, which includes Bell Labs & AT&T patents.

* * * *

Two color set sales successes, reported in March 12 *Tide Magazine*: (1) Motorola distributor Cooper Distributing, Newark, convinced the "king pin" of local tavern owners that color set would increase business. After he bought, other tavern owners climbed aboard and 72 sets were sold within a month. (2) Chicago's Sol Polk wrote to 1700 community leaders, appealing to their civic pride and asking them to help maintain Chicago as "electronic center of the world." He offered \$1095 CBS-Columbia sets at \$700, reportedly sold 100.

Those newly-installed color film cameras are getting more and more use. NBC's WNBQ, Chicago, uses its camera for first time March 13 on *How Does Your Garden Grow?* with live portions in black-&-white. Baltimore's WMAR-TV, which pioneered with color slides, on March 12 colorcast Associated Jewish Charities' prize-winning color film *Behind the Pledge*, produced locally.

March 14 week network color schedules: NBC-TV—March 15, *Home*, fashion show, 11:30-11:43 a.m.; March 16, *Norby*, 7-7:30 p.m. CBS-TV—March 17, *Shower of Stars*, "Burlesque," with Dan Dailey, Marilyn Maxwell, Joan Blondell, Jack Oakie & Skid Johnston, 8:30-9:30 p.m.

PETER PAN, as a TV program and aside from its implications for color (see p. 2), was probably the most successful single show in the history of TV. Some 65,000,000 people, according to NBC-TV's estimates, saw the March 7 show and agreed with pres. Sylvester L. Weaver's pre-show comment: "It's like handing each TV viewer a \$5.80 ticket for an orchestra seat in the theatre."

If Weaver's thesis on color is correct—that it needs "explosions" which become "conversation pieces" — *Peter Pan* was exactly what he has in mind. However, it must be noted that the unrestrained praise evoked by the show was largely without benefit of color—that only small fraction of audience saw it in color, perhaps 100,000-200,000, and that newspaper critics frequently made only incidental mention of color.

Even NBC's newspaper ads after the show, stating that Mary Martin "flew into 65,000,000 hearts," made no mention at all of color. Nevertheless, it's believed the color byproduct will prove to be extremely significant.

Show came after great promotional buildup, and atmosphere was just right. There were "color parties" in dealer showrooms, hospitals, old ladies homes, etc., as well as in private homes. Movies, restaurants and night clubs suffered drastic cuts in patronage. Children were deprived from homework—and lost sleep. Traffic slowed down noticeably. Critics across the nation went wild over it, employing the most extravagant adjectives they've ever used for TV.

Estimates of costs ran up to \$450,000—but sponsors Ford and RCA, with clever and tasteful commercials, got their money's worth. There were immediate demands for a re-run, and NBC is considering doing show again during Christmas season.

All and all, *Peter Pan* drew even greater attention to a medium that has already woven itself deeply into the fabric of American life. From color standpoint, it's up to industry to exploit to fullest the color aspects of the *Peter Pan* success.

Next big color shows, after NBC's *A Connecticut Yankee* March 12, are CBS's *Burlesque* March 17, NBC's *Entertainment 1955* dedicating its new \$4,000,000 color studios in Burbank, Cal., March 27, NBC's *Reunion in Vienna* April 4. In addition, CBS will provide daily *Robert Q. Lewis Show* March 21-25, 2-2:30 p.m., giving dealers opportunity to demonstrate sets. NBC is planning several big color remotes, including coverage of A-bomb tests during April 3-10 week. And looking toward next year's political conventions, network representatives met in San Francisco this week, discussed possibility of carrying them in color.

"When color TV set coverage reaches 50% of the present black-&-white coverage, then small and medium-sized advertisers will begin to consider color TV in more than theory. This is the opinion expressed by media directors polled . . . Estimates run from 18 months to 3 years as to the time when such coverage will be available. In addition to covering 50% of the present black-&-white audience, the cost of color TV must not exceed the present cost of reaching 100% of black-&-white set owners. In stating the 50% figure, the media directors accounted for the 50 major market cities in the U. S."—*Advertising Agency Magazine*, March 4.

Edd Johnson, reporter for *San Francisco Chronicle* and onetime CBS & NBC correspondent, was reported killed in an airplane crash in Mexico March 8. He was a brother of Earl J. Johnson, UP v.p.

Max Liebman, producer of NBC's "spectaculars," has signed new 5-year contract, will continue producing the big shows and performing "other related functions."

LABOR RESTIVE AS WAGE TALKS APPROACH: A guaranteed annual wage in the electronics industry, to compensate for possible layoffs resulting from automation, will be a "major demand" in IUE's contract negotiations this year -- but whether it will be pressed to a showdown depends to a great extent on how the United Auto Workers union fares in its contract talks with General Motors and Ford on such a guaranteed wage. Auto industry talks, which begin next week, will therefore be watched very closely by electronics industry leaders for guidance on what threatens to be a revolutionary development in union-management relations.

Both IUE and UAW are CIO affiliates and share a common policy on automation and guaranteed wage. That policy, outlined last year by auto union and reaffirmed this week by IUE's TV-radio-components conference board at Ft. Wayne meeting, is to seek a guaranteed wage covering 2080 hours of work a year, plus an agreement to provide not less than 48 weeks of actual work at 40 hours each. The latter provision is designed to forestall extensive layoffs and uneven work periods.

Effect of guaranteed annual wage on TV prices is vehemently disputed by union and management. One set maker told us the price of a TV set would "skyrocket". A union spokesman said the net cost would average only an additional 10¢ an hour per worker, same increase granted by many in industry last year with no hike in prices.

RCA will be first electronics company to face issue, its negotiations with IUE starting in mid-April. IUE represents about 400,000 electrical workers, of whom 125,000 are in TV-radio. It has contracts with 87 TV-radio companies. Among them are Bendix Radio, Clarostat, Collins Radio, DuMont, Emerson, Erie Resistor, Federal, GE, General Instrument, International Resistance, Magnavox, Mallory, Philco, RCA, Remington Rand, Sperry, Standard Coil, Sylvania, Thomas Electronics, Warwick, Westinghouse. DuMont presumably won't have to face the guaranteed wage issue until next year, having signed a one-year contract with IUE this week. The settlement on 5¢ hourly pay increase followed one-day strike.

IUE secy.-treas. Al Hartnett said RCA and Philco negotiations may set pattern for entire industry. He commented: "Wage settlements in late 1954 and so far in 1955 have been primarily 'catching up' negotiations. The amounts of settlements are in the range of patterns set earlier in 1954 by the major unions and companies in the industry. Any real indication of the 1955 pattern will not become noticeable until RCA & Philco have begun or concluded negotiations along toward the end of May."

Union is known to be training its most powerful guns on big, diversified GE. Verbal exchanges have already begun, in advance of contract negotiations which start July 15. IUE pres. James B. Carey has stated flatly that union will strike if contract is not signed by Sept. 15. IUE is still smarting from negotiations last year, when it presented 11 major demands, including a guaranteed annual wage, came away with 2.68% hourly wage increase and a few changes in vacation pay. Carey contends that increased mechanization was partly responsible for idling 22,000 GE workers in 1954 and wants to insert safeguards in this year's contract.

GE v.p. & labor relations director Lemuel R. Boulware quickly retorted that "the union couldn't be barking up an emptier tree." He remarked: "There never was a greater lot of bunk than the argument that technological progress throws people out of work." He added that technological improvements, including automation, have made it possible for GE to limit price increases of consumer products to average of 18% since Korean war despite 31% rise in wages and cost of materials.

* * * *

You hear a lot of talk about vertical chassis sets these days, as trade looks ahead to introduction of new models in mid-year. Trade reports, unverifiable but regarded as authoritative, have RCA and Philco bringing out vertical chassis sets

later in year. Other manufacturers may expand their current offerings in this style. Vertical chassis sets can usually be produced a little cheaper than conventional receivers, though the savings have not always been passed on to consumer in form of lower retail prices -- nor are they likely to in near future, in view of low profits.

Determination to expand into vertical chassis is said to have been stimulated by public's preference for more compact cabinets. Admiral and Crosley, both heavily in vertical chassis sets, report especially strong demand from housewives for sets which would be less conspicuous in living room or den.

Philo T. Farnsworth, the TV pioneer now a v.p. of Farnsworth Electronics Co., this week predicted trend to more compact cabinets over next decade, foreseeing the TV receiver of 1965 using a picture-frame CR tube only 3 or 4-in. deep. He made comment in connection with observance of National Engineers' Week.

* * * *

TV production totaled 166,461 week ended March 4, compared to 176,887 units in preceding week and 176,030 week ended Feb. 18. It was year's 9th week and brought output for year to date to 1,515,000 vs. 960,000 in same period of 1954.

Radio production totaled 297,457 (158,181 auto), up from 275,648 week ended Feb. 25 and 271,942 week before. Nine-week radio production was 3,300,000, compared to 1,820,000 in corresponding period year ago.

RETMA's revised Jan. production figures show 654,582 TVs, 1,068,146 radios turned out in first month of year, compared to 420,571 TVs and 871,981 radios in Jan. 1954; 573,837 were auto sets, 280,121 home, 166,585 clock, 47,303 portables.

Trade Personals: Vice Adm. John B. Moss, USN (Ret.), consultant for Bell Aircraft Corp. since his retirement in 1953, elected pres. of Hoffman Laboratories Inc., wholly owned subsidiary of Hoffman Electronics Corp. . . . Vice Adm. J. H. Foskett, USN (Ret.), appointed v.p., RCA Victor Argentina . . . M. M. Elliott, ex-Motorola Canada Ltd., March 1 joined Canadian Westinghouse Supply Co. as national TV sales mgr. . . . Edmond I. Eger, adv. v.p. of Admiral Corp., elected to board of directors; John Huarisa, exec. v.p., adds duties of treas., succeeding Lynn C. Park, retiring due to ill health; George E. Driscoll, secy., also becomes asst. treas. . . . John F. Gilbarte, mgr. of Admiral's govt. sales div., elected v.p., govt. labs div., with headquarters in Washington . . . James T. McAllister, national service mgr., promoted to quality control mgr., radio div., Hoffman Electronics Corp. . . . David Bain, RCA Washington sales mgr. for 3 years, returns to Camden as mgr. of broadcast transmitter equipment, reporting to Henry Duszak; he's succeeded by asst. C. D. (Jim) Pitts . . . Charles W. Wallis promoted to mgr. of employe relations & personnel administration at Sylvania's TV-radio plant in Batavia, N. Y., succeeding David C. Gabriel, who moves to Buffalo headquarters as asst. to personnel director . . . Joseph B. Smith, ex-Bendix, with Avco since 1953, named director of Avco's public relations for Crosley & Bendix home appliance divisions . . . Dr. Richard C. Webb, ex-RCA Labs, recently with U of Denver, advisor of Rockville Co., 788 Adams St., Denver (R. L. Pierzina & E. W. Carlson, partners) reported planning color TV set manufacture . . . P. M. (Mack) Davis promoted to sales mgr. of microwave towers, Emsco Mfg. Co., Houston . . . Gordon A. Mueller named Hoffman Electronics New England regional sales mgr. for TV-radio, Hartford . . . Frank Hogan resigns as CBS-Columbia midwestern regional mgr. to become metropolitan N. Y. sales mgr., Whirlpool Corp. . . . Paul M. Keuffer appointed gen. mgr. of new Cornell-Dubilier plant in Los Angeles due to open about April 15; W. Bert Knight Co. continues as area distributor . . . Wendell Tietsworth, ex-eastern commercial engineering chief, GE tube dept., joins Sonotone Corp. as asst. sales administrator, tube div. . . . Julian H. Allen, since 1953 special asst. in color TV bulb production, named controller of Corning Glass electrical products div. under v.p.-mgr. John L. Hanigan.

DISTRIBUTOR NOTES: Hoffman Electronics expands distribution to 30 states with these appointments: Triangle Electric Supply Co., Bowling Green, Ky.; Robertson Supply Co., Orlando, Fla.; Emmons-Hawkins Hardware Co., Huntington, W. Va.; Radio Electronic Sales, Worcester, Mass. . . . Raytheon: Lincoln Tire Co., Philadelphia (Harry Kravitz, partner) . . . Arvin: Thomson-Diggs Co., San Francisco (C. L. Mason, pres.), replacing Pacific Wholesale Supply Co., San Francisco & Pacific Radio Supply Co., Berkeley; Savage & Sons Inc., Denver (Thomas F. Savage, pres.), replacing Walter Slagle & Co.; Neslo Electronic Distributors, Green Bay, Wis. (Fred & Leonard Olsen, co-owners); Frankland's, Jackson, Tenn. (Leonard Frankland, pres.) . . . Admiral Distributors, Washington, names Wm. R. Douglas appliance sales supervisor . . . Republic Supply Corp., Detroit (Capehart-Farnsworth) elects Kent A. Zimmerman pres., succeeding late A. H. Zimmerman; Wm. Goetterman named v.p.-gen. mgr., assisting Zimmerman in sales, merchandising & purchasing operations . . . Graybar, Dallas (Crosley-Bendix) appoints R. N. Ness mgr. of San Antonio branch . . . Motorola-Detroit promotes Vincent May to adv. & sales promotion mgr., succeeding Dan Leidholdt, who joins sales force . . . Northern Ohio Appliance Co., Cleveland (Motorola) names Theodore Bacon credit mgr.

* * * *

Zenith counsel charged RCA with seeking "to prevent [Zenith] from obtaining discovery of facts showing a vicious world-wide restraint of trade in the electronics industry which RCA counsel by one stratagem or another have managed to keep buried for years" in U. S. Supreme Court brief filed this week as latest move in their long-standing anti-trust and patent infringement actions. RCA counsel Adlai Stevenson and John Cahill last month had petitioned Supreme Court to halt trial of Zenith-Rauland counterclaim suit before Judge Igoe in Chicago Federal court pending ruling on similar issues in Wilmington court, claiming "disorder, duplication and contradictory handling of the same subject matter in 2 district courts are highly prejudicial to the petitioner." Strongly worded Zenith brief charges RCA brief makes "extraordinary and utterly false assertions" and calls it delaying action.

Topics & Trends of TV Trade: Discount houses and fair trade laws—increasingly important facets of TV-radio-appliance merchandising—are due to get a thorough going-over in Washington during next month or so, with prospect of a hot political fight. Dispute is likely to center around recommendation by special 60-man committee of Justice Dept. that the Miller-Tydings and Maguire fair trade laws be repealed. This recommendation is understood to be contained in report to be released at end of month by Attorney General Brownell. It generally reflects policy of Administration that fair trade laws are unenforceable on Federal level—a policy partially reflected in recent ruling by Federal Trade Commission that it's powerless to help states enforce fair trade laws (Vol. 11:9).

Some influential Democrats in Senate, on the other hand, are eager to strengthen fair trade. Notable among them is Sen. Humphrey (D-Minn.), named this week as chairman of Small Business subcommittee to investigate effect of discount houses and fair trade on small business. Committee spokesman said hearings would begin shortly after Justice Dept. committee report is submitted. He also said purpose of subcommittee, whose scope generally parallels that of companion House subcommittee headed by Rep. Roosevelt (Vol. 11:9), is to "create a climate in which the independent businessman can thrive." He said impact of discount house operations on this "climate" would be thoroughly investigated.

* * * *

Sparton plans to stay in TV-radio business, despite United Auto Workers' rejection last week of its proposal to accept 18¢ hourly wage cut to keep plant in Jackson, Mich. (Vol. 11:10), said gen. sales mgr. Don S. Miersch. He said reports that Sparton was considering getting out of TV-radio business if union rejected proposal were erroneous.

Kimble Glass Co., expanding TV bulb-producing plant in Columbus, O., by early 1956 will have more furnace facilities, 216,000-ft. addition to warehouse, more office space—Owens-Illinois v.p. R. H. Mulford, Kimble gen. mgr., stating that reasons for expansion are "continued heavy demand for black-&-white TV tubes and the imminence of volume requirements for color TV."

Picture tube sales in Jan. totaled 866,956 units valued at \$17,662,000, compared to 1,009,398 worth \$20,521,562 in Dec. (5-week month) and 557,681 at \$12,174,000 in Jan. 1954, reports RETMA. Receiving tube sales in Jan. totaled 37,144,000 worth \$26,263,000, compared to 37,908,894 at \$27,391,916 in Dec. and 22,133,000 at \$16,412,000 in Jan. 1954.

Guild Radio & Television Co., producers of Guild brand TVs and Spice Chest & Country Belle wall telephone radios, leases new 10,000-sq. ft. plant at 460 N. Eucalyptus Ave., Inglewood, Cal. TV production is currently concentrated on 24 & 27-in., said partner Lou Dolgin.

Zenith Radio signs lease for national showroom & sales quarters in Chicago's Merchandise Mart, will close down its Furniture Mart showroom. Col. W. W. Yashenko will be mgr.

Motorola adds 21-in. open-face ebony console at \$200, plus new line of portable radios ranging from \$30 to \$60. Three of radios are of steel construction.

New Montgomery Ward catalog lists 17-in. table model at \$114.88, lowest price it has ever had on a TV set.

DuMont announces settlement of its patent infringement suits against Tel-O-Tube Corp. of America.

Much-maligned TV serviceman, often publicized as a gyp, got kudos this week from the people who care the most—his customers. "Great majority" of TV set owners are satisfied with all aspects of TV servicing, reports RCA Service Co. on basis of 7th annual nation-wide survey conducted for it by Elmo Roper. Released in connection with observance of National TV Servicemen's Week March 7-12, survey is not confined merely to RCA servicemen. It showed 90% of sample 5000 families interviewed approved quality of technicians' TV service; only 4% expressed dissatisfaction; 6% didn't know. Some 80% said they planned to use same service company in future, 8% said they would change, 12% were undecided. Service within 3 days of calls was reported by 79%. Though average price of service call increased by 11% over 1954, reflecting-increased age of sets, 87% reported satisfaction with prices charged. In connection with National TV Servicemen's Week, W. W. Watts, RCA exec. v.p.-electronic products, presented statuette to Mission, Kan. serviceman on NBC-TV *Peter Pan* colorcast March 7. Selected from geographical center of U. S., he typified servicemen everywhere, said Watts.

Price's Inc., big Norfolk TV-radio-appliance firm headed by NARDA pres. Harry B. Price Jr., this week was named nation's top appliance retail store by Brand Names Foundation. Award will be presented at dinner in New York's Waldorf-Astoria, April 13. Certificates of merit in appliance category went to Lederer Inc., Bridgeport, Conn.; Wilson's Electric Appliance Co., Gary; Stucky Bros. Inc., Ft. Wayne; Good Housekeeping Shop Inc., Dallas. Mammoth birthday party celebrating 50th anniversary of Price's was climaxed this week by mart-style display in Norfolk City Auditorium of all products handled by store, attended by thousands of visitors, industry officials & TV personalities.

S. J. Preston, EMI patent chief, elected chairman of British Radio Communication & Electronic Engineering Assn., succeeding C. G. White, Kevin & Hughes. C. H. T. Johnson, commercial director of Decca Radar Ltd., was elected vice chairman.

Sir Charles Colston, ex-chairman of Hoover Ltd. (vacuum cleaners & appliances) has resigned as vice chairman of Britain's new Independent Television Authority, in charge of commercial TV system due to start next Sept. (Vol. 10:45).

Dr. Neil H. Jacoby, ex-professor of finances & v.p., U of Chicago, recently on President Eisenhower's 3-man Council of Economic Advisers, elected to board of Packard-Bell Co.

Stanley Bracken, chairman and ex-pres. (1947-53) of Western Electric Co., retires March 31 after 43 years with the company.

Dr. Wilbur W. Hanson, ex-Armour Research Foundation, joins Stanford Research Institute as senior research engineer on design of servo-mechanisms and controls.

Harold S. Miner, v.p. of Manufacturing Trust Co., New York, elected a director of Gray Mfg. Co., Hartford, Conn.

Reginald M. Brophy, director & past pres. of Canadian RTMA, named to represent electronics industry on Canadian Defense Research Board.

— ■ —

William Henry Barsby, 67, retired administrative v.p. of RCA Communications, died March 5 at his home in Redington Beach, Fla.

Raymond B. Meyer, 58, head of communications branch, radio div., Naval Research Lab, died of a heart attack March 8 while at work.

Financial & Trade Notes: Philco again accents its own color system (see p. 11) in annual report released this week, which shows sales of \$349,276,998 in 1954 compared with \$430,419,858 in 1953—the drop resulting from 45-day strike which closed its electronic plants in May & June, together with generally reduced level of appliance & consumer durable goods industries in early part of last year. Net income before income taxes was \$10,543,965, earnings after taxes \$6,768,965 (\$1.69 per share), compared with 1953's \$35,316,077 before taxes, \$18,350,577 (\$4.86)—the 1953 net, however, including \$5,283,000 (\$1.43 per share) income from sale of Philco's TV station WPTZ.

Report states company's accounting policy was changed last year to record on its books estimated expenses for short-term product warranties and salaried employee vacation payments, with result that earnings shown before taxes were actually down \$1,665,000. Comeback from effects of strike were particularly noteworthy in fourth quarter. At year's end, working capital was \$53,175,261 compared with \$54,665,414 at end of 1953, result principally of investment of \$1,960,000 in Philco Finance Corp., an unconsolidated subsidiary which was activated in 1954 to provide inventory financing for its distributors. Total net worth, including \$38,147,537 on plant & equipment, was \$94,886,993, up in year from \$92,465,264.

To help finance govt. work, amounting to \$35,676,000 at end of last year, Philco was using \$28,000,000 V-loan revolving credit. New V-loan credit of \$30,000,000 has been made, to replace old one expiring Jan. 31, 1955, on which interest rate is 3.16%, as against 3.25% under previous credit, and standby fee cut from $\frac{3}{8}$ to $\frac{1}{4}$ of 1%.

During 1954, Philco opened new refrigerator & home freezer plant at Connersville, Ind., acquired plant facilities & assets of Dexter Co., Fairfield, Ia., manufacturer of washing machines & dryers, opened new TV-radio plant at Toronto, increased capacity of its subsidiary Lansdale Tube Co. "in anticipation of color TV." Work for military on guided missiles includes air-to-air "Sidewinder" for Navy. Progress was reported on automatic machinery for Philco's "Surface Barrier" transistors to make them available in volume at relatively low prices for both military & civilian electronic equipment.

Annual meeting of Philco Corp. will be held April 1 in Rm. 320, Land Title Bldg., Philadelphia.

* * * *

Sylvania earned \$9,480,941 (\$2.92 per share on 2,827,390 common shares) after taxes of \$8,900,000 on sales of \$281,641,987 in 1954, compared to \$9,536,181 (\$3.10 on 2,668,812 shares) after \$14,950,000 on \$293,267,408 in 1953 and \$6,960,625 (\$3.04 on 1,870,081 shares) after \$10,700,000 on \$235,023,437 in 1952. In annual report, chairman-pres. Don G. Mitchell said firm set records last year in unit sales of TV receivers and picture tubes. He also reported that second-half sales of \$154,571,349 and fourth-quarter sales of \$80,814,467 each established all-time records for their respective periods. Backlog of defense orders totaled more than \$80,000,000 at year's end, compared to \$90,000,000 at end of 1953.

Commenting on future prospects, he said: "TV is moving into a more stable phase, commercial electronics is developing rapidly, and military electronics will be a strong business indefinitely. The electronics industry currently has a \$9 billion annual volume, and by 1960 may well exceed \$15 billion. However, electronics is but one phase of the broad electrical-electronics industry—an industry which will probably double its output in the next decade, as the demand for its goods and services increases rapidly."

Canadian Marconi reports net income of \$1,083,590 in 1954 vs. \$1,349,243 in 1953.

Among officers' and directors' stock transactions reported by SEC for Jan.: Owen D. Young sold 474 American Broadcasting-Paramount Theatres, holds 1500; J. L. Van Volkenburg bought 100 CBS "A," holds 100, bought 100 CBS "B," holds 200; Charles D. Dickey bought 250 GE, holds 7000; Henry V. Erben bought 3225 GE, holds 9805; Chester H. Lang bought 1443 GE, holds 1476; Donald H. Millham bought 200 GE, holds 809; Frank Freimann bought 500 Magnavox, holds 46,458 personally and 28,080 thru trust; Richard A. O'Connor sold 1500 Magnavox, holds 53,600; Thomas A. Kennally sold 1000 Philco, holds 10,032; Walter Bedell Smith bought 100 RCA, holds 100; Carl J. Gilbert sold 320 Raytheon, holds 1000; Percy L. Spencer bought 2200 Raytheon, holds 2203; John H. Ashbaugh bought 500 Westinghouse, sold 300, holds 3324; John A. Hutcheson sold 661 Westinghouse, holds 453; Emery W. Loomis bought 1650 Westinghouse, holds 2917; A. C. Monteith sold 100 Westinghouse, holds 2044.

Clevite Corp., reporting year was good one for its electronics business though automotive situation was unsettled and military orders down, announced 1954 sales of \$60,148,661, second highest on record, net profit \$2,668,648 (\$1.33 per share) compared with 1953 sales of \$71,304,940, profit \$3,478,611 (\$1.77). Electronics items include direct-writing oscillographs & amplifiers, industrial & laboratory devices, magnetic recording & reproducing heads, piezoelectric crystals, transistors & diodes.

Muter Co. passed its quarterly dividend, pres. Leslie F. Muter explaining it was to conserve cash for oil well drilling program at Ebert, Okla., where last year company acquired 75% interest in 160-acre lease on which 14 wells have been drilled, 2 more planned. Muter investment runs about \$500,000. In 1953, company paid 45¢ and 3% stock dividends, in 1954 it paid 2% stock dividends in March, 15¢ quarterly in Dec.

Emerson Radio's consolidated net earnings were \$499,392 (26¢ a share) in 13 weeks ended Jan. 29, 1955 which compares with \$449,231 (23¢) in corresponding quarter last year. Firm's fiscal year ends Oct. 31. During last fiscal year, net earnings were \$1,884,976 (97¢) on record sales of \$80,559,994, compared to profit of \$2,988,432 (\$1.54) on \$75,926,546 in preceding fiscal year (Vol. 11:3).

International Resistance Co., with TV-radio accounting for 37% of volume, earned \$603,000 (45¢ a share) on sales of \$13,200,000 in 1954, compared to \$508,000 (38¢) on \$12,750,000 in 1953. Edward A. Stevens, v.p.-treas., speaking before Financial Analysts Society of Philadelphia, also stated company this year expects 11-15% increase in sales, 15-20% increase in profits.

Electronic Associates Inc., Long Branch, N. J., reporting that 75% of its work is now on industrial & commercial products, whereas nearly that percentage was govt. work in 1953, had sales of \$4,059,926 in 1954, net income of \$244,557 (\$2 per share) against \$4,273,725 & \$130,685 (\$1.18) in 1953.

General Precision Equipment Co. has acquired Society for Visual Education Inc., Chicago (audio-visual aids & photographic equipment), exchanging 3543 shares of new \$5 cumulative preferred stock and 7077 shares of common stock for all of the Society stock.

James D. Shouse, who rose from the broadcasting ranks to become v.p., director & gen. mgr. of Avco's Crosley & Bendix home appliance divisions as well as chairman of board of Crosley Broadcasting Corp., is disclosed in notice of annual Avco meeting April 14 in Bridgeport, Conn. to be holder of option to buy 12,500 shares of Avco common at \$6.125 per share and 5000 at \$8.12. He already holds 5500 common, 150 preferred. His 1954 salary was \$75,000.

Network TV-Radio Billings

January 1955 and January 1954

(For 1954 monthly reports, see *Television Digest*, Vol. 11:6)
(For preceding years, see *TV Factbook No. 20*, p. 39.)

BOTH CBS & NBC climbed to new record TV billings in Jan., according to Publishers Information Bureau's first monthly report of 1955 released this week—CBS going to \$15,848,607 as against previous high of \$15,060,653 last Dec., NBC to \$13,237,512 as against previous high of \$13,047,419 in Dec. also. ABC was down from its highs of each of last 3 months of 1954, DuMont slumped to \$723,960 from record \$1,457,436 in Dec., even fell to about half its Jan. 1954 billings whereas the other 3 networks were all way up from that month.

Network radio slipped badly, the Jan. total of \$10,785,181 for all 4 falling from \$11,187,227 in Dec., \$13,285,626 in Jan. 1954. Only ABC showed a slight increase over Dec. All were down from Jan. 1954, however—leader CBS dropping by nearly \$1,000,000 from Jan. 1954, NBC by about \$650,000. The Jan. PIB tables:

NETWORK TELEVISION		NETWORK RADIO			
	Jan. 1955	Jan. 1954			
CBS	\$15,848,607	\$10,713,329	CBS	\$ 4,181,305	\$ 5,166,174
NBC	13,237,512	10,116,937	NBC	2,744,204	3,391,873
ABC	3,718,195	2,780,574	ABC	2,487,140*	2,830,654
DuMont	723,960	1,445,608	ABC	1,372,532	1,896,925
Total	\$33,528,274	\$25,056,448	Total	\$10,785,181	\$13,285,626

* In order to maintain continuity and comparability with previously published data, an adjustment factor of 1.817 has been used by PIB in calculating gross network radio time charges for those nighttime network radio programs where ABC Rate Card No. 6 was in effect.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers' Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 40%. However, they're generally accepted in the trade as an index.

TV-radio towers and an appliance plant were among victims of vicious tornadoes and dust storms which struck 12 states March 11. In Pittsburgh, the freak storm was responsible for another freak—a uhf station shifting to vhf (but only for a short time). After storm toppled 500-ft. tower of uhf WENS (Ch. 16) station quickly requested and received FCC approval to broadcast over educational vhf WQED (Ch. 13) on time especially relinquished for it. FCC wired back that this was permissible provided WENS used its proper identification. The authority expires April 1. WENS told FCC it could be back on uhf in 2-3 weeks with temporary 150-ft. antenna, and in full operation from its regular height in 6-7 weeks. Same storm also knocked down tower of radio WLOA, Braddock, Pa., and blew roof off Philco's refrigerator & air conditioner plant at Connersville, Ind. A western dust storm, described in some sections as worst in 18 years, also knocked down tower of KOA-TV, Denver, putting it off air 5 hours.

Efficient adjacent-channel trap, retailing for \$12.95, maintained reception of WJIM-TV, Lansing (Ch. 6) in Saginaw-Bay City area 60-mi. away after start of WNEM-TV (Ch. 5) in latter area, according to WJIM-TV pres. Harold F. Gross. Trap was made by Adelco Co., Detroit, which obtained initial orders for 12,500.

Exemption of TV-radio stations from libel action as result of statements made by political candidates was proposed this week by Rep. Miller (R-Md.) in HR-4814 — identical to S-1208 (Vol. 11:9) introduced 2 weeks ago by Sen. Butler (R-Md.).

Bell Telephone Co. of Canada has let contracts for 38 microwave relay towers & buildings between Toronto & Winnipeg, capable of handling TV network programs as well as TV circuits.

Power boost: CBS's WXIX, Milwaukee (Ch. 19), to 263-kw March 13.

DEMANDING opportunity to put Edward Lamb on the stand, FCC Broadcast Bureau this week filed strong opposition to motion to call off the controversial license renewal hearing and grant immediate renewal of Lamb's license for WICU, Erie (Vol. 11:10). Meanwhile, in Federal court, Mrs. Marie Natvig pleaded not guilty to grand jury charges that she lied 9 times in her turnabout testimony last month.

Examiner Sharfman scheduled oral argument for next Wed., March 16, on the motion by Lamb's attorneys to call off the case. In its reply, Broadcast Bureau said: (1) It's not within a hearing examiner's power to dismiss the proceedings. (2) Dismissal would be premature, since "it is necessary that Lamb be called," and possibly other witnesses.

"It may well be that the testimony by Mr. Lamb will serve to dispel presently outstanding questions," Broadcast Bureau said, "but whether this will be the case can be determined only in the light of such testimony itself." Bureau also opposed motion to drop inquiry into Lamb's countercharge that FCC investigators tried to induce false testimony and caused at least one bribe to be offered. "That representation is false in its entirety," it stated.

None of the 9 points in the indictment of Mrs. Natvig deals with the issues in the Lamb case—all charge Mrs. Natvig with lying when she accused FCC attorneys of "coercion" and when she testified regarding her conversation with an FBI agent in Miami. All indictments are based on her statements made during her second stint on the witness stand. Each count carries maximum penalty of 5 years in prison and \$2000 fine. After pleading innocent, she was released on \$2500 bail pending trial set for April 18. Her court-appointed attorney said she would ask for postponement and file several other motions.

Nomination of Chairman George C. McConaughy to FCC was approved March 9 by Senate Commerce Committee without a record vote. Chairman Magnuson (D-Wash.) said all committee members reserved right to make statements for or against nominee when appointment comes before full Senate for vote, probably early next week. He said committee felt nomination had been "hanging fire for a long time and it was only fair to the FCC to get it moving." Though Magnuson said he didn't know how he would vote, confirmation is regarded certain.

Seeking better rates for cable-microwave service, NARTB's special TV transmission tariffs committee held meeting March 11 in Washington to map comprehensive study of common carrier tariffs. Committee, headed by CBS's Richard Salant, includes Frank Marx, ABC; John Bachem, DuMont; Joseph V. Heffernan, NBC; Chris J. Witting, Westinghouse; Lee B. Wailes, Storer; A. James Ebel, KOLN-TV, Lincoln, Neb.; Harold Essex, WSJS-TV, Winston-Salem, N. C.; W. D. Rogers Jr., KDUB-TV, Lubbock, Tex.

NARTB convention committee meeting in Washington March 16 is expected to get report on whether President Eisenhower will address convention week of May 22 at Washington's Sheraton-Park and Shoreham Hotels. Matter is understood to be before White House committee on President's public appearances. TV business session will be held morning of May 23, with TV panels scheduled May 26, last day. Reception and banquet will be held final night.

Application for new uhf station in Milwaukee—where CBS is now operating one uhf and a second has gone off air—was filed this week by radio WFOX (dairyman Joseph A. Clark), seeking Ch. 31. There are now 170 applications pending, including 17 uhf. [For further details, see *TV Addenda 20-1* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

\$20 Billion-a-Year in Decade

The Electronics Industry: Present Rate and 10-Year Potential

Address by W. Benton Harrison, Vice President-Finance, Sylvania Electric Products Inc.

Before Financial Analysts of Philadelphia, March 10, 1955

MY TOPIC is the electronics industry, and the fact that you wish to devote a session to the electronics industry indicates that you believe electronics is an industry to watch, and that you believe it has growth potential beyond the scope of most other industries. It is my confirmed opinion that electronics is the fastest growing of all the world's major industries. In fact, the potential of electronics has been described as "the world's most promising technological revolution."

When I speak of the growth of electronics, I mean that its potential for growth appears without limit from the standpoint of new products and dollar sales, the expansion of companies already in the industry and the entrance of new companies, the vast number of new applications that will be found for electronic equipment and components, the increased strength that electronics will bring to our national defense, and the greater benefits it will bring to industry, commerce, the home, and the individual.

I am going to dissect the electronics industry into its integral parts, and try to predict the potential for each separate phase of the industry. First, however, I realize that security analysts demand a knowledge of an industry's definitions, and a complete showdown as to what methods were employed in analyzing an industry. Therefore, I think right off the bat we must have complete agreement on what we are talking about when we mention electronics, and, next, I think you should know something about the authenticity of the methods employed in this dissection of the electronics industry.

Definition and Scope of Electronics

The electronics engineers themselves generally despair of furnishing a simple definition of electronics that will provide the layman with a good understanding of what this field of electricity concerns. As a financial officer, I must confess I hardly know a volt from an ampere, and possibly many of you have just about as much technical knowledge as I have. At any rate, let's try a definition from the American Standards Association which says that electronics is "the branch of science and technology which relates to the conduction of electricity through gases or in vacuo." This means that the word electronics is applied to a device or tube designed to make use of electron emission, or to the equipment that employs these components, or to the science that employs this equipment.

What I am discussing today is the science that employs radio receiving tubes, special electron tubes, television picture tubes, and the so-called solid state crystal devices, such as the transistor. In other words, we are talking about such things as television, radio, and radar, but not about home lighting, or electric refrigerators or cake mixers.

Let me say at the outset that electronics is such an enormous subject that it would require a good many men a good many days to speak on all aspects of it. I might try, in a non-technical way, to speak on the technical aspects of electronics; or I might give you a blue sky talk about the multitude of things that electronics will accom-

plish in the years ahead; or I might even give you a talk about how Sylvania fits into the electronics picture. But there has been so little dollars-&-cents information available in the past, and since your interest lies chiefly in that dollars-&-cents area, I have elected to talk on the financial aspects of electronics.

The electronics industry is a relatively new industry, and it is growing very rapidly. Since electronics encompasses a vast multitude of products and systems; since new products and systems are being developed and introduced almost daily; since new companies are entering the electronics field all the time, I can assure you that it has been a monumental task just producing figures relating to sales volume. Until a year ago, no such figures were available; without sale figures, of course, it was impossible to hazard any conjecture about the future of the electronics industry, and where electronics was going was just anybody's guess.

How the Figures Were Compiled

About 13 months ago, however, Sylvania Electric's sales research department prepared for the eastern Regional Conference of the Society of Security Analysts one of the first appraisals of the present and future of the entire electronics industry. That appraisal, since it was an initial one, gave us a sort of platform from which to view the industry. And now, a year later, we have re-assessed the industry and come up with a new set of figures. With a bow to Sylvania's Sales Research Department, I think I can say that the figures and facts you will hear today are completely realistic, and should stand up over the next 10 years with only minor variation.

Since, however, you, as analysts, will want also to assess the credibility of these figures, I should take a moment to tell you how they were compiled. A sales research department couples known facts and figures from the past, with an analysis of current conditions and some crystal ball gazing to determine where the company's markets are weak, where they are strong, what sales methods should be employed, the ideal going rate of production for the months ahead, and many other points of information.

Much of the work is accomplished if we have reliable sources from which to draw historical and current facts. In the electronics industry, we are extremely fortunate in having the Radio-Electronics-Television Manufacturers Association, known as RETMA, which compiles the most exact and reliable industry reports that I know of. Let me say now, I believe our predictions can come to within at least 85% to 90% of accuracy, and possibly better, by an extension of past trends, and by the application of logic to known historical and current facts. We in Sylvania are not soothsayers, but we do draw certain conclusions from available information.

In discussing the various phases of the electronics industry, I shall touch first on the entertainment aspect, which includes radio and television. In this field, there is extremely reliable data available, and plenty of informa-

tion concerning correlative facts, such as the number of wired homes, the rate of family and new home growth, saturation points, and so forth.

In the field of electronics manufacture for national defense, there is good data available to the analysts, but it is neither as fluid, nor is it made available as frequently as that pertaining to the amusement field.

There is considerably less data available on the industry's past and present performance in the field of electronics manufacture for industry and commerce. However, because the industrial-commercial field has developed so much less rapidly than the amusement and defense fields, the sales and production totals do not constitute so important a percentage of the grand total, and, therefore, the absence of data does not seriously detract from predictions of the future of the industry as a whole.

In considering the amusement, national defense, and industrial-commercial aspects of electronics, we are thinking in terms of end products, which means that there are two corollary fields to be considered. One is the manufacture of the electronic components from which these end products are made. We can talk with confidence about two of the major groups of electronic components—radio receiving tubes and TV picture tubes—and have a somewhat less clear view of the other groups of components, such as crystals and special tubes. The other corollary consists of the developments that have made electronic end products possible, and our information here varies from excellent to not so good.

For instance, we have an excellent idea of the number of TV and radio stations, the extent to which police communication has been electronified, the number of short-wave taxi radios, and a great variety of specific data that are known because Federal Communications Commission licensing records are available. We have a reasonable amount of information concerning government purchasing for national defense in the past and its plan for the future.

At the low end of our communications line is information about developments that would help to furnish a trend in the industrial-commercial field. There is little data available on such things as the electronic computer business, developments in the application of electronics to industry, and the like.

Ahead: As Many TV as Radio Homes

One of the two major fields within the electronics industry today is entertainment electronics. Within the field of entertainment electronics, TV is, of course, monumentally the largest factor. A few of the gloomier economists have described the TV industry, as far as future sales are concerned, as past its peak. Actually, the TV industry is not past its peak. It is a brisk, zestful, very young industry that, believe me, over the next decade will have more growth in it than there has been growth from the inception of television to the present time. It is healthy and sound. Furthermore, 1955 will be no exception.

To illustrate this point, let us consider what trade gossip once had to say about the prospect for the TV industry in 1954. Dealers sold 6,400,000 TV sets to the public in 1953. This was an all-time record. When a period of rather severe inventory adjustment set in in the latter part of 1953, "the trade" mistakenly attributed this setback to a decline in buying by the public. So, when 1954 approached, this same "trade" glumly forecast that TV set sales to the public in 1954 would be somewhere around 5,000,000. What happened? Actually, the public bought approximately 7,300,000 sets last year, once again establishing an industry all-time high. The industry adjustment that began in 1953 carried over into the first part of 1954, but it wasn't long before that situation was entirely corrected. The inventory level, including factory, distributor, and dealer, as of last Dec. 31 was approximately 1,840,000 TV sets, and in my opinion this is just about the number of sets required to maintain the normal movement of sets through the various channels of distribution to the public.

We expect that some day there will be just as great a percentage of TV homes as there are radio homes today,

and today there are 46,600,000 radio set homes in the United States. Of those radio set homes, nearly 70% also have a TV set. This high percentage figure, coupled with the fact that by the end of 1955 virtually the entire country will be within range of a good TV signal, means that TV is rapidly approaching the saturation point, which is the point at which virtually every home that is going to have a set already has one.

But don't let that word "saturation" mislead you. Let me point out that industries seldom exist on the basis of initial installation sales only. For example, how much does the automobile industry today rely on selling auto to persons who never owned a car before? Not very much. Initial sales rapidly are losing their importance in the television industry. Assuming marked significance are such factors as wear-out, obsolescence of sets, the number of new homes, and the coming era of second-set TV homes, just as today there homes with anywhere from two to a half-dozen radio sets.

Those are some of the factors that we think will contribute to an excellent TV year in 1955.

6,000,000 to 7,500,000 TV Sets Per Year

In fact, we believe that the public will purchase 6,300,000 black-&-white TV sets in 1955, in addition to approximately 100,000 color sets. Let's analyze that figure of 6,300,000 black-&-white sets. If only 4% of the sets now in use are replaced for reasons of wear-out or obsolescence, that means a sale of 1,300,000 sets. If population growth and establishment of new homes this year proceeds as expected, this might mean the sale of another 600,000 more sets than if the population and number of homes had remained static. The growth of the second-set idea might mean the sale of another 300,000 sets.

These figures—and I should like to say that in each category the estimate is *very* conservative—add up to a sales potential of 2,200,000 sets in 1955. Subtracting this from the predicted figure of 6,300,000 black-&-white sets, that leaves 4,100,000 sets to be marketed to established homes that never have had a TV set before.

As of right now, there are approximately 15,600,000 homes in the United States without a TV set. This means the industry will have to sell one in every four existing homes currently without TV in order to achieve our estimate of 6,300,000 black-&-white sets sold in 1955. That's not too tough an order, and I believe it will be done. Please note that I just said we were using conservative estimates of unit sales.

The average cost of a black-&-white TV set is \$140 factory price. Therefore, if we sell a quarter-million more sets than we have estimated, that will mean an additional \$35,000,000 to the industry; if we sell a half-million more sets than those predictions, that will mean an additional \$70,000,000; and an extra million sets would add a whopping \$140,000,000 to the industry's over-all volume.

As I mentioned previously, the prediction of our future market for TV sets rests entirely on assumptions which I believe are very realistic regarding the increment of saturation, the impact of the second-set home, and the normal wear-out or obsolescence of sets in use. Even though the number of non-TV homes declines appreciably each year, these factors indicate to me that the long-term potential for TV certainly will range between 6,000,000 to 7,500,000 sets per year through the next decade.

Add to this market, the normal healthy demand for home radio sets and auto radio sets, and it is apparent that we have a very healthy industry in those fields that are commonly referred to as amusement devices. The total factory door value of these devices has, in the past year, aggregated less than 1% of the public's personal consumption expenditures. This seems to be one more indication of the conservative nature of our predictions. Total TV set sales, for example, at the factory level, in 1954 were \$1,050,000,000. 1954 was the biggest year yet recorded in the industry, and approximately 7,300,000 sets were sold to the public. This year, as already noted, unit sales will probably fall off a bit, but dollar sales will, at

the very minimum, be right around the \$1 billion mark.

Looking farther ahead to the three-year period, 1958-60, we think annual sales may be around 6,900,000 sets, and that dollar volume will average around \$1,200,000,000 a year. At the end of the decade, in 1964, it is likely that somewhere in the neighborhood of 7,300,000 sets will be sold, and that annual dollar volume will be around \$1,500,000,000.

About 61% of Sets in Color by 1964

In other words, dollar volume of TV sets a decade hence will be 40% to 50% greater than it is today. The increase will, of course, be attributable to a steadily expanding number of color sets. While it is probable, we think, that no more than 150,000 color sets will be produced this year (and only 100,000 of them sold to the public), it is expected that something like 34% of the sets will be color sets in the 1958-60 period, and that by 1964, color will account for about 61% of all sets produced. As you can see, color is on the way, but it will be some time before color sets will be marketed in large quantities, and it will be at least six years before color set production catches up with black-&-white.

Has TV crowded home radio off the map? Hardly so. The manufacturers sold 6,400,000 home radios last year for a total volume of about \$136,500,000, and it is expected another 7,000,000 sets, at a total in the vicinity of \$147,000,000, will be sold in 1955. Market surveys show that more people than ever before are listening to radio and that during the daylight hours when the housewife can't stay in one room, the radio is turned on more frequently than the TV set. It seems indicated that over the 1958-60 period, nearly 7,800,000 radio sets, grossing over \$148,000,000, will be sold each year, and that by 1964, 8,500,000 home radio units will be sold, at a total of nearly \$162,000,000.

The sale of entertainment radios for automobiles will be linked very closely, of course, to the rate of automobile production. It does seem a certainty that virtually three out of every four pleasure cars will be equipped with an entertainment radio. Our researchers show that 4,100,000 auto sets, totaling nearly \$103,000,000 were sold in 1954, and that another 4,300,000, aggregating \$107,500,000, will be sold this year. Auto set sales in the 1958-60 period should average 4,800,000 annually at an average volume of \$120,000,000. In 1964, it is expected 5,600,000 auto units will be sold at a dollar volume of about \$140,000,000.

The Tube, Record & Phonograph Markets

As pointed out previously, we have excellent industry data on at least two of the very important components going into these electronic devices. I am referring, of course, to the receiving tube market and the picture tube market. Naturally those tubes which come with a new TV or radio set are included in the cost of the set and, hence, are not included in this report. However, we do consider the healthy market built around the installation of new tubes as replacements for tubes that have burned out. Before the war, the receiving tube business carried along at a rate ranging from \$10,000,000 to \$12,000,000 a year. But that market has expanded into a business, including both receiving and picture tubes, that exceeded \$170,000,000 last year; is expected to be above \$400,000,000 in the next five or six years; and will go to \$575,000,000 or higher by the end of the decade ahead.

The last factor in entertainment electronics devices is records and phonographs, which should maintain a fairly level volume of sales of between \$120,000,000 and \$140,000,000 a year, at a minimum, over the next decade. In fact, I have heard the high fidelity market alone described as potentially a \$200,000,000 business.

These totals are impressive. The electronics industry sold \$1,400,000,000 in end products for entertainment purposes last year, and this year is expected to attain a volume equally large. But look ahead for just a few years! The average annual sale of entertainment devices, we believe, will increase to over \$1,600,000,000 a year during

the 1958-60 period, and by 1964 should come very close to \$2,000,000,000. In a decade we shall have increased our entertainment sales by over 40 per cent!

We homebodies are apt to think of electronics in terms of these entertainment devices. Entertainment is but one phase—and a rather minor phase, at that—of the electronics industry.

Industry's Biggest Customer: Uncle Sam

By far the largest customer of the industry is the United States Government, and an overwhelmingly large percentage of government purchases is for the armed forces. Electronics has become one of the greatest weapons of war. Today, government purchases of electronics equipment comprise 6.3% of all government war expenditures. Within the decade, this proportion may increase to 10% or higher.

Much of the electronics work being done for national defense may not be discussed because of security reasons. Yet every day we read in the papers about new examples of the part electronics is playing in defense. The guided missile is an electronic weapon. The proximity fuse that explodes when it is close enough to a plane to cause damage, is an electronic weapon. So is radar, which is "the eyes" of fighting men at night and in times of bad weather, and which, also, tracks the target and fires the anti-aircraft and bombardment guns that formerly were trained by calculation or by eye and were fired manually. A bombing plane, for instance, contains thousands of electron tubes that perform a host of functions.

Defense purchases of electronic equipment last year are estimated at \$2,300,000,000, and the total may go up another notch to around \$2,500,000,000 in 1955. But, as the Army, Navy and Air Force become increasingly electronified, we foresee government purchases in the vicinity of \$3,200,000,000 a year in the 1958-60 period, and at over \$4,000,000,000 a year by 1964. These future figures are only estimates, and it is quite possible that government purchases could double over the decade. And, don't forget, this is based on the assumption of no shooting war.

The Non-Military & Industrial Markets

It is true that entertainment and military electronics offer a great future potential—but, then, production and sales in these areas already are immense. But there is one area of electronics in which the surface barely has been scratched, where most of the development work lies ahead, and which some day will compare favorably with the others in dollar volume. That is the field of electronics equipment for industry, commerce, and other non-entertainment, non-military uses.

The figures are not too impressive now: For instance, about \$570,000,000 of sales in 1954, and an estimated \$640,000,000 in 1955. But, by 1958-60, we anticipate annual sales in the industrial-commercial field will be running at the approximate rate of \$900,000,000, and by 1964 the sales figures should be around \$1,300,000,000 to \$1,400,000,000. That is a gain of 130% or more within 10 years.

We all have read about the wizardry of the electronic computers that have been introduced, but those computers are not yet really common currency in offices, laboratories, and factories, as they will be some day. TV will be used for quality control and safety in the factory, and in the home will watch the kitchen stove and the nursery. Electronified kitchen ranges will make the cooking process virtually an automatic one. Many electronic devices are expected to take the hazard and discomfort out of highway travel. Electronic equipment will make airport operations virtually foolproof. These are only a very few of the reasons why we can say there is no ceiling on the potential of industrial-commercial electronic usage.

When all the foregoing is lumped together, it shows that the sale of all electronic end products in 1954 totaled about \$4,300,000,000 and that this year the aggregate will be slightly higher. In another three years or so, over the 1958-60 period, we expect the end product total to exceed \$5,700,000,000, an increase of 33%, and that by 1964,

REFERENCE USE ONLY
DO NOT REMOVE FROM
FEDERAL BUREAU OF INVESTIGATION
electronic end products, totaling about \$7,400,000,000 will be sold. That means that within the decade, the electronics industry will have increased its end product sales by greater than 70%.

But we're not through yet.

Then Add Components, Mark-Ups, Servicing, Etc.

After considering all the end products manufactured in the electronics industry, there still remains a sizeable business in the production and sale of components for repair, which amounted to a volume of \$670,000,000 last year, and will continue to grow as more and more end products are placed in use. These components include such things as tubes of various types, capacitors, transformers, resistors, speakers, dials, knobs, etc. It is estimated that repair parts sales this year will fall not far short of \$800,000,000 while in 1958-60, the total should reach \$1,250,000,000. By 1964, we expect this total to be in the neighborhood of \$2,300,000,000, an increase of nearly 250%.

Another aspect of the over-all performance of the electronics industry is the revenue created by the sale of end products and parts through channels of distribution. You will note that where I have used dollar figures in discussing annual sales for various products, I have used totals calculated at "factory door" price levels. Beyond this, there is, of course, the "mark-up" which the distributor and the dealer places on the product. These revenues exceeded \$2,000,000,000 in 1954, and will be on approximately the same level in 1955. By 1958-60, "mark-up" is expected to pass \$2,800,000,000, and should rise to around \$4,200,000,000 in 1964. At the same time, repairmen's service charges are expected to show a gradual

increase from \$925,000,000 this year to \$1,400,000,000 ten years from now.

To round out the picture of the electronics industry, we must consider the broadcasting end of the business from the point of view of revenues. TV and radio broadcasting revenues in 1954 amounted to about \$1,140,000,000, and should show a slight increase this year. It is predicted, however, that these revenues should average around \$3,000,000,000 by 1958-60, and at the end of the 10-year period are expected to top \$5,000,000,000.

A \$20 Billion Industry in 10 Years

Thus we see that from the standpoint of sales and revenues, the electronics industry is today virtually a \$9,000,000,000 industry. In the three-year period, 1958-60, total sales will come close to \$14,000,000,000 a year. And, ten years from now, in 1964, we are positive we will be justified in calling electronics an industry with sales and revenues totaling over \$20,000,000,000 a year.

That, gentlemen, is the electronics industry. It was virtually unheard of prior to World War II, except for radio. It came into its own during the war years and played a very great role in helping to win the war. After the war it sagged for a time, but gained powerful momentum suddenly with the advent of television and the upsurge in national defense.

I repeat, today electronics is a \$9,000,000,000 industry; by 1960 it will be a \$15,000,000,000 industry; and by 1964 it will be a \$20,000,000,000 industry. That means that within a decade it will have more than doubled its present size. It is extremely difficult to envision any other major industry that will grow that fast between now and 1965.

SUMMARY-INDEX OF THE WEEK'S NEWS—March 19, 1955

UNUSUAL STATION-AID PROJECT set up by GE to help troubled stations with financial assistance, management counsel, sales help, film library (pp. 1 & 6).

FCC SHUNS STRONG MEDICINE in response to Plotkin & Jones reports, cites record of TV expansion, urges promotion of all-channel sets (p. 2 & Special Report).

END OF VHF-ONLY SET OUTPUT to be asked by Sen. Magnuson at special manufacturers' meeting, but set makers take dim view—unless there's incentive (p. 4).

NEW TV-MOVIE PARTNERSHIP, geared to ABC's Disneyland formula, bears further fruit as Warner Bros. signs for hour show; other majors sure to follow (p. 4).

TAMPA VHF STARTS, UHF GOES OFF in Charlotte, N. C. pending transmitter site change; 428 TV stations now on air, including 112 uhf (p. 5).

ROANOKE Ch. 7 CP TO WDBJ recommended; AFL seeks to block Miami grant to Cox-Knight-Trammell; Providence's WNET wants Hartford's Ch. 3 (p. 7).

TAX REPEAL BILL COULD COST TV TRADE MILLIONS by wiping out section of law permitting deductions for estimated expenses on warranties (p. 11).

FIRST SOFTNESS IN TV MARKET NOTED in March, though first-quarter retail sales of 1,800,000 TVs are predicted, slightly higher than year ago (p. 11).

TINKERTOY-DESIGN TV SETS seen in production within year, using radically new method of construction said to cut costs, improve reliability, ease repair (p. 15).

NEW TRANSISTORIZED COMPUTER circuit developed by Philco said to make possible high-speed computers, low-cost, compact, suited to mass production (p. 15).

"COLOR SPREADS"—90-sec. participations at \$71,000 each—will inject "magazine concept" into new NBC spectacular series this fall (p. 9).

LAMB CASE GOES BEFORE FCC as attorneys appeal examiner's refusal to call off hearings and grant immediate renewal of Erie TV license (p. 9).

Full Text of FCC Reply to Senate on VHF-UHF Problems Published as Special Report With This Issue

GE BANKING UNUSUAL STATION-AID PROJECT: Giant General Electric Co., convinced there is nothing wrong with uhf that adequate market, proper management and enough funds can't solve, is throwing the weight of its pocketbook and prestige behind a unique plan to help stations that are in trouble -- including some vhf.

With an available fund of undisclosed amount, approved by the GE board of directors, electronics div. v.p. Dr. W.R.G. Baker and staff have helped set up a new company called National Affiliated Television Stations Inc., through which member stations can be provided with direct financial assistance where required, management counsel, national sales organization and a basic film library.

Prime mover in unusual project, reminiscent of GE's sponsorship of new power projects in the early days of Electric Bond & Share, is Ely A. Landau, whose National Telefilm Associates Inc. has some 700 hours of film available to start a program library service. He's exec. v.p. of the new NATS. Chairman of the board is Joseph Justman, co-owner with Desilu (I Love Lucy) of Motion Picture Studio Center, Hollywood. Oliver Unger, v.p. of National Telefilm, is v.p.; Berman Swartz, Hollywood attorney and movie producer, is secy.-treas. Staff of experts is now being mustered, including an as yet unrevealed "prominent broadcasting figure," who will be pres.

GE will own no stock in NATS, a Calif. corporation capitalized at 1,000,000 shares of \$1 par, not to be publicly offered. But GE's pres. Ralph Cordiner will designate 2 members of the board within next few weeks. Spadework on the project was done for GE by Wm. J. Morlock, gen. mgr. of commercial equipment department, and Glenn R. Lord, mgr. of broadcast equipment manufacturing, who for the last several months has been surveying stations reported to be in difficulty.

There is no secret of fact that GE's interest stems from concern about equipment credits, about slowdown in new station construction, about fact that 45 have quit the air -- and, of course, about its equipment inventories. Nor is it any se-

cret that the programmers, engaged in a cutthroat scramble for business on the relatively few TV stations (428) are finding it harder to collect rentals from certain stations. There's no available estimate of the number of outlets in trouble.

Unlike Westinghouse, GE's policy is to stay out of the broadcasting business -- except for its home-based TV & radio stations in Schenectady. So GE is unlikely, Dr. Baker states, to go into uhf operation on its own, as have NBC, CBS and Storer. But it is banking heavily on uhf, he said, out of conviction that "uhf as a TV service is sound and is the basic key to the further growth of TV coverage." Also, he added, "because there is a definite place in a national TV service for the independent TV station just as there is a definite place for the independent radio station."

Whereas Dr. Baker spoke of GE's "obligation as a corporate citizen," Justman disclosed that his interest was aroused by watching several uhf operations, including the resuscitation of long-beset KVVG, Tulare, Cal. (Ch. 27), the former Sheldon Anderson outlet which is now owned by Justman and adman Milton B. Scott (see p. 16). In his survey, Lord said that he found many anomalies -- highly successful uhf operations on the one hand, yet extremely depressed and shaky ones in equivalent market situations. Some of the latter justified direct banking aid over and above eased equipment credits, in his opinion. That is, assuming that management, programming and sales aids can also be provided.

That more uhf revivals are in the wind was indicated last week when the 2nd Norfolk uhf to quit changed hands (Vol. 11:11), and there's a deal in the making whereby Mrs. Louise Pursley's WKAB-TV, Mobile, Ala. (Ch. 48), off the air since last Aug. 1, will be taken over and reopened by George Mayoral, operating the reputedly successful WJMR-TV, New Orleans (Ch. 61).

[For further details about the GE-NATS project, see p. 6.]

NO 'CURE-ALL' FOR TV ILLS, FCC TELLS SENATE: Drastic remedies for uhf and network problems will not come from FCC. In fact, Commission feels rather proud of its record in bringing TV service to the American public during the 3 years since end of freeze. If strong medicine is called for, Congress will have to prescribe it.

That's the essence of FCC's much-awaited comment on the Plotkin and Jones reports, transmitted to Senate Commerce Committee March 18 (full text herewith as Special Report). Committee chairman Sen. Magnuson's quick reaction was to state:

"Failure to advocate immediate remedial action...could soak the householder millions of dollars. We can solve this thing without this expenditure, which I'm sure everyone, FCC included, does not want to happen."

Magnuson was referring to de-intermixture, apparently, when he spoke of the "millions of dollars" public might spend, because he said he hopes that "FCC will move before it is too late to de-intermix anything. Sometimes, delay can prove to be worse than immediate adverse action."

Commission comment was very much as expected (Vol. 11:11), as it respectfully invited Congress to take responsibility for anything like shifting all stations to uhf, starting extensive de-intermixture of vhf-uhf, trying to get more vhf from military services, telling networks whom to affiliate, etc.

Commission debated everything it could think of before sending response to Senate Committee. It even mulled a possible freeze on grants to maintain status quo, after directing staff to draft a freeze proposal for discussion purposes -- but no one ever expected freeze to be declared.

With confirmation of chairman George C. McConnaughey by Senate March 14, without objection from any Senator, it's expected Commission will show more cohesion than it has at times recently. It's also expected to retain strong conservative aspect, reflecting McConnaughey's basic characteristic.

* * * *

Commission indicated it believes it is already doing all it can -- except for, possibly, another look at "selective de-intermixture" -- but that Congress can help with several specific actions now. FCC said Congress could:

(1) Encourage production of all-channel sets by removal of excise tax and/or

getting manufacturers to agree to produce such sets voluntarily. Chances of voluntary agreement without the tax incentive are virtually nil (see p. 4).

(2) Grant FCC extra funds to conduct full-scale study of "networks, advertisers, agencies, talent, independent film producers and distributors," etc.

Moving all stations to uhf or adding new vhf channels, the FCC said, "would involve such tremendous dislocation of existing operations and have such a severe impact on millions of viewers that such action should be considered as a possible alternative only if Congress itself were to determine that the long-run benefits to the public required adoption of such drastic remedies."

Complete network-programming study might well be valuable, Commission said, and it urged appropriation of funds via Congressional resolution, as was done for 1935 telephone investigation. "We are prepared," it said, "to present to the Committee in detail the subject matter to be covered by the proposed study [and] the funds and staff required."

* * * *

Commission recapitulated its moves to help hard-pressed stations and said: "No one of these moves, in and of itself, provides or is intended to provide any cure-all. But their cumulative effect, we believe, will be beneficial." It cited:

(1) Change in its multiple ownership rules permitting well-heeled groups to acquire 2 uhf stations -- as accomplished in Milwaukee, Miami and Portland, Ore. and pending approval in Buffalo and Hartford areas.

(2) Permitting satellites to rebroadcast other stations' signals, thus avoiding costs of producing local programs.

(3) Starting rule-making proceedings to establish low-cost low-power stations and to set up "5-mile rule" aimed at preventing "market straddling" by big stations.

(4) Moves to reduce cable-microwave costs by rule-making aimed at encouraging stations to build private links and by "continuing to review" AT&T's charges with the objective of keeping them same or reducing them.

Commission seemed a bit hurt that Congress doesn't seem to give it credit for speeding growth of stations since freeze. It prefaced its comments with reminder that "positive advances" should be noted -- that number of stations has grown 4-fold since end of freeze; that sets in use have increased from 20,000,000 to 35,000,000; that about 70% of homes have TV; that some 90% of people live within range of TV signals; that 255 cities have at least one station and 100 have 2 or more.

Commission indicated it's concerned about future expansion, however, saying: "It is essential that TV's capacity for future growth not be impaired by any artificial curtailment of channel space. To achieve its full potentialities, we believe TV will eventually utilize a number of channels in the order of those presently allocated to it, just as AM broadcasting developed its present national pattern within the 107 channels allocated to that service." FCC thus agreed that 12 vhf channels aren't enough -- that the 70 uhf channels must be used.

* * * *

Next move is up to Sen. Magnuson and his committee. He's expected shortly to name as chief of 9-man investigatory staff Sidney Davis, currently serving as gen. counsel of Senate Judiciary monopoly subcommittee. No Milquetoast, 37-year-old Davis has reputation of "trustbuster", gave Dixon-Yates principals rough time in recent hearings. He's on leave from N.Y. firm of Phillips, Nizer, Benjamin & Krim, which has large motion picture practice. In 1945, he served in anti-trust div. of Justice Dept., before that was law secy. to Supreme Court Justice Black. Committee's regular communications counsel, Nick Zapple, will coordinate activities.

Hearings are expected to begin next month. Commission is a bit confused, meanwhile, by Sen. Magnuson's statement after he read Commission comments, that he "expects the Commission to take specific steps to remedy the problem by the time it appears before the Senate Committee."

A good verbal preliminary bout on subject is coming up March 30, when Federal Bar Assn. stages debate between Harry Plotkin and CBS v.p. Richard Salant -- a couple of the nimblest legal minds in the business -- in Washington's Willard Hotel.

MAGNUSON TO ASK 'ALL-CHANNEL PLEDGE': An extraordinary meeting of virtually all TV set manufacturers has been called for 10:30 a.m. April 25 in big Senate Caucus Room by Chairman Magnuson (D-Wash.) of Senate Interstate & Foreign Commerce Committee.

He'll ask all manufacturers to "take the pledge" -- the pledge to stop making vhf-only sets, put all-channel tuner in every receiver. Senator's laudable aim is to help uhf, but barring a near-miracle, it's evident from preliminary industry comment that he will not come out of meeting with any kind of industry-wide commitment.

Meeting's secondary purpose -- to drum up support for legislation to exempt all-channel sets from 10% Federal excise tax-- is due to get unanimous backing. The attitude of every TV manufacturer we've contacted is: "Sure, we'll switch over to all-channel if the excise tax is taken off, but we can't do it until then." Some set makers raise question of anti-trust laws, whether such an agreement would be a violation. To them, Sen. Magnuson has this reply:

"If they agreed among themselves, they would be technically in violation of the anti-trust laws, and in order to solve that problem we would have to change or make an exception in the laws, [but] if they agreed with me or with the Committee to do it, they would not be in violation."

The large set makers we contacted this week took dim view of the whole idea. While most said they wouldn't make up their minds until they heard what the Senator had to say, they made their position pretty clear. Their principal points:

(1) They are being asked to raise prices artificially in a market where price is all-important. (2) Manufacturers who are not a party to the agreement, or who violate the agreement, would have an unnatural price advantage over the others. (3) Plan would penalize people in vhf-only areas by forcing them to pay for built-in uhf tuners which they can't use. (4) Programming, not sets, is uhf's big problem.

[For text of Sen. Magnuson's telegram to set manufacturers, see p. 13.]

* * * *

Uhf excise tax exemption bill, HR-4070, authored by Rep. Ikard (D-Tex.), is still awaiting report from Treasury Dept. and action by House Ways & Means Committee. It has strong support of NARTB, RETMA and presumably Sen. Magnuson's Committee -- as well as express backing of FCC majority (see p. 2). Senate majority leader Lyndon Johnson (D-Tex.) is also reported to favor it -- all of which add up to conclusion that its passage is definitely a possibility this session.

'WARNERLAND'—NEW TV-MOVIE WEDDING: It has always been a foregone conclusion that movies and TV are complementary media -- that they can work well for each other and with each other. TV needs Hollywood's know-how and its product. The movies need TV because it's the ideal medium for promotion and advertising of theatrical films.

It took a merger of movie showmen and a TV-radio network (United Paramount Theatres-ABC) to bring about the real wedding, which resulted in the biggest complete and unqualified programming hit of the year -- Disneyland.

One of TV programming's big question-marks has always been: When will movie producers open their vaults to TV? Several times in the past they have appeared very close -- but fear of exhibitor reprisals has always held them in check.

AB-PT and Walt Disney finally showed the way, by establishing a new formula. Whatever doubts the exhibitors may have had about the big Disneyland TV project have been completely dispelled at the boxoffice by cascading grosses of Disney productions plugged on TV. Likewise, each Disney movie-theatre success has delighted Disneyland sponsors and ABC brass -- a sort of "perpetual promotion."

When will the producers open their vaults? We think they're open now -- not on the basis of helter-skelter highest-bidder release of old films for the "late late show" -- not for maximum immediate gain, but on a proprietary, sponsored network show basis (though there seems to be no good reason why the Disneyland formula could not be applied with equal success to syndicated film).

First of the so-called "majors" to go for the Disneyland formula is Warner Bros. -- and it's another big plum for up-&-coming ABC. Warners' show, tentatively slotted for Tue. 8-9 p.m. beginning next Oct., follows Disneyland pattern so closely

that it might well be called "Warnerland". First year's series will consist of 39 hour-long shows, each keyed to theme of romance, adventure, or "adult western," followed by 13 repeats of best ones in series.

Many of the programs will be new, filmed especially for TV (though best ones may wind up in theatres later, like Disney's "Davy Crockett"). While both Warners and ABC are silent on plans for possible use of old theatrical films, there is no doubt that this is contemplated. Like Disneyland, program will be offered to outside sponsors, with moviemaker getting in plenty of plugs for his current films -- through such devices as clips, behind-the-scenes shots, star appearances, etc.

Other moviemakers are eyeing Disneyland formula -- as are other networks -- and you can put it down as certain that Warners won't be the last major producer to come up with its own something-old-something-new TV-movie program package.

TAMPA VHF STARTS, CHARLOTTE UHF OFF: Number of TV stations on air remained at 428 this week as Tampa-St. Petersburg area got its 3rd outlet and Charlotte's recently sold uhf signed off while it seeks new transmitter site.

WTVT, Tampa (Ch. 13) began test patterns March 14, will debut April 1 as CBS basic. It's second vhf to start this year in area where St. Petersburg's municipally owned WSUN-TV (Ch. 38) began as first outlet in May 1953. WTVT has 50-kw RCA transmitter, 838-ft. Ideco tower and 12-bay antenna. W. Walter Tison, operator of local radio WALT, is largest stockholder, with 20% ownership. Other principals include ex-Gov. Doyle E. Carlton, former state Sen. David E. Ward and H.H. Baskin, ex-mayor of Clearwater. Tison is v.p.-gen. mgr.; Dan H. Smith, asst. mgr.; Monte Gurwit, program mgr. Base hour rate is \$400. Rep is Avery-Knodel.

WQMC, Charlotte, N.C. (Ch. 36) suspended operation March 15 while it works out details of shift to "more centrally located site." Station told FCC it will file for new STA April 28. It went on air in Dec. 1953 as WAYS-TV, was sold end of last year to local advertising man Hugh Deadwyler for token \$4 (Vol. 10:51 & 11:1).

Personal Notes: Thomas E. Knode, NBC director of station relations, resigns April 1 to join reps Edward Petry Co. as v.p. & gen. mgr. for TV, replacing Henry E. Ringgold, retired; Donald J. Mercer is promoted to succeed Knode . . . Thomas C. McCray placed in charge of all radio network activities of NBC western div., continuing as gen. mgr. of KRCA, Los Angeles & KNBC, San Francisco and reporting to exec. v.p. Robert W. Sarnoff; Frank A. Berend, onetime NBC western div. sales mgr. most recently asst. to western v.p. John K. West, resigns to join Warwick & Legler, Los Angeles, in undisclosed executive capacity May 1 . . . Robert W. Sarnoff, NBC exec. v.p., elected to board & exec. committee of Radio Advertising Bureau . . . Randall R. McMillan, purchasing mgr. of RCA Communications Inc., named NBC purchasing agent, succeeding Wm. D. Bloxham, retired; McMillan reports to Wm. S. Hedges, v.p. in charge of Integrated Services . . . Paul W. (Fritz) Morency, v.p. & gen. mgr. of radio WTIC, Hartford, elected pres. of licensee Travelers Bestg. Service Corp., applicant for Ch. 3 there . . . David M. Sacks promoted to gen. sales mgr. of KGO-TV & KGO, San Francisco, succeeding Vincent A. Francis, now ABC-TV western sales mgr. . . Ernest de la Ossa resigns as mgr. of sales development, WRCA-TV & WRCA, his former position of station mgr. having been absorbed recently under v.p. Hamilton Shea . . . Barney Ochs named sales mgr. for Crosley stations, Atlanta, replacing George Moore, now sales mgr. of Beeland-King Film Production Co., Atlanta . . . L. A. (Duke) Larson promoted to sales mgr. of Hearst's newly acquired WTVW, under gen. mgr. I. E. Showerman; Mel Quinn, ex-WBAL-TV, Baltimore, named program mgr. . . Amos Baron, ex-KABC-TV & KABC, named sales mgr. of KCOP, Los Angeles . . . Lewis P. Johnson, ex-Katz Agency, named asst. to Robert C. Wood, Storer midwest sales director, Chicago . . . Jack Burnett, gen. mgr. of KULA-TV & KULA, elected pres. of

Hawaiian Assn. of TV-Radio Broadcasters . . . Earl (Cy) Donegan Jr., ex-MPTV, named sales v.p., Minot TV Inc. . . . David Savage promoted to asst. to Reub Kaufman, Guild Films pres., will continue as liaison with Vitapix Corp.; John J. Cole, ex-MPTV, named western div. sales mgr. . . Marvin Barrett, ex-*Time Magazine* and son-in-law of songwriter Irving Berlin, named TV-radio editor of *Newsweek*, replacing Joan Walker, resigned . . . Jon Fernandez, ex-Cecil & Presbrey, joins TV-radio dept., Needham, Louis & Brorby, N. Y. . . Curt Hoffman, ex-KLZ-TV, Denver, named program director, KFBB-TV, Great Falls, Mont. . . Mrs. Alice Brewer White named director of women's activities, WVEC-TV, Norfolk . . . Norman S. Livingston, once with WOR-TV & WOR and recently head of own film production firm, named exec. v.p. of Telenews Film Corp.

Meeting with President Eisenhower March 15, RCA chairman David Sarnoff expounded his long-held thesis that U. S. should devote far more energy and effort to prosecution of the "cold war" of psychology behind the Iron Curtan. President was so interested that he kept Gen. Sarnoff half-hour into lunch period, had him return for hour's session with top advisors. White House press secy. James Hagerty, while not disclosing Gen. Sarnoff's ideas, said he made "some very excellent suggestions." Meetings started speculation President may give Gen. Sarnoff major assignment in "cold war" field.

Wm. J. Convery Egan, ex-State Dept., who was senior public affairs officer in office of High Commissioner for Germany, appointed director of Radio Free Europe, replacing Robert E. Lang, resigned. Appointment was announced by Arthur W. Page, chairman of executive committee, Free Europe Committee Inc., 110 West 57th St., N. Y.

GENERAL ELECTRIC may "bank" TV stations deemed worthy, whether or not they have GE equipment, it was indicated by executives attending news conference in New York's 21 Club March 18 to announce plan to back new National Affiliated Television Stations Inc. (p. 1). Assistance will take the form of cash loans by GE and/or deferments of film rentals by National Telefilm Associates, 625 Madison Ave., N. Y., whose pres. Ely A. Landau heads up NATS. GE's Dr. W. R. G. Baker called project "the first sound, concrete plan [to] alleviate the growth pains of a true national TV service."

Dr. Baker endorsed uhf unqualifiedly, noting GE's position as an equipment manufacturer, receiver manufacturer and advertiser. Without spelling out specific banking details, he implied that funds will be advanced to about 30 stations—after GE's own experts have considered NATS recommendations and specific situations. He said:

"We have not limited ourselves to acting the part of interested observers. With the help of others who also have a considerable stake in the success or failure of a national TV service, we sent teams into the field to study the reason why one station would be successful and why another, under similar market conditions, would fail. What we discovered is no secret. Successful stations, whether uhf or vhf, have all possessed certain factors—market, programming, efficient management, sound financial backing, and access to national advertisers. The lack of just one of these factors would be enough, we found, to tip the scales and prevent successful station operation. Lack of just 2 could and usually would be fatal . . . In the factors I listed, 4 of the 5 were variable. Certainly the market itself could not be changed, but the others offered an elastic degree of variation."

That GE will be welcomed as "angel" to stations needing help, goes without saying—and NATS v.p. Oliver Unger said: "Preliminary surveys indicate that the welcome mat is at the door of many stations and not only those with a mortgage under the mat." National Telefilm, he said, now serves 190 stations, is about to announce some

new TV film packages that will bring its library up to 700 hours. In its catalog are such TV series as *Orient Express*, *China Smith*, *Play of the Week*, *Police Call*, *International Playhouse*, *Roller Derby*, *M.D.*—plus 156 oldies and 33 westerns.

NTA obviously cannot be the exclusive supplier of the NATS affiliates, said Unger, for no single supplier has the capacity. "We invite others in the TV distribution field, in their own self-interest, to join us in this effort to keep alive the lifeline which sustains us all."

Though personnel was notably unmentioned, chairman Joseph Justman promised: "A national sales force geared up to work both independently and together with the national reps of the selected stations. The library of NTA on favorable terms and conditions. Help on spot and local sales. Financial assistance. Management advice & counsel."

Observers noted that the film folk were more inclined to offer "all things to all men" than were the equipment people—and the first extensions of credit will be watched with intense interest. They presumably will be divulged, in some instances, in FCC files—especially if some go to revive any of the 39 uhf stations that have quit the air. Twelve of the 39, incidentally, were GE-equipped.

GE had its top broadcast equipment executives, counsel and publicity men on hand—as if to emphasize its all-out support of the NATS project. Besides Dr. Baker and Mr. Morelock, its contingent included Paul L. Chamberlin, mgr. broadcast equipment, and Frank P. Barnes, marketing mgr. Latter had just returned from Oklahoma City, where at March 14 public auction of Byrne Ross group's bankrupt KMPT (Ch. 19), which quit air last Feb. 4, he bought up all the "personal property" as a package for \$36,000. This included 12-kw GE transmitter, 2 GE studio camera chains, 900-odd ft. of coaxial transmission line, monitors, amplifiers, office equipment, etc. The 40 acres of real estate, transmitter building and 900-ft. tower, as a separate package, fetched \$44,000 from a realtor. Among KMPT liabilities when it went bankrupt was about \$200,000 owed to GE on equipment.

President will probably address NARTB convention in Washington week of May 22, his appearance having been cleared by a White House calendar committee this week. Final decision will be made shortly. Convention plans really got rolling this week, with announcement of further details of agenda. May 24 will be Government Day, featured by 90-min. panel discussion by all 7 members of FCC, followed by questions from floor. Rep. Priest (D-Tenn.), chairman of House Commerce Committee, will speak during day; Sen. Magnuson (D-Wash.), chairman of Senate Commerce Committee, will speak at another time during convention. FCC chairman McConaughy will be luncheon speaker that day. Engineering sessions will be held May 25 & 26. TV portion will include discussion on boosters & satellites by Dr. George Brown, RCA, Ben Adler of Adler Communication Labs & Gene Overmair, Sylvania; talk on proof of performance measurements by Richard Blackburn, WHEC-TV, Rochester, N. Y.; network transmission problems in monochrome & color by AT&T representative; operational economies in programming and microwave systems by undisclosed speakers. In addition, a special projects exhibit will be set up at convention, depicting role of TV-radio in enlisting public support for certain non-commercial & non-partisan national campaigns. Exhibit will be joint venture of NARTB and Advertising Council.

"Page One Award" for outstanding accomplishments in TV-radio will be presented April 29 to Edward R. Murrow and Fred Friendly for *See It Now* (CBS) by N. Y. Newspaper Guild. Special award goes to *New York Daily News'* veteran TV-radio critic Ben Gross.

Largest community antenna system in U. S., serving 6000 subscribers in Williamsport, Pa., was sold to Texas investment group this week for undisclosed sum. System had been built by Jerrold Electronics Corp., with financing by investment firms J. H. Whitney & Co., Fox, Wells & Co. and Goldman Sachs & Co. Purchasers are some 25 businessmen, headed by pres. Clive Runnels Jr., Houston; other directors, all of Houston, are John C. Flanagan, Jack Binion, Wm. H. Francis, W. T. Campbell & A. J. Farfel. TV-radio broker Howard E. Stark handled sale. Only other system sale to date was purchase of TV Cable Corp. of Schuylkill Haven, Pa. by Pottsville (Pa.) Trans-Video Corp. (Vol. 10:9). Whitney firm owns KOTV, Tulsa, operates community systems in Wenatchee, Walla Walla and Richland, Wash. Fox, Wells owns KFSD-TV, San Diego, has community systems in Fairmont, Bluefield & Clarksburg, W. Va. and Muscle Shoals, Ala.

National Community TV Assn. reports following seeking approval of Wyoming Public Service Commission to start new community systems: KEM-TEV Corp., for Frontier, Diamondville & Kemmerer; Dahlquist & Fenus, for Mountain View; Jackson Community TV System, for Jackson. NCTA also reports new operations in Imbler, Ore. and Sun Valley, Ida., and a cooperative non-profit system being organized at Ione, Ore.

FM functional music decision by FCC is expected next week or soon thereafter, permitting FM stations to multiplex functional music service on top of programs aimed at home audiences. Rules will be somewhat different from originally proposed, in that stations will be required to multiplex all functional music within 1 year instead of 5.

Telecasting Notes: Every major movie producer—with possible exception of MGM—is now either in some facet of TV or is seriously considering entering it soon. Latest to join parade is Universal, which entered TV 4 years ago through subsidiary United World Films but gave up after producing one 13-week series. Pres. Milton R. Rackmil told Universal stockholders the company “proposes to go into TV film production if we can make money at it.” He revealed company is now filming TV commercials. As for sale of old features to TV, he said such a move awaits “a more favorable climate and a more propitious time” . . . Associated Artists reported negotiating for TV rights to 37 Pine-Thomas “Class B” pictures released through Paramount from 1944-49 (Vol. 11:11); reputed asking price is \$1,400,000, or nearly \$38,000 per picture . . . “Madison Ave. doesn’t know it yet, but there’s a big new network televiewer lure a-building,” reports March 14 *Advertising Age*. It’s referring to TV bowling which is now drawing 11-17.9 ratings in Chicago as a late-night show. Chicago-dated story says: “Everybody here is sure it will be on the networks next fall, and is now trying to get into the act. Jules Herbueaux, head of WNBQ, NBC o-&o outlet where the whole thing started, is earnestly trying to win acceptance and sponsors for an NBC version. And auto dealer Pete DeMet, his main competitor, recently journeyed to New York to try to interest ABC-TV and CBS-TV.” DeMet’s *Championship Bowling* filmed series is now running in 62 markets; he’s signing up champ bowlers for network show . . . Another “TV original” heads for the movies: the highly praised drama, “Patterns,” presented twice on NBC’s *Kraft Theatre* (Vol. 11:7), will be produced as motion picture by Jed Harris & Michael Myerberg. Rod Sterling, who wrote original TV play, will write screen adaptation, and Fielder Cooke will direct film as he did the TV program . . . NBC’s fabulous *Peter Pan* telecast last week (Vol. 11:11) completely dominated Trendex March 1-7 ratings, copping No. 1 spot with rating of 48 and pushing *I Love Lucy* (on CBS during final half-hour of 2-hour period occupied by *Peter Pan*) out of top 10 . . . Best half-hour TV plays by college undergraduates will be rewarded with 3 prizes totaling \$1750—first prize \$1000—in competition sponsored by Talent Associates Ltd., producing & packaging firm at 41 E. 50th St., N. Y. First annual contest closes June 15, 1955 . . . WBTB & radio WBT, Charlotte, this week began broadcasting from new 1,250,000 Jefferson Pl. studios, described as “first in the nation to be specifically designed for color” . . . Ford Foundation’s TV-radio Workshop renews option to produce *Omnibus* for 4th straight year next season on CBS-TV Sun. 5-6:30 p.m.; its current cycle ends April 10.

Rate increases: KCMO-TV, Kansas City, April 1 adds new Class AA hour (6:30-11 p.m. Mon.-Sat. & 6-10 p.m. Sun.) at \$1000, min. at \$200, Class A hour going from \$750 to \$510; WATE, Knoxville, April 1 raises base hour from \$300 to \$400, min. \$60 to \$80; WITV, Fort Lauderdale-Miami, raises base hour from \$300 to \$400, 20 sec. \$60 to \$80; KFDX-TV, Wichita Falls, Tex. from \$250 to \$300 & \$50 to \$60.

All-time high in TV viewing came in Jan., when average American TV home viewed for 5 hours & 49 minutes a day, or 40 hours & 40 minutes a week, according to A. C. Nielsen Co. Previous record was in Jan. 1954, when TV-equipped homes had TV turned on for average of 5 hours & 46 minutes a day.

Extra \$85,000 appropriation was voted for FCC by House this week, and Senate concurrence is expected. Commission had asked for \$115,000 and President recommended Congress give it \$85,000. Money was requested for personnel to move backlog, mainly TV, including such major rule-making proposals as subscription TV.

GRANT OF ROANOKE’s Ch. 7 to WDBJ was recommended by examiner J. D. Bond this week, following dismissal of competitor WROV, to which WDBJ is paying \$245,021 for assets of defunct uhf WROV-TV (Vol. 11:6).

In contested cases: (1) FCC rejected protest filed by McClatchy newspapers against transmitter-studio changes granted to KBET-TV, Sacramento (Ch. 10). McClatchy has court appeal pending challenging FCC grant to KBET-TV, charging it is being discriminated against because of its newspaper interests (Vol. 11:11). (2) AFL filed opposition, as it said it would, to proposed grant of Miami’s Ch. 7 to Cox-Knight-Trammell interests, saying combination would promote monopoly of newspaper-broadcast media. It registered objections with FCC, Senate Commerce and Judiciary Committees.

Allocations actions included: (1) Denial of shift of educational Ch. 11 from Durham to Gorham, N. H., requested by New Hampshire Commission on Educational TV, because Canada wouldn’t agree to change. (2) Filing of 4 alternative plans for shifting Ch. 3 from Hartford, Conn. to Westerly, R. I., by Providence’s WNET (Ch. 16) which also asks that it be shifted to Ch. 3; plans involve changes in 4 to 7 cities, none affecting operating stations. (4) Orlando, Fla. Ch. 9 applicant WORZ endorsed FCC’s proposed “5-mile rule” (Vol. 11:10), stating that Daytona Beach grantee WMFJ-TV (Ch. 2) shouldn’t be permitted to build 23 mi. from Daytona Beach, about same distance from Orlando, where it might obviate possibility that Orlando station could obtain major network affiliation.

An individual’s right of privacy is not violated by a TV “fictionalization” of his life, even though it describes criminal events in his past for which he is no longer accountable. That ruling, watched closely by industry for precedents involving TV programs based on court records, was handed down this week by U. S. District Court Judge Keech in Washington in case of Charles S. Bernstein, Federal employe and ex-convict who sued NBC for \$750,000, asserting he suffered financially and mentally as result of resurrection of his past on *Big Story* in 1952. Under name of Charles Harris, Bernstein was convicted of first-degree murder in Washington in 1933 and was sentenced to electric chair. Through intervention of *Washington News* reporter Martha Strayer, his sentence was commuted in 1935 and he received Presidential pardon in 1945. Since then, his suit said, he has rehabilitated himself but as result of telecast has been unable to advance in his position and has been shunned in his community. Judge Keech ruled, however, that persons “formerly public” cannot be protected against disclosure and re-disclosure of known facts “in a reasonable manner and for a legitimate purpose.” Bernstein was represented by TV-radio attorney Harry Warner, who said ruling would be appealed.

Profile of John Crosby, *New York Herald Tribune* Syndicate columnist, by Sam Boal in April *Esquire Magazine*, reveals he earns \$40,000 a year from column, carefully shuns industry contacts and cocktail parties, and irreverently summarizes his task thus: “A radio columnist has a tough row to hoe. He is forced to be literate about the illiterate, witty about the witless and coherent about the incoherent.” Article credits Crosby with pioneering real TV-radio criticism, now widespread, and says this should have beneficial effect on TV—a situation differing from that attending birth and growth of radio.

New reps: KMMT, Austin, Minn. to Headley-Reed (from Pearson); KFBB-TV, Great Falls, Mont. to Hoag-Blair (from Headley-Reed); WTAP, Parkersburg, W. Va. to Pearson (from Forjoe); April 1 KERO-TV, Bakersfield, Cal. to Hollingbery (from Avery-Knodel).

Network Accounts: A "no summer hiatus" drive is being intensified by networks this year in concentrated effort to make TV a year-round medium. In addition to the summer discount plans announced by ABC, CBS & NBC, George Gobel this week disclosed plans to film his own show this summer through his subsidiary Gomalco Productions for current sponsors Pet Milk & Armour. He thus follows pattern of Sid Caesar and Jackie Gleason, who are producing own summer shows for same year-round sponsors. Also this week, ABC-TV research dept. disclosed presentation to advertisers pointing out that decline in sets-in-use is far less than realized, that summer costs are lower, that continuation of same program in summer is good "insurance" for fall audience . . . Maxwell House Coffee is staying on TV this summer, though it's substituting *Ethel & Albert for December Bride* on CBS-TV Mon. 9:30-10 p.m., thru Benton & Bowles . . . Procter & Gamble buys full sponsorship of *My Favorite Husband* on CBS-TV starting May 7, Sat. 9:30-10 p.m., thru Young & Rubicam . . . CBS-Columbia, which signed last week as co-sponsor of *Arthur Godfrey and His Friends* on CBS-TV starting March 30, Wed. 8-9 p.m., also will sponsor *Willy* on CBS-TV starting April 7, Thu. 10:30-11 p.m., thru Ted Bates & Co. . . . Ralston Purina to sponsor *Name's the Same* on ABC-TV starting April 11, Mon. 7:30-8 p.m., featuring radio favorites Bob & Ray as emcees, thru Guild, Bascom & Bonfigli, San Francisco . . . Scott Paper to sponsor *Father Knows Best* on NBC-TV starting March 27, Wed. 8:30-9 p.m., replacing *My Little Margie*, thru J. Walter Thompson . . . Revlon's sponsorship of *\$64,000 Question* on CBS-TV Tue. 10-10:30 p.m. will start June 7, thru Wm. H.

Weintraub; Nash-Kelvinator, alt. sponsor of *Danger* (which new show replaces) declined offer to join Revlon in *\$64,000 Question* . . . Union Underwear buys 4 partic. on NBC-TV's 7-9 a.m. *Today* in June, thru Grey Adv.; Quaker Oats, 3 partic. on *Today*, 2 on 11:30 p.m.-1 a.m. *Tonight* in April, thru Wherry, Baker & Tilden, Chicago; Buick, 1 partic. on *Today* April 21 (originating from Detroit), thru Kudner . . . Chrysler considering purchase of Wed. 10-11 p.m. time on CBS-TV vacated by Pabst's shift of its fights to ABC-TV starting June 1 (Vol. 11:11); new show would be drama series . . . Lehn & Fink (cosmetics), sponsoring re-runs of *I Love Lucy* on CBS-TV Sun. 6-6:30 p.m. starting April 17, cancels *Ray Bolger Show* on ABC-TV in June . . . CBS-TV's *Morning Show* (Mon.-thru-Fri. 7-9 a.m.) marks—but hardly celebrates—its first anniversary next week, showing loss of more than \$1,000,000; show has averaged about 5 partic. a week, at minimum cost of \$3600 each . . . Future status of Eastman Kodak's color-film *Norby* was shrouded in doubt this week, following star David Wayne's request to be released from contract with show, seen on NBC-TV Wed. 7-7:30 p.m.; filming halted in Feb., with plans to convert to live temporarily halted pending assignment of new time segment, reportedly Wed. 8-8:30 p.m. . . . DuMont drops 2 more programs April 1—*Captain Video* Mon.-thru-Fri. 7-7:15 p.m., & *Morgan Beatty and the News*, which follows it from 7:15-7:30; Miles Laboratories dropped Beatty and network then decided to cancel, to save cable costs, *Captain Video*, which is co-op every day except Thu., when Johnson Candy sponsors . . . American Character Doll Co. builds \$250,000 merchandising campaign around its partic. sponsorship of *Pinky Lee Show* on NBC-TV, thru Sterling Adv.

LOOSENING grip on College football telecasts, NCAA finally came up with liberalized 1955 "TV control" plan, which won approval of the dissident Big Ten, but may add complication to the lives of networks, stations and sponsors. New plan calls for 8 national "game-of-the-week" telecasts and 5 dates on which college football teams may telecast their games only within the NCAA districts in which they are located. This regional telecasting arrangement is based on proposal by Big Ten and Pacific Coast Conference.

Plan is subject to approval by two-thirds of NCAA member colleges, considered certain. Under new rules, each team may appear on TV twice, but on a national hook-up only once. Last year, schools were limited to one TV appearance. National program will be administered by NCAA TV committee, which will pick sponsors, networks, etc.; regional games will be sold directly by the participating schools.

New liberalized rules permit a team to appear on TV even more than twice, under these conditions: (1) Sell-out games may be telecast in the home TV areas of home and visiting teams, and the game's area if played off-campus. (2) Team playing more than 400 mi. from home may televise game in its "home TV market area," barring conflict with other games in area. (3) A telecast not carried in the home district of one of the televised teams won't count as an appearance against the team, but this exception will be granted only once.

NCAA TV committee is due to meet late in March or early in April to receive proposals from potential sponsors and networks. Big Ten officials said TV receipts of all Big Ten members for the 5 regional dates and any national appearances will be pooled and distributed equally to all 10 members. Big Ten TV committee plans to sell package regional deal to single sponsor. "It would be possible," said asst. commissioner Bill Reed, "to sell more than one game on any of the 5 regional dates available—but this is not likely."

Battle against fraudulent "bait" advertising on TV-radio was joined this week by Assn. of National Advertisers at Hot Springs, Va. convention, adopting resolution urging "prompt and vigorous" enforcement of anti-fraud statutes. ANA called bait advertising a "revolting perversion of advertising" and urged media to investigate such ads to make sure they are not a party to fraud. Meanwhile, a N. Y. state-wide conference in Albany this week heard Hugh R. Jackson, pres. of N. Y. Better Business Bureau, urge study of present legislation for amendments which would strengthen fight against bait ads. E. R. (Curly) Vadeboncoeur, pres. of WSyr-TV & WSyr, Syracuse, praised TV-radio's role in helping to stamp out practice, as did Michael R. Hanna, WHCU-TV (CP), Ithaca, pres. of N. Y. State Bestrs. Assn. (For conference's discussion on control of TV servicing frauds, see Topics & Trends, p. 13.)

Canadian House of Commons approved govt. motion to set up special committee on broadcasting to investigate CBC control of TV-radio and look into its financial operations. Approval came after Revenue Minister McCann defended CBC against onslaughts of opposition party (Progressive Conservatives). He denied CBC was "under the thumb of the Govt.," said it was responsible only to Parliament. Opposition critics aimed fire at CBC's dual licensing and broadcasting functions.

First nationwide auto radio listening survey by A. C. Nielsen Co., covering 2 weeks ended Feb. 12, showed heaviest car radio listening came at 2-2:15 p.m. Sat., when 2,109,000 car radios were in use—indicating 28% as much listening was done in cars as at home. Second heaviest quarter-hour was 3-3:15 p.m. Sun., with 2,018,000 auto radios in use, representing 33% of in-home usage for period.

Kay-Lab, San Diego, Cal., announces new broadcast camera chain, consisting of small vidicon camera, camera control and remote control unit, suitable for either live or film.

Color Trends & Briefs: Cost of live color camera chain was reduced by RCA from \$67,000 to \$49,500 this week, a reduction made possible by new "all-in-one" processing amplifier which takes space only 10½-in. high in rack. Chains are now on test, and shipments are due in 2-3 weeks.

New amplifier, according to engineering products v.p. Ted Smith, eliminates such components as channel amplifier, gamma corrector, shading generator, monitor auxiliary, distribution amplifier and 6 power supplies—all required by previous equipment. Same amplifier will be used with 3-V color film chain.

RCA reports it built 40 of previous live color chains, sold all but a couple. It has shipped 39 3-V cameras.

* * * *

March 21 week network color schedules: NBC-TV—March 23, *Norby*, 7-7:30 p.m.; March 27, *Entertainment 1955*, opening of West Coast color studios, 7:30-9 p.m. Projected NBC colorcast of Nevada A-bomb tests in April has been called off, due to costs; event will be carried in monochrome. CBS has postponed 5-day series of *Robert Q. Lewis Show* to March 28-April 1, 2-2:30 p.m. NBC's color schedule for April-May comprises 8 shows, all "spectaculars" (*Max Liebman Presents* and *Producers' Showcase*) except April 2 *Your Hit Parade*, 10:30-11 p.m. Dates for the others: April 4, 8-9:30 p.m.; April 9, 9-10:30 p.m.; April 24, 7:30-9 p.m.; May 2, 8-9:30 p.m.; May 7, 9-10:30 p.m.; May 22, 7:30-9 p.m.; May 30, 8-9:30 p.m.

Beautiful 4-page ads in trade press herald completion of 12,000 sq. ft. color studios of WDSU-TV, New Orleans. It's one of first to order live color cameras. Also promoting color facilities in ads is KTRK-TV, Houston, reporting at least one half-hour color show daily.

INTRODUCTION of NBC-TV's magazine concept into color spectaculars next fall will come in form of "color spreads"—six 90-sec. participations in new series of 90-min. shows scheduled for 13 Sundays during year, 7:30-9 p.m. These shows will be in addition to regular Sat. & Mon. spectaculars and new Sun. series of presentations by Maurice Evans. Thus, lineup will average one big show per week in addition to other color programs not yet disclosed.

"Color spread" plan was laid before Assn. of National Advertisers convention at Hot Springs, Va. this week by NBC network sales v.p. George H. Frey. Each 90-sec. spot will run advertisers about \$71,000 in winter—almost \$800 a second—and about \$50,000 in summer, with sponsors buying any number they want. Shows will be carried on about 100 color-equipped stations and reach estimated average of 10,000,000 homes, Frey said. "This is just about the price of a double-truck ad in the mass circulation magazines," he added, "with the superior circulation values of the most exciting shows on earth, the selling value of TV itself and the reality of color."

New series will feature permanent company of comedians, singers & dancers—"people accustomed to working together for the maximum theatrical rightness," Frey said. Guest stars will include Frank Sinatra, Jimmy Durante, Martha Raye "and all the others."

Meanwhile, NBC opens huge new West Coast color studios in Burbank, Cal. March 27, with *Entertainment 1955*, featuring Dinah Shore, Bob Hope, Helen Hayes, Judy Holliday, Fred Allen, Ralph Edwards & Leontyne Price, with dedicatory comments by NBC pres. Sylvester L. Weaver, exec. v.p. Robert W. Sarnoff and B. A. Graham, pres. of sponsor Sunbeam. New \$3,600,000 facilities include 140x90-ft. studio, \$350,000 air-conditioning plant, 2400-control lighting board, 15x20-ft. color screen.

ATTORNEYS for Edward O. Lamb will appeal directly to the FCC to call off its 6-month communist-charge case and grant renewal of his license for WICU, Erie—in the commissioners' first formal contact with controversial case since hearing was ordered. Attorney Russell M. Brown announced the appeal March 17 after examiner Herbert Sharfman ruled that he had no authority under FCC rules to call off the hearings, and granted Broadcast Bureau's request to call Lamb as witness.

Ruling came after boisterous 2-day argument in which FCC Broadcast Bureau attorney Joseph M. Kittner reiterated his contention that he has not finished his direct case and wants to call Lamb as witness. He said Broadcast Bureau has never contended Lamb was a "lawbreaker," but is interested solely in the truthfulness and candor of statements Lamb has made. He said he does not "assert there have been misleading representations," but if evidence shows there have been, it is a legitimate question for Commission to consider in deciding whether to renew Lamb's license. If Lamb's testimony dispels these questions, he added, "I'll be the first to recognize it."

Brown attacked veracity and stability of all Broadcast Bureau witnesses, and said that if hearings are resumed, he will seek to hold hearings in Erie, Toledo, Cleveland, Detroit and New York City. "We will not only bring witnesses to support Lamb's affirmations of innocence but we will call past and present members of FCC counsel and members of the Commission itself to testify," he said. "We might go on with this hearing for 6 more months in order to refute something that never existed. It's an expensive form of shadow-boxing."

NARTB regional conference committee this week set dates for series of 8 regional meetings this year, to replace traditional system of 17 district meetings, which was abolished recently by board to save time & expense. Schedule of meetings (sites to be announced within 2 weeks): Region 1 (Districts 1 & 2), Sept. 20-22; Region 2 (Districts 3 & 4), Sept. 27-29; Region 3 (Districts 5 & 6), Nov. 15-17; Region 4 (Districts 7, 8 & 9), Oct. 11-13; Region 5 (Districts 10 & 11), Oct. 18-20; Region 6 (Districts 12 & 13), Nov. 8-10; Region 7 (District 14), Oct. 26-27; Region 8 (Districts 15, 16 & 17), Nov. 1-3.

Closed-circuit color "spectacular" will be RCA-NBC's contribution towards entertainment during meeting of American Bar Assn. anti-trust section in Washington April 1. Some 200 top govt. figures, including members of Congress, FCC, ICC, etc., will see program on 6 color sets at Sheraton-Carlton Hotel, with originations from Los Angeles, New York and Chicago. Talent will include Dinah Shore, Jimmy Durante, *Hit Parade* & Dave Garroway. RCA research v.p. Dr. Elmer Engstrom is scheduled for short talk.

Sale of McClatchy's KWG, Stockton, Cal. for \$75,000 to co-partners James E. Longe, KWG program director, and Dr. Lewis B. Saslaw (Vol. 10:50; 11:6) has been approved by the Commission. McClatchy sold station in order to buy KBOX, Modesto, also for \$75,000, as companion to its KBEE (FM), but this deal is held up, having been designated for hearing by FCC.

NBC-TV's success with *Peter Pan* (Vol. 11:11) has inspired it to negotiate for opera *The Saint of Blecker Street* when it closes on Broadway. Composer is Gian-Carlo Menotti, who also wrote *Amahl and the Night Visitors*, which is now virtually a tradition on NBC during Christmas season. Presumption is that opera would be presented in color.

Kansas City color set sales totaled 110 as of Feb. 28, compared with 87 as of Jan. 1, Electric Assn. reports.

ALL SIX CANADIAN TV stations authorized but not yet on air (25 now in operation) plan to start by next fall. CBC this spring will add French-language CBOFT, Ottawa (Ch. 9), making total of 8 o-&o stations. Heading list of privately-owned stations being built is CHEX-TV, Peterborough, Ont. (Ch. 12), owned by Sen. W. Rupert Davies (51%) and Roy Thomas (49%)—both newspaper publishers—which plans test patterns shortly. Target dates for others: CJON-TV, St. John's Nfld. (Ch. 6), next summer; CKVR-TV, Barrie, Ont. (Ch. 3), Aug. 31; CHLT-TV, Sherbrooke, Que. (Ch. 7), Oct. 1; CKRS-TV, Jonquiere, Que. (Ch. 12), Oct. 1.

DuMont reports order for 5-kw transmitter, studio equipment & monochrome multiscanner with tentative April 1 shipping date to KLFY-TV, Lafayette, La. RCA shipped 500-watt transmitter March 10 to upcoming KOTA-TV, Rapid City, S. D. (Ch. 3), due in June; 25-kw amplifier March 16 to KOAM-TV, Pittsburg, Kan. (Ch. 7); 25-kw amplifier March 17 to KTBC-TV, Austin, Tex. (Ch. 7); 12-bay antenna March 18 to upcoming WBRZ, Baton Rouge (Ch. 2).

* * * *

In our continuing survey of upcoming new stations, these are latest reports received:

First satellite of KGMB-TV, Honolulu—KHBC-TV, Hilo (Ch. 9)—is about ready to go on air, plans March 25 test patterns, April 10 programming, according to v.p.-gen. mgr. C. Richard Evans. Its 500-watt RCA transmitter and antenna have been installed, and Harold Marques is slated to be in charge of the Hilo satellite. Maui satellite, KMAU (Ch. 3), has moved test patterns to first week in April, as result of 8-day equipment delay. Its transmitter house is ready, but 100-ft. guyed steel mast won't be erected until RCA antenna and 2-kw transmitter arrive about March 20. Hiroshi Hironaka will move from KGMB-TV to Maui to take charge of 3-man engineering operation. KGMB-TV says it won't raise rates when satellites get on air, and "any rate increase in the future will be on the basis of proved circulation"—not before 1956. Rep for KGMB-TV and satellites is Free & Peters.

KWTX-TV, Waco, Tex. (Ch. 10), has 12-bay RCA antenna ready atop 461-ft. Andrews tower, now is installing RCA transmitter, reports program director Gene Lewis. It plans April 1 programming, although network hasn't been signed yet. It will be 3rd area outlet—KANG-TV, Waco (Ch. 34) and KCEN-TV, Temple (Ch. 6) having begun in fall of 1953. Base rate will be \$235. Rep will be Pearson.

WITN, Washington, N. C. (Ch. 7), has ordered GE equipment, plans start next Sept. 1, reports pres. W. R. Roberson Jr. Station will be located less than 20 mi. E of WNCT, Greenville (Ch. 9). Ownership interlocks with WTVD, Durham (Ch. 11) and several radio stations in Carolinas. Tower order hasn't been placed yet. Rep not chosen.

Four uhf CP-holders say their status now is "indefinite" following receipt of extensions of their CPs to next Sept.: WBCK-TV, Battle Creek (Ch. 58); WHCU-TV, Ithaca, N. Y. (Ch. 20); WQCY, Allentown, Pa. (Ch. 39); WKDN-TV, Camden, N. J. (Ch. 17).

WABT, Birmingham (Ch. 13) has installed new 500-watt Standard Electronics standby driver, which makes it possible to approach uninterrupted full-time service at full 316-kw ERP, according to Standard. Should trouble occur in either 500-watt visual or aural driver, standby can be quickly patched in to replace faulty unit, without reducing power output. In case of amplifier failure, service can be maintained by patching around the faulty stage.

Denial of license renewal for radio WWBZ, Vineland, N. J., proposed by FCC examiner James D. Cunningham last week, is one of few in Commission history. Examiner's initial decision isn't final, of course, and may be reversed by Commission, but Cunningham urged denial of renewal because station's carrying of horse racing results "is susceptible of use by, and unquestionably is helpful and beneficial to, persons engaged in unlawful gambling activities." Commission once denied renewal to WTUX, Wilmington, Del., because of horse race broadcasts but it renewed license after station said it discontinued carrying them. Last license renewal denied was that of radio WIBK, Knoxville, because of misrepresentations by principals.

Option for 50% of KDRO-TV, Sedalia, Mo. (Ch. 6) & KDRO will be held by J. Albert Dear of *Sedalia Capital* and *Democrat* under new corporate setup being worked out by owner Milton J. Hinlein, who hasn't filed yet with FCC. Dear would pay \$40,000 for 50%. Station has been unable to get network and Hinlein expects newspaper link will bolster TV economics & programming. Dear also has interest in Tufty News Bureau, Washington, D. C.; *Wheaton* (Ill.) *Dispatch*; *Gallipolis* (O.) *Tribune* and *Gallia Times*; *New Kensington* (Pa.) *Dispatch*; *Elizabeth City* (N. C.) *Advance*.

Turning in CP this week for WLEU-TV, Erie, Pa. (Ch. 66), pres. Owen K. Murphy also filed to transfer his 50.95% interest in radio WLEU (250-watts, 1450 kc, MBS) & WLEU-FM to gen. mgr. Philip B. Hirsch for \$14,000. Ex-owners of WTOV-TV, Norfolk (Ch. 27), which last week got FCC approval to sell TV to Tim Brite Inc. (Vol. 11:11), this week filed to sell 50% of WLOW, Portsmouth, Va. (250-watts, 1400 kc, MBS) to Harold Kaye, who owns 50% of WORC, Worcester, Mass., and Boston adman Emyl J. Arnold.

Transfer of control of KXEL, Waterloo, Ia. (50-kw, 1540 kc, ABC) to owners of WOPA, Oak Park, Ill. was approved by FCC recently. Estate of late TV-radio attorney Horace Lohnes gets \$56,000 for 25,500 shares (18%); group headed by Joe DuMond gets \$187,000 for 85,000 shares (58%). WOPA group holds CP for WOPT, Chicago (Ch. 44). Also approved recently was John Laux's \$85,000 sale of WJLL, Niagara Falls (1-kw, 1440 kc) to motel-hotel owner James T. Sandonato (75%) and WJLL sales mgr. Thomas W. Talbot (25%).

Gene Autry's sale of KOLD, Yuma, Ariz. (250-watts, 1240 kc, CBS) for \$50,000 was approved recently by FCC. New owners are headed by local TV-radio comic Jim Hawthorne, v.p. Norman H. Rogers and treas. George W. Brock. Rogers and Brock also own 30% each of radio KRNO, San Bernardino, Cal.

KTXL-TV, San Angelo, Tex. (Ch. 8) is again owned 50% each by Armistead D. Rust and B. P. Bludworth, with FCC recently approving deal whereby Lowell Smith and Marshall Formby each sells back the 10% he acquired last year (Vol. 10:32, 34, 36).

Control of radio WETZ, New Martinsville, W. Va. (1-kw, 1330 kc) is being sold for \$20,400 (90% of stock) to Sesac representative Harry B. Bright by J. Patrick Beacom, who owns 25% of WJPB-TV, Fairmont, W. Va. (Ch. 35), now off air (Vol. 11:9).

KJAY, Topeka, Kan. (5-kw, 1440 kc) has been sold for \$105,000 by S. H. Patterson, owner of KSAN-TV, San Francisco (Ch. 32) and KSAN, to Robert Rohrs, salesman for KOA, Denver, who will move to Topeka and take over as owner-gen. mgr.

Malco Theatres Inc. has FCC approval to acquire minority stockholdings as well as to absorb the 60% that Citizens Theatres Co., which it controls, holds in WEHT, Henderson-Evansville, Ind. (Ch. 50).

TAX BILL COULD COST TV TRADE MILLIONS: A proposed revision of the tax law, which could cost TV-radio manufacturers millions of dollars, sent RETMA rushing to Capitol Hill this week to protest -- but at week's end it appeared quite likely that revision would be passed nonetheless. Requested by Administration, bill (H.R. 4725) would repeal retroactively Sections 452 & 462 of Internal Revenue Code, which permit manufacturer to deduct from his 1954 taxable income not only his 1954 expenses but also reserve funds set aside to take care of estimated expenses in 1955 and later years.

Warranties on TV sets & tubes are included in items covered by such deductions -- and therein lies RETMA's concern. Under present law, a manufacturer who sold a set or tube in 1954, with warranty provisions extending into 1955, is permitted to deduct his 1954 expenses under the warranty and also a reserve fund which nearly all manufacturers set up to cover estimated expenses of servicing the warranty in 1955.

Treasury Secy. Humphrey has asked Congress to wipe out this right because it has been "abused" and wants the repeal made retroactive to Jan. 1, 1954 -- which TV trade sources say would cost manufacturers millions of dollars in added taxes.

* * * *

Sylvania's Charles H. Orem Jr. represented RETMA in testifying before House Ways & Means Committee March 18 in protest, along with representatives of National Assn. of Manufacturers, Machinery & Allied Products Institute & 5 other trade groups. Orem said warranty was expense of "major importance" to RETMA's 44 set makers and 34 tube manufacturers. He explained impact of tax proposal on TV industry as follows:

"When a TV set is sold the customer obtains a warranty against any defective material or workmanship for a period of 3 months on the set itself, and one year on picture tube (there are individual variations, but this is the general practice). The set maker is thus under a contractual obligation to incur expenses to carry out his warranty. The tube maker is under a similar obligation.

"Being on an accrual accounting basis, such companies, in the year in which TV sets and tubes are sold, accrue this obligation on their books. Prior to the enactment of Section 462 they had not been able to obtain recognition of this accrual for tax purposes, and had to take the tax deduction later when cash outlays were made. Section 462 merely brings tax accounting into conformity with business accounting."

Political considerations seem to favor bill's passage. For one thing, it was requested by Administration -- though Treasury experts now admit they can foresee eventual loss to Govt. in tax revenue. Administration Republicans are expected to support it -- and Democrats seem more than willing to rub in what appears to be an embarrassing predicament for Republicans.

SEASONAL SOFTNESS IN CURRENT TV MARKET: A seasonal decline in TV sales at retail is evident on national basis thus far in March -- somewhat later than it normally takes place -- but trade statisticians confidently predict first-quarter retail sales of about 1,800,000 TVs, slightly higher than first 3 months of 1954.

Softening of the TV market at retail will mean a slight rise in inventories, inasmuch as production for first quarter probably will be about 2,000,000. Thus, inventories at end of March are likely to total around 2,100,000, compared to about 1,600,000 on April 1, 1954.

Whether inventory total is considered dangerously high is subject to dispute within industry. Some say it definitely is, point to fact that inventories normally decline in first quarter of year. Others, like Motorola's Robert W. Galvin, say no.

"We feel that somewhat over 2,000,000 in the industry's pipelines would be quite all right," said Galvin at informal press conference this week. He said the industry is not now faced with problem of liquidations on any large scale. His own

company's inventories, said Galvin, are slightly higher than year ago, when "we played the first quarter light and swept the store too clean."

TV production totaled 160,995 week ended March 11, compared to 166,461 units preceding week and 176,887 week ended Feb. 25. It was year's 10th week and brought production for year to date to about 1,675,000 vs. 1,075,000 same 1954 period.

Radio production totaled 297,595 (156,846 auto), compared to 297,457 in week ended March 4 and 275,648 week before. Ten-week radio production was 3,600,000 vs. 2,000,000 in corresponding period year ago.

* * * *

Talk of layoffs due to spread of automation in factories, which is inspiring IUE to seek guaranteed annual wage in electronics industry this year (Vol. 11:11), reached President Eisenhower this week in form of question at his weekly press conference as to whether he might set up a Presidential commission to study its impact.

He hoped his economic advisers were keeping posted on automation, President said, and special commission might be answer. Personally, said President, he felt danger of automation had been exaggerated and advised reporters that similar fears about technological advancements in last 150 years have proved unfounded.

Sylvania chairman Don G. Mitchell said much the same thing this week, telling Boston U Founders' Day Institute that there is no danger for labor in automation, which he described as a "glamorized synonym for mechanism," said it had been going on since days of industrial revolution. Victor Reuther, asst. to his brother, CIO pres. Walter Reuther, said such measures as guaranteed annual wage would "ease the jolt" and keep purchasing power expanding so there will be market for higher productivity.

United Auto Workers opened preliminary talks, meanwhile, with General Motors and Ford on new contract, including provision for guaranteed annual wage. Watched closely by electronics industry for guidance on guaranteed wage, talks didn't reach specific points and were recessed until after UAW convention week of March 27.

Trade Personals: Clarence G. Felix, Crosley v.p. & gen. mgr. of government products, elected v.p. of parent Avco Corp.; Albert Newton promoted to Avco controller . . . Don G. Mitchell, Sylvania chairman-president, appointed co-chairman of U. S. industrial committee of National Fund for Medical Education . . . Leonard G. Taggart promoted to chief purchasing agent, Sylvania TV-radio div., Batavia, N. Y. . . . Alfred Y. Bentley promoted to asst. mgr., DuMont CR tube div. . . . Frederick C. Zorn named to new post of administrative asst. to Wm. C. Scales, mgr. of DuMont TV receiver sales div. . . . Robert L. Jablonski, Hoffman Electronics western district sales mgr., named national service mgr., succeeding James T. McAllister, now quality control mgr. . . . E. R. Rutledge, ex-Stewart-Warner, named Hallicrafters eastern regional mgr., N. Y. . . . Wesley A. Sager Jr. promoted to new post of credit & collections mgr., GE TV-radio dept., Syracuse . . . C. Spence Purnell named Westinghouse southern Pacific district mgr., Los Angeles . . . Robert Ascue promoted to national sales mgr., Remington Records . . . Harold R. Larsen, Servomechanisms v.p., also named gen. mgr. of eastern & western divs. . . . E. Leo Koester named mgr. of Crosley-Bendix community relations & employe services . . . Kenneth A. Hovington promoted to gen. sales mgr. of Cossor (Canada) Ltd., Halifax (TV-radio test equipment) . . . John C. Legler, ex-Cecil & Presbrey v.p., named director of adv. & public relations, Electronics Corp. of America, Cambridge, Mass. . . . Edwin Cornfield, ex-national sales mgr. of Pilot Radio, named national distributor sales mgr. of Avnet Electronic Supply Co., Los Angeles, distributor for Bendix Aviation . . . Grady L. Roark, marketing mgr. of GE tube dept., appointed mgr. of company's new central sales service section for tubes & TV-radio components . . . Edward R. Wagenhals, ex-Booz, Allen & Hamilton, N. Y. management consultants, and veteran of 16 years with RCA, joins Clevite-Brush Development Co. as v.p. & director of components development.

RCA International Div., in reorganization for expanded operations, has made the following assignments announced this week by Meade Brunet, v.p. & managing director: Albert F. Watters, v.p. & operations mgr., acting director, operations control; J. P. Cougnenc, ex-personnel chief at Indianapolis plant, director, associated company operations dept.; H. C. Edgar, director, consumer products marketing dept.; C. A. Greathouse, ex-Montgomery Ward, director, export sales dept.; C. W. Slaybaugh, director, engineering products marketing dept.; M. E. Karns, director, license dept.; B. E. Shackelford, coordinator, licensing; W. W. Barton, mgr., materials & marketing services; J. J. Benavie, counsel; A. F. Dollar, mgr., finance; J. E. Lothian, mgr. of planning & market research; E. A. Mesics, mgr., personnel; W. J. Reilly, mgr., adv. & sales promotion—all reporting to Mr. Watters.

DISTRIBUTOR NOTES: Motorola appoints Arizona Distributors Co., 1891 W. Roosevelt Road, Phoenix (Wm. Sipprell, pres.), replacing Arizona Wholesale Supply Co. . . . Arvin: Peaslee-Gaulbert Corp., San Antonio, and Chavers-Fowhand Distributing Co., Panama City, Fla. . . . Bendix Radio: Max Fischman Co., 1141 Penn Ave., Pittsburgh & Kilsby Refrigeration Co., 633 Sheridan St., Honolulu (Herbert Stielau, gen. mgr.) . . . Emerson Radio of Florida names Sidney Goldberg mgr. of all branches except Tampa . . . Northern Ohio Appliance Co., Cleveland (Motorola) announces resignation of sales mgr. Vern A. Ketchem to form own distributing firm, Ketchem & Assoc. . . . Dunkelman Distributing Co., Shreveport (Motorola) names Ronald L. Bates sales mgr.

Muntz TV, operating under Chapter X reorganization plan since March 2, 1954 (Vol. 10:10), had assets of \$2,876,291, liabilities of \$7,806,599 as of March 15, according to trustees' annual report filed this week in Chicago Federal Court. Company has 235 employes, produces 6500 TV sets a month, said report.

Topics & Trends of TV Trade: Some regulation of TV servicemen, to drive gyps out of the industry, seems inevitable in N. Y. State—but actual form of control appears to be impaled on political differences between Democratic Gov. Harriman & Republican Attorney General Javits.

At big state-wide conference called by Harriman in Albany March 15 to deal with all forms of fraud in TV sales, service & "bait" advertising, Governor favored creation of State Fair Trade Commission and possible licensing of servicemen, whereas Javits wants to retain control in his office, supplemented by legislation giving him injunctive powers. Conference was attended by 174 representatives of TV-radio-appliance manufacturers, RETMA, consumer groups, servicing organizations, local Better Business Bureaus, district attorneys & representatives of newspapers & TV-radio stations.

N. Y. servicemen themselves generally favored licensing, though nationally the question has split service groups. Speaking for Empire State Federation of Electronic Technicians Assns., Joseph B. Forman supported licensing proposal and advocated requirement that technicians pass examination after training.

RETMA pres. Glen McDaniel doubted that licensing was needed, said "most servicemen are honest, competent and demand a fair price." He added that number of complaints about servicemen had been steadily declining. Wm. L. Parkinson, mgr. of GE product service & chairman of RETMA committee on technical education, doubted that legislation would solve problem. He said TV manufacturers are "very sensitive" to consumer complaints about servicing and are doing everything in their power to improve service.

Meanwhile, 56 service firms in Los Angeles area this week signed a voluntary code of ethics to drive out the handful of gyms in their midst, spurred by campaign of local Better Business Bureau and newspapers. Some 20 additional firms are expected to join movement next month.

Note: Though publicity always seems to center on the minority of frauds in TV servicing, an Elmo Roper survey conducted for RCA Service Co. revealed last week that "great majority" of TV set owners are satisfied with all aspects of TV servicing (Vol. 11:11).

* * * *

Zenith is trying to "shop around" different courts in effort to get favorable decision in long-standing anti-trust and patent infringement suit, RCA contended this week in reply brief filed in U. S. Supreme Court by counsel Adlai Stevenson and John Cahill. In its Supreme Court brief last week, Zenith charged RCA with seeking to prevent "discovery of facts showing a vicious world-wide restraint of trade in the electronic industry which RCA counsel by one strategem or another have managed to keep buried for years" (Vol. 11:11). RCA reply brief reiterated its earlier appeal to high court to delay Chicago trial of Zenith-Rauland counterclaim suit pending ruling on similar issues in Wilmington court, and commented: "The Federal judicial system cannot function if a litigant can scurry from one district court to another to argue incessantly the same points over and over again."

Hoffman Electronics will expand Kansas City plant to produce up to 1000 TV sets a day, with additional facilities due to be completed about July 1. Present 85,000-sq. ft. plant area will be used entirely for production, with new facilities to be devoted to parts, services & warehousing.

Motorola schedules management conferences for sales mgrs. of its distributors at Broadmoor Hotel, Colorado Springs, Colo., April 7-8; Edgewater Gulf Hotel, Edgewater Park, Miss., April 14-15; Greenbrier, White Sulphur Springs, W. Va., April 21-22.

Text of telegram from Chairman Magnuson of Senate Commerce Committee to presidents of TV manufacturing companies (see p. 4): "The Committee on Interstate & Foreign Commerce has been conducting a study and inquiry into, among other things, the status and development of uhf TV stations. When the FCC adopted its TV plan in April 1952 it set aside 82 channels for commercial TV purposes; 70 are in the uhf portion of the band. Of the 1975 commercial assignments, 1319 are in the uhf portion of the band and another 169 assignments are reserved for non-commercial educational stations. As of Jan. 15, 1955, a total of 143 TV permits were suspended or surrendered. Of this total 117 were uhf permittees. Out of the approximately 35,000,000 TV receivers in use, it has been estimated about 90% [sic] are unable to receive a uhf signal. Various reasons have been submitted for this disparity. I am scheduling a conference of TV manufacturers to be held April 25, 1955 at 10:30 a.m. in Room 318 (Caucus Room), Senate Office Bldg., to discuss the feasibility and advisability of manufacturing all-channel receivers. You are invited to participate. Because of the limited facilities, we suggest attendance by yourself and counsel or other representative. The cooperation of everyone is essential. Your presence is important to the success of this conference, which may lead to some solution of the many problems besieging the industry and Govt. in the TV field."

Women v.p.'s for RCA? Chairman David Sarnoff, addressing Labor Dept.'s conference on effective use of woman power March 11, referred to fact that RCA has no female v.p.'s, said he knew of no good reason, except, possibly "tradition." However, he added, there's the feeling that "when you appoint an officer to an important executive position, you don't want to feel that she may be leaving tomorrow"—but he was quick to say that this was just rationalization and that women should be in these high business posts. "When 2 or 3 women get there and stay there," he predicted, "others will follow." Discussing employment opportunities for women in electronics, he said half the industry's 1,000,000 research & production employees are women.

TV set sales by Canadian factories totaled 55,760 at average price of \$321 in Jan., when production was 69,152, reports Canadian RTMA. It compared with sales of 34,890, production of 43,835 in Jan. 1954. Inventory at end of Jan. was 61,276, compared to 47,884 at start of month. Projected production estimate is for 186,170 more sets in Feb.-April period. Montreal led in sales with 9954; Toronto second, 9069; British Columbia, 5868; other Ontario, 5152; Manitoba, 4615; Quebec City, 3507; Nova Scotia, 3246; Alberta, 3015; Ottawa & eastern Ontario, 2966; Hamilton-Niagara, 2789; New Brunswick & Prince Edward Island, 1787; Saskatchewan, 1777; Windsor, 1562; other Quebec provincial areas, 440; Newfoundland, 13.

Corning Glass Co. enters mass components market, with line of TV-radio items to be distributed by Erie Resistor Corp., announcing "sweeping price reductions" in certain lines. Since World War II, company has been producing high quality glass components for military uses, now promises resistors, capacitors and other electronic components "at a competitive price." Corning has an eye on color TV market "where high-grade components will be required in large quantities."

Excise tax collections from TV-radio-phono manufacturers totaled \$54,756,000 in last 6 months of 1954, compared to \$57,224,000 in corresponding period of preceding year, reports Internal Revenue Service.

Westinghouse consolidates all consumer products advertising with McCann-Erickson, N. Y., shifting newspaper, magazine & outdoor billings from Fuller & Smith & Ross.

Financial & Trade Notes: Admiral reports decline in profits and sales in 1954 from 1953 levels, pres. Ross D. Siragusa attributing drop to lower profit margins on TVs and reduction of govt. business. Earnings were \$6,547,974 (\$2.78 per share) on sales of \$219,565,089, compared to \$8,213,165 (\$3.48) on \$250,931,605 in 1953 and \$8,711,133 (\$3.69) on \$191,224,356 in 1952. Siragusa noted, however, that "substantially higher sales in the second half, coupled with increased efficiency and lower operating costs, resulted in more satisfactory profit margins," and predicted company's 1955 earnings & sales would increase over 1954.

Siragusa also disclosed that Admiral is launching intensive 5-year expansion program aimed at a "substantial increase in sales and earnings by 1960." He said expansion will be in: "(1) foreign manufacturing; (2) domestic manufacturing, including expansion into different facets of the electronics business; (3) color TV." As part of foreign expansion, he disclosed formation of TV-radio manufacturing subsidiaries Admiral de Mexico, S.A. de C.V., Mexico City; Admiral Italiana, S.p.a., Milan (due to begin by midyear); Admiral of Australia (Pty.) Ltd., Sidney. Latter is jointly owned by Admiral and General Industries Ltd., Sidney.

Siragusa did not specify areas of electronics expansion but reported that company currently has research, development & production contracts covering military TV, IFF radar, radar test equipment, automatic gun-sighting, atomic radiation detection and several classified fields.

He predicted industry-wide TV sales of 6,500,000 units in 1955, including a "trickle" of color sets in second half. He commented: "Color TV, which should enter the first mass production phase in the fourth quarter of 1955, will increase substantially the company's average unit sale price. By 1956 and 1957, color TV sales should reach major proportions."

* * * *

Indiana Steel Products Co. had record earnings of \$587,854 (\$4.14 a share) in 1954, compared to \$335,925 (\$2.36) in 1953. Pres. Robert F. Smith told stockholders in annual report that sales were "somewhat below" record 1953, though dollar volume for neither year was given.

Weston Electrical Instrument Corp. earned \$1,056,714 (\$2.47 a share) in 1954, compared to \$1,025,930 (\$2.40) in 1953. Sales figures weren't given.

New electronic giant may be in the making, with this week's disclosure of merger talks between Sperry Corp. and Remington Rand. Both companies are heavily in electronics as well as non-electronic businesses. Merged firm would be industrial colossus with nearly \$900,000,000-a-year volume. Sperry, whose biggest customer is Govt., had \$440,906,187 sales in 1954. It's a big builder of electronic equipment, guided missile components and electrical instruments for aviation and marine fields, as well as automation equipment, farm machinery and electrical apparatus. Remington Rand's 1954 sales totaled \$225,494,354. It has been called nation's largest maker of business machines and office equipment, is one of biggest in electronic computer field (Univac), also makes automation gear, electric shavers and other consumer items.

"Systems engineering group" has been set up by Dumont to assist industry in the application of electronic techniques and automatic production and quality control methods. Announcement by industrial div. mgr. Dr. P. S. Christaldi said that new group is equipped and available to investigate specific problems in manufacturing processes and to make recommendations for their solution either by designing new automatic electronically controlled equipment or by integrating electronic control systems into existing installations.

Motorola reports earnings of \$7,572,024 (\$3.91 per share) in 1954, up from \$7,076,335 (\$3.66) in 1953 and \$7,012,700 (\$3.62) in 1952. Sales of \$205,226,077 were second only to all-time record of \$217,964,074 in 1953 and were considerably ahead of \$168,734,653 in 1952. For 1955, pres. Paul V. Galvin said company has established sales target of \$225,000,000. Taxes last year were \$8,951,865, compared to \$8,436,154 in 1953 and \$8,563,465 in 1952. Working capital at year's end was \$38,308,612 vs. \$38,222,001 at end of 1953.

Galvin said company increased its share of industry's TV sales in 1954, didn't specify percentage. Military business amounted to 25% of total sales. Sales of home, portable & clock radios declined, characteristic of industry last year. Galvin acknowledged that color sales were slow in 1954, but forecast a gradual acceleration of sales in 1954 with increase in color programming.

* * * *

Hallicrafters earned \$275,241 (33¢ a share) on sales of \$12,835,985 in 6 months ended Feb. 28, compared with loss of \$949,337 on sales of \$15,712,221 in corresponding period of preceding year. For 3 months ended Feb. 28, earnings were \$170,947 (20¢) on sales of \$6,415,448 vs. loss of \$465,957 on sales of \$7,647,333 in same period year ago. Pres. Raymond W. Durst attributed improvement to "more profitable commercial and government sales made possible by a strong TV market, continuing good govt. sales and reduction in operational cost." He said company had 37% increase in TV unit sales over 6 months ended Feb. 28, 1954, with 38% of unit sales being private label sets.

Dividends: American Broadcasting-Paramount Theatres, 25¢ payable April 20 to stockholders of record March 25; Motorola, 37½¢ April 13 to holders March 31; Packard-Bell, 5¢ April 25 to holders April 11; Canadian Westinghouse, 50¢ April 1 to holders March 15; Howard W. Sams Co., 10¢ April 25 to holders April 15.

Raytheon earned \$3,592,000 (\$1.44 a share) on sales of \$139,552,000 in 9 months ended Feb. 28, compared to \$2,703,000 (\$1.07) on \$126,242,000 in corresponding period of preceding year. For 3 months ended Feb. 28, earnings were \$1,197,000 (48¢) on sales of \$46,545,000, compared to \$1,063,000 (42¢) on \$45,065,000 same period year ago.

Electron-image tube that stimulates typesetting has been developed by RCA Laboratories and is said to be capable of producing clearly defined letters and figures at speeds up to 100,000 words per minute for high-speed photographic recording. The phosphor-screened tube can be used to translate coded signals from tape, keyboard or radio into letters, will probably have first application in electronic message transmission and computing systems, with further development possibly fitting it for wider application in printing as an electronic means of typesetting.

Those saucy semi-conductors! From *Comic Books & Juvenile Delinquency*, report of Senate juvenile delinquency subcommittee: "The covers of many of these publications carried pictures of scantily clad females in suggestive poses. The titles of some of the articles as featured on the covers were: 'The Lady Is a Man,' 'All-Year Vacation Home,' 'Sex Before Marriage,' 'I Was Forced Into Russia's Fifth Column,' 'I Sold Myself in the Marriage Racket,' 'Athletes Are Lousy Sports,' 'What's New in Transistors' . . ."

First commercial application of transistors in power line carrier communications was announced this week by Motorola. "Because of the potential 40,000-hour transistor life, unequalled reliability and low maintenance cost will characterize the new unit," said v.p. Daniel E. Noble.

Electronics Reports: Transistorized computers — compact, relatively low in cost, suited to mass-production—were demonstrated by Philco's top engineering and production executives to science editors March 16 at New York's Waldorf-Astoria. New development—making possible extremely high-speed computers with military, scientific and industrial applications—is outgrowth of Philco's surface barrier transistor technique (Vol. 9:49).

Called "TRANSAC" (transistor automatic computer), new device has already been spoken for as a military aviation and guided missile aid; its chief immediate commercial application, under patent license, is expected to be in computing machines, which Philco believes will be revolutionized. Envisioned in its future commercial application are simpler, lighter, speedier adding machines, among other devices Philco has up its sleeves. TRANSAC will be subject to technical papers and demonstrations at IRE convention next week in New York.

Full name of miniature electronic brain circuit is "Philco Direct Coupled Transistor Circuit." Company says circuit could make possible a digital computer performing 600,000 additions or subtractions a second—10 times as fast as any previously announced transistorized computer, and its weight and cost would be about one-third. Principal advantage of new circuit, according to research & engineering v.p. Leslie J. Woods, "is that it reduces many fold the number of components," entirely eliminating diodes and tubes in ordinary 'flip-flop' circuit—and its power requirements are decreased a thousand-fold.

"We are particularly enthusiastic about the potentiality that these circuits and transistor techniques create

SERIOUS INTEREST of big TV set makers in radically different method of receiver construction—"modular design"—may well presage very important changes in production and servicing of TV in next year or two.

Originally developed for military use by National Bureau of Standards and Navy, as "Project Tinkertoy" (Vol. 9:38), new component modules have captured attention of virtually every major receiver maker, and several are definitely negotiating for the new stacked components for printed circuits, which go into mass production this summer.

Picking up the ball on Tinkertoy was new ACF Electronics, division of big ACF Industries. Headed by J. G. Reid, former NBS electronics chief, ACF Electronics' staff includes many formerly associated with NBS and Tinkertoy, including Robert L. Henry, credited with being Tinkertoy's principal developer, who now heads module manufacturing dept. ACF stuck to basic Tinkertoy design, but made many improvements of its own, now is in pilot production of modular components.

Modular design is based on "building blocks" of small wafers stacked into modules or sub-assemblies, which are then mounted on printed circuit chassis. Each module (ACF calls them "Compacs," for component packages) contains resistors, capacitors, coils, etc., mounted on the ceramic wafers and properly interconnected. It is these modules which ACF is preparing to sell to TV receiver and other electronics manufacturers. The manufacturers mount and dip-solder these modules to their printed circuit boards. This can be done automatically, semi-automatically or by hand assembly methods.

Shunning limelight, ACF Electronics has quietly built up \$1,500,000 facilities in Alexandria, Va. to produce for electronics industry. Pilot production is now under way, with output of 800,000 modules a month planned by fall, and equipment being installed to turn out more than 12,000,000 a year. Because of high reliability and uniformity of the Compacs, ACF is aiming primarily at orders from military producers. But interest shown by

in making it possible for the great bulk of a computer to be mass-produced, assembled and tested with relatively unskilled operators," said Woods.

Attending unveiling, in addition to Woods, were these top Philco personnel: Research v.p. David B. Smith; govt. & industrial v.p. James D. McLean; v.p.-gen. mgr., govt. & industrial div. Joseph H. Gillies; radio-TV appliances research director Donald G. Fink; executive engineer Herman A. Affel Jr.; govt. & industrial div. electronics engineering director S. C. Spielman; govt. & industrial div. research director Dr. James F. Koehler; computers & transistors product mgr. Chester C. Pond; govt. & industrial div. adv. & sales promotion mgr. Marvin Gaskill.

* * * *

Discussion of microwave rules & standards with industry groups was begun by FCC this week (Vol. 11:10), and heavily attended sessions broke up into study groups, will meet again April 5. RCA this week introduced new TV microwave equipment capable of up to 10-kw ERP in 5850-7125-mc band, said it is "designed for the more exacting requirements of color telecasting and features approximately 20 times the power margin of previous RCA equipment." On March 16-17, Raytheon demonstrated 2 types of microwave gear in Washington's Raleigh Hotel—one for communications, other for TV—to officials of FCC, REA, military and other govt. agencies.

International Resistance Co. this week purchased Hycor Co. of California & Puerto Rico, manufacturers of magnetic & audio devices and precision resistors. Hycor management, headed by pres. Wm. I. Elliott, will continue independent operations.

set manufacturers has been so great that TV may well take up major portion of output.

We toured company's research & development facilities in Alexandria this week (all production machinery is under wraps). Most fascinating to us was 21-in. TV set, with standard circuitry, produced with Compacs. Of the 195 components in set—exclusive of tuner—153 were incorporated into 17 neat, stacked modules. The remaining pieces consisted of potentiometers, filter capacitors, etc. ACF officials said set was assembled in 17 operations, replacing the 200 required using conventional assembly methods.

In large quantities, Compac modules will cost manufacturers no more than it costs to buy the conventional, unwired components they replace, according to ACF. On top of this, they say modular TV sets can be assembled 30% quicker than conventional ones. Company estimates that a year's TV production would require 90,000,000 modules—if all sets were made of modular construction.

"We're component makers," ACF officials stress, pointing out that while they will give industry engineers advice about setting up assembly facilities for modular construction, they have no intention of going into the business of producing automation machinery or the like.

Because of high reliability and uniformity (each Compac is automatically tested as it is produced), and because of space-saving possibilities, modular construction seems particularly applicable to color TV receivers, and presumably set makers are exploring this possibility. As for repairs and servicing, ACF expects servicemen merely to replace the module in which the trouble is located—which can be done in set owner's home in matter of minutes.

Several other firms are working with modular construction—and you can expect more to do so, particularly existing component makers. The govt.-developed principle is available to anyone who wants it. But ACF Electronics believes it has big headstart in production and development know-how, new machinery and proprietary improvements.

Subscription TV pulling-&-hauling: (1) International Telemeter asked FCC to require all parties planning to file comments by May 9 to notify Commission by April 9. Then, Telemeter said, FCC could publish list and require each party to supply all others with 2 copies of his comments—saving everyone much time in preparing reply comments due June 9. Commission rejected proposal, said it would weigh requests for more time whenever they're filed. (2) Joint Committee on Toll TV, organized by movie exhibitors, changed its name to Committee Against Pay-As-You-See TV (CAPT), and retained economist Dallas Smythe as consultant (Vol. 11:11). (3) Good debate is being planned by Washington's National Press Club for April 12 or 14, featuring CAPT co-chairman Alfred Starr and Zenith's Millard Faught. (4) Assuring exhibitors of support, 20th Century-Fox sales mgr. Wm. C. Gehring told group in Dallas this week that if FCC approves fee TV "we're beat."

Spot commercials on British TV will cost up to \$2800 a minute for choice weekend spots when commercial TV gets under way this fall. That rate was revealed by Associated Broadcasting Co. (ABC), one of 6 companies scheduled to open commercial TV. It holds London franchise for week ends and Birmingham for weekdays. The \$2800 rate will apply to peak viewing hours of 8-9:30 p.m. Sat. & Sun. For rest of evening on weekends, time will cost \$1680 per min. Its Birmingham rates will cost up to \$1400 per min. Commercials will be limited to 5 min. per hour, so maximum revenue for ABC will be about \$14,000 per hour. If Postmaster General permits morning commercials, during test patterns, rates will be \$560 per min.

Examiner system of FCC and other govt. agencies would be changed radically if recommendations of forthcoming Hoover Commission report are followed. Recommendations are said to include: (1) Establishment of an "administrative court" to handle cases now cleared by agencies such as FCC. (2) Shift of examiners from Civil Service to positions of "commissioners," with status similar to that of Federal judges. Another Hoover recommendation: Creation of Justice Dept. board of legal examiners to hire attorneys for most agencies.

Two more uhf applications were filed with FCC this week, bringing total to 170 on file pending Commission action, including 18 for uhf. Week's applications were for Philadelphia, Ch. 29, by group including toll bridge operator Theodore R. Hanff and community antenna operator Murray Borkon; and for Ft. Pierce, Fla., Ch. 19, by ex-broadcaster and tomato farmer Gene T. Dyer. [For details, see *TV Addenda 20-J* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

American Research Bureau and C. E. Hooper Inc. announce "working agreement," under which each acts as "consultants and associates to each other in research, production and sales problems." Both companies maintain their separate identities, ARB continuing to specialize in TV and Hooper in radio. Hooper pres. James L. Knipe gets seat on ARB board as shareholder and ARB pres. James Seiler becomes Hooper shareholder and board member.

"Regrets" from Walter Winchell this week formally ended 2 libel suits totaling \$1,525,000 filed by *New York Post* and its editor James A. Wechsler. Winchell stated he "regrets and withdraws" anything he wrote or said that might have been construed as charge that *Post* or Wechsler was sympathetic to Communism. Winchell, ABC, former sponsor Gruen Watch Co. & Hearst Corp. were ordered to pay plaintiffs \$30,000 to cover counsel costs and other fees.

Churches continue to expand in TV, latest being Southern Baptist Convention (Rev. Paul M. Stevens, TV-radio director), which this week announced plans to build \$200,000 TV-radio production center in Ft. Worth, is currently producing series of 26 half-hour color film programs titled *This Is the Answer*. Series is being filmed by Family Films Inc., Hollywood, will premiere on WBAP-TV, Ft. Worth, Easter Sunday, April 10, will not permit commercial sponsorship. Rev. Stephens said his church plans to spend \$2,000,000 on TV-radio in next 3 years to teach "fundamentals" of religion. Only last week, Broadcasting & Film Commission, National Council of Churches of Christ in the U.S.A., approved 1955 TV-radio budget of \$1,405,000 (Vol. 11:11). Earlier this year, Pope Pius approved formation of pontifical commission to study TV-radio-film problems (Vol. 11:5), while a new \$400,000 Protestant TV-radio center was opened in Atlanta (Vol. 11:4).

A \$227,500 suit was filed this week in San Diego against former and present owners of KFSD-TV & KFSD, by Leon N. Papernow, who charged they breached contract to employ him in executive capacity for 5 years at \$15,000 annually. Papernow was a stockholder in TBC Television, an applicant which merged with applications of Thomas Sharp and Charles Salik to obtain Ch. 10 CP. Stations were later sold to Fox, Wells & Co. for \$3,200,000 (Vol. 10:31-32). Papernow seeks \$61,250 from Sharp and \$61,250 from Sharp's Airfan Radio Corp. for breach of contract, plus \$100,000 from Sharp "for malicious interference with the plaintiff's contractual relations," plus \$5000 which he says Sharp holds in trust. Fox, Wells principals are named as co-defendants.

Sale of KVVG, Tulare, Cal. (Ch. 27), for \$1 and assumption of about \$350,000 in liabilities, was approved by FCC, only week after filing of application. Owner Sheldon Anderson retains radio KCOK while turning KVVG over to UHF Telecasting Corp., which is equally owned by adman Milton B. Scott and movie producer Joseph Justman (Motion Picture Center Studios), who states that "by drastically cutting expenses and slightly increasing current income . . . assignee expects to earn a cash net profit of at least \$5000 per month." Scott's advertising agency, Milton B. Scott Inc., also got approval this week for \$46,000 purchase of KOPP, Ogden, Utah (1-kw, 730 kc).

CBS is still aiming for only 7 stations—5 vhf, 2 uhf—despite court decision eliminating numerical ceiling (Vol. 11:9), according to v.p. Richard Salant. He said CBS is continuing consideration of various markets, wouldn't confirm reports that it is contemplating purchase of Crosley's WLWA, Atlanta (Ch. 11) or WTVI, Belleville, Ill. (Ch. 54). Latter becomes KTVI when it shifts about April 12 to St. Louis, changing to Ch. 36, taking over facilities of off-air KSTM-TV; it also plans to hike power, using new 23-kw GE transmitter. CBS has Ch. 11 application for St. Louis, competing with 3 others.

Military opposition to towers over 1000 ft. (Vol. 11:11) is headed for showdown before FCC next month. Commission this week considered petitions to grant moves of 2 stations to high towers not approved by military members of Washington Airspace Subcommittee. It refused immediate grants, but designated both applicants for April 11 hearing, when military services will have to appear to justify their opposition to the tall tower proposals. The stations involved are KSWs-TV, Roswell, N. M., seeking 1610-ft tower, and KGEO-TV, Enid, Okla., 1386-ft.

Sets-in-use totaled 34,634,000 as of Feb. 1, reports NBC research director Hugh M. Beville Jr., increase of 548,000 during Jan. and nearly 6,000,000 in year. Some 20% of sets are in post-freeze TV areas as compared with 11% a year ago, Beville estimates.

Cites Efforts, Urges Study

FCC Report to Congress on VHF-UHF and Network Problems

Full Text of Comments by Commission Majority Submitted to Senate Interstate & Foreign Commerce Committee March 18, 1955

Outlining Approaches to Problems Raised in Memoranda Prepared by Senate Committee Staff Members Harry M. Plotkin and Robert F. Jones

1. IN EVALUATING the current status of television broadcasting and in determining how it may best develop in the future, we think it essential to keep in mind the positive advances which have been made in the less than three years since the "freeze" was lifted. In July 1952, when the first post-freeze station was granted, there were only 108 television stations in operation; at the present time more than 425 are in operation. In 1952, 63 markets had one or more local stations—in most cases one; now there are over four times as many communities with their own television facilities, 100 of which have two or more facilities. The public's acceptance of the expanded television service has been overwhelming. The number of television receivers in the hands of the public has grown from 20 million to 35 million; and today almost 70 percent of American homes have a television receiver. The American people have already invested over \$10,000,000,000 in television receiving equipment and the annual volume of television advertising, set sales, servicing and operating combined runs close to \$4,000,000,000 per year.

2. We mention these figures at the outset to stress the fact that the problems raised by the Plotkin and Jones Reports are not whether we can develop an adequate television service—for we already have such a service. The problem with which these Reports and your Committee's study is concerned is rather how we can best insure the fullest development of the industry's potentialities in line with the needs and desires of the American public and the abilities and ingenuity of the American broadcasters. So much has been accomplished in so short a time that we cannot but feel optimistic that the remaining problems can be resolved through constructive planning and cooperation among all interested groups.

Allocation Plan Objectives

3. The Commission in formulating its national television assignment plan and the associated rules and standards in the Sixth Report, was seeking to promote several different objectives designed to provide television service and facilities to the nation. It gave first precedence to making available at least one service to all areas of the country; second priority to making a local facility available to as many communities as possible; third and fourth priorities to making second services and second local facilities available wherever possible; and allocated the remainder of the channels so as to achieve a fair, efficient, and equitable distribution of television service and facilities throughout the nation.

4. Many of the Commission's objectives have been largely fulfilled. While it is difficult to provide any precise figures, it is estimated that over 90 percent of the people of the country are now within service range of at least one station. A large portion of the public, perhaps as much as 75 percent, is within service range of two or more stations. Furthermore, 255 communities have at least one, and 100 of these have two or more, local television facilities in operation.

5. However, it is evident that there are substantial obstacles (for example, limited economic support) presently in the way of bringing a first local outlet to hundreds of small communities as well as in expanding the number of multiple, competing services in the larger economic and population centers of the country. A major obstacle is the high cost of television programming during this early stage in the development of the art, which makes the securing of a substantial amount of network and similar programming a prerequisite to successful station operation. Of even greater importance is the failure, thus far, of UHF stations to become fully integrated with established VHF stations into an economically sound nationwide television service. To a large extent these two problems—the securing of adequate programming and the UHF problem—intermesh.

VHF-UHF Integration Troubles

6. Thus, while there is some indication that many larger communities can support three stations when all of the stations are in the VHF band, these same communities may be unable to support at the present time three stations when only two of the stations are VHF and the third is UHF. The failure of UHF to become integrated with VHF is manifested by the fact that of 318 UHF stations authorized by the Commission, only one-third are presently in operation. Many authorized were never actually constructed. And the financial outlook for a number of the operating UHF stations is by no means bright. The plight of UHF has been discussed in detail in the presentation of Commissioner Hyde and other witnesses at the Potter hearings, as well as in the Plotkin and Jones documents.

7. It has been argued that the difficulties encountered by most UHF stations, and by some VHF stations, are the result of the inability of the economy to absorb the suddenly increased number of stations. We cannot, of course, predict the exact nature of the future development of the television industry, nor is it the government's function to create television service where there is no demand or economic basis for such service. It is essential, however, that television's capacity for future growth not be impaired by any artificial curtailment of channel space. To achieve its full potentialities, we believe television will eventually utilize a number of channels in the order of those presently allocated to it, just as AM broadcasting developed its present national pattern within the 107 channels allocated to that service.

8. The majority of the Commission agree with the conclusions reached in both the Plotkin and Jones Reports that the only practicable course of Commission action lies in doing what is possible to promote the present allocation plan utilizing both VHF and UHF channels. The addition of substantial new VHF space or the movement of all television stations to the UHF would involve such tremendous dislocation of existing operations and have such a severe impact on millions of viewers that such

action should be considered as a possible alternative only if Congress itself were to determine that the long-run benefits to the public required adoption of such drastic remedies. Therefore, the Commission has taken, and is contemplating, a number of specific actions calculated to enhance the potentialities for television's growth within the existing allocation system. No one of these moves, in and of itself, provides or is intended to provide any cure-all. But their cumulative effect, we believe, will be beneficial.

9. Thus, it is expected that the acquisition of UHF stations by certain multiple owners as a result of last year's modification of our multiple ownership rules will help to strengthen UHF in such markets as Milwaukee, Portland, Oregon, and Miami where such parties have recently acquired UHF outlets. Similarly, we believe the Commission's policy in permitting UHF satellite stations to rebroadcast programs of established stations in areas which might otherwise not be able to support a station will prove helpful. We also have two rule-making proposals under consideration which offer promise of facilitating the growth of additional television outlets and of maintaining existing stations. One of these would authorize low-power operation in communities of less than 50,000 population; the other would preclude the establishment of transmitter sites more than five miles from the city in which the station is authorized unless special reasons for such locations can be established.

10. As part and parcel of the same problem, the Commission is considering ways by which the cost of intercity transmission of programs can be minimized. It is attacking this problem in two directions: First, we have instituted rule-making looking toward the freer establishment of private intercity relay systems by the broadcasters themselves. In this connection, the telephone company has initiated suggestions looking toward the establishment by it of an off-the-air pickup service which the Company believes could be provided at charges substantially less than those required for direct network connections. At the same time, we are continuing to review the existing charges of the telephone company for direct intercity program transmissions and expect to be able to conclude the outstanding proceedings as to this matter in the near future.

'Selective Deintermixture' Approach

11. "Selective deintermixture" has been suggested as another possible line of approach. The Commission has been requested to reconsider certain actions it has already taken in this area to determine whether it might not be possible, with a minimum of dislocation of existing services, to insure that a number of markets become or remain UHF-only communities or are restricted to a single VHF station. The theory of such deintermixture is that it would provide for more balanced competition in the various communities, while at the same time strengthening UHF generally by increasing the number of "islands" of permanent UHF stability. The Commission is presently studying this problem to determine the feasibility of any such limited deintermixture—a study which necessarily involves such questions as the other VHF service available to the communities from outside and the effect that the elimination of VHF operations in some of the areas would have on rural coverage. We are unable at this preliminary stage in our consideration to offer any definitive answer to these questions. However, we are presently considering the circumstances, if any, under which such limited deintermixture may be appropriate in the public interest.

12. A related and highly important problem referred to in both Reports is the inability of most outstanding sets to receive UHF programs. Of the 35,000,000 receivers in the hands of the public, only 5,000,000 are UHF equipped. We also note with some concern that less than 20 percent of the sets now being produced are all-channel receivers. It may well be that this lack of UHF receiving equipment, as well as the delay in developing high-power transmitting equipment, have been the most important

single factors in the relative backwardness of UHF development.

13. The Commission has no direct regulatory authority over the manufacturers of radio and television receiving equipment which would enable it to require manufacturers to adopt any particular course of conduct. It is the Commission's view, however, that removal of the excise tax on the manufacture of all-channel receivers would conduce to the wider distribution and sale of all-channel sets and the Commission therefore favors legislation toward this end. In this connection, the Commission also believes that voluntary action by manufacturers looking toward the expanded production of all-channel sets to the greatest extent practicable would be extremely helpful in assisting the development of the UHF.

14. Over and beyond these specific measures the Commission believes that a general study by the Commission into the entire economic structure and operations of the television industry is essential. This study would include, but not be limited to, consideration of the respective roles of the networks, advertisers, agencies, talent, independent film producers and distributors, and other program sources as well as other means of distributing programs to the public. The essential objective of such a study would be to obtain for the first time a factual basis for evaluating the necessity and advisability of any action by the Commission, Congress or the Dept. of Justice in this area.

Network Problems in Study

15. In our opinion, the network problems referred to in both the Plotkin and Jones Reports cannot be considered by themselves but are inextricably interwoven within the structure of television programming. Only through a study such as we are proposing will we have a proper basis for evaluating the various types of regulatory proposals which have been suggested. While network programming is admittedly of crucial importance to profitable station operation at the present stage of development, the Commission believes that establishing an economic base for the growth of new stations lies not in any artificial restriction or redistribution of network programming but in an over-all expansion of all sources of programming.

16. The Commission has long believed that an over-all study of the broadcast industry—including a review of the network rules—should be made. The last such comprehensive study was conducted in 1938-1941 with respect to AM broadcasting and led to the promulgation of the Chain Broadcasting and Multiple Ownership Rules. We have informed both the legislative and appropriations committees of the Congress on numerous occasions since the end of World War II of the need for a new study. But we have also indicated—and here reiterate—that any such study by the Commission, if it is to be meaningful and productive, requires a high-caliber staff. This staff would have to devote full attention to the study. As a result, we would need to recruit immediately additional personnel in order to avoid disruption in the essential work of the Commission. Neither the Bureau of the Budget nor the Congress has seen fit to make available the funds necessary for conducting such a study; such supplemental sums as have been appropriated have been earmarked for application processing. No funds have been allowed by the Bureau of the Budget in our present budget proposal for fiscal 1956 to establish such a staff—though we had originally asked for funds sufficient to establish at least a skeleton staff to make a start on the problem.

17. It is the Commission's view that the type of study contemplated in this field cannot be completed within one fiscal year. We think it would be appropriate, therefore, for such a Commission study to be authorized and the funds therefor appropriated pursuant to a Congressional Resolution. This was done in the 1935 Telephone Investigation, at which time Congress specifically authorized the Commission's continuing study by a Resolution (Public Res. No. 8, 74th Congress). We are prepared to present to the Committee in detail the subject matter to be covered by the proposed study and the funds and staff required.

[Note: Comr. Hennock will file separate views at a later date.]

MAR 28 1955

SUMMARY-INDEX OF THE WEEK'S NEWS—March 26, 1955

AUTOMATION, COMPUTERS, MISSILES star in IRE show, TV-radio-communications takes back seat as electronics expands to all corners of economy (p. 1).

SPURIOUS RADIATION THORNY PROBLEM and FCC Comr. Webster takes industry to task for slowness in cleaning it up; how Canada handles it (p. 2).

STOCK OF WJIM-TV & WJIM, Lansing, to be offered publicly in first underwriting involving a single TV station; Gross family retains control (p. 3).

DuMONT NETWORK CURTAILS to N. Y.-Washington hook-up only; future seen resting on new video-film system, but Hollywood demonstrates one first (p. 3).

2 NEW VHF START, 2 UHF QUIT: Providence's WPRO-TV and Hawaii satellite are newest as WRTV, Asbury Park, & WLAM-TV, Lewiston, Me. give up (pp. 4 & 7).

SENATE TV INVESTIGATORS name Sidney Davis majority counsel; Jones turns down minority job. Storer backs "area deintermixture," tells how to do it (p. 6).

SUBSCRIPTION TV ISSUE gets hotter as NARTB calls board meeting; pros and cons argued, antagonists gird for battle after May 9 deadline for comments (p. 6).

CLOCK TVs TO BE OFFERED SOON by some manufacturers, functioning similar to popular clock radios; some bearish portents in TV trade (p. 9).

CURTAILED EARNINGS FOR 1955 likely to be reported by manufacturers as result of retroactive tax repeal bill which passed House this week (p. 10).

CPs GRANTED TO WKRG, Mobile, and Cowles Bcstg., Des Moines, while Court of Appeals sets FCC back on heels with Spartanburg uhf "protest" decision (p. 7).

STATION TRANSFERS APPROVED by FCC include WDEL-TV, Wilmington, sold for \$3,712,500, and KBTW, Denver sold for \$1,000,000 (p. 12).

ALL MAJOR TV-RADIO MAKERS now working on change-over to mechanized or automatic production techniques; flexibility seen No. 1 need (Special Section).

CBS SALES & EARNINGS RECORDS achieved in 1954; TV was dominant factor in gross revenues of \$373,380,139 and net income of \$11,414,645 (Special Section).

LONG DISTANCE TV signals sent over 200 mi. by Bell Labs & MIT, with complete reliability, opening way to transmission across large bodies of water (Special Section).

Editor's Note: Because of their special interest and unusual length this week, Electronics Reports, Financial & Trade Notes and Color Trends & Briefs are published as a Special Section (white pages) in this issue

ELECTRONICS KICKS OVER THE TRACES: The constantly expanding nature of electronics applications was never demonstrated so graphically -- or so excitingly -- as at this week's Institute of Radio Engineers convention in New York, attended by some 40,000.

What once was basically a communications and entertainment industry has now become economy-wide in its scope and applications. It has kicked over the traces, and is now galloping off in all directions -- with amazing results. Not even the sky is the limit, judging by the IRE symposiums on electronic-controlled space stations.

TV-radio-communications are destined to expand, of course, but they also seem destined to play a smaller proportional role in the electronics industry as a pyramiding assortment of new jobs is mapped out for the magical electron.

The IRE show, once dominated by radio, later by TV, now has some mighty new stars. Military electronics -- already a bigger field dollar-wise than TV-radio -- is certainly No. 1 today, with the fantastic guided missile getting top billing. Computer circuits of all kinds are drawing excited attention from engineers. And unquestionably the main attraction at this year's convention was the rapidly developing field of automation -- not only its amazing technology, but also its economic and social implications for the future.

These 3 exciting -- and interrelated -- fields of non-communications electronics, mostly still in stages of design and development, had the sessions and exhibits dealing with the "mature" science of TV-radio all but pushed into the background.

Most of the large firms identified with TV are also in the computer-missile-automation field, at least to some extent. But a vast new array of names -- many of

them big, old-line non-electronic companies -- are taking the spotlight in the "new electronics." Familiar names like American Machine & Foundry, General Mills, IBM, Daystrom, National Cash Register, Hughes Aircraft. Many entered electronics by buying up the plants and assets and know-how of smaller firms; others saw the trend early, developed their own electronics divisions.

Visions of the "automatic factory" and "automatic office" already are having double impact on the TV-radio industry: (1) Big companies identified with the industry are making a pitch -- some of them belatedly -- to have a larger part in the development & manufacture of the "brains" that automatize production & office work. (2) The home TV-radio industry with its military communications cousin, until recently one of the most backward in production methods, now bids to become the first completely automatized industry. (See TV automation and recruitment stories, Special Section.)

SPURIOUS RADIATION STILL THORNY PROBLEM: FCC appears to be rapidly losing patience with electronics industry because of slow progress in cleaning up spurious radiations -- those unwanted signals that impair reception of TV-radio and/or other communications signals. In symposium on the subject at IRE convention in New York this week, FCC Comr. Edward M. Webster put it this way:

"Something is wrong somewhere when it takes so long to come to a decision on this matter. I think the engineers have solved the problem. It's an executive and policy problem now, not an engineering problem.

"It's too bad the law covers only one end of the system -- the transmitter -- and not the receiver. The set buyers are not the only unsuspecting people. Companies have found equipment to be unreliable and have had to put it on the shelf.

"Manufacturers say we can't talk about costs -- that this is a competitive industry. But we've got to talk about costs and everything else. I'd like to see this aired publicly so that the public knows the problems. This should be discussed by RCA's Sarnoff, Motorola's Galvin, CBS's Stanton -- people like that."

GE's Dr. W.R.G. Baker, speaking for RETMA, cited the engineering efforts of RETMA and its recommendations to members as examples of industry's seriousness in seeking solutions. To attack continuing problem, he again urged that FCC sponsor joint FCC-industry committees. "The problem," he said, "is bi-lateral and requires deep study and compromise."

There are practical limits to reduction of spurious radiation, he said. "The number of actual cases of TV interference which have been experienced would not seem to warrant an FCC decree substantially increasing the cost to the public of all TV receivers." He made an additional recommendation -- that responsibility for correcting interference be placed on both the interfering service and the service suffering the interference.

Canada's solution to problem was described by G.C.W. Browne, controller of telecommunications, Dept. of Transport. There, law prohibits use of any apparatus which causes interference to reception of a radio signal 500 uv/m or greater, provided interference can be stopped at cost under \$50. In certain circumstances, the Govt. will order correction even if cost is greater.

Govt. has 50 mobile units covering country. When a complaint is received, technician investigates, recommends how to correct trouble. Dealers maintain stock of kits, and manufacturer bears all or most of cost of eliminating trouble.

Govt. checks about 12,000 complaints annually, finds very few that can't be resolved economically. According to one of Browne's aides, "we occasionally have a little trouble getting someone to fix an old sewing machine motor -- particularly if the owner has finished paying for the machine -- but that's the only sort of thing that people are slow to take care of."

Canadian law was amended recently to permit Govt. to order suppression of interference at point of sale rather than point of use -- essentially, control of manufacturers. Rules haven't been put into effect yet, but standards are being considered. Limits under study may be obtained for nominal charge from the Canadian Standards Assn., National Research Bldg., Ottawa, Ont.

LANSING STATIONS TO PUT STOCK ON MARKET: Profitable pre-freeze WJIM-TV, Lansing, Mich. (Ch. 6) proposes to place block of its stock on the open market, a la Storer group (Vol. 9:45) and Bitner group (Vol. 10:48) -- first time a single TV entity has ever sought to do so. Move probably will be forerunner of others.

There have been instances of public offerings involving radio stations -- notably WJR, Detroit and WFBR, Baltimore -- but this is initial financing project of kind since TV started. Paine, Weber, Jackson & Curtis will head underwriters.

FCC was asked this week to approve relinquishment of affirmative control by Harold F. Gross, along with change of name of WJIM Inc., operator of Michigan capital city's only vhf and of radio WJIM (250 watts, 1240 kc, NBC & ABC), to Gross Telecasting Inc. Mr. Gross and family own 98.8% of WJIM Inc.; he presently holds 74.2%, would hold 38.85% after transfer. Program v.p. Howard K. Finch owns 1.2%.

According to SEC registration, new stock would consist of 600,000 shares of \$1 par common (400,000 not to be issued) and 200,000 Class B common, \$1 par, convertible to common after March 31, 1958. Public offering would comprise 193,000 shares of the 200,000 common held by present stockholders, who retain all Class B in addition to Gross' retention of 7000 shares common. They have exchanged their former 2500 shares in WJIM Inc. at ratio of 80 for 1 for the common, 80 for 1 for Class B.

Offering price is undetermined but expected to be around 16. WJIM-TV started in May 1950. In 1950, the TV-radio combined had operating revenues of \$515,317, net profit after taxes \$107,149. In 1951, revenues were \$906,524 & profit \$196,508; 1952, \$1,452,531 & \$357,077; 1953, \$1,857,326 & \$419,891; 1954, \$2,241,589 & \$639,464.

Current assets were \$2,125,247 as of Jan. 1, 1955, fixed assets \$873,311. Current liabilities were \$962,144, including \$700,000 reserve for taxes. WJIM Inc. capital stock was 2500 shares at \$20, or \$50,000. Retained earnings total \$1,986,414.

DuMONT CURTAILS AGAIN, NEW CAMERA AWAITED: DuMont Network's famed Capt. Video, on air for 7 years, signs off in about a week -- as if to point up network's decline to virtual regional status. AT&T interconnections for live shows, which on Jan. 1 were curtailed to 15 cities plus some off-air feeders (Vol. 11:1), will be still further reduced April 5. Thenceforth, leased microwave-coaxial service will embrace only New York-to-Washington. DuMont apparently pins future as a network on long-heralded but still unrevealed new video-filming method.

Thus except for occasional events requiring more outlets for live shows, like the Mon. night fights (cooperatively sponsored) and the Tue. night Bishop Sheen program (Admiral sponsored), an 8-hour live network service will be furnished only to affiliates in Philadelphia, Wilmington & Baltimore in addition to the network's own stations in N.Y. & Washington and a few off-air pickups. The network, nevertheless, is still soliciting national business, notably sports, especially football for the fall, and can supply bigger hookups as ordered (for its remaining sponsors, see p. 8).

It's frankly another economy move. Skeleton force still left, in addition to personnel of splendidly equipped N.Y. studios housing own pioneer WABD, and own WTTG, Washington, are waiting with rest of trade for the new "technological development" which Dr. DuMont first mentioned in Los Angeles Chamber of Commerce speech Feb. 2 (Vol. 11:6, 8) and which he touches upon again in newly released 1954 annual report.

At that time he spoke of combination TV-film camera which he nicknamed the "piggy back" and which may be officially named "Electronicam". It's an electronic camera which can shoot high-quality film versions of live shows instead of kinescope and permit delivery of prints to other TV stations in a matter of hours. The first demonstration is promised within a few weeks.

* * * *

In Hollywood, meanwhile, what looks like same basic idea -- a dual-purpose movie & electronic camera that transmits a live TV show and records it on 35mm film at same time -- was demonstrated this week by Al Simon, production supervisor for McCadden Productions, TV film unit owned by comics George Burns & Gracie Allen. He showed it to the American Society of Cinematographers along with newsmen. The March edition of American Cinematographer Magazine carries a technical description.

Here's how it works: "An image is picked up by the camera by means of a regu-

lar photographic lens, which transmits it to the film plane in the usual manner. Between the lens and the film, a beam-splitter is interposed which causes a duplicate image to be picked up by the vidicon tube of the electronic side of the camera."

Adaptation to color is possible, it was stated, though this wasn't shown. A prime use would be for "monitoring" movie scenes as they are filmed without delay of waiting for rushes. Simon credits RCA engineers Earl Spicer and Douglas Upton for their cooperation, though it's unclear whether RCA itself is directly interested in his device. He said the late Arthur Reeves did the initial work, and Robert Nichols completed the camera which weighs less than an ordinary camera.

In DuMont's annual report this week, which admits TV networking has never been profitable, reference is made to "a wedding of electronic equipment and motion picture cameras" -- much the same phraseology as Dr. DuMont used in his Los Angeles speech and, curiously, the language also used in publicizing the Simon development as it got an undoubted publicity jump on a project Dr. DuMont has up to now only been willing to hint about. The DuMont annual report adds:

"It permits the instantaneous and continuous recording on high quality motion picture film of all programs at greatly reduced cost. In this way, it should be possible to eliminate cable costs (which have amounted to several million dollars a year), except for occasional uses to carry profitable current events, or live sports or other important live shows. By this method there can be delivered to independent stations programs of the highest 'live' quality for use at times permitted by their schedules. The improved quality and lower cost should be more attractive to advertisers [and] offers promise of eliminating network losses and an encouraging potential for profits through its proper use in multiple ways."

2 NEW VHF START, 2 MORE UHF GIVE UP: Newest starters are big Cherry & Webb dept. store chain's WPRO-TV, Providence (Ch. 12), granted in Sept. 1953 but long delayed by litigation, and KHBC-TV, Hilo, Hawaii (Ch. 9), satellite of KGMB-TV, Honolulu, also on Ch. 9 but some 200 mi. distant. Providence's second vhf was being tuned up for Sat. equipment tests, Sun. commercial debut. Hilo repeater started test patterns this week, first of 2 KGMB satellites -- other being KMAU, Maui (Ch. 3) due shortly. This week, too, Canada's 26th also got going: CHEX-TV, Peterborough, Ont. (Ch. 12).

Two more uhf dropouts were reported this week, making 41 uhf casualties to date. They are WRTV, Asbury Park, N.J. (Ch. 58), operated by the Walter Reade movie chain right under gun of New York's 7 vhf, and Frank M. Hoy's WLAM-TV, Lewiston, Me. (Ch. 17). WRTV signs off April 1 after 15½ months of operation. WLAM-TV, just one month older, had operated as a sort of satellite to Mr. Hoy's WPMT, Portland (Ch. 53) which also had to quit last Dec., going into hands of bankruptcy trustee.

Walter Reade Jr. said WRTV billings have been at rate of \$100,000 a year, and station has cost about \$200,000 to run. Conversions are 8-12%, he said, but have fallen off lately due to poor servicing. He would have kept station going, even at \$1000 a month loss, he told us, if he could see any "horizon" for it. He's keeping skeleton staff at Eatontown Drive-In Theatre studios awaiting FCC action on Ch. 8 application, convinced there's definite place for an independent community station. Mgr. Harold Burke is among those staying. Lewiston station signed off March 25, telling FCC it was forced by operating losses and will "re-survey the uhf situation."

* * * *

Who will get first GE loans promised stations in trouble under plan disclosed by GE and new National Affiliated TV Stations Inc. last week (Vol. 11:12), wasn't indicated this week. Only news from NATS was that it had sent out questionnaires to applicants for aid and that exec. v.p. Ely Landau had written other film distributors to urge them to cooperate in plan by offering deferred film payments, too. The questionnaire inquires into competitive situation, CPs, conversion, income & expense, time sales, films vs. live shows, etc.

Note: Though CBS has discussed purchase of St. Louis' sole surviving uhf, WTVI (Ch. 54), it's understood conversations have terminated and network has decided to remain in Ch. 11 race; examiner's initial decision is still awaited.

(For further data on this week's new starters, see p. 7.)

Telecasting Notes: Biggest batch of theatrical film yet released to TV by any major producer went to MCA-TV Ltd. this week from Republic Pictures—adding to the belief that others won't be long in coming out of the vaults, too. There's so much talk about feature-film releases by the majors, in fact, that the "landlords" of those now being rented, to say nothing of the TV film syndicators, are already expressing fears of a glutted market that will depreciate the value of all their properties. Beating down of prices, bad debts, are said to be rampant already . . . MCA-TV Ltd., film syndication div. of Music Corp. of America, big talent organization, has acquired exclusive world-wide rights to the 67 Roy Rogers and 56 Gene Autry films which the cowboy actors had vainly sought in the courts, in litigation that started in 1951 (Vol. 7:23-24 & 8:20), to keep off the air on plea that these would mean unfair competition to their current TV output. Litigation ended last winter (Vol. 10:24, 43) and MCA-TV v.p. Taft B. Schreiber closed deal this week with Republic pres. Herbert Yates. Original cost of the films was put at \$25,000,000; MCA-TV's lease price said to be about \$35,000 per film . . . One-hour TV shows will be made of each film, and they will of course ride popularity and promotion gained by both cowboy actors on TV since the days they made them—long before they ever contemplated TV. Moreover, the shows have some of the biggest names in movies in supporting casts, some now top-drawer stars on their own—John Carradine, Buster Crabbe, Jimmy Durante, Tito Guizar, Gabby Hayes, Sterling Holloway, Paul Kelly, Ann Rutherford, Bob Steele, to mention a few. They also contain a lot of hit songs . . . Vast reservoir of plays that couldn't make a boxoffice go on Broadway, yet have undoubted merit, is being made available for TV production—latest being Mildred Walker's *Southwest Corner*, which closed March 5, whose cast will feature NBC's *Kraft TV Theatre* March 30; similarly, Gian-Carlo Menotti's *Saint of Bleeker St.*, still running on a curtailed basis, has been slated by NBC-TV for Sun., May 15, 3:30-5 p.m. . . . Suc-

Personal Notes: Fred Shawn, ex-NBC-TV director of production operations, on March 28 joins WABT, Birmingham, as exec. asst. to Henry P. Johnston, pres. & managing director . . . Sam Pickard, onetime Federal radio commissioner, later CBS v.p., now running Paradise Point Villas, recreation development near Homosassa Springs on Florida west coast . . . Maurice E. McMurray promoted to national sales mgr. of Storer's WJBK-TV, Detroit; Keith McKenney named local sales mgr. . . . Robert L. Coe promoted to director of DuMont station relations, replacing Elmore B. Lyford, resigned . . . Marcel Carter named CBC exec. asst. in charge of coordinating radio & integrated services, succeeded as director of personnel & administrative services by C. E. Stiles; Kenneth M. Kelly named asst. personnel director . . . Alan C. Tindal resigns as v.p. of WWLP, Springfield, Mass., to devote fulltime to radio WSPR; Roger L. Putnam, pres. of WWLP, announced Tindal's election to WWLP board . . . James C. Cole, ex-mgr. of now defunct uhf WFTV, Duluth, recently mgr. of WDBX, Chattanooga, becomes sales mgr. of Carroll Hauser's radio KHUM, Eureka, Cal., April 1 . . . George D. Borden promoted to chief engineer, WPTZ, Philadelphia, replacing Raymond J. Bowley, resigned . . . H. Taylor Vaden, ex-radio WPTF, Raleigh, named promotion director, WCAU-TV, Philadelphia . . . Selma Wickers, ex-NBC-TV aide to ex-program v.p. Charles (Bud) Barry, named director of new Teleprompter sales service dept. . . . Richard L. Foote promoted to eastern sales mgr. of reps Hoag-Blair, N. Y. . . . Robert Garland, recently mgr. of KOLD, Yuma, named national sales mgr. of all Gene Autry TV-AM stations in Arizona, acting as liaison with Hollingbery . . . David Hume, ex-KTVU, Stockton, Cal., named program di-

rector, KBET-TV, Sacramento . . . Paul Beville, ex-radio WNOE, named sales director, WJMR-TV & WJMR, New Orleans . . . Robert Laws, ex-ABC western div. sales mgr., onetime Philco adv. mgr. in San Francisco, has closed down own ad agency and joined Hal Stebbins Inc., Los Angeles, as v.p. . . . George F. Foley, ex-TV-radio director of Cecil & Presbrey and Newell-Emmett, recently in packaging field, has resumed practice of law with offices at 666 Fifth Ave., N. Y.; John C. Holahan, from his package firm, is partner . . . Julian Gross is pres., Harry L. Harrison exec. v.p. of Gross-Harrison Inc., new name of Julian Gross Adv. Agency Inc., Hartford; Mr. Gross recently sold to NBC his interests in WKNB-TV, New Britain-Hartford (Ch. 30), sale still pending FCC approval (Vol. 11:2) . . . Gilbert A. Ralston, ex-Procter & Gamble and Compton Adv., who has been independent film producer last 5 years, joins CBS-TV as an exec. producer . . . Bud Gillis promoted to program mgr. of Crosley's WLWC, Columbus.

Canadian Assn. of Radio-TV Broadcasters, at 30th annual meeting this week in Quebec City, elects J. M. Davison, Northern Bestg. Co., Toronto, as pres., succeeding E. Finlay MacDonald, CJCH, Halifax; J. A. DuPont, CJAD, Montreal, succeeds Davison as v.p. TV members of board: George Cromwell, CHSJ-TV, St. John, N. B.; R. E. Henri Lepage, CKCV, Quebec; J. E. Campeau, CKLW-TV, Windsor; H. A. Crittenden, CKCK-TV, Regina; F. A. Lynds, CKCW-TV, Moncton, N. B.

Symphony of the Air, Arturo Toscanini's ex-NBC orchestra, will tour Japan for 7 weeks starting about May 1 under auspices of ANTA.

SENATE INVESTIGATION of TV networks and uhf moved one step closed to the hearing stage as Chairman Magnuson (D-Wash.) of Senate Commerce Committee officially announced appointment of N. Y. attorney Sidney Davis as special counsel for the investigation (Vol. 11:12). Davis, formerly counsel to Senate monopoly subcommittee, will take leave from N. Y. law firm of Phillips, Nizer, Benjamin & Krim, in which he is a partner.

Investigation again will have "majority" and "minority" counsel, as it did during tenure of Sen. Bricker (R-Ohio) as chairman. Bricker will appoint minority counsel for the probe next week, presumably an Ohio Republican. Post was offered to former counsel, ex-FCC Comr. Robert F. Jones, who turned it down this week.

In announcing Davis' appointment, Sen. Magnuson stated: "The inquiry now pending before the Committee will survey the entire field of broadcasting, telecasting and communications."

Meanwhile, Committee received concrete proposal for working out deintermixture on an area-by-area basis from pres. George B. Storer of Storer Bestg. Co., only entity to own full quota of 5 vhf & 2 uhf stations. In his comments on Plotkin Memorandum, Storer endorsed "area deintermixture," in effect called for 60-90 day freeze in areas where deintermixture is proposed. He proposed this procedure for deintermixing:

(1) Upon petition by an operating uhf station, including stations which have recently suspended operation, the FCC should act favorably to convert an area to uhf-only, provided: (a) 40% or more of the TV sets in the area can receive uhf signals. (b) Not more than one vhf station is located in the area and is in operation. (c) No other vhf station provides a Grade B service to the entire principal city in the deintermixed area from a transmitter location less than 60 mi. from the main postoffice in the principal city.

(2) Where the above conditions cannot be met, I recommend that upon petition by an operating uhf station, the FCC should act favorably to convert the city to vhf-only and that operating uhf stations should be permitted to apply for unassigned vhf channels, including channels which are currently the subject of FCC hearings upon which final FCC decisions have not been issued.

(3) During a waiting period of 60-90 days, to enable uhf stations to file petitions for deintermixture, and pending final action on such petitions, no further action should be taken on pending applications or hearings for vhf stations in any city where an operating uhf station indicates to the FCC in writing that it proposes to file a petition for deintermixture.

(4) National networks should be urged, by all appropriate means, to continue existing affiliation agreements with uhf stations, rather than to abandon the uhf station when a vhf affiliate becomes available, pending the working out of a deintermixture formula. The networks should abandon the 90-day or 6-month cancellation clause which now is usually inserted in uhf affiliation agreements; and extend assistance to additional uhf stations by affiliation.

(5) TV manufacturers should be urged, by all appropriate means, to manufacture sets with all-channel tuners only and to do away with prices which discriminate against uhf. They should be urged to make available to the public reasonably priced uhf conversion kits.

Storer disagreed with most of Plotkin's recommendations regarding network problem, urged that network-station contracts and station licenses be extended to 5 years from present 2 & 3 years, respectively.

Uhf Industry Coordinating Committee (Harold A. Thoms, WISE-TV, Asheville, chairman) had comment on the investigation this week, too. It hailed FCC proposal for study of entire network-uhf situation (Vol. 11:12), gave its own 10-point formula for nationwide competitive TV service:

- (1) Deintermixture.
- (2) Directional antennas.
- (3) Power & antenna height adjustments.
- (4) Mileage separation reductions.
- (5) Confinement of TV stations to their own market.
- (6) Common carrier cable cost reductions.
- (7) Opportunity for competitive common carrier service in the field of transmission of network programs to TV stations.
- (8) Opportunity for TV broadcasters to operate microwave relays for transmission of network and other programs.
- (9) Receiving set performance standardization and elimination of cost differentials for all-band sets.
- (10) Grant of funds to FCC for extensive investigation into entire field of network programming."

PACE OF subscription TV preparation and propoganda quickens as FCC's May 9 deadline for filing comments nears (Vol. 11:7). Items:

(1) NARTB pres. Harold E. Fellows called TV board into Washington for special meeting on subject April 12. The 15-man board, under Chairman Clair R. McCollough, of Steinman stations, includes many of most experienced heads in the business. Network representatives are: Ernest Lee Jahnce, ABC; Merle S. Jones, CBS; Ted Bergmann, DuMont; Frank M. Russell, NBC. Others: Campbell Arnoux, WTAR-TV, Norfolk; Kenneth L. Carter, WAAM, Baltimore; John Esau, KTVQ, Oklahoma City; Harold Hough, WBAP-TV, Ft. Worth; Ward L. Quaal, Crosley; Paul Raibourn, KTLA, Los Angeles; W. D. Rogers, KDUB-TV, Lubbock, Tex.; George B. Storer; Robert D. Swezey, WDSU-TV, New Orleans; Wm. Fay, WHAM-TV, Rochester.

(2) Paramount, whose Paul Raibourn is also on NARTB board, stepped up its preparation with appointment of Washington economic consultant Vincent V. Checchi to assist in building up case for subsidiary International Telemeter, developers of coinbox technique. Checchi associate Harry Clement is working on account. Skiatron retained Washington economists Robert R. Nathan Assoc. some months ago, with Sherwood Fine assigned to case. Zenith has had Millard Faught as public spokesman for years.

(3) Washington's National Press Club has set April 14 as date for debate between Faught and Alfred Starr, co-chairman of movie exhibitors' Committee Against Pay-As-You-Look TV (CAPT). CBS-TV's *Omnibus* will present short feature on subject March 27.

(4) CAPT has enlisted its first non-exhibitor expression of opposition to subscription TV—Florida State Retailers Assn. adopting resolution in Orlando this week urging FCC and Congress "to keep the air free in line with the philosophy on which American broadcasting has been established." Adoption of fee TV, association stated, would accelerate a "stay-at-home trend of present consumers and further result in the lessening of the large listening audience of free radio and TV presently integrated with important advertising programs which are definitely helpful to retail business."

(5) American Academy of General Practice, on other hand, cautioned FCC against closing door to subscription TV. Secy. Mac F. Cahal wrote Commission, stating Academy represented 20,000 physicians and declaring: "We believe it is important to future developments that the FCC does not establish restrictions that will prevent further experiments with 'scrambled-image' techniques that permit selected audiences to view programs on open circuit TV."

(6) To entice telecasters, Zenith has published booklet *Phonevision and the Broadcaster*, which was delivered to FCC members this week and which will be distributed to stations shortly. In annual report released this week, Zenith pres. E. F. McDonald stated that exhibitors are the "only segment of the entertainment industry that has openly opposed subscription TV" and noted that movie producers have generally not joined exhibitors in their opposition.

(7) FCC has heard little on subject from individual Congressmen. About dozen have forwarded letters from constituents, usually opposing pay system, while a couple have spoken up in favor of commercializing pay-as-you-look TV.

Minority counsel of Senate Commerce Committee, named this week by Sen. Bricker (R-Ohio), is Wayne T. Geissinger, 44-year-old Ohioan who once was consultant to Korean pres. Syngman Rhee. Committee's chief counsel is Frank Pellegrini.

WYATT BUILDING WASHINGTON 5, D C • TELEPHONE STERLING 3-1755

Electronics Reports
Financial & Trade Notes
Color Trends & Briefs
March 26, 1955

AUTOMATION—the application of electronic controls to mechanized production—may have immediate and profound effects on the electronics industry itself, an industry which heretofore has relied largely on hand assembly methods. Automation and mechanization are ideally suited to such mass output industries as TV-radio, so long as they provide sufficient flexibility for changeovers required by new circuits, new models, new products — or a quick switch from civilian to military end-items.

Technical discussions at IRE convention treated many aspects of the automation and mechanization of the television-radio industry. Paper by Admiral engineering director Ray De Cola and chief engineer George Harrigan described equipment designed by Admiral to automatically produce half of circuitry in TV set. Completely new TV circuit was designed for maximum simplicity and economy. Conventional components were used, fed onto printed circuit board by special Admiral-designed machinery. The equipment has been used in production since July 1954. The Admiral engineers advocated standardization of TV components used in automatic assembly systems.

RCA engineer J. J. Graham laid down 3 criteria for any proposed automation system for high-volume work: (1) It must be universal, adaptable to entire range of the company's products. (2) It must be flexible, to allow design engineer relatively free rein. (3) It must be compatible, to "accept most or all of the existing systems, such as GE or Tinkertoy" (Vol. 11:12). "We have conceived a completely mechanized method of producing printed circuit boards," said Graham. "We are currently fabricating the machine and have actually tried out some of the items required . . . We are using certain pieces of machinery on production runs."

Electronics Reports: Recruitment was one of busiest activities at this week's IRE convention in N. Y., with ads for electronics specialists even crowding the sports pages of New York papers as personnel representatives of big and little companies were on hand for interviews. The list of advertisers and their locations emphasizes how much of the business is moving to new and non-TV firms, particularly aeronautical.

Today's emphasis in the electronics industry is on development of new items—particularly military—requiring far heavier supply of engineers than does straight production work. Many smaller companies, unable to offer the allure of the industry's giants, have been caught in the engineering squeeze—one reason for recent wave of consolidation of many smaller electronic companies. Employment bulletin boards at IRE conveyed golden opportunities by the hundreds, many aimed at the thousands of engineering students who throng to the annual IRE event.

In the New York newspapers, besides the usual ads of DuMont, Federal, GE, Philco, Raytheon, RCA, Sylvania, Western Electric & Westinghouse, these were some of the firms advertising for electronic engineers:

Electronics Corp. of America, Cambridge, Mass.; Hughes Electronic Mfg. Div., Culver City, Cal.; North American Aviation Inc., Downey, Cal.; Convair, div. of General Dynamics Corp., San Diego; Lockheed Aircraft Corp., Los Angeles; Ramo-Woodbridge Corp., Los Angeles; Bell Aircraft Corp., Buffalo; Stavid Engineering Inc., Watchung, N. J.; Chance Vought Aircraft Inc., Dallas; Avion Instrument Corp., Paramus, N. J.; Clevite-Brush Development Corp., Cleveland; National Co., Malden, Mass.; Radioplane Co., Van Nuys, Cal. (sub. of Northrop Aircraft Inc.); Sperry Gyroscope Co., Great Neck, L. I.; Canadair Ltd., Montreal; Fairchild Camera & Instru-

Stanford Research Institute's L. K. Lee outlined the 2 steps in automatic production of electronic equipment: (1) The assemblers' approach—inserting conventional components on printed circuit boards. (2) Component makers' approach—fabricating circuit elements as part of the assembly, starting with raw materials (for example, Tinkertoy). He said first approach reduces assembly cost 60-80%, "but labor cost of an electronic assembly is only 30% of the total manufacturing cost." To effect further savings, he added, "we must automatize the fabrication of those electronic components which make up most of the cost to the manufacturer."

He envisioned a possible automatic system of the future by which "we may be able to paint all the passive circuit elements on an insulating material, bond a semiconductor to it, and have an electronic assembly that will perform reliably and have an operating life which we no longer measure in hours, but in years."

Just about every large and medium sized TV-radio manufacturer has installed or is planning to install automatic production machinery. One device arousing considerable industry interest is General Mills' "Autofab" machine which automatically turns out printed circuit boards equipped with conventional components—first of 6 General Mills machines which can make TV-radio plant almost completely automatic. Every major TV-radio manufacturer has seen the machine, and several have placed firm orders. In addition to General Mills and Admiral, United Shoe Machinery Co. is also offering mechanized assembly machines for placing conventional components on printed circuit boards. ACF Electronics is offering radically redesigned "modular" components (Tinkertoy) for use with automatic assembly machines, though they can also be used in manual assembly (Vol. 11:12).

ment Corp., Hicksville, L. I.; Airborne Instruments Laboratory, Mineola, L. I.; Sanders Associates Inc., Nashua, N. H.; Norden Laboratories, White Plains, N. Y.; Otis Elevator Co., electronic div., Brooklyn, N. Y.; Melpar Inc. (sub. of Westinghouse Air Brake Co.), Falls Church, Va.; Radio Receptor Co., Brooklyn, N. Y.; Curtis-Wright Corp., Woodridge, N. J.; Kollsman Instrument Co., div. of Standard Coil Products Co., Elmhurst, L. I.; Vitro Laboratories, W. Orange, N. J. & Silver Spring, Md.; General Precision Equipment Co. for its General Precision Laboratory Inc., Pleasantville, N. Y.; Link Aviation Inc., Binghamton, N. Y. & Kearfott Co., Clifton, N. J.; Glenn L. Martin Co., Baltimore; International Business Machines Corp., N. Y.; American Machine & Foundry Co., electronics div., Boston; Control Instrument Inc., Brooklyn (sub. of Burroughs Corp.); Minneapolis Honeywell, aeronautical div., Minneapolis.

* * * *

Again proving TV's tactical value in warfare, big amphibious war games at San Simeon, Cal. this week used TV cameras to patrol landing beach operations. As in "Operation Threshold," last summer's tactical demonstration at Ft. Meade, Md. (Vol. 10:33), cameras in observation plane relayed views of battlefield to ground headquarters—and in this case also to invasion command ship as well as half-dozen other land-based receiving stations. Ground TV camera van also was landed in second invasion wave. TV operations used this week were development of Army's Battlefield Surveillance Dept., Ft. Huachuca, Ariz. (Vol. 10:50).

Confidence in future of electronics, as expressed on Ed Murrow's *Person to Person* interview March 25 with fabulously wealthy Clint P. Murchison of Texas: Asked what career he would recommend today for his three youngsters, Murchison (whose wealth is mainly in oil, cattle & banking) replied unhesitatingly: "Electronics."

Automation of TV & radio stations is made possible by "Automatic Sequencer," manufactured by Vandivere Laboratories Inc., 3520 S. 4-Mile Run Drive, Arlington, Va., and demonstrated at IRE show. Basic principle of Sequencer: It puts subaudible cues, or "switches," on audio tape. For example, a pre-recorded tape could make aural station identification, then automatically change slides for commercial, give aural part of commercial, then switch to film or slide projector, or record turntable, etc.—all automatically. While main applications appear to be to low-cost radio broadcast installations, it would also seem to be a "natural" for cutting down staff required to man a TV station or satellite. As demonstrated at IRE, Sequencer gave its own sales talk via tape, automatically shut off tape reproducer, played stack of records, turned on tape for more sales talk, gave commercial integrated with series of TV slides.

Two new transistorized devices demonstrated by DuMont at IRE convention: (1) Tiny preamplifier, 1x1x5-in., designed to amplify 1000 times electrical signals as small as a 1000th of a volt and whose power is 1-billionth of a watt. Suggested uses include medical studies involving tests of brain waves and muscular or nervous reactions, in which voltages or currents generated in the body are so small they are not usable by many kinds of laboratory equipment. (2) Cathode-ray oscillograph, battery-operated, designed to free engineer from confines of power line availability, from power line fluctuations and surges and from grounds.

Transistorized paging system is offered by Dictograph Products Inc. as replacement for present intercom systems in offices, factories, hospitals, etc. Using system demonstrated at IRE show by transistor manufacturer Radio Receptor Co., each key man in organization carries tiny 3-oz. transistorized receiver in shirt pocket, with small loud-speaker clipped to lapel. Transmitter broadcasts only within immediate plant level, can be used to contact one man at a time.

Two Canadian developments with TV applications unveiled at IRE show by Canadian Marconi: (1) New electronic memory cell for electronic computers, which may provide "new medium for recording TV programs more efficiently and economically." (2) Semi-conductor photocell, extremely sensitive to light, now in production. Latter's first application was said to be "in TV receivers where it automatically adjusts the brightness of the picture according to the light level in the living room."

Dr. Lee DeForest, who was hospitalized last week with bronchial pneumonia in St. John's Hospital, Santa Monica, responding to inquiry, wires us to advise his friends he's "now resting at home and gaining strength day by day." He lives at 8190 Hollywood Blvd., Hollywood, will be 82 on Aug. 26, has been actively operating his United Engineering Laboratories Inc., 1027 No. Highland Ave., Los Angeles.

\$20 Billion-a-Year In a Decade

Because of unusual demand for the Special Report published by *Television Digest* March 12, 1955, we have ordered an extra run of the notable address on "The Electronics Industry: Present Rate and 10-Year Potential" by W. Benton Harrison, Sylvania v.p.-finance before the Financial Analysts of Philadelphia on March 10. In it he details the present dollar volume (total: \$9 billion) of the various facets of the electronics industry and projects their probable potential to \$20 billion over the next decade. Single copies are 50¢; ten or more, 25¢ each.

Rival to transistor in specialized electronic fields is "bi-mag," tiny magnetic core possessing 2-way magnetic field, invented and developed by Burroughs Corp., Detroit. Particularly suited to computing and automation devices, bi-mag is little larger than shirt button, relatively rugged, requires no special handling and can cut down number of tubes required in electronic devices. Says Burroughs pres. John S. Coleman: "We believe the range of uses to which it can be put is certainly wider than we now know. Used as a counter in electronic computing machinery, it can store impulses decimally from 1 to 10. Moreover, this 2-way magnetic core seems to gain in efficiency the longer it is used. It would seem to hold enormous promise. For example, we did not know when we started that it could be used in an electrocardiograph to pick up fetal heartbeats. Research by doctors at Wayne U here disclosed that fact—and it supplied them with something for which they had been looking for years."

New industrial TV camera was demonstrated at IRE convention by Blonder-Tongue Laboratories Inc., Westfield, Conn. manufacturer of TV distribution & community antenna equipment and uhf converters. The 4¼-lb. vidicon camera measures 8x4½x3 in., is priced at \$1495, including 18½-lb. control unit, vidicon, lens and 25-ft. control cable. Industrial TV equipment was also shown by DuMont, GPL & Kay-Lab. Shown by Olympic Radio for first time was new industrial TV receiver—ruggedized version of standard table model set, to be offered in 14, 17 & 21-in. sizes, prices starting at about \$200. IRE show featured closed-circuit TV "bulletin board" and paging service, with messages for visitors and exhibitors displayed on 8 Capehart receivers in the 2 exhibition halls. Camera was supplied by Farnsworth Electronics, distribution system by Jerrold.

Indiana Steel Products Co. has purchased Ferroxcube Corp. of America, Saugerties, N. Y. from co-owners Sprague Electric Co. and Philips Lamp Works (Philips of Holland), will retain plant and most of personnel. FCA was formed in 1950, became one of leading developers of ferrites. "Ferroxcube" is a ceramic pressed magnetic material used in transformer cores, chokes, coils, etc. Main customer is TV.

Pocket-sized developmental broadcast receiver, using 8 junction transistors, was described by RCA Labs engineers at IRE convention. Measuring 2¼x5½x1¼-in., AM set uses superhet circuit, has performance "comparable to that of conventional personal receivers." Battery life, using RM-1 cells, is approximately 50 hours. By extending receiver length one-half inch, RM-502 cells can be used, providing 120 hours of life.

"Electronics & Automatic Production" is theme of national symposium on technical developments, social and economic implications of automation, sponsored by Stanford Research Institute and National Industrial Conference Board in San Francisco Aug. 22-23, immediately preceding Western Electronic Show.

Times Wire & Cable Co., N. Y., manufacturer of special coaxial cables used in electronics, has been taken over, through purchase of majority stock, by International Silver Co., Meriden, Conn., its operations to be moved to Meriden under present management.

Westinghouse plans combined new manufacturing plant and engineering & office building near Baltimore's Friendship Airport to produce military electronic equipment, reports Walter E. Benoit, electronics div. mgr. Full occupancy is planned by Jan. 1956.

LaPointe Electronics Inc., Rockville, Conn. (TV antennas) is acquiring Allied Products Corp., Dorchester, Mass., manufacturer of houseware and aluminum tubing.

Reon Resistor Corp., Yonkers, N. Y., has purchased assets of Columbia Resistors Inc., Pearl River, N. Y.

Financial & Trade Notes: TV was dominant factor in rise of CBS sales and earnings to new records in 1954, states annual report released this week which shows consolidated gross revenues and sales of \$373,380,139, up 18.9% from the \$313,908,771 for 1953. Consolidated net income in 1954 was \$11,414,645 (\$4.85 per share on 2,353,312 shares outstanding) compared with \$8,894,642 (\$3.80 on 2,340,896 shares) in 1953. In addition to the 1954 income from normal operations, CBS realized non-recurring capital gains of \$5,302,181 after provision for taxes, resulting principally from sales of minority interests in WCCO-TV & WCCO, Minneapolis; WTOP-TV & WTOP, Washington; KQV, Pittsburgh.

Report does not break down financial operations by divisions, though it makes clear that CBS-TV—which it states was “the largest single advertising medium in the world” in 1954—was the top source of revenue and presumably of profits. Radio income declined, but “CBS Radio is confident that radio will retain a permanent and important place in American life and that CBS Radio will continue to contribute to the profits of the company, though perhaps to a lesser degree than in the past,” states radio pres. Adrian Murphy. Record business was ahead, but tube and receiver divisions did not show profit.

Total assets were \$169,298,915 as of Jan. 1, 1955, up from \$136,040,997 year before; earned surplus was \$51,084,775, up from \$42,300,722.

At annual meeting April 20, stockholders will vote on proposed 3-for-1 split of Class A shares. Class A totaled 1,337,934 on Jan. 1, Class B 1,100,780. Officer and director 1954 compensations are shown in notice of annual meeting as follows (stockholdings in parentheses): Wm. S. Paley, chairman, \$200,000 (39,281 Class A & 226,950 B); Frank Stanton, pres., \$250,836 (44,686 & 10,225); Edward R. Murrow, director, \$306,611 (306 & 204), most of compensation coming from commercial sponsorships; J. L. Van Volkenburg, pres. CBS-TV, \$101,250 (102 & 204); Adrian Murphy, pres. CBS Radio, \$65,000 (none); James B. Conkling, pres. Columbia Records, \$72,499 (102 B); Charles F. Stromeyer, pres. CBS-Hytron, \$54,807 (2321 & 2238); Seymour Mintz, pres. CBS-Columbia, \$51,346 (none). Year's counsel fees to firm of Rosenman, Goldmark, Colin & Kaye—Ralph F. Colin being a Class A director—totaled \$203,000 from CBS Inc. and \$12,750 from Columbia Records.

* * * *

Zenith Radio Corp. earnings and sales last year were second highest in company's history, and pres. Eugene F. McDonald Jr. told stockholders in annual report that TV-radio sales in first 2 months of 1955 were 44% ahead of same 1954 months. Profit last year was \$5,676,264 (\$11.53 a share) on sales of \$138,608,360, compared to \$5,631,701 (\$11.44) on \$166,733,276 in 1953 and \$5,845,933 (\$11.87) on \$137,637,697 in 1952. McDonald said backbone of industry in foreseeable future will be larger-size black-&-white TV receivers and “substantial quantities” of radios. While company has made “considerable progress” in color, he said much more remains to be done before color sets “of excellent performance are ready for mass manufacture at prices that will interest the public.” Tube subsidiary Rauland Corp. showed a profit, compared to loss in 1953. Factory branches in N. Y. & Chicago operated at a loss because of “extremely competitive conditions.” Hearing aid sales increased “significantly” over 1953 in both units and dollars. Govt. billings were down 32% in 1954, and McDonald foresaw “still lower defense contract sales in 1955.”

Sprague Electric Co.'s 1954 net income was \$3,333,408, or \$2.68 per share on 1,241,712 shares outstanding, compared with \$2,888,281 (\$2.50 on 1,154,970 shares) in 1953.

Electronics Corp. of America reports net sales of \$5,590,209 in 1954, net income \$162,106. Sales for 1953 were \$4,636,564, embracing those of predecessor companies, merged in Aug. 1954, which were Photoswitch Inc., Combustion Control Corp., Fireye Corp., Photoswitch Marine Div. Inc., and for which net incomes were not revealed. ECA now employs about 1000 workers, plans 1500-2000 by late 1956, had just taken 20-year lease on Wm. Filene's Sons Co. warehouse in Cambridge, Mass., to which it will move administrative & sales offices and labs by end of year. Pres. Arthur Metcalf told annual meeting March 25 backlog of unfilled orders is \$4,500,000 and prospect for 1955 sales is \$9,000,000.

Aerovox Corp., under terms of agreement with Prudential Insurance Co., will pay no more cash dividends on its common shares until at least Nov. 1, 1956 in order to build up working capital, said Aerovox pres. W. M. Owen. Prudential, in turn, has agreed to waive all loan payments until that date. Owen said stock dividends will be issued instead, based on earnings in 1955 and 1956. Aerovox paid 45¢ a share in cash last year, 60¢ in 1953. Aerovox this week also disclosed acquisition of Luther Mfg. Co., Olean, N. Y., manufacturers of automatic production equipment.

Hazeltine Corp. earned \$2,666,263 (\$3.81 per share) after taxes of \$3,067,000 on gross income of \$8,525,767 in 1954, compared to \$2,085,705 (\$2.98) after taxes of \$5,171,200 on gross income of \$10,057,032 in 1953. In annual report, chairman Jack Binns and pres. W. A. McDonald noted that company owned 569 U. S., 1851 foreign patents as of last Dec. 31, had 161 additional applications for patents pending here, 754 overseas.

Trav-Ler Radio Corp. sales were \$16,347,000 in 1954, up 13% from \$14,669,624 in 1953. Profits were \$241,000 (32¢ per share) compared to \$412,257 (54¢) in 1953. Govt. sales went down from 31% to 11%, civilian business went up 33%. Pres. Joe Friedman predicted 25% increase in U. S. sales this year, with Canadian plant, recently acquired from Hallcrafters, expected to add about \$7,000,000 in billings.

Collins Radio earned \$1,495,572 (\$3.01 on 490,370 common shares outstanding) on sales of \$48,214,224 in 6 months ended Jan. 31, compared to \$1,476,406 (\$3.41 on 426,409 shares) on \$37,925,586 same period of preceding fiscal year. Backlog of orders totaled \$160,000,000 as of Jan. 31.

Movie earnings continue up: 20th Century-Fox reports 1955 net earnings of \$8,044,524, or \$3.04 a share on 2,644,486 shares outstanding, compared to \$4,560,887 (\$1.65 on 2,769,486 shares) in 1953. Gross income rose to \$115,715,815 from \$113,513,260.

Canadian GE reports net income of \$7,139,759 (\$37.46 on 188,845 common shares) on record sales of \$210,912,045 in 1954. Earnings were \$11,044,537 in 1953, for which no sales figure was given.

National Co. earned \$230,332 (84¢ on 260,100 common shares outstanding) on sales of \$7,298,055 last year, compared to \$228,217 (83¢ on 250,000 shares) on sales of \$7,095,593 in 1953.

Oak Mfg. Co. earned \$1,321,155 (\$2.52 per share) after taxes of \$1,480,000 on sales of \$18,788,317 in 1954, compared to \$1,239,017 (\$2.36) after taxes of \$2,290,000 on \$20,680,957 in 1953.

Globe-Union earned \$569,280 (79¢ per share) on sales of \$44,106,364 in 1954, compared to \$1,682,276 (\$2.35) on \$48,180,147 in 1953.

Texas Instruments Inc. earned net profit of \$1,200,995 (40¢ a share) on sales of \$24,387,334 in 1954 vs. \$1,270,125 (42¢) on sales of \$27,007,957 in 1953.

Color Trends & Briefs: Rectangular 22-in. color tube bulbs are now being shipped to tube makers in limited quantities, Corning Glass officials said at IRE convention in New York this week. They added they're ready now to make 22-in. bulbs "in any quantity that may be required by the industry." It's known that CBS-Hytron is now receiving the bulbs and plans to introduce new 22-in. color tube soon. Corning electronic sales dept. mgr. J. S. Muller said he expects new size to become "the standard of the color TV industry." It's approximately same length and height as 19-in. round bulb and is designed to fit in same size cabinet. Designed for shadow mask tube, it's constructed so mask can be mounted by either of the 2 methods now in use—flat land or pin method—and can accommodate either 1 or 3 guns. Corning spokesmen also revealed company is making small number of 19-in. round glass bulbs for color tubes and is now developing rectangular color bulbs larger than 22-in. Several tube makers showed "22-in. color tubes" at IRE show, but none was in a receiver or operating.

Method of increasing color tube brightness up to 4 times was described in paper by Rauland's (Zenith) M. E. Amdursky, R. G. Pohl & C. S. Szegho. It involves increasing size of holes in mask to permit more energy to reach phosphors, while introducing an "auxiliary mesh" to make certain that beams reach proper phosphor dots. They reported having made new tube in 19-in. round and 24-in. rectangular types, using flat masks and screens, and are working to adapt principle to tubes with curved mask and phosphors and face plate.

Meanwhile, American Optical Co. prepared to ship 23 pre-production units of color projection set assemblies to 15 unidentified manufacturers. Unit was given setback when price of 21-in. direct-view tube was cut to \$100, but AO spokesman Samuel Sheard said he hopes that projection units can be offered for considerably less than the \$250 originally quoted. He said that current unit is much improved over that originally demonstrated by Hazeltine (Vol. 10:49). Along with optical, electrical and mechanical changes, picture has been increased from 13½x18½-in. to 15x20-in.

* * * *

Single color camera tube, the "tri-color vidicon," was described at IRE convention by Paul K. Weimer, head of 5-man RCA team. Giving progress report on the tube first demonstrated 2 years ago (Vol. 9:16), he said tube can handle slides, film and live scenes employing high light levels—and work continues toward development of tube capable of operating under normal lighting conditions. When perfected, great advantage of tube is that it will minimize optical and electrical registration problems in-

herent in current 3-tube cameras—in addition to permitting construction of much smaller cameras.

Principle of tube is described as follows: "The heart of the tube is a unique and intricate color-sensitive target applied to the face of the tube by an evaporation technique. The target, a rectangle whose diagonal measurement is only 1½-in., consists of nearly 900 fine vertical strips of alternating red, green and blue color filters, covered by 3 sets of semi-transparent conducting signal strips . . . The signal strips corresponding to a given color are all connected to a common output terminal, and insulated at the same time from the strips of the other 2 colors. As the target is scanned by a single electron beam, the color-sensitive filters permit the signal strips to produce electrical signals corresponding to the arrangement of light and color in the scene before the camera."

* * * *

Progress towards transistorized color sets as reported in annual report of Stanford Research Institute: "Under sponsorship of RCA, the Institute has been working for 3 years on the general problem of applying transistors to TV receivers. The particular problem chosen is the adaptation of transistors to a color-decoder circuit. This is the circuit that accepts the video signal and unscrambles it into the 3 signals—red, blue, green—for the color picture tube . . . Two types of experimental transistor color TV decoders have been built. Both have demonstrated the possibility of substantial reductions in size and power consumption. Power saving is not only important per se but also in the reduction of heat within the receiver cabinet."

March 28 week network color schedules: CBS-TV—March 28-April 1, *Robert Q. Lewis Show*, 2-2:30 p.m. NBC-TV—March 31, *Dinah Shore Show*, 7:30-7:45 p.m.; April 2, *Your Hit Parade*, 10:30-11 p.m. Later color shows scheduled: April 4, Robt. Sherwood's *Reunion in Vienna*, with Greer Garson, Brian Aherne & Peter Lorre, NBC-TV 8-9:30 p.m.; April 6, *Stage Door*, with Rhonda Fleming, Diana Lynn, Dennis Morgan, Elsa Lanchester, Peggy Ann Garner & Victor Moore, CBS-TV 10-11 p.m.; April 9, *The Merry Widow*, operetta, with Anne Jeffreys, Edward Everett Horton, Bambi Linn & Rod Alexander, NBC-TV 9-10:30 p.m.

Color TV lighting clinic for station managers, engineers, etc., will be conducted by GE at Nela Park, Cleveland, April 4-7. Color and monochrome cameras will be employed, and talks will be given by lighting specialists from GE and various stations.

Most recent color scanner shipments reported by DuMont—to WAGA-TV, Atlanta; KXJB-TV, Valley City, N. D.; WTVW, Milwaukee.

RELIABLE TRANSMISSION of TV signals over the horizon for distances as great as 200 mi. without relay stations was announced this week by Bell Labs and MIT—opening way for transmission of TV signals across large bodies of water and over rugged terrain where microwave relay stations can't be built. AT&T has already received permission from FCC for experimental uhf transmissions from Florida to Cuba (Vol. 10:40, 45, 49, 51).

Transmission technique announced this week is already being used by continental defense system. In the TV experiments, 10-kw uhf transmitters and 60-ft. diameter antennas were used—20,000 times the power and 30 times the antenna area used in present transcontinental microwave system in which relay stations must be spaced 30 mi. apart. Uhf band was used rather than microwave because of the high power equipment required—not available in the microwave frequencies.

First successful TV transmission using the system was accomplished last year between Holmdel, N. J. and

Round Hill, near Bedford, Mass., distance of 188 mi. Scientists have known that uhf transmissions travel over the horizon under certain conditions, but previously believed them too weak and undependable for practical use. Bell-MIT experiments utilized signals which drop off a straight radio beam beyond the horizon and are reflected or scattered to distant points by the atmosphere.

Note: Another method of relaying TV signals for even longer distances—across oceans and continents—was envisioned by Bell Labs' electronics research director Dr. John R. Pierce at opening session of IRE convention in New York. It's still far in the future, involves launching 100-ft. space station satellite in an orbit 22,000 mi. above the earth to reflect TV signals from one continent to another. This would require antenna 250-ft. in diameter at the sending and receiving stations on earth, transmitter power of only 50-kw. Principal problems involved: (1) Building such a satellite. (2) Keeping the satellite's reflecting surface steadily aimed in the proper direction.

REVERSAL of examiner this week brought CP for Mobile's Ch. 5 to WKRK-TV Inc., in final decision denying Mobile TV Corp. Giddens & Rester families, owners of 7 Mobile theatres and operators of WKRK, were favored because Commission felt their record of operating radio gave greater assurance of carrying out programming promises. FCC said that operation of WABB by *Mobile Press Register*, 20% owners of Mobile TV, gave less such assurance. In addition, Commission said that grant to principals of WDSU-TV, New Orleans, who own largest share of Mobile TV, wouldn't promote "diversification" because of their interests in WAFB-TV & WAFB, Baton Rouge. Commission didn't hold newspaper ownership against Mobile TV stockholders.

Also finalized this week was Ch. 8 grant to Cowles in Des Moines, after withdrawal of KSO under option agreement whereby latter can acquire 40% (Vol. 11:10).

Four uhf CPs were cancelled: WIBG-TV, Philadelphia (Ch. 23), whose principals bought WDEL-TV, Wilmington (see p. 12); KDTX, Dallas (Ch. 23); KTVP, Houston (Ch. 23); WTLB, La Crosse, Wis. (Ch. 38).

* * * *

Highly significant decision was rendered by Court of Appeals this week when it tossed back to Commission the famous "protest" case in which FCC denied hearings to WAIM-TV, Anderson, S. C. (Ch. 40) and WGVL, Greenville (Ch. 23) after they protested change of site granted to WSPA-TV, Spartanburg (Ch. 7). Court stated flatly that protestants were entitled to hearing.

Importance of decision by Judges Edgerton, Bazelon and Fahy is it appears to force FCC to grant hearings vastly greater number of cases and to conduct the hearings on issues specified by protestants. The uhf stations had alleged economic injury because Commission grant of site move enabled WSPA-TV to obtain CBS affiliation. But court stated:

"Spartan [WSPA-TV] did not deny . . . that the change of transmitter site enabled it to get the CBS affiliation. The Commission found that, even if so, injury

caused by this affiliation was not caused by the change of transmitter site, so as to make appellants parties in interest under Sec. 309(c), because the affiliation was not ordered by the Commission but resulted from private negotiation. However, the economic injury that gives standing, under [*FCC vs. Sanders*], to oppose Commission action, is seldom if ever a direct result of Commission action. Even the grant of a new station license does not automatically take advertising revenue away from existing licensees, but only creates a situation in which the new licensee may be able to get the revenue by private negotiation, yet existing licensees are 'adversely affected' and 'parties in interest.'"

Commission has been so upset by repeated success in courts by protestants that it is virtually begging Congress to amend Communications Act. This week, it sent Congress a recommended amendment designed "to obviate the use of the new procedure as a device for delaying radio station grants which are in the public interest while at the same time retaining the rule's primary objective of providing interested parties with a means by which they may bring to the Commission's attention bona fide questions concerning grants made without hearing."

* * * *

Another de-intermixture petition was filed this week. Noting that WBRZ, Baton Rouge (Ch. 2) is about to go on air, New Orleans' WJMR-TV (Ch. 61) asked Commission to switch the 2 stations' channels so as to make New Orleans all-vhf, Baton Rouge all-uhf.

In other allocations actions: (1) National Grange filed opposition to proposed "5-mile rule," stating that its adoption "in many cases would deprive material and substantial segments of rural America of receiving an adequate TV signal." (2) FCC started rule-making to add Ch. 16 to Pittsburg-Antioch, Cal. and to switch WMVT's Ch. 3 from Montpelier to Burlington, Vt. (3) WNHC-TV, New Haven (Ch. 8) opposed petition of WRTV, Asbury Park, N. J. (Ch. 58) which asked allocation of Ch. 8 to Asbury Park for low-power station.

PROVIDENCE'S new WPRO-TV (Ch. 12), new satellite KHBC-TV in Hilo, Hawaii (Ch. 9) and new CHEX-TV, Peterborough, Ont. (Ch. 12) keep U. S. on-air total at 428 after deducting 2 more uhf (see p. 4) while Canada now has 26 on air. Next U. S. starters, all of whom have stated they would get going on or about April 1, are expected to be the second satellite of Honolulu's KGMB-TV—KMAU, Maui (Ch. 3)—and WBRZ, Baton Rouge, La. (Ch. 2); KWTX-TV, Waco, Tex. (Ch. 10); KFDM-TV, Beaumont, Tex. (Ch. 6).

WPRO-TV starts out as CBS basic, with \$1000 Class A rate and Blair-TV as rep. It has 50-kw GE transmitter with 12-bay antenna on 358-ft. Blaw-Knox tower. Arnold F. Schoen Jr. is gen. & sales mgr., reporting to pres. Wm. S. Cherry Jr.; Fred D. Shavor, ex-WTRI, Albany, is program mgr.; Peter Swanson, production mgr.; John V. Ferri, chief engineer.

The satellite KHBC-TV in Hilo, employing KGMB-TV's original equipment, has 500-watt RCA transmitter with antenna on radio KHBC tower. It won't be direct pickup from Honolulu, but will have installation on NW side of Mauna Kea crater which will pick up Maui's KMAU (Ch. 3) programs, microwave them to Hilo, on crater's other side. Harold Marques is in charge of TV operation, which will utilize KHBC radio staff. Neither Hilo nor Maui station will have rate card, nor will KGMB rates be increased, until "proved circulation" can be offered—not before next year. Rep is Free & Peters.

CHEX-TV, Peterborough, Ont. opens new TV area between Toronto & Ottawa as of March 28, having tested since March 23. It uses 10-kw RCA transmitter, 12-slot

wavestack antenna on 400-ft. tower built by Canadian Bridge Ltd. Owners are Senator W. Rupert Davies, publisher of *Peterborough Examiner* and *Kingston Whig-Standard* (51%) and publisher-broadcaster Roy Thomson (49%); they also operate CKWS-TV, Kingston. Doug Manning is commercial mgr.; Wm. Straiton, program mgr.; Bert Crump, chief engineer. Base rate is \$200. Repts are All-Canada and Weed.

* * * *

No new shipments were reported by any of the equipment manufacturers this week, but GE reports order for 20-kw transmitter from WITN, Washington, N. C. (Ch. 7), which has Sept. target, and 6-bay antenna for KVOO-TV, Tulsa (Ch. 2). Two new Canadian TV applications were filed this week with CBC—for Ch. 13 by CFCY, Charlottetown, P. E. I., and for Ch. 9 by Lethbridge Television Ltd., Lethbridge, Alta.

First microwave equipment in 10,700-13,200-mc band, for TV station STL and other use, is being offered by Lambda-Pacific Engineering Inc., which makes STLs for Philco and has supplied links to AT&T for upcoming A-bomb tests in Nevada. Equipment employs new Varian klystrons. Move into higher frequencies aims to relieve congestion on lower microwave bands.

Sale of radio KFDX, Wichita Falls, Tex. for \$100,000 to Grayson Enterprises (Vol. 11:9) was approved by FCC recently, seller Darrold A. Cannan retaining KFDX-TV (Ch. 3). Grayson Enterprises is 50% owned by Sid Grayson, v.p.-mgr. of KMID-TV, Midland, Tex.

Network Accounts: DuMont's gen. mgr. John H. Bachem, subbing for managing director Ted Bergmann, hospitalized this week, stated network is pitching heavily for pro football next season, ready to deliver "custom-built" hookups according to sponsor demand, despite further curtailment of regular leased lines (p. 3). Network is still going after new sponsors, he said, to replace Johnson Candy Co.'s *Captain Video* and Alka-Seltzer's *Morgan Beatty & the News*, which quit next week; and to fill in for the Paul Dixon afternoon and Ernie Kovacs evening shows, being dropped in early April. Termination of *Chicago Symphony* is due April 6 after 26-week season. Sponsored shows still on network: Admiral's Bishop Sheen, Tue. 8-8:30 p.m.; Heinz's *Studio 57*, Tues. 8:30-9; DuMont Receiver Div.'s *What's the Story?* Wed. 8-8:30 p.m.; Emerson Drug's & Lenthic's *Chance of a Lifetime*, Fri. 10-10:30 p.m.; Western Union's *Down You Go*, Fri. 10:30-11 p.m.; Serutan's *Life Begins at 80*, Sun. 9:30-10 p.m.; Libby, McNeil & Libby's & Swift & Co.'s *All About Baby*, Thu. & Fri. 2-2:15 p.m. . . . Sunbeam sponsors 20 min. of Milton Berle & Martha Raye shows on NBC-TV starting in fall, Tue. 8-9 p.m., and one-half of "color spread" each 4th Sun., 7:30-9 p.m., thru Perrin-Paus . . . Mars Candy, thru Leo Burnett, and Carnation Milk, thru Erwin Wasey, each buys 15-min. segment of Disney's upcoming *Mickey Mouse Club* on ABC-TV starting Oct. 3, Mon.-thru-Fri. 5-6 p.m.—other partic. sponsors are General Mills, thru Knox Reeves; Campbell Soup, thru Leo Burnett; Ipana, thru Doherty, Clifford, Steers & Shenfield; Armour, thru Henri, Hurst & McDonald . . . Procter & Gamble to be alt. sponsor (with Viceroy cigarettes) of *The Lineup* on CBS-TV starting April 1, Fri. 10-10:30 p.m., thru Young & Rubicam . . . General Foods (Walter Baker chocolate & Post cereals) to sponsor *Pantomime Quiz* as summer replacement for *Mama* on CBS-TV starting July 8, Fri. 8-8:30 p.m., thru Benton & Bowles . . . Re-runs of *I Love Lucy*, under sponsorship of Lehn & Fink (cosmetics), start under title of *The Lucy Show* on CBS-TV April 17, Sun. 6-6:30 p.m. . . . Colgate-Palmolive switches production of *Colgate Comedy Hour* from Ted Bates & Co. to Wm. Esty Co., effective June 12 . . . GE planning series of films, possibly to be produced by 20th Century-Fox, on CBS-TV starting June 1, Wed. 10-11 p.m., thru Young & Rubicam . . . Eastman Kodak finally settled uncertain fate of color-film *Norby* by cancelling it on NBC-TV Wed. 7-7:30 p.m., takes over re-runs of *Ford Theatre* series Wed. 8-8:30 p.m. in April, thru J. Walter Thompson . . . Charles Antell Inc. (Lanolin hair preparation) to sponsor 12:30-1 p.m. portion of Easter parade on 5th Ave. on NBC-TV, Sun. April 10, 12:15-1 p.m., thru T.A.A. Adv., Baltimore.

Rate increases: WABC-TV, New York, has raised base hour from \$3100 to \$3750, 20 sec. from \$550 to \$675; WISH-TV, Indianapolis, May 1 raises base rate from \$800 to \$1000, min. \$150 to \$180; WSAZ-TV, Huntington, W. Va. raises base hour from \$700 to \$800, min. \$140 to \$160; KFMB-TV, San Diego, from \$600 to 800 & \$120 to \$160; KHQ-TV, Spokane, adds new Class AA hour (8-10 p.m. daily) at \$600, min. at \$120; WGAN-TV, Portland, Me. raises base hour from \$250 to \$350, min. \$50 to \$70; WRBL-TV, Columbus, Ga. adds new Class AA hour (7-10 p.m. Mon.-Sat. & 7-10:30 p.m. Sun.) at \$300, min. at \$60, with Class A hour going from \$200 to \$250; WDBO-TV, Orlando, raises base hour from \$200 to \$250, min. \$50 to \$55; KVAL-TV, Eugene, Ore. April 15 raises base hour from \$175 to \$225, min. \$35 to \$45.

Four big auto companies—General Motors, De Soto, Chrysler, Packard—have purchased total of 9 partic. on NBC-TV's 7-9 a.m. *Today* week of April 18, when show originates from Detroit.

Major league baseball's TV lineup: Baltimore, WMAR-TV & WAAM, National Bohemian Beer, thru W. B. Doner & Co.; Boston, WBZ-TV & WNAC-TV and WSSH-TV, Portland, Chesterfields & Narragansett Beer, both thru Cunningham & Walsh, and Atlantic Refining Co., thru N. W. Ayer; Brooklyn, WOR-TV, Lucky Strike & Schaefer Beer, both thru BBDO; Chicago Cubs & White Sox, WGN-TV, Oklahoma Oil, thru Maryland Adv., & Hamm's Beer, thru Campbell-Mithun; Cincinnati, WCPO-TV, Burger Beer, thru Midland Adv.; Cleveland, Carling Beer, stations undetermined, thru Lang-Fisher-Stashower; Detroit, WJBK-TV & WSPD-TV, Toledo, Goebel Beer, thru Campbell-Ewald, & Speedway Petroleum, thru W. B. Doner; New York Giants, WPIX, Chesterfields; New York Yankees, WPIX, Ballantine Beer, thru Wm. Esty, and White Owl cigars, thru Young & Rubicam; Philadelphia, WPTZ & WFIL-TV, Atlantic Refining, Ballantine & Tasty Baking Co., latter thru Gray & Rogers; St. Louis, WTVI, Marine Petroleum & General Finance Corp., thru Gordon Best; Washington, WTTG, National Bohemian. No TV will be permitted in Pittsburgh (though Thomas P. Johnson, pres. of uhf WENS, is also part owner of Pirates), Kansas City & Milwaukee.

Spate of inter-network back-patting has had industry smiling last few weeks. First, ABC-TV placed trade ads that not only expressed delight with its "Emmy" awards but congratulated CBS-TV and NBC-TV for theirs—listing each network's winners specifically. CBS-TV came back this week with ad featuring extremely clever Bemelmans sketch with "Alphonse-Gaston" motif, saying: "It was pretty nice of the ABC-TV Network to salute its fellow networks . . . We had intended doing the same thing earlier this season when they launched some very exciting program ideas. But they beat us to it—just as they beat us to *Disneyland*." Ad then saluted NBC with: "Only through network TV can 65 million people share simultaneously the pleasure of NBC's memorable *Peter Pan* . . . or to discover a great comic like George Gobel." Summing up the pitch for network TV—and getting its own message across—CBS noted: "Only through network TV can an advertiser reach 41 million people each week as economically, for example as he can on *I Love Lucy*—another network developed program."

CBS-TV affiliates have been asked to surrender 7:15-7:30 p.m. option time to network as part of master plan to revise 7-8 p.m. program lineup. Subject was discussed, among other topics, at recent hush-hush meeting of key affiliates and network officials called by CBS-TV pres. J. L. Van Volkenburg. Affiliates were pledged to secrecy, but network has confirmed that it's trying to get away from 15-min. program format of news and music in 7-8 period, would like to use 30-min. variety programs to meet stiff competition from such shows as ABC-TV's *Disneyland*. Eventually, it would like to begin programming at 7 instead of 7:30, as at present.

Sponsors of ABC-TV's upcoming weekly *Warner Brothers Presents*, to be produced especially for it by Warners (Vol. 11:12), may buy minimum of 30-min. alt. weeks for 52 weeks, under sales plan launched this week by network. Show thus will have maximum of 4 sponsors. Tue. night show debuts Sept. 13, either 7:30-8:30 or 8-9, on 122 stations. Series will consist of 39 first-run films and 13 summer repeats. Each show will have 6-min. promotional segment at end, showing various theatrical films in current production.

Television Bureau of Advertising, at board meeting March 24-25, disclosed signing of contract with A. C. Nielsen Co. for series of special market studies designed to measure TV's ability to sell specific commodities. TvB board also played host at luncheon to top ad agency executives at 21 Club.

CLOCK TVs NEXT; TRADE OUTLOOK UNCLEAR: Something new in the 1956 TV lines, to be shown this summer, will be clock TV -- working much like the clock radios, which have proven big commercial success in the 9 years they've been on market. At this week's IRE show in New York, 2 of the biggest makers of electric clocks and timers -- Sessions Clock Co., Forestville, Conn., and GE's Telechron dept. -- made big pitch for clock-timed TVs, both showing mock-ups with small clock-timer set below screen.

Sessions displayed its clock on Philco set, and it's understood Philco will use Sessions clock in some of its 1956 models. It can be assumed, too, that GE will use Telechron clock in some of its sets, and other set makers will use both.

Principle is same as clock radio. Set can be timed to turn on and off at any time, especially desirable for increasingly popular early-morning programs like NBC's Today and CBS's Morning Show and as reminder to watch certain programs in day and evening. Sessions clocks can be set 24 hours ahead, Telechron 12. Sessions people say they plan big consumer advertising campaign for both clock TVs and TV clock. Latter is separate clock-timer unit which can be set atop any TV, converting it to clock TV. Spokesman estimated timer would add \$15-\$20 to retail price of set.

Note: Idea of clock TV isn't entirely new. Olympic Radio briefly promoted clock-timed TVs in 1952 (Vol. 8:31), subsequently dropped them.

* * * *

There's a spottiness to current TV market that has a lot of set makers more uneasy than they care to admit. Granted that TV sales normally tail off at this season, there's added fear now that, with some 36,000,000 sets-in-use in nation's 48,000,000 homes, TV won't have the same bounce-back later in the year, and that the traditional "second-quarter blues" may extend into the fall.

Bearish signs are beginning to crop up. Dumps and distress sales are appearing in formerly strong markets. Such money-back offers as proposed this week by Crosley distributor Gerald O. Kaye in N.Y. to customers who weren't satisfied that its Custom V sets could "outperform" all others (see p. 10) are rarely associated with thriving markets, whatever may be the virtues of the device. As another symptom, Arvin this week decided to quit TV production about June 1 because of insufficient return, will concentrate on more profitable radio output (see p. 10).

Additionally, new markets which used to be fertile fields for initial set sales aren't opening up with much regularity these days. Finally, you hear quite a bit of grumbling from distributors and dealers about the movement of 24-in. sets, for which much promise was held out as items to yield greater profit. Commented one distributor: "We could do just as well without them." Said another: "Ours is a low-end 'grab-bag' market, and 24-in. sets don't cut any ice here."

On the plus side, there's the growing second-set and replacement business, particularly in large markets. Motorola's Robert W. Galvin estimates 63% of sets sold in N.Y. market currently are for replacement. Then there are the forecasts of Sylvania v.p. W. Benton Harrison, in talk before Financial Analysts of Philadelphia March 10 (text printed as Special Report, Vol. 11:11). He foresaw sales of 6,300,000 black-&-white sets, plus 100,000 color this year, reasoned that if only 4% of the sets now in use are replaced, 1,300,000 sales will result. He adds to that 300,000 second-sets and 600,000 more merely as result of normal population growth, leaving 4,100,000 sets to be marketed this year as initial sales. Not too tough, he says.

The nation's economic underpinning trends to encouragement for the trade, too. Several recent reports certainly point to continued high consumer purchasing power. Consider: (1) Federal Reserve Board's 10th annual survey of consumer finances, conducted for it by U of Michigan's survey research center, reports consumers believe they are in better financial position than year ago, more indicate they plan

to buy appliances this year. (2) Joint Congressional Committee on Economic Report agreed economy has been improving since late 1954, added that both employment and production have regained one-half the ground lost in 1953-54, foresaw national output valued at \$375 billion in 1955. (3) Commerce Dept. reported 41% of families now have incomes of at least \$5000 a year; since 1947, number of families with incomes of over \$10,000 has increased by 100%, those with more than \$4000 a year by 70%.

* * * *

TV production totaled 164,478 week ended March 18, compared to 160,995 units preceding week and 166,461 week ended March 4. It was year's 11th week and brought production for year to date to about 1,835,000 vs. 1,200,000 same 1954 period.

Radio production totaled 307,549 (160,048 auto), highest weekly output of the year, up from 297,595 week ended March 11 and 297,457 week before. Production for 11 weeks was 3,900,000, compared to 2,200,000 in corresponding period year ago.

Topics & Trends of TV Trade: Crosley's offer of a money-back guarantee to N. Y. area customers if its "Custom V" 21-in. receiver does not "outperform" all other TV sets, promoted in full-page ad in N. Y. newspapers March 20 and smaller ads later in week, got mixed reaction from dealers—some favoring device as means of helping them close sales, others objecting to becoming, in the words of one, "a delivery system."

The initial ad, placed by distributor Gerald O. Kaye & Assoc., said: "Purchase any of the magnificent Crosley Custom V television receivers—even the low-priced leader at \$179.95—and if it does not perform better in your home than any set in your neighborhood, regardless of price, return it to your authorized Crosley Custom V dealer—and get the purchase price of the set refunded. And what's more, you have 10 full days from the time the set is installed to satisfy yourself that you have the best TV in America." It invited customers to "compare performance in the city or 100 miles from New York—in your own home!"

Dealers favoring idea felt confident that even if a set is returned, they will be able to hold the customer and sell him another receiver. Those against it said comparisons would be difficult to prove, since sets perform differently in different locations in a room, much less in different houses. Kaye, of course, agreed to take back any sets returned to dealers.

Crosley this week added a 17-in. maroon metal "Super V" table model at \$130, the \$140 mahogany & \$150 blonde "Super V" sets remaining unchanged. TV-radio sales mgr. H. J. Allen said Crosley TV unit sales in first quarter increased 74% over first 3 months of 1954, credited increase to vertical chassis design, first introduced in "Super V" series but now used throughout entire line.

* * * *

Arvin calls it quits on TV production about June 1, will divert most of its TV personnel and facilities to expansion of radio output thereafter. It's second big-name company to quit TV in last 3 months—aside from several in bankruptcy proceedings—the other having been Stewart-Warner (Vol. 10:52). Arvin pres. Glenn W. Thompson attributed move strictly to manufacturing economics, explaining: "Arvin has found that the rewards are insufficient for the time, energy and capital required. We are convinced that the company's resources can be employed to better advantage by expanding into electronic items which fit more logically into our type of manufacture." He said he was making announcement well in advance of discontinuance so inventories can be disposed of orderly, so distributors and dealers will have ample time to make connections with other TV manufacturers, and so employes can be gradually transferred to other divisions. TV-radio sets accounted for 29% of Arvin's total sales of \$53,372,757 in 1954—though it's believed radios, particularly auto sets, constituted bulk of the 29%.

CURTAILED EARNINGS for 1955 are expected by many TV-radio and tube manufacturers as result of the retroactive tax repeal bill (Vol. 11:12) which breezed through the House March 24 by voice vote and now goes to Senate committee, with passage expected shortly. Fought bitterly by RETMA and other trade assns., bill (H.R. 4725) repeals Sections 452 & 462 of Internal Revenue Code, which permit manufacturer to deduct cost of warranties on sets and tubes sold in 1954 and also a reserve fund set up to cover anticipated expenses on those warranties in 1955.

The tax bill of manufacturers will be increased by millions of dollars, industry-wide, RETMA estimates. The deductions permitted on warranties for sets sold in 1954 will have to be reported out of 1955 income because, under terms of bill, businessmen are given until Sept. 1, 1955 to pay all back taxes.

Unanimous House passage of the bill, requested by the Administration, means that both parties are supporting repeal. As result, RETMA probably will not even bother to testify when bill goes to Senate Finance Committee for hearings, though this hasn't been finally determined.

Bill also affects dealers and servicemen, though to a lesser extent. NARDA chairman Mort Farr warned House Ways & Means Committee before bill's passage that repeal could impose a burden on dealers which in some cases "may often be literally ruinous."

Compatible black-&-white TV system with double the vertical and horizontal resolution of present system was described at IRE convention by Pierre M. G. Toulon & Francis T. Thompson, Westinghouse. System requires special 2-gun picture tube with 2 kinds of phosphors—one long decay, other short decay. At transmitter, equipment analyzes picture for "redundancy," transmitting large detail and motion with 2 conventional fields. Small, stationary details are transmitted with 8 fields. Authors stated that "fortunately, most of the system complications occur at the transmitter where the redundancy analysis is made." System differs from dot-interlace system which doubled horizontal resolution, developed by Philco several years ago.

TV shipments to dealers totaled 637,479 in Jan., when production was 654,582, reports RETMA in state-by-state tabulation (county-by-county breakdown available to members on request). Total compares with shipments of 1,014,227 in 5-week Dec., when production was 833,423, and shipments of 612,222, production of 420,571 in Jan. 1954. New York led in shipments, with 59,197; California second, 43,597; Pennsylvania, 42,100.

Wells-Gardner Co., Chicago private label manufacturer, has turned back to Govt. \$390,000 company saved by cutting costs on a \$4,000,000 Navy contract for electronic parts, reports pres. Robert S. Alexander.

Trade Personals: Joseph H. Gillies appointed Philco manufacturing v.p. in addition to his duties as v.p. & gen. mgr. of govt. & industrial div. . . . Matthew D. Burns, gen. mgr. of Sylvania electronic tube operations, elected a v.p., headquartering in N. Y. . . . Maj. Gen. Edmund C. Langmead, USAF (Ret.), joins Packard-Bell to assist in development of technical products div. . . . Douglas Wallace, veteran of 33 years with company, elected a v.p. of Graybar, N. Y. . . . A. Wm. Christopher Jr., ex-Trad TV, named field rep for Sylvania's new electronic systems div., covering military agencies in Philadelphia, Ft. Monmouth, Boston & N. Y. State areas and working out of new office at 4700 Parkside Ave., Philadelphia . . . James G. Richmond promoted to manufacturing mgr., Indiana Steel Products Co.; Port M. Wheeler named asst. sales mgr. . . . Edwin F. Nile named Sparton eastern regional mgr., Albany, succeeded as east central mgr. by Howard Whipple, headquartering at Jackson, Mich. plant; Jack Clarke named west central mgr., Chicago; Lloyd De Young, southern regional mgr., Atlanta . . . Wm. H. Graham, ex-Crosley, named gen. mgr. of Magnavox TV-radio-phono plant at Greenville, Tenn., replacing Joe F. Dolland, resigned . . . Charles H. Berman resigns as Scott Radio field sales mgr. . . . Wm. A. Rockwood appointed asst. to J. H. Voss, v.p. in charge of Stromberg-Carlson telephone div. . . . Franklin F. West, ex-Sonotone, named Clarostat quality control mgr. . . . Wm. O. Hamlin, ex-Sylvania, named CBS-Hytron supervisor of technical information service . . . E. Leslie McCarthy, ex-RCA Victor Co. Ltd., named adv. mgr., Canadian Aviation Electronics Ltd., Montreal, DuMont licensee . . . Harry A. Rice named mgr. of Canadian Marconi's new magnetron & power tube plant to be constructed adjacent to headquarters at 2442 Trenton Ave., Mt. Royal, Que.; he's succeeded by C. P. McNamara as mgr. of commercial products div.

* * * *

DISTRIBUTOR NOTES: Sylvania appoints Mayflower Sales Co., St. Louis, replacing Schwander Co., 3914 Olive St. (Julian Schwander, pres.), now Stromberg-Carlson distributor; Sylvania also appoints Thompson & Holmes Ltd., 650 Second St., San Francisco, replacing Western Empire Distributing Co., and Wright & Willembly, Omaha . . . Hoffman Electronics: Mayflower Sales Co., Kansas City (Al Hicks, gen. mgr.) and Radio Supply Co., Auburn, Me. (Wm. Rinaldi, sales mgr.) . . . Stromberg-Carlson: Kelvinator, Chicago (Wm. DeCamp, zone mgr.), replacing own factory branch . . . Progressive Appliance Distributors Inc., Cleveland, relinquishes Capehart-Farnsworth line . . . Zenith New York appoints W. E. Skinner, from N. J. div., as v.p.-gen. mgr., replacing Wm. W. Boyne, resigned . . . DuMont New Jersey appoints Joseph Sarlin gen. sales mgr.; he's ex-v.p.-gen mgr. of recently-discontinued Chicago factory branch . . . Harry Alter Co., Chicago (Crosley-Bendix) appoints Sam Robins field sales mgr. . . . Peaslee-Gaulbert Corp., Louisville (Admiral) announces resignation of sales mgr. Edward J. McGrath . . . Gerald O. Kaye & Assoc. (Crosley-Bendix) starts construction of new headquarters at 56th Road & 50th St., Maspeth, L. I. . . . Stromberg-Carlson: Fergerson Co., 10th & Broadway, Paducah, Ky. (H. W. Rankin, v.p.) . . . Chemung Appliance Distributors (Philco), moves to 557 E. Water St., Elmira.

Regal Electronics Corp., TV-radio manufacturer of 605 W. 130th St., N. Y., which had been operating under Chapter XI of Bankruptcy Act since Dec. 1953, has been adjudicated bankrupt. Referee Herbert Loewenthal ordered that plant be locked up pending settlement of claims.

Daniel W. Tracy, 68, onetime Asst. Secy. of Labor who served as pres. of International Brotherhood of Electrical Workers 1933-1940 & 1947-1954, died in Washington March 22. At time of death he was an AFL v.p. & president emeritus of IBEW.

Greater accuracy in location and height of antenna towers will be required by FCC in cases where Airspace Subcommittee labels tower a "critical obstruction." New FCC Public Notice 55-348 outlines new requirements which will hereafter be included in construction permits for towers considered "critical obstructions": (1) Stipulated ceiling on height of the specific antenna, including obstruction lighting and other attachments. (2) Bench mark on tower base shall give elevation above sea level within 1 ft. (3) Position of tower site shall be determined within 1/2 second of latitude & longitude. (4) Affidavit by engineer or surveyor shall specify geographic coordinates, over-all height above sea level, describing survey and reference points, together with plat and sketch of site and structure.

National Assn. of Educational Broadcasters announces availability of 40 scholarships for attendance at upcoming educational TV workshops. Each will be worth \$150, under grant from Ford Foundation's Fund for Adult Education. NAEB committee will screen candidates, who should address applications to NAEB, Urbana, Ill. First TV production workshop will be conducted at Iowa U, Iowa City, Aug. 14-Sept. 3, limited to 30 representatives of educational TV licensees, grantees or applicants. Engineering workshop will be held at Michigan State's WKAR-TV, E. Lansing, Sept. 12-16.

Closed-circuit TV will help N. Y. board of education select principals for city's schools next month. Rather than visit school classes as part of their supervisory tests, as in past, candidates will convene April 11 in a high school auditorium to watch 2 classes being conducted in WCBS-TV's Studio 61. From the telecasts, candidates will write supervision reports, which will be judged competitively as part of exams. Board and WCBS-TV share \$4500 cost of project, which will save city estimated \$10,000.

ABC's request to supply programs to XETV, Tijuana, was opposed this week by KFMB-TV, San Diego, which told FCC that Mexican station is beamed almost solely at American viewers while enjoying "every advantage that freedom from control of the U. S. Govt. can bring" and remaining free from the "limitations and costs imposed by the programs being broadcast by local San Diego stations."

"Pirating" of TV-radio play-by-play descriptions of N. Y. Giants baseball games was forbidden this week by injunction of N. Y. Supreme Court, which ordered Martin Fass to stop his 4-year practice of transmitting such descriptions by teletype to radio stations in west. Injunction stated commercial value of play-by-play descriptions to team often extends for years.

Advertising Council re-elects all officers this week: chairman, Stuart Peabody, Borden Co.; pres., Theodore S. Repplier; v.p.'s, George P. Ludlam (N. Y.) & Allan M. Wilson (Washington); secy., Frederic R. Gamble, AAAA; treas., Paul B. West, ANA. New board members elected were Wm. R. Baker Jr., Benton & Bowles; Marion Harper Jr., McCann-Erickson; Victor Schwab, Schwab & Beatty.

Rep Joseph Weed is donor of annual \$500 scholarship open to college seniors and graduate students interested in applying TV-radio to a major field of study at Iowa State College, which operates WOI-TV & WOI; application blanks are available from Richard B. Hull, at WOI-TV, Ames, Ia., and must be submitted prior to May 2.

Sheraton Hotels have bought 10 Fleetwood projection TV receivers, are now equipped for coast-to-coast closed-circuit sales meetings, conventions, etc. The new unit, made by Fleetwood Corp., 1037 Custer Dr., Toledo (Vol. 10:49, 51 & 11:2) is in single cabinet, produces 9x12-ft. picture.

Sale of WRRR, Rockford, Ill. (1-kw, 1330 kc) for \$45,000 to Wisconsin radio group headed by Wm. E. Walker of WMBV-TV, Marinette-Green Bay, Wis. (Ch. 11), was approved by FCC this week.

MAJOR TRANSFER deals approved by FCC this week: (1) WDEL-TV, Wilmington, Del. (Ch. 12) from Steinman brothers to Paul F. Harron, owner of radio WIBG, Philadelphia (Vol. 11:4) for consideration of \$3,712,500. (2) KBTW, Denver (Ch. 9) from group of 17 local business men to partners John C. Mullins and Frank Leu for \$1,000,000 (Vol. 11:7).

In approving Wilmington deal, FCC took unusual step of cautioning Harron that grant is made with "explicit understanding" that transmitter site and main studio must remain at present location and that "operation and service, including programming, [be] consonant with, if not subservient to, the public interest of the principal city to be served, namely Wilmington, with secondary consideration in this respect being given to the local interests of any other segment of the station's coverage area." In other words, though station's 316-kw signal easily covers nearby Philadelphia, being located about halfway between the cities, it must remain identified with Wilmington.

Denver deal brings former owner of Phoenix's KPHO-TV back into TV, with Joe Herold remaining as mgr. John Mullins, of Tulsa, took over pre-freeze Phoenix station from group of Texas oilmen in 1949, sold it for \$1,500,000 to Meredith in 1952 (Vol. 8:18). Mr. Leu owns Homeland Insurance Co., Nashville, and Security Life & Accident Insurance Co., Mobile, and has small interest in WMSL-TV, Decatur, Ala. As in case of Wilmington, where Steinmans retain their radio WDEL, Denver station's stockholders W. D. Pyle and T. V. Eckgram did not sell their radio KVOD.

FCC's FM functional music decision (Vol. 11:12), released this week (FCC Public Notice 55-340), makes it clear that stations' auxiliary service must be primarily of a music nature at start—but Commission holds door open to introduction of other kinds of services, such as 2-way taxi radio, if good case is made later. New rules require station to get a Subsidiary Communications Authorization (SCA) for new service; to operate regular FM not less than 36 hours weekly, with minimum of 5 hours daily between 6 a.m. and midnight; to switch all SCA operations to multiplex basis within a year. When multiplexed, new service will be receivable only by those with special receivers—not by general public. Pioneer FM broadcaster Ben Strouse, of WWDC & WWDC-FM, Washington, and chairman of NARTB's FM committee, was disappointed with decision because shift to multiplexing will deprive WWDC-FM of large home audience which has shown great enthusiasm for programs which are almost entirely music. He termed it great mistake for Commission to term such programming a "non-broadcast service." In partial dissent, Comr. Doerfer gave same opinion. Comr. Webster also dissented partially, stating fear that non-broadcast services would eventually dominate FM band.

Edward Lamb is due to take the stand April 1 when hearings resume on his application for renewal of license for WICU, Erie. Last week his attorneys indicated they would appeal to full FCC to call off hearings and grant renewal (Vol. 11:12). This week they deferred plans for the appeal, agreed to have Lamb testify. Said former Attorney General J. Howard McGrath, Lamb's chief attorney: "We welcome an opportunity to have Mr. Lamb testify in his own behalf and we hope this will prove a basis for early renewal."

NCAA's "compromise" TV plan (Vol. 11:12) was approved by member colleges this week, 193-27. NCAA TV committee was to meet in New York at week end to consider proposals for televising the 8-game national series. Individual teams are free to negotiate own sponsorship and station deals for 5-game regional series.

Alfred I. duPont Awards for 1954, presented in Washington March 25: (1) Radio WHAS, Louisville, for "programming which consistently shows a lively sense of public responsibility and an awareness of public and community interests." (2) Radio KGAK, Gallup, N. M., for "developing programs which have contributed to the better health and education of the Indians." (3) CBS commentator Eric Sevareid, for "thoughtful and lucid analysis of the current scene, for penetrating knowledge of men and events, combined with tolerance, reasonableness, and a leavening of friendly or caustic humor." Awards comprise plaque and \$1000. Awards committee also gave special commendation to WCBS-TV, N. Y., for such programs as *Camera Three*, *On the Carousel*, *Here Is the Past*, *America in the Making & Our Goodly Heritage*, in which "talent and showmanship are called to the service of programs of unusual educational and spiritual value"; and to KMJ-TV, Fresno, for "unusually comprehensive programming in the fields of agriculture and education, including a novel and effective series to teach English to foreign-born residents of the region." Awards judges: Dr. Francis P. Gaines, pres. of Washington & Lee U; Mrs. duPont; Dr. Hadley Cantril, Princeton U; Turner Catledge, managing editor, *New York Times*; Dr. Susan B. Riley, American Assn. of University Women. Note: Next big presentation will be George Foster Peabody Awards at luncheon of Radio & Television Executives Society April 20 at Roosevelt Hotel, N. Y.

Reversing recent newspaper criticism of TV (Vol. 11:11), Minneapolis-St. Paul's WCCO-TV has released 19-p. comparison of costs & coverage which take some digs at its owners—the Ridders' *St. Paul Dispatch* and *Pioneer Press* (53%) and Cowles' *Minneapolis Star and Tribune* (47%). Though the report, titled *Sight Plus Sound Plus Motion Equals Advertising Action*, perhaps illustrates nothing more than the commendable independence of joint newspaper-TV interests, it makes these claims: (1) Circulation of major newspapers in Twin Cities is failing to keep pace with steadily increasing population, though ad rates have risen steadily. (2) WCCO-TV covers 8000 more families than combined circulations of Minneapolis & St. Paul newspapers. (3) An advertiser's cost-per-thousand rate per advertising impression is 78¢ on WCCO-TV vs. \$4.18 on *Star*, newspaper with largest circulation in Twin Cities area.

Publisher Samuel I. Newhouse, who owns 10 newspapers and owns or has interests in 3 TV stations, this week acquired 23% interest in KWK-TV & KWK, St. Louis (Ch. 4) as part of deal whereby he bought 103-year-old *St. Louis Globe-Democrat* for \$6,250,000 cash. He owns WSYR-TV (Ch. 3) & WSYR, Syracuse, WTPA, Harrisburg, Pa. (Ch. 71), and 50% of KOIN-TV (Ch. 6) and KOIN, Portland, where he bought *Portland Oregonian* several years ago. Brokers in St. Louis deal were Allen Kander and Blackburn-Hamilton. (For list of Newhouse newspapers, see WSYR-TV, p. 160, *TV Factbook No. 20*.)

Application for selective satellite was filed this week with FCC. August H. Vogeler, Twin Falls (Ida.) storage and warehouse operator, asked for Ch. 13 there, proposes to offer satellite facilities to Salt Lake City's KSL-TV & KUTV, Boise's KBOI-TV and Idaho Falls' KID-TV. New station applications on file total 167 (18 uhf). [For details, see *TV Addenda 20-K* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

Channel shifts & power boosts: WLOK-TV, Lima, O. April 24 shifts from Ch. 73 to Ch. 35, changes call letters to WIMA-TV. FCC this week wired authorization for WLVA-TV, Lynchburg, Va. (Ch. 13), to increase power "immediately" to 316-kw; KGBT-TV, Harlingen, Tex. (Ch. 4), now operating with 93.3-kw ERP.

SUMMARY-INDEX OF THE WEEK'S NEWS—April 2, 1955

RCA REPLY IN DEPT. OF JUSTICE anti-trust action denies all charges of patent restraints, defends licensing policies (pp. 1 & 14, and Special Report).

AIDS TO UHF AND WEAK VHF sought by Govt. and industry—with "second look" at deintermixture, booster proposal, network investigations, etc. (p. 2).

BATON ROUGE, BEAUMONT & WACO get new starters, all vhf, bringing on-air total to 431, highest yet; 47 stations have quit air to date (p. 3).

SUBSCRIPTION TV COMMENTS of telecasters to stress dangers of losing known service while toying with the unknown; CBS to take strong anti-fee stand (p. 3).

"RESCUE" OF 3 UHF STATIONS, 2 now off air, projected as NATS-GE continue quest for president; Ted Streibert mentioned; Madison Ave. skeptical (p. 4).

BOOSTERS PROPOSED by FCC to fill in uhf "shadows"; majority of industry comment favors low-power operations, urges more relaxation of rules (p. 5).

FCC GRANTS Ch. 7 to WDBJ, Roanoke, Ch. 23 to KYAK, Yakima; examiner favors WKAT for Miami's Ch. 10; many uhf operators seek lower channels (p. 5).

FAIR TRADE LAW REPEAL urged by blue-ribbon committee, but Govt. is unlikely to take any action to curb discount houses (p. 11).

AUTOMATION'S EFFECT ON ELECTRONICS industry to be explored at CIO conference April 14; RCA contract talks with IUE start April 4 (p. 12).

MAJOR FILM PRODUCERS TYING UP with TV—Disney & Warner Bros. with network, 20th Century-Fox & Paramount with sponsors and their agencies (p. 7).

FIRST LEGIT THEATRE-TV SHOW a flop, but no one knows why; championship bout and polio report will be next large-scale uses of closed-circuit TV (p. 7).

NEW "TRANSLATOR" SATELLITE shipped to Manson, Wash., for experimental low-power operation; upcoming stations report on progress and target dates (p. 9).

SENATE TV HEARINGS won't get going for at least 6 weeks; House approves \$170,000 extra funds for FCC's own network study and application processing (p. 10).

PROSPECTUS ON NEW STORER STOCK offering discloses how gross and net zoomed after entry into TV; 1954 gross was \$17,736,531, profit \$3,680,779 (p. 16).

RCA REFUTES PATENT RESTRAINT CHARGES: RCA categorically denies practically every allegation in Dept. of Justice's civil anti-trust action instituted last Nov. 19 in N.Y. Federal district court (Vol. 10:47) -- and unequivocal wording of 36-p. brief filed March 29, replying to each of Govt.'s 63 points and asking dismissal of the charges, indicates firm intention of standing by its patent-licensing structure.

(Full text of brief is published as Special Report with this issue; full text of Dept. of Justice complaint was published as Special Report, Nov. 20, 1954.)

Repeatedly, RCA insists its patent licenses are available to all comers on "reasonable and non-discriminatory terms and without restriction." Far from stifling TV-radio competition, far from restraining the electronics industry, RCA asserts it "has pioneered and been responsible for the creation and expansion of much of this industry...the fastest growing and most dynamic industry in the world."

Its own share of the total electronics industry last year was put at 10%; and of combined TV-radio receiver sales same year, 12.6%. "Leadership of a 10% factor in the industry," says the brief, "has been a leadership by example, not by control in any way, shape or form." Govt. suit raises no monopoly issue with respect to RCA manufacturing, broadcasting and other operations; it names GE, Westinghouse, AT&T and latter's Western Electric and Bell Labs as co-conspirators but not as defendants.

Suit aims primarily at so-called "package licensing agreements," alleges the misuse of patents in pooling 10,000 or more of them. RCA patent royalties are said to exceed \$20,000,000 a year, which RCA concedes, but allegations of exclusion of competition and harassment of other manufacturers are vigorously denied. RCA says it not only pays for patents of others, without restraints upon them, but has spent many millions on research and development on its own -- notably some \$50,000,000 on black-&-white TV and an equal amount on developing a compatible color TV system.

Brief traces history of company from its formation in 1919 ("at the urgent

request of the U.S. Govt. in order to free American communications from foreign domination and to create a new American radio company") through licensing and cross-licensing agreements ("without them the industry would have been paralyzed by conflicting patent holdings and endless patent litigation") up to present stature as the industry's biggest entity, doing nearly a \$1 billion business (Vol. 11:9).

RCA rests its legal case largely on the consent decree of 1932 under which GE, Westinghouse & AT&T disposed of their stock in RCA and Govt. agreed to new cross-licensing agreements. "RCA avers," states the brief, "that the Govt. cannot attack a consent decree to which it is a party by charging RCA with violating the law -- beginning the very day after the decree was entered -- because it has conformed to the provisions of the decree." These were reaffirmed by the courts in 1942, says the brief, and reasserted by the court as recently as 1954.

You don't have to be a lawyer to understand even the technical details of the comprehensive legal document filed this week. Since RCA claims that every one of the TV receivers made by its licensees utilizes one or more of its inventions -- representing a public investment of more than \$10 billion -- and since RCA spells out its licensing philosophy and policies in detail -- it's an invaluable reference source for manufacturers, lawyers, students, anyone concerned with the industry. For more highlights culled from brief, with particular relation to electronics, see p. 14.

FCC, CONGRESS & INDUSTRY WORK ON UHF: Efforts to preserve and resuscitate uhf stations -- and ailing vhf outlets as well -- proceeded at many levels this week, as industry kept fingers crossed as to probable efficacy of the moves, particularly for the short run. FCC, Congress and industry took following steps:

- (1) FCC started its "second look" at deintermixture by inviting comments on a reconsideration of its denial of previous deintermixture petitions for Peoria, Ill.; Madison, Wis.; Evansville, Ind.; Hartford, Conn. (see below).
- (2) Uhf "booster" rule-making, to permit uhf stations to fill in shadow areas with low-power on-channel repeaters, was initiated by Commission (see p. 5).
- (3) AT&T's proposal for lower-cost off-air microwave service (Vol. 11:7) was set forth by Commission, and industry was invited to comment about it (p. 16).
- (4) House voted FCC \$80,000 to conduct a network study, in a surprise action; Commission has said this is long overdue, and Senate concurrence appears likely. In addition, House voted FCC \$90,000 for application processing (p. 10).
- (5) Uhf tuner makers were invited to meeting April 20 with Senate Commerce Committee, 5 days before set makers sit down with Committee, while Sidney Davis took over as head of investigatory staff and prepared for hearings (p. 10).
- (6) New money was being found to revive 2 defunct uhf stations and shore up one that is leaning badly, while GE continued work on its "help uhf" plan (p. 4).

* * * *

FCC's action on deintermixture was in line with promises to Senate Commerce Committee (Vol. 11:12), but it shouldn't be concluded that Commission is by any means hell-bent to deintermix. What the Commission wants is a lot more information before it makes up its mind. The 4 cases chosen are probably the most clear-cut. Peoria, Madison, Evansville and Hartford each have 1 vhf channel -- not granted yet, though hearings have been conducted on all. Evansville also has a vhf in nearby Hatfield.

In each case, uhf operators have asked that the vhf channel be deleted, moved out of town or given to educators -- to preserve the cities as "pure" uhf. FCC's previous denials were generally considered weak, vulnerable to court reversal, and it's certain Commission will be much more careful in next go-around. Usually, FCC has cited vhf applicants' investment in hearings as a major reason for denials.

Commission is studying similar cases -- Corpus Christi, New Orleans, Baton Rouge, et al -- but similar action isn't necessarily expected.

Commission is asking parties for "the works" in their comments, which are due May 2: Grade A & B contours of operating and potential stations in each area; number of families within the contours, plus number able to get signals beyond contours; total sets in area, including percentage equipped for uhf; availability of signals from stations in other cities; estimated loss of service if vhf is deleted; data on

how the deleted vhf channel can be used elsewhere; nature of network affiliations & number of network programs; availability of other programs; extent of advertiser support for uhf; impact of uhf set sales and conversions if uhf's lose network shows.

That Commission really intends to give subject full treatment is indicated by fact that it said oral argument will be conducted after comments are filed -- something rather infrequent in such proceedings.

Comr. Hennock dissented, stating that it is "utterly arbitrary and unjustifiable for the Commission to take steps looking toward deintermixture in 4 isolated cases without first announcing its intention with respect to deintermixture throughout the country...Whatever temporary advantage deintermixture might afford to uhf broadcasters located, like the petitioners, in isolated communities where no vhf station has yet been authorized, it would prove in the longer run to be illusory."

Commission action is bound to stimulate other uhf stations to plump for similar action in their areas -- even to extend principle to shift operating vhf's to uhf.

NEW VHF's IN BATON ROUGE, BEAUMONT & WACO: Three new stations went on air this week -- all vhf. They bring on-air total to 431, highest yet -- total having been held down in recent months by the 47 deletions to date (41 uhf, 6 vhf). Week's starters:

WBRZ, Baton Rouge, La. (Ch. 2), offering first competition to 2-year-old uhf WAFB-TV (Ch. 28), aired test patterns March 30, hooks up with NBC & ABC April 14. It has 10-kw RCA transmitter, 12-bay antenna on 750-ft. Ideco tower. Manship family, publisher of Baton Rouge Advocate and State Times, operating radio WJBO, owns 50%; other principals are ex-operators of radio WLCS, who dismissed own Ch. 2 application and sold radio station. Roy Dabadie is gen. mgr.; John Ferguson, program mgr.; Bob Reed, production mgr. Base rate is \$250. Rep is Hollingbery.

KFDM-TV, Beaumont, Tex. (Ch. 6), first local competitor of uhf KBMT (Ch. 31), which began year ago, started test patterns April 1, becomes CBS basic April 24. It has 10-kw RCA transmitter, 12-bay antenna, 608-ft. Emsco tower. Its principals are Darrold A. Cannan, who controls KFDX-TV, Wichita Falls, pres.; C.B. Locke, v.p.-gen. mgr.; with Gov. W.P. Hobby, publisher of Houston Post (KPRC-TV) and husband of Oveta Culp Hobby, Secy. of Health, Education & Welfare, holding option to acquire 32.5%. Mott M. Johnson, ex-KFDX-TV, is sales & operations mgr.; Edward F. Joslyn, program mgr.; Harold Bartlett, chief engineer. Base rate is \$300. Rep is Free & Peters.

KWTX-TV, Waco, Tex. (Ch. 10), planned as independent, began tests March 30. It's area's third outlet -- both KANG-TV, Waco (Ch. 34) and KCEN-TV, Temple (Ch. 6) having started in fall of 1953. It has 10-kw RCA transmitter, 12-bay antenna on 461-ft. Andrews tower. Owners include W.W. Naman, pres.; M.N. Bostick, v.p. & mgr. Chas. Boland is sales mgr.; Earl Huff, chief engineer. Base rate is \$200, rep Pearson.

'TV CANNOT EXIST HALF FREE & HALF FEE': Strong telecaster opposition to subscription TV is beginning to shape up as networks and stations begin preparation of comments which are due at FCC May 9. Though telecasters have been the "silent people" in the much-publicized pay-as-you-look picture (Vol. 11:9), they definitely will take a firm stand. Mostly, it will be in opposition to fee-TV.

Nature of opposition is becoming clearer, too. Among major arguments: (1) The economics of subscription TV are probably unsound, with no assurance of top-rated subject matter from any responsible source. (2) If economics prove sound, it will be because public is willing to pay for what it now gets free. (3) Why jeopardize a going system, of known value, to tinker with techniques of speculative worth?

Though RCA-NBC's and ABC's bearish views on fee TV have been known for some time (Vol. 11:9), CBS has taken a "let's study it" attitude. Now, says a spokesman, CBS will oppose it with full vigor. It's considering, for example, telling FCC that a show like I Love Lucy now costs sponsor about \$100,000 a week, which comes to a fraction of 1¢ per viewer. With a boxoffice in every home, on the other hand, no sponsor could match bid of pay-TV promoter who might get many times that from the viewer. Thus, all attractive programs would soon be converted to pay basis. The CBS thesis will be: "TV cannot exist half free and half fee."

CBS got into middle of a hassle this week, after March 27 Omnibus, produced by Ford Foundation, presented symposium on Phonevision. Broadcaster-telecaster Geo.

B. Storer participated, via film -- but audio was so bad his statements were hardly intelligible. Since he was only participant opposing subscription TV, Committee Against Pay-as-You-Look TV quickly protested and asked for new program.

CBS pres. Frank Stanton agreed program "did not do full justice to that side of the controversy," said CBS would put on another covering whole subject in Omnibus Sunday time after its season ends April 10. Storer will be invited again, as presumably will other opponents as well as proponents.

CAPT's campaign this week, as lines were being drawn for intense battle, was marked by retaining of noted inventor-engineer John V.L. Hogan as technical consultant. It also enlisted on its side of argument such groups as "Downtown Boosters," "Hospitalized Veterans for TV Committee," and "Shut-Ins for Free TV."

Note: Intensity of interest in subscription TV is indicated by the fact that Business Week April 2 devotes 2 pages to roundup on subject, and Wall St. Journal treated it in long front-page feature March 31.

ONE TOTTERING and 2 defunct uhf stations were subject of actual or potential "rescue" operations this week. In Macon, Ga., oldtime broadcaster E. K. Cargill, once chief owner of radio WMAZ (now companion to Ch. 13 WMAZ-TV in nearby Warner Robins, Ga.) and Texas oilman J. C. Barnes have agreed to take over 20-month-old WNEK-TV (Ch. 47) for \$1 plus assumption of about \$249,889 in liabilities. They propose to give it new business whirl. Present owners applied to FCC this week for transfer, saying they could not afford continued losses. Cargill will be mgr. and 25% owner, Barnes will hold 75% and put up new working capital. Station's operating deficit to date has been \$196,230.

In Lebanon, Pa., owners of WLBR-TV (Ch. 15), who lost about \$100,000 in year of operation up to sign-off last Oct. 16 (Vol. 10:42), are seriously contemplating reopening—depending on pledges of local ad support entirely, inasmuch as networks are all spoken for. They also are bucking application by WHUM-TV, Reading (Ch. 61) to take over the WLBR-TV channel. City has population of about 30,000 in center of rich farming & industrial area. It's "uhf country" with service from 2 uhf in Reading, 25 mi. away; 3 uhf in Harrisburg, 25 mi.; 2 uhf in York, 30 mi.; and from the vhf in Lancaster, only 22 mi., plus some from Philadelphia's vhf. Lester P. Etter is pres. & gen. mgr. of prosperous radio WLBR, which owns 52% of TV station, while *Lebanon News* owns 36%.

In Mobile, Ala., WKAB-TV (Ch. 48), which quit air last Aug. (Vol. 10:31) after some 20 months of operation, is definitely being sold to group headed by George A. Mayoral, exec. v.p. and chief engineer of WJMR-TV, New Orleans (Ch. 61)—but details of deal and time of reopening of station have not yet been divulged. Though station got on air about same time as vhf competitor, it was a consistent losing proposition. Sellers are Mrs. Louise P. Pursley and associates, with assent of lenders J. H. Whitney & Co., N. Y. investors, who own KOTV, Tulsa (Ch. 6).

* * * *

GE plan to finance uhf and other stations in trouble was going forward this week, said principals, but no president of projected new National Affiliated Television Stations Inc. (Vol. 11:12) had yet been found. There was talk of engaging Theodore F. Streibert, former pres. of WOR-TV & WOR and ex-MBS chairman, now director of U. S. Information Agency, top-level govt. service that runs Voice of America among other propaganda projects. Mr. Streibert, however, said he had not been approached.

Accolades came to GE, meanwhile, from CBS v.p. Richard Salant and Washington attorney Harry Plotkin, author of famous Plotkin Memorandum, during their debate before FCC Bar Assn. luncheon March 31. Said Salant: "GE has made an enormous stride forward, show-

ing imagination and boldness." Said Plotkin: "GE proposes a step in the right direction, but I don't think GE can do it alone. Others should join in."

But Madison Ave. was inclined to be skeptical about NATS project. Business rivals of Ely Landau's National Telefilm Associates Inc., program syndicate whose library services would be made available on deferred payment basis, didn't cotton to deal they said was beneficial only to a competitor. And station rep firms, which got letter from NATS v.p. Oliver Unger this week urging they cooperate on sales side, similar to Landau's letters to the program firms (Vol. 11:13), were not rushing to join the NATS project. Said one of top reps:

"Frankly, I don't know what to think about the whole setup. If it were not for the fact that GE has identified itself with it, and is apparently putting up a lot of money, I'd think it was simply a high pressure deal by film salesmen. I don't think the basic idea has much merit anyhow.

"Pouring money into a losing proposition—especially some of the uhf stations which were unsound in their planning and execution—is going to serve no more purpose than to get their owners further in debt. The money advanced to these stations—whether in cash or equipment—must be repaid. Unless there is a drastic revision in the entire spectrum picture, most of today's losers cannot be salvaged by going deeper in debt."

This rep went on to emphasize the costliness of TV installations, with uhf transmitters generally more expensive than vhf, and added: "Many basically uneconomic properties have jumped on the bandwagon in too-small markets because they heard stories about the golden TV goose and didn't want to be left in the lurch as long as there were channels available.

"Unless the situation has basic merit, all the pump priming in the world won't help stations in too-small markets that operate on a system that needs conversion from the norm. As for helping vhf stations, that may have more merit in some instances. Here again, if the station is basically sound, it would be operating profitably by this time."

First station to tell FCC it's seeking aid from new NATS Inc. is KTVQ, Oklahoma City (Ch. 25). In petition opposing change in tower site of vhf KGEO-TV, Enid, KTVQ told FCC its investment of \$600,000 in station "is presently in jeopardy." KTVQ petitioned added: "The station is presently in reorganization and an application . . . for reorganization [has] been approved by the court. The reorganization includes a plan for assistance from General Electric in accordance with the proposals advanced by that company for support and aid to TV stations." KTVQ said that its reorganization, together with expected support from GE, will afford it "reasonable opportunity to continue to survive and render a service meeting the needs of its community . . ."

BOOSTER proposal issued by FCC this week is companion piece to its low-power satellite proposal issued last year (Vol. 10:51) and on which industry commented this week. The booster rule-making is confined strictly to uhf—though it may be assumed that the principle, if adopted, will eventually be extended to vhf.

This week's proposal is quite general, aimed largely at gathering information. Commission stated that uhf just doesn't fill "shadows" in rough terrain as well as vhf does, so it proposed to permit operation of low-power units in "holes" simply repeating mother-station signals on same channel. It noted uhf booster experiments of RCA in Vicksburg, Miss., Adler Communications Labs in Waterbury, Conn., Sylvania in Emporium, Pa. It also noted that WSM-TV has "contributed extensively" to knowledge of subject through vhf experiments in Lawrenceburg, Tenn.

Commission shied away from using the term "booster," choosing to call the repeaters "amplifying transmitters." Its notice asks for technical data of all kinds, including handling of color, mileage separations, etc. It also seeks comments on costs, hours of operation, who shall be licensees, number of boosters in each area, applicability of multiple ownership rules, etc. Document is Public Notice 55-404, Mimeo. 17414, copies of which may be obtained from FCC or from us.

* * * *

Interestingly, new proposal was issued just day before industry filed final comments in FCC's satellite proposal (Vol. 10:51), which contemplates repeaters using *different* channels from those of mother stations.

RETMA committee, under chairman Ben Adler, suggested that FCC ease requirements on power tolerances, proof of performance & directionals and eliminate power minimum—provided station gives Grade A service to whole community. It also recommended that satellites be permitted anywhere, regardless how far nearest operating station is located.

Sylvania reported having received 95 queries about

satellites and boosters, including 16 from TV or radio stations, 16 from TV-radio distributors, 35 from individuals, 14 from corporate or civic organizations. It urged relaxation of requirements on frequency tolerance, side-band filters, directionals, and recommended that unattended or remote-control operation be permitted. It also suggested that Grade A coverage be substituted for minimum power requirement.

Sylvania estimated cost of on-channel (booster) station would run \$19,500, off-channel (satellite) \$21,500, while low-power outlet capable of local originations would run \$44,500. Annual operating costs were estimated at \$9950 for first 2, \$18,000 for the third.

Costs estimated by Adler were: A 20-watt on-channel station, capable of producing 750 watts ERP, would run \$12,500 for two 100-ft. towers, receiving & transmission antennas, transmission line, on-channel amplifier and test equipment; 150-watt amplifier, making 5-kw ERP possible, may be added for \$4960. A 20-watt off-channel station, which shifts any channel to any other, would run \$13,500 for same equipment listed for on-channel station—and 150-watt amplifier is \$4960. Station capable of producing local programs would run \$21,000, to which a "typical film & slide originating package," including vidicon camera, 16mm projector, slide projector, sync generator, audio equipment and auxiliary apparatus may be added for \$7500.

NARTB endorsed low-power principle but warned that originating stations have program rights which could be infringed by indiscriminate rebroadcasting.

National Assn. of Educational Broadcasters said it was "heartily in favor" and that adoption would speed growth of educational stations.

KFBC-TV, Cheyenne, urged that present allocation mileage separations be maintained; that one satellite be permitted in each area; that they have independent ownership.

WSM-TV, Nashville, recommended that multiple ownership rules be waived for satellites.

FCC's GRANTS this week comprised Ch. 7 CP to WDBJ, Roanoke and Ch. 23 CP to KYAK, Yakima, Wash., while examiner Herbert Sharfman issued initial decision favoring A. Frank Katzentine's WKAT for Ch. 10 in Miami Beach over 3 competitors.

Sharfman said WKAT had "clear lead" over others in local ownership, civic participation, integration of ownership-management and had good broadcast record despite lapse into broadcasts of horse-racing information. He had good things to say about other 3 applicants but felt that none had quite the combination of favorable features exhibited by WKAT. Other 3 are: L. B. Wilson Inc., owned by estate of the late operator of WCKY, Cincinnati; Public Service TV, owned by National Airlines; North Dade Video, owned by 10 local businessmen whose pres. is Frank Bryson.

Several more uhf stations sought lower channels this week: WNOW-TV, York, Pa. (Ch. 49) asked that Ch. 15 or Ch. 21 be made available in York through shifts involving CPs and allocations in Williamsport, Lancaster & Lebanon. WTPA, Harrisburg, Pa. (Ch. 71) also petitioned for Ch. 21 through moves affecting Williamsport & Lancaster. WKNY-TV, Kingston, N. Y. (Ch. 66) applied for Ch. 21 and WHYN-TV, Springfield, Mass. (Ch. 55) applied for Ch. 36, though rule making providing those channels hasn't been finalized.

WICS, Springfield, Ill. (Ch. 20) asked that city be deintermixed by giving Ch. 2 to educators or moving it to St. Louis. WTVO, Rockford, Ill. (Ch. 39) sought deintermixture through shifting Ch. 3 from Madison, Wis.

to Beloit, Ch. 39 from Rockford to Madison, substituting Ch. 68 for Ch. 54 in Fond du Lac, Wis. FCC tied latter into "second look" at Madison deintermixture (see p. 2), day after it was filed.

Also of an allocation complexon were complaints filed this week by KOTV and KVOO-TV, Tulsa, asking Commission to issue cease-&-desist order against KTVX, Muskogee, directing it to quit creating impression it's a Tulsa station.

FCC is cracking down on illegal boosters (Vol. 10:46-47) in series of hearings next month in Seattle. Examiner J. D. Bond will conduct hearings on proposed cease-&-desist orders for 3 rebroadcast operations in Washington State, has called 21 individuals and one corporation to appear. They're charged with operating without licenses and without licensed operators, and rebroadcasting programs without authority of originating stations (all Seattle outlets). Ordered to appear at hearing May 9 are 20 individuals from Quincy, Wash.; May 12, H. J. Miller of Nespelem; May 16, C. J. Community Services Inc., Bridgeport.

Profit-&-loss statement filed at FCC this week with application to switch WKNY-TV, Kingston, N. Y. from Ch. 66 to Ch. 21 in Poughkeepsie shows operating loss of \$42,017 from time it began commercial operations May 31, 1954 to Feb. 28, 1955. Net income totaled \$84,059, including \$58,189 from local time sales, \$13,560 national, \$531 network. Operating expenses totaled \$126,077. Total assets on Feb. 28 were \$225,571; liabilities included \$116,574 in equipment notes, \$137,901 common stock.

Personal Notes: Thomas W. Sarnoff named director of production & business affairs, NBC Pacific div., reporting to network services v.p. Earl Rettig . . . Marvin Josephson resigns from CBS-TV legal dept. to form Broadcast Management Inc., 5 E. 57th St., N. Y., specializing in business consultation to TV-radio production firms . . . Peter Finney resigns as TV-radio v.p., Harry B. Cohen Adv., to join Vidican Pictures Corp., 240 E. 39th St., N. Y., as partner & exec. v.p. . . . W. Ward Dorrell, research director of rep Blair-TV, elected v.p. of John Blair & Co. . . . Thomas R. Murphy, ex-Grant Adv. v.p., named Dallas mgr. of Pearson rep firm, succeeding Robert M. Baird, who goes to Atlanta to open new Pearson branch . . . Frank Fouce, pres. of Pan American TV Corp., Los Angeles, and owner of chain of Spanish-language theatres there, elected pres. of XETV, Tijuana, Mexico (near San Diego), controlled by Emilio Azcarraga; George Rivera, station's founder and operator of radio XEAC, becomes treas. . . . James M. Harmon, ex-KOTV, Tulsa, named program director, KFMB-TV, San Diego, succeeding Bill Fox, now gen. sales mgr. . . . Hoyt Andres now v.p. as well as gen. mgr. of WSFA-TV, Montgomery, Ala., with John C. Hughes promoted to sales mgr. and following transferred to WSFA-TV from WKY-TV, Oklahoma City: Gene R. Jacobsen, production supervisor; Robert F. Doty, program director; Robert M. Hayward, chief engineer . . . Sidney Barbet, ex-Buyers Associates Inc., ex-United Artists & Eagle-Lion Films, appointed film buyer of Hearst Radio's newly acquired WTVW, Milwaukee . . . Stephen C. French, ex-WTVP, Decatur, Ill., ex-GE adv. dept., appointed gen. mgr. of Gov. Noe's WNOE, New Orleans, succeeding James E. Gordon, resigned . . . John Schultz, ex-NBC TV Spot Sales, Chicago, named station mgr. of upcoming WFRV-TV, Green Bay (Ch. 5), due in mid-April, reporting to gen. mgr. Don Wirth . . . Herbert S. Stewart named acting mgr. of CHCT-TV, Calgary, succeeding John H. Battison, latter having completed contract to put station on air . . . Ann Brenton (Mrs. Gary Bronneck) has resigned as CBS Hollywood director of music copyrights after 17 years . . . John A. Thayer Jr., ex-DuMont Network, named sales mgr., Gotham Recording Co. . . . Harry Trenner, ex-v.p., Wm. Weintraub Agency, has formed Station Film Library Inc., 579 Fifth Ave., N. Y., offering daytime strips; associated with him is Richard Hubbell, ex-DuMont . . . Howard Grafman, ex-NBC, forms Howard Grafman & Assoc., Chicago, film distribution . . . Wm. G. Grainger resigns from NBC film div. to become pres. of National TV Distributors Inc., N. Y., film producers & distributors . . . Sidney Matz, ex-Feigenbaum & Wermen Adv., Philadelphia, named merchandising exec. of WRCA-TV & WRCA, N. Y. . . . Donald C. Arries assigned to Chicago office, N. W. Ayer as a TV-radio dept. director and production supervisor . . . Ervin J. Brabec elected v.p. of MCA Corp., affiliate of Music Corp. of America, in charge of industrial films for manufacturers & distributors . . . Edward G. Thoms, WKJG-TV & WKJG, Ft. Wayne, elected pres. of Indiana Bestrs. Assn., succeeding C. Bruce McConnell, WISH-TV & WISH, Indianapolis.

Two newspaper publishers who pioneered both radio and TV—Joseph Pulitzer, 70, and Col. Robert R. McCormick, 74—died this week. Pulitzer, editor & publisher of *St. Louis Post-Dispatch*, founded its KSD in the early '20s and its KSD-TV in 1947, latter at urging of newspaper's then adv. mgr., now TV-radio director, George M. Burbach. Col. McCormick's *Chicago Tribune* acquired WGN in radio's early days, established WGN-TV in 1948.

Junius Blair Fishburn, 89, chairman of Roanoke Times-World Publishing Co., pioneer in radio whose station WDBJ holds Ch. 7 grant, died April 1. His son Junius P., who was pres. & publisher, died last year when stricken with a heart attack during an FCC hearing.

Edward Lamb denied he wrote an article for the Communist *Sunday Worker*, in his first day on the stand April 1 as the lengthy hearings resumed on his application for license renewal of his WICU, Erie. Speaking softly in response to questions from equally soft-spoken Broadcast Bureau attorney Joseph Kittner, the Toledo broadcaster-publisher-industrialist said part of the article referred to in previous testimony by ex-Communist Louis Budenz may have been obtained by "someone picking up a copy of one of my manuscripts" of a series of speeches delivered in 1936. He also flatly denied testimony by his former secretary that he sent a telegram to *Daily Worker* editor John Gates in 1948. Much of the rest of the questioning was centered around Lamb's 1933 trip to Russia. He said he traveled as a tourist, received no special treatment. At outset, examiner Herbert Sharfman barred Lamb from making a preliminary statement. A statement was distributed to the press, however, expressing gratitude that "after 2,000,000 words of testimony [the] time has come in this fantastic proceeding when I can now tell *my* story." He claimed FCC had cleared him of same charges "many times before"—but that this time "my Government is on trial." Lamb's attorney J. Howard McGrath said that the loss to Lamb's enterprises as result of the FCC charges "runs into hundreds of thousands." In unusual Saturday session April 2, Lamb denied he ever knowingly was member of any committee of International Labor Defense organization, and clashed with Kittner over whether latter was trying to "entrap" him.

FCC set new limits on length of briefs filed with it and added more flexibility to its rules on time allotted for oral argument. The newly amended rules, as listed in Public Notices 55-387 and 55-388: In adjudicatory proceedings designated for hearing, briefs must not be longer than 15 double-spaced typewritten pages, unless exception is granted by motions commisioner. Memoranda accompanying exceptions to or statements in support of initial decisions, as well as briefs in reply to exceptions, will be limited to 50 pages, exceptions to be granted only by the Commission. In hearings before Commission en banc, former 20-min. limit on oral argument by each party has been rescinded. Instead, orders designating cases for oral argument will specify time allotted each party, Commission granting exceptions if "good cause" is shown.

Two major positions in FCC Broadcast Bureau are still unfilled—chiefs of Hearing and Renewal & Transfer Divs. Chairman McConnaughey, now firmly in position after Senate confirmation, is expected to make appointments soon. There's no clear indication who will be selected, though Joseph Nelson is known to have strong support for Renewal & Transfer post. He now heads TV application branch.

Joint Committee on Educational TV, at meeting this week marking 5th anniversary, elected Dr. Albert N. Jorgensen, pres. of U of Connecticut, as chairman, succeeding Dr. David D. Henry, pres.-elect of U of Illinois. Dr. Edgar Fuller continues as vice-chairman, Ralph Steetle as exec. director.

Col. Edwin L. White, chief of FCC Safety & Special Radio Services Bureau, retires at end of July after 35 years of govt. service; he joined old Federal Radio Commission in 1930, served previously in Army and in Naval Research.

Lambert B. Beeuwkes, ex-KYW, has opened offices in Little Bldg., Boston (phone Hubbard 2-2070) as management consultant specializing in uhf and declining-revenue radio stations.

Edward B. Crosland, asst. AT&T v.p. & attorney in Washington for last 3 years, named asst. to the pres. of AT&T in N. Y.

Telecasting Notes: Direct tieups of major film producers with ad sponsors & agencies look like next phase of Hollywood's growing affinity with TV. Whereas top-rated *Disneyland* began as tieup of Walt Disney studios with ABC-TV, which found the sponsors, and Warner Bros. entry into field is also by way of affiliation with ABC-TV (Vol. 11:12-13), 20th Century-Fox's projected advent represents direct deal with GE and its agency, Young & Rubicam, and it looks like Paramount will supply Colgate (Wm. Esty agency) with film format as substitute for Sun. NBC-TV *Comedy Hour* next fall . . . **Format for GE show** hasn't been decided, says Young & Rubicam, but at least 26 shows will be placed on CBS-TV, Wed. 10-11 p.m. Spyros Skouras himself handled negotiations, with assist from Y&R's Peter Levathes, who was once a Fox executive handling *Crusade for Europe* series for *Life Magazine* . . . Warner Bros. modus operandi, it's understood, will be 45 min. of entertainment, with 6 min. of behind-the-scenes in Hollywood, 3 min. of plugs for studio's latest films, 6 min. for sponsor commercials. Paramount, which released clips from its upcoming *Seven Little Foys*, starring Bob Hope, and *Run for Cover*, starring James Cagney, for colorcast celebrating opening of NBC-TV's new Color City in Burbank March 27, is expected to make available to Colgate the best of its old film properties, musical scores, etc., with excerpts from new shows and appearances of its contract players . . . Walt Disney proved there's boxoffice promotion (*20,000 Leagues Under the Sea*) and even theatrical re-release potential (*Davy Crockett*) for current as well as old shows—if the appetite is whetted by TV. He really started the rush of the big producers into TV, about which we've heard only the beginning . . . **First 20th Century production** made solely for TV syndication, though adapted from film and story properties, will be 39 half hours of *My Friend Flicka*, to be handled by General Artists Corp.; other film prop-

erties that may be adapted are *Cheaper by the Dozen* and *Jesse James*. It's suggested new "Emmy" may be added next year for best performance by an animal on TV, as horse star Flicka joins Lassie, Rin Tin Tin and J. Fred Muggs as TV celebrities . . . CBS got jump on stage & screen bidders by acquiring right to J. P. Marquand's current best seller *Sincerely, Willis Wayne*, will first adapt it to TV on *Climax*, May 5 . . . Philco Playhouse hit *Marty* is coming out as feature film this month (Vol. 11:13), then may become Broadway play—prompting USC's great TV educator Prof. Frank Baxter (*Shakespeare on TV* and *Now & Then* on CBS-TV) to remark to us while in Washington this week: "All we need now is a novel based on the plays—and we'll complete a reverse cycle" . . . U. S. Steel Hour's *Fearful Decision*, ransom kidnap drama played twice on ABC-TV and due for third telecast in May, has been bought by MGM for feature film . . . TV's Steve Allen appears to be choice to play Benny Goodman in Universal film based on bandleader's life to be produced in Hollywood; Walter Matthau, one of TV's top actors, signed for feature role in Kirk Douglas ferry's first production, *The Indian Fighter* . . . NBC signs Perry Como to 12-year contract, taking him away from CBS where his radio & TV shows have been sponsored by Liggett & Myers since 1943; NBC has also signed Martha Raye for 15 years, Ralph Edwards for 5. CBS tieup with Jackie Gleason is for 15 years, with Ed Sullivan 20 . . . Greta Garbo being sought for TV, says *Variety*, but she declined to participate in this week's Academy Awards show on NBC-TV; recently she conferred in N. Y. with CBS chairman Wm. S. Paley, giving rise to conjecture she may be signed by that network . . . Paul Dixon, who went from Cincinnati's WCPO-TV to DuMont, joins WLWT, Cincinnati April 18 for 3-3:30 p.m. Mon.-thru-Fri. show, to be fed also to Crosley outlets in Dayton & Columbus.

LEGITIMATE THEATRE took to the "road" this week via theatre TV in long-heralded and closely-watched experiment, which many theatrical personalities predicted would revitalize the American theatre. Nobody knows just why, but the March 29 theatre telecast of *ANTA Album*—closed-circuited to 33 theatre screens in 31 cities from coast to coast—was a flop.

Joint benefit for American National Theatre & Academy (ANTA) and CARE originated in DuMont's Adelphi Theatre, N. Y. (the only theatre reporting a full house), using DuMont facilities and syndicated by DuMont. Live performance in N. Y. cost theatregoers \$3-to-\$100; at movie theatres prices ranged from \$2-\$10, although at least one theatre halved prices before show time, due to poor advance sale.

Theatres booking the telecast had total capacity of 80,000, and ANTA & CARE officials had predicted gross of \$400,000 in event of a sellout. But no theatre reported more than a half-capacity crowd, one Chicago theatre (the Uptown) reporting that only 300 of its 4400 seats were filled. Cost of show was estimated at \$250,000.

Second-guessers submitted a number of possible reasons why the first legit theatre-TV offering flopped: (1) The fragmentary nature of the show, which, despite the big names appearing (Helen Hayes, Ezio Pinza, Lena Horne, Victor Borge, Ruth Draper, et al.), gave it the aura of a home-TV variety show. (2) Late hour of performance (10:30 p.m. in east) may have discouraged potential attendees. (3) Poor advance promotional buildup.

* * * *

Theatre-TV's most solid successes so far have been with televised championship prizefights—and May 16 Marciano-Cockell bout, slated to be theatre-televised from San Francisco by Nathan Halpern's Theatre Network Tele-

vision Inc., may be biggest such hookup in history. About 100 theatres are equipped with permanent closed-circuit equipment, and TNT has an additional 50 projection units available for rental at rates varying from \$100-\$500, depending on size of picture. TNT hopes to book out into more theatres than the record 71 which featured second Marciano-Charles bout.

Another closed-circuit TV show—this one using not only theatres but hotels, medical auditoriums and TV studios—will be the April 12 report to physicians on results of use of the Salk vaccine in combatting polio. Sponsored jointly by pharmaceutical firm of Ely Lilly & Co. and National Foundation for Infantile Paralysis, it will feature pickups from Ann Arbor, Mich., Indianapolis & New York City. It's scheduled to be closed-circuited to 65 cities, is being handled by DuMont's closed circuit dept. (Morris Mayers) and Medical Communications Inc. (Paul Klemtner & Co., Newark adv. agency).

NBC Radio's new week-end program concept, designed to revitalize its radio operation through 48-hour around-the-clock network service of music & information and possible use of audio portions of popular TV programs (Vol. 11:10), was approved this week by affiliates exec. & study committees, which will recommend it to all affiliates. Committees got details of plan, which will be revealed fully next week, at meeting with network officials in N. Y. Committees' members are Robert D. Swezey, WDSU, New Orleans, chairman; R. B. Hanna Jr., WGY, Schenectady; George Norton Jr., WAVE, Louisville; Harold Essex, WSJS, Winston-Salem, N. C.; Paul W. Morency, WTIC, Hartford; Richard H. Mason, WPTF, Raleigh; Jack W. Harris, KPRC, Houston; Walter J. Damm, WTMJ, Milwaukee; Edwin K. Wheeler, WWJ, Detroit; Wm. Fay, WHAM, Rochester.

Station Accounts: Valuable advice for using TV is given its members by American Bankers Assn., 12 East 36th St., N. Y., in 40-p. booklet, *Television for Banks*, plus kit of TV program ideas (85¢) released last week. It says banks' use of TV has been steadily increasing, 200 banks now buying TV time and devoting average of 33% of their ad budgets to medium. Results have been highly gratifying, ABA says, noting that one bank traced almost \$7,000,000 worth of business to 13-week TV series, another increased number of savings accounts by 2500, another sold 3000 calendar coin banks at \$1.25 each after two 90-sec. announcements. Though many banks sponsor syndicated film shows, ABA recommends greater use of local live programs—such as panel discussions on personal and family money management, dramatizations of bank's services, weather programs originating in front of bank, etc. . . . National Dairymen's Assn. to sponsor film series for children's audience, *Kite-Flite to Moonland*, on selected markets in all sections of country starting in late April, thru McCann-Erickson, Chicago . . . Helaine Seager Inc., Los Angeles, planning TV spot campaign to introduce its Pink Ice facial toiletry in East, thru Fiore & Fiore, N. Y. . . . Greyhound Bus signs Jerry Fairbanks Productions to produce 40-min. travel film in color for eventual distribution to TV outlets, thru Beaumont & Hohman, Chicago . . . Pillsbury Mills buys *Stars of the Grand Ole Opry*, 39 half-hour film features, from Flamingo Films, for 18 mid-western markets initially, thru Campbell-Mithun, Minneapolis . . . Emerson Drug (Bromo Seltzer) to sponsor Ziv's *Science Fiction Theatre*, which debuts week of April 17, in 20 markets, thru Lennen & Newell; Olympia Brewing Co., 16 markets exclusively, and 8 jointly with PictSweet Foods, thru Botsford, Constantine & Gardner, Seattle, and Brisacher, Wheeler & Staff, San Francisco; Serutan, 3 markets, thru Edward Kletterer & Assoc. . . . Ralston Purina buys live *Bandstand Revue* for San Francisco, Portland, Seattle, Providence, Cincinnati & St. Louis, thru Guild, Bascom & Bonfigli, San Francisco; company plans expansion to dozen markets by fall . . . Bulova to launch most concentrated ad campaign in its history shortly for new "23" series of watches, using spots on 270 TV-radio stations, thru McCann-Erickson . . . Philadelphia Distributors, Stromberg-Carlson outlet, sponsors *Standby Broadway* on

WPTZ Sun. 6:45-7 p.m., as Broadway show tryout, with winners qualifying for show business auditions . . . Shamrock Oil of Texas buys *Bill Corum's Sports Show* from National Telefilm Assoc. for 8 southwestern markets, thru McCormick Co., Amarillo . . . Among other advertisers currently reported using or preparing to use TV: Richman Brothers, Cleveland (men's clothing), thru Lang, Fisher & Stashower, Cleveland; Northrup, King & Co., Minneapolis (Golf Brand lawn seed), thru BBDO, Minneapolis; Alsol Products Co., Newark (auto wax), thru Hal Tunis Assoc., N. Y.; Carpet Institute, N. Y., thru Morey, Humm & Johnstone, N. Y.; Remington Arms Co., Bridgeport, Conn. (firearms), thru BBDO, N. Y.; Ben-Hur Mfg. Co., Milwaukee (farm & home freezers), thru Walker B. Sheriff, Chicago; Boyle-Midway, N. Y. (Wizard deodorizers), thru Geyer Adv., N. Y.; Hamilton Metal Products Co., N. Y. (Scotch insulated ware), thru Leber & Katz, N. Y.; Cremo Co., Philadelphia (Cremo toppings & cake frostings), thru Gresh & Kramer, Philadelphia; Madison Pharmacal Co., Chicago (In-Ex for pain & Wayless reducing tablets), thru Duggan & Phelps Adv., Chicago; Precision Radiation Instruments, Los Angeles (Precision Snooper geiger counters, scintillators, metal locators), thru McCarty Co., Los Angeles; Majo Co., Philadelphia (Emperor auto wax), thru Gresh & Kramer Adv., Philadelphia; Trio Chemical Works, Brooklyn, N. Y. (Amazon floor wax), thru Peck Adv., N. Y.; Geigy Chemical Co., Fresno, Cal. (insecticides), thru Julian Besel & Assoc., Los Angeles; Wesix Electric Heater Co., San Francisco (water & room heaters), thru Albert Frank-Guenther Law, San Francisco; Shirtcraft Co., N. Y. (Airman shirts & sportswear), thru Friend-Reiss Adv., N. Y.; Keystone Paint & Varnish Corp., Brooklyn (Key-Lux, Key-Tex, Key-Tint paints & enamels), thru C. K. Kondla Adv., N. Y.; Potato Advisory Board, Bakersfield, Cal. (California Long White Summer potatoes), thru McCarty Co., Los Angeles; Tura Inc., N. Y. (eyeglass frames), thru Dundes & Frank, N. Y.; Durall Products Co., York, Pa. (Durall tension screens & screenarium), thru Wilson, Haight, Welch & Grower, N. Y.; Jiffy Steak Co., Freedom, Pa. (Jiffy Super beef steaks), thru Friedman-Rich Adv., Pittsburgh; Jane Art Co., N. Y. (Misteez perfume), thru Ben Sackheim, N. Y.; Rilling Dermetics (Fluid facial), thru Dowd, Redfield & Johnstone, N. Y.

Several morning TV shows and about 1000 phone circuits were knocked out from 1:15 a.m. to 9:40 a.m. March 31 when Southern Bell's coaxial cable at Columbia, S. C. was dynamited by vandals—one of series of incidents that started when Communications Workers of America (CIO) went on strike March 14. Union has repeatedly disclaimed sabotage. Most of service was immediately restored by rerouting, but 8-9 a.m. of NBC's *Today* was knocked off WJHP-TV, Jacksonville; WJNO-TV, W. Palm Beach; WGBS-TV, Miami; and 7-8 a.m. of CBS's *Morning Show* was lost to WMBR-TV, Jacksonville; WDBO-TV, Orlando; WTVJ, Miami.

In connection with damage to KPIX, San Francisco and KEAR, San Mateo, during labor negotiations (Vol. 11:8), FCC has scheduled hearings in San Francisco May 3-6 on suspension of licenses of 5 technicians, to determine whether they "willfully damaged" equipment or "maliciously interfered" with operations. J. D. Bond will be examiner.

RCA cuts price of vidicon camera tube (type 6198) from \$345 to \$315, second reduction since tube was introduced in 1952, also doubling warranty period when purchased for replacement in broadcast and industrial use.

RCA shipped 3-V color film camera March 31 to KPTV, Portland, Ore. (Storer); April 1 to *Detroit News'* WWJ-TV.

Strong farm appeal is also forte of WREX-TV, Rockford, Ill., with *Town & Country* show popular with urban as well as rural audience; with 16 implement dealers of nearby communities partic. sponsors of *Waterfront*; with Murphy Products Co., Burlington, Ia. (livestock & poultry concentrates) buying 5 live market reports weekly on 52-week contract, thru Van Auken, Ragland & Stevens, Chicago; with Ralston Purina & John Deere sponsorships; with test starting March 7 for Lederle Labs Div., American Cyanamid Co. for Targot, cow disease remedy, placed thru Conklin-Mann & Son, N. Y. In connection with items in this column on farm programming (Vol. 11:10-11), compilation of TV station farm directors is carried in March *Television Age*—very handy.

Jackie Gleason is going to be "Mr. CBS" on Sat. night this fall. He'll control 2 hours of time each Sat., with 3 shows, either as producer or actor. Here's his lineup: 8-8:30 p.m., Dorsey Brothers film show, produced by Jackie Gleason Enterprises; 8:30-9 p.m., *Honeymooners*, starring Gleason & Art Carney; 9-10 p.m., *Cafe Mardi Gras*, variety show in night club setting.

WTVY, Dothan, Ala. (Ch. 9) this week announced affiliation with CBS under Extended Market Plan (Vol. 10:49-51), 21st station to sign up for EMP.

Bill exempting TV-radio stations from libel suits stemming from political broadcasts was passed by N. Y. state legislature this week.

Network Accounts: Network switches by sponsors and talent—*Variety* calls them “raiding parties”—increased this week, and the end of the fiercely competitive fight isn’t in sight yet. Following recent switch of Pabst fights from CBS to ABC-TV, former turned the tables this week and lured U. S. Steel from ABC-TV, its high-rated *U. S. Steel Hour* moving in starting July 6, Wed. 10-11 p.m., as alt. with GE. On the talent side, CBS-TV’s Perry Como, Chesterfield-sponsored, shifted to NBC, possibly for hour-long Sat. night show . . . Hallmark buys 6 of NBC-TV’s upcoming color spectaculars this fall on Sun. 4-5:30 p.m., and has taken option on remaining 2, thru Foote, Cone & Belding; shows will be produced by Maurice Evans, who will act in some . . . Lucky Strikes cancels alt. sponsorship of *Robert Montgomery Presents* on NBC-TV next fall, Mon. 9:30-10:30 p.m.; network says it will disclose new sponsor next week . . . Pontiac drops *Red Buttons Show* on NBC-TV in latter May, will join Armstrong Cork as alt. sponsor of *Circle Theatre* next fall, when it will expand to full hour, Tue. 9:30-10:30 p.m., thru MacManus, John & Adams . . . Whirlpool Corp., in first network sponsorship, buys 20 min. of Milton Berle & Martha Raye shows on NBC-TV starting Sept. 20, Tue. 8-9 p.m., thru Kenyon & Eckhardt; American Chicle Co. also buys 20 min., thru Dancer-Fitzgerald-Sample . . . Welch’s Grape Juice buys 15-min. per week of Disney’s upcoming *Mickey Mouse Club* on ABC-TV starting Sept. 5, Mon.-thru-Fri. 5-6 p.m., thru Kenyon & Eckhardt; it’s 8th partic. sponsor, others being Mars Candy, Carnation Milk, Post Cereals, Campbell Soup, Ipana, Armour, American Dairy Assn. . . . Camels to sponsor *You’ll Never Get Rich*, filmed series starring Phil Silvers, on CBS-TV next fall, time and starting date undetermined, thru Wm. Esty Co. . . . Dixie Cup to sponsor 30 min. alt. weeks of *Super Circus* on ABC-TV, Sun. 5-6 p.m., thru Hicks & Greist . . . General Foods to sponsor one-shot Roy Rogers rodeo from San Antonio Coliseum on NBC-TV June 21, Tue. 8-9 p.m., thru Benton & Bowles . . . Eastman Kodak, which dropped *Norby* last week on NBC-TV Wed. 7-7:30 p.m., to sponsor filmed *Kodak Request Performance* on NBC-TV starting April 13, Wed. 8-8:30 p.m., thru J. Walter Thompson; series will present some of best TV film productions of 1954-55 season . . . Hoover Co. (vacuum cleaners) buys 5 partic. on CBS-TV’s *Morning Show*, Mon.-thru-Fri. 7-9 a.m., starting April 18, thru Leo Burnett Co., Chicago . . . Kleenex, thru Foote, Cone & Belding, buys 3 time periods on alt. weeks this summer on NBC-TV for undetermined shows—Tue. 9-9:30 p.m., Fri. 8-8:30 p.m., Sun. 10-10:30 p.m. . . . CBS-TV to present unsponsored *Look Up and Live* Easter morning religious program Sun. April 10, 10:30-11 a.m. . . . Noxzema drops out as alt. sponsor (with Amoco) of Ed Murrow’s *Person to Person* on CBS-TV Fri. 10:30-11 p.m. . . . Quaker Oats to drop alt. week sponsorship of *Zoo Parade* on NBC-TV May 8, Sun. 4:30-5 p.m.; other sponsor, American Chicle Co., drop out April 17 . . . Longines-Wittnauer Watch Co. cancels *Longines Chronoscope* on CBS-TV starting May 13, Mon.-Wed.-Fri. 11-11:15 p.m.

New ABC-TV Rate Card No. 5, effective May 1, establishes minimum purchase of \$25,000 per 30-min., with client free to pick as many stations as he wishes, as long as they include network’s 5 o-&o stations. Another feature of card enables advertiser to earn up to 32½% in discounts, as opposed to present 27½%, provided he spends minimum of \$80,000 a week for 52 weeks. Production Manual No. 4, accompanying rate card, separates charges for facilities-equipment & personnel, charging flat rate for equipment & facilities, sliding rate for personnel.

Station reps will designate their member of Television Bureau of Advertising board May 10; with Petry joining this week, there are now 3 reps in TvB—others being Blair-TV & Meeker.

NEW TYPE of satellite transmitter was shipped this week by Adler Communications Laboratories, New Rochelle, N. Y., to Manson Community TV Co., Manson, Wash., which plans experimental transmission at first, then commercial operation after FCC finalizes low-power rules (Vol. 10:51 & 11:3). Manson grantee plans to “translate” Ch. 4 signals of KXLY-TV, Spokane, retransmit them on uhf Ch. 16 without demodulation. Transmitter is rated at 20 watts, and outlet will have 200 watts ERP, with identification automatically by Morse code, no operator required to be on duty. Equipment shipped by ACL for the new “booster-satellite” is similar to on-channel booster now in experimental operation at WATR-TV, Waterbury, Conn. (Ch. 53).

RCA shipped 10-kw transmitter April 1 to upcoming WHIS-TV, Bluefield, W. Va. (Ch. 6), which has May target; also April 1 it shipped 50-kw transmitter with 2-kw standby to KCOP, Los Angeles (Ch. 13). DuMont reports it has shipped 25-kw transmitter and complete studio equipment to upcoming WFRV-TV, Green Bay, Wis. (Ch. 5), due April 15; also 50-kw amplifier to KHQA-TV, Hannibal, Mo. (Ch. 7).

* * * *

In our continuing survey of upcoming stations, these are latest reports received:

KRNT-TV, Des Moines (Ch. 8), granted to Cowles last week, has ordered GE transmitter, will use 709-ft. Ideco tower, reports v.p. & TV-radio mgr. Bob Dillon, who says target date is Aug. 1. Remodeling of three office floors for TV has already begun in building which houses KRNT Theatre, called “largest legitimate theatre in the country,” seating 4200. Cowles publish *Des Moines Register* and *Tribune*, *Minneapolis Tribune* and *Star*, *Look Magazine*, also operate KVTW, Sioux City (Ch. 9), radio stations KRNT, Des Moines and WNAX, Yankton, S. D., and own 47% of WCCO-TV, Minneapolis (Ch. 4) & WCCO. Adding TV to radio KRNT duties are sales mgr. Paul Elliott, program director Dick Covey, asst. program director Joe Hudgens. Rep will be Katz.

KOTA-TV, Rapid City, S. D. (Ch. 3), now installing 500-watt RCA transmitter, plans test patterns between May 15 and June 1, programming by June 15, reports gen. mgr. Leo Borin. RCA 3-bay antenna is due to be installed soon on 300-ft. Fisher tower, formerly used by FM, about mid-April. Station has signed with CBS under Extended Market Plan, has agreement with other 3 networks. Rep will be Headley-Reed.

WTHS-TV, Miami (Ch. 2, educational), won’t get going in April as planned (Vol. 11:10) because of delays in converting old WTVJ Ch. 4 transmitter & antenna, reports Vernon Bronson, asst. director, Dept. of Radio & TV Education of Dade County Board of Public Instruction. Transmitter will be in Everglades Hotel, with antenna on rooftop FM tower, 306-ft. above ground.

KLFY-TV, Lafayette, La. (Ch. 10), has 5-kw DuMont transmitter due by mid-April, plans June 1 test patterns, July 1 CBS programming, reports gen. mgr. Bill Patton. It will use 384-ft. Trilsch tower. Earlier this year it got FCC permission to buy out share-time CP-holder KVOL-TV for \$5,000 out-of-pocket expenses incurred by grantee *Lafayette Advertiser* and KVOL gen. mgr. George H. Thomas (Vol. 10:49 & 11:4) Base rate will be \$200. National rep not chosen; Clarke Brown Co. will be rep in south & southwest.

WCBC-TV, Anderson, Ind. (Ch. 61) now doesn’t plan to start until late summer, reports program director Fred M. Mullen for grantee Great Commission Schools, owned by Church of God denomination, which operates local school system & Anderson College & Theological Seminary (Vol. 11:7). On hand are RCA 1-kw transmitter and studio equipment purchased from John L. Booth’s now defunct WBKZ-TV, Battle Creek, Mich. (Ch. 64).

HEARINGS IN SENATE Commerce Committee's investigation of "the entire field of broadcasting, telecasting and communications" won't get going for at least 6 weeks—possibly not until summer—but the House this week approved \$80,000 for the FCC to make its own study of "problems of radio and TV network broadcasting."

Sidney Davis took over this week as chief counsel for the Senate investigation (Vol. 11:12-13), and indicated he favors go-slow policy, wants time to familiarize himself with the problems involved in the inquiry, to conduct preliminary staff investigation, etc. At week's end, Committee Republicans had not yet officially named their choice for minority counsel. Announcement probably won't be made before April 12 or 13, after Congress returns from Easter vacation, but it's understood Republicans want Robert D. L'Heureux, staff member who served as Committee's chief counsel under late Sen. Tobey (R-N. H.).

Next move in Committee's attempt to alleviate plight of uhf stations will be its all-out campaign to encourage production and sale of all-channel receivers. Chairman Magnuson (D-Wash.) has invited large TV tuner manufacturers to meeting in Washington April 20, five days before big meeting with receiver makers (Vol. 11:12). One of main reasons for tuner makers' meeting is understood to be collection of data on prices of all-channel tuners as opposed to vhf-only tuners. Meanwhile, Committee has received acceptances for the April 25 meeting from all major TV manufacturers.

* * * *

In a surprise Congressional move this week, House approved \$170,000 more to run the FCC in fiscal 1956 than had been requested in President's budget—\$90,000 of it earmarked for processing backlog of applications, and \$80,000 for the study of network TV-radio broadcasting which the FCC has wanted to undertake for many years.

Increase in appropriation was unexpected—even by FCC, which is accustomed to having its budget estimates slashed by House Appropriations Committee. Committee's questioning of FCC on the subject was short and sweet.

Color Trends & Briefs: Color is featured heavily in NARTB convention's engineering sessions May 25-26, which include papers exceptionally well keyed to current major topics. The TV agenda May 26:

"Advancements in Color Film & Slide Programming," Fred F. Bartlett, Philco; "Conversion of Iconoscope Chains to Vidicon Operation," Joseph W. Belcher, GPL; "General Characteristics of Color TV Displays," Bernard D. Loughlin, Hazeltine; "Network Transmission of Monochrome & Color TV," James R. Rae, AT&T; "A CBS-TV Color Studio," Robert B. Monroe, CBS; "Integration of Color Equipment & Existing Monochrome Installations," Anthony H. Lind, Lannes E. Anderson & Nils J. Oman, RCA; "Design, Construction & Operation of TV Boosters & Satellites," Dr. George Brown of RCA, Ben Adler of Adler Communications & Eugene E. Overmeir of Sylvania; "A Review of Color encoding Principles," Robert Deichert, DuMont; "Proof of Performance Measurements for a VHF TV Station," Richard K. Blackburn & Bernard C. O'Brien, WHEC-TV, Rochester; "Achieving One Megawatt ERP at UHF," Frank J. Bias, GE; "Considerations of Microwave Installations," Richard C. McLaughlin, Raytheon; "A Low Power TV Station for \$50,000," F. Dan Meadows & Joseph W. Alinsky, Dage.

Exhibitors are also expected to devote considerable attention to color. Among other things, RCA is likely to stress new amplifier which produced drop in color camera price from \$67,000 to \$49,500 (Vol. 11:12), GE to step up campaign for "Chromacoder" camera chain and "Y" channel system for improving monochrome aspects.

In reply to Congressman's questions, Comr. Hyde cited Commission's repeated efforts to get money for an investigation. When asked how much was needed, Hyde turned to Broadcast Bureau chief Curtis Plummer, who said \$100,000. No more was said on subject. At same hearing, Plummer was asked about backlog and processing. He replied that an additional \$50,000 could process 100 of the pending 237 AM applications by year's end. Committee earmarked, and House approved, \$90,000 extra for processing all classes of applications—TV, AM, other.

Commission's fiscal 1956 appropriation as approved by House in Independent Offices Appropriation Bill (HR-5240) would be \$6,870,000, as opposed to \$6,700,000 in President's budget estimate and \$6,629,400 appropriated for fiscal 1955. Committee envisioned adding 26 employees to Commission, bringing total to 1057.

Bill now goes to Senate Appropriations subcommittee on independent offices — by coincidence, headed by Sen. Magnuson. Commission must comment to Magnuson's subcommittee on the House bill. Magnuson is understood to favor the increased appropriation.

* * * *

One network's arguments against Plotkin Memorandum were previewed this week in debate between Harry Plotkin and CBS v.p. Richard Salant at FCC Bar Assn. luncheon. Reviewing many of his recommendations to Senate Commerce Committee, Plotkin said basic problem of uhf was set circulation, and only answer to network problems was increasing source of programs — mainly through abolition of option time.

The big question posed by Plotkin report, replied Salant, is: "Do we want to have networks?" He said there is no indication whether networks could survive if Plotkin proposals were adopted. "A network has to be big or it's not a network," he added. "There's no such thing as a small network, as one company has found out." Ultimate arbiter is the public, he said—adding, "I don't think there has ever been any business which has had such a clear stamp of public approval."

Upcoming network color schedules: NBC-TV—April 4, *Producers' Showcase*, "Reunion in Vienna," with Greer Garson, Brian Aherne, Peter Lorre & Robert Flemyng, 8-9:30 p.m.; April 6, *Norby*, 7-7:30 p.m., last of series; April 9, *Max Liebman Presents*, "The Merry Widow," with Ann Jeffreys, Edward Everett Horton, John Conte, Bambi Linn & Rod Alexander, 9-10:30 p.m.; April 15, *Home* segments, 11-11:15 a.m. CBS-TV—April 6, *Best of Broadway*, "Stage Door," with Rhonda Fleming, Diana Lynn & Dennis Morgan, 10-11 p.m.; April 14, *Shower of Stars*, "Ethel Merman's Show Stoppers," with Ethel Merman, Red Skelton, Peter Lind Hayes, Mary Healy, Harold Lang & Cindy Robbins, 8:30-9:30 p.m.

Total of 67,300,000 saw NBC-TV's *Peter Pan* March 7, NBC reported this week on basis of Nielsen and ARB figures. NBC Research's day-after estimate was 65,000,000 (Vol. 11:11). Nielsen gave show rating of 66.1, with 68.3 share of audience. Homes reached totaled 20,400,000, meaning 43% of U. S. families. ARB reports 3.3 viewers per set. Nielsen figures don't include audiences in public places, such as Ford and RCA dealer showrooms, where most of color viewing was done. There was no estimate of color viewers.

Color schedule of WKY-TV, Oklahoma City reached total of 37 hours March 27-April 3, when station micro-waved 32 hours of film and live programming to 12 color sets at annual home show in addition to its regular daily 1-hour *Cook's Book*. Home show, in Municipal Auditorium, is sponsored by local Home Builders Assn., has as motif the application of color to home decoration and furnishings.

PLENTY TALK BUT NO ACTION ON DISCOUNTERS: Behind big headlines and well-publicized oratory this week about fair trade and discount houses, lies the simple, inescapable fact that nobody -- least of all the Govt. -- wants to take any formal action against the discounters which might be construed as stifling legitimate competition. Thus, you can expect a continuing barrage of publicity on the subject -- but very little action of any consequence, at least not on the Federal level.

Attorney General Brownell expressed Administration sentiment on subject in address before National Retail Dry Goods Assn. home furnishings conference April 1 in Washington. His speech came only one day after the National Committee to Study the Anti-Trust Laws, a 60-man blue-ribbon panel of experts under Brownell's direction, had urged that fair trade laws be repealed. Speech started as attack on fair trade laws, ended in what amounted to a defense of discount house. He said:

"Vigorous protests are being registered concerning the 'unfair competition' of the 'discounters.' But similar protests were made in our grandfathers' time, when mail-order houses began competing with local merchants, and again, more recently, when chain stores presented another threat to established patterns of distribution.

"It may be that what is called 'unfair competition' is really just keen competition. This nation is so thoroughly committed to a belief in competition that we sometimes forget that some of its advocates may be thinking solely in terms of competition for the other fellow...There is the danger, however, that cries of 'unfair' and insistence that there be more and more laws to 'civilize' competition may lead to ever-increasing curtailment of individual initiative and regulation by the Government until the very essence of free competition will have been dissipated."

This "free enterprise" declaration was echoed at same meeting by Magnavox pres. Frank Freimann, who warned the group, largely dept. store executives, to quit trying to change their stores around to meet discount house competition. Instead, he urged them to concentrate on their particular selling specialties. Speaking off the cuff, he told them, in effect: "Be yourself."

Robert A. Seidel, RCA exec. v.p. for consumer products, another conference speaker, shied away from the fair trade-discount house controversy. Instead, he urged dept. store people to expand their TV lines as a sure way to greater profits.

"The greatest opportunity for increases in home furnishing sales and profits this year, next year, or perhaps any year during our lifetime, will be in TV," he said. "It is now a \$1 billion industry. With the advent of color, and it's coming fast, it will top \$2 billion annually." He said almost 67% of the 38,000,000 TVs now in use are smaller than 21-in. -- "thus obsolete by today's standards."

* * * *

The 60-man committee's 392-p. report urging repeal of all fair trade laws acknowledged that those laws reflect some "legitimate" commercial aims, among them protection of "quality items from debasement in the consumer's mind" but that fair trade pricing is not "an appropriate instrumentality for such protection." It said the "legislative price-setting authorization extends far beyond the essential guarantees of 'loss-leader control' and strikes at all price reductions."

The Senate Small Business Committee, Democratic-controlled (Sen. Sparkman, D-Ala., chairman), took a somewhat different view of the fair trade-discount setup this week. Its annual report warned that small, independent appliance store is not likely to survive in a fierce competitive struggle with the discount house. It said expanding discount house operations represent "a more serious challenge to the fair trade laws than ever was presented by any court decision." It already has disclosed plans to investigate fair trade and discount houses (Vol. 11:11).

TV production totaled 163,042 week ended March 25, compared to 164,478 units

preceding week and 160,995 week ended March 11. It was year's 12th week, one short of 3 months by RETMA calculations, and brought production for year to date to about 2,000,000, compared to approximately 1,325,000 in corresponding period of 1954.

Radio production totaled 300,568 (158,204 auto), compared to 307,549 units in week ended March 18 and 297,595 week before. For 12 weeks, production was 4,200,000, compared to 2,410,000 in corresponding period year ago.

Trade Personals: Jack S. Beldon, marketing mgr. of GE air conditioning div., named marketing mgr. of TV-radio dept., Syracuse, succeeding Eugene F. Peterson, now mgr. of International GE's consumer goods export dept. . . . John B. Coullard promoted to mgr. of product planning in expansion of GE's electronic components dept., Syracuse; he's succeeded as sales mgr. by Roy L. Merwin Jr., ex-central district mgr. of light military electronic equipment . . . Herbert J. Allemang, ex-Philco v.p., now exec. v.p. of Eureka Williams Co., named a director of National Union Electric Corp. . . . Russ Hansen, ex-Motorola, named mgr. of RCA Service Co. Cleveland district succeeding Russ Dunlap, now mgr. of New England district . . . Wm. T. Higgins, who formerly headed own distributorship for Raytheon in Baltimore, joins Zenith as asst. sales mgr. in charge of market development . . . Wm. R. Crotty promoted to TV-radio sales mgr., Erie Resistor electronics div.; Robert W. Orr promoted to mgr. of govt. liaison activities . . . James Frye, ex-mgr. of now-discontinued Chicago factory branch, named Stromberg-Carlson national merchandise mgr. . . . Earl Olson, chief engineer of Jensen Industries, Chicago, named operations v.p. . . . Robert F. Swift, ex-Graybar, named CBS-Columbia regional mgr. for Mich.-Ind., headquartering in Detroit; he replaces O. R. Barnes, resigned . . . George T. Stewart, ex-pres. of Stewart Wholesalers Inc., Rochester, named Sylvania upstate N. Y. district sales mgr. . . . Theron A. Cramer named GE mgr. of carrier current engineering, under Charles M. Heiden, mgr. of engineering for communications equipment . . . Jules Alexandre resigns as Emerson sales mgr. for air conditioners.

Frank M. Folsom, pres. of RCA, has been named by Joint Congressional Committee on Atomic Energy to high-level citizens' panel to help speed peaceful uses of the atom. Eight-man board is headed by Robert McKinney, publisher of *Santa Fe New Mexican*, ex-Asst. Secy. of Interior. Other members: Ernest R. Breech, chairman, Ford Motor Co., Detroit; George R. Brown, of Brown & Root, Houston (construction), chairman of Texas Eastern Transmission Co., member of President Truman's Materials Policy Committee (which was headed by CBS chairman Wm. S. Paley); Sutherland C. Dows, chairman, Iowa Light & Power Co., Cedar Rapids; Dr. John R. Dunning, dean of engineering, Columbia U, director of Oak Ridge Institute of Nuclear Power; Dr. T. Keith Glennan, pres. of Case Institute of Technology, Cleveland, ex-member of Atomic Energy Commission; Samuel B. Morris, gen. mgr. & chief engineer of Los Angeles Dept. of Water & Power, chairman of American Public Power Assn. atomic energy committee.

Maj. Gen. Francis H. Lanahan, Army asst. deputy chief of staff for logistics and onetime chief signal officer of SHAEF and chief of SHAPE signal div., retired from active service March 31 to enter private industry.

Brig. Gen. Frank L. Howley (USA Ret.), ex-Philadelphia adman who commanded in Berlin during the airlift, elected a director of Gray Mfg. Co., Hartford.

Capt. Samuel M. Tucker, deputy director since 1953, named director of Naval Research Lab, Washington, succeeding Capt. Willis H. Beltz, retiring.

Dr. Ragnar Thorensen named research director of Magnavox's new research lab in W. Los Angeles.

AUTOMATION'S EFFECT on American industry, prominently including electronics business, will be discussed by CIO at Washington's Mayflower Hotel April 14—right in the middle of RCA's contract negotiations with IUE, an affiliate of CIO. An IUE spokesman said, however, that the automation conference should not cause any interruption or interference with the RCA negotiations which start April 4, or with the Philco talks which begin on or about the April 14 conference date.

Purpose of the national conference, says CIO, is to make sure everybody — including itself — knows what's meant by automation. It will discuss "the meaning and implications" of the term, including its relationship to a guaranteed annual wage, which the CIO has declared to be a goal in its contract talks this year (Vol. 11:11). The electronics industry, already showing profound effects of automation (Vol. 11:13), will be included in these talks with IUE, though each local is given wide latitude on how intensively to press annual wage issue.

Battle of words on automation's effect—even its meaning—goes on unabated, meanwhile. Ewan Clague, head of Bureau of Labor Statistics, describes automation by comparing a thermometer and a thermostat. Former, he says, automatically measures temperature whereas latter not only measures but also automatically controls the temperature. CIO pres. Walter Reuther calls automation "the second industrial revolution," warns that Govt. & industry must prepare for large-scale unemployment and migration of workers as a result. General Motors pres. Harlow Curtice, on the other hand, said he'd like to debunk word "automation," added it's only another step in technological progress.

Govt. is taking official "hands off" policy on both automation and annual wage, public officials adopting note of caution in speeches. Labor Secy. Mitchell said problem of job displacements by new automation machinery cannot be "brushed off" but doubted mass unemployment would result. He declared annual wage issue should be settled at bargaining table and Labor Dept. would express no opinion, barring a national emergency.

Authoritative United Business Service generally supports Mitchell's view on automation's effect on employment. It said that some temporary layoffs are bound to result but that "automation does not hold a long run threat of rising unemployment." Reason given is that automation will eventually expand the national productive capacity tremendously, thus increasing job opportunities.

One of most popular—and frustrating—exhibits at IRE show last week was electronic computer which took on all comers in game of tic-tac-toe. In every case we observed, the electronic brain bested the human brain. Device, displayed by G. H. Leland Inc., Dayton, O. maker of solenoids and relays, was specially designed binary relay logic computer, designed to recognize some 362,000 game sequencies and containing 10,000 individual parts.

Noting our report that Lambda-Pacific is offering 10,700-13,200-mc microwave for first time (Vol. 11:13), Raytheon informs that it announced such equipment year ago, is currently taking orders for 30-day delivery.

National Conference on Aeronautical Electronics will be held at Dayton's Biltmore Hotel, May 9-11.

Topics & Trends of TV Trade: Federal Trade Commission cracked down on Admiral this week, issuing complaint (No. 6319) charging misrepresentation in its national ads. Specifically, FTC charged that Admiral's advertising claims that its "giant 21-inch picture tubes" provided 20% more screen area than other 21-in. sets were false. It was FTC's first advertising complaint against a major TV manufacturer.

Admiral declined immediate comment on complaint, issued April 1. A spokesman indicated displeasure that press received notice before company had seen copy. He said Admiral had discussed ads with FTC last fall, but had had no communication from agency this year. Admiral has 20 days to answer, and hearing has been set for May 17 in Chicago before examiner James A. Purcell. Edward F. Downs represents FTC as attorney.

[Note: An FTC complaint is not in itself a punitive action. It is merely a preliminary step to determine if prosecution is warranted. In the past, many such complaints have ended with filing of consent judgment in which the company, without admitting guilt, promises to halt the practices in future. Within industry, most recent FTC case involved complaint of conspiracy against National Electronic Distributors Assn. in sale of parts, which ended last year in consent judgment (Vol. 10:27).]

In accordance with FTC policy, Downs declined to identify complainant but said case was "thoroughly investigated to determine the truth of the complaint." He noted that FTC has been considering a code of fair merchandising practices for TV-radio industry (Vol. 8:19, 9:41, 10:23), and doubted that Admiral's advertising claims would be sanctioned by any such code.

Trade sources recalled that a spate of protest broke out from other set makers about a year ago, when Admiral first started its "giant" 21-in. ads. They said it was somewhat reminiscent of TV's early days, when 14-in. sets were described as "giant life-sized screens."

The complaint cites as "typical" of the company's advertising: "Admiral announces a brand new Giant 21-inch picture tube, accurately described as 'The World's Largest' . . . with 270 square-inch screen . . . 20% bigger than other 21-in. TV . . ." It said this claim had been made in TV-radio commercials as well as in publications.

"In truth and in fact," the complaint states, "the screen area of Admiral TV sets, which are equipped with its giant 21-in. picture, is not 20% larger than the screen area of Admiral's competitors' TV sets which are also equipped with 21-in. picture tubes." As result of this advertising, complaint notes, trade has been "unfairly diverted" to Admiral from its competitors.

* * * *

N. Y. Better Business Bureau put the blast on TV-radio-appliance ads claiming their products were "first" or "best" on the market. In special bulletin this week, it said it had no objection to accurate description of proven superior features of a particular model, but recommended that no claims be made, directly or indirectly, that (1) any TV set or appliance is "Rated No. 1," or (2) any TV set or appliance outperforms all other makes or models. Latter was regarded as subtle criticism of money-back offer last week by Crosley N. Y. distributor Gerald O. Kaye if Custom V did not outperform any other TV set (Vol. 11:13), though it didn't mention any company by name.

Wilcox-Gay Corp., currently operating under Chapter XI of Bankruptcy Act (Vol. 11:5), this week proposed plan to pay 50% to unsecured creditors with claims over \$100, offering non-interest notes in 10 semi-annual installments of 5% each, starting 6 months after confirmation. Plan was filed in Federal court in Charlotte, Mich. by Wilcox-Gay on behalf of itself and subsidiaries Majestic Radio & Garod Radio.

DISTRIBUTOR NOTES: Emerson establishes factory branch, Emerson-Buffalo Inc., 285 Kenmore Ave., Buffalo (Warren F. Hardy, gen. mgr.); Emerson Radio of Washington (Herman E. Goodman, pres.) creates branch, Emerson Radio of Virginia Inc., 166 MacTavish St., Richmond . . . Stromberg-Carlson appoints McLain & Son, 974 Sullivant Ave., Columbus, O. (F. M. McLain, owner) and D&N Auto Parts, 420 Howard St., Greenwood, Miss. (V. Whitehead, sales mgr.) . . . Bendix Radio appoints Bailey's Inc., Chattanooga . . . Phillips Distributing Co., Salisbury, Md. (Raytheon) opens Baltimore branch (Louis A. Berwanger, mgr.) . . . Crosley-Bendix appoints Davies Electric Co., Saskatoon . . . Emerson Radio of Florida appoints Harry Karp, gen. mgr. of Tampa branch, as v.p. . . DuMont New York promotes Harry Ripps to gen. sales mgr. . . Boyd Distributing Co., Denver (Philco) appoints Berry Long, ex-radio KLZ & KOA, as sales mgr. . . A. K. Sutton Inc., Charlotte (CBS-Columbia) appoints W. T. Winter as sales mgr. . . Radio City Distributing Co., Dallas (Zenith) promotes Gene Willett to sales mgr. . . Westinghouse Electric Supply Co. transfers S. B. Folckomer from Baltimore to Richmond as mgr. of consumer products div., succeeding Charles R. Ross, transferred to Chicago; Folckomer is replaced in Baltimore by John B. Nolan . . . Philco Los Angeles appoints John E. Kelly adv. & sales promotion mgr. . . Gross Distributing Corp., Newark (Stromberg-Carlson) reports resignation of gen. mgr. W. D. Goldberg.

* * * *

CBS-Hytron has changed brand name on its TV & radio tubes, as well as on semi-conductors, to "CBS"—in order, according to CBS-Hytron pres. Charles F. Stromeyer, "to take full sales advantage of the national recognized and respected letters CBS." Shipments of the newly branded merchandise start about April 7. CBS-Columbia has been shipping TV sets with "CBS" brand since first of year (Vol. 11:8).

GE planning ad campaign to promote TV servicing by helping dealers inform public about facilities for receiver maintenance and repair, thru Maxon Inc. Huge promotion kicks off with 9½-p. insert in May 3 *Look* (on stands April 19)—biggest insert ever carried by magazine, listing 5331 service dealers in 2281 cities and featuring \$25,000 consumer contest to fill in last line of jingle.

Sentinel Radio, noting our story of last week on advent of clock TV this year (Vol. 11:13), writes that it had TV sets with Telechron timers in 1952 but discontinued them in 1953 after selling "quite a few." The clock was installed on a 27-in. open-face console retailing at \$575 and a full-door blonde console at \$645.

Emerson Radio executive offices and plant facilities are now located at 16th & Coles Sts., Jersey City (phone Journal Square 3-5100). Only the public relations dept. & Emerson Radio Export Corp. continue to maintain offices at 111 Eighth Ave., N. Y. (Oregon 5-7000).

RCA's TV sales this year are running ahead of record 1954 at an "almost unbelievable rate," said Robert A. Seidel, exec. v.p. for consumer products, in address April 1 before NRDGA home furnishing conference. He predicted a continued high industry-wide level of TV sales this year.

More expansion predictions: Norman B. Krim, v.p.-gen. mgr. of Raytheon tube operations, foresees 65-70,000,000 TVs, 140,000,000 radios in use by 1965, with doubled sales of replacement tubes by then. He spoke at recent Raytheon tube symposium attended by company's sales officials.

Hoffman Electronics cuts prices of 15 receivers by \$30-\$50 as special April-June promotion, line ranging from \$180 for 21-in. walnut table to \$350 for 24-in. cherry console.

RCA Victor Chicago regional office will be moved in May to Merchandise Mart but company will retain display space on 5th floor of American Furniture Mart.

RCA's LICENSING POLICY has been a major factor in the spectacular growth of the electronics industry, including the radio-TV industry, and the pre-eminence of the U. S. in that industry . . .

"Today aircraft manufacturers, automobile manufacturers, business machine manufacturers and many other areas of American industry, and universities as well, are actively conducting research and development in electronics and are producing electronic equipment.

"This chain reaction of research and development in the electronics industry was initiated with the formation of RCA, and is attributable in large part to RCA's policy of making inventions available to others."

Foregoing are a few of the statements in RCA's reply brief in Dept. of Justice's civil anti-trust suit, filed this week (see story p. 1 and Special Report herewith). While obviously self-serving in a lawsuit, they are cited to point up the impact of TV-radio developments on widening fields of electronics. For the brief notes that Dept. of Labor's Bureau of Labor Statistics in Jan. 1952 reported 629 companies qualified to do work in electronics research, 277 giving that as their major specialty and reporting their 1951 cost of research & development was \$531,600,000. That year, RCA said it had expended about \$39,000,000 on research & development in electronics.

Many companies not formerly in electronics are now devoting their efforts to intensive research in the field, and the brief cites such aircraft manufacturers as Boeing, Douglas, Hughes, United; auto manufacturers like General Motors and Willys; business machine manufacturers like Burroughs, IBM, Remington Rand; makers of industrial control equipment like Maxson, Minneapolis-Honeywell, Otis Elevator; makers of automation equipment like General Mills and United Shoe Machinery Corp.; companies developing atomic energy applications such as General Dynamics Corp.; firms in the motion picture industry such as Bell & Howell and Paramount Pictures.

"The assets of these companies alone," the brief states, "total many billions of dollars, and their research facilities far exceed those of RCA." And a substantial part of their electronics work was said to have direct application to the TV-radio industry.

* * * *

"Substantially all" TV-radio manufacturers are licensed by RCA, according to the brief. Yet there is "intense and effective competition." Listed as substantial competitors with large research resources of their own are Admiral, CBS, DuMont, Emerson, GE, IT&T, Motorola, Philco, Ray-

Electronics Reports: Transistor developments reported this week: First transistorized digital computer designed for aircraft use was announced by Bell Labs and Wright Air Development Center; called TRADIC (Transistor Digital Computer), it uses 800 transistors, 11,000 diodes, draws only 100 watts power, can be housed in 3-cu. ft. cabinet. Millivac Instrument Corp., Schenectady, reported development of transistorized audio amplifier far quieter than any vacuum tube amplifier, with electronic noise level of one-third of millivolt or less. Radio Receptor Co. announced that it will turn out more than 2,000,000 transistors by year's end, and that prices have been cut to range of 75¢-\$4.50, compared with high of \$8 a year ago. Signal Corps has tested power transistors made for it by Transistor Products Inc. (Clevite Corp.) and found them to be of value in replacing items with moving parts, such as small dynamotors and vibrators—holding out hope of solving problems of unwanted noise and necessity of frequent servicing of such items in electronic gear.

Weston Electrical Instrument Corp. stockholders will be asked to approve merger with Daystrom Inc., Elizabeth,

Sylvania, Westinghouse, Zenith—whose sales figures "amount to many billions of dollars."

RCA's present royalty rates, which it says compare favorably with those of other licensors in this or any other industry, were result of reductions last summer (Vol. 10:31). Based on manufacturer's selling price, they are now ½ of 1% for radio broadcast receivers using tubes, 1⅓% for radio receivers using transistors, 1¼% for black-&-white TV sets, 1¾% for color TV receivers, 1¼% for electron tubes other than color tubes, 1¾% for color tubes, 2% for color TV commercial apparatus except govt. apparatus, 1½% for other commercial apparatus except govt. apparatus, 1% for all commercial apparatus manufactured for govt. use.

"In return for these reasonable royalty rates," states brief, "licensees have the privilege of obtaining a license under, or using, any one or more patents under which RCA has the right to grant licenses [and have] complete freedom to manufacture apparatus in competition with RCA under any and all patents available to RCA, to the extent to which RCA has the right to grant such licenses. No royalties are payable on any apparatus under any license agreement granted by RCA unless the apparatus uses patents licensed by RCA."

Among its competitors who have granted licenses to others, RCA lists Maj. Edwin H. Armstrong, CBS, DuMont, Eitel-McCullough, GE, Hazeltine, IT&T, Philco, Sperry, Sylvania, Western Electric, Westinghouse, Zenith. Since 1940, RCA states, it has brought only 2 patent infringement actions—one a suit settled before trial [presumably DuMont] and the other a suit pending against Zenith and its subsidiary Rauland following prior action by Zenith challenging validity of RCA patents.

Zenith-Rauland having won legal skirmish in U. S. Supreme Court, which refused this week to block trial of their patent suit against RCA in Chicago court pending outcome of similar litigation in Delaware court (Vol. 11:11-12), Federal Judge Michael Igoe in Chicago district court this week cleared way for trial. Zenith & Rauland seek \$16,000,000 triple damages in counterclaim suit against RCA, GE & Western Electric (Vol. 10:47-51), whom they charge with setting up patent pool in violation of anti-trust laws. Original litigation started in 1945 when RCA sued Zenith for patent infringements, in long-delayed suit which was expected to come to trial in Wilmington this spring. Zenith is only major TV-radio manufacturer (save Philco, which did not renew license at end of 1954) which has not signed RCA royalty agreement.

N. J., at special meeting May 16, on basis of one share of Daystrom stock for each share of Weston. Daystrom already has voting control of 49½% of Weston stock. Largely as result of recent expansion, Daystrom now reports 55% of sales in electronic and allied equipment. Its operations cover electronics, printing equipment and furniture industries. Electronic products include hi-fi equipment (Crestwood), Heathkit do-it-yourself electronic kits (Vol. 11:7), electronic gunfire control equipment and other military & commercial items. Daystrom sales for fiscal 1954 were \$62,473,000; Weston's 1954 sales were \$28,672,800.

Collins Radio Co. is called "one of electronics industry's fastest growing firms" in March 15 *Forbes Magazine*, which states it claims to supply about 75% of all communications & navigation equipment used by U. S. airlines. At 45, Arthur Collins, ex-"ham" who with his family owns about 50% of firm, has built firm up from red only 4 years ago to \$90,300,000 gross, \$6.83 per share net earnings in fiscal year ending last July 31 and \$3.01 in first 6 months of its current year (Vol. 11:13). Govt. accounts for about 80% of Collins' business.

Financial & Trade Notes: ABC div. of American Broadcasting-Paramount Theatres increased gross operating income to \$70,424,000 in 1954 from \$54,758,000 in 1953, but it showed "slightly larger" loss than in 1953, year of merger with UPT. Increased loss was due to higher TV operating and programming costs in last half of year, principally the NCAA telecasts.

Annual AB-PT report released this week does not break down ABC profit-&-loss, but it reveals increasing importance of telecasting-broadcasting operations in the big theatre-owning organization. Total AB-PT income was \$188,796,000 last year (\$115,916,000 from theatres) vs. \$172,196,000 in 1953 (\$114,926,000 from theatres). Consolidated net profit in 1954 was \$4,932,000, including \$4,722,000 (\$1.06) from operations, \$210,000 (5¢) from capital gains. This compares with profit of \$8,996,000 in 1953, including \$4,480,000 (\$1) from operations, \$4,516,000 (\$1.14) from capital gains—latter principally from \$6,000,000 sale to CBS of WBKB, Chicago.

Pres. Leonard Goldenson said ABC div. made "substantial progress in 1954, gaining greater recognition as a major network by audience and sponsors." He said radio operations and network's 5 TV-radio stations showed a profit, which was more than offset by higher network TV costs. Earnings for first quarter 1955 are estimated to be "substantially higher" than earnings for first 1954 quarter.

"The slightly increased loss in 1954 over 1953 is not itself representative of a trend in the ABC division," said Goldenson. "Rather, it is a reflection of the expenditures which must be made during the period of development of the TV network from a secondary to a competitive place. Substantial progress has been made toward forming a strong foundation for a successful operation. The improved position of the division is evident in increased viewing, better programs and greater revenue. From this point on, each sponsored program should have a beneficial effect upon the earnings of the division." He added that with new shows being readied for coming year, including Disney's *Mickey Mouse Club* (Mon.-thru-Fri. 5-6 p.m.), "we feel that ABC is on its way toward realizing its true potential as a profitable division of the company."

AB-PT had whole or partial interest in 639 theatres at year's end, down 30 from end of 1953. It's required to divest itself of net of 42 theatres by Sept. 3, 1955. Goldenson noted greater stability in theatre business in 1954, though TV had adversely affected business earlier in the year in new TV markets.

* * * *

Hoffman Electronics Corp., which on Jan. 10 was listed on the N. Y. & Los Angeles stock exchanges, reports consolidated 1954 sales were \$42,647,008 compared with \$50,415,146 in 1953. But net profit after provision of \$1,717,000 for Federal income taxes was \$1,485,513 or \$2.08 per share on 713,192 shares outstanding, an increase of 24% over 1953 net profit of \$1,199,655 after taxes of \$1,869,000, or \$1.68 a share on 578,394 shares. At midyear company increased capital by about \$4,250,000 by 15-year loan from Metropolitan Life and through sale of 130,000 shares of common stock, and with fortified resources entered new areas of electronics. It developed radiometric devices, acquired exclusive rights to Nordsieck integrator, is currently producing Geiger counter-scaler with field assay attachments. TV-radio distribution has expanded nationally, and complete manufacturing operations in Kansas City will be ready within a few months to handle volume expected from new distributors east of Mississippi. Pres. H. Leslie Hoffman predicts in annual report that volume should be considerably larger in 1955, most of increase in second half. By fall of 1956, he states, color "should be an important phase of our business."

Distributors Group Inc., 63 Wall St., N. Y., sponsor of the 21 mutual funds of Group Securities Inc., notes "outstanding growth" in earnings and dividends in the post-war era shown by group of leading electronics & electrical equipment shares—and forecasts "new peaks" in the production of electronic equipment. Its own group of electronic and electrical equipment shares, it estimates, will show 1955 earnings average of \$5 per share, compared with estimated \$4.50 for 1954 and \$1.10 for 1946; their average dividends are estimated at \$2 for 1955, \$1.97 for 1954, 85¢ for 1946. The electronics & electrical equipment shares in its "family" of mutual funds were listed in these proportions as of Jan. 1, 1955: Admiral, 3.72%; Allis-Chalmers, 6.05%; Bendix Aviation, 6.14%; CBS "A", 7.14%; Cornell-Dubilier, 5.62%; Cutler-Hammer Inc., 3%; DuMont, 1.78%; Elliott Co., 3.24%; GE, 3.42%; IT&T, 4.67%; McGraw Electric Co., 2.15%; Motorola, 3.65%; Philco, 6.49%; RCA, 5.66%; Raytheon, 4.88%; Sperry, 6.52%; Square D, 5.55%; Sylvania, 6.18%; Westinghouse, 3.93%; Zenith, 6.55%; net current balance, 3.66%.

Radio Condenser Co., Camden, N. J., which claims it supplies more than 50% of the tuners used in auto radios and 70% of the condensers in home radios, will show lower sales and net income in 1955 report due shortly, according to pres. Russell E. Cramer. Last year, it enjoyed record \$21,465,247 gross, \$384,002 net. Decline is attributed to delay in construction for \$1,000,000 expansion program and failure of expected big market for uhf tuners for which it had geared heavily.

Standard Coil Products Inc. had consolidated net income of \$2,871,290 (\$1.95 a share) on sales of \$72,862,113 in 1954, compared to \$2,972,481 (\$2.02) on record \$89,270,964 in 1953. Pres. Glen E. Swanson attributed declines to TV industry's concentration on lower-priced models, requiring development of more economical series of tuners. He stated growth of uhf, strong replacement market for TV receivers, eventual mass production of color and development of foreign TV create favorable outlook.

Wells-Gardner & Co. sales fell to \$21,200,318 in 1954 from \$22,572,069 in 1953 but net income in 1954 was \$911,340, up 18% from \$772,939 in 1953. Annual report states that civilian sales, mainly private-label TVs, were off last year but that defense sales were higher and that 1955 business should approximate that of preceding 2 years. Consolidated earned surplus at beginning of year was \$3,997,572.

IT&T reports consolidated net income of \$20,068,525 (\$2.80 per share) on record sales of \$372,638,805 in 1954, compared to \$22,377,611 (\$3.12) on \$362,199,214 in 1953. Profit decline was attributed to net loss of \$2,400,000 from sale of Coolerator div. assets last year to McGraw Electric.

RCA's music synthesizer (Vol. 11:6) will have its major use "in the production of music for sale in the form of phonograph records," according to developers Harry F. Olson & Herbert Belar. In paper prepared for IRE convention, they said that listeners were asked to distinguish between renditions of piano selections performed by the synthesizer and by famous pianists — and they concluded that "it can be said with 70% certainty that only 1 of 4 persons can tell which is which." Most recent production with synthesizer was creation of a few spoken sentences that no voice had ever uttered—"to show the versatility of the synthesizer."

New guided missile for air defense, hinted as possible replacement for Nike, reportedly will be developed by RCA and American Machine & Foundry, with RCA the prime contractor. The initial contract amount is said to be about \$20,000,000.

STORER BROADCASTING Co.'s huge upsurge in revenues and profits since its advent into TV (via WSPD-TV, Toledo, which it founded in July 1948) is detailed in March 29 prospectus covering public offering of 262,750 shares of common stock to be registered April 4 with certain priorities to present stockholders. Proceeds of approximately \$4,590,000 will be applied to debt reduction and redemption of company's 15,000 shares of 7% cumulative preferred stock (at \$107 per share).

Over period of 10 years to end of 1954, Storer company's operating revenues rose from \$3,093,255 (all from radio) to \$17,736,531 (preponderantly from TV); profits rose from \$306,930 in 1945 to \$3,680,779 in 1954. Company owns 7 TV stations, 2 of them uhf, and 7 radio stations, 6 with FM adjuncts.

Last year, TV revenue came 43.2% from national spot, 28.4% network, 28.4% local. In same period, radio revenue came 50.1% from local, 38.1% national spot, 11.8% network.

Total assets of company, which also publishes *Miami Beach Sun* and owns approximately 46.5% of voting stock of Standard Tube Co., as well as Empire Coil Co. plant recently acquired along with Herbert Mayer TV stations in \$10,000,000 deal (Vol. 10:2, 44) were \$27,872,629 as of Dec. 31, 1954. Consolidated earned surplus was \$8,123,978, long-term debt \$10,446,960.

Jefferson Standard Life Insurance Co., Greensboro, N. C., is shown as owner of 14,500 shares of the preferred stock (96.67%). Of 525,500 shares of common stock outstanding, Mr. Storer owns 14,160 (2.69%). Of 1,686,500 shares of Class B common, he owns 1,280,250 (75.91%) while Detroit Trust Co. as trustee holds 206,250 (12.23%). Remunerations paid in 1954 to officers-directors included: Mr. Storer, \$75,175; J. Harold Ryan, senior v.p., \$33,750; Lee B. Wailes, exec. v.p., \$60,164; Stanton P. Kettler, v.p. for southern district, \$51,292; William E. Rine, v.p. for northern district, \$42,020.

Directors and officers as a group own 105,516 shares of the common (20.1%) and 1,380,250 of Class B (81.84%). Among these, secy. John E. McCoy, who is house counsel, is shown as beneficial owner of 5400 shares of common.

Year Ended Dec. 31	Total Operating Revenues	Gross TV Revenues	Gross Radio Revenues	Net Profit
1945	\$ 3,093,255	-----	\$3,093,255	\$ 306,930
1946	3,351,805	-----	3,351,805	740,581
1947	3,748,337	-----	3,748,337	514,721
1948	3,904,034	\$ 31,539	3,872,495	478,808
1949	4,749,049	577,011	4,172,038	539,620
1950	6,657,114	2,024,153	4,632,963	926,475
1951	9,560,086	4,816,490	4,743,596	1,464,776
1952	11,475,618	6,865,194	4,610,424	1,594,956
1953	14,901,079	10,214,813	4,686,266	2,186,415
1954	17,736,531	13,391,027	4,345,504	3,680,779

Both FM listening and set sales are up, according to Elliott M. Sanger, exec. v.p. of *New York Times'* pioneer WQXR-FM, New York. Citing Pulse survey, he said FM homes in New York have risen from 130,000 in 1948 to more than 2,000,000 today. Though WQXR is "primarily an AM station," and is increasing power from 10-kw to 50-kw, Sanger said, "we recognize that FM supplies something which AM cannot. That is why more than 400,000 families listen to WQXR on FM in addition to the large AM audience."

A. C. Nielsen & Co., 2101 Howard St., Chicago, is making available without charge 144-p. book titled *Television Audience Research for Great Britain*, which exec. v.p. C. G. Shaw states is "packed with facts, figures, charts and photographs of real interest and educational value to anyone concerned with broadcasting or broadcast advertising—in any country."

Urging industry self-policing in speech before Tennessee Assn. of Broadcasters in Nashville March 28, FCC Comr. Robert E. Lee stressed 3 points: (1) Better programming, rather than more commercials, is answer to greater income. "You have no solution," he said, "when you cram more and more commercials down the throats of fewer and fewer listeners." (2) Bait and switch commercials are "primarily the jurisdiction of the FTC, and they are doing yeoman work in this regard. The FCC, however, cannot ignore this type of advertising, and, as one member of the Commission, I must condemn it." (3) In trying to discourage bad-taste programming, he said, "I do not know where public interest leaves off and censorship begins, but if I ever have to make the decision I would probably take a calculated risk and refuse to censor, since I am well aware of the dangers to the American way of life that such a step could lead. It is for this reason that I devoutly hope and pray that this industry will police itself and thus not encourage those who would take the power of self-policing away from you."

FCC invited comments on AT&T's proposal to provide "utility-grade" off-the-air networking service at rates sometimes running as low as or lower than half the price of its current "gold-plated" interconnection service. FCC's notice (55-389) is one result of earlier proposal to ease restrictions on station-owned microwave links (Vol. 10:51). It was in response to the earlier proposal that AT&T filed its plan for the new off-the-air service. In AT&T memo attached to FCC notice, it is stressed that proposed new service would not be "intended to provide channels of the quality or reliability of directly connected facilities." They could be used for receiving only, would not be monitored or supervised, would be available for both color and monochrome. As to rates, AT&T says interconnection of 2 TV stations 100-125 mi. apart would probably average about 50% as much as the charges for current AT&T service. "In individual cases the differences may vary substantially from this average—in general they tend to be larger for shorter distances." Comments on proposal are due April 29.

NCAA's national football package has been awarded to NBC-TV, which reportedly will pay minimum of \$1,500,000 for 7 Saturday games and one on Thanksgiving Day. Only CBS & NBC submitted bids, ABC having been singled on the NCAA package last year, with loss reputedly approaching \$2,000,000. At week's end, NBC hadn't reached terms with a sponsor, though 3 advertisers were said to be interested. Network hopes to sell whole series to single sponsor. NBC's TV rights apply only to the 8-game national package. Colleges will negotiate on their own with networks, stations and/or sponsors for rights to the 5-game regional schedule permitted this year by NCAA (Vol. 11:12-13).

Defense Dept. petitioned to intervene in April 11 hearings on applications of KSWs-TV, Roswell, N. M. and KGEO-TV, Enid, Okla. for towers over 1000-ft. Both applications were opposed by military representatives on Washington Airspace Subcommittee, favored by civilian representatives (Vol. 11:11-12). Pentagon said it wants to call witnesses to show the towers are aviation menace and can't be adequately marked and lighted. Also opposing Enid application is uhf KTVQ, Oklahoma City.

Sale of WTAP, Parkersburg, W. Va. (Ch. 15) to *Zanesville Times-Recorder* and *Signal* for \$124,609 (Vol. 11:10) by Frank Baer-Howard Chernoff group was approved this week by FCC. Zanesville Publishing Co. owns 63% of WHIZ-TV, Zanesville, O. (Ch. 18) & WHIZ.

NARTB lists 1916 members as of March 31—comprising 265 TV stations, 4 TV networks, 1201 AM stations, 326 FM, 3 radio networks, 117 associate members.

Full Text of Brief

RCA Reply to Dept. of Justice Civil Action on Patent Pool

Filed in United States Court for Southern District of New York, March 29, 1955

(Full Text of Complaint, Dated Nov. 19, 1954, Published as Special Report with *Television Digest*, Vol. 10:47)

United States District Court

SOUTHERN DISTRICT OF NEW YORK.

UNITED STATES OF AMERICA, <i>Plaintiff,</i> <i>against</i> RADIO CORPORATION OF AMERICA, <i>Defendant.</i>	}	Civil No. 97-38
--	---	--------------------

ANSWER OF RADIO CORPORATION OF AMERICA

Radio Corporation of America, hereinafter referred to as RCA, answers the complaint herein as follows. Numbered paragraphs of this answer refer to correspondingly numbered paragraphs of the complaint and all allegations not hereinafter admitted are denied.

I

Jurisdiction and Venue

1. RCA admits the complaint is filed and these proceedings instituted under Section 4 of the Sherman Act.

RCA denies it has violated Sections 1 or 2 or any other section of the Sherman Act, and further denies any allegation contained in any paragraph of the complaint which charges RCA with violation of the Sherman Act.

RCA was formed in 1919 at the urgent request of the United States Government in order to free American communications from foreign domination and to create a new American radio company. In order that this might be accomplished, various patent cross-licenses were necessary. Because of intolerable patent deadlocks, no one could legally manufacture or use the necessary electronic equipment without the patents of Marconi Wireless Telegraph Company of America, General Electric Company, the American Telephone and Telegraph Company, and later Westinghouse Electric & Manufacturing Company.

The purpose and effect of these cross-licenses were to free the industry. Without them the industry would have been paralyzed by conflicting patent holdings and endless patent litigation. With these cross-licenses the industry was freed and enabled to develop rapidly.

The situation created by these cross-licenses was the subject of a proceeding instituted by the Federal Trade Commission in 1924. This proceeding was thoroughly tried, briefed and argued, and was dismissed by the Commission in 1928.

The situation was also the subject of a Government proceeding in 1930 which resulted in the consent decree of November 21, 1932, and the industry has continued to develop with intense and active competition between an ever-increasing number of manufacturers and research organizations.

In 1942 this consent decree and the agreements it approved were brought before the courts and were reaffirmed. As recently as 1954, on a motion to construe the decree, the court reasserted the fact that the cross-license agreements were approved by the consent decree.

That the cross-license agreements approved by the consent decree have had the effect intended and expected by the Government is fully borne out by the dynamic growth of the industry.

These agreements expired by their terms on December 31, 1954 so far as new inventions are concerned. Yet the complaint, filed only six weeks before this expiration, is an attack on these very agreements which were recommended and stated to be in the public interest by the Government in 1932.

RCA rests on the record that these agreements and RCA's conduct have resulted in the most intensely competitive industry in the United States today.

RCA asserts and is proud of the fact that it has been in the forefront of all major industry advances, from the beginning of sound radio and broadcasting, through black and white television, and now color television.

RCA's leadership, the leadership of a ten percent factor in the industry, has been leadership by example, not by control in any way, shape or form.

If RCA's leadership has been followed, it is because RCA's courage, vision and foresight have been right and RCA has acted in the best interests of the industry and the public, and not through any dominance, restraint or control.

Allegations that RCA has in any way restrained the electronics industry, including the radio-television industry, ignore the facts. On the contrary, RCA has pioneered and been responsible for the creation and expansion of much of this industry.

RCA points to the fact that this industry is the fastest-

growing and most dynamic industry in the world, and asserts that its policies have been one of the most substantial factors in the growth and active competition which exists in this industry today.

Sales in the electronics industry, including the radio-television industry, following the termination of wartime restrictions demonstrate its vitality, rapid growth and freedom from the monopoly and restraint alleged.

Year	Total Electronics Industry Sales	RCA	RCA Percent
1946	\$1,653,000,000	\$221,097,000	13.4
1947	2,486,900,000	300,156,000	12.1
1948	2,761,500,000	343,454,000	12.4
1949	2,903,000,000	383,103,000	13.2
1950	4,445,000,000	570,554,000	12.8
1951	5,128,000,000	580,700,000	11.3
1952	6,567,000,000	675,696,000	10.3
1953	7,940,000,000	834,155,000	10.5
1954	9,230,000,000	921,463,000	10.0

Sales of radio and television receivers during the period from 1932 to 1953 show the signal growth of the radio-television industry. Sales of radio and television receivers increased from \$54,400,000 in 1932 to \$1,470,000,000 in 1953, a percentage increase of over two and one half thousand percent.*

Year	Radio Receiver Sales	Television Receiver Sales	Total Sales	RCA Percent of Sales
1932	\$ 54,400,000		\$ 54,400,000	15.8
1933	70,300,000		70,300,000	13.7
1934	94,900,000		94,900,000	15.6
1935	128,400,000		128,400,000	12.2
1936	169,400,000		169,400,000	12.3
1937	165,400,000		165,400,000	13.7
1938	112,300,000		112,300,000	16.3
1939	153,400,000		153,400,000	15.2
1940	177,100,000		177,100,000	15.6
1941	233,600,000		233,600,000	11.7
1942	102,700,000		102,700,000	6.7
1946	410,900,000	\$ 1,300,000	412,200,000(a)	6.5
1947	703,600,000	51,400,000	755,000,000	9.7
1948	531,400,000	226,000,000	757,400,000	12.9
1949	292,800,000	574,200,000	867,000,000	14.5
1950	359,700,000	1,397,500,000	1,757,200,000	13.2
1951	311,700,000	944,000,000	1,255,700,000	13.1
1952	249,800,000	1,063,600,000	1,313,400,000	11.6
1953	299,800,000	1,170,200,000	1,470,000,000	12.6

(a) Civilian production terminated on April 22, 1942 by order of WPB (7 F. R. 1794), which order was revoked on August 20, 1945 (10 F. R. 10180).

* Official 1954 industry figures are not yet available.

From the mere handful of companies and the relatively small amount of capital which made up the electronics industry in the early days, the industry has continuously expanded. Today there are literally thousands of companies in which billions of dollars have been invested engaged in this industry.

No industry in which there existed the restraints alleged in the Government complaint could have advanced at such a dynamic pace. On the contrary, the rapid growth of the electronics industry, including the radio-television industry, and the continual emergence of new and improved electronic products, affirmatively demonstrate that there have been no restraints as alleged.

2. 3. RCA admits that it transacts business and that

its principal offices are within the Southern District of New York.

II

Description of RCA

4. RCA admits that it is the defendant herein, that it is a corporation organized and existing under the laws of the State of Delaware and that it maintains its principal offices at 30 Rockefeller Plaza, New York, New York.

5. RCA admits that it is an operating, holding and service corporation composed of a number of corporate subsidiaries and divisions which serve the public in many branches of electronics, including research and development, manufacturing, broadcasting, international message communication, service and sales.

6. RCA admits that its business includes granting patent licenses to competitors and others on reasonable and non-discriminatory terms and without restriction. RCA also admits that it is engaged in the manufacture and sale of equipment for the transmission and reception of radio and television signals through its manufacturing and service divisions, and the broadcasting of radio and television signals and network broadcasting through its subsidiary, National Broadcasting Company, Inc., hereinafter referred to as NBC.

7. RCA admits that the RCA Laboratories conducts research and development in many phases of commercial and military electronics, that the RCA Laboratories and Commercial Department discharge various patent functions as alleged, and that the RCA Laboratories maintains facilities at Princeton, New Jersey; New York, New York; Newark, New Jersey; Camden, New Jersey; Chicago, Illinois; Hollywood, California; and Washington, D. C.

8. RCA admits that it grants patent licenses to competitors and others on reasonable and non-discriminatory terms and without restriction, to the extent that it has the right to grant such licenses, under any one or more of approximately 10,000 United States patents. These licenses contain no restrictions as to price, quantity, territory, or anything else, require no minimum royalty, and are offered under any one or more patents and for any apparatus as may be desired by any prospective licensee.

RCA denies any allegation contained in any paragraph of the complaint which charges RCA with "package licensing", or compelling any prospective licensee to accept a license under more patents than he wants.

RCA admits that during the year 1951 RCA's royalty income from patent licenses was as alleged, but avers that during 1951 RCA spent on research and development a sum in excess of the amount received by it in royalty payments and that under its patent licenses it made the fruits of such research and development available to the electronics industry. In addition, RCA makes substantial payments to others for the right to use patents developed through their research and development in competition with RCA.

Many substantial competitors with large resources for research and development exist in the radio and television

industry. These include the Admiral Corporation, Columbia Broadcasting System, Inc., Allen B. Du Mont Laboratories, Inc., Emerson Radio & Phonograph Corporation, General Electric Company, International Telephone and Telegraph Corporation, Motorola, Inc., Philco Corporation, Raytheon Manufacturing Company, Sylvania Electric Products, Inc., Westinghouse Electric Corporation, Zenith Radio Corporation, and others. The published sales figures of the companies named alone, for the most recent annual period, amount to many billions of dollars. Each of these companies maintains extensive facilities for its own research and development. Each of these companies has every incentive to follow and has followed a program of intense and active research and development to produce better products in this highly competitive market, as well as to license others.

9. RCA admits that it manufactures many types of radio-television products, parts and accessories, but not all types. RCA avers that it purchases many types of products, parts and accessories each year from thousands of independent suppliers.

10. RCA admits that more people buy RCA television receivers than any other make of television receiver and that more station owners buy RCA television transmission equipment than any other make. RCA further avers that in all of the categories of radio and television equipment referred to there is intense and effective competition.

11. RCA admits that its wholly-owned subsidiary NBC broadcasts radio and television programs and furnishes other service to the public as alleged. RCA avers that NBC was formed in 1926 as America's first national broadcasting network and that other organizations since have followed RCA's example in forming national broadcasting networks with the result that a new field of commerce was created and a new business came into existence. RCA further avers that there is intense and effective competition in radio and television broadcasting and networking.

III

Description of Others

12. RCA admits the allegations as to the organization, existence and principal offices of General Electric Company, hereinafter referred to as GE, but denies knowledge or information sufficient to form a belief as to the truth of the allegation that GE is the largest manufacturer of electrical equipment in the United States.

13. RCA admits the allegations as to the organization, existence, and principal and executive offices of Westinghouse Electric Corporation, hereinafter referred to as Westinghouse, but denies knowledge or information sufficient to form a belief as to the truth of the allegation that Westinghouse is the second largest manufacturer of electrical equipment in the United States.

14. RCA admits the allegations as to the organization, existence and principal offices of the American Telephone and Telegraph Company, hereinafter referred to as AT&T, and of its business and of the business of the Bell System.

15. RCA admits the allegations as to the organization, existence and principal offices of Western Electric Company, Incorporated, hereinafter referred to as Western Electric, but denies knowledge or information sufficient to form a belief as to the truth of the allegations with respect to the percent of Western Electric stock owned by AT&T and the allegation that Western Electric is the largest manufacturer of telephone apparatus in the United States.

16. RCA admits the allegations as to the organization, existence, principal offices and research of the Bell Telephone Laboratories, Inc., hereinafter referred to as Bell Labs, but denies knowledge or information sufficient to form a belief as to the truth of the allegations with respect to the ownership of Bell Labs.

IV

Nature of Trade and Commerce

17. RCA admits the allegations as to the nature of the trade and commerce involved herein, and avers that it is engaged in research relating to the invention, development and improvement of radio and television products and devices, but not in the acquisition of patents. RCA also avers that licenses under such patents as issue to it on inventions resulting from RCA's research and development are offered by it to its competitors and others on reasonable and non-discriminatory terms and without restriction, and that RCA's licensing policy has been a major factor in the spectacular growth of the electronics industry, including the radio-television industry, and the pre-eminence of the United States in that industry.

18. RCA admits the allegations and avers that research activities play an important part in the development of radio and television products as alleged.

RCA has been a pioneer in the research and development incident to radio receivers, black and white television receivers, color television receivers and various other radio and television products and devices, including products which have vital significance for the national defense. No organization has contributed as much to the research and development of these products and devices as RCA, and RCA's patent licensing policies have enabled its competitors and others to enjoy the fruits of RCA's research and development on reasonable and non-discriminatory terms and without restriction.

19. RCA admits that it expends millions of dollars annually on research and development which it conducts in its laboratories in Princeton, Newark and Camden, New Jersey; New York, New York; Chicago, Illinois; Hollywood, California; and other places, and that such research and development employs materials, parts and other supplies purchased by RCA from thousands of sources located throughout the United States and abroad.

According to a report of the Bureau of Labor Statistics of the United States Department of Labor in January 1952, 639 companies were qualified to do work in electronics research, 277 of such companies gave electronics research as their major research specialty, and these 277 companies reported that their cost of research and development in

1951 was \$531,600,000. In 1951 RCA expended about \$39,000,000 for research and development in electronics.

The tremendous expansion of research and development in all phases of the electronics industry is forcefully demonstrated by the fact that many companies, not formerly in electronics, with large and powerful research and development facilities are now devoting their efforts to intensive research in electronics. These companies include aircraft manufacturers, such as the Boeing Airplane Company, Douglas Aircraft Company, Inc., Hughes Aircraft and United Aircraft Corporation; automobile manufacturers, such as the General Motors Corporation and Willys Motors, Inc.; business machine manufacturers, such as the Burroughs Corporation, International Business Machines Corporation, The National Cash Register Company and Remington Rand, Inc.; manufacturers of industrial control equipment, such as the Maxson Corporation, Minneapolis-Honeywell Regulator Company and the Otis Elevator Company; manufacturers of automation equipment, such as General Mills Inc. and the United Shoe Machinery Corporation; companies engaged in the development of atomic energy applications, such as General Dynamics Corporation; and companies engaged in the motion picture industry, such as the Bell & Howell Co. and Paramount Pictures Corporation. The assets of these companies alone total many billions of dollars and their research facilities far exceed those of RCA. A substantial part of the electronics research and development work of these companies has direct application to the radio-television industry.

20. RCA admits that substantially all radio-television manufacturers located in many of the states and territories of the United States and the District of Columbia are licensed by RCA.

RCA's policy of licensing patents to its competitors and others on reasonable and non-discriminatory terms and without restriction has contributed substantially to the ever increasing number of radio and television receivers in the hands of the American public, and to a continual lowering of the price of such receivers. The freedom to manufacture and sell and the absence of restraint in the radio-television industry is illustrated by the following figures of radio and television set ownership in America:

Year (as of January 1)	Radio Receivers	TV Receivers
1932	20,450,000	
1933	21,950,000	
1934	23,950,000	
1935	26,006,000	
1936	30,519,000	
1937	33,800,000	
1938	37,617,000	
1939	40,800,000	
1940	45,000,000	
1941	50,600,000	
1942	57,800,000	
1943	59,850,000	
1944	60,000,000	
1945	59,000,000	
1946	57,750,000	10,000
1947	66,000,000	16,500
1948	75,000,000	189,900

1949	80,000,000	1,000,000
1950	85,200,000	3,950,000
1951	96,000,000	10,550,000
1952	105,300,000	15,777,000
1953	110,000,000	21,234,000
1954	125,500,000	27,812,000
1955	128,900,000	33,816,000

21. RCA admits that it has various forms of patent license agreements, including those referred to in the complaint, under which it makes patents available to its competitors and others on reasonable and non-discriminatory terms and without restriction. In addition to its various standard forms of license agreements, it is RCA's policy to license and RCA does license anyone under any patent or group of patents for any apparatus to the extent to which RCA has the right to grant such licenses and under such patent or patents and for such apparatus as the prospective licensee may desire.

22. RCA admits that it grants licenses under as many or as few of the United States patents alleged as the prospective licensee may desire, and avers that although RCA has obtained its important patents principally through its own research, in some instances RCA has obtained rights to patents of others to avoid patent deadlock for itself or for its licensees, all of which said patents it licenses to its competitors and others on reasonable and non-discriminatory terms and without restriction, to the extent to which it has such rights, and without additional charge. RCA admits that its royalty income is as alleged, but avers that it has spent on research and development in the years alleged a sum in excess of the amounts received by it as royalty income and that the results of such research and development are made available to its competitors and others on reasonable and non-discriminatory terms and without restriction or additional charge.

23. RCA admits that its patent licensing is nation-wide and international in character due to RCA's policy to license anyone under any patent or patents for any apparatus, and admits the other allegations.

24. RCA admits that its licensees vary in size and in the products they manufacture, and avers that it does not discriminate against any licensee because of its size or the product it manufactures. RCA also admits that it is a licensed manufacturer which manufactures many types of electronic products, including radio-television products, in all of which types intense and effective competition exists.

25. RCA admits that the largest number of its licensees are engaged in the manufacture of radio and television receivers and that the public has invested over \$10,000,000,000 for more than 33,000,000 black and white and color television receivers.

Each of these receivers utilizes one or more inventions developed by RCA, which inventions were made available by RCA to the manufacturers of these receivers on reasonable and non-discriminatory terms and without restriction.

26. RCA admits that in 1953 there had been such dynamic growth in the highly competitive radio and tele-

vision industry that the output for all products of all manufacturers at factory values substantially exceeded the figure alleged. This dynamic growth of an industry which did not exist when RCA was formed illustrates the absence of the alleged restraints in such industry.

27. RCA admits that radio and television products, including its own, are manufactured throughout the United States and sold and shipped in interstate and foreign commerce as alleged.

28. RCA admits the importance of research and development in radio and television and the other allegations.

V

Background

A. The Industry from 1919 to 1930.

29. RCA admits it was incorporated by GE in Delaware on October 17, 1919, that GE then held a majority of RCA's common stock, that RCA then acquired the assets of Marconi Wireless Telegraph Company of America (American Marconi), including valuable patents and patent rights, and admits that thereafter it received licenses from GE, to which it begs leave to refer for a full and accurate statement of their terms.

The creation of RCA by GE and the acquisition by it of the assets of American Marconi resulted from appeals to do so made to GE by responsible officials of the Federal Government in Washington.

Prior to World War I reliable apparatus for radio communications did not exist. International communications were dependent on mail and on cables controlled by British interests. The development of the American radio industry was blocked by patent deadlocks and paralyzed by patent conflicts and litigation.

During World War I the United States Government commandeered all radio communications facilities and radio patents. To stimulate manufacture of radio equipment, the Government temporarily guaranteed to hold manufacturers harmless against patent infringement suits on Government apparatus. As a result new apparatus, vastly superior to that previously available, was developed.

During World War I the Government became keenly aware of the great importance of radio communications. At the conclusion of the war it was realized by Government officials that this was a critical time in the development of radio communications and our Government was determined that the United States should have its own system of world-wide radio communications.

GE had developed the Alexanderson alternator, then the best transoceanic radio transmitter in the world. GE was about to enter into contracts to supply the British-owned Marconi companies throughout the world with this equipment when the Navy Department, acting through Franklin D. Roosevelt, Assistant Secretary of the Navy, and others intervened.

The Navy Department asked GE not to sell the alternators to foreign interests but to set up a new American company strong enough to develop radio and to conduct a

world-wide system of radio communications. As a result of this appeal, RCA was formed by GE and acquired the assets of American Marconi, including its patent rights.

30. RCA admits that during the years 1920 and 1921 GE entered into certain patent cross-licensing agreements with AT&T, Western Electric and Westinghouse, to which it begs leave to refer for a full and accurate statement of their terms.

The AT&T Cross-License Agreements. In 1920 RCA, with only its licenses from GE, was unable to manufacture or use the improved equipment used by the Government during the war. Some of the patents which blocked RCA were owned or controlled by AT&T. Almost immediately after the organization of RCA, the Navy Department wrote to GE and AT&T bringing this patent situation to the attention of the two companies and appealing to them as "a public necessity" to make arrangements without further delay between the patent holders so that improved radio apparatus could be manufactured without being blocked by patent conflict.

As a result of this appeal negotiations were entered into and cross-licenses between GE, AT&T and RCA were prepared. Before these cross-licenses were executed they were submitted to the Attorney General by representatives of the three companies. The Attorney General indicated no disapproval and thereafter the cross-licenses were signed as of July 1, 1920.

The Westinghouse Cross-License Agreements. The cross-licenses between GE, AT&T and RCA did not end the patent deadlock because there were certain other patents owned by Westinghouse which were vital to any effective system of radio communications. The Westinghouse patents were of such importance that GE and RCA could not go forward with their development of the new and more efficient apparatus until the patent conflicts were resolved. Similarly, Westinghouse was unable to manufacture efficient radio apparatus under its patents without licenses under the patents of GE, RCA and AT&T. As a result, negotiations were commenced for cross-licenses between GE, RCA, AT&T and Westinghouse to end this patent deadlock. License agreements were drafted and were submitted to the Attorney General by representatives of the companies. The Attorney General indicated no disapproval and thereafter the cross-licenses were signed as of July 30, 1921.

On January 12, 1920 the Navy Department sent a letter to President Woodrow Wilson recommending that Admiral Bullard, Director of Naval Communications, be appointed to sit with the Board of Directors of RCA and to present to and discuss with them the Government's views and interests concerning matters pertaining to radio and communications coming before RCA directors and stockholders.

On January 14, 1920 President Wilson approved the Navy Department recommendation and thereafter Admiral Bullard attended meetings of the RCA Board of Directors, and participated in the discussions which led to the Board approval and execution of the cross-licenses entered into with AT&T and Westinghouse.

31. RCA admits that for a number of years after the

above-mentioned cross-licenses were entered into RCA did not manufacture radio apparatus but sold such apparatus manufactured for it by GE and Westinghouse, and operated a marine and transoceanic radio communications system. RCA also admits that in 1926 it organized the National Broadcasting Company, Inc., America's first broadcasting network.

32. RCA admits that during the year 1927 it began licensing others to manufacture and sell radio apparatus, and avers that in 1929 RCA itself began such manufacture.

33. RCA admits that during the period from 1919 to 1930 it entered into the aforesaid and certain other supplementary agreements with GE, Westinghouse, AT&T and Western Electric, and begs leave to refer to said agreements for a full and accurate statement of their terms.

34. RCA admits that during the period from 1919 to 1930 it entered into agreements to use United States patents of various foreign manufacturers of radio equipment. These agreements were made in furtherance of the program originally urged on RCA by the Government for establishing an American world-wide radio communications system. RCA begs leave to refer to said agreements for a full and accurate statement of their terms.

B. Antitrust Proceedings of 1930.

35. RCA admits that on May 13, 1930 the United States instituted a civil action against it, GE, Westinghouse, AT&T, Western Electric and others in the District Court of Delaware, which action was terminated by the entry of consent decrees, and RCA begs leave to refer to the proceedings and to the decrees in that action for a full and accurate statement of their terms and provisions.

As a result of discussions with representatives of the Attorney General, new cross-licenses were negotiated and entered into between AT&T, Western Electric, GE, Westinghouse and RCA. It was stipulated by representatives of the Attorney General that the arrangements so entered into would "provide suitable relief concerning all matters charged in the Petition and not reserved for later determination, * * * The petitioner, by its Department of Justice, has examined all of the Agreements attached hereto, and also the above-mentioned Substitute License Agreement (B2) and agreements Relating Thereto, and finds no objection to them."

This stipulation was submitted to the District Court in Delaware, together with the modified cross-license agreements between AT&T, Western Electric, GE, Westinghouse and RCA, and a consent decree was entered thereon on November 21, 1932.

In the course of the proceedings in which the decree was entered, Judge Warren J. Olney, appearing for the Government at the request of John Lord O'Brian, stated with respect to Substitute License Agreement (B2), which reflects the same principles involved in the other agreements approved by the decree, that:

"Under the new contract between these parties only nonexclusive licenses are exchanged so that with one very minor exception, which the Government deems of no substantial importance, so that

there is no restraint imposed upon any party to the contract. Each is free to use its own patents as it wishes and to grant licenses thereunder and the only effect of the contract is that each side extends to the other the right to use its patents and to that extent breaks down the monopoly which the law attaches to the ownership of a patent. The new contract, in other words, is one that is manifestly in the public interest and not opposed to it."

These are the very agreements attacked in the present suit by representatives of the Attorney General.

This decree was intended to, and did, put at rest all issues in that litigation, and by such decree those issues became *res judicata*.

The stipulation and decree reserved issues relating to license and traffic agreements between RCA and foreign companies. The reserved issue as to foreign licenses was disposed of by a supplemental decree dated May 25, 1934. Prior to this supplemental decree the licenses from foreign companies were modified by RCA, the supplemental decree held that this modification met the objections of the Government, and the case was dismissed with respect to such licenses, leaving the licenses as modified in effect. The reserved issue as to foreign traffic agreements was settled by a second supplemental amendment to the consent decree dated July 2, 1935, which modified such agreements but left the agreements as modified in effect.

At the entry of the second supplemental decree counsel for the Government represented to the court that "This manner of disposing of the final issues in the case, is satisfactory to the Government, * * * this Decree then finally consummates the case, as between the Government and the Radio Corporation of America and R. C. A. Communications, Inc."

36. RCA admits that Substitute License Agreement (B2) between GE and AT&T, to which RCA was made a party by an extension agreement, was entered into as of July 1, 1932, and begs leave to refer to such agreement for a full and accurate statement of its terms and provisions. This agreement was drawn and entered into as part of the negotiations with the Government prior to the consent decree in such manner as to meet the requirements laid down by the Government, as averred in paragraph 35 of this answer. Agreement B2 granted RCA certain non-exclusive licenses and non-exclusive rights to license others under patents of AT&T and Western Electric.

37. RCA admits that Agreement A-1 was entered into November 21, 1932, the date of the entry of the first consent decree, and begs leave to refer to such agreement for a full and accurate statement of its terms and conditions. Agreement A-1 was drawn, for the purpose of modifying the provisions in the license agreements between GE, Westinghouse and RCA as part of the negotiations with the Government prior to the consent decree, in such manner as to meet the requirements laid down by the Government, as averred in paragraph 35 of this answer. Agreement A-1 gave RCA certain non-exclusive licenses and non-exclusive rights to license others under patents of GE and Westinghouse. Agreement A-1 was attached to

the stipulation filed with the court on which the consent decree was based, and counsel for the Government stated to the court that this cross-license agreement was in full conformity with the law.

38. RCA admits that Agreements A-1 and B2, as modified and supplemented, are presently in effect in respect of inventions prior to December 31, 1954, and begs leave to refer to the agreements and supplements themselves for a full and complete statement of their terms and provisions.

39. RCA admits that on July 31, 1942 an Assistant Attorney General moved in the District Court of Delaware to vacate the aforesaid consent decrees, and begs leave to refer to the Government's motion for a complete and accurate statement of its grounds. The Government's motion was denied by Circuit Judge Maris, sitting as a Judge in the District Court. Judge Maris stated: "Since these consent decrees are based upon an agreement made by the Attorney General which is binding upon the Government the defendants are entitled to set them up as a bar to any attempt by the Government to relitigate the issues raised in the suit * * *." (46 F. Supp. 654, 656) Judge Maris thus held that the consent decree of 1932 is a three-party contract between the Government, the court, and the defendants.

The Government appealed to the Supreme Court from this decision of Judge Maris, but before the case was heard the appeal was dismissed upon motion of the Solicitor General, now Circuit Judge Charles Fahey, and the decision of Judge Maris stands *res judicata*.

On January 11, 1954 in his decision, reported at 117 F. Supp. 449, on a motion to construe the consent decree of 1932, Judge Maris again referred to Agreement A-1 as having been "approved" by the consent decree of 1932.

V I

Charges

40. RCA denies each and every allegation that it has attempted to monopolize or has monopolized or unreasonably restrained the interstate trade referred to, and denies each and every other allegation in paragraph 40 of the complaint.

RCA avers that the Government cannot attack a consent decree to which it is a party by charging RCA with violating the law—beginning the very day after the decree was entered—because it has conformed to the provisions of the decree. The consent decree of 1932, and the cross-license agreements approved thereby, represent the considered and correct judgment of the Government and the court, as well of the defendants, that this was the best way to achieve the objectives of the Government's petition, namely, the continued growth of a competitive radio-television industry free from restraint. The correctness of this judgment and the intensely competitive industry which has resulted from the policies and practices of RCA under and pursuant to this decree is shown by the soaring sales of radio and television receivers since 1932, as set forth in paragraph 1 of this answer.

RCA's policy of licensing its competitors and others on reasonable and non-discriminatory terms and without restriction has been a major factor in the rapid growth of the electronics industry, including the radio-television industry.

41. RCA denies each and every allegation contained in paragraph 41 of the complaint.

42. RCA admits that, in accordance with Paragraph V of the consent decree of November 21, 1932, it acquired non-exclusive rights under various patents pursuant to the seventeen specified agreements, and avers that in each instance the licensor reserved and retained complete freedom to compete with RCA in the granting of licenses under such patents. RCA further avers that in respect of nine of the seventeen non-exclusive licenses obtained, RCA did not acquire any rights to grant licenses to others. RCA denies that the effectiveness of the right of any of these companies to license others has ever in any way been destroyed by RCA during the period from November 21, 1932 to the present, or that RCA during that period had a monopoly either of patents or of patent licensing. RCA denies each and every other allegation in paragraph 42 of the complaint.

43. RCA admits that, during the period alleged, in accordance with Paragraph V of the consent decree of November 21, 1932, it acquired the right to use and to grant licenses to others under the United States patents and patent applications of nineteen of the twenty-nine companies named, and avers that in each such instance such licenses were made non-exclusive and the company concerned reserved the right to grant licenses to others in competition with RCA. RCA further avers that of the nineteen companies named as having granted RCA non-exclusive licenses under United States patents with the right to license others, four of these companies are small RCA foreign subsidiaries, seven of these companies no longer grant RCA such rights to license others, and one of these companies is an optical company granting RCA the right to license others under a single patent and a single application relating to an optical device. RCA further avers that of the seven companies remaining, two are, in fact, subsidiaries of a single company, and two are, respectively, a company and a subsidiary. The companies granting such non-exclusive licenses to RCA are, therefore, more properly considered as five companies rather than twenty-nine as alleged, and these five companies do not include, as alleged, "most of the principal manufacturers of radio and television industry equipment located throughout the world". RCA denies each and every other allegation in paragraph 43 of the complaint.

44. RCA admits that, in accordance with the consent decree of November 21, 1932, it has entered into various non-exclusive agreements with domestic and foreign patent holders to receive rights, including the right to grant licenses to others, and avers that it has made these rights available to its competitors and others on reasonable and non-discriminatory terms and without restriction. The effect of these agreements has been to resolve patent blocks and to increase competition in, and to increase the

manufacture and sale of, electronic apparatus, including radio and television apparatus. RCA begs leave to refer to the agreements themselves for a full and accurate statement of their terms.

45. RCA admits that it acquired certain United States patent rights relative to black and white television from Henroteau, Loewe and Farnsworth, and begs leave to refer to the agreements under which such rights were granted for a full and accurate statement of their terms. RCA denies each and every other allegation in paragraph 45 of the complaint, and avers that it made such rights available to its competitors and others on reasonable and non-discriminatory terms and without restriction. RCA also avers that its own research was the most substantial factor in bringing black and white television to a stage of development at which it was ready to become a service to the American public. RCA spent more than 50 million dollars on the development, research and promotion of black and white television before it realized any profit from such expenditures. RCA pioneered the introduction of black and white television to the American public and furnished its competitors with complete information regarding the manufacture and servicing of black and white television receivers in order to encourage its competitors to enter the television market.

46. RCA admits that it acquired non-exclusive licenses, including a non-exclusive right to license others, under one patent of Lorenzen, one patent of Toulon and five claims of one patent of Geer, and begs leave to refer to the terms of the agreements under which such rights were granted for a full and accurate statement of their terms. RCA avers that it made such rights available to its competitors and others on reasonable and non-discriminatory terms and without restriction.

RCA also avers that it publicly opposed adoption by the Federal Communications Commission of standards for an incompatible and inferior system of color television which would have rendered "blind" millions of receivers in the hands of the American public.

RCA has spent more than 50 million dollars on the development, research and promotion of a compatible system of color television which operates on standards since approved by the Federal Communications Commission and which preserves the value of millions of black and white sets in American homes. Color television activities are still being pioneered by RCA at a substantial loss.

RCA did not manufacture color television receivers using the incompatible standards adopted by the Federal Communications Commission in 1950 because it believed such receivers worthless and that it would be unfair to offer and sell such receivers to the American public. A number of other manufacturers made and tried to sell incompatible color television receivers, all of which receivers are now worthless.

On December 17, 1953 the Federal Communications Commission, on the recommendation of RCA and scientists and engineers representing virtually the entire radio-television industry, adopted compatible color television standards used by the RCA color television system.

RCA has and is continuing to pioneer the introduction of color television to the American public and has furnished its competitors and others with complete information regarding the manufacture and servicing of compatible color television receivers in order to encourage its competitors to enter the color television market.

RCA denies each and every other allegation in paragraph 46 of the complaint.

47. RCA denies each and every allegation in paragraph 47 of the complaint.

48. RCA denies each and every allegation in paragraph 48 of the complaint.

49. RCA admits that, during the period from November 21, 1932 to the present, it has offered to its competitors and others patent licenses under RCA's patent rights on reasonable and non-discriminatory terms and without restriction, to the extent to which it has the right to grant such licenses. RCA avers that many of its competitors and others have desired licenses under various RCA patent rights to manufacture, use and sell various types of electronic apparatus, including radio-television apparatus, and have obtained licenses from RCA under such rights and for such apparatus as they desired. RCA denies each and every other allegation in paragraph 49 of the complaint.

50. RCA admits that it has granted many licenses on standard forms, including the forms alleged, and avers that all such licenses have been granted on reasonable and non-discriminatory terms and without restriction. RCA further avers that, to the extent to which it has such right, it has granted licenses under any patent or group of patents its prospective licensees have desired, and for any apparatus or types of apparatus for which its prospective licensees have desired a license. RCA begs leave to refer to such license agreements for a full and accurate statement of their terms, and denies each and every other allegation in paragraph 50 of the complaint.

51. RCA admits that it grants licenses to its competitors and others and avers that it is RCA's policy to license and that RCA will license anyone under any patent or group of patents for any apparatus the prospective licensee may desire, and RCA will specify for the prospective licensee the patents which may be used in any apparatus.

RCA denies that it compels any prospective licensee to accept a license under more patents than he wants, and denies any allegation contained in any paragraph of the complaint which charges RCA with "package licensing". RCA's licenses contain no restrictions as to price, quantity, territory, or anything else, and are offered under any one or more patents and for any apparatus as may be desired by any prospective licensee.

RCA denies each and every other allegation contained in paragraph 51 of the complaint.

52. RCA admits that it has granted licenses to its competitors and others for such apparatus and for such purposes as its prospective licensees have desired, and begs leave to refer to the license agreements themselves for a full and accurate statement of their terms. The effect of RCA's license agreements has been to increase competition

in and to increase the manufacture and sale of electronic apparatus, including radio and television apparatus, and RCA's license agreements are granted to its competitors and others on reasonable and non-discriminatory terms and without restriction, to the extent to which RCA has the right to grant such licenses. There is active and intense competition between RCA and its licensees in the electronics industry, including the radio-television industry. RCA's licensing policies encourage and assist small manufacturers to enter and compete in the electronics industry, including the radio-television industry. A very large number of independent companies are now manufacturing and selling television receivers and all of these companies are in open and active competition with RCA and with one another. RCA denies each and every other allegation in paragraph 52 of the complaint.

53. RCA admits that in 1940 it changed its method of computing royalties on licensed receiving sets to provide that the base for computation of royalties henceforth would be the licensee's genuine selling price at which its customers are billed in the usual course of business as packed for shipment to customers. This revised royalty base was adopted at the request of RCA's licensees because previous RCA license agreements, which included higher royalty rates and diminution of the royalty base through allowance of various deductions for cabinets and other items, resulted in accounting and other difficulties and expenses to licensees. It was, among other reasons, for the purpose of simplification and the avoidance of complex accounting problems and expense to licensees that the royalty base presently provided in RCA receiver license agreements was adopted. RCA lowered its royalty rates at that time to make allowance for inclusion in the receiver royalty base of various items as alleged. RCA's present royalty rates are further reduced, now being only $\frac{1}{2}$ of 1 percent for radio broadcast receivers using tubes, $\frac{1}{8}$ percent for radio broadcast receivers using transistors, $\frac{1}{4}$ percent for black and white television receivers, $\frac{1}{4}$ percent for color television receivers, $\frac{1}{4}$ percent for electron tubes other than color tubes, $\frac{1}{4}$ percent for color tubes, 2 percent for color television commercial apparatus except government apparatus, $\frac{1}{2}$ percent for other commercial apparatus except government apparatus, and 1 percent for all commercial apparatus manufactured for government use.

All RCA license agreements provide for various deductions which make the actual rates even lower. Moreover, RCA royalty rates are based on the manufacturer's selling price. Applied to retail selling prices to the public, these royalty rates are substantially cut in half.

The fact that RCA's royalty rates compare most favorably with those of other licensors in this or any other industry is beyond dispute.

In return for these reasonable royalty rates, licensees have the privilege of obtaining a license under, or using, any one or more patents under which RCA has the right to grant licenses. This licensing policy has resulted in licensees of RCA having complete freedom to manufacture apparatus in competition with RCA under any and all patents available to RCA, to the extent to which RCA has

the right to grant such licenses. No royalties are payable on any apparatus under any license agreement granted by RCA unless the apparatus uses patents licensed by RCA. RCA begs leave to refer to its license agreements for a full and accurate statement of their terms, and denies each and every other allegation contained in paragraph 53 of the complaint.

54. RCA admits that it offers licenses to its competitors and others on reasonable and non-discriminatory terms and without restriction for any patent or patents under which its prospective licensees may desire freedom to manufacture, use, sell or lease any apparatus. RCA's policy of making any or all of its rights available upon request has been a substantial factor in maintaining and increasing intense and effective competition in the electronics industry, including the radio-television industry, and has been a substantial factor in enabling small companies to compete with RCA and others. RCA denies each and every other allegation in paragraph 54 of the complaint.

55. RCA denies each and every allegation in paragraph 55 of the complaint.

56. RCA denies each and every allegation in paragraph 56 of the complaint.

57. RCA admits that years ago its license agreements contained a provision under which RCA had the right to require its licensees to grant RCA non-exclusive licenses on reasonable terms under any new inventions made by them within the scope of the RCA license. This right was never exercised by RCA and in 1949 RCA formally waived such right and removed this provision from its license agreements. RCA begs leave to refer to its license agreements for a full and accurate statement of their terms, and denies each and every other allegation in paragraph 57 of the complaint.

58. RCA denies each and every allegation in paragraph 58 of the complaint.

(a) RCA avers that among its competitors and others who have granted licenses to others are Major Edwin H. Armstrong, Columbia Broadcasting System, Inc., Allen B. Du Mont Laboratories, Inc., Eitel-McCullough, Inc., General Electric Company, Hazeltine Research Inc., International Telephone and Telegraph Corporation, Philco Corporation, The Sperry Corporation, Sylvania Electric Products, Inc., Western Electric Company, Incorporated, Westinghouse Electric Corporation, Zenith Radio Corporation, and others.

(b) RCA avers that in 1951 it expended about \$39,000,000 for research and development in electronics and that, according to a report of the Bureau of Labor Statistics of the United States Department of Labor covering the same period, \$531,600,000 was spent by 277 companies which gave electronics research as their major research specialty. During the period covered by the complaint, there has been active and increasing competition in research and development in the electronics industry, including the radio-television industry. In addition to the amounts which RCA spends on its own research and development activities, RCA

also pays substantial amounts to its competitors in the radio-television industry, and to others in the electronics industry, for licenses under the inventions resulting from their research and development activities.

(c) RCA avers that, to protect its patent rights and avoid discrimination in its dealings with its competitors and others in the electronics industry, including the radio-television industry, it has brought suits for infringement to enjoin others from using without payment patent rights licensed by RCA to others and paid for by them. With but two exceptions hereinafter referred to, all patent infringement actions commenced by RCA were commenced prior to 1940 and were commenced at a time when one or more patents licensed by RCA had been adjudicated as valid by final judgments of United States courts. Since 1940 RCA has brought only two patent infringement actions, one of these a suit which was settled before trial, and the other a pending suit against Zenith Radio Corporation and its subsidiary, The Rauland Corporation, following commencement of a prior action by Zenith Radio Corporation against RCA for a declaratory judgment challenging the validity of RCA patents.

59. RCA avers that (a) inventions of GE, Westinghouse, AT&T, Western Electric and Bell Labs have been licensed by GE, Westinghouse, AT&T and Western Electric in active competition with licenses granted by RCA under patents of such companies; (b) GE, Westinghouse, AT&T, Western Electric and Bell Labs have engaged and are engaging in substantial radio-television research, development and patent licensing in active competition with RCA, and (c) RCA has been and is in active competition in patent licensing, research and development in the electronics industry, including the radio-television industry, with such companies. RCA further avers that its licensing activities under patents of GE, Westinghouse, AT&T, Western Electric and Bell Labs have been and are in conformity with the terms of the consent decrees hereinabove referred to and that the legality of such activities are *res judicata*. RCA denies each and every other allegation in paragraph 59 of the complaint.

60. RCA avers that GE, Westinghouse and AT&T are licensed by RCA under various agreements, and RCA begs leave to refer to said agreements for a full and accurate statement of their terms. RCA further avers that the terms and provisions of the license agreements under which RCA has the right to grant licenses under the patents of GE, Westinghouse and AT&T were approved by the afore-said consent decrees and have been characterized by the Department of Justice as being in the public interest. RCA denies each and every other allegation in paragraph 60 of the complaint.

61. RCA avers that in April 1953 it entered into an agreement relative to certain sublicensing rights under patents of AT&T and Western Electric granted to RCA by Agreement B2, and avers that said agreement of April 1953 reduced certain rights to grant sublicenses granted to RCA by Agreement B2 and did not, as alleged, extend

the life of such sublicensing rights. RCA begs leave to refer to Agreement B2 and the agreement of April 1953 for a full and accurate statement of their terms, and denies each and every other allegation in paragraph 61 of the complaint.

62. RCA admits that the effect of Agreements A-1 and B2 is, in part, as alleged, and begs leave to refer to the agreements for a full and accurate statement of their terms. RCA further admits that on January 11, 1954 Circuit Judge Albert B. Maris, sitting as Judge in the District Court for the District of Delaware, upheld the construction of Agreement A-1 advanced by RCA, and avers that in the same proceeding the court rejected the contention of the Antitrust Division of the Department of Justice that RCA's construction of the A-1 Agreement was not in the public interest. In his opinion upholding RCA's construction of this agreement, Judge Maris stated in part "It is clearly in the public interest for this court to settle this question with respect to the operation and effect of the agreement [A-1] approved by its [consent] decree [of 1932]." RCA further admits that on March 5, 1954 it entered into an agreement with GE, the effect of which is to reduce the term of RCA's right to grant licenses to others under patents of GE on inventions made prior to December 31, 1954. RCA begs leave to refer to the agreement for a full and accurate statement of its terms, and denies each and every other allegation in paragraph 62 of the complaint.

VII

Effects

63. RCA denies each and every allegation as to the effects of the acts referred to in the complaint.

RCA avers that its policy of licensing its competitors and others on reasonable and non-discriminatory terms and its policy of granting licenses to prospective licensees under any patent or patents and for any apparatus for which such prospective licensees desire a license, has contributed substantially to the dynamic growth and development of the electronics industry, including the radio-television industry. These policies have encouraged and increased competition in radio-television research and development, patents, patent licensing, patent rights, manufacturing, sale, distribution, and the introduction of new developments in the public interest.

RCA's policies have encouraged the development and expansion of the electronic art in innumerable directions and with tremendous vitality and dynamic energy. No industry in this country has progressed so far in so short a time.

The rapid and continuous emergence of new and improved electronic products for industry, for the home, and for national defense, rendering obsolete existing products, which is characteristic of this industry, completely refutes the existence of any monopolistic control, domination or restraint as alleged in the complaint.

When RCA was formed at the request of the Government in 1919, only the most courageous and far-sighted could have foreseen the tremendous vistas which would be

opened to American industry and the American public through the encouragement and development of the electronic art. The research and development activities which at one time were engaged in by only a very few have for many years been pursued by substantially all members of the electronics industry, including the radio-television industry.

Today aircraft manufacturers, automobile manufacturers, business machine manufacturers and many other areas of American industry, and universities as well, are actively conducting research and development in electronics and are producing electronic equipment.

This chain reaction of research and development in the electronics industry was initiated with the formation of RCA, and is attributable in large part to RCA's policy of making inventions available to others.

The relief prayed for in the complaint is unreasonable, unnecessary, contrary to the public interest, and barred by the doctrine of *res judicata*.

First Defense

The complaint fails to state a claim against RCA upon which relief can be granted.

Affirmative Defense

Each and every claim for relief purported to be set forth in the complaint is barred by the doctrine of *res judicata* as hereinabove alleged.

WHEREFORE, RCA prays that the complaint herein be dismissed with costs.

SUMMARY-INDEX OF THE WEEK'S NEWS—April 9, 1955

HYPOS FOR SAGGING NETWORK RADIO sought; NBC "Monitor" plan offers 40 hours around-clock weekends with partic. spots as in "Today" (pp. 1 & 6).

FCC'S FILES ON PAY TV show vox populi equally divided; Zenith gains spotlight when CBS rejects proposed pro-subscription commercial for Omnibus (pp. 1 & 7).

ADVERTISING EXPENDITURES ON TV ran 9.9% of national ad budget last year, totaling \$809,100,000, should go to \$1 billion or more this year (p. 3).

SMALL-MARKET STATIONS, vhf & uhf, getting benefits of new NBC & CBS programming plans; NBC to add more programs, more outlets to Program Service Plan (p. 3).

INITIAL DECISIONS favor KIRO, Seattle; WPDQ, Jacksonville; Omaha World-Herald; deintermixture proposals stir requests for more of some (p. 5).

JUVENILE DELINQUENCY AND TV probed again by Senators in public hearing—experts disagreeing as usual on whether there is relationship (p. 8).

RADIO TRADE IN COMEBACK, output and retail sales each up 50% over first quarter of 1954, inventories of all levels down by 200,000 sets (p. 10).

REPEAL OF FAIR TRADE LAWS backed by big stores and discount houses; Sparkman committee to hold hearings on anti-trust report (p. 10).

1954 COMPENSATIONS TO OFFICERS as reported by Admiral, Emerson, DuMont, Hazeltine, Philco, RCA, Zenith and other companies (p. 11).

TIME-SHARING WTCN-TV & WMIN-TV, Minneapolis-St. Paul, merger approved; 2 more uhf may quit; reports on equipment and new stations (p. 9).

DuMONT'S "ELECTRONICAM"—combined TV & film camera which may provide clue to DuMont network's future—to be demonstrated next week for first time (p. 16).

NETWORK TV BILLINGS HOLD UP in Feb., running well ahead of last year; PIB figures show network radio down, running about one-third TV (p. 16).

NETWORK RADIO PATTERNS FOR SURVIVAL: Beset by dwindling billings and the loss of listeners as fast as TV can claim them for viewers, network radio is fighting back with new program formats, rate slashes, special discount deals, heavy promotions -- all designed to pull it out of the economic quicksand into which it has been sinking during the last few years.

Most exciting of the new program formats designed to hypo network billings was unveiled this week by NBC. It's called "Monitor" and is projected to start in June as an around-the-clock weekend service providing continuous flow of entertainment and information from 8 a.m. Sat. to midnight Sun., including pickups of audio excerpts from favorite TV shows. (For details of plan, see p. 6.)

Other networks have also taken steps to improve their lot, principally via drastic rate cuts and bigger discounts. CBS, for example, offers frequency discounts ranging from 15% to 26%, depending on number of stations used, and has reoriented evening program schedule heavily to music. MBS has included in its rate card a \$1600 charge for one-min., which NBC now proposes to beat in its new segmentation plan. ABC was always so low, compared to CBS and NBC, that it has not had as far to fall -- but its radio revenues have been consistently declining, nevertheless, and it has had to make cuts in rates apace with the others.

Note: Evidencing network radio decline are monthly PIB figures (see p. 16); also the fact that, whereas nearly all the other media showed gains in advertising last year, the preliminary 1954 Printers' Ink index showed radio down 3.3% from 1953, its first downward year -- network slipping 13.2% & spot 5%, local up 2%.

PAY-AS-YOU-LOOK TV AROUSES VOX POPULI: Fascinating documents at FCC are the comments received so far on subscription TV. Though Commission set May 9 as date for filing formal comments on the rule-making proceeding which started Feb. 10 -- and the big guns won't be fired until then -- 360 letters & postcards have been received since Feb. 10. Few FCC matters have brought so much mail in so short a time.

Correspondence is wonderful grist for publicity mills of both pro and con elements of the pay-TV picture. Right after FCC's announcement Feb. 10, most comments

were obviously from the man-in-the-street, inspired by news stories which said that FCC's rule-making was for purpose of getting public opinion. During last month, there has been a heavy interlarding of distributor-dealer and theatre reaction.

In first month after Feb. 10, 107 letters denounced fee-TV idea, 60 favored it. In second month, 69 were against, 125 for -- a clear reversal of trend, whatever that may betoken -- and reaction is now almost exactly even-Stephen.

Most of the distributor-dealer response comes from those handling Zenith line -- and they're decidedly pro. Theatres are just as definitely con -- many of them using a mimeographed form letter.

There are some VIPs in the fast-growing Docket 11279. Someone has obviously done a good lobbying job on the Nevada solons. Gov. Charles H. Russell and Sen. George W. Malone (R) of Reno are vigorous proponents. Dozen or so other Senators and Congressmen, without expressing any opinion, forwarded letters from constituents.

Medical groups have also been sold -- American Medical Assn., Assn. of American Medical Colleges and American Academy of General Practice taking a favorable stand. Also among those urging pay-TV approval is Arthur J. Rooney, pres. of the Pittsburgh Steelers football team, and representatives of several legitimate theatre groups.

Few station operators have commented as yet. KSAN-TV, San Francisco (Ch. 32) urged that toll TV be authorized for uhf only. KCEB, Tulsa (Ch. 23), now off air, recommended it be limited to uhf and non-network stations. KONA, Honolulu, said stations should be permitted to air it part time. Radio WBBB, Burlington, N.C. is for it, but KGFF, Shawnee, Okla. is against it.

Feelings of public can be summed up about like this: For -- "We're tired or disgusted with present TV fare and want better programs." Against -- "We've paid for our sets and don't intend to pay for the programs, too."

Those favoring subscription TV frequently write on good paper with letter-heads, employ good English. Those opposing, more often than not, use cheaper paper, ungrammatical sentences, poorer handwriting. There are many exceptions, however.

To give you more of the flavor and arguments in the comments, we've quoted from some of the letters on p. 7.

Major opponents and proponents are gearing for May 9, meanwhile. No one has asked for delays -- and FCC isn't likely to grant them if requested. It feels that the 90 days it gave is ample time for preparation.

* * * *

Zenith's shrewd pres. Eugene F. McDonald again showed his mastery of public relations this week -- accomplishing the remarkable feat of getting more impact by cancelling commercials than others achieve by buying them. With only a week left in current Omnibus series, sponsored by Zenith and 3 others, Zenith v.p.-counsel Joseph S. Wright abruptly wrote CBS pres. Frank Stanton, saying Zenith was cancelling its sponsorship because of CBS's "arbitrary and unwarranted censorship" in rejecting proposed Zenith commercial extolling subscription TV. Wright also said that the Omnibus program on subscription TV March 27 (Vol. 11:14) had been unfairly slanted against pay-as-you-look TV.

CBS v.p. Richard S. Salant shot back a biting reply stating that Zenith knew full well that its contract provided for commercials on "goods and services," not on "controversial issues" such as fee TV. Furthermore, he reminded, both he and Stanton had previously advised Wright about CBS policy on commercials -- to which Wright had not objected. As for the Omnibus program being "slanted," Salant told Wright: "You are outrageously and knowingly wrong" and that "if the program was unfair at all it was unfair to opponents" of fee TV because audio portion of George Storer's statements -- against subscription TV -- was technically inferior.

Though Zenith placed no commercials on either April 3 or 10 Omnibus telecasts, Salant told Wright CBS expects payment for them.

Attesting to success of Zenith maneuver is fact that newspapers and trade press are making big to-do about it -- N.Y. Times even carrying full text of the commercial that CBS rejected. It was an all-out pitch for subscription TV, stating that it could bring first-run movies, heavyweight championship bouts, etc. to the home and urging people to write to FCC.

TV ADVERTISING COSTS NEAR \$1 BILLION: TV didn't quite hit 10% of last year's total national advertising budget -- the preliminary estimate is 9.9% -- nor did it climb as high as the \$930,000,000 which NBC Research predicted (Vol. 10:34) or \$900,000,000 we guesstimated (Vol. 10:48). But it should easily rise to \$1 billion this year.

The actual 1954 figure won't be known until FCC's annual audit of station and network revenues, due in June or July, to which industry statisticians can add fairly realistic estimates of other costs such as talent, programs, production, commissions, etc. to arrive at a grand total.

McCann-Erickson research dept., whose annual figures on advertising investment released through Printers' Ink are generally recognized as authoritative, has made a preliminary estimate of \$809,100,000 as TV's 1954 take out of total advertising expenditures of \$8,145,100,000. That's 9.9%, and it places TV in third place after newspapers' \$2,670,900,000 (32.8%) and direct mail's \$1,165,000,000 (14.3%).

Radio's \$608,100,000 (7.4%) puts it behind magazines' \$674,100,000 (8.3%), and for the first time TV jumps ahead of its parent radio broadcasting industry.

These figures are subject to revision later in the year. But it's reasonable to assume that TV, having ended 1954 with 426 stations on the air as against 356 at the end of 1953, and likely to have 450-to-475 stations on the air by end of this year -- and with rates and costs up generally -- will go beyond \$1 billion in 1955.

Quite a fabulous record for an industry that had only 10 stations and less than 10,000 sets in 1946! It means that in 10 years, telecasting has leaped from nothing to 9-figure status -- and not to serious detriment of most other media, for the advance figures show all of them save radio are on the upgrade. Radio slipped 3.3% in 1954 below 1953, and apparently is still slipping somewhat.

According to Standard & Poor's, the advertising industry as a whole should go up a minimum of 5% this year over last. Certainly TV, which jumped 33.5% from \$606,200,000 in 1953 to \$809,100,000 in 1954, can be expected to do much better than 5%. It's the advertising industry's lustiest and fastest-growing infant.

It's noteworthy that the preliminary figures published by Printers' Ink break down 1954 TV ad expenditures as \$444,200,000 network, \$189,000,000 spot, \$341,000,000 local -- with network running 38.8% ahead of 1953, spot 30% ahead, local 25% ahead. Network is still going up, as evident in PIB figures for Jan. & Feb. (see p. 16) -- and it's common knowledge that spot and local are well on the upgrade, too.

Note: Over the longer term, there's still the prediction of CBS's Frank Stanton that TV expenditures of U.S. advertisers will run "in the order of \$1.25 billion in 1957 or 1958"; there are the further projections of NBC Research, which it is likely to prune down now: \$1.3 billion in 1955; \$1.9 billion in 1956; and there's the figure of \$1.9 billion in 1959 guesstimated by DuMont's Ted Bergmann. Several weeks ago, speaking to security analysts on 10-year potential of the electronics industry as a whole, Sylvania finance v.p. W. Benton Harrison said combined TV-radio broadcasting revenues, i.e., exclusive of talent, production, etc., added up to about \$1,140,000,000 last year, should show a slight increase this year; by 1958-60, he stated, figure should be \$3 billion and by 1964 should top \$5 billion (Vol. 11:11).

NETWORK AID TO SMALL-MARKET STATIONS: Top network programs for small-market stations -- that's key to current network effort to break the vicious circle of "no programs, no viewers; no viewers, no sponsors; no sponsors, no programs." Aiming to build up a stronger nationwide TV service, NBC-TV and CBS-TV -- each in a different way -- have undertaken to fill the programming void on less-demanded TV stations.

This week, NBC let it be known that it is so encouraged by results of its so-called Program Service Plan, now bolstering program schedules of 74 stations, that it's working out ways to extend it to include more programs on more stations. NBC's thesis is: "Give them the programs first, if necessary -- then sell the advertiser."

CBS-TV's Extended Market Plan, more widely publicized (Vol. 10:49-51), is based on conviction pump can best be primed by selling advertisers first, via substantial price inducements. Under EMP, it sells selected group of small stations (now numbering 21) to network advertisers at extremely attractive rates. It already has 30 sponsors offering EMP affiliates 40 hours of choice programming weekly.

The NBC plan makes network programs available to affiliates which the sponsor

does not order, permits stations to delete network commercials and sell commercials on their own on a local or a spot basis. NBC revealed this week that these unorderd stations are already picking up total of more than \$8000 monthly in local revenue this way. But even more significant is fact that increasing number of network advertisers have been adding the small-market "optional" stations which began by carrying the network programs minus the commercials.

Program Service Plan gives NBC-TV's optional affiliates 3 opportunities to gain: (1) Added programming. (2) Sale of local sponsorships and participations in network-originated programs. (3) Foot-in-door with possible network sponsors.

* * * *

Plan had its experimental beginnings in Jan. 1954, when early-morning Today show was offered without network commercials. In October of last year, Howdy Doody, Home & Imogene Coca Show were added. Last month, NBC threw in its high-rated George Gobel and Sid Caesar shows. Adding more shows is a real problem, because NBC owns complete rights to only a minority of programs, most being tied up in one way or another by agencies, sponsors, packagers, talent, etc.

To accomplish the mechanics of commercial-deletion, NBC "had to invent a machine." It's a cueing device which places a rectangular spot in upper right corner of picture, signaling imminence of a network commercial. This cues local station's technician to make breakaway for local commercial or announcement.

Total of 74 stations not ordered by network sponsors -- 26 of them uhf -- are now participating in Program Service Plan by carrying some or all of the 19½ hours being offered weekly. While these unorderd stations are carrying the de-commercialized shows, a special NBC sales unit under Richard Soule is concentrating on selling sponsors the idea of adding these optional stations to their lineups of required basic outlets -- at the stations' regular network rates.

These figures show how regular network sponsors have been persuaded to put their commercials on optional stations since plan began: On Home show, 5939 orders for participations on individual stations have been taken; on Today, 1215 orders; Howdy Doody, 127 fifteen-min. segments; Imogene Coca, 48 orders.

NBC's "optional" plan so far has been limited largely to interconnected outlets "on the line," which can pick up live programs at little or no added cost. Non-interconnected stations and outlets off the main line can get kine versions by paying regular kine charges. Fact that many can't afford this service is one dilemma which NBC topkicks are trying to solve.

Personal Notes: Edward T. Ingle, ex-NBC, who for 7 years was TV-radio director of Republican National Committee, named chief of radio-TV branch, Office of Public Information, Dept. of Defense, reporting to Herschel Schooley, director of information . . . Charles Oppenheim, CBS-TV director of press information, gets new title of director of information services; Michael J. Foster, publicity mgr., becomes mgr. of press relations, Hank Warner continues as operations mgr. . . . Robert Elliott, ex-CBS-TV and Ruthrauff & Ryan, named adv. director of both General Teleradio film div. & MBS, replacing late James S. Tyler and reporting to Robert A. Schmid, General Teleradio adv. & promotion v.p. . . . Andrew G. Haley, Washington counsel for TV-radio stations, last year's pres. of American Rocket Society and past v.p. of International Astronautical Federation, and Mrs. Haley were hosts to Rev. Walter J. Miller, Papal astronomer here on visit from Vatican, at reception April 9 in Washington's Mayflower Hotel . . . Michael A. Renault promoted to gen. mgr. of ABC's WABC, N. Y. . . . George Townsend, chief engineer of WWLP, Springfield, Mass., elected a v.p.; Howard S. Keefe promoted to asst. mgr.; Wallace I. Green named program director . . . Frank B. Willis resigns as sales mgr. of WJTV, Jackson, Miss. to join midwestern sales force of MCA-TV . . . Lee Curran, ex-KDKA, Pittsburgh, named promotion mgr. of KTRK-TV, Houston . . . Frank Beazley, ex-sales mgr., KBAK-TV, Bakersfield, Cal., joins KNXT,

Los Angeles . . . Wm. G. Grainger, ex-NBC film div., resigns to become pres. of National TV Distributors Inc. . . . James C. Douglass, TV-radio director, elected a v.p. of Ted Bates & Co. . . . Donald E. Tomkins, ex-TV-radio director of Grant Adv., named gen. sales mgr. of Owen Murphy Productions Inc., N. Y. . . . James C. Zeder Jr., ex-McCann-Erickson & Grant Adv., named TV-radio adv. mgr., Chrysler Corp. . . . Marcell Smith, ex-WCBS, named asst. TV-radio production supervisor, Weiss & Geller, N. Y. . . . James Morgan, v.p. of Raymond R. Morgan Co., Los Angeles, joining Don Fedderson Productions, now producing *The Millionaire* and *Liberace* and planning new series *Do You Trust Your Wife?* . . . Paul Mowrey, first ABC mgr. of TV, recently in consulting practice, has been retained by Zenith Radio in connection with its promotion of Phonevision . . . Gordon Hellman has resigned as CBS-TV director of sales presentations, to become sales promotion director, TV Bureau of Advertising . . . Bernie Harrison, TV-radio editor of *Washington News*, shifts to *Washington Star* May 1 in same capacity.

Robert R. Sloane, 42, TV-radio producer-director-actor, died of heart attack April 3 at his Los Angeles home. He was producer of filmed *Treasury Men in Action*.

Joseph M. Creamer, 42, former TV-radio promotion & research director of WOR, N. Y., recently with Kudner Agency, died April 5 after brief illness.

THREE INITIAL DECISIONS of major importance and one CP were focus of FCC activity this week. CP was for Ch. 3, Florence, S. D., granted to Hills Bestg. Co. (KELO-TV, Sioux Falls) after KWAT, Watertown, had dismissed. New station is to be satellite of KELO-TV. In the initial decisions, examiners recommended grants to KIRO, Seattle (Ch. 7); WPDQ, Jacksonville (Ch. 12); *Omaha World-Herald*, Omaha (Ch. 7).

Examiner Thomas H. Donahue's selection of KIRO, Seattle, over KXA and KVI, was made, he said, because "its vast superiority of past operation over both applicants is far and away its most telling point." In Donahue's opinion, this outweighed the "one stain" on pres. Saul Haas' record. He said testimony showed Haas guilty of "peddling influence" when he was U. S. Collector of Customs in 1933-45, by telling owner of KIRO (then KPCB) he'd help him with Federal tax problem in return for stock in station at nominal price. He obtained 500 of station's 2500 shares for \$500. "Man is not perfect," Donahue said, excusing "this single instance of wrong-doing."

Interesting angle of Seattle case is that Sen. Magnuson (D-Wash.), chairman of Senate Interstate & Foreign Commerce Committee, is 3.24% stockholder in KIRO.

Sole reason for examiner Chas. J. Frederick's choice of WPDQ, Jacksonville, over city-owned WJAX and Florida-Georgia TV Co. was ownership-management integration. He held that applicants were about equal in all respects except that WPDQ's pres. James R. Stockton (60%) and exec. v.p. Robert R. Feagin (20%) would be active in day-to-day operations, giving "greater assurance of the station's operation in the interest of the public." Ownership of Florida-Georgia includes George H. Hodges, contractor (26%); Harold S. Cohn (19%), owner of WRHC; Mitchell Wolfson (voting 20%), owner of WTVJ, Miami and pres. of Wolfson-Meyer Theatres (31 theatres).

Criteria used by examiner Isadore A. Honig in selecting *Omaha World-Herald* over KFAB were: greater local ownership, superior civic participation, more varied business interests of principals, better program planning, business practices of KFAB's newspaper affiliates (*Lincoln Journal-Star*)—and diversification. Honig said "great weight" was given to last factor because *World-Herald* has no other media interests, whereas KFAB is related, through complicated stockholdings, to some dozen newspapers, 3 AM-FM stations and "at least 2 TV stations."

FCC refused Edward Lamb's request to drop one issue in the Lamb communist-charge hearings. The issue concerns charge made by Lamb in court suit against FCC last summer, that FCC investigators tried to induce people to testify falsely against him; that they said publicly that they were "going to get Lamb and take WICU away from him," and that they offered at least one bribe for false testimony. In refusing to drop issue, FCC in April 7 decision said inquiry into the basis for them is "relevant to a determination" of whether Lamb's license for WICU, Erie, should be renewed. In 2 days on stand last week, Lamb denied all charges (Vol. 11:14), insisting he was "victim of a horrible frame-up." Hearings were recessed until April 18, when Lamb returns for more questioning.

Sale of KJAY, Topeka, Kan. (5-kw, 1440 kc) for \$105,000 by S. H. Patterson, owner of KSAN-TV, San Francisco (Ch. 32) and KSAN (Vol. 11:12) was approved by FCC last week. New owner, KOA salesman Robert Rohrs, moves from Denver to Topeka to take over as gen. mgr. Also approved was 90% sale of WETZ, New Martinsville, W. Va. (1-kw, 1330 kc) to Sesac representative Harry B. Bright for \$20,400 (Vol. 11:12). J. Patrick Beacom retains 10% of WETZ, also owns 25% of WJPB-TV, Fairmont, W. Va. (Ch. 35), now off air (Vol. 11:9).

FCC's deintermixture proposals of last week (Vol. 11:14) encouraged more uhf stations to petition for more of the same. WNAO-TV, Raleigh (Ch. 28) renewed request that Raleigh's Ch. 5 and Durham's Ch. 11 be given to educators. KVDO-TV, Corpus Christi (Ch. 22) again urged that Ch. 6 & 10 be moved elsewhere. KJEO, Fresno (Ch. 47) asked that city's Ch. 12 be designated educational. On other hand, off-air WJPB-TV, Fairmont, W. Va. (Ch. 35) petitioned to get Weston's Ch. 5 transferred from educational to commercial.

In final actions, FCC: (1) Granted WMGT, Adams, Mass., CP for change from Ch. 74 to Ch. 19. (2) Opened way for WKNY-TV, Kingston, N. Y. to shift to Poughkeepsie and use Ch. 21, by substituting Ch. 75 for Ch. 27 in Concord, N. H., Ch. 27 for Ch. 21 in Hanover, N. H.

FCC turned down 2 attempts by uhf operations to get lower channels. WHUM-TV, Reading, Pa., seeking to shift from Ch. 61 to Ch. 15 while off-air WLBR-TV, Lebanon, would be moved to Ch. 61, was denied because WLBR-TV was said to be making effort to get back on air. Grantee KCOR-TV, San Antonio (Ch. 41), asking for shift of Ch. 14 from Seguin, Tex., was turned down because Seguin groups have shown interest in channel, though no one has applied, and because FCC believes Ch. 41 is a pretty good channel from standpoint of transmitter-receiver development—being in "relatively lower part of the uhf band."

* * * *

Three more comments were filed on FCC's proposed "5-mile" rule, designed to keep transmitters within 5 mi. of principal city. American Farm Bureau registered disapproval, saying rule would reduce rural coverage. WSJS-TV, Winston-Salem (Ch. 12) asked that rule, if adopted, not be made retroactive. Sarkes Tarzian, owner of WTTV, Bloomington, Ind. (Ch. 4) said cities would get better service if all powerful stations were 15-20 mi. from town—to avoid blanketing and ghosting.

CBS filed a statement on proposed low-power satellite rules, called them "promising" but warned that networks have rebroadcast rights which would not necessarily be granted to satellites automatically—because of overlap, etc.

Cease-&desist hearings on illegal boosters in 3 Washington towns May 9 & 12 (Vol. 11:14) have been shifted from Seattle to Wenatchee.

Approval of \$50,000 sale of WEW, St. Louis (1-kw, 770-kc) was asked in application filed this week by St. Louis U, seeking to dispose of outlet—which began in 1921—because of competition from 10 fulltime AMs and desire to participate in local educational KETC (Ch. 9). University also holds 60% of application for commercial Ch. 11 in St. Louis. Buying WEW is Aubrey D. Reid (performer Bruce Barrington), who has resigned as mgr. of St. Louis' KXOK.

KVOR, Colorado Springs, Colo. (1-kw, 1300 kc, CBS) has been sold by James D. Russell for \$120,000, subject to FCC approval. Russell retains 50% interest in Colorado Springs' KKTU (Ch. 11) and holds 20% of radio WHIR, Danville, Ky. KVOR purchases are John S. Riggs, pres. & 27% owner of WELM, Elmira, N. Y. & pres. & 50% owner of WAIR, Winston-Salem, in partnership with Robert Greene, Lakeview, N. Y. Allen Kander negotiated sale.

Application to transfer 50% of WKAI, Macomb, Ill. (250-watts, 1510 kc) & KLIL, Estherville, Ia. (100-watts, 1340 kc, ABC) to A. G. Bush, Minnesota Mining & Mfg. Co. executive and board member of St. Paul's KSTP-TV, was filed with FCC this week. Deal involves cancellation of \$40,000 loan by Bush, with Wm. Schons dropping out and Edward Schons retaining 50% interest in both stations.

Station Accounts: New and unusual local features: *FurnituRama* on WSBT-TV, South Bend, Ind., with 6 home furnishing dealers sponsoring 10-11 p.m. furniture displays, etc.; *Do It Yourself* on WGLV, Easton, Pa., with local supply company using station's scene shop as originating point; *How Food Becomes You*, course in foods & nutrition on WOI-TV, Ames, Ia., thrice weekly at 1 p.m., with Iowa State College prof conducting; prospecting for uranium, on WOAI-TV, San Antonio, collaborating with St. Mary's U, Sun. course by mining experts, started because of interest in nearby uranium finds; *A Man's World*, new for-men-only show on WOR-TV, N. Y., Fri. 7-7:30 p.m., featuring men's fashions, activities, etc., sponsored by Gallo Wine & Skycoach Airlines . . . Darling Stores, big chain of juvenile retailers, buys demonstrations on *Merry Mailman* on WOR-TV, Mon.-thru-Fri. 6-6:45 p.m., thru Getschal Co., N. Y., with partic. by Sealy for its Posture-Pedic mattress for children and 13 manufacturers of toys & novelties sold thru the stores . . . Tafon (reducing aid) to sponsor CBS-TV's pre-game *Baseball Preview* on KNXT, Los Angeles, immediately preceding *Game of the Week*, which Tafon co-sponsors (with Harbor Lincoln Mercury), starting April 2, thru Frank Miller Adv., Los Angeles . . . Florists Telegraph Delivery Assn., having used spot TV-radio for Easter, plans campaign also for Mother's Day, May 8, thru Grant Adv., N. Y. . . . Among other advertisers currently reported using or preparing to use TV: Bonne Bell Inc., Cleveland (cosmetics), thru Wyse Adv., Cleveland; Blue Jay Products, Chicago (foot medications), thru Leo Burnett Co., Chicago; Standard Brands Inc., N. Y. (Fleischmann's dry yeast), thru J. Walter Thompson, N. Y.; Cities Service Co., N. Y., thru Ellington & Co., N. Y.; Frederick E. Lowenfels & Son, N. Y. (Hotel Bar butter), thru Co-Ordinated Adv. Co., N. Y.; Krylon Inc., Philadelphia (Krylon acrylic & windshield Sealzit compounds), thru J. Robert Mendte, Philadelphia.

Network Accounts: ABC-TV got first sponsors this week for its *Warner Brothers Presents* starting in fall, tentatively Tue. 8-9 p.m. (Vol. 11:12). Liggett & Myers bought 30 min. each week, thru Cunningham & Walsh, and GE bought 30 min. alt. weeks, thru BBDO . . . Procter & Gamble to sponsor 36 MCA-TV films starring Jane Wyman next fall as replacement for *Fireside Theatre* on NBC-TV, Tue. 9-9:30 p.m., thru Compton Adv. . . . GE to be alt. sponsor (with Campbell Soup) of *Dear Phoebe* on NBC-TV starting April 8, Fri. 9:30-10 p.m., thru BBDO . . . Hazel Bishop to sponsor *Place the Face* on NBC-TV during summer, Tue. 8-8:30 p.m., thru Raymond Spector Co. . . . General Foods and Procter & Gamble to sponsor *Those Whiting Girls* as summer replacement for *I Love Lucy* on CBS-TV starting July 4, Mon. 9-9:30 p.m., thru Foote, Cone & Belding and Biow-Beirn-Toigo . . . Summer re-runs of *I Love Lucy* on CBS-TV starting April 17 Sun. 6-6:30 p.m., sponsored by Dorothy Gray Cosmetics thru McCann-Erickson, will be under title of *The Sunday Lucy Show* . . . Lettuce Inc., group of growers & shippers in Salinas-Watsonville, Cal. area, buys 10 partic. on *Today*, *Home & Tonight*, thru John Cohan Adv., Salinas; Helene Curtis (shampoo) buys 52 partic. on *Tonight*, thru Earle Ludgin Co.; E. L. Bruce Co. (wax) buys 14 partic. on *Today*, thru Christiansen Adv., Chicago.

CBS-TV increases network rates of 3 o-&o and 6 affiliated stations May 1. WCBS-TV highest hour goes from \$5500 to \$6250; WBBM-TV, Chicago, \$3000 to \$3300; KNXT, Los Angeles, \$2700 to \$3200. Affiliates: WCAU-TV, Philadelphia, from \$2700 to \$3100; WSPD-TV, Toledo, \$800 to \$875; WMBR-TV, Jacksonville, \$600 to \$700; WSBT-TV, South Bend, \$300 to \$350; WRDW-TV, Augusta, \$200 to \$250; KIMA-TV, Yakima, \$150 to \$200.

NBC's NEW CONCEPT of network radio programming, called *Monitor* and planned as a round-the-clock weekend service from 8 a.m. Sat. to midnight Sun., amounts to this—as described by pres. Pat Weaver. exec. v.p. Robert Sarnoff and producer James Fleming at April 7 press conference in N. Y.:

To be launched with one-hour simulcast June 12, it envisions—stripped of press agency and Weaver's fanciful verbiage (“kaleidoscopic phantasmagoria”)—a continuous flow of entertainment and information, with sponsors buying 1-min., 30-sec. or 6-sec. announcements, in what is basically a large-scale application to radio of NBC-TV's “magazine concept.”

Masters of ceremonies, called “communicators,” working in 4-hour shifts, will tie the show together—as Dave Garroway does in *Today*. The various “hunks” of programming—as Weaver described them—won't be hampered by time restrictions, will vary in length from less than a minute to 20 min. or even an hour or more for a special presentation.

Monitor will feature every conceivable kind of fare, and “will promote every other medium—TV, movies, magazines, newspapers, theatre, books.” It will present news & sports, capsule entertainment, live pickups, even excerpts from the audio of popular TV shows. As on *Today*, there will be 5-min. break-ins at half-hour for local news, weather, etc. Show will originate “all over the world,” controlled in N. Y. from “NBC Radio Central” now being constructed at cost of \$150,000 on 5th floor of RCA Bldg.

Press heard impressive tape-recorded sample of *Monitor* (Dave Garroway acting as communicator) at press conference, with features coming in this order: time signal, news summary, pickup from Paris with Art Buchwald reporting on tourist trade, pickup from BBC broadcast of cricket match (which, incidentally, was hilarious), recorded quip by Groucho Marx, music played by orchestra in Munich, taped pickup of part of floor show of Paris' Club Lido, portion of soundtrack from film *Blackboard Jungle*, Ogden Nash reciting one of his poems, historic description of winning of Santa Anita by Seabiscuit as recorded on-the-spot by Clem McCarthy, broadcast from a jet plane, “live” pickup of warm-up session for George Gobel's TV show.

Aim is to “bring back the excitement of the radio era,” with its sense of immediacy, mobility and vitality of material. Weaver is shooting for 60-70 rating on a “cumulative basis”—that is, 60-70% of radio audience tuning in on program sometime during week-end. A sponsor buying enough participations, it was said, thus could get his message across to majority of American homes—“something no sponsor could afford to do on TV.”

Gross prices for commercials, subject to frequency discounts, are: 1-min., \$1000; 30 sec., to be sold in minimum package of 4 announcements per weekend, \$3000 for the 4; 6 sec. “billboards,” to be sold in minimum group of 10 per weekend, \$3000 for the 10. Weekly discounts are provided up to 10% for at least 10 min. of announcements per weekend, annual discounts up to 20% for 250 or more announcements per year. In addition, advertiser ordering at least 20 min. of announcements before Oct. 1 will receive one announcement free for every 2 ordered.

Compensation rate to stations was not officially disclosed, but network spokesman said they will be paid at usual rate for the amount of time they take, based on current clock-hour system.

Serving under Fleming will be project officer Everard Meade, ex-TV-radio v.p. of Young & Rubicam & onetime asst. to pres. of American Tobacco Co.

Humble Oil has signed as first regional sponsor of NCAA football next fall (on NBC-TV nationally), buying Southwest Conference games, thru Kenyon & Eckhardt.

SUBSCRIPTION TV mail received at FCC (see p. 1) covers just about every shade of opinion on the subject. Volume is equal between pro and con—but major pay-as-you-look proponents and opponents are sure to tell FCC that the letters are not at all indicative of “real” public opinion.

It's evident that many letters are “inspired” by Zenith and theatre interests. It's apparent, too, that newspaper TV columnists are talking it up, urging readers to write to FCC and Congress. Mail comes from whole U. S., but there's heavy concentration from Chicago, Zenith's headquarters. This week, Zenith sent letter to all stockholders, urging them to write to FCC before May 9 in support of subscription TV and suggesting they also contact Senators and Congressmen. Here are excerpts from some of the comments:

Gov. Charles H. Russell, Nevada—“It is my sincere hope that your Commission will act favorably upon this proposal which will mean much to the State of Nevada. . . . It would make available to persons who might otherwise never have the opportunity of this splendid means of information, education and entertainment.”

Mt. Vernon, N. Y. housewife—“This criminal scheme must have come from Moscow.”

J. Edwin Foster, director of Medical Audio-Visual Institute, Assn. of American Medical Colleges—“The potential value of subscription TV for communicating professional knowledge and techniques to practicing physicians is tremendous indeed.”

Quincy, Ill. physician—“While I can afford this, there are many who cannot. It is all they can do to afford a small family set. Let's keep it on an advertising basis.”

Stuart Louchheim, Zenith distributor, Philadelphia—“At present, thousands of TV set owners in many key cities have expressed their desire for this new public TV service and I urge you and your fellow members . . . to render the public an early favorable decision.”

Sen. George W. Malone (R-Nev.)—“As this will benefit greatly my state of Nevada, I am writing to urge you to consider this favorably.”

Portland, Ore. businessman—“Low income groups may just as well relegate their TV sets to the trash cans, for the big-moneyed, subscription groups could monopolize all the best talent and the ‘free’ shows wouldn't be worth viewing.” (Accompanied by 52 signatures on petition).

Gilbert Miller, veteran theatrical producer—“If subscription TV can provide the boxoffice support necessary to

go beyond the limited adaptations now sponsored by advertisers, I believe we could then have a great revival of the theatre, not alone on the Broadways of our larger cities, but in millions of living-room TV theatres throughout the land. Moreover, I believe the practical application of this electronic-age home boxoffice would be equally effective in releasing some of the theatre's sister arts—the opera, symphonies and other cultural presentations—from the financial bonds which now constrict their artistic and esthetic contributions to our culture.”

From Elmwood Park, Ill.—“Let the people decide. I'm sure it will go over a 100%.”

Fred E. O'Brien, city engineer, Watertown, N. Y.—“It would be exceedingly expensive for the ordinary citizen.”

Arthur J. Rooney, pres., Pittsburgh Steelers—“We know that the receipts from TV gradually have become the life-blood of professional football and almost every other sport. It is an open secret that without TV receipts, most of the clubs in the National Football League would have operated in the deficit column during the past 3 or 4 seasons. TV and sports should have a long marriage, providing production costs can be kept in line or some method, such as subscription TV, can be put into operation. We find that with increasing costs, it becomes exceedingly difficult to interest prospective sponsors . . . We feel the only answer eventually will be some form of subscription TV.”

Mimeographed form letter, sent by several theatre owners in New England, mostly Maine—“It is the writer's considered opinion that such special interest shows and sporting events, as would normally be presented over this type of service, would find their best outlet in theatres and public places. Such enterprise can best afford, through admission charges, equipment capable of presenting such events in a manner worthy of paid viewing. It further seems that home presentation of such programs would tend to syphon off the best of available material from free broadcasts, leaving only such material as to make these broadcasts hardly worth watching. It also seems that ‘pay-as-you-view’ TV would tend to encourage monopolistic practices by the organizations owning the coaxial cable network.”

New Orleans attorney—“Strong approval . . . I own no stock in Zenith.”

An irate citizen—“What's the matter with you birds? Where do you think the average guy is going to get the dough?”

Trend to TV programs as theatrical fare is subject of survey by *Billboard's* Jack Singer, who concludes “TV film producers, in their own way, are quietly but firmly invading the theatrical film field [and] much talked about marriage between the feature film and TV industries, it seems, is in reality a 2-way street.” Citing example of *Dragnet*, *Gangbusters & Marty*, he sees accelerating use of TV properties by the movies. Among TV film series listed as “being groomed” for conversion into theatrical features: *Treasury Men in Action*, *I Led Three Lives*, *Racket Squad*, *Big Story*, *Secret File U.S.A.*, *Private Secretary*, *Ozzie & Harriet*, *Lone Ranger*, *Sherlock Holmes*, *Waterfront*, *Ramar of the Jungle*, *Dangerous Assignment*, *Margie*. Single TV shows, both live and film, being tapped for the movies: Kraft's *Patterns*, Elgin's *Crime in the Street*, U. S. Steel's *Fearful Decision* and *The Last Notch*, Philco's *Middle of the Night*, Westinghouse Studio One's *Twelve Angry Men*, and 4 TV Reader's Digest episodes: *Mrs. Robert Louis Stevenson*, *I Picked More Daisies*, *Honeymoon in Mexico*, *France's Greatest Detective*. Several patterns are being followed in transforming TV films into theatrical features: (1) Tying together TV episodes into feature length, a la *Davy Crockett*, *Secret File U.S.A.*,

Sherlock Holmes. (2) Using TV property and TV buildup as basis for brand new film script, as in case of *Big Story*, *Treasury Men*, *Foreign Intrigue*. (3) Producing both feature film and TV series at same time but from different scripts, as was done by Thetis Films with *Three Musketeers*, syndicated by Official Films, by Joseph Kaufman with *Long John Silver*, which he made in Australia. Desilu Productions plans feature films entirely apart from TV (Vol. 11:14), as does Sheldon Reynolds of *Foreign Intrigue* fame—both capitalizing on their TV shooting experience and their knowledge of what public wants.

Rate increases: WBRC-TV, Birmingham, April 15 adds new Class AA hour (7-9:30 p.m. daily), at \$750, min. at \$185, Class A hour remaining \$650. WHP-TV, Harrisburg, Pa. has raised base hour from \$250 to \$325, min. \$50 to \$65; CHSJ-TV, St. John, N.B. from \$200 to \$250 & \$45 to \$55; XETV, Tijuana-San Diego from 400 to \$500 & \$80 to \$100.

Times are good for both TV and radio, reports NBC v.p. Carleton D. Smith, gen. mgr. of network's WRC-TV & WRC, Washington. Net TV time sales for first quarter were 32.3% higher than same period last year, for radio 6% ahead.

Telecasting Notes: Republic Pictures, which for last few years has made more money from TV than from movies, may discontinue production for theatres and concentrate on TV film. This announcement by pres. Herbert J. Yates at annual stockholders meeting this week touched off battle which was won, at least temporarily, by stockholders favoring his administration. Yates said he personally favored abandoning the movies, and had notified theatre operators that final decision would be made in 60-90 days. The only thing that could prevent it, he added, would be "higher rentals and longer play periods for the company's films" . . . Considered a "major" in the Hollywood film producing hierarchy, Republic in last 2 years has sold about \$7,000,000 worth of old product to TV (Vol. 10:50 & 11:13), has received \$1,000,000 advance from MCA on old Gene Autry & Roy Rogers films; got \$700,000 last year from leasing space for TV filming; has one of largest film processing labs, serving many other TV film producers . . . Republic's own TV films include successful *Stories of the Century*, Yates reported, and it's now preparing 3 new series: *Fu Manchu*, *Village Doctor*, *Behind the Scenes* . . . Jack Warner Jr., 39, heads Sunset Productions, new TV film subsidiary set up by Warner Bros.; first project will be aviation series *Men of the Sky*, written by Vincent B. Evans . . . Warner Bros. announces TV's *Our Miss Brooks* will be made into feature-length movie starring Eve Arden . . . MGM's E. J. Mannix, in Hollywood, confirmed that it's surveying telefilm field; TV-radio chief Les Peterson has conferred with MCA, Jack Chertok Productions, Desilu Productions, ABC v.p. Earl Hudson—and it's now confirmed that Pontiac Motors & Armstrong Cork will alternate new NBC-TV show by MGM, Tue. 9:30-10:30 p.m. . . . Accent on films at networks, too, indicated in NBC film div. national sales meeting at Hotel Warwick, N. Y., April 13-15, to be attended by pres. Pat Weaver and his top executives, along with entire film sales force; newest offering will be *Steve Donovan, Western Marshal* . . . CBS plans permanent telefilm production base costing \$1,000,000 in Honolulu, reports *Hollywood Daily Variety*, but it's unconfirmed; CBS-TV film shows now in various stages of production in Hollywood, according to v.p. Harry S. Ackerman, who recently returned from Hawaii, include *Hart of Honolulu*, *Aldrich Family*, *Townspeople*, *Gunsmoke*, *Cupid*, *No Way Out*, *Miss Pepperdine*—and of course Bing Crosby series, on which shooting starts in June . . . Either because they haven't clicked or sponsors have dropped them, mortality rate of TV films is very high, observes *Hollywood Daily Variety*, pointing to these that folded in last year: *Duffy's Tavern* and the Joan Davis, Paul Hartman, Hank McCune & Dennis Day shows; also no longer in production: *Ellery Queen*, *Mr. & Mrs. North*, *Cowboy G-Men*, *Donald O'Connor Show*.

■

Nine sponsors have signed so far for "14-50" discount plan of WRCA-TV, N. Y., whereby an advertiser who buys fourteen 10 or 20-sec. station breaks in a Sun.-thru-Sat. week receives a 50% discount on those breaks in D or C time (Vol. 11:7). The sponsors: Keebler Weil Baking Co., thru McKee & Albright, Philadelphia; Chadbourn Sales Corp. (hosiery), thru Harold M. Mitchell Inc., N. Y.; R. B. Davis Co., div. of Penick & Ford (molasses), thru BBDO; Church & Dwight Inc. (Arm & Hammer baking soda), thru J. Walter Thompson; Nedick's Inc., thru Weiss & Geller; Buitoni Food Corp., thru Albert Frank-Guenther Law; Ringling Bros.; Gimbel's; Swanee Paper Co.

A. J. Armstrong Co. Inc., 60 E. 42nd St., N. Y., commercial financing firm, planning further expansion of its TV film financing activities, engages Melvin L. Hirsch as mgr. of motion picture & TV financing dept.

JUVENILE DELINQUENCY hearings of Senate Judiciary subcommittee headed by Sen. Kefauver (D-Tenn.) were devoted to TV this week in windup of TV study started last year when Sen. Hendrickson (R-N. J.) headed subcommittee (Vol. 10:40-43, 49). Witnesses came up with the same sort of "yes-&-no" answers that have characterized all such investigations. Some psychologists and sociologists were certain TV had very harmful effects; other felt it had minor effects, if any. Telecasters said there was little evidence to convict TV, while citing efforts to exercise closer supervision of programs.

NARTB pres. Harold Fellows told of various surveys by psychiatrists, majority of whom felt that TV is not responsible for juvenile delinquency. Only a few, he said, had "suspicions." NARTB code director Edward Bronson testified that NARTB monitors some 280 hours of programs a month, reporting results to stations involved. A special monitoring program is now in progress, covering 22 stations in 9 cities.

NBC v.p. Joseph Heffernan noted that there is no scientific data linking TV and juvenile delinquency; that programs including crime and violence "are a proper and legitimate part of the broadcast schedule"; that Govt. should stay out of program censorship; that NBC has formed a Children's Program Review Committee comprising Dr. Frances Horwich (*Ding Dong School*), Mrs. Douglas Horton (RCA director and former WAVES commander) and Dr. Robert F. Goldenson, psychologist.

Dr. Ralph S. Banay, Columbia U psychiatrist and consultant to Federal Bureau of Prisons, stated emphatically that TV is harmful. "If a prison is called a 'College for Crime,'" he said, "then viewing of violent TV programs by young, emotionally disturbed children is perhaps a 'School for Delinquency.'"

Dr. Eleanor E. Maccoby, Harvard U child psychologist, tended to disagree. She felt that TV violence was frequently a good emotional outlet. "It's not a basic cause of delinquency," she said, "but it sometimes provides ammunition for some children."

Wm. A. Wood, mgr. of educational WQED, Pittsburgh, reported that station's non-violent programs frequently attract extremely large audiences. Dr. Paul F. Lazarsfeld, Columbia U sociologist noted for many media studies, said that there's much more to be learned about TV's impact; that any problems raised by TV should be handled individually with child involved; that more good programs should be offered as alternatives to bad.

FCC Comr. Frieda Henneck said Commission should start immediate investigation and refuse license renewals to stations which carry an "unbalanced fare of violence, brutality, crime and horror from which there is little escape under present programming."

United Press decided to canvass rest of FCC commissioners for their views on TV-radio programs, said this is their composite verdict: "Pretty good but plenty of room for improvement—especially in commercials." Chairman McConnaughey said that crime shows "give me concern" but doubted that anyone can show how much juvenile delinquency may be attributed to them. Comrs. Lee and Doerfer stated they've seen no conclusive showing on juvenile delinquency aspects, with latter commenting that *Macbeth* was most "blood-curdling" show he's seen so far.

■

Television System of Mexico is name of now-merged Emilio Azcarraga-Romulo O'Farrill Sr. TV interests (Vol. 11:9), operating all Mexico City stations and virtually all in Mexico. Azcarraga is pres., O'Farrill v.p., with sons Emilio Azcarraga Jr. as sales v.p. and Romulo O'Farrill Jr. as administrative v.p. For list of their stations and CPs, see *TV Factbook No. 20*, p. 237.

FCC APPROVED sale of Ch. 11 time-sharing WTCN-TV, Minneapolis & WMIN-TV, St. Paul for \$3,135,000 this week to Bitner's Consolidated TV & Radio Broadcasters Inc. (Vol. 11:5)—and combined operation will henceforth be called WTCN-TV. That means one less station on roster of those operating, bringing total down to 430 since there were no new starters this week. Only time-sharers left on air, each counted as a separate entity, are Ch. 10, WHEC-TV & WVET-TV, Rochester, N. Y.

Expected to begin operation April 11 is KMAU, Maui, Hawaii (Ch. 3), second satellite of KGMB-TV, Honolulu (Ch. 9); on March 25, KHBC-TV, Hilo (Ch. 9) started as first satellite. Expected to suspend shortly is WFMZ-TV, Allentown, Pa. (Ch. 67), which began last Dec. 4; it hopes to return to air in Sept. Also contemplating cessation—unless FCC acts favorably on petition for interim use of now-unapplied-for educational Ch. 11—is KGTU, Des Moines (Ch. 17) in view of upcoming KRNT-TV (Ch. 8), expected to start by next Aug. 1 (Vol. 11:14).

Bitners paid \$1,900,000 for WTCN-TV with WTCN, controlled by Robert Butler, ex-diplomat; \$1,235,000 for WMIN-TV, owned by N. L. Bentson group which previously had sold radio WMIN for \$75,000 to Wm. F. Johns family. Bitner firm, also operating WFBM-TV, Indianapolis (Ch. 6) and WOOD-TV, Grand Rapids (Ch. 8), will retain ABC affiliation, using WTCN-TV studios, Foshay Tower transmitter. Miller Robertson, WTCN-TV asst. gen. mgr., ex-KSTP, moves up to gen. mgr.; Joseph Kahnke becomes chief engineer; Wm. E. Daley remains as radio mgr. Sales staffs of all stations are retained, and Katz is slated to become rep in lieu of Blair-TV whose contract runs until next Sept.

GE reports order for 5-kw transmitter, 3-bay antenna & film chain for shipment in 90 days to upcoming KLEW-TV, Lewiston, Ida. (Ch. 3), which hasn't reported target yet; GE this week shipped 12-kw amplifier to KQTV, Fort Dodge, Ia. (Ch. 21). RCA shipped 25-kw amplifier April 4 to KFSD-TV, San Diego (Ch. 10), and 12½-kw amplifier to WITV, Ft. Lauderdale, Fla. (Ch. 17). Canadian GE this week reported order for 35-kw amplifier to be delivered early next summer to CHSJ-TV, St. John, N.B. (Ch. 4).

Third Canadian TV application added to agenda of April 15 CBC board meeting is that of radio CKNX, Wingham, Ont., for Ch. 8 with 20-kw visual; earlier applicants were CFCY, Charlottetown, P.E.I. for Ch. 13 and Lethbridge (Alta.) TV Ltd. for Ch. 9. Wingham is some 65 mi. due north of London, Ont., near eastern shore of Lake Huron.

* * * *

In our continuing survey of upcoming stations, these are latest reports received:

WCBI-TV, Columbus, Miss. (Ch. 4), plans to ask for modification of CP in order to locate TV station at site of new plant of radio WCBI, soon to start operation with 1-kw on 550 kc. Gen. mgr. Bob McRaney hopes for "late summer or early fall" test patterns. RCA 5-kw transmitter and 5-bay antenna are stored in Columbus, with studio equipment due for delivery as soon as TV addition to radio building is ready. It will use 500-ft. Andrews tower. Owner Birney Imes Jr. also operates Mississippi AMS WELO, Tupelo; WNAG, Grenada; WMOX, Meridian. TV station mgr. will be Joe Carson, ex-mgr. of WMOX. CBS & NBC affiliations have been signed, but rates not yet established. Rep will be McGillvra.

KNOX-TV, Grand Forks, N. D. (Ch. 10), granted in March 1954, "will be built this year," writes office mgr. Don DeKrey. It plans to ask for modification of CP to 316-kw with 1100-ft. tower. Make of equipment not reported. Rep not chosen.

WBIQ, Birmingham (Ch. 10, educational), call letters changed from WEDB, now plans May 1 start, reports Raymond D. Hurlbert, pres. of Alabama Educational TV Commission. Work has begun on conversion of WBRC-TV's 5-kw RCA transmitter, and new station will rent old WBRC-TV facilities from Storer for \$1 a year, including use of transmitter house, loan of 5-kw transmitter and 150-ft. tower with 6-bay antenna. Alabama Commission, whose consultant is ex-broadcaster-telecaster Thad Holt, already has WTIQ, Munford (Ch. 7)—call changed from WEDM—in operation with 10 hours of programming weekly. Both outlets will share Birmingham studios with WBIQ, duplicating "about 50% or more" of Munford programs. Commission also holds CP for WAIQ, Andalusia (Ch. 2).

WDBJ-TV, Roanoke, Va. (Ch. 7), granted last week, hasn't ordered equipment or begun construction, but hopes to start "sometime this fall," according to mgr. Roy P. Jordan. Grantee Times-World Corp., publisher of *Roanoke Times* and *World-News*, is owned by estate of Junius B. Fishburn, who died April 1 (Vol. 11:14). Rep not chosen.

KSTF, Scottsbluff, Neb. (Ch. 10), has set June 1 programming target, reports Wm. C. Grove, gen. mgr. of parent KFBC-TV, Cheyenne, Wyo. (Ch. 5), 79 mi. northwest of Scottsbluff. It plans to rebroadcast KFBC-TV programs, also will have some film originations. It has RCA transmitter and 6-bay superturnstile antenna on order. KFBC-TV chief engineer, R. C. Pfannenschmidt will be in charge of 4-man Scottsbluff operation. Time will be sold only in combination with KFBC-TV. Rep for both is Hollingbery.

WFLB-TV, Fayetteville, N. C. (Ch. 18), construction now under way, has GPL transmitter ordered for delivery in 30 days. July is target for test patterns, Aug. 1 for CBS & NBC programming, writes exec. v.p.-gen. mgr. L. W. Allen. Nearest station is WNAO-TV, Raleigh (Ch. 28), 53 mi. away, other TV cities less than 100 mi. distant being Wilmington, 78 mi., Greensboro & Greenville, both 87 mi. Wm. B. Belche is being promoted from radio to commercial mgr., with Richard Madson adding TV to duties as chief radio engineer. Rates and rep not set yet.

WNLC-TV, New London, Conn. (Ch. 26), is now "planning to start telecasting late in 1955, pending the outcome of the current Congressional investigation of the uhf and TV monopoly problems," reports mgr. Gerald J. Morey. It has order with RCA for equipment, but delivery date hasn't been set. Rep will be Headley-Reed.

WNDU-TV, Notre Dame-South Bend, Ind. (Ch. 46), now under construction, plans July 1 test patterns, July 15 start as primary NBC, reports v.p.-gen. mgr. Bernard C. Barth. CP is held by University of Notre Dame, which last year acquired radio WHOT, South Bend, from owners of WISH-TV, Indianapolis (Vol. 10:36). TV studios will be on campus, and 12½-kw RCA transmitter with 500-ft. Ideco tower & RCA antenna will be 5 mi. due south of South Bend. It will be area's third station—WSBT-TV (Ch. 34), having begun in Dec. 1952; WSJV, Elkhart (Ch. 52) in March 1954. Base rate will be \$500. Rep will be Meeker.

KTVI, St. Louis (Ch. 36), notified FCC April 6 that it was on the air with test patterns, preparatory to programming start over Easter weekend. Until ready to switch, it continues programming on Ch. 54 from nearby Belleville, Ill., turning in that CP after change is made. Station began as WTVI, last month got permission to shift to channel and facilities of KSTM-TV (Vol. 11:11) which left air last Aug. (Vol. 10:32). It has unique deal with GE whereby Belleville transmitter is to be reconverted so that use in combination with former KSTM equipment will give station 25-kw unit, KTVI having filed for 416-kw.

RADIO OUTPUT & SALES IN SPIRITED COMEBACK: The radio trade story for first quarter of 1955 makes good reading on all counts: Production and retail sales each up by about 50% over first 3 months of 1954, inventories at all levels reduced by about 200,000 receivers since the beginning of 1955.

It's evidence once again that radio can flourish side-by-side with TV, whose estimated first-quarter production of 2,100,000 and retail sales of 1,800,000 were a little higher than first 1954 quarter -- despite normal tail-off in March. TV output for week ended April 1, last week of quarter, was 163,746.

Radio production totaled 3,700,000 (1,950,000 auto), compared to 2,500,000 (1,095,000 auto) in first 3 months year ago. For week ended April 1, production was 287,740 (144,597 auto). Retail sales were about 3,250,000 vs. 2,100,000 in first quarter of 1954. Perhaps the most heartening feature of the entire radio picture, however, is the decline in inventories from 3,000,000 to 2,800,000 for 3 months.

Spurt in auto & clock set sales, low prices, strong promotions, increase in consumer purchasing power -- all are reasons cited by trade experts for radio's good start, which has some predicting that full 1955 sales may approach 1953's 13,000,000. At any rate, they confidently forecast year's sales well in excess of the 10,300,000 of 1954, which was still considered a good year. (For preceding years' totals of radio production & sales, plus factory values, see TV Factbook No. 20, p. 388.)

DEALERS DIVIDED ON FAIR TRADE LAW REPEAL: First intra-trade reactions to proposed repeal of fair trade laws, as recommended last week by top-flight 60-man National Committee to Study the Anti-Trust Laws (Vol. 11:14), indicate that dept. stores, large independent dealers & discount houses generally are ranged on side of repeal, while the small retailer generally wants to keep some form of fair trade.

The committee's 392-p. report will be submitted April 14 to the Senate Small Business Committee, headed by Sen. Sparkman (D-Ala.), which will hold hearings on fair trade and discount house operations shortly thereafter. The committee, in its annual report, warned that small, independent appliance stores will have hard time surviving competition of discount houses.

Those favoring repeal contend the laws, which are on books in 45 states, have proven ineffective because of lax enforcement. Those opposing repeal argue that they need some protection against price-cutting, and that some law is better than none.

NARDA takes no stand as an organization, but managing director A.W. Bernsohn said majority of its members, if a canvass were made, would probably favor keeping some form of fair trade, though not necessarily by legislation.

NARDA chairman Mort Farr, speaking only for himself as an Upper Darby, Pa. retailer, said repeal of fair trade laws "is in our best interests." He added that laws which haven't been enforced are worse than no laws at all. "I think it is high time we either repeal them and allow things to find their own economic level, or else set about making fair trade laws work," he said. "In going about the country, I have noticed in many cases that business is less chaotic in non-fair trade communities."

Stephen Masters, pres. of Masters Inc., N.Y., one of biggest discount houses in country, claiming \$20,000,000 annual volume, said he also welcomed repeal of fair trade laws. Speaking to Harvard Business School Club in N.Y., he said price fixing is a "crutch for the high-cost merchant," giving no incentive for improving service.

Masters vigorously defended "legitimate" discount houses against criticism, saying "the public sees little justification for paying full list on a growing number of overpriced, overmargined, underserviced lines." He said his firm's operating cost is \$11.20 for every \$100 of sales, compared with average of \$32.90 for member stores of National Retail Dry Goods Assn., which assailed discounters last week (Vol. 11:14).

"Perhaps the reason for this," he said, "is that we do not have fancy serv-

ices, charge accounts, high-priced legal staffs, non-productive departments or non-productive store executives." He asserted that no manufacturer suffers any impairment of his brand when it's sold in original factory carton, but noted that 98% of his merchandise comes from distributors, not manufacturers. He estimated 10,000 discount houses now in nation, 1000 of them in New York.

Trade Personals: Walter A. Weiss named gen. mgr. of Sylvania radio tube div., Emporium, Pa., succeeding Matthew D. Burns, now operations v.p.; Weiss is succeeded by Herbert A. Ehlers as gen. manufacturing mgr. of radio tube div. . . . H. S. Gwynne, mgr. of RCA tube market plans & analysis, appointed mgr. of tube industry sales section, heading sales of tubes, tube parts & manufacturing machinery to industry . . . F. E. Howell, ex-Nash-Kelvinator, named v.p. & gen. mgr. of Crosley-Bendix appliances, succeeding Parker H. Ericksen, now exec. v.p. . . . Roy H. Olson, from Phoenix research lab, named engineering director of Motorola communications & electronics div.; Robert L. Borchardt promoted to asst. mgr. of communications div. technical information center . . . Frank H. Uriell, on leave of absence from Chicago law firm of Pope & Ballard for last 4 years to set up and head Admiral's legal dept., has returned to the law firm but continues as Admiral v.p., gen. counsel & director; house counsel are William S. Baltz & Norman E. Johnson . . . Mannie Sacks, RCA v.p. & gen. mgr. of its record div., guest of honor April 5 at testimonial dinner by B'nai B'rith in home town of Philadelphia, attended by RCA chairman David Sarnoff, pres. Frank Folsom and other top executives . . . Pat Kennedy, RCA Victor mgr. of copyright contracts, promoted to mgr. of record merchandise development, RCA International; Warren C. Ling is successor . . . Lee H. D. Baker, Admiral appliances v.p., has retired on reaching statutory retirement age, continues as special consultant on product design . . . Leo J. Jacobson named chief engineer of International Resistance Co.'s Philadelphia plant; George Williams named group leader, product engineering; Benjamin F. Gerding mgr. of manufacturing engineering; Carl Smith, mgr. quality control . . . R. F. Willett, ex-GE and F. W. Sickles Co., recently plant mgr. of Essex Electronics, named gen. mgr. of Empire Coil Co., New Rochelle, N. Y., recently acquired from Herbert Mayer by Storer Bestg. Co. . . . Oakley Cohan, ex-Stewart-Warner Chicago factory branch, named asst. sales mgr., Radio Craftsmen Inc., Chicago, replacing Larry Herman, resigned . . . Roy O'Sullivan, ex-Philco, named Magnavox Philadelphia area sales mgr.; Eugene P. Feeney named sales mgr. of Syracuse-Buffalo area . . . Stanley Graham, Stromberg-Carlson southeastern district mgr., transferred to Chicago as midwest mgr. . . . Edmond Sherman, ex-Tele King & Hazeltine, named chief engineer of Transiron Inc., 154 Spring St., N. Y. (govt. electronics equipment).

Rear Adm. Stanford C. Hooper, 70, USN Ret., who in 1912 was Navy's first fleet wireless officer and rose to director of naval communications, 1928-34, died April 6 at his home in Miami Beach. One of Navy's radio pioneers, he was associated with the late Adm. W. H. G. Bullard, later first chairman of Federal Radio Commission, in setting up an American company to take over British Marconi operations here in 1919—company which became RCA. He was "borrowed" from Navy in 1927-28 to act as first chief engineer of old Radio Commission. He held Marconi Medal of Merit and many other honors. He was a 1905 graduate of Annapolis. Surviving are his widow and a daughter, Elizabeth.

Homer Oxley Sams, 61, elder brother of Howard W. Sams and sales research director of Howard W. Sams & Co., Indianapolis, died April 6 after a short illness. Surviving are his wife, 2 daughters, a son, 4 grandchildren.

COMPENSATIONS paid in 1954 to officers-directors of TV-radio-electronics companies whose financial reports have been summarized in this column during recent weeks; these are as reported in proxy statements (figures in parentheses indicating number of shares of common stock held):

RCA—David Sarnoff, chairman, \$200,000 (30,000); Frank M. Folsom, pres., \$186,434 (13,000); Elmer W. Engstrom, exec. v.p., research & engineering, \$87,250 (500); Charles B. Jolliffe, v.p. & technical director, \$79,718 (600); Lindsey W. Teegarden, distribution v.p., \$135,000 (none); Walter A. Buck, v.p., operating services, corporate staff, \$61,492 (none); John T. Cahill, gen. counsel, \$3700 (500), out of \$425,000 legal fees paid to firm of Cahill, Gordon, Reindel & Ohl, of which Cahill is senior partner. In addition, directors receiving compensation and holding stock were Harry C. Hagerty, \$9200 (100); John Hays Hammond Jr., \$900 (100), out of \$48,000 paid for research laboratory services to Hammond Research Corp., Gloucester, Mass. and Radio Engineering Co., N. Y., of which Hammond is pres.; George L. Harrison, \$5850 (1000); Mrs. Douglas Horton, \$3950 (200); Harry C. Ingles, \$14,910 (100); Edward F. McGrady, \$19,630 (200); Wm. E. Robinson, \$15,000 (100), out of \$19,055 paid for public relations services to firm of Robinson-Hannagan Assoc. Inc., of which Robinson was chairman until Feb. 7, 1955, when he was elected pres. of Coca-Cola Co.; Walter Bedell Smith, \$100 (100).

Philco—Wm. Balderston, chairman, \$118,250 (5353); James H. Carmine, pres., \$106,250 (31,719); James T. Buckley, retired chairman, \$41,667 (15,752); John M. Otter, exec. v.p., \$73,167 (5577); Harold W. Butler, v.p., \$51,000 (7353); Wm. H. Chaffee, v.p., \$43,000 (946); Raymond B. George, v.p., \$45,100 (257); Joseph H. Gillies, v.p., \$75,750 (6827); Larry F. Hardy, v.p., \$72,500 (7474); Robert F. Herr, v.p., \$64,300 (24,707); Frederick D. Ogilby, v.p., \$70,000 (149); Courtney Pitt, v.p., \$52,000 (1100); Samuel N. Regenstrief, v.p., \$50,000 (22,122); Raymond A. Rich, v.p., \$59,000 (525); David B. Smith, v.p., \$53,200 (2817); Leslie J. Woods, v.p., \$68,750 (7893). In addition, Larry E. Gubb, director, received \$30,000 and held 29,843 shares.

Admiral—Ross D. Siragusa, chairman-pres., \$125,250 (249,156); John B. Huarisa, exec. v.p. & treas., \$125,200 (101,731); Wallace C. Johnson, v.p., \$57,600 (2200); Frank H. Uriell, v.p. & gen. counsel, \$52,750 (1500); Lynn C. Park, retired treas., \$33,500 (none). In addition, Siragusa's wife, Irene O. Siragusa, owns 432,920 personally and together they own 240,480 as trustees for their 4 children (totaling about 40% of stock outstanding). Huarisa's wife, Wanda Huarisa, owns 13,294 personally, and 7200 together as trust for their daughter; Johnson's wife, Iona V. Johnson, owns 120; Uriell's wife, Georgia Uriell, owns 210.

Emerson—Benjamin Abrams, pres., \$60,008 (219,800); Dorman D. Israel, exec. v.p., \$43,980 (1364); Max Abrams, secy.-treas., \$39,936 (80,400). In addition, Benjamin Abrams holds 26,469 shares as trustee under various trusts for members of his family, his wife owns 6470 shares, and aggregate of 63,170 shares are owned by 3 charitable membership corporations of which Mr. & Mrs. Benjamin Abrams and Mr. & Mrs. Max Abrams are members. Max Abrams also holds 6530 shares as trustee for members of his family, his wife holds 1804 shares, his son 25,814.

Olympic Radio—Morris Sobin, pres. (2520 shares owned by Mrs. Ruth Sobin), \$38,999. Note: On Jan. 26, 1955, Mr. Sobin was granted option to buy 8000 shares at \$5, in effect until Jan. 31, 1958, which by virtue of recent stock dividend was increased to 8400 shares at \$4.76; other officers were given options on 7350 shares. On March 31, chairman Adolphe A. Juviler (salary: \$12,000), already owner of 7828 shares, was given option to purchase 15,000 shares at \$6.42 until March 31, 1958.

Indiana Steel Products Co.—Robert F. Smith, pres., \$45,333 (1500); John H. Bouwmeester, manufacturing v.p., \$34,666 (200); Charles A. Maynard, v.p., \$32,666. In addition, wife of Mr. Smith owns 150 shares. Paul R. Doelz, director (pres. of Kalman & Co., Minneapolis, investment bankers), owns 10,760 shares plus 4600 as trustee while his daughter Nancy D. Curtin owns 6160 shares.

DuMont—Allen B. DuMont, pres., \$68,339 (39,800 common, 200 preferred); Wm. H. Kelley, v.p. marketing, \$48,555 (none); Irving G. Rosenberg, v.p. tubes, govt. & communications products, \$40,000 (none). Dr. DuMont also holds 8000 shares of Class A common and 2000 shares of preferred in irrevocable trust for benefit of son Allen B. DuMont Jr.

International Resistance Co.—Charles Weyl, pres., \$51,671 (94,300); Jesse Marsten, v.p., \$35,837 (8500); Harry A. Ehle, v.p., \$35,837 (17,000); Oliver J. Greenway, v.p., \$32,337 (7850); Edward A. Stevens, v.p., \$30,237 (7040).

Sylvania—Max F. Balcom, ex-chairman, now consultant, \$36,000 (3900); Don G. Mitchell, chairman (now also pres.), \$130,242 (2450); H. Ward Zimmer, pres. (deceased), \$130,242 (stockholdings not listed); Arthur L. Chapman, v.p., \$48,623 (none).

Hazeltine—Jack Binns, chairman, \$60,984 (4000); W. A. MacDonald, pres., \$60,859 (2000); J. B. Dow, exec. v.p., \$36,935 (600); L. B. Dodds, v.p., \$49,860 (100); F. Robinson, pres. of subsidiary Hazeltine Electronics, \$43,138 (none).

Zenith—E. F. McDonald Jr., pres., \$183,296 (41,893); Hugh Robertson, exec. v.p., \$173,296 (1388); H. C. Bonfig, v.p. & director of sales, \$96,763 (none); Joseph S. Wright, gen. counsel, \$43,125 (10).

CBS Inc.—(See Special Section, Vol. 11:13.)

Brig. Gen. W. Preston Corderman, chief of research & development div., Office of Chief Signal Officer, becomes Deputy Chief Signal Officer May 1 when Maj. Gen. James D. O'Connell advances from Deputy to Chief Signal Officer, succeeding Maj. Gen. George I. Back.

Topics & Trends of TV Trade: Four-vhf Washington, one of best markets for receivers since TV's earliest days, now more than four-fifths saturated, is subject of TV consumer survey as part of 1955 *Consumer Analysis* just released by *Washington Star*. With 322,611 family units (81.6%) owning a TV set in metropolitan area as of last Dec., up from 290,163 (76%) at end of 1953 and 260,571 (72.5%) at end of 1952, survey finds that RCA brand is owned by 21.7% of TV families; Admiral, 14%; Philco, 10.7%; Motorola, 9.9%; Emerson, 9.7%; Muntz, 5.3%; GE, 4.3%; Zenith, 3%; Westinghouse, 2.4%; Silvertone, 2.2%; DuMont, 2.1%; Magnavox, 2.1%; Capehart-Farnsworth, 1.8%; Hallicrafters, 1.5%; Crosley, 1.3%; miscellaneous, 8.5%.

Of the set owners, 14.3% bought set new in 1954, 20.1% in 1953, 31.3% in 1952. Among those planning to buy TVs in 1955, these are brand preferences given: RCA, 26.8%; Philco, 11.6%; Admiral, 10.9%; Emerson, 5.7%; Motorola, 4.8%; Zenith, 4.6%; GE, 3%; Magnavox, 2.4%; Muntz, 1.5%; DuMont, 1.1%; Westinghouse, 1.1%; miscellaneous, 3.3%. Some 24.8% indicated they didn't know which brand they would buy.

The *Star* is one of group of 20 newspapers which conducted similar surveys in their markets. Others: *Milwaukee Journal*, *Portland (Me.) Press Herald and Evening Express*, *Columbus Dispatch* and *Ohio State Journal*, *Cincinnati Times-Star*, *Indianapolis Star and News*, *Duluth Herald and News-Tribune*, *St. Paul Dispatch* and *Pioneer Press*, *Omaha World-Herald*, *Salt Lake Tribune & Deseret News*, *Seattle Times*, *San Jose Mercury and News*, *Sacramento Bee*, *Fresno Bee*, *Modesto Bee*, *Long Beach Press-Telegram*, *Honolulu Star-Bulletin*, *Phoenix Republic and Gazette*, *Oregon Journal*, *Newark News*. Chicago tube & set manufacturer Ulysses A. Sanabria (American Television Inc.) this week disclosed a 17-in. plywood table model, containing 9 tubes and operating without a transformer, which retails for \$77. Called "Ohm," the set also comes in "de luxe" version with aluminized tube for \$88, costs the dealer about \$67. Sanabria gave us this explanation for this lowest-cost-yet set, at a time when TV industry is complaining about high costs and low profits on TVs:

"First of all, we've cut our production expenses to the bone. We produce in our own plant virtually everything that goes into the set—tubes, cabinet, and so forth. Then we have no distributor cost because we sell direct to dealers, and to exclusive dealers at that." He said he expects to make \$10 profit on each set.

The lightweight set (under 50 lbs.) will be sold to dealers on consignment, with factory and dealer sharing advertising cost. Currently, Sanabria is looking for exclusive dealerships in key cities to handle not only his "Ohm," but also his "Universal" series, which starts with a 21-in. table model at \$99, and his DeForest line, ranging from \$170 to \$800. Current TV production is about 1000 a week, though plant has capacity for 1000 a day, he said. Company has own retail outlets in Chicago, Detroit, Los Angeles, St. Louis & Oklahoma City.

* * * *

Picture tube sales in first 2 months of 1955 totaled 1,726,485, valued at \$34,780,586, compared to 1,203,396 worth \$26,090,478 in first 2 months of 1954, reports RETMA. Feb. sales were 859,529 at \$17,119,568 vs. 866,956 at \$17,661,018 in Jan. and 645,715 at \$13,916,478 in Feb. 1954. Receiving tube sales in first 2 months totaled 76,476,558 valued at \$54,984,643, compared to 47,322,147 worth \$34,731,819 in first 2 months of 1954. Feb. sales were 38,526,796 at \$28,107,186 vs. 37,949,762 at \$26,877,457 in Jan. and 25,189,147 at \$18,319,819 in Feb. 1954.

DISTRIBUTOR NOTES: Raytheon discloses appointment of 21 new TV distributors during last few months: Mid-Atlantic Appliances Inc., Washington; L&P Electric Co., Brooklyn; Phillips Distributing Co., Baltimore; Universal Distributors, Kansas City, Kan.; Dunn & Menely Co., Oklahoma City; McCutcheon Distributing Co., Pittsburgh; Wholesale Appliance Co., Little Rock; Major Appliance Co., Dallas; Joyce Appliances Inc., Indianapolis; S.&E. Distributing Corp., St. Paul; H. W. Sinclair Distributing Corp., Houston; Lentz Enterprises, Phoenix; Reliable Brands Inc., Dayton; Cameron Co., Rock Island; Charles Ifeld Co. Inc., Albuquerque; Health Wholesale Co., Lubbock, Tex.; Radio Distributing Co., South Bend; Max Supply Co., LaCrosse, Wis.; Harris Radio Inc., Fond du Lac, Wis.; Superior Distributing Co., Sault Ste. Marie, Mich.; Oakman Electronic Supply Co. Inc., Rutland, Vt. . . CBS-Columbia establishes 6th factory branch, CBS-Columbia of Western New York, 165 Georgia St., Buffalo (Richard J. Levi, gen. mgr.); other branches are in N. Y., Boston, Detroit, Philadelphia & Dallas . . . CBS-Columbia appoints Midland Electric Co., 2125 Superior Ave., Cleveland; Electric Sales & Appliances Inc., 340 NE 75th St., Miami; Sacks Electrical Supply Co., 605 S. Main St., Akron; Long's Distributors Inc., 70 State St., Binghamton, N. Y.; Hills Gas & Appliance Co., 7th & Philadelphia St., Rapid City, S. D.; Grossman Distributors Inc., 185 Joseph Ave., Rochester, N. Y. . . Standard Electric Supply Co., Milwaukee (CBS-Columbia) promotes Erwin J. Merar to v.p. of major appliance div.; A. K. Sutton Inc., Charlotte (CBS-Columbia) appoints David F. Sigmon as operations mgr. . . Philco appoints J. H. Burke Co., Boston, replacing J. F. Leahy Co. . . DuMont appoints Harold N. Lieberman Co., 257 Plymouth Ave., N. Minneapolis (Harold Lieberman, pres.), which names B. F. Mondale as sales mgr. . . Admiral transfers Stuart P. LaBonde from Los Angeles div. to Anchorage as gen. mgr. of Alaska div. . . DuMont-Florida names Samuel Wagman sales mgr.

* * * *

What makes people buy TV sets? Question may be answered by Advertising Research Foundation, 11 W. 42nd St., N. Y., which is considering a survey to determine the motivations for purchase of a long list of consumer goods, including TV. ARF managing director Alcuin Lehman emphasized it's only an idea right now, being explored by an ARF motivation research committee headed by Dr. W. H. Wulfeck, Wm. Esty Co. Dr. Wulfeck told a meeting of the N. Y. chapter of American Marketing Assn. recently that his committee inherited the project from a group of men's magazines, which started and then dropped the plan. He stated: "The study will attempt to find out how consumers actually make purchasing decisions, who makes them, and how quickly. This is not a measure of advertising effectiveness, although advertising, of course, is one of the elements which goes into the making of buying decisions." He said he was encouraged by results of pilot studies in 6 or 7 markets designed to set up framework for questionnaire to be used in survey. ARF is a top-flight research organization with representatives of all media.

Raytheon TV-radio div. has started construction on new 203,874-ft. plant at North & First Ave., Melrose Park, Chicago, due for Sept. completion, which at outset will house all metalworking, painting & cabinet facilities, employing about 200. Plant doubles production capacity, will include automation techniques, will be operated in addition to offices and main TV-radio production facilities at 5921 W. Dickens Ave., about 3½ mi. distant.

With move of Emerson headquarters & plant to Jersey City (Vol. 11:14), subsidiary Emerson Radio Export Corp. (Max Abrams, pres.) and public relations dept. (Michael Ames, director) are now located at Plaza Hotel, 5th Ave. & 59th St., N. Y. (phone Plaza 9-3456).

Electronics Reports: "Golden Jubilee of Electronics" in 1956, industry-sponsored, to mark 50th anniversary of Dr. Lee DeForest's invention of the audion, will be considered by RETMA board at spring meetings April 12-14 at New York's Roosevelt Hotel. Proposed by Rear Adm. Ellery W. Stone, USN (Ret.), pres. of American Cable & Radio Co. (IT&T) and of "DeForest Pioneers," idea has backing of Gen. David Sarnoff, RCA chairman, as well as other key RETMA members.

Details haven't been worked out yet, but celebration basically would be similar to electrical industry's "Diamond Jubilee of Light" last year, which marked 75th anniversary of Edison's invention of incandescent lamp. It's also expected it would involve at least one big industry-sponsored show on TV and radio.

* * * *

Continuing trend toward diversification into electronics by non-electronic companies is exemplified by recent purchases by Textron American Inc. (formed by merger of Textron, American Woolen & Robbins Mills). The textile company's first expansion into electronics was purchase of Dalmo Victor Co., San Francisco manufacturers of radar and other military electronic gear. This week, Textron American purchased Ryan Industries Inc., Detroit manufacturer of airborne electronic equipment, whose 1954 sales totaled more than \$6,000,000.

United Shoe Machinery Corp., Boston, reports that TV-radio manufacturers have used its components inserting machines with more than 400,000 printed wiring boards in commercial receivers. It's now developing units capable of inserting 1-watt & 2-watt resistors; mica, tubular & disc capacitors; jumper wires; tube sockets; IF transformers. It claims equipment is highly flexible and reliability is better than 99.5%.

Freed Electronics & Control Corp., offshoot of old Freed Radio Corp., has been acquired by Fairchild Camera & Instrument Corp., which will operate it as subsidiary. Fairchild pres. John H. Clough said acquisition would give his firm "background position in ultrasonic display and storage and recording techniques as applied to radar photography and mapping."

Electronically controlled milling machine is being developed by Convair div., General Dynamics Corp. on \$1,128,000 Air Force contract. When completed in about 18 months, magnetic tape-directed mill is expected to save as much as 85% of the time now spent on some aircraft parts. It will be capable of producing aircraft dies or parts from engineering data fed into its computer "brain" on tape.

New long-range aircraft navigation aid, called "Navarho," revealed by Air Force this week, will be accurate within 10 mi. over vast area covering Azores to U. S. west coast and Arctic Ocean to Gulf of Mexico. It was developed at Rome, N. Y. Air Development Center, will be built at Camden, N. Y., near Lake Oneida.

American Bosch Arma Corp. personnel changes: Clifton T. Foss named v.p.-gen. mgr., Edmund D. Gittens v.p.-chief engineer, Clarence H. Hopper v.p.-manufacturing, all of Arma div., Garden City, N. Y.; Kenneth F. Leaman appointed v.p.-manufacturing, American Bosch div., Springfield, Mass.

Handbook on Defense Materials System (DMS), *The Defense Materials System in Our American Industry*, has just been published by Commerce Dept.'s Business & Defense Services Administration. It's on sale at Govt. Printing Office and Commerce Dept. field offices, 25¢.

Closed-circuit industrial and commercial TV installations now total 1200-1500, GPL district mgr. Robert H. Johnston told American Power Conference in Chicago this week.

General Precision Equipment Corp., reporting sales of movie equipment and supplies last year were highest in history and announcing quantity production of "most advanced system of automatic airborne navigation known to exist," reports 1954 net sales of \$123,332,634 compared to \$87,763,000 in 1953. Net profit last year was \$5,488,090, or \$6.49 a share on 934,174 shares of common outstanding, as against \$3,436,349 (\$5.09 on av. of 797,121 shares) in 1953. General Precision subsidiaries are: Ampro Corp., Chicago; Askania Regulator Co., Chicago; Bizelle Cinema Supply Corp., N. Y.; General Precision Laboratory Inc., Pleasantville, N. Y. (with Pleasantville Instrument Co.); Gricom-Russell Co., Massillon, O.; Hertner Electric Co., Cleveland; International Projector Corp., Bloomfield, N. J. (with Seco-matic Corp.); Kearfott Co., Little Falls, N. J. (with Kearfott Mfg. Co., Newark); Librascope Inc., Glendale, Cal. (with Minnesota Electronics Corp., St. Paul, Minn.); Link Aviation Inc., Binghamton, N. Y.; J. E. McAuley Mfg. Co., Chicago; National-Simplex-Bludworth Inc., N. Y.; Precision Technology Inc., Livermore, Cal.; Society for Visual Education Inc., Chicago; Strong Electric Corp., Toledo; Theatre Equipment Contracts Corp., N. Y.

Reeves Soundcraft Corp. and wholly-owned subsidiary, Bergen Wire Rope Co., had record consolidated net sales of \$3,747,810 in 1954 and net income after taxes of \$89,385. This compares with \$3,566,054 & \$284,301 in 1953. Licensees of its Magna-Stripe process for making Cinema-Scope release prints, pres. Hazard E. Reeves reported, now number 7—Columbia Pictures, Universal Pictures and Pathe Laboratories having been added last year. Fire at Bergen Wire Rope Co. in early 1954 hit sales. Year ended with earned surplus of \$470,258 as against \$380,737 at end of 1953. Bergen has constructed several radio towers, plans to make parts for TV, radio and microwave towers. Company retains 431,849 shares of common stock of Cinema Inc., which operates 18 theatres now, plans 8 more this year. It also is reported to be small stockholder in Saft Corp. of America, manufacturer of new type of sealed sintered nickel cadmium battery.

William B. Still, who in 1945 held experimental TV license for W2ZJT on Ch. 13 (then 230-236 mc) in Jamaica, L. I., where he made custom-built TVs, is now operating as Still Electronics Co., 4367 Papineau, Montreal (picture tubes); he claims to have developed TV set for autos that automatically won't operate unless vehicle is standing still with brakes applied.

New data processing center will be established by Sylvania on 30-acre site in Camillus, N. Y., near Syracuse. The center will gather, record, compute & classify variety of company-wide information on volume, sales, billings and other business data. Univac electronic computing system, leased from Remington Rand, will be used.

Latest TV gadget: Match-sized switch which turns TV or radio volume down 50% when telephone is in use, reported by an unnamed "Sunday inventor" to Minneapolis Honeywell's Micro Switch div., which annually conducts "idea exchange," seeking new uses for tiny switches.

L. W. Klein, exec. v.p. of Gabriel Co., named sales & adv. v.p. in coordination of all divisions, including antenna makers Ward Products & Gabriel Electronics, under 3-man exec. staff headed by Gabriel pres. John H. Briggs; Pat Leone named operations v.p., A. P. McDiarmid finance v.p.

Rear Adm. Malcolm F. Schoeffel, USN Ret., ex-chief of Navy's Bureau of Ordnance, joins General Precision Equipment Corp. as director of weapons planning, headquartered in Washington.

Robert Pappas, ex-Schaible Co., joins Ampex Corp., Redwood City, Cal., as quality control mgr.; John V. Zuckerman named mgr. of personnel & plant services.

Financial & Trade Notes: Among officers' and directors' stock transactions reported by SEC for Feb.: John B. Huarisa sold 3600 Admiral (Dec.), holds 101,731; Wallace C. Johnson bought 100 Admiral (Jan.), holds 2200; Irving B. Babcock sold 1500 Avco, holds 6397; Percy M. Stewart bought 1000 DuMont Labs, holds 2000; Wm. H. Miller sold 1510 Gabriel Co., holds 10,000; Howard C. Briggs bought 668 Hoffman Electronics (Jan.), holds 2000; Joseph S. McGee bought 250 Hoffman Electronics, holds 250; Charles M. Hofman sold 1600 Raytheon, holds 2969; Harold C. Mattes sold 5300 Raytheon, holds 10,234; Irving I. Schachtel bought 25,000 Sonotone, holds 27,500; Don G. Mitchell bought 111 Sylvania, holds 2561; R. E. Carlson bought 500 Tung-Sol, holds 1272; Mark W. Cresap Jr. bought 402 Westinghouse, sold 239, hold 1627; A. M. Robertson sold 300 Westinghouse, holds 200; C. S. Weber bought 211 Westinghouse, holds 793.

Collins Radio has filed SEC registration covering proposed offering of 122,500 new shares of \$50 par convertible preferred to stockholders through subscription warrants. Purpose of issue, says statement, is to finance redemption of preferred stock and to raise working capital. Prior to offering, company proposes to reclassify each share of outstanding common stock into 1½ shares of Class A and 1½ shares of Class B. New preferred is to be convertible into Class B shares thru May 1, 1956 and will be entitled to an annual sinking fund thereafter. Managing underwriters of new issue are Kidder, Peabody & Co. and White, Weld & Co. Collins recently reported earnings of \$1,495,572 (\$3.01 on 490,370 common shares outstanding) on sales of \$48,214,224 in 6 months ended Jan. 31, compared to \$1,476,406 (\$3.41 on 426,409 shares) on \$37,925,586 same period of preceding fiscal year (Vol. 11:13).

Olympic Radio earnings in 1954 more than quadrupled over 1953, while sales showed 3.8% gain. Profit was \$256,836 (59¢ per share) after taxes of \$204,295 on sales of \$18,350,453, compared to \$62,157 (14¢) after taxes of \$53,600 on \$17,667,485. Pres. Morris Sobin said Olympic had concentrated on sets "unique" to TV industry, had achieved a "dominant" position in 3-way combinations, and had given added impetus to second-set market with its 14-in. \$99.95 table model. At annual meeting in company's Long Island City offices April 25, stockholders will vote on resolution to increase authorized shares of \$1 par common from 500,000 to 1,000,000. It said it had no plans for added shares, merely wanted authorization.

Muter Co. and subsidiaries had 1954 consolidated net income after taxes of \$280,436 (39¢ a share on 721,450 outstanding) on sales of \$12,175,971, compared with \$447,463 (66¢ on 681,680 shares) on sales of \$15,190,004 in 1953. In notice of annual meeting April 19, it's disclosed that pres. Leslie F. Muter owns 115,566 or 16% of the 721,450 shares outstanding; Thomas White, pres. of subsidiary Jensen Mfg. Co., 13,457 shares. Only salary listed was that of Mr. White, who drew \$37,190 in 1954.

Erie Resistor Co. and subsidiaries, including Erie Resistor Ltd. (England) and Erie Resistor of Canada Ltd., in 1954 earned \$317,767 (88¢ a share) on sales of \$14,866,836. Domestic operations alone were \$9,101,544 sales, \$17,503 profit including \$149,852 dividends from foreign subsidiaries. In 1953 domestic sales were \$12,845,735, profit \$595,511. Earned surplus as of Dec. 26, 1954 was \$3,569,074.

National Union Electric Corp., whose CR tube div. was sold in Dec. to Sylvania for \$1,314,019, reports 1954 net loss of \$1,289,264 (74¢ a share) on sales of \$6,758,799 vs. 1953 net profit of \$166,458 (10¢) on sales of \$12,158,045. According to pres. & chairman C. Russell Feldman, Dec. 31, 1954 company had \$2,766,157 in cash or assets readily convertible to cash.

Atomic Development Mutual Fund Inc., Washington, D. C., open-end diversified management investment company specializing in securities relating to atomic science, headed by Newton I. Steers Jr., ex-AEC aide and ex-member of Electronics Production Board, offers 1,250,000 common shares at \$15.04 per share in recent prospectus. Listed in Jan. 31 portfolio stockholdings are these concerns closely identified with electronics: 2100 shares Sylvania, market value as of that date \$95,287; 3500 GE, \$174,125; 1700 N. V. Philips Gloeilampenfabrieken, \$72,675; 3800 Westinghouse, \$305,425. Among companies which process radioactive materials and manufacture radiation instruments or equipment, it lists: 1700 Abbott Laboratories, \$75,862; 1200 ACF Industries Inc., \$57,900; 15,000 Atomic Instrument Co., \$136,875; 13,100 Beckman Instruments, \$316,037; 3600 Blaw-Knox, \$101,700; 10,400 Consolidated Engineering, \$296,400; 98 General Precision Equipment (\$1 common), \$5831; 3200 High Voltage Engineering, \$56,400; 3800 Ketay Instrument, \$64,125; 21,000 Nuclear Instrument & Chemical, \$144,375; 1000 Panellit Inc., \$16,500; 4400 Tracerlab Inc., \$97,900; 9000 Victoreen Instrument, \$64,125. Fund's assets are largely invested in atomic minerals, principally uranium; it has Auchincloss, Parker & Redpath as investment adviser, lists total net assets of \$19,854,643 as of March 1; 1,429,420 shares were outstanding (\$13.91 per share) as of that date.

Teleprompter Corp. chairman Irving B. Kahn, reporting volume of business rose from \$308,361 in 1953 to \$533,661 in 1954 with net profit after taxes up from \$8129 to \$38,582, states in annual report to stockholders that volume for first 8 weeks of this year was almost double and net profit before taxes treble that of same 1954 period. Firm has renewed long-term contract with CBS, and last year signed similar one with NBC; its cueing machines are used in stations all over U. S. & Canada. Expansion includes new portable stage and "automation control" for stage effects. April 12 stockholders meeting will be asked to increase capital stock from 100,000 to 250,000 shares.

Guild Films calls special meeting of stockholders April 11 at Denver's Brown Palace Hotel to vote on proposal to increase authorized shares of 10¢ par value common stock from 1,000,000 to 2,000,000 "to place the company in position to take full advantage of business opportunities that may quickly arise in our rapidly developing industry." It's also proposed to increase directors from 5 to 7; new directors would be Aaron Katz, Guild v.p.-treas., and Julian E. Keilus, v.p. of Jacques Kreisler Mfg. Corp., N. Bergen, N. J. (jewelry). First annual report, for year to Nov. 30, 1954, showed net income of \$34,250 on sales of \$2,003,543; earned surplus was \$59,505.

Avco Mfg. Corp. earnings, including Canadian subsidiaries, dropped to \$579,445 (6¢ per share) on sales of \$70,266,747 in first 1955 quarter from \$1,695,699 (18¢) on sales of \$99,136,339 in same 1954 quarter, due to highly competitive consumer markets and reduced defense contracts. However, chairman Victor Emanuel reported, backlog of defense orders is about \$185,000,000.

Webster-Chicago Corp., despite record sales of \$31,746,046 in 1954, reports decline in earnings to \$564,198 (\$1.09 on 519,750 shares) from the \$927,162 (\$1.87 on 495,000 shares) earned on sales of \$27,757,899 in 1953. Pres. Norman C. Owen told stockholders that profits were retarded by heavy investment in developing and tooling for new tape recorders and phonographs.

Dividends: Webster-Chicago, 15¢ payable April 18 to stockholders of record April 8; Emerson Radio, 10¢ regular & 5¢ extra April 15 to holders April 4; General Instrument, 12½¢ April 16 to holders April 8.

Canadian Admiral Corp. in 1954 earned \$1,671,037 on sales of \$29,977,272; comparisons unavailable.

Color Trends & Briefs: Another effort to get back into the color picture is being made by Paramount Pictures' Chromatic TV Labs. Late next month, it plans to demonstrate receivers, using the 1-gun Lawrence tube, which it says can be produced for "under \$500"—compared with \$895 and up for other color sets.

No manufacturer has committed himself to make the tube or set, Chromatic pres. Richard Hodgson stated, but he believes demonstrations will evoke strong interest. He doesn't believe tube can be produced initially for less than the \$100 RCA charges for its tube, but he says the simple circuitry required is what makes lower cost of receiver possible.

Receiver will have 24 tubes vs. the 28 RCA will have in new series of sets due soon—but Hodgson says that the major savings are in fewer components, simple assembly and lineup. Sizes will be 21 or 22-in. rectangular, depending on availability of bulbs. He reports that quality is "darn good" and that "definition is higher than before."

The "under \$500," Hodgson stated, "doesn't mean \$495. We believe it will be substantially under that."

* * * *

TV sessions of SMPTE convention in Chicago's Drake Hotel April 18-22 will be held April 20, will include: color-monochrome integration, by Philip B. Laeser, WTMJ-TV, Milwaukee; Chromacoder, by Pierre H. Boucheron, GE; 3-V 35mm color camera, by W. F. Fisher & W. R. Isom, RCA; color images on black-&-white film, by Wm. L. Hughes, Iowa State College; comparison of color TV and color photography, by Donald G. Fink, Philco; characteristics of "perfect" TV lens and system, by Otto Schade, RCA; control of light intensity in TV projectors, by B. F. Melchionni & K. Sadashige, RCA; report of SMPTE TV lighting committee, by H. M. Gurin, NBC; film problems in TV news, by Spencer M. Allen, WGN-TV, Chicago; armed forces stations, by Lt. Col. Mel Williamson & Maj. Stanley E. Rodby.

"Y" channel is what GE has dubbed new system of sharpening monochrome reception of color transmissions (Vol. 11:4). New "Y" equipment was demonstrated to industry for first time during April 4-7 TV lighting symposium at GE's Nela Park, Cleveland.

Ampli-Vision community antenna equipment has been sold to 34 new systems, in addition to those listed in *TV Factbook No. 20*, according to systems engineer V. G. Rumbellow. A division of Paramount's International Telemeter Corp., Ampli-Vision reports new systems in these towns: Mena, Ark.; Burbank & Sacramento, Cal.; Sarasota, Fla.; Avery, Burke, Grangeville, Orofino & Pinehurst, Ida.; Havre, Helena & Whitefish, Mont.; Binghamton, N. Y.; Baker, Banana Valley, Coos Bay, Coquille, Cutler City, DeLake, Fossil, Hood River, Ione, Kinzua, La Grande, Nelscott-Oceanlake, Taft, The Dalles, Wecoma & Yachets, Ore.; Gatesville, Tex.; Pullman & Wishrem, Wash.; Rice Lake, Wis.; Thermopolis, Wyo.

Regional community TV antenna association formed last week, under aegis of National Community TV Assn., is Pacific Northwest Community TV Assn., organized in The Dalles, Ore. Pres. is Harley F. Steiner, v.p.-mgr. of Pacific Northwest TV, Lewiston, Ida. Prime problem of operators in area is illegal boosters (Vol. 10:47). One method of counteracting them is to extend community systems to marginal areas by getting potential customers to share costs of extensions. NCTA exec. secy. E. Stratford Smith discussed FCC's move against illegal booster operators through the issuance of cease-and-desist orders, violations of which are punishable by fines up to \$10,000 and imprisonment up to 2 years.

Impact of color TV on movies will be felt but will be of short duration, film pioneer Louis B. Mayer told dinner meeting of American Cinema Editors in Hollywood recently. Ex-MGM chief stated: "When Technicolor first became available to us, it was a great novelty, and people bought tickets just to see almost anything that was offered in color. . . . But the novelty soon wore off, and always it was learned that nothing ever takes the place of top entertainment values no matter how you dress it up." As for impact of TV generally, he said: "Aside from big sporting events, national or international spot news, I do not regard TV as offering any greater competition to the screen than radio did."

Upcoming network color schedules: NBC-TV—April 15, *Home segment*, 11-11:15 a.m.; May 2, *Producers' Showcase*, "Darkness at Noon," with Claude Rains, 8-9:30 p.m.; May 7, *Max Liebman Presents*, "Chocolate Soldier," with Eddie Albert, 9-10:30 p.m.; May 30, *Producers' Showcase*, "The Petrified Forest," with Humphrey Bogart, Lauren Bacal & Henry Fonda, 8-9:30 p.m. CBS-TV—April 14, *Showers of Stars*, "Ethel Merman's Show Stoppers," with Ethel Merman, Red Skelton, Peter Lind Hayes, Mary Healy & Harold Lang, 8:30-9:30 p.m.; April 17, *Sunday News Special*, one time, 11-11:15 p.m.

Field-sequential color system employed in Moscow is described in March issue of *British Wireless World*. Using call letters MOSTsT (meaning, in Russian, Moscow experimental color TV station), station uses 8.4-mc video bandwidth, 150 frames, 25 fields, 525 lines on 76-88-mc channel. It has 3 cameras and a field-slide scanner. Typical receivers have picture about 5½x4-in., 23 tubes.

Article on color and TV generally, is featured in March *New Englander*, published by New England Council for Economic Development, Statler Bldg., Boston. It cites progress of area's stations and manufacturers toward increasing colorcasts and making color sets & components.

April *American Artist Magazine* carries 7-p. feature on Maurice Evans' 2-hour color production of *Macbeth* last Nov. 28. It's titled "The Art and Artists Behind the NBC-TV Production, *Macbeth*."

RCA shipped 2 live color cameras April 4 to WOAI-TV, San Antonio.

Donald W. Reynolds' purchase of KOLO, Reno & KORK, Las Vegas, as companions for his KZTV, Reno (Ch. 8) and KLRJ-TV, Henderson-Las Vegas (Ch. 2) was approved by FCC this week. He paid \$150,000 for KOLO, \$50,000 for KORK, and agreed to reimburse sellers \$40,000 for not re-entering Reno market, \$10,000 for Las Vegas (Vol. 11:11). Other AM transfers approved were: Sale of 50% of WLOW, Portsmouth, Va. to Boston adman Emyl J. Arnold and Harold Kaye (50% of WORC, Worcester, Mass.); sale of KJAY, Topeka, Kan. for \$105,000 to ex-KOA, Denver salesman Robert Rohrs (Vol. 11:12) by S. H. Patterson, owner of KSAN-TV, San Francisco (Ch. 32) & KSAN.

John T. Cahill, senior partner of Cahill, Gordon, Reindel & Ohl, counsel for RCA-NBC, was host April 1 to anti-trust law section, American Bar Assn., at party in Washington's Sheraton-Carlton Hotel attended by top govt. & private lawyers, judges, RCA-NBC executives and their wives. Entertainment included rehearsal of next night's *Hit Parade*, piped via closed-circuit in color; Jimmy Durante in takeoff on anti-trust laws; filmed satire on TV; demonstration of RCA's new music synthesizer (Vol. 11:6)—with David Garroway as m.c.

Kit for converting film chain from iconoscope to vidicon is offered by GE at \$5250, plus \$1200 for optical multiplexer.

Network TV-Radio Billings

February 1955 and January-February 1955

(For January report see *Television Digest*, Vol. 11:11)

FEBRUARY network TV billings slipped somewhat from January records (Vol. 11:11) due to shorter month—but it was still one of the best months since the season began last fall and far ahead of same 1954 month. Publishers Information Bureau report shows CBS-TV billings were \$14,694,726, NBC-TV \$12,275,843, ABC-TV \$3,567,696, DuMont \$597,275, for total of \$31,135,540, which compares with \$33,462,855 in Jan. and \$22,944,158 in Feb. 1954. Jan.-Feb. combined billings of \$64,598,395 compare with \$48,000,606 in same 1954 months, auguring another record year.

Network radio, now running about one-third TV, was \$10,162,739 in Feb., down from \$10,785,181 in Jan. and from \$12,204,550 in Feb. 1954. All networks were down, and for first 2 months of this year they were more than \$4,500,000 behind same 1954 period. The Feb. PIB tables:

NETWORK TELEVISION				
	February 1955	February 1954	Jan.-Feb. 1955	Jan.-Feb. 1954
CBS	\$14,694,726	\$ 9,965,481	\$30,525,867	\$20,678,810
NBC	12,275,843	9,368,148	25,465,402	19,485,085
ABC	3,567,696	2,502,372	7,285,891	5,282,946
DuMont	597,275	1,108,157	1,321,235	2,553,765

* In order to maintain continuity and comparability with previously published data, an adjustment factor of 1.817 has been used by PIB in calculating gross network radio time charges for those nighttime network radio programs where ABC Rate Card No. 6 was in effect.

† Revised as of April 4, 1955.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers' Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 40%. However, they're generally accepted in the trade as an index.

FCC was accused of encouraging TV monopoly by Rep. Reuss (D-Wis.), in vigorous attack on Attorney General Brownell's 60-member committee which recommended anti-trust law amendments (Vol. 11:14). He accused committee of overlooking monopoly aspects of many industries, including TV, "where the Govt. itself is creating the cartels and the monopolies that the anti-trust laws are designed to prevent." He added: "In no field is monopoly more threatening today than in that of TV, where increasingly a few large networks and newspaper organizations are acquiring a stranglehold on the industry. The FCC, far from doing anything about this development, is every day doing its best to accelerate it. In TV, as elsewhere, the big get bigger and the independents go broke."

President Eisenhower has accepted invitation to address NARTB convention in Washington week of May 22. He'll greet broadcasters at 11:30 a.m. Tue. May 24, speaking informally for several minutes just after Keynote Award to *Louisville Courier-Journal* publisher Mark Etheridge, v.p. of WHAS-TV & WHAS, Louisville and onetime interim pres. of old NAB.

DuMont's "Electronicam," an electronic camera that simultaneously transmits a live TV show and records it on film (Vol. 11:6, 8, 13), will be demonstrated to newsmen for first time on Thu. April 14 at 2 p.m. in DuMont Telecentre, N. Y. With the camera, which can shoot high quality film versions of live TV shows in lieu of kinescopes, it's claimed movie scenes can be monitored immediately without waiting for rushes and TV prints can be delivered to other stations in a matter of hours. There's possibility that DuMont Network, now operating with considerably curtailed coaxial-microwave interconnections (Vol. 11:13), may evolve into a film network—although plans also include leasing the device to other networks, stations and film producers. Pending demonstration, DuMont executives will say nothing about their plans, but it's known they have been interviewing top industry figures with a view presumably to engaging one as gen. mgr. of new syndication setup. Among those interviewed was Ted Cott, recently resigned NBC v.p.

George Foster Peabody Awards for 1954, to be presented April 20 at luncheon meeting of Radio & TV Executives Society of N. Y. at Roosevelt Hotel: TV-radio news, John Daly (ABC); entertainment, George Gobel (NBC-TV); education, *Adventure* (CBS-TV); special awards, *Omnibus* (CBS-TV) & *The Search* (CBS-TV); youth, *Disneyland* (ABC-TV); national public service, NAM's *Industry on Parade*; regional public service, WJAR-TV, Providence, for coverage of "Hurricane Carol." Radio awards: entertainment, *Conversation* (NBC); education, *Man's Right to Knowledge* (CBS); contribution to international understanding, *Pauline Frederick at the U.N.* (NBC); local public service, KGAK, Gallup, N.M., for *The Navajo Hour*; music, Boris Goldovsky of Metropolitan Opera (ABC).

Nine New England TV stations—vhf & uhf—have banded together into regional "network," using off-air and microwave relays to carry 41 live telecasts of April 19-June 4 racing from Suffolk Downs. Televised weekdays will be first 2 races each day, with special stakes and handicaps on Saturdays. *Racing from Suffolk Downs* is produced by Universal Television Productions div. of Universal Research & Development Co., Boston, and directed by gen. mgr. Ted Pitman of WTAO-TV, Cambridge-Boston. Though every race won't be televised to home audience, TV monitors at the track will give spectators close-ups of all races, including those not carried by the stations.

Buffalo's WBUF-TV (Ch. 17), purchased by NBC last month in move to acquire second uhf outlet of own (Vol. 11:11), lost net of \$236,324 from its debut in Aug. 1953 to Dec. 3, 1954 and dropped \$12,196 more in Jan. 1955, according to statement filed with transfer application at FCC. NBC proposes to pay \$312,000 cash. Current assets were \$470,083 as of Dec. 31, including property & equipment worth \$40,000. Total liabilities & deferred income were \$627,354, including debts of about \$405,000. NBC states in application that it "will devote its full effort to establishing that a uhf station can survive in a market with 2 vhf."

WJIM-TV, Lansing, Mich. (Ch. 6) & WJIM now have FCC approval for change of name to Gross Telecasting Inc., permitting Harold F. Gross to proceed with plan for public stock offer (Vol. 11:13). It's first single TV station to do so, following pattern set by multiple owners Storer (Vol. 9:45) and Bitner (Vol. 10:48).

Gilmore N. Nunn, pres. of WLAP, Lexington, Ky. and head of group of radio stations and TV grantees, is representing North American broadcasters at 4th general assembly of Inter-American Assn. of Broadcasters which opened April 9 in Lima, Peru, bringing together broadcasters from 21 Latin American countries.

SUMMARY - INDEX OF THE WEEK'S NEWS—April 16, 1955

SUBSCRIPTION TV becoming cause celebre—Paramount seeking month's delay at FCC, NARTB taking stand against it, Zenith accusing networks (pp. 1 & 9).

COLOR SET PRICE CUT expected from RCA with introduction of new 28-tube set; newsmen shown RCA tube plant poised for 21-in. production upon demand (p. 3).

DuMONT PLANS FILM NETWORK geared to new Electroni-cam, combination TV & film camera system demonstrated for first time this week (pp. 4 & 7).

ARMED FORCES TV NETWORK from Iceland to Africa now serving 60,000 viewers with U. S. program fare, plans to expand from 4 to 10 outlets this year (p. 5).

DEINTERMIXTURE PROPOSALS deluge FCC, include request of WITV and Storer's WGBS-TV to make Miami all-uhf; Sacramento's KCRA gets Ch. 3 decision (p. 7).

ON SHOW BUSINESS FRONT: John Crosby's cracks at CBS provoke puzzlement; Republic's Mr. Yates arouses ire of theatremen for statements about TV (p. 8).

BIG SECOND-SET MARKET POTENTIAL pointed up in American Research Bureau survey showing mere 3.7% multiple-set ownership; low TV profits bemoaned (p. 12).

SPURIOUS RADIATION PLAN approved by RETMA board; use of seal on set to certify compliance with engineering standards may start in summer (p. 13).

ADMIRAL SALES DECLINE in first quarter, but full year is expected to show improvement over 1954; stockholders vote increase in authorized stock (p. 15).

SECOND HAWAIIAN SATELLITE under way, relaying signals 90 & 123 mi.; 2 more uhf quit in Des Moines & Allentown; notes on upcoming stations (p. 11).

ANOTHER TV INVESTIGATION proposed by FCC as comprehensive long-term study into all aspects of broadcasting, but lawmakers appear cool to idea (p. 10).

COLOR PROGRAMMING to be stepped up by NBC-TV with 4 major series plus daily daytime strip, new filmed color show and "exciting new uses" in sports (p. 15).

CRESCENDO IN THE SUBSCRIPTION-TV DEBATE: Maneuvering in subscription TV fracas is rapidly making subject a cause celebre -- to delight of its proponents and to consternation of its opponents who have long felt that best policy was to ignore it.

Month's delay in FCC's May 9 filing deadline will be requested, meanwhile, by Paramount Pictures' International Telemeter. Next week, counsel Arnold, Fortas & Porter will request postponement because Harry Plotkin, who has been handling case, will be out some 2 months for eye operation. Skiatron has agreed to delay, while Zenith has rejected it. It's likely networks will also reject it -- to avoid accusations that they're trying to block subscription TV. Meanwhile, the pay-as-you-look subject was a major topic on many fronts:

(1) NARTB 15-man board took firm stand against pay-as-you-look -- with only Paul Raibourn, of Paramount Pictures' KTLA, Los Angeles, dissenting, and John Esau, of uhf KTVQ, Oklahoma City, abstaining. (For board membership, see Vol. 11:13.)

(2) NBC-TV offered Zenith 15-min. free time on its 5 owned-&-operated TV stations to plug pay TV -- after Zenith sought to buy 1-min. spots on them.

(3) CBS-TV planned full-blown program on subject May 1, as promised, inviting Zenith pres. E.F. McDonald to speak for fee TV, and Victor Sholis, mgr. of CBS affiliate WHAS-TV, Louisville, to oppose it.

(4) Mutual set April 17 for radio debate, with Zenith counsel Joseph Wright on pro side, theatre exhibitor Trueman Rembusch con, plus Chicago Tribune TV-radio editor Larry Wolters -- with James W. McBurney, dean of Northwestern U school of speech, acting as moderator.

(5) Congressmen revealed pressures they're feeling, during conference with FCC this week, conducted to explore Commission's current activities (see p. 10).

(6) Washington's National Press Club debate between Zenith spokesman Millard Faught and theatres' Alfred Starr brought into focus some of major arguments, got heavy news coverage. (For details of debate, see p. 9.)

Pertinent portion of NARTB's statement reads as follows: "Allocations by

the Federal Govt. have been established during the last decade of free TV's growth in the U.S. The board does not believe that the public interest is served, if the promise of free TV now should be curtailed to provide a system of 'pay-as-you-see' TV. Over 34,000,000 families have bought sets on the assumption that service would be free and full. The premise of free entertainment over broadcast facilities has been established for more than 3 decades, through the unique development of radio broadcasting in this nation. That basic pattern should not be altered at the expense of the public." Board noted that "subscription TV could be provided by other means without detriment to unlimited public reception of the present system."

Reaction of Skiatron's Arthur Levey to NARTB resolution: "Once again we hear the voice of the entrenched interests crying out for the status quo while refusing to consider the public interest."

In offering Zenith 15-min. of free time, NBC said issues are so complex that it didn't believe 1-min. spots could deal with subject adequately. NBC added that if Zenith accepts, it will offer equal time to fee-TV opponents. In view of Zenith battle with CBS over toll-TV commercial, betting is Zenith will reject offer.

CBS-TV's program May 1 will run 5:15-6 p.m. EDT. In addition to the 2 main spokesmen, CBS has invited 2 panels to question speakers. Those invited to date are James Landis, Skiatron gen. counsel (pro) and exhibitors' Starr (con) -- with others to be announced shortly. Moderator will be Dwight Cook, who handles CBS Radio's "The Leading Question." Audience will comprise members of press. CBS's announcement of the program stated:

"In the light of recent interest in the question of pay-as-you-see TV and its importance to the more than 33,000,000 TV set owners who have a \$13.5 billion investment in TV sets, the CBS public affairs dept. will present industry leaders who have views for or against subscription television in a program designed to place those views clearly before the public."

* * * *

During the FCC's session with House Commerce Committee members, Rep. Moulder (D-Mo.) showed himself clearly in favor of pay TV, stating: "Many stations won't be able to survive without subscription TV. Without subscription TV, there will be only a few, large, powerful stations left in the country." Rep. Priest (D-Tenn.) said: "I'm being asked questions about it daily, not only by constituents but by other Congressmen. While I was home on vacation last week, I received 3 telephone calls on the subject." FCC Chairman McConaughy explained the procedural factors involved, indicating that decision can't come in mere few months.

There were other skirmishes going on at same time. Zenith's McDonald, fresh from Florida vacation, demanded investigation of CBS and NBC by Congress, FCC and Justice Dept., saying they're trying to block pay-as-you-look for fear of losing their "dominance and control" of TV. He said that it was "utter nonsense" to say toll TV would hurt free TV; that it would merely replace 3-4 old movies weekly.

Opponent Leon Gorman, mgr. of WABI-TV, Bangor, Me. implemented his views (Vol. 11:11) by sparking a New England Broadcasters for Free-TV. And there were more comments filed with FCC, including one from Gene O'Fallon, operator of KFEL-TV, Denver, who said: "The American people will buy toll-TV if it's right -- if it's wrong, it will fall by the wayside." He favors opening it to all stations.

Zenith ad agency MacFarland, Aveyard & Co., through chairman Hays MacFarland, told Commission pay-TV is "inevitable," will be a "boon to TV advertising." Dean of Illinois U undergraduate school, C.C. Caveny, wrote FCC that fee system would be a great instrument for spreading education. New book, written by Ira Kamen and published by Howard W. Sams Co., is a fervent plea for subscription TV.

* * * *

Only thing everyone was agreed on: Tremendous publicity barrage unleashed by Zenith, which sparked FCC inquiry and prompted current discussion, is worth millions in free advertising to Zenith, never a major TV and/or radio sponsor by comparison with set makers that lead it. Zenith reputedly ranks 6th in share of national TV market -- after RCA, Philco, Admiral, Motorola, GE.

NO LETUP IN COLOR DRIVE, PRICE CUT SOON: Despite public apathy, despite apparent industry indifference, RCA's prodigious effort to prime the color TV pump hasn't abated one whit -- and next move, implied but not stated, will be cut in price of set from \$895 possibly to \$695 or \$750. Reduction is expected to be announced at stockholders meeting May 3, about time of emergence of first new 28-tube receivers off production lines at Bloomington, Ind. plant.

RCA's faith and investment in color is so great that it will continue probing -- with prices, production and programs -- until it finds the point at which public and industry indifference can be breached.

Never was its determination more evident than at press briefing at Lancaster, Pa. picture tube plant this week. Big plant itself is visible evidence of the millions RCA has committed to color -- and the factory represents only a fraction of the color expenditure. Portion devoted to color is now being expanded from 50,000 to 132,000 sq. ft., and plan is to discontinue making black-&-white there entirely.

That RCA will be biggest beneficiary if color clicks, not only patent-wise but in sale of tubes and receivers, to say nothing of NBC network time, goes without saying -- for fact is that most of industry is leaving to it the job of proving that color can be sold now, if not to average consumer then at least to what pres. Frank Folsom calls the "Cadillac trade." Though RCA has called upon its licensees to join its effort to promote color, only a handful have heeded; everyone agrees color must come eventually, but not as to when, and there are as many opinions about "reasons why" as there are entities in the field.

Spokesman for one of RCA's toughest competitors put it this way: "RCA won't play a team game; it hogged the ball in the all-industry NTSC work on standards, it calls color an RCA invention, and it wants to carry the ball now. Let it -- and more power to it if it can hasten the day."

* * * *

Newsmen were invited to Lancaster for same purpose that tube customers were earlier (Vol. 11:10) -- to convince them that 21-in. round metal-cone tube is "it" for the visible future. RCA's point is that other types of tubes may eventually prove to be practical but that its tube is only one ready for 1-2 years or more.

Progress to date and prospects for future were outlined by W. Walter Watts, electronic products exec. v.p. Some 10-12,000 of the 21-in. tubes have been built. Present rate is 2500 monthly, to be stepped up to 25-30,000 monthly this year through installation of automatic machinery. Though 7-8 out of 10 tubes were rejected as imperfect 6 months ago, rate of rejects is now only 2-3 out of 10 -- and during best day in Feb., 6 out of 7 were good. Standards are constantly being raised; otherwise, rejection rate would be much lower now. RCA's confidence in tube's stability is so great, Watts said, that full one-year warranty is in effect.

All Watts would say about new 28-tube set, superseding 38-tube unit, is that "an announcement...will be made in the near future. The production of this new color receiver will be geared to public demand."

Referring to set & tube makers' visits to plant, Watts said: "Because reactions of those who have heard and seen our story confirm the soundness of our program, we felt that we could now invite you with sincerity and assurance to see for yourself that the key element in color TV -- the picture tube -- is 'off the ground.' Our plans are keyed to the tube program."

As for color programming plans for stimulating public demand, Watts described NBC-TV's prospective fall schedule (see p. 15).

* * * *

Continued savings in production costs of tube are in prospect. Color tube engineering mgr. C. Price Smith pointed out, for example, that metal cone is now made of chrome iron costing 47¢ a lb., but there's possibility of using mild steel costing 6¢ a lb. -- saving of \$6 in raw material for each bulb. Bulb is being supplied by I-T-E Circuit Breaker and RCA's own engineering products dept.

Improved performance is also in the works -- though tubes demonstrated showed exceptionally good color and black-&-white. Color operations mgr. Harry Seelen

noted possibility of improving brightness up to twice present 25-30 ft. lamberts through enlarging holes of mask which now blocks 85% of electrons.

Seelen went into great detail to emphasize why RCA feels present tube is the answer to color, as far into future as engineers can see. Choice of tube "was not an eenie-meenie proposition," he said. "We tried them all." Round shape was selected, he said, because it's least expensive to make -- "tools and everything else" are more economical -- as well as strongest and most stable. Metal is used because it's airtight, contains no vapors and can be processed faster than thick glass envelopes. Aim is to get bulb cost down to the \$8-\$8.50 of black-&-white.

Emphasizing RCA's belief that no other tube is ready or will be able to catch the RCA tube, Seelen analyzed 3 other types: (1) Projections. "These never overcame their limitations in black-&-white, aren't likely to do so in color." (2) Focus-mask types, like Chromatic's Lawrence tube. "The basic problems have never been solved -- in contrast, vibration, voltage breakdown, loss of screen area, stresses in the grid, etc. We tried it, abandoned it." (3) Sensing types, like Philco's so-called "Apple". "The concept is very nice, but it's too complex. It requires photoelectric devices, servomechanisms, etc."

"The industry has reached the stage," Seelen concluded, "where volume is the answer. Industry must get together and create the demand."

Five receivers were demonstrated, showing slides in color and black-&-white. Three used 21-in. round tubes, 2 had 22-in. glass rectangulars. Images on all were excellent. Particularly noteworthy was quality of black-&-white, and it's apparent that much effort has gone into improving black-&-white -- since it's now recognized that customers insist on using color set for both color and monochrome reception, won't stand for 2 sets in the room.

Receivers were rotated to show how earth's magnetic field impairs color purity of glass rectangular tubes much more than it does that of round tubes, which are shielded by metal cone.

RCA executives conceded that price of sets must drop before color can invade the mass market. But despite persistent questioning by reporters, they would not conjecture what the price should be. Asked to look into the future and predict when a \$300 color set might be marketed, v.p.-technical director Dr. C.B. Jolliffe said, "When the industry is making 5,000,000 a year."

DuMONT'S 'ELECTRONICAM' FILM NETWORK: Geared to new low-cost film production system, DuMont Network this week insisted the American TV economy can support a strong "4th network" right now -- provided it's a film network.

Some -- but not all -- of DuMont's near-future network plans were revealed at elaborate and impressive demonstration of long-heralded "Electronicam" combination TV & film camera (Vol. 11:6,8,13), shown for first time April 14 at N.Y. Tele-Centre to sponsors, agencies and the press. Using single lens and focusing system for both cameras, Electronicam produces theatre quality film, either black-&-white or color, at same time it shoots live TV show. (For description of system, see story on p. 7).

While Electronicam has many potential uses in making possible low-cost film production for theatres, industry, education, etc. -- as DuMont spokesmen are quick to point out -- the principal reason it was developed (by programming & production mgr. James L. Caddigan and DuMont engineering staff) is to serve DuMont Network with substitute for the kinescope, with quality equal to that of the best TV films.

"An entirely new concept of networking" will be based on Electronicam, DuMont Network managing director Ted Bergmann told the press -- and he outlined why this "new concept" is needed. Of nation's top 100 markets, he said, only 14 have 4 or more TV stations, 33 have 3, another 36 have 2, and 17 have only one each.

DuMont spent nearly \$3,000,000 last year for rental of coaxial and microwave connections, he said, but because of shortage of stations in many markets, it was able to get back only \$150,000 of this investment -- or 5%. In 1954, DuMont paid for interconnection facilities totaling 2800 station-hours of live time per week, but was able to use only 125 because of clearance difficulties. On the other hand, about 250 station-hours of DuMont programming were carried on kine each week.

"Thus the DuMont Network was two-thirds kinescope and one-third live," said Bergmann, "and any advertiser approaching it knew that his ratings and audience would in large part depend upon the quality of our teletranscriptions."

DuMont has already cut down its regular live network to New York-Washington only (Vol. 11:13), and Bergmann said there will be further curtailments until cable-microwave is used only for sports, news & special events. He invited the network's current advertisers to be first to use new system, beginning in about 2 weeks. The ones we talked to were enthusiastic, wanted to change over in a hurry.

What it will mean to them is this: Their programs will go on air live in New York, and onto high-quality film for use on other stations, at very little more than kinescope cost. Important angle of DuMont's new pitch is value of residual rights -- for re-runs -- enhanced by fact that shows can be filmed in color as easily as in black-&-white, at same time as they're being televised locally in monochrome.

Beyond this, DuMont Network didn't reveal plans. But presumably it intends concentrated campaign for more advertisers to use its live-film plan, and possibly to go into TV film production-syndication on its own. Of latter possibility, DuMont executives say only that they "don't know yet."

* * * *

One intriguing possibility of Electronicam is its potential use for re-runs of color telecasts. There's no reason why system couldn't be adapted to color TV camera, Dr. DuMont told us -- making possible delayed repeats and re-runs of color shows, heretofore restricted by color kine problems.

Another suggestion is production of color shows without color TV camera, by use of Electronicam's quick and efficient method of turning out filmed shows. Using TV techniques, filmed color show can be produced with black-&-white TV cameras and color film -- with processed color film ready for telecasting the following day.

While DuMont will be making a pitch to lease, license or possibly sell its system to other networks and stations and to film producers, Electronicam's future is not completely unclouded. Similar system was demonstrated several weeks ago in Hollywood by Al Simon, production supervisor for McCadden Productions (Vol. 11:13). And RCA has promised that its color & monochrome video tape recorder -- now said to be perfected -- will be put into practical use this year. It's expected that the announcement of its first commercial use by NBC will be made shortly.

ARMED FORCES' TV 'WHISTLING POSTS': American TV's least-known network is a film "chain" that spans oceans and continents from Africa to Iceland, carries nearly all the top-rated programs and has about 200 sponsors. Moreover, it unquestionably has the world's most loyal viewers, not to mention the "lowest cost-per-thousand."

It's the new Armed Forces Television Service -- in operation just a year, but already a seasoned and proven service. Today, it has but 4 outlets. By year's end, it expects to have 10 or more. Patterned after Armed Forces Radio Service, its purpose is morale and information for U.S. troops at isolated bases.

Its morale effects have become obvious almost instantly. At bases with TV outlets, cases of AWOL and "serious incident" (accidents, fights, etc.) have decreased markedly since TV came, and cooperation with the chaplain has increased.

For programming, AFTS depends principally on U.S. networks, TV film producers-distributors, sponsors and agencies -- for kines and films of stateside shows. The guiding spirit behind AFTS is Lt. Col. M.E. (Mel) Williamson, chief of TV branch, Office of Armed Forces Information & Education, onetime top TV-radio producer and account executive (ex-radio director Russel M. Seeds Co., Chicago, ex-west coast mgr. of old Lennen & Mitchell and old Geyer, Newell & Ganger agencies) who was called back into Air Force after wartime service in order to set up the network.

The military stations are low-powered installations, radiating 10-50 watts, thus serving only the bases and immediate surrounding area. Transmitters and other equipment have been supplied by RCA, Dage (with Gates) and Electronics Research Lab, Hollywood (Joseph Leaming). Technicians to operate and service the stations are selected from qualified personnel on each post. Programs are mostly on film, though stations also have live news, chaplains' talks, information features, local shows.

Receivers are purchased from the PX for dayrooms, barracks, officers' quarters and the homes of servicemen's families.

Obtaining and distributing stateside programs has been AFTS's biggest problem. Many sponsors and agencies were reluctant at first to give permission to use their shows -- though commercials are not deleted. While resistance of most has melted, a few are still holding out -- despite fact that it costs them nothing and gives them a big "plus" viewership, virtually a captive audience, which has access to most sponsors' products at the PX, others when tour of duty is completed.

AFTS already has some 60,000 viewers -- for whom TV is the main form of recreation and entertainment -- with only 4 stations in operation. These viewers see about 160 different shows -- ranging from Howdy Doody to Omnibus, and including Lucy, Milton Berle, Dragnet and Toast of the Town.

Last week, 72 hours of film & kine programming went out from New York to the network. Nearly every week sees an increase over the preceding one.

Cooperation of networks and most film distributors has been good. AFTS borrows prints, bicycles them from one station to another, returning them to the source when they've played the entire circuit. As the network increases in size, biggest headache will be distribution. AFTS's shoestring budget won't permit it to foot the bill for additional prints -- yet it's going to be nearly impossible to make-do with one print of each program for Uncle Sam's world-wide network.

Only AFTS installation in continental U.S. is pilot station AFL-TV at Loring Air Force Base, Limestone, Me., which began operation on Xmas Eve 1953, was formally dedicated the following July 4 (Vol. 9:52 & 10:27). The base is completely isolated, far from any other TV service.

Overseas operations are now on air at Keflavik Airport, Iceland; Lajes Field, Azores; Wheelus Field, Tripoli. Next is due at Thule, Greenland, May 1. Outlet at Dharam, Saudi Arabia, will follow. In planning stage are stations at Sonderstrom Fjord & Narsassuak, Greenland, and at Okinawa, Bermuda and Puerto Rico. All AFTS stations so far have been on Ch. 8, but Puerto Rico outlet may be first uhf -- in order to avoid any possible interference problems.

Details of planning and operation of Armed Forces' low-powered TV stations will be discussed by Col. Williamson and Maj. Stanley E. Rodby April 20 at SMPTE's semi-annual convention in Chicago's Drake Hotel.

Personal Notes: Don McGannon named operations v.p. of Westinghouse Broadcasting Co., in charge of new N. Y. offices to be opened in May in Chanin Bldg., 122 E. 42nd St., to which pres. Chris J. Witting and staff will move from 40 Wall St., along with engineering director Ralph Harmon and his staff from Washington and accounting & payroll staff from Philadelphia; Joe Baudino, exec. v.p., remains in charge of Washington office, with counsel John Steen's location not yet decided . . . Gerald C. Gross, asst. secy.-gen. of International Telecommunication Union, Geneva, onetime FCC executive, returned to his post in Switzerland this week after month in U. S., during which he underwent an operation . . . Louis Hausman, CBS v.p., re-elected treas. of Brand Names Foundation Inc.; Thomas F. O'Neil, pres. of General Teleradio & MBS, elected chairman of exec. committee . . . Patrick J. Goode, pres. of WNHC-TV & WNHC, awarded 1955 Gold Medal of New Haven chapter of Advertising Federation of America for distinguished service to city . . . Stanley B. Cohen, ex-FCC attorney, recently associated with Leo Resnick, joins Washington firm of Cohn & Marks . . . Sam Sharkey, ex-*New York Times*, named NBC news editor, reporting to news director Wm. R. McAndrew; John H. Thompson, from radio KNBC, promoted to mgr. of news & special events, NBC Pacific div., Hollywood . . . Ben Lochridge named CBS Radio eastern sales mgr., replacing Jack Overall, resigned; Robert Reitzel shifts from west coast to succeed Lochridge as Detroit mgr. . . . Harold G. Ross, ex-Wage Stabilization Board labor economist, joins NARTB May 1 as asst. to

Charles H. Tower, mgr. of employer-employee relations dept. . . . F. A. Wurster, ex-WABD & BBDO, named media director, Kiesewetter, Baker, Hagedorn & Smith, N. Y. . . . Edward J. Young, ex-WDTV, Pittsburgh (now KDKA-TV), named v.p. of TV packager Advertising Syndicate of America, Keenan Bldg., Pittsburgh . . . Bruce Eells promoted to western div. v.p., Television Programs of America . . . Chester MacCracken resigns as TV-radio production v.p., Doherty, Clifford, Steers & Shenfield; he plans to teach at U of Vermont . . . Ray J. Mauer, ex-Cunningham & Walsh, named TV-radio director, Geyer Adv. . . . Lewis Wechsler, ex-Emil Mogul and Young & Rubicam, joins TV-radio dept., Benton & Bowles . . . John Henry Faulk, N. Y. TV-radio performer, named v.p. of Texas Bestg. Corp., owned by Claudia T. Johnson, wife of U. S. Sen. Lyndon Johnson; he will have charge of public affairs for its KTBC-TV & KTBC, Austin, and KANG-TV, Waco . . . Don Becker, veteran radio writer-producer & onetime asst. gen. mgr. of WLW, Cincinnati, named NBC-TV gen. programming exec. in charge of coordinating daytime programs, reporting to George F. McGarrett, mgr. of daytime operations.

Robert E. Button, serving in office of Secy. of Defense on leave from NBC, joins U. S. Information Agency as deputy asst. director for broadcasting, replacing Edward F. Lethen, who has returned to CBS.

In format of legal summons, *Broadcasting-Telecasting Magazine* has issued invitations to reception it's tendering to FCC commissioners May 22, eve of NARTB convention.

DEINTERMIXTURE PROPOSALS continued to pour in on FCC in wake of its move to reconsider deintermixture in Peoria, Madison, Evansville & Hartford (Vol. 11:14), while one CP was issued in form of final decision to KCRA, Sacramento (Ch. 3) and an initial decision was rendered favoring Columbia Amusement Co. (theatres) for Ch. 6 in Paducah, Ky.

In awarding Sacramento decision to KCRA (Ewing C. Kelly, pres., 50%) over KXOA (Lincoln Dellar, pres. 100%), Commission had novel comment: "In this case, the evaluation is a clear-cut one, oddly enough, because of the remarkable evenness of the applications. The sole significant difference between the applicants is seen to lie in their past broadcast records. . . . Ordinarily we should expect to find such a slight preference outweighed by preferences on other factors in the final evaluation. This case is unusual in that there are no other such preferences."

Examiner Wm. Butts' choice of the theatre group in Paducah was predicated on his belief that grant to opponent WKYB-Sun-Democrat would "aggravate" concentration of mass media control in area. In addition, he liked theatre group's educational plans.

* * * *

Deintermixture proposals filed with Commission included a joint petition of Geo. Storer's WGBS-TV, Miami (Ch. 23) and Mortimer Loewi's WITV, Ft. Lauderdale (Ch. 17) to make entire area uhf by deleting channels 4, 7 & 10 from Miami and moving pre-freeze WTVJ to Ch. 39. Sweeping proposal includes statement by both stations that they "will be forced to discontinue operations immediately upon termination of their NBC and ABC network affiliations, which will occur shortly after the grant of either of the new vhf stations in the area."

Other deintermixture proposals: (1) KCCC-TV, Sacramento (Ch. 40) asked that area be made all-uhf or all-vhf by either giving it educational Ch. 6 or moving KBET-TV & KTRB-TV to uhf. (2) WJHP-TV, Jacksonville, (Ch. 36) sought educational Ch. 7. (3) WAIM-TV, Anderson, S. C. (Ch. 40) had unusual parlay to keep area all-uhf by shifting WSPA-TV, Spartanburg from Ch. 7 to Ch. 17, moving Knoxville's WTSK-TV (Ch. 26) to Ch. 7

and letting Columbia's WCOS-TV (Ch. 25) and WNOK-TV (Ch. 67) share Ch. 7.

Other allocations petitions: (1) By Star Bestg. Co., Alamosa, Colo., to shift Ch. 3 from Pueblo, Colo. (2) By radio WICH, Norwich, Conn., to move Hartford's Ch. 3 to Norwich. (3) By WANE-TV, Ft. Wayne (Ch. 69) to shift it to Ch. 21, moving channel from Huntington, Ind.

Commission initiated rule-making on proposals to permit KBID-TV, Fresno to shift from Ch. 53 to Ch. 18 or 30 and on conflicting proposals to add Ch. 10 to either Bunnell or New Port Richey, Fla. It turned down second effort of off-air WTOV-TV, Norfolk (Ch. 27) to get Ch. 13 assigned to nearby Princess Anne, Va.

* * * *

More time to build was granted WJRT, Flint, (Ch. 12) over objections of WFDF, Flint, and Butterfield Theatres; grantee was also authorized to move to site 20½-mi. northwest of Flint. It's expected latter will be protested.

WHUM-TV, Reading, Pa. (Ch. 61), was given authority to move main studio to transmitter site after station said it could save \$5000 monthly by doing so.

About 50 comments were filed at April 15 deadline on FCC proposal to limit stations to sites within 5-mi. of cities—with those in favor and those opposing running about half and half. All 4 networks opposed.

—■—

Deintermixture would be accomplished in Jackson, Miss. by merger of one of town's 2 vhf stations with its only uhf if FCC approves application by WSLI-TV (Ch. 12) for permission to sell 40% interest to WJTV (Ch. 25), owned by same interests as *Jackson Clarion Ledger* and *Daily News*. Plan is to increase WSLI-TV capital stock from 250 to 1000 shares, sell 400 to WJTV for \$176,000, remainder to be held by present WSLI-TV owners. Latter are Standard Life Insurance Co., which would hold 324 shares; T. B. Lanford & L. H. Sepaugh, who would hold 138 shares each. WSLI-TV in turn would pay \$175,000 for physical assets of WJTV, change its call to WJTV, while uhf channel would be dropped. Both stations, states application, have been operating at loss.

ELECTRONICAM, DuMont's combination TV & film camera system demonstrated for first time this week (see p. 4), has aroused the interest of at least one major Hollywood movie producer as well as TV film producers, advertisers & stations. As explained at demonstration, there are already 2 versions of the system—one for use in producing films through TV techniques, other for simultaneous telecasting and filming. Except for optical system, the units are identical.

Demonstration began with a showing of black-&-white and color film, of theatre quality, made by Electronicam—shot without retakes in the same time it took to view it. Then audience saw a scene being televised and filmed simultaneously, using the system. Though 16mm film was used, it was explained that 35mm can be used equally well.

As demonstrated, system used 3 camera chains, each with image orthicon TV camera head and film camera mounted side-by-side on same base and operating with common lens system. Light passing through lens is split into 2 parts, one to film and other to TV pickup tube. Single control focuses both TV and film camera. All 3 film cameras operate continually during the program, as do the TV cameras, and the director monitors and edits the show as it is performed, as in any live TV show.

In addition to the 3 films being exposed by the 3 cameras in system, an "editing master" is produced—merely a kinescope of the TV picture selected by the director during the shooting. This master shows which camera's

footages were chosen by director during the shooting, and it records wipes, fades, dissolves, scene shifts, etc. which appeared on the monitor. After film is processed, special editing device locks the 3 negatives from Electronicam system in synchronization with the "editing master" so that all can be run off slowly and inspected together at same time. The high-quality film then can be edited, using "master" kinescope as a guide.

System permits half-hour film to be shot in half-hour in contrast to Hollywood methods by which film may take days or even weeks to shoot. When used for film repeats of live TV shows, one advantage of system is the possibility of re-editing, using different shots from those which actually went over the air, if desired.

—■—

Amendment to "protest" section of Communications Act designed to obviate use of section merely to delay grants, while continuing to permit interested parties to "bring to Commission's attention bona fide questions concerning grants made without hearing," was introduced by Sen. Magnuson (D-Wash.) as S-1648, at request of FCC (Vol. 11:13).

Commercial Telecast Network is new closed-circuit TV packager with headquarters in N. Y., specializing in business meetings. President is Lloyd Durant, ex-Compton and Biow agencies; v.p. is Wm. F. Hogan, head of Wm. F. Hogan Assoc., communications engineering; H. Don Reynolds is secy-treas.

Telecasting Notes: The "new criticism," wherein columnists treat TV shows like the theatre, despite their evanescent and usually non-recurring nature, took an unusual turn this week when Herald Tribune Syndicate's widely published John Crosby column lashed out at CBS's program department for allegedly losing its old imagination and daring. Excepting only the CBS public affairs dept., which he called "superb" and which turns out its news and documentaries, the acidulous Mr. Crosby made some invidious comparisons with NBC—designed to make CBS executives squirm and NBC's chortle. He accused the CBS program dept. of being "sound asleep," took it to task for "doing radio shows poorly fashioned in the image of TV" and for mediocre TV shows . . . Such an indictment of a whole structure, rather than an individual show, had the industry buzzing this week, with lineup of sentiment about what you would expect—according to affiliations and personal loyalties. CBS executives were frankly puzzled by the curious takeoff against them, naturally wouldn't dignify it with formal rebuttal, though we're sure Crosby and his readers haven't heard the end of the argument yet . . . Friends of CBS were inclined to point to its consistent leadership in both TV & radio billings, its high program ratings and the continued demand for its time (especially TV) as a substantial if not altogether complete answer to Crosby. There's also the simple fact of the parent company's fantastic sales and earnings record (Vol. 11:13), to say nothing of fact that it achieved new high on N. Y. Stock Exchange this week . . . Theatre Owners of America pres. E. D. Martin, who happens to have some TV station interests, too (*TV Factbook No. 20*, p. 58) was quick to lash back at Republic Pictures pres. Herbert Yates this week for threatening to quit theatrical film-making in favor of more profitable TV (Vol. 11:15). Martin released sharply worded letter to Yates suggesting he make "more and better films" suitable to the trade rather than "heaping abuse" upon his customers; reminding him movies built his business and movie industry is still biggest customer for Republic's very considerable film processing business; and observing that "almost all other producers and distributors of motion pictures show a tremendous improvement and very profitable operations" based on theatrical movie and not TV business . . . Mr. Yates now says "Republic's production policy has been grossly misstated and was not authorized"—but newsmen covering stockholders meeting are in agreement that he told stockholders meeting Republic may decide within 60 days whether to quit theatrical filming entirely in favor of TV and film processing business (Vol. 11:15); now he states production policy remains unchanged, with 14 features and 6 special pictures scheduled for 1955. But his management is being challenged by dissatisfied shareholders group headed by Bernard E. Smith and represented by Leon, Weill & Ma-

honey law firm . . . Ever-astute Abel Green, editor of *Variety*, editorially comments that Yates' threat may be "one of those showmanship sharp barbs to jolt exhibitors and reawaken their economic support of Rep production. Certainly the present state of the picture business is too good for any such walkout" . . . The "flirting or mating" of pictures and TV, says Green, follows pattern of show business in the past: "New values are grafted onto old traditions. And in many ways for the better" . . . It's official at Warner Bros. now: Tieup with ABC-TV is along lines of Disney's (Vol. 11:12-14), and the GE-Liggett & Myers sponsorship of *Warner Brothers Presents* next season will embrace 39 pictures, each costing around \$75,000, and each keyed to theme of old film successes *Casablanca*, *King's Row* or *Cheyenne*. There will be new treatments and casts, with some 15 min. of each hour devoted to behind-the-scenes shots and movie plugs a la *Disneyland* . . . Warner's TV subsidiary, Sunset Production, headed by Jack M. Warner, son of studio's head, will have Gary Stevens in charge of production; first syndicate series will be half hour *Men of the Sky* . . . Despite exhibitors' lingering antagonisms, the film folk are cottoning up to TV openly now—a far cry from the belittlement, sometimes invective, of not so long ago. 20th Century-Fox's Darryl F. Zanuck tells N. Y. news conference, referring to his company's upcoming show on CBS-TV (Vol. 11:14): "The important thing is that we can reach 50,000,000 who now have TV sets in their homes, and through institutional advertising sell them on the idea of movie-going" . . . Warners' distribution v.p. Ben Kalmenson said its new TV program "makes available to the motion picture theatre the benefits of the greatest advance merchandising program ever conceived by this industry" . . . What the movie producers seem to relish especially is that TV may turn out to be prime outlet for unproduced or unsuccessful story properties, aside from adaptations of old film successes and quite apart from the probable value of the long-written-off oldies still residing in their vaults . . . CBS-TV film div. buys 20th Century-Fox's projected *My Friend Flicka* series . . . One more TV show going into motion picture production: Rod Serling's *The Rack*, played April 12 on *U. S. Steel Hour*, purchased by MGM which will star Glenn Ford and retitle it *Court Martial*; it's Serling's second to be purchased for the movies, other being *Patterns*, and it's MGM's second purchase from *U. S. Steel Hour*, other being last week's *Fearful Decision*. This week, CBS-TV, which shortly takes over *U. S. Steel Hour*, signed up for first purchase rights to all of Serling's new TV plays.

Foreign-language programming on WATV, Newark, now runs 25½ hours weekly. Latest is *German-American Hour*. Third Spanish-language show, *La Revista Hispana*, brings total in that language to 3½ hours weekly.

TV's coverage of Salk polio vaccine report April 12 was highlighted by 2100-mi. live remote by Los Angeles' independent KTTV (Richard Moore, mgr.), winner of several recent awards for outstanding programming, including *Variety's* "showmanagement" plaque this week (see p. 16). KTTV exercised its option for microwave lines—including only outgoing line from Ann Arbor to Toledo, which it made available to networks and other stations on pool basis—but picked up report with own equipment flown in advance to Ann Arbor. Richfield Oil of California sponsored 4-hour program, which was also fed by KTTV to San Francisco's KGO-TV, San Diego's KFMB-TV & Sacramento's KCCC-TV. Another feature of coverage was live closed-circuit telecast from Ann Arbor same evening in 58 cities via DuMont facilities under sponsorship of Eli Lilly & Co. Some 56,000 physicians and guests watched Dr. Thomas Francis Jr., director of National Foundation for

Infantile Paralysis' evaluation unit, detail clinical tests and answer questions. Within the industry, NBC stirred tempest by breaking release time on polio report, drawing criticism from Radio-TV News Directors Assn. Official release had been scheduled for 10:20 a.m. EST, but NBC flashed it on Dave Garroway's *Today* at 9:22 (8:22 in mid-west), stating it had notified affiliates to cut in after first being informed release would be before 9 a.m. EST. Network said it had tried unsuccessfully to get earlier release time restored, then decided to break story because newspapers had been carrying accurate stories of report's results for last 3 weeks.

New \$27,000,000 Bell System construction program, proposed in applications filed with FCC this week, includes addition of 2 TV channels & 1200 phone circuits to Dallas-Los Angeles route through conversion to "L3 Carrier" system.

SUBSCRIPTION-TV DEBATE at Washington's National Press Club April 14 between Zenith's Millard Faught and Tennessee chain exhibitor Alfred Starr, past pres. of Theatre Owners of America and co-chairman of Committee Against Pay-as-You-See TV, exposed what seems destined to become the major question:

Faught argued that pay system will add great new programs to the TV schedules without disturbing present free fare. Starr foresaw toll TV producing net result of forcing public to pay for what it now gets free.

Faught reiterated fee-TV proponents' basic premises—that new system will bring to the home first-run movies, Broadway hits, opera, championship bouts; that these won't hurt exhibitors or free TV because it will stimulate them to produce better products for larger and larger audiences; that more income to TV stations will mean great expansion in number of stations; that educational stations will move into break-even column because of payments from home students.

Zenith just wants a chance to try the system, Faught said, and is willing to risk own capital—renting rather than selling necessary equipment to public. "If the bold experiment fails," he stated, "it's our shirts. If it succeeds, fine. But in either case the public will have had a no-risk opportunity for the first time in broadcasting history to decide in advance where the public interest lies with respect to a new gadget."

Starr's thesis: "Subscription TV is absolutely pre-emptive," i.e., will replace free TV rather than supplement it. It would be pre-emptive in multiple-station cities as well as one-station towns, he said, because FCC couldn't refuse to give all stations equal competitive crack at the pay-TV audience. As for fee TV merely supplementing free TV, Starr asked: "Would anything the public really wanted to see remain free if it could be sold for a higher price?" He insisted all desirable programs would end up on pay basis.

Neither speaker had much to say about first-run movies—though it's obvious that success of pay-as-you-look system would depend very largely on their availability unless existing TV programs are converted to pay basis. Broadway plays, opera, sports, education, etc. would hardly seem capable of supporting a pay system. Faught apparently isn't sure pay-TV would get the movies, and Starr is afraid it might. Up to now, no major producer has indicated he would release his first-runs—or even his oldies—to subscription TV.

In question period following debate, Faught vowed that Zenith wanted no monopoly; that it would license others to make equipment; that "Zenith has no desire to go into the entertainment business." He said he didn't know what system of pay-as-you-look is best, but contended actual operations are required to learn answers—and "Zenith is willing to pay to find out. There's plenty of risk capital available. It would come in over the transom."

Starr stated that regardless of Faught's disclaimer, "I believe that the public is going to have to pay for the gadgets." He added, parenthetically, that the coin-operated system is the only practical method, technically.

When asked why theatres are so anxious to preserve free TV, on one hand, while capturing major fights, etc. for theatre TV, Starr said: "Theatre TV is limited—there are only 5,000,000 theatre seats in the U. S. Theatre TV doesn't pre-empt anything. It's private. The same system is available to subscription-TV proponents. Our objection is to the use of public facilities."

Grasping the political possibilities, Starr declaimed: "God help the Administration—any Administration—that sanctions this thing. The American people will rise up in revolution and take an axe to their sets."

Network Accounts: What should an advertiser do when his star performer's rating begins to slip? Leadership Panel of *Tide Magazine* (April 9) suggests: (1) Reduce frequency of his appearance. (2) Give him a better supporting cast. Majority (59%) of panelists believe popularity decline of TV performer is likely to affect sales of sponsor's products; 60% believe that if star delivers the commercial, his popularity decline is likely to have even worse effect on sales . . . NBC-TV reports gross billings of \$4,300,000 already on books for April-June quarter of *Today, Home & Tonight*; goal is \$4,900,000. Among advertisers signed for all 3 programs this quarter: International Shoes, Murine (eyedrops), Black & Decker (portable electric drills), Sawyer's Inc. (slide viewers), G. M. Scott Lawn Seed, Nesco Co. (frying pans) . . . Schick Inc. replaces Lucky Strikes as alt. sponsor (with Johnson's Wax) of *Robert Montgomery Presents* on NBC-TV starting in July, Mon. 9:30-10:30 p.m., thru Kenyon & Eckhardt . . . Mennen Co. to be alt. sponsor with Pabst of Wed. night fights on ABC-TV starting June 1, 10 p.m. to conclusion, thru McCann-Erickson and Kenyon & Eckhardt . . . State Farm Insurance Co. switches *Red Barber's Corner* from CBS-TV to NBC-TV starting May 13, Fri. 10:45-11 p.m., thru Needham, Louis & Brorby . . . Viceroy Cigarettes to sponsor Fri. 2-2:15 p.m. portion of *Robert Q. Lewis Show* on CBS-TV starting April 15, Mon.-thru-Fri. 2-2:30 p.m., thru Ted Bates & Co. . . . Bauer & Black (surgical supplies) buys Mon. 10:45-11 a.m. portion of *Arthur Godfrey Time* on CBS-TV starting June 6, thru Leo Burnett Co., Chicago . . . CBS signs 5-year contract for TV-radio rights to annual Gator Bowl football games in Jacksonville, New Year's Day.

Station Film Library Inc., 579 Fifth Ave., N. Y., new package firm headed by Harry Trenner, ex-Wm. Weintraub Co. TV-radio v.p., April 12 disclosed unique economy plan designed to reduce high cost of daytime film programming. It would give stations ownership and all residual rights to 2 complete 15-min. 5-days-a-week soap operas in return for donating air time for first runs. Trenner would then sell both time & program to advertiser as a single package, at a lower cost than paid for time-&-program separately. Stations would receive perpetual resale rights to film packages in exchange for carrying them on adjacent time segments for one year. Since shows are succession of one-week serials, each complete in 5 episodes with no continuity from one week to next, stations can sell them as re-runs shortly after they're shown for first time for Trenner's sponsor. Trenner says further that each 5-part story can be edited into one 30-min. drama, thus providing still another source of re-run revenue. Production of shows will begin shortly, he said, adding that a number of stations had already signed up. With him in new project is Richard Hubbell, ex-DuMont.

Station Films Inc. formed 2 years ago by Katz Agency, major rep firm, as buying and advisory service for member stations, will close down July 31—and reasons stated by director Robert H. Salk significantly point up changes that have taken place in film syndication in the last few years: "The film field is becoming generally stabilized. Syndicate film distributors are now well established. Their sales coverage is extensive, providing more stations direct access to their product. Feature film distributors have likewise become better organized. They are paying more for their films and investing more in distributing them. The quick-money chaps are now the exception rather than the rule. Stations can now expect to get the film they want by normal direct business negotiations with vendors."

N. Y. Herald Tribune plans Sunday TV magazine section starting May 15, edited by Al Davies.

ANOTHER TV PROBE was proposed to Congress this week—this one by the FCC, which wants to get into the act by conducting its own "comprehensive study of the economics and operations of the broadcasting industry as a whole," directed by non-governmental experts and probably lasting several years. Initial Congressional reaction was unenthusiastic.

Appearing before orientation session of House Commerce Committee, Chairman McConnaughey termed the \$80,000 approved by House for FCC's network inquiry (Vol. 11:14) "adequate as a starting point," but said FCC investigation shouldn't be confined to networks. "In the course of such a study," he added, "the role of the networks would, of course, be of great importance, but the role of the advertising and talent agencies, the sponsors, the film producers and distributors and other non-network organizations in the TV industry would necessarily play an equally significant role."

He said investigation "may have to continue over a number of years," would make use of outside experts. Joint Congressional resolution would be required to get it started. Comr. Hennock appeared before Committee at own request, calling FCC "the wrong agency to make the study" and urging an investigation "by this Committee, the Senate and by every other Committee."

Asked at week's end if he favored the FCC's proposed study, House Committee Chairman Priest (D-Tenn.) told us: "I'm not prepared to present such a resolution; first I would want to look over the possibility that there will be duplication [with the current Senate Commerce Committee investigation]." As to Comr. Hennock's suggestion, he said: "She has some ideas worth considering. It may be a job for a Congressional committee rather than the FCC. I haven't decided yet."

Chairman Magnuson (D-Wash.) of the TV-investigating Senate Commerce Committee was out of town and not available for comment, but a staff member said he is wary of any FCC investigation which would conflict with his Committee's current inquiry. Sen. Kilgore (D-W. Va.), who heads Judiciary Committee's monopoly subcommittee, still plans to look into anti-trust aspects of

Increase in allowable campaign expenditures to account for higher cost of TV was urged this week by chairmen of Democratic & Republican National Committees. Both testified before Senate Rules subcommittee on privileges & elections in support of bill (S-636) by Sen. Hennings (D-Mo.) to raise limit on expenditures by national political committee to \$12,300,000. Democratic Chairman Butler said present \$3,000,000 limitation was "unrealistic in view of the cost of TV," also suggested committee consider requirement "that reasonable and equal amounts of TV & radio time be provided free to each party in presidential election as a public service." He said Republican National Committee spent \$3,447,000 for TV-radio in 1952 campaign, Democrats \$2,573,000. Republican Chairman Hall said Hennings' proposal was enough to get along with. NARTB chairman Harold Fellows is scheduled to testify April 20; FCC Comr. Hennock, NBC v.p. Joseph Heffernan & CBS v.p. Earl Gammons, April 26. At April 13 meeting of FCC with House Commerce Committee, Reps. Dies (D-Tex.) and Moulder (D-Mo.) opined that political candidates should be charged less than other time buyers. Comr. Hennock, on stand at time, blurted: "You're entitled to free time, Mr. Congressman." Replied Dies: "I wouldn't go that far." Sen. Magnuson (D-Wash.), chairman of Senate Commerce Committee, has also come out for special rates or free time for political candidates.

Lima, Peru, opened first TV station April 10, eve of meeting of 4th Inter-American Radio Congress there.

communications, takes dim view of the FCC proposal. He's said to fear Commission might be trying to stall off any full-scale Congressional probe. Kilgore has named Joseph W. Burns, onetime govt. anti-trust lawyer, now member of N. Y. & Washington firm of Fulton, Walter & Halley, as general counsel and staff director of subcommittee which will look into all monopoly problems.

Group of strong NBC & CBS affiliates headed by P. A. Sugg, WKY-TV, Oklahoma City, and Walter J. Damm, WTMJ-TV, Milwaukee, meanwhile were planning to invade Washington next week to "talk over the whole situation" with Congressional leaders and FCC. They'll start off with visit to Senate majority leader Lyndon Johnson (D-Tex.), at 10:30 a.m. April 19, then see other Senators including minority leader Wm. Knowland (R-Cal.), winding up with dinner for FCC at Mayflower Hotel.

* * * *

Other developments at House Committee session:

Comrs. McConnaughey and Webster strongly opposed Harris and Hinshaw bills to limit height of TV towers. Comr. Webster accused military members of Airspace Subcommittee of taking "arbitrary" position in opposing all towers over 1000 ft. (Vol. 11:11).

Chairman McConnaughey asked for change in "protest" section of Communications Act, modification of section which "isolates" some staff members from commissioners, and right to levy small fines against non-broadcast users of radio spectrum who violate regulations. Chairman Priest said he would introduce required legislation on all 3 requests.

All commissioners were present except Lee. Comr. Hennock, in her separate statement, called TV "the worst monopoly in the history of this country," and claimed she was "behind an electronic curtain" which kept her views from Congress and the public. At outset of her testimony she aroused speculation when she said: "I almost feel as if I'm in a courtroom. I may soon be there—my term is about to expire June 30." She didn't elaborate, but it's generally expected she won't be reappointed when her term as a Democratic member terminates in about 10 weeks.

Dropping radio after leaving TV, owners of WROV, Roanoke (250-watts, 1240 kc, ABC) are selling AM & FM for \$45,000, subject to FCC approval. Moving to Roanoke are Burt Levine, ex-WCAN-TV, Milwaukee, holding 40%, and Joseph Goodman, 30%. Other new owners are Cy Blumenthal, 10%—Goodman's brother-in-law and operator of WCMS, Norfolk, also 39% of WARL, Arlington, Va.; Leon & Nidra Levin, 20% jointly. WROV-TV quit air July 18, 1953 after operating 5 months on Ch. 27 (Vol. 9:29), then applied for Ch. 7, but dropped out when Ch. 7 grantee *Roanoke Times & World News* (WDBJ) agreed to pay \$245,012 for assets of defunct WROV-TV (Vol. 11:6).

Transfers of KORK, Las Vegas & KOLO, Reno to Arkansas publisher Donald Reynolds, though approved by FCC last week (Vol. 11:15), were held up by Commission this week while it studied petition filed by KLAS-TV & KLAS, Las Vegas. Petition claims that Reynolds, who owns KLRJ-TV, Henderson-Las Vegas & KZTV, Reno and *Las Vegas Review Journal* along with other Nevada newspapers, has offered advertisers joint rates, rebates, free newspaper space, etc.

FCC approved \$162,000 sale of WMAK, Nashville (5-kw, 1330 kc, MBS) recently, from Frank W. Mayborn & Frank M. Farris Jr. (owning 75% & 25%, respectively) to Howard D. Steere group, operators of WKMI, Kalamazoo, Mich. Mayborn owns KCEN-TV, Temple, Tex. (Ch. 6) and radio KTEM there, publishes *Temple Daily Telegram* and owns 50% of *Sherman* (Tex.) *Democrat*.

SECOND SATELLITE of KGMB-TV, Honolulu (Ch. 9) got going this week—and inter-island setup is expected to be on program schedule week of April 17. KMAU, Wailuku, Maui (Ch. 3) is 90 mi. from Honolulu, while KHBC-TV, Hilo (Ch. 9) is 123 mi. from Maui; latter has been testing since late in March (Vol. 11:13). Hilo outlet's commercial debut depends on KMAU since it picks up KMAU signal with relay on NW side of Mauna Kea crater, then microwaves it to Hilo on other side of crater. KMAU has 2-kw RCA transmitter, 100-ft. guyed steel mast on Haleakala Crater, is manned by 3 engineers. Both satellites are under same ownership as Honolulu station, headed by C. Richard Evans; neither will publish rate card nor will KGMB-TV rates be increased, until "proved circulation" is determined. Rep is Free & Peters.

With 2 more uhf outlets quitting air, count of TV stations now is 429, of which 108 are uhf. Dropping out this week, as predicted, were outlets in Des Moines & Allentown.

"Hopelessness" of fighting vhf was cited by KGTU, Des Moines (Ch. 17) as it left air April 15 after 17 months of operation and loss of \$283,051. In letter to FCC, attorney Arthur W. Scharfeld, for Morgan Murphy-W. C. Bridges interests which also own WEAU-TV, Eau Claire, Wis. (Ch. 13), told how station gradually reduced losses during first few months, when its only competition was WOI-TV, Ames (Ch. 5), but stated advent of WHO-TV, Des Moines (Ch. 13) reversed trend. Prospect of Cowles' KRNT-TV (Ch. 8) in next 6 months or so worsens situation, he said. Letter assailed WOI-TV for failing to convert to educational operation though its representatives had said it would. In addition, it said, "KGTU has lost such commercial programs as may have kept it alive through the selling approach of other TV stations in the Des Moines area, which includes derogatory statements of uhf sponsorship and reception from KGTU." Station's decision to quit was also attributed to FCC's failure to grant request that it be permitted to shift temporarily to educational Ch. 11, for which educators haven't yet applied. Station will retain CP "in the event that there should be developments, now unforeseen but certainly hoped for, which would make it possible for the station to resume operations either on a vhf or uhf channel."

Stressing "temporary" nature of suspension, WFMZ-TV, Allentown, Pa. (Ch. 67) left air April 15, pres. Raymond F. Kohn attributing halt to failure of stockholders to fulfill pledges completely. Some \$75,000 out of \$300,000 in pledges is still due, \$47,500 of it from Allentown hotelman Samuel W. Traylor Jr., against whom station has filed suit. "We are by no means writing 'finish' to WFMZ-TV's telecasting," Kohn said. "Our experiences to date have proved conclusively that there is not only great need for local TV but also a tremendous interest in the type of programs we have presented." Station hopes to be back on air "during the more profitable fall and winter season."

* * * *

DuMont shipped 5-kw transmitter with camera and studio equipment this week to upcoming KLFY-TV, Lafayette, La. (Ch. 10), due about June 1; it also reports order for 25-kw transmitter, with tentative May 23 shipping date, to upcoming KTBS-TV, Shreveport, La. (Ch. 3).

In our continuing survey of upcoming stations, these are latest reports from principals:

KTBS-TV, Shreveport, La. (Ch. 3), now plans to be ready for start next Sept. 1, according to pres.-gen. mgr. E. Newton Wray, who says orders have been placed for DuMont transmitter & studio equipment, RCA antenna and 1051-ft. Truscon tower. Work on tower foundation at site of radio KTBS begins in 2 weeks, with tower due to arrive by July 4. It will be second local outlet, KSLA (Ch. 12) having begun in Dec. 1953. Rep not chosen.

KDLO, Florence, S. D. (Ch. 3, allocated to Watertown), granted April 6, hasn't ordered equipment or begun construction, but hopes to be on air by next Oct., according to 33 $\frac{1}{3}$ % owner N. L. Bentson. CP for KDLO is owned by KELO-TV, Sioux Falls (Ch. 11), which plans to have new outlet pick network schedules off air from KELO-TV. KELO-TV rep is Raymer.

WHIS-TV, Bluefield, W. Va. (Ch. 6), previously reporting May target (Vol. 11:9), now hasn't target date, but is installing 10-kw RCA transmitter, according to mgr. P. T. Flanagan, reporting for grantee *Bluefield Daily Telegraph*. Ideco 100-ft. tower is due to arrive in 2 weeks and RCA 6-bay antenna is scheduled for installation in 40 days. Base rate not set. Rep not chosen.

KFJZ-TV, Fort Worth (Ch. 11), has Aug. 1 test pattern target, Aug. 28 programming, reports v.p. Charles B. Jordan of Texas State Network, which also operates KFDA-TV, Amarillo and 4 Texas AMs. Construction of 1000-ft. Parkersburg tower is under way and 12-bay GE antenna is to be installed May 15. GE 20-kw transmitter, due June 1, is scheduled to be wired and ready by mid-July. Base hour will be \$600. Rep will be H-R Television.

KCOR-TV, San Antonio (Ch. 41), which had May target, now aims for June start as a Spanish-language outlet primarily. Last week FCC turned down its request to shift to Ch. 14 allocated to Seguin, Tex. (Vol. 11:15). RCA 1-kw transmitter is due shortly and installation of RCA pylon antenna on 558-ft. Truscon tower is scheduled in about 5 weeks, reports chief engineer Marvin L. Fiedler. Programming will be 90% Spanish, with Latin-American films and kines. Base hour will be \$180. Rep will be Richard O'Connell.

* * * *

CJON-TV, St. John's, Nfld. (Ch. 6), has 2-kw transmitter and rest of RCA "package" due to arrive in 4-5 weeks, plans July 15 test patterns, Aug. 15 programming, reports v.p. Don Jamieson. Dominion Bridge Ltd. is scheduled to start work early next June on 12-slot wave-stack tower-antenna at Kenmount Rd. site, 4 mi. from city. Dominion Office of Transport recently assigned Ch. 6 to CJON-TV, which originally had Ch. 2.

— z —

KTVI, St. Louis (Ch. 36) began programming April 9 using channel and facilities of old KSTM-TV, in shift from Ch. 54 in nearby Belleville, Ill., where it had WTVI call (Vol. 11:15). Fifteen new programs were premiered this week, including first Cardinal baseball games and 3 hour-long bowling shows. KTVI gen. mgr. John D. Scheuer has launched \$60,000 promotion drive, tied in with opening of Anheuser-Busch & Krey Packing Co. sponsorship of baseball, and states he expects to increase circulation of 317,000 uhf homes claimed for Ch. 36 to well over 450,000 by end of baseball season.

John E. Fetzer, who bought KOLN-TV & KOLN, Lincoln, Neb. in 1953 (Vol. 9:30, 34), has agreed to sell the AM (250-watts, 1400 kc, MBS) for \$60,000 plus an additional \$60,000 if it grosses more than \$200,000 first year and \$300,000 second year. Purchaser is Robert W. Frudeger, v.p.-gen. mgr. of WGIL, Galesburg, Ill., who is also adv. mgr. of *Galesburg Register-Mail*. Operator of WKZO-TV & WKZO, Kalamazoo, and of radio WJEF, Grand Rapids, Fetzer has A. James Abel managing his Ch. 10 TV outlet in Lincoln.

Application for satellite in Ephrata, Wash., was filed this week by owners of KIMA-TV, Yakima (Ch. 29) and satellite KEPR-TV, Pasco (Ch. 19). To operate on Ch. 43 with 13.3-kw ERP, it would rebroadcast KIMA-TV programs. FCC now has 163 applications on file (18 uhf). [For details, see *TV Addenda 20-N* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

SECOND-SET POTENTIAL & LOW-PROFIT BLUES: Tremendous market potential for second TV sets, increasingly important to trade as receiver saturation mounts (now estimated at 75% of U.S. families), is pointed up in new nationwide survey. It's by American Research Bureau Inc., and it shows that only 3.7% of all TV homes had 2 or more sets as of Jan. That means about 1,300,000 multiple-set homes at start of year.

Survey by ARB (National Press Bldg., Washington, James Seiler, director) is one of a continuing series, based on data secured in course of audience studies in all TV areas, and is sold to set manufacturers. In addition to national figures, it gives data for 29 selected markets, and rates the set manufacturers according to their share of those 29 markets and of U.S. market as a whole.

Some 10% of all TV families are expected to have second set by end of year. So heavily is industry training its guns on this market that trade research experts think they can sell some 2,200,000 second sets by end of year. Commenting on ARB's 3.7% figure, one marketing man said he'd hazard guess that that total was built up almost entirely during last year, as sets-in-use rose 6,000,000 to national total of about 35,000,000 as of March 1.

Survey shows set owners aren't waiting for receivers to become obsolete before turning them in. It reveals that the average age of all sets replaced in last 15 months was only 2½ years, though it's generally believed the average set has a life expectancy of up to 8 years. Survey also shows that 39.9% of all sets-in-use are 21-in., 39.1% are 16 or 17-in. and only 1.9% are over 21-in.

We were permitted by ARB to use only selected excerpts from the survey, which is replete with valuable data for the trade. For example, multi-set homes are most common in Washington, D.C., where 7.3 families in every 100 have 2 or more of them. But in Houston, less than 1% of TV families have them.

Cleveland led all cities in replacements -- 86.5% of sets they bought in last 15 months going to homes which already had a set. Chicago is next, with 82.2%, then Philadelphia 80.2%, Cincinnati, 79.4%.

Dayton is the city with greatest percentage of homes with second-hand sets. There, 11.3% -- or more than one in every 10 homes -- have a set which was obtained used. Nashville had lowest percentage of second-hand sets in use -- 2.4%.

These markets are covered in survey: Albany-Schenectady-Troy, Atlanta, Baltimore, Birmingham, Boston, Chicago, Cincinnati, Cleveland, Columbus, Dallas-Ft. Worth, Dayton, Detroit, Houston, Johnstown, Los Angeles, Memphis, Milwaukee, Minneapolis-St. Paul, Nashville, New Orleans, New York, Norfolk, Philadelphia, Pittsburgh, Dayton-Rock Island-Moline, Salt Lake City, San Francisco, Seattle-Tacoma, Washington, D.C. Different markets are covered in other periodic ARB surveys.

* * * *

Trade's anxiety about low TV profits was clearly manifested in corridor conversations at RETMA's quarterly meetings this week in N.Y. (for story on actions of its board, see p. 13). Nearly all set makers expressed satisfaction, even surprise, at high level of retail sales in first quarter (estimated at 1,800,000) but there was considerable anguish about continuingly declining profits.

"We seem to be on a toboggan in this industry when it comes to profit," said one. "There just doesn't seem to be any end to the skid. Everybody just wants low prices. I think the business of selling up into higher-priced sets has been a bust."

Another set maker said he was envious of auto industry. "Look at how they keep up unit sales and profits at the same time," he remarked. "They add another accessory, another gimmick, another new feature each year and kick up the prices. We seem to go the other way in TV. We strip down the sets and lower the prices."

Manufacturers generally expected another good retail sales year, however, low profits notwithstanding. Many thought retail sales would exceed 6,500,000, some

felt they would go above 7,000,000. One who went on record this week with an over-7,000,000 prediction was Philco financial v.p. Courtney Pitt, in panel talk at Drexel Institute, Philadelphia. He admitted that his prediction might be regarded by some as too high but remarked that "all of my predictions about annual volume in previous years turned out to be conservative." Retail TV sales last year were at an all-time high of 7,300,000.

* * * *

TV production started normal second-quarter downturn week ended April 8, totaling 150,453, compared to 163,746 preceding week and 163,042 week ended March 25. It was year's 14th week and brought output for year to date to 2,250,000, compared to about 1,625,000 in corresponding period of 1954.

Radio production totaled 275,849 (139,736 auto), compared to 287,740 in week ended April 1 and 300,568 in week before. For 14 weeks, output was 3,975,000, compared to approximately 2,700,000 in corresponding period year ago.

Topics & Trends of TV Trade: RETMA's plan to reduce spurious radiation (Vol. 10:14, 34) got final approval this week at quarterly meeting in N. Y. April 12-14—and prospect is plan will get under way this summer. Radio-TV Industry Committee headed by H. L. Hoffman approved pres. Glen McDaniel's proposal whereby set manufacturers, whether or not RETMA members, will affix seal to their receivers attesting that they conform to RETMA engineering standards.

RETMA will set up special committee shortly to administer program, which was recommended by GE's Dr. W. R. G. Baker, director of RETMA engineering dept. & chairman of special committee on spurious radiation. Under plan, a manufacturer merely certifies in writing that his set conforms to standards. Original proposal to set up industry-wide certification lab has been sidetracked, principally on objection of larger manufacturers who have own labs and contend it would prove costly duplication.

Committee admittedly would have no power to inspect or police sets to enforce compliance. It would, however, investigate any complaints that a manufacturer who uses seal is not complying with regulations.

* * * *

RETMA board took these actions this week, subject to approval of full membership at June 14-16 convention in Chicago: (1) Approved realignment of administrative structure to separate further its TV-radio and electronics activities, including establishment of new military products div. (2) Created new "special member" classification for companies with minor interest in electronics. (3) Approved participation, along with NARDA and National Assn. of Electrical Distributors, in National Radio & TV Week beginning Sept. 18. (4) Authorized chairman Max Balcom to establish special committee to consider sponsorship of "Golden Jubilee of Electronics" in 1956 in observance of 50th anniversary of invention of grid audion by Dr. Lee DeForest (Vol. 11:15).

Magnavox will continue price maintenance policy with its exclusive dealers regardless of whether fair trade laws are repealed, says pres. Frank Freimann, whose products are fair-traded direct to dealers. In a formal statement, he said he supported fair trade in principle but observed that laws alone won't prevent "jungle warfare selling," especially if they're not enforced. Meanwhile, the Senate Small Business Committee this week postponed for 10 days its consideration of report of top-flight 60-man National Committee to Study the Anti-Trust Laws, which recommended repeal of all fair trade laws (Vol. 11:14-15).

New Sears, Roebuck spring catalog reduces 21-in. vertical chassis table model from \$138 to \$130, retains 17-in. vertical chassis table model price leader at last year's \$118 list.

Trade Personals: Edward R. Taylor, marketing v.p. & asst. to pres. Paul V. Galvin, and Walter B. Scott, v.p. for manufacturing, consumer & military products, this week nominated to Motorola board of directors for election at annual stockholders meeting May 2; Taylor this week also elected chairman of Brand Names Foundation Inc. . . . Robert C. Sprague, chairman, Sprague Electric Co., and Mrs. Sprague sailed last week for 6-week vacation in Europe . . . Alfred E. Bourassa named CBS-Hytron merchandising coordinator . . . Carl J. Harshbarger, ex-Westinghouse Atlanta district mgr. for TV-radio, joins Kay-Townes Antenna Co., Rome, Ga. as gen. sales mgr. . . . Edward F. Miller appointed mgr. of Stromberg-Carlson's new value analysis dept., to investigate materials & products used by all divs. . . . John W. Wenrich, ex-Philco Distributors, Philadelphia, named accessory div. mgr., Washington office . . . Seymour Lipper, ex-Emerson, named Olympic Radio sales administration mgr. . . . Brig. Gen. David Sarnoff receives 1955 gold medal of Williamsburg settlement, which aids N. Y. underprivileged, at dinner at Waldorf-Astoria, May 15 . . . Wm. J. Barkley, Collins Radio senior v.p., retires April 30 after 48 years in the industry.

DISTRIBUTOR NOTES: Admiral appoints Electric Appliance Distributors Inc., 908 Green Ave., Altoona, Pa. (H. Paul Good, pres.) . . . Capehart-Farnsworth appoints Roger & Wood Co., 2500 W. 6th St., Los Angeles (Kenneth Rogers, pres.), replacing Graybar . . . DuMont appoints O'Day Equipment Co., Fargo, N. D., replacing Cook Appliances Inc. . . . Crosley-Bendix names Grabell-Lyons, Middletown, N. Y. . . . Sentinel Radio appoints Main-Line Distributors Inc., Chicago (A. S. Gourfain, pres.) . . . Griffith Distributing Co., Peoria (Admiral) appoints Richard J. Van Osdol sales mgr. . . . Emerson Radio of Virginia Inc., Richmond, appoints Barry Goodman gen. mgr. . . . Graybar names J. T. Kinney operating mgr. of Houston branch, succeeding L. A. Peterson, now Jackson, Miss. branch mgr.; A. N. Swanson named mgr. of Corpus Christi branch . . . Hoffman Sales of Los Angeles appoints Frank Fern sales mgr.

Admiral dealers offered one share of Admiral stock (which closed April 15 at 26¾ on N. Y. Stock Exchange) for each group of 5 TV receivers, including at least one new 24-in. model, they sell between April 15 and May 12. Shares will come from personal holdings of pres. Ross Shiragusa (249,156 shares) in novel plan to hypo spring sales while inducing franchised dealers to own part of the company.

— ■ —

Frank A. Hiter, 63, senior v.p. of Stewart-Warner Corp. and onetime director of old RMA, died April 9 in Chicago's Wesley Memorial Hospital.

Electronics Reports: Up to half the cost of a modern military aircraft is represented by electronics, and diagram prepared by Sprague Electric Co. helps to explain why. Included in Sprague's annual report (Vol. 11:13), diagram shows heavy bomber uses about 5000 tubes, 115,000 capacitors & resistors; radar observation plane 3000 tubes, 60,000 capacitors & resistors; patrol bomber, 1200 & 20,000; fighter, 600 & 9000.

Breaking down uses of electronics in hypothetical "large military plane," chart shows 200 tubes and 1500 capacitors & resistors used in communication equipment. Other electronics equipment in "typical" aircraft, and their complements of tubes and resistors & capacitors: Navigation system, 500 & 8000; flight planning (automatic flight plan computer and electronic fuel gauges), 1000 & 20,000; gun fire control, 500 & 20,000; observation (identification radar, sonar gear, etc.), 1500 & 30,000; plane power & control (motors for compressors, dynamotors, jet ignition systems, etc.), 100 & 1500; photography (uniform camera control), 200 & 4000; missile direction, 1000 & 30,000.

* * * *

"Tacan" is latest aircraft navigation aid unveiled, IT&T stating that compact radio device (occupying space 7x10x15-in.) has azimuth accuracy of 1 degree, distance accuracy of .2 mi. IT&T reports that device, under development for Navy since 1948, is now in large scale production by subsidiary Federal Telephone & Radio Corp. Stromberg-Carlson and Hoffman Radio are also producing it, and IT&T plans to license others. "Tacan differs from other aids," IT&T says, "in that it is an integrated navigation system rather than a conglomeration of separate, unrelated navigational aids, such as has been available to the aviation industry in the past." Air navigation systems have been subject of 2-month congressional study. At issue is military's insistence that Tacan be made the standard military & civil air navigation system, as opposed to civil aviation industry's insistence on retaining current systems.

Purchase of electronics business of Brown-Allen Chemicals Inc. by Hupp Corp., Cleveland (Vol. 11:10), is virtually assured, Hupp annual report revealed this week. Negotiations with Brown-Allen "currently contemplate" initial payment of \$250,000 cash, or by assumption of liabilities, plus 125,000 shares of Hupp common stock and contingent additional payment during next 5 years through issuance of not more than 120,000 common shares based on, and payable from, net earnings of electronics div. Brown-Allen's electronics properties include Standard Piezo Corp. (crystals) and Standard Transistor Corp., Carlisle, Pa., and Allied Mfg. Corp., West New York, N. J. (TV components).

Hugh Pruss appointed chief engineer, Audio Products Co., Los Angeles.

New study course for amateur radio enthusiasts—including code records, theory, license manual and all information needed for amateur license exams—is available from RETMA for \$10. It contains illustrated study sections on theory lessons, plus questions & answers, rules & regulations, equipment operation, actual on-the-air techniques. RETMA brochure *Gateway to a Career*, which further describes course, is available free on request.

Transistorized auto radio, in experimental stages, was described at AIEE meeting in St. Petersburg, Fla. by RCA research labs' Larry A. Freedman, Thomas O. Stanley & David D. Holmes. Radio has 9 transistors, uses 1/10th the power needed by conventional auto radios. Performance was said to be equal that of regular car radio—operating directly from 6-volt battery without vibrator, power transformer or rectifier.

A nationwide private electronic communication system, covering 12,000 mi. and linking 51 cities, will be set up by Western Union to link Sylvania's plants, labs, sales offices, warehouses, executive offices and divisional headquarters with new data processing center to be constructed at Camillus, N. Y., near Syracuse. Heart of center will be Univac machine, leased from Remington Rand, which will be used for company-wide data processing—gathering, recording, computing and classifying of wide variety of information concerning production volume, sales, billing, etc.

Tiny semiconductor battery activated by either light or radioactive source was described by RCA research labs scientists during this week's AIEE meeting in St. Petersburg, Fla. Silicon device has been used to operate low-power AM radio in average room light. A major use visualized was as power source for transistorized devices which require little power.

Wm. Dubilier, who started inventing at age of 12 and now has 500 patents to his credit, will be honored by Cooper Union Alumni Assn. with the first Gano Dunn Medal for "outstanding professional achievement." He's v.p.-technical director of Cornell-Dubilier, whose business is founded on one of his inventions—the mica capacitor.

Electronics industry's sales volume in 1955 will be "appreciably higher than the record of \$9.25 billion established in 1954, RCA home appliance div. v.p.-gen. mgr. John W. Craig told Michigan State College symposium April 12.

Specifications control system for manufacture of electron tubes is described in report by Wright Air Development Center, *Military Control Specifications for Electron Tubes* (Report PB 111561), available for \$1 from Office of Technical Services, Commerce Dept., Washington.

Maj. Gen. Francis H. Lanahan, USA Ret., elected v.p. & gen. mgr. of Federal Electric Corp., Clifton, N. J. (IT&T). He was wartime Chief Signal Officer of SHAEF, commanding general of Signal Corps Center at Ft. Monmouth, in 1951 was first Chief Signal Officer of SHAPE.

Western Union has acquired one-third interest in Microwave Associates Inc., Boston, which has been part-owned by American Broadcasting-Paramount Theatres Inc. since 1952. Latter now has one-third interest. Electronics firm is headed by Dana W. Atchley Jr.

Datamatic Corp. is new firm being set up jointly at Waltham, Mass. by Minneapolis-Honeywell (60%) and Raytheon (40%) to engineer and market high-speed data processing systems for business and Govt.

Manual of practical transistor applications, *28 Uses for Junction Transistors*, has been published by Sylvania, available for 25¢ at 1100 Main St., Buffalo.

General Transistor Corp., Jamaica, N. Y., sets up international div. at 15 Moore St., N. Y.

RETMA's 1955 Medal of Honor for outstanding contribution to industry goes to Leslie F. Muter, pres. of Muter Co., Chicago, treas. & past pres. of RETMA, which he helped organize in 1924. Award will be presented at RETMA's annual convention June 14-17 at Chicago's Palmer House.

Bendix Radio adds 3 low-priced 21-in. table models in what gen. sales mgr. Hodge C. Morgan calls "an open bid for the growing replacement and second-set market in the vast metropolitan areas, where we have been weakest." New models are in ebony metal at \$140, mahogany grain-finish metal \$150 & \$170.

Trav-Ler Radio adds 21-in. open-face mahogany console at \$180, blonde \$190. Pres. Joe Friedman said company's current TV production is about evenly divided between table models and consoles.

Financial & Trade Notes: Admiral Corp. sales were approximately 12% lower in first 1955 quarter than in same 1954 period and earnings are expected to be similarly lower. For full year, however, pres. Ross Siragusa told stockholders meeting April 14, a 5% to 10% increase in sales can be expected and earnings should be somewhat higher. In first 1954 quarter, Admiral's sales were \$55,977,562, down from \$69,191,849 in 1953 quarter; earnings were \$1,504,044 (64¢ per share), down from \$3,056,878 (\$1.30) in 1953 period (Vol. 10:20).

TV-radio shipments were higher last quarter, Siragusa said, but military production was down 65%. New TV line will be introduced in latter June, will contain automatically-assembled printed circuit panels equivalent to more than 75% of all wiring in chassis. Pioneer in automation, Siragusa said some of nation's largest manufacturers are interested in using Admiral-developed equipment which may be built and leased to industry. "This field," he said, "could provide the company with additional income."

Stockholders approved increase in authorized \$1 par stock from 2,400,000 to 3,000,000. Some of the 600,000 additional shares may be used as a stock dividend, and some exchanged for assets or stock of other companies.

* * * *

Add 1954 officer-director compensation listings as published in Vol. 11:15: **Motorola**—Paul V. Galvin, pres., \$82,500 (owned 103,303 shares beneficially as of Feb. 2, 1955, plus 186,696 held in trust, plus 13,117 held by wife, totaling 15.66% of outstanding shares); Robert W. Galvin, exec. v.p., \$55,000 (156,557, plus contingent interests in trust, plus wife's holdings, constituting 18.53% of outstanding shares); Daniel E. Noble, v.p.—communications & electronics div., \$55,000 (5866); Frank J. O'Brien, v.p.—purchases, \$55,000 (5814); Elmer H. Wavering, v.p.—engineering, \$55,000 (20,900); Edwin P. Vanderwicken, v.p.—finance & treas., \$55,000 (300); Edward R. Taylor, v.p. & asst. to pres., \$65,000 (1860). **Stromberg-Carlson**—Robert S. Tait, pres., \$58,150 (4455 shares); Gordon G. Hoit, exec. v.p., \$42,497 (1080); William Fay, v.p. in charge of broadcasting div. (WHAM-TV & WHAM), \$34,868 (511).

Trav-Ler Radio Corp. sales in first quarter of 1955 were about equal to the \$4,780,000 volume in first 3 months of 1954, pres. Joe Friedman told newsmen after company's annual meeting this week. He said company had no military business in first quarter, compared to 25% year ago. Trav-Ler recently reported full 1954 earnings of \$241,000 (32¢ per share) on sales of \$16,347,000, compared to \$412,257 (54¢) on \$14,669,624 in 1953 (Vol. 11:13).

Famous Players Canadian Corp., which is Canada's biggest operator of movie theatres and owns 50% of CKCO-TV, Kitchener (Ch. 13) and 25% of CFCM-TV, Quebec City (Ch. 4), last year had net income of \$3,384,825 (\$1.95 a share) compared with \$3,611,005 (\$2.08) in 1953.

Aircraft Radio Corp. earned \$576,127 (\$2.05 a share) on sales of \$8,460,347 in 1954, compared to \$390,611 (\$1.40) on \$9,424,869 in 1953.

American Phenolic Corp. had net profit of \$679,491 (\$1.70 a share) in 1954 vs. \$801,223 (\$2) in 1953.

Dividends: Magnavox, 37½¢ payable June 15 to stockholders of record May 25; Indiana Steel Products Co., 22½¢ June 10 to holders May 25; Avco, 10¢ May 20 to holders April 29; Weston Electrical Instrument Corp., 25¢ May 16 to holders May 2. Note: Daystrom-Weston merger (Vol. 11:14), signed this week, calls for issuance of one share of Daystrom stock for one Weston, new wholly-owned Daystrom subsidiary to be known as Weston Electrical Instrument Corp. and retaining present Weston organization and personnel.

Color Trends & Briefs: "Spectaculars" will continue as lion's share of NBC-TV's color schedule next fall, according to summary given by RCA electronics products exec. v.p. W. Walter Watts during press conference this week at Lancaster, Pa. color tube plant (see story, p. 3).

To be continued are Sat. *Max Liebman Presents*, Sun. evening variety show, and Mon. *Producers' Showcase*, to which will be added 4-5:30 p.m. Sun. Maurice Evans dramatic series.

Besides these so-called "blockbusters," there will be color segments in *Today, Home & Tonight*. In addition, said Watts, "We believe that many of the half-hour film shows will be the first to make the transition. Worthington Miner has, in experimental stages, a new color series to be called *Frontier*." Also in the works is a daytime strip.

In sports, Watts said there will be "some exciting new uses of color." It's assumed he was referring to NCAA football. And, following up mock Army battle presented in color at Ft. Meade last year (Vol. 10:33), NBC-TV aims to present program in cooperation with "another of the armed services." This is rumored to be a colorcast from an aircraft carrier at sea.

Watts added that fall schedule isn't complete; that "other color programming opportunities will occur" and that "there are good indications that CBS will follow NBC's lead in programming spectacular-type color shows next season."

* * * *

"First real movement" of color TV receivers will begin in 1956, but color won't be factor this year, in opinion of Admiral pres. Ross Siragusa, expressed at stockholders meeting April 14. "When continuity of color programs becomes a reality," he said, "and mass production of color receivers begins, this new development will serve as a tremendous stimulus to sales and profits. It might be possible for the company to double its volume, just as it did in 1950 with peak black-&-white TV sales. Admiral's experience with printed circuits and automation should be of great assistance in reducing production costs when color TV goes into mass production."

Color goal of KRON-TV, San Francisco, according to mgr. Harold P. See, is to "offer color on all local live shows as a matter of routine practice by the end of this year." Station has been carrying live color commercials 5 days a week on 2 programs—*Golden Gate Playhouse* and *Exclusively Yours*. First local color show was presented Nov. 15, 1954. Installation of color film chain was completed this week. Number of color sets in area is estimated at less than 500.

Upcoming network color schedules: NBC-TV—April 24, *Max Liebman Presents*, "Kaleidoscope" with Judy Holliday, Dick Shawn, Frank Sinatra, Bambi Linn & Rod Alexander, 7:30-9 p.m.; May 2, *Producers' Showcase*, "Darkness at Noon," with Lee J. Cobb, David Wayne, Ruth Roman, Oscar Homolka & Joseph Wiseman, 8-9:30 p.m. CBS-TV—May 12, *Shower of Stars*, "High Pitch," with Marguerite Piazza & Tony Martin, 8:30-9:30 p.m.

Telechrome Inc. will demonstrate color equipment, including 3-V film chain, at International Trade Fair in Hannover, Germany, April 24-May 3—under sponsorship of U. S. Commerce Dept. Some 6 tons of equipment is being moved by air freight.

Recording of color on black-&-white film, said to offer economies in speed and cost, is described technically by Lawrence F. Brunswick, of Colorvision Inc., 109 N. Larchmont Blvd., Los Angeles, in March *Journal of the SMPTE*.

Fill-in on color plans for fall season, by NBC pres. Pat Weaver, as well as review of program & sales schedules, will occupy main interest of NBC affiliates at annual convention in New York's Waldorf-Astoria, April 21-22.

NARTB LIBRARY

Dependence of stations on film is sharply highlighted in second annual *TV Station Film Manual* released by NARTB this week to TV members. Divided into 3 parts—programming hours & costs, case histories, description of film operations at an unidentified large-market station—manual discloses that of 110 stations responding to questionnaire last summer, all reported that hours of local film programming exceeded local live shows. In Group 1 (stations with up to 50,000 TV families) average was 26.23 hours of film programs a week vs. 16.17 live, while in Group 5 (stations with more than 1,000,000 TV families) ratio was 36.57 film vs. 23.15 live. Survey reveals, however, that slightly more hours of live programs are sponsored than are film hours, whereas year ago they were about equal. Sat. is heaviest day for films, with Sun. a close second. Detailed case histories of film programming were reported for KDUB-TV, Lubbock, Tex.; WATV, Newark; WMVT, Montpelier, Vt.; WSBT-TV, South Bend; WSJS-TV, Winston-Salem, N. C. Each station reported on film purchasing, personnel, equipment, facilities, operational procedures & programming, announcement procedures & engineering. The description of a film operation in a metropolitan market was prepared at NARTB's request by Louis J. Climent, representing SMPTE.

Educational TV channels aren't in danger of being taken away, as far as FCC Chairman McConaughy is concerned. Speaking at Ohio State Institute for Education by Radio-TV April 14, he said: "At the present time the activities of educational broadcasting are not straining my patience." He also noted that President Eisenhower is "vitaly interested" in educational TV-radio and that Sen. Bricker (R-O.) is "one of your staunchest friends." Again presenting his views on role of Govt., he said TV-radio industry will have a maximum opportunity to develop only if it subject to minimum amount of Federal supervision. Davidson Taylor, NBC public affairs v.p., praised "great strides" made by educational TV, stressed that educational and commercial broadcaster, "while not yet in embrace," have compatible interests in raising standards of broadcasting, a task shared by advertiser. Dr. David Henry, chairman of Joint Committee on Educational TV and president of U of Illinois, urged educational broadcasters not to imitate commercial colleagues with programming that appeals to mass audiences, but rather to develop programs essentially educational.

New home of Charlotte's WBTV & WBT, built at cost of \$1,250,000 and designed around "operational block" of controls custom-built by Adler Communications Lab, was dedicated this week with elaborate ceremonies. It's one of largest (51,000 sq. ft.) and most elaborately equipped TV plants outside the Hollywood TV centers of the networks, contains 3 radio and 2 TV studios, latter 40x60-ft. & 40x40-ft. Design, already being sought by other TV operators, was master-minded by v.p. & chief engineer Thomas E. Howard, onetime chief engineer of WPIX, N. Y.

First long-term closed-circuit contract has been signed by Smith, Kline & French Laboratories (pharmaceuticals) with Theatre Network TV Inc., its Tele-Sessions div. gen. sales mgr. Fanshawe Lindsley announced this week. One-year pact calls for use of TNT's closed-circuit network facilities on all SKF multi-city big-screen programs. Next such show will be May 9, going to 36 cities.

Peck Adv. Agency, with billings of about \$10,000,000, and Hirshon-Garfield Inc., about \$7,000,000, will be consolidated under former's name as of May 1, with Peck Adv. offices in N. Y. & Los Angeles to be expanded. Latter's Boston & Miami offices are not included in deal, will operate separately.

Sets-in-use totaled 35,028,000 as of March 1, up 664,000 from Feb. and an increase of nearly 6,000,000 in year, reports NBC research director Hugh M. Beville Jr.

Ohio State U's Institute for Education by Radio-TV this week presented these TV awards: special award, RCA & NBC-TV for "Operation Threshold," colorcast of combat use of TV from Ft. Meade, Md. last Aug. (Vol. 10:33); special interest, *Frontiers of Faith* (NBC-TV) & *Your Health* (WOI-TV, Ames, Ia.); cultural, *Adventure* (CBS-TV) & *Princeton '54* (WRCA-TV, N. Y.); public affairs, *The Search* (CBS-TV) & *Soap Box* (KETC, St. Louis); basic freedoms, WKAR-TV, E. Lansing, for coverage of hearings of House Un-American Activities Subcommittee; systematic instruction, *Psychology on TV* (KNXT, Los Angeles) & *Prescription for Living*, produced by Standard Oil for Ohio regional network; children's, *Watch Mr. Wizard* (NBC-TV) & *The Friendly Giant* (WHA-TV, Madison); classroom, *Let's Take a Look* (CBC-TV) & *Iowa TV Schooltime—Landmarks in Iowa History* (WOI-TV, Ames).

Variety's annual plaque awards for 1954-55—honoring outstanding "showmanship" contributions to TV-radio: education with showmanship, WCBS-TV, N. Y.; outstanding news station, WJAR-TV & WJAR, Providence; public interest, WLWT, Cincinnati; outstanding TV programming, KTTV, Los Angeles; small TV station operation, KRGV-TV, Weslaco, Tex.; radio station showmanship, WBZ, Boston; showmanship in promotion, radio KTFI, Twin Falls, Ida.; imagination in programming, radio KIST, Santa Barbara, Cal.; outstanding music station, WCRB, Waltham, Mass. "Showmanager Award" goes to NBC pres. Sylvester L. (Pat) Weaver Jr. "for bringing imaginative qualities and a new kind of excitement to TV during the past year," as reflected principally in development of color spectaculars and expansion of partie. programs *Today, Home & Tonight*.

National Headliners' Club awards for 1955: outstanding TV network coverage of news event, ABC-TV & DuMont, for Army-McCarthy hearings; local news coverage, WPIX, N. Y. (John Tillman, news editor); dramatic presentation of spot news event, WBZ-TV, Boston, for "Hurricanes Carol and Edna"; public service by TV station, KLZ-TV, Denver; radio network news coverage, NBC (W. R. McAndrew, news director); local news coverage, WLS, Chicago (Wm. Small, news director). Special award was presented to KARK-TV, Little Rock, for courageous coverage by cameramen Chris Button & Lou Obereste of slaying of murderer who escaped from insane asylum.

ABC-Paramount may enter record field soon, its appetite whetted no doubt by fact that network TV is building up some of biggest song hits as well as by success of RCA & CBS record businesses. AB-PT v.p. Robert O'Brien has been assigned to study whole record field and expects to have recommendations in about month. Trade reports that Dot Records was being purchased for \$1,000,000 were denied, and there's usual crop of rumors about negotiations with other independents. Example of how TV can put over a song hit is currently popular "Ballad of Davy Crockett" heard on *Disneyland*; also, "Play Me Hearts & Flowers" which got first plug on *Phileo Playhouse* and "Let Me Go, Lover," heard first on *Studio One*.

Richard P. (Dick) Doherty, ex-NARTB v.p. for employer-employee relations, who now has his own consulting service in Washington, Television-Radio Management Corp., has been named director of management services of new GE-sponsored National Affiliated Television Stations (Vol. 11:12, 14). He will retain his private business. First members of new NATS, which now stresses that it will embrace vhf as well as the uhf stations to which GE is expected to provide financial assistance, are scheduled to be announced in about week. To date, 61 stations have requested membership applications, NATS states. President of new California corporation and 2 board members from GE have not yet been designated.

SUMMARY-INDEX OF THE WEEK'S NEWS—April 23, 1955

CONSPICUOUS WASTE of prime program material inherent in TV's refusal to repeat good live dramatic shows, though movies & stage snap up TV's hits (p. 1).

UHF TAX EXEMPTION urged by TV tuner makers, meeting with Sen. Magnuson in prelude to set makers' conclave; "all-channel pledge" abandoned (p. 2).

TV NOW BIGGEST ENTITY in entertainment world, CBS & NBC each outstripping movie companies in business volume; only newspapers lead TV in advertising (p. 3).

SUBSCRIPTION TV COMMENTS delayed to June 9 by FCC; debate mounts as principals line up for CBS-TV May 1 program and Zenith accepts NBC-TV free time (p. 6).

ELECTRONICAM'S FIRST USER to be Admiral, which will record Bishop Sheen show commercials next week; third TV-film camera system shown on coast (p. 7).

NEW STATIONS AUTHORIZED in Tucson, Reno, Ft. Pierce, Fla.; Ch. 6 grant due in Milwaukee with dropout of WMIL; WRAL favored for Raleigh's Ch. 5 (p. 9).

TRENDS IN NEW TV MODELS due at midyear emphasize greater use of vertical chassis, more printed circuits, little or no change in prices (p. 11).

ADMIRAL DENIES MISREPRESENTATION in its advertising claims on 21-in. tubes, in answer to Federal Trade Commission complaint (p. 12).

COLOR SET PLANS indicate no solid front, but some manufacturers now agree with RCA that deadlock can be broken only by starting production (p. 13).

SPONSORS OF SPECTACULARS divided about 50-50 on value of the big color shows and whether they'll continue to use the extravaganzas next season (p. 10).

PUBLIC STOCK OFFERING of Lansing stations WJIM-TV & WJIM on market day after FCC approves transfer of control; Hennock-Bartley dissent (p. 14).

SMALL-MARKET STATIONS to get more top network shows from CBS & NBC with expansion of plans to offer more programs to outlets unordered by sponsors (p. 16).

NO LIVE REPEATS—TV's EGREGIOUS WASTE: Why not repeat more of TV's live dramatic hits while they're still hot, as was done recently with "Patterns"? After the published reviews and word-of-mouth publicity, there would seem to be no question but that many such shows -- whether repeated on same or another hour -- could command just as good an audience as the initial performance, possibly even better.

Why the apparent aversion of sponsors, agencies and producers to repeat live performances, in face of evidence that the movies and even TV films seem to do very well with repeats? Are there economic or legal deterrents, or what?

We've addressed these queries to some of the top people in the business, will give you their answers later. Meanwhile, doesn't it seem ironic that TV, which knows the value of repetition as well as any medium does, should simply discard some of its finest programs after a single showing?

It's a fixation with some, apparently, no more valid than the one that kept transcriptions off the radio networks for so many years, despite their obvious quality and convenience and economy, simply because of an inexplicable phobia that decreed that nothing "canned" must go on the network save sound effects.

Movie industry and legitimate theatre, which live by repeat performances, have lately been snapping up TV's hits and can be expected to exploit them until their appeal is exhausted. No artistic medium could ever be so profligate of creative talent as to use it but once -- yet that's exactly what TV is doing. Surely, the mechanics of network operation can be adjusted to make the most of a property of proven popular appeal.

* * * *

Re-running of live shows has problems, of course -- time & talent availabilities, rehearsals, unions, etc. -- but the success of film re-runs of the very few live re-runs to date certainly indicate the problems should be solved.

Re-runs we have in mind are not those resurrected from the files after cooling off for year or more. Our idea is to re-run while show is still a conversation piece, while folks are still asking one another, "Did you see that show last night?"

Precisely in point is recent repeat of Kraft's "Patterns" on NBC-TV. On Jan. 12 it attained 31.6 Nielsen. Feb. 9 repeat, same hour, reached 30.4 -- result of word-of-mouth, critics' praise, reminders through promotion. It was case of immediate exploitation of a hit while it was hot. Quicker the re-run the better.

Repeats must be chosen carefully, for most shows aren't worth repeating. But if further proof of the basic idea is needed, there's this week's ABC-TV report on how the repeats of five "Disneyland" shows this season paid off in ratings -- while the kids are still singing "Davy Crockett". Nine-city Trendex showed that ratings of all 5 averaged about same for originals and repeats, while share of audience was higher for all repeats save first one. National Nielsen has reported on only first 2 so far, but both were substantially higher on repeats.

Disney's "Operation Underseas" first time (Dec. 8) had 43.4 rating, 52.6 share of audience, 12,048,000 homes; second time (March 16) figures were 47.4, 56.8 & 14,817,000. "Seal Island" first time (Nov. 10) had 40.2 rating, 47.2 share of audience, 10,721,000 homes; repeat (March 23) produced 51.9, 64.3 & 16,244,000. Now they're planning third showings of hit Disney shows to fill the summer hour.

Thus the genius of Walt Disney and movie-savvy of ABC-TV management not only are showing the movie industry how to exploit their product via TV but should be teaching TV some of the exploitation techniques of the movie makers.

Why shouldn't a first-rate click like "No Time for Sergeants" be repeated -- now? Consider the experience of Washington News TV-radio editor Bernie Harrison a few weeks ago. He had missed "No Time for Sergeants," had heard so much about it that he asked U.S. Steel if he might see the kine. Then he got idea some of his readers might like to join him, offered 50 first-come couples seats at unreeling in WMAL-TV studios. He was deluged with requests, had to turn down most.

* * * *

TV drama seems to be entering its "Golden Age," having built up new writers, and brought forth new production people and actors of great talent. But while the TV entrepreneurs apparently don't know how to make the most of them, the movies and stage aren't passing them up. Here are a few examples:

Movies have just brought out Philco-Goodyear Playhouse's "Marty" and same hour was source of Bing Crosby's "Little Boy Lost" and "Anything Can Happen" and "The Rainmaker" as well as a Broadway play, "A Trip to Bountiful." It will be surprising if they overlook last Sunday's gem, "The Brave and the Bold." Kraft's "Patterns" was snapped up, as were U.S. Steel Hour's "The Rack" and "Fateful Decision". U.S. Steel's "No Time for Sergeants" and Goodyear's "The Rabbit Trap" are going to stage.

There are many more instances, as we've reported in these columns from time to time (see also Telecasting Notes, p. 7). TV is now mature. There are few one-station markets any more. The viewer can no longer tune in every dramatic show to make sure he doesn't miss something good. The process of selection has set in -- and TV ought to make the most of its best.

TV TUNER MAKERS BACK UHF TAX RELIEF: Sen. Magnuson's TV "study" entered its first active phase this week -- a determined effort to break the uhf logjam by inducing TV receiver manufacturers to include a uhf tuner in every set.

The Senator and his investigating staff currently are concentrating their fire on the only non-controversial scheme advanced thus far to help uhf -- tax inducement at the receiving end. After next week's meeting with TV set manufacturers, probers will turn their attention to the telecasting end of the business -- but no schedule has yet been decided upon. Chief counsel Sidney Davis is still working out plans for the inquiry -- and he was joined this week by minority counsel Robert L'Heureux, committee staff member who in the past has served as its chief counsel as well as chief counsel of Senate Banking Committee and Joint Committee on Defense Production. His appointment, long expected, was announced this week by Sen. Bricker (Vol. 11:14).

Six leading TV tuner manufacturers met this week with Sen. Magnuson and members of his investigation staff, as warm-up for April 25 session with some 25 TV set makers. Tuner manufacturers endorsed proposal to exempt from 10% Federal excise tax all receivers capable of all-channel reception, but they couldn't see any possibility

of "voluntary agreement" among set makers to discontinue production of vhf-only sets without tax incentive (Vol. 11:12). Even Magnuson conceded it would be impossible -- and perhaps illegal -- to draw any such pledge from the set makers.

Tuner makers said they can supply entire industry with all the uhf tuners needed for 100% changeover to all-channel sets. But they foresaw no possibility of building all-channel tuners as cheaply as vhf-only. Asked to estimate current price differential, they submitted figures which ran from \$8 to \$12, at set manufacturers' level, for cheapest models. Since average receiver sells for about \$145 at factory, tuner makers made it clear they felt price differential could be eliminated if 10% excise tax were lifted from all-channel sets but retained on vhf-only sets.

Present at meeting were General Instrument pres. Monte Cohen, P.R. Mallory uhf div. representative Ed Nung, Oak Mfg. Co. sales engineer Charles Rowe, Radio Condenser engineering director Joseph S. Robb, Standard Coil secy. Arthur Richenthal, Sarkes Tarzian Inc. pres. Sarkes Tarzian.

* * * *

Heavy endorsement of excise tax exemption is expected at Mon. April 25 meeting of set manufacturers with the full Senate Commerce Committee to "discuss the feasibility and advisability of manufacturing all-channel sets" (Vol. 11:12). But manufacturers will explain that highly competitive nature of TV industry will bar them from entering into any agreement to discontinue vhf-only sets without the tax inducements. Magnuson's staff is hoping the manufacturers will bring with them plenty of ammunition showing why tax relief is needed -- to combat the inevitable objections of economy-minded lawmakers when the measure comes up for action.

Treasury Dept. is dragging its feet on the one help-uhf excise tax bill introduced to date -- HR-4070 by Rep. Ikard (D-Tex.). It has not yet answered his long-standing request to state its position, tell how much revenue it would cost the Govt., etc. Based on last year's \$1.1 billion factory value of TV sets produced, loss to Treasury would amount to maximum of \$110,000,000 a year -- assuming that all sets produced would have uhf tuners and therefore be exempted from tax.

NETWORKS NOW LEAD FILMS--AND MAGAZINES: Despite increase in movie boxoffice last year to about \$1.2 billion, there isn't a single motion picture production company or theatre exhibitor firm that now has as great a volume of business as either the CBS or NBC network organizations. In fact, gross volume of TV as a whole, derived mainly from sale of advertising time, is nearing point where it will surpass movie boxoffice; this year, it should go to \$1 billion or more (Vol. 11:15) and by end of next year it may very well forge ahead of the 18,000-theatre movie business.

Most annual reports for 1954 are now at hand -- and they bear witness to fact that TV, even without radio, is by way of becoming the biggest single entity in the entertainment world, dollar-wise; in the advertising field, it's second only to the newspaper classification and well ahead of magazines.

The fantastic upsurge of the major networks and their dollar dominance is borne out by the statistics. Even the trailing third network, ABC, whose parent company is the biggest of all chain movie theatre operators, has a combined TV-radio volume that compares well with the grosses of most of the film majors.

NBC networks and owned stations accounted for \$200,423,000 of \$940,950,000 gross of parent RCA in 1954 (Vol. 11:9). While RCA annual report gives no breakdown as between TV & radio, nor as to station revenues, it's good guess on basis of PIB network time-billing ratios (Vol. 11:7) that the NBC-TV network and stations represented fully two-thirds of 1954 aggregate, about \$135,000,000 -- probably more.

CBS-TV & CBS Radio are divisions of CBS Inc., also in the recording business and in set & tube manufacturing. Parent company's 1954 report (Vol. 11:13) shows gross volume of \$373,380,000 from all sources. Report also does not break down TV vs. radio revenues, but since CBS has been leading NBC in both TV and radio billings it's fair to assume combined TV-radio volume ran considerably better than \$200,000,000 last year. Good guess is that close to \$150,000,000 of CBS Inc.'s gross revenues last year was attributable to its TV network & TV station operations.

ABC division of American Broadcasting-Paramount Theatres, according to 1954

report (Vol. 11:14), represented \$70,424,000 of parent company's total \$188,796,000 income -- nearly all the rest coming from the 600-odd theatres AB-PT operates. It can be assumed that ABC-TV represented at least \$40,000,000.

* * * *

Now look at the latest fiscal reports of the major film producers and larger group theatre operators. Among film producers, Loew's (MGM) shows far and away the largest dollar volume; with divestment of many of its theatres still not completed as required under anti-trust decree, its figure necessarily embraces theatre revenues, too. Its latest annual report shows gross of \$183,100,000, well below either NBC or CBS -- and its MGM alone was probably way under either NBC-TV or CBS-TV.

Next biggest producer seems to be 20th Century-Fox, \$115,715,000 for 1954; then Paramount, \$115,000,000 (estimated); Columbia Pictures, \$86,200,000; Universal, \$77,900,000; Warner Brothers, \$70,120,000.

Among the major theatre owners, AB-PT is by far the biggest, as aforesaid -- with \$115,916,000 of its 1954 revenues attributable to theatre income. Then come Stanley-Warner, \$66,200,000; National Theatres, \$61,920,000; RKO, \$32,611,000.

Note: Figures are from Standard & Poor's and/or latest annual reports.

* * * *

There you have the TV-radio networks' status vis-a-vis the major entities in the entertainment industry. Just as competitive are other advertising media -- and in that respect it's interesting to note that Life Magazine is no longer advertising itself as the No. 1 individual medium. That ranking doubtless belongs to CBS-TV, with NBC-TV a close second -- how close, only their own carefully guarded treasury reports would show.

According to PIB, whose statistics are generally used as index rather than actual because they're based on one-time rates and do not take into account commissions, discounts, rebates, etc., Life is first among magazines with \$114,035,747; then come Saturday Evening Post, \$77,940,710; Time, \$35,143,779; Look, \$26,675,479; Better Homes & Gardens, \$23,741,055; Ladies Home Journal, \$20,524,396; Colliers, \$16,480,775; Newsweek, \$15,639,273; Good Housekeeping, \$14,689,435; Business Week, \$14,559,481; McCalls, \$13,512,799.

And as if to point up the fantastic encroachments of TV, March 18 Printers' Ink compilation of PIB reports on nation's top 100 advertisers in 1954 indicates, on analysis, that TV accounted for 42% (\$267,000,000) of all their payments for magazines, newspaper sections, network TV, network radio (total \$638,000,000). Top 10 devoted even greater proportion, 47%, to network TV; top 25 spent 45%. For leading 10 advertisers and their 1954 network TV expenditures, see p. 8.

Opposition to free air time for political candidates was expressed this week by NARTB pres. Harold Fellows in testimony before Senate Rules subcommittee on privileges & elections, considering bill (S-636) by Sen. Hennings (D-Mo.) to raise limit on expenditures by a national political committee to \$12,300,000, partly to account for higher cost of TV (Vol. 11:16). Said Fellows: "Any suggestion that the broadcasting industry should underwrite certain political campaign costs is not only discriminatory, but unrealistic and unworkable." He endorsed basic principles of Hennings bill, as applied to TV-radio. Another witness, Prof. Alexander Heard of U of North Carolina, said Govt. should use "authority over the air waves to guarantee that responsible political competitors have balanced and limited access to radio and TV time, either at reduced cost or at no cost to themselves." FCC Comr. Henneck (favoring free time) and NBC v.p. Joseph Heffernan & CBS v.p. Earl Gammons (opposing) are scheduled to testify April 26.

Two bills requested by FCC last week (Vol. 11:16) were introduced by Chairman Priest (D-Tenn.) of House Commerce Committee: HR-5614, to modify "protest" procedure; HR-5613, to let Commission levy small fines on non-broadcast stations.

NARTB convention week of May 22 in Washington has added Dr. Norman Vincent Peale, noted clergyman who conducts *Art of Living* program on NBC Radio, as luncheon speaker May 26, which has been designated as "TV Day." Sessions that morning will mark 10th anniversary of first TV allocation by FCC. Under TV chairman Clair McCollough, industry notables will discuss TV's origins, its achievements and its future in next 10 years.

Assailing "idiotic repetition in advertising," Rep. Heselton (R-Mass.), member of House Commerce Committee, this week introduced HR-5741 ordering FCC to prescribe what proportion of TV-radio programming should be devoted to advertising. In separate statement, he attacked "repetitious, monotonous, excessively long advertising," and expressed hope that his bill might prod stations to exercise "some intelligent care."

Power increases: KHJ-TV, Los Angeles (Ch. 9) to 162-kw ERP; WRBL-TV, Columbus, Ga. (Ch. 4) to 100-kw; WMBV-TV, Marinette-Green Bay, Wis. (Ch. 11) to 234-kw; WXYZ-TV, Detroit (Ch. 7) to 316-kw.

Next network interconnections planned by AT&T: KFDM-TV, Beaumont, Tex., April 24; WFRV-TV, Green Bay, Wis., May 2.

Personal Notes: Adrian Murphy, who spearheaded CBS color campaign before FCC and in 1952 was named pres. of CBS Radio, has resigned, effective immediately, "to retire from active business," CBS Inc. pres. Frank Stanton announced April 21; he also resigns as a director of CBS Inc. Arthur Hull Hayes, v.p. in charge of CBS San Francisco office, has been appointed successor . . . Harry Plotkin, partner of Arnold, Fortas & Porter, entered Georgetown Hospital April 20 for operation on detached retina, will be hospitalized for at least 3 weeks . . . H. Gifford Irion, FCC examiner who has been hearing Buffalo Ch. 7 case, fell and broke shoulder this week, expects to be back at work next week . . . Robert W. Sarnoff, NBC exec. v.p., chosen as "Young Man of the Year in Marketing" by Assn. of Advertising Men & Women . . . Wm. Kaland, ex-WNEW & CBS Radio, named asst. national program mgr. of all Westinghouse TV-radio stations at N. Y. headquarters under program mgr. Richard M. Pack . . . J. English Smith, ABC-TV program service mgr., named coordinator of *Warner Brothers Presents*, weekly Warner-produced film starting on ABC-TV Sept. 13, Tue. 7:30-8:30 p.m.; he'll headquarter at Warner studio in Burbank, Cal. . . Frederick Menzies promoted to commercial mgr., WHEN-TV, Syracuse, succeeding Wm. H. Bell, now asst. gen. mgr. of radio WHEN . . . Robert Monroe, TV-radio program packager, appointed programming v.p. of Mutual & WOR, succeeding B. J. Hauser, now supervising MBS development div. . . Hal Cranton and Ira Wolff promoted to supervisors in expansion of NBC-TV sales presentations dept., former for network sales dept., latter for partic. programs; both report to David Hedley, dept. mgr. . . Clem Stigdon, ex-RKO-Pathé & Eastman Kodak, named production mgr. of CBS-TV film services dept. . . George Bristol, ex-director of CBS Radio adv. & sales promotion, named TV director of sales presentations . . . Ray J. Williams elected pres. gen. mgr. of KCSJ-TV, Pueblo, Colo., succeeding Douglas D. Kahle, resigned to give full time to private business interests, including Muzak franchises . . . Bob Booker pro-

motored to production mgr. of WMBR-TV, Jacksonville, succeeding Windsor Bissel . . . Harry E. Cummings will head Atlanta office being opened July 1 by John Blair & Co.; Arthur H. McCoy, ex-Avery-Knodel sales mgr., joins Blair's N. Y. staff on May 9 and Al Long, ex-McCann-Erickson & Dancer-Fitzgerald-Sample, joins staff May 16 . . . Charles R. Christianson, ex-West coast rep for Elroy McCaw's WINS, N. Y. and KTVW, Tacoma, now heads new San Francisco office of Adam Young in Fairmont Hotel (Yukon 6-5790) . . . Martin Katz, special projects director of Blair-TV, appointed director of sales development, replacing Victor E. Forker, resigned . . . Carroll Layman, mgr. of Chicago office of reps Harrington, Righter & Parsons, appointed a v.p. . . Robert F. Blake resigns as publicity director of WRCA-TV & WRCA to join CBS-TV press information dept. as mgr. of special projects . . . Jack Gould, TV-radio editor, *New York Times*, back on job this week after ulcer operation . . . Wm. H. Thomas, ex-J. Walter Thompson TV-radio dept., named TV-radio director of Fitzgerald Adv., New Orleans, replacing Aubrey Williams, resigned . . . James S. Pollak, ex-ABC, joins Compton Adv. as producer on Procter & Gamble's *Fireside Theatre* . . . James E. Robertson promoted to TV-radio production mgr., N. W. Ayer, Chicago. . . Roy George, ex-KRLD-TV, Dallas, named program director of KWFT-TV & KWFT, Wichita Falls . . . Robert R. Nelson, ex-gen. mgr. of WARD-TV & WARD, Johnstown, Pa., on May 1 becomes gen. mgr. of WDEL-TV, Wilmington, Del., recently acquired by Paul F. Harron from Steinman interests (Vol. 11:4).

Mrs. Joseph H. Ream, wife of the former CBS exec. v.p. who retired several years ago on account of her illness, died of cancer April 17 at her home, Rocking Chair Ranch, Route 1, Thomasville Rd., Tallahassee, Fla. Surviving besides Mr. Ream, who has engaged in cattle ranching since leaving N. Y., are 5 children—Jackson, Stephen, Davidson, Nancy, Christopher.

EDWARD LAMB hearings continued to drag in circles this week as FCC counsel resumed questioning of the Toledo-Erie broadcaster-publisher-industrialist about past affiliations and actions. Lamb continued to insist he was victim of a "frameup" while his attorney Russell O. Brown continued to display righteous indignation over FCC's "fishing expedition." At one juncture, Lamb charged "freedom of the air is being tampered with" and said broadcasters "would be glad for a strong trade association to defend the freedoms which I have to defend individually here." If a newspaper were involved in a similar probe, he said, every publisher in the nation would rise to defend freedom of the press.

Under questioning, Lamb testified he was a founder, officer and "very large contributor" to the National Lawyers Guild prior to 1944—and "proud of my efforts to organize workers in the legal profession"—but had resigned in dispute over foreign policy. Guild currently is fighting Attorney General's proposal to list it as subversive. Lamb conceded he may have made speech in 1936 under sponsorship of American Friends of the Soviet Union, but didn't recall it.

FCC put 2 other witnesses on stand this week. First was Mrs. Belle Sundeen, office mgr. of *Daily Worker*, subpoenaed to produce all records from its files dealing with Lamb. Ex-Communist editor Louis Budenz had testified earlier that Lamb had submitted an article in 1936 with a covering letter, but Lamb said he believed article was based on copy of a speech he made at that time. Mrs. Sundeen had nothing to offer, said paper's records date back only to 1951, brought only 4 copies of the newspaper dated before that year.

Another subpoenaed witness was Abner Green, exec. secy. of American Committee for the Foreign Born, now on the subversive list. He brought with him about 30 committee letters, folders and pamphlets which he said listed Lamb as vice chairman. He said one folder, detailing a 1944 Statue of Liberty anniversary celebration, contained messages from Gen. Eisenhower, Mrs. Roosevelt, Henry Wallace and others. Lamb had testified earlier that he knew the group was using his name but didn't recall holding office or giving permission to use his name.

In another skirmish, Broadcast Bureau attorney Joseph Kittner said Lamb's name once appeared in court case as co-counsel for the Ohio Communist Party. Lamb said he didn't recall having been associated with case, and Kittner showed Lamb briefs filed with Ohio Supreme Court. Later, FCC lawyers said they checked with Ohio Supreme Court and found Lamb's signature did not appear on any documents connected with the case and he was not listed as appearing at arguments.

Lamb presented one witness, exec. editor Kenneth D. Tooill of *Toledo Times*, former editor & co-publisher of Lamb's *Erie Dispatch*, who testified Lamb's views were "quite violently opposed" to communism. He said he never heard him express any support for Red doctrine. Lamb returns to stand April 26 when hearing resumes.

Shift of control of WARM-TV, Scranton (Ch. 16) & WARM is sought in application filed this week. Proposal is to issue 824 shares of stock, v.p. Wm. W. Scranton paying \$74,000 for 740, increasing holdings from 28.3% to 79%, and pres. Martin F. Memolo buying 84, reducing holdings from 70% to 20.7%.

MONTH'S DELAY in filing formal comments on subscription TV was granted by FCC this week, acting on petition of Paramount subsidiary International Telemeter. In moving date to June 9, Commission stated that reason for Telemeter's request—hospitalization of counsel—constituted "good cause." Time for filing counter-comments was also extended, to July 11. Argument continued to build up meanwhile:

(1) Dramatis personae of CBS-TV's program 5:15-6 p.m. May 1 is now complete. Zenith counsel W. Theodore Pierson will speak for pro-pay side, backed by panel comprising Skiatron's James M. Landis, legitimate theatres' Ralph Bellamy, and Elfred Beck, owner of off-air uhf KCEB, Tulsa (Ch. 23). On anti-toll side, main speaker Victor Sholis, v.p. of WHAS-TV, Louisville, will be supported by Indiana chain exhibitor Trueman Rembusch; Sherwood Dodge, v.p. of Foote, Cone & Belding; Leon P. Gorman, mgr. of WABI-TV, Bangor, Me.

(2) Zenith has accepted NBC-TV's offer of 15-min. free time to present fee-TV pitch (Vol. 11:16), and anti-fee forces are now asking for 15-min. adjacent to Zenith's time. Skiatron has also requested free time from NBC. Date of Zenith show hasn't been fixed.

(3) Exhibitor Alfred Starr chides us for using word "consternation" last week when we said pay-TV issue is becoming a "cause celebre—to delight of its proponents and consternation of its opponents who have long felt that best policy was to ignore it." Citing Webster's definition, Starr said:

"May I respectfully deny that our group views the current controversy with anything even approaching 'amazement and dread tending to confound the faculties.' And may I point out that we did not retain public relations counsel to hide our light under a bushel, nor have we ever felt that the best policy was to 'ignore' the dangerous threat to free-TV programming contained in the high pressure tactics of those pressing the FCC for approval of living room slot-machines. Admittedly, our Committee is comparatively young and you may be right in saying that some 'opponents have long felt the best policy was to ignore it.' For myself, I would hardly call such an element 'opponents.' They seem more like innocent bystanders."

Collection of admission tax on movies which might be shown via subscription TV is a subject which has been "carefully avoided," anti-toll spokesman Alfred Starr stated in Washington debate last week (Vol. 11:16). This, he said, "is just one more headache (fortunately not mine) along with the troubles and great expense of collecting the \$1 or \$2 fees that are the freely acknowledged goal of pay-to-see TV." *Film Daily* reports, however, that query addressed to Internal Revenue brought this reply (after 6 months): "From the information made available to us, it is our conclusion that the tax on admissions imposed by section 1700(a) of the Code, as amended, does not apply to the charge paid by a person for reception in his home of a telecast regardless of whether the program is a motion picture or live entertainment."

Networks are free to film programs in own studios, as result of recent settlement with National Assn. of Broadcast Employes & Technicians (NABET). Both NBC & ABC quickly announced plans to film own programs this fall. CBS already had that right under separate contract with IBEW. Under new contract, NABET relinquished its control over film in exchange for wage concessions.

First profit to be shown by WTOK-TV, Meridian, Miss. (Ch. 11) was \$7812 in first 2 months of 1955, according to application for power increase filed with FCC this week. Starting in Sept. 1953, station lost \$5082 that year, \$11,964 in 1954.

(4) Debate on MBS April 17, between Zenith counsel Joseph S. Wright and Rembusch, became quite a slugfest. Wright argued that public wouldn't have to pay for decoders; that cost of pay system confined to wire, as recommended by Rembusch, would be "staggering"; that Zenith is willing to see toll TV limited to 10-15 hours weekly; that trial in a few selected markets should be authorized; that NARTB's stand against pay-as-you-look was a "rigged up deal" by networks and affiliates.

Rembusch claimed that it would be extremely expensive to put decoders in sets; that theatre TV doesn't "black out" free TV the way toll TV would; that subscription TV would "bid in" current popular free programs and charge for them; that language in 95% of Broadway plays wouldn't be permitted on the air; that hinterlands won't support toll TV any more than they do free TV; that "I have very serious doubts about your motives because you promised many things to different people and all things to all kinds of people."

(5) More comments arrived at FCC. John Reed Kilpatrick, pres. of Madison Square Garden, wrote: "The type of shows the public could be expected to pay for is limited to championship contests. These special events could never take the place of the present-day sponsored TV of events of local or sectional interest. Subscription TV would, however, make it possible for the telecaster and the promoter, with the support of the advertiser, to keep a full program of sports on the air free to set owners. It would expand sports TV coverage rather than restrict or limit it. The 2 systems can develop and prosper side by side. [Subscription TV] most definitely should be tested in a major market, and without delay."

H. B. McCarty, exec. director of Wisconsin's State Radio Council, which operates WHA-TV, Madison (Ch. 21), stated: "Here is a means of financing which should certainly be explored. It employs a payment-for-use principle already widely applied in education . . . I respectfully urge authorization by the Commission."

George A. Kuyper, mgr. of Chicago Symphony, wrote: "For several years I have studied the problem and the possibilities of subscription TV and I am convinced that such a means will benefit both the growing TV audience and the symphony orchestras of the country."

Let the station decide whether it wants to use common carrier or build its own microwave relay—that's gist of comments filed by WTTV, Bloomington, Ind. and WIRI, Plattsburg, N. Y. on AT&T's proposal to provide special low-cost interconnection (Vol. 11:14). Two other telecasters told FCC that even AT&T's proposed cheaper service would cost far more than privately operated relays and such costs might force them off the air. Texas Telecasting Inc., which operates KDUB-TV, Lubbock, and holds CP for KPAR-TV, Sweetwater, said regular AT&T interconnection would cost it about \$6500 a month, and proposed low-cost service would be about \$3060, compared with \$450 required to operate own intercity relay. WGLV, Easton, Pa., said even if AT&T's monthly charge of \$4000 were halved, it would still be well in excess of the \$475 it now pays to operate its own relay. Deadline for comments is April 29.

Sigma Delta Chi awards for distinguished service in journalism: ABC-TV & DuMont, for coverage of Army-McCarthy hearings; Reuven Frank, NBC-TV, for *Road to Spandau*, German prison camp documentary; Spencer Allen, WGN-TV, Chicago, for coverage of Chicago floods last Oct. Radio winners were CBS & Richard A. Chapman, WKOS, Jefferson City, Mo.

CBS commentator Eric Sevareid was presented annual \$500 TV award of Sidney Hillman Foundation April 20 for his *American Week* telecasts on Oppenheimer security controversy and Chicago race riots.

Telecasting Notes: "As TV came of age," states annual report of Motion Picture Assn. of America released this week, "it leaned more and more on the older and more experienced motion picture industry. Most noteworthy was the expanded use of film instead of live programs. On the average, more than 40% of station time used filmed programs, and the percentage is on the rise. The estimated budget for 1955 film production for TV is fixed at \$80,000,000 for U. S. production alone, exclusive of foreign production and the flat purchase of older film originally produced for theatrical showing" . . . Eric Johnston report, considering growing affinity of TV and film interests and remarkable upsurge of TV as entertainment medium (see p. 3), devotes surprisingly little attention to TV. It says 1954 marked end of one stage of TV development—referring to fact "number of stations slacked off" from predicted 1000 within 3 years after freeze to actual 412 at start of year [429 now]; present stage, as it discerns it, is trend toward film. As for theatre TV; it notes, activity was largely limited to 2 companies which "concentrated principally on occasional sporting events or the opera, coupled with daytime interconnections of theatres for sales meetings of large corporations" . . . Movie producers and theatres should become heavy TV advertisers, says pres. Elmer C. Rhoden of National Theatres chain in April *Screen Producers Journal*. "The soap companies, the cigarette companies and the automobile industry have chosen TV as an important selling agent," he writes. "Isn't that a tip-off to us that it gets results? And what industry can present glamor over the TV stations as effectively as ours? The time has come when we should no longer entrust scenes of our new motion pictures to be presented on a TV program sponsored by another advertiser. From now on, producers and distributors should be prepared to pick up the TV advertising tab and not expect to get a free ride! And we, as theatre owners, should rightfully carry our share of the expense." Weekly half-hour TV show, preferably 6-6:30 p.m. on mid-week evening is suggested by Rhoden for movie industry sponsorship, with each film company allotted 5 or 6 half-hour periods during the season . . . Feature films are what stations want for daytime and late-night programming, especially since they're so popular with partie sponsors—and *Billboard* this week reports that NBC-TV (to hypo its daytime program structure) is negotiating to buy several blocks of them. It's no secret that, despite all talk about hesitancy to open vaults to TV for fear of exhibitor ire, the big producers have let the networks know they're open to offers, viz., Paramount (Vol. 11:9). Price is biggest stumbling block, not reluctance to release to TV . . . Average price being asked for good features is said to be around \$100,000 per picture. Says *Billboard*: "Two of the packages NBC would undoubtedly like to acquire are owned by David Selznick and Samuel Goldwyn. Selznick is reported to want \$3,000,000 for 17 features, and Goldwyn is pricing his pictures the same way" . . . Bitten by TV bug, too, are Rita Hayworth and her husband Dick Haymes, who announced in Hollywood this week their Haymes-Hayworth Productions Inc. will produce series based on life of late Warden Lawes of Sing Sing; Miss Hayworth is currently in litigation with Columbia Pictures, so can't appear in films herself for time being . . . More purchases of TV shows by movies: Reginald Rose's *Crime in the Streets*, which played recently on ABC-TV's *Elgin Hour*, by Allied Artists; Carey Wilbur's *It Might Happen Tomorrow*, on CBS-TV's *Studio One*, by independent producers George Pal & Randy McDougall.

Transfer of WNEX-TV, Macon, Ga. (Ch. 47) for \$1 and assumption of approximately \$250,000 in liabilities (Vol. 11:14) was approved by FCC this week. Owners now are E. K. Cargill, former owner of WMAZ, who will be mgr. with 25%, and Texas oilman J. C. Barnes, 75%.

ELECTRONICAM, DuMont's live & film camera system (Vol. 11:16) is scheduled for its first commercial use next Tue. Apr. 26 when Admiral plans to make film records of commercials on its live *Life Is Worth Living* (Bishop Sheen). According to Mike Levin of Admiral's agency, Erwin, Wasey & Co., plan is to shoot film of commercials during live telecast, then make them available to Admiral dealers for local spot use.

DuMont executives were elated with response to last week's first demonstration, and announced that more Electronicam equipment was on order. First studios to be equipped will be 2 in the DuMont Tele-Centre and one in DuMont's Adelphi Theatre, followed by the remaining 3 Tele-Centre studios. DuMont Network managing director Ted Bergmann said at week's end that "at least a dozen agencies" have asked to use the system to film entire programs or commercials. He said the network is now working out schedule of "facilities charges" for use of Electronicam (in DuMont studios) by non-clients of DuMont, and has "opened negotiations" with program packagers and film producers.

DuMont plans pitch not only to advertisers and agencies at special showings, but to station owners—and will demonstrate Electronicam system at Washington NARTB convention next month. Equipment probably will be offered on lease basis to stations and other networks, rather than for outright sale.

Question of possible union troubles bothers some potential Electronicam users, but DuMont spokesman told us: "We have no reason to believe that we'll have any union jurisdictional problems." In case of talent unions, it's expected that where filmed program is merely a record of a live show, or footage is shot continuously, AFTRA would have jurisdiction as it does over live shows which are kinescoped. Where Electronicam is used as electronic aid in producing a film program shot over a period of time in takes or together with other footage, SAG would have jurisdiction. Technicians' unions have made no statements on the subject.

Another combination TV-film camera system—third within a month—was shown this week in Hollywood's Republic studios by Camera Vision Productions Inc., headed by Philip Rivero and Arthur S. Lyons. Under development since 1949, Camera Vision system differs from Electronicam in that it uses separate lenses for TV and film cameras, whereas DuMont system employs single lens. Lyons said DuMont had originally worked with Camera Vision on the system, and he read from a statement "prepared by our lawyers" to the effect that DuMont had agreed to finance first camera unit built by his company.

Like TV-film camera shown last month in Hollywood by Al Simon of McCadden Productions (Vol. 11:13), Camera Vision system is expected to find its principal use in simplifying and cutting costs of film production. DuMont, on other hand, is pushing Electronicam system not only as a film production tool but as a method of making a high-quality film recording of a TV program as it actually goes out on the air.

Microwaves to serve community antenna systems in 2 areas were sought in applications filed with FCC this week. Hualapai Peak Carrier Co., Kingman, Ariz., filed for 6012.5 & 6112.5 mc, proposing to serve system in Kingman initially and to add 2 channels later to serve upcoming system in Needles, Cal. It proposes to use Philco TLR-3 equipment, installed at cost of \$37,460, charging first customer \$800 monthly. For Sheridan, Wyo. system, Television Networks, 21 N. Main St., Sheridan (Charles L. Adam), proposes to put Motorola FSTM-30 equipment using 6412.5 mc on Red Clouds Lookout at cost of \$9500, relay programs of KOOK-TV, Billings, Mont., charging system operator \$650 monthly.

Station Accounts: Waxed Paper Mercandising Council, 38 S. Dearborn St., Chicago, comprising 14 manufacturers, is spending \$100,000 for TV-radio spots, starting with 10-week campaign in Philadelphia and extending to other markets later, thru Ruthrauff & Ryan . . . Bulova Watch Co. buys 13 *Ford Theatre* re-runs from Screen Gems to be spot-booked as co-op with local retail jewelers this fall, thru McCann-Erickson . . . CBS-Hytron to use TV, radio & newspapers to promote tube sales to women, thru Bennett & Northrop Inc., Boston . . . Maytag to use TV with other media in \$1,000,000 campaign this spring to promote its "Maytag Spring Party," thru McCann-Erickson . . . 7-Up Bottling Co. will sponsor MCA-TV film syndication div.'s *Soldiers of Fortune* in 120 cities (60 weekly, 60 alt. weeks), thru J. Walter Thompson Co. . . . Carling's Beer sponsoring 25 road games of Cleveland Indians on WXEL, thru Benton & Bowles and Lang, Fisher & Stas-hower, Cleveland (for rest of major leagues' TV lineup, see Vol. 11:13) . . . Sunkist Growers (citrus fruits) sponsors 15-min. pre-N. Y. Giants baseball program on WPIX, thru Foote, Cone & Belding, Los Angeles; Vitalis & Petry Wines buy 10-sec. adjacencies on all Yankees & Giants games on WPIX, thru Doherty, Clifford, Steers & Shenfield and Honig-Cooper, San Francisco . . . Among other advertisers currently reported using or preparing to use TV: General Petroleum Corp., Los Angeles (gasoline), thru Stormberger, LaVene, McKenzie, Los Angeles; Real Gold Co., Redlands, Cal. (frozen & concentrated fruit juices), thru Barnes Chase Co., Los Angeles; Bell Brands Food, Los Angeles (potato & corn chips), thru McCann-Erickson, Los Angeles; A-1 Mfg. Co., Los Angeles (Gold Rivet jeans), thru Lance Adv., Los Angeles; American Scientific Inc., N. Y. (Flavettes for smoking habit), thru Pringle-Gotthelf, N. Y.; Lee Ltd., Beverly Hills, Cal. (Dri-Mist deodorant), thru Erwin, Wasey & Co., Los Angeles; D-Con Co., Chicago (M-O-Lene rug-cleaner concentrate), thru Arthur Meyerhoff & Co., Chicago; Johnson Motors, div. of Outboard, Marine & Mfg. Co., Waukegan, Ill. (outboard motors), thru Lamport, Fox, Prell & Dolk, South Bend; Pomatex Co., N. Y. (hair dressing), thru R. T. O'Connell Co., N. Y.; Lano Products Co., div. of Milco Inc., San Jose, Cal. (Lano glove beauty lotion), thru Brooke, Smith, French & Dorrance of the Pacific Coast, San Francisco; Raytronics Laboratories, Cincinnati (cathode ray revitalizer), thru Kamman-Mahan, Cincinnati; West Disinfecting Co., Long Island City, N. Y. (CN disinfectant), thru Paris & Peart, N. Y.; Porter-Cable-Machine Co., Syracuse (home tools), thru Gumbinner Adv., N. Y.

Rate increases: KING-TV, Seattle, May 1 adds new Class AA hour (7-10 p.m. daily) at \$900, 20 sec. at \$180, Class A remaining \$700; also on May 1, WNEM-TV, Bay City-Saginaw, raises base hour from \$425 to \$500, min. \$85 to \$100. KDAL-TV, Duluth, has raised base hour from \$250 to \$325, min. \$50 to \$65; WKBT, La Crosse, Wis. from \$200 to \$250 & \$40 to \$50; WICS, Springfield, Ill. from \$200 to \$250 & \$40 to \$50; KMMT, Austin, Minn. from \$150 to \$200, 20 sec. remaining \$30. KOOL-TV, Phoenix, June 15 raises base hour from \$425 to \$500, min. \$80 to \$96.

College football TV schedule for 8 nationally televised games, as announced this week by NCAA and NBC-TV (sponsor not yet revealed): Sept. 17, Miami at Ga. Tech.; Oct. 1, Ohio State at Stanford; Oct. 15, Notre Dame at Mich. State; Oct. 29, Iowa at Mich.; Nov. 19, UCLA at USC; Nov. 24 (Thanksgiving), Texas at Texas A&M; Nov. 26, Army-Navy at Phila.; Dec. 3, N. C. at Duke. In addition, there will be 5 regional TV dates, to be worked out individually between schools and TV stations.

New ABC-TV affiliations: WSFA-TV, Montgomery, Ala. (also NBC); WRBL-TV, Columbus, Ga. (also CBS).

Network Accounts: Colgate-Palmolive, whose *Comedy Hour* on NBC-TV Sun. 8-9 p.m. has been steadily losing ratings battle with Ed Sullivan's *Toast of the Town* on CBS-TV, will sponsor new, untitled live variety show in same period next fall, to be produced by York Pictures Corp., which is owned jointly by Paramount Pictures and comedy team Martin & Lewis. Latter will star in at least 5 of the shows, to originate from Hollywood . . . Hazel Bishop to sponsor *Place the Face* on NBC-TV starting June 28, Tue. 8-8:30 p.m., but will shift to another time period in fall, thru Raymond Spector Co.; will also sponsor new 30-min. program, network undetermined, starring Dunninger, telepathist . . . Monsanto Chemical buys 20 min. of *Perry Como Show* on NBC-TV starting in fall, Sat. 8-9 p.m., thru Gardner Adv., St. Louis . . . Remington Rand replaces RCA as sponsor (with Speidel & American Chicle) of *Caesar's Hour* starting in fall; Remington will drop alt. week sponsorship of *What's My Line?* on CBS-TV . . . Sheaffer Pen & Raleigh cigarettes to co-sponsor *Penny to a Million*, new quiz show, on ABC-TV starting May 4, Wed. 9:30-10 p.m., thru Russel M. Seeds . . . Reynolds Metals to drop *Mr. Peepers* in June on NBC-TV, which is considering plan to turn show into Mon.-thru-Fri. 15-min. daytime strip with star Wally Cox . . . NBC-TV's *Tonight* (Mon.-thru-Fri. 11:30 p.m.-1 a.m.) will originate from Los Angeles for 8 weeks starting June 27 while m.c. Steve Allen portrays title role in Universal's motion picture, *Benny Goodman Story* . . . Kraft Foods drops *Tom Corbett*, *Space Cadet* on NBC-TV Sat. 11:30 a.m.-noon.

Nation's top 10 advertisers in 1954, devoting 47% of their expenditures to network TV (see p. 4), spent these aggregate amounts on network TV, network radio, magazines & newspaper sections (network TV & radio in parentheses): Procter & Gamble, \$44,151,220 (\$23,701,228 network TV, \$12,339,668 network radio); General Motors, \$36,774,882 (\$10,304,242 & \$3,780,932); Colgate-Palmolive, \$26,727,057 (\$14,089,737 & \$4,813,770); General Foods, \$25,256,953 (\$9,728,567 & \$3,300,129); Gillette, \$19,499,770 (\$11,540,452 & \$5,562,378); Chrysler, \$18,378,063 (\$8,820,955 & \$1,867,212); GE, \$17,860,888 (\$6,961,548 & \$949,500); Lever Bros., \$17,771,633 (\$7,214,427 & \$4,471,376); R. J. Reynolds, \$16,706,162 (\$11,828,928 & \$1,770,940); General Mills, \$16,120,255 (\$7,630,599 & \$3,724,388).

New officers of AAAA, elected this week at Boca Raton, Fla. convention: chairman, Henry G. Little, Campbell-Ewald, succeeding Wm. R. Baker Jr., Benton & Bowles; vice-chairman, Robert D. Holbrook, Compton Adv.; pres., Frederic R. Gamble (re-elected); secy.-treas., J. Paul Hoag, Hoag & Provandie Inc., Boston. In addition to officers, these directors will serve on operations committee: J. Davis Danforth, BBDO; George C. Reeves, J. Walter Thompson; Victor O. Schwab, Schwab & Beatty.

Alfred D. McKelvy Co. (Seaforth toiletries) is first sponsor to sign for NBC Radio's *Monitor*, new round-the-clock weekend radio service starting June 12 (Vol. 11:15), buying 10 weeks of partic. thru Morse International Adv. on the 5 NBC o-&-m stations. NBC also disclosed this week that Dave Garroway will be one of "communicators" on *Monitor*, in line with its policy of introducing top TV personalities & features on program.

Dancer-Fitzgerald-Sample has been re-awarded \$1,-200,000 annual account for Army and Army Reserve recruiting for fiscal year starting July 1. About \$300,000 will be allocated to TV spot.

Cowan & Dengler Inc. will be dissolved June 1, and Horace W. Dengler & Stuart D. Cowan Jr. become vice presidents of Donahue & Co. Inc.

THREE CPs and Raleigh Ch. 5 initial decision were turned out by FCC this week, while Ch. 6 grant in Milwaukee suburb Whitefish Bay is now in prospect with dismissal of WMIL, which leaves Independent TV Inc. free for grant; latter pays WMIL \$25,000 for expenses.

This week's grants: Tucson, Ariz., Ch. 9, to Tucson TV Co., owned by D. W. & Kathleen Ingram (warehouse, building materials); Ft. Pierce, Fla., Ch. 19, to Gene Dyer, veteran Chicago broadcaster now a tomato grower; Reno, Nev., Ch. 4, to Nevada Telecasting Corp., owned by Robert C. Fish (real estate & refrigeration). One CP was dropped: KWIK-TV, Pocatello, Ida. (Ch. 6).

Examiner Millard F. French, in picking WRAL over WPTF in Raleigh, cited WRAL's superior proposed programs, including "outstanding discussion and educational programs," "greater remote programming possibilities" and "superior planning." Another area for choice was ownership-management integration. And he decided WRAL would better promote "diversification" because WPTF is 50-kw and WRAL is 250-watts.

FCC submitted its Court of Appeals brief in famous McClatchy case, in which McClatchy newspapers are appealing denial of Ch. 10, Sacramento, wherein FCC said it preferred Sacramento Telecasters because of McClatchy's substantial interests in news media.

Commission cited various court decisions to support its contention that "the policy of fostering the greatest number of separate voices for the dissemination of information and opinion to the public has a definite and direct bearing on the public interest. [FCC] has not here or in any other case imposed any presumption against applicants with mass media connections. The mass media connections of any applicant are considered in the light of the other facts in the case, including those which minimize or increase the seriousness of the concentration of control there presented."

In allocations actions, FCC: (1) Proposed shifting Ch. 8 to Moses Lake, Wash., substituting Ch. 11 for Ch. 8 in Walla Walla. (2) Denied request of off-air WKST-TV, New Castle, Pa. (Ch. 45) to let it move to Youngstown and use Ch. 45, stating that others may decide to use Ch. 45 in New Castle if WKST-TV doesn't resume and that station could apply for Ch. 73 in Youngstown if it wants to operate there.

Two more deintermixture petitions were dropped into the hopper. Woodward Bestg. Co., grantee of WTOH, Toledo (Ch. 79) and WBID, Detroit (Ch. 50) asked Commission to shift Storer's WSPD-TV, Toledo from Ch. 13 to Ch. 30 or 51, move Ch. 11 from Toledo to Detroit and give it to WBID—and award Ch. 30 or 51 to winner of 7-way fight for Ch. 11 in Toledo. Noting Storer's petition for deintermixture in Miami (Vol. 11:16), Woodward stated: "Petitioner respectfully herein alleges and adopts, by reference as hereinafter specified, the argument and supporting proof which is set forth in detail in the above-mentioned Storer petition."

WACH-TV, Newport News, Va. (Ch. 33) asked that area's Ch. 10 be given to educators, Ch. 21 to be made commercially available.

WLOK-TV, Lima, O. (Ch. 73) has notified FCC it closed down April 18 for conversion to Ch. 35. Owners George Hamilton & Robert W. Mack, who bought station from Pixley & Case families (Vol. 10:44,49), expected to get back on air April 24, using call letters WIMA-TV.

WTOV-TV, Norfolk (Ch. 27) plans to return to air during May as independent, reports new owner Hyattsville (Md.) used car dealer Temus Bright who recently acquired the property (Vol. 11:11).

WTWO, Bangor, Me. (Ch. 2) plans to open auxiliary studios in Waterville, linked to transmitter by microwave.

NO NEW STATIONS started this week—but one was all set to begin test pattern transmissions when FCC held it up by scheduling April 29 hearing into details of its ownership. WFRV-TV, Green Bay, Wis. (Ch. 5) had asked for STA to begin programming May 1 as ABC & DuMont outlet, but was delayed by hearing called at request of competitor WMBV-TV, Marinette, Wis. (Ch. 11) which protested merger of WFRV-TV with WNAM-TV, Neenah (Ch. 42), now off air (Vol. 11:9). Although WMBV-TV also asked hearing on WFRV-TV's change in studio location and extension of CP, FCC decided to review merger to determine if it involved "forbidden trafficking in permits" and also whether WFRV-TV had tried to "harass" Marinette outlet.

Shipments reported this week: By GE, 12-kw transmitter and components for increase to 23-kw transmitter power, 500-kw ERP, to KTVI, St. Louis (Ch. 36); by RCA, 25-kw transmitter to KFMB-TV, San Diego (Ch. 8). Standard Electronics reports order by WMAL-TV, Washington (Ch. 7) for 25-kw amplifier, along with conversion of present 5-kw transmitter from water to air-cooled, and Alford 3-bay antenna, amplifier due for June 1 delivery, antenna July 1. DuMont has order for 50-kw transmitter to be shipped about July 15 to WDBJ-TV, Roanoke, Va. (Ch. 7), planning fall start. GE reports an order by KTRE, Lufkin, Tex. (Ch. 9), due on air this summer, for 5-kw transmitter and 6-bay antenna; by KDKA-TV, Pittsburgh (Ch. 2) for 6-bay antenna to be delivered May 6; by WENS, Pittsburgh (Ch. 16) for 5-bay antenna, due next week.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KCRA-TV, Sacramento, Cal. (Ch. 3), which got grant April 13, has Sept. 1 target, but hasn't yet ordered equipment or begun construction, reports pres.-gen. mgr. Ewing C. Kelly. Howard J. Smiley is being promoted from KCRA sales mgr. to TV station mgr. W. Herbert Hartman, will be chief engineer for TV-radio. Rep not chosen.

KRMA-TV, Denver (Ch. 6, educational), which got grant in July, 1953, hasn't set target yet, writes supt. of schools Kenneth E. Oberholtzer. Last year it ordered 5-kw GE transmitter with antenna & studio equipment, but problem of financing station developed. Now school board has voted to go ahead with station and it's renegotiating for equipment.

WJRT, Flint (Ch. 12) will start in summer, reports pres. John F. Patt, now that FCC has approved new transmitter site near Chesaning, Mich. He also states construction will proceed despite court appeal pushed by losing applicants Butterfield Theatres and Trebit Corp. (Bitner), turned down by FCC last week in their latest effort to block grant (Vol. 11:16). RCA 50-kw transmitter & 12-bay antenna are on hand. Emsco tower is due in about 45 days. WJRT has leased former WTAC-TV equipment, will be managed by A. Donovan Faust. Base rate will be "at least \$450." Rep will be Free & Peters.

WJDW, Boston (Ch. 44), is attempting to conclude negotiations for tower site, now hopes to be on air next fall, advises owner Los Angeles oilman and film producer J. D. Wrather Jr., also owner of 39% of KFMB-TV, San Diego and holder of 25% interest in application for Corpus Christi, Tex. Equipment is on order from RCA. Rep not chosen.

—————■—————

Three Canadian TV grants recommended April 15 by CBC board of governors now go to Dominion Board of Transport for final approval. They are: Lethbridge (Alta.) TV Ltd. for Ch. 7; CFCY, Charlottetown, P.E.I., Ch. 13; CKNX, Wingham, Ont., Ch. 8.

Color Trends & Briefs: Evaluation of season's big color shows by their 9 sponsors varies markedly, *Advertising Age* learned in survey, results of which were published in April 18 issue. Sponsor-by-sponsor, here are the reactions:

Most disappointed was Raymond Spector, owner of both Hazel Bishop lipstick and its ad agency. Main complaint: "We expected them to be the best available TV shows," but network concentrated "too much on color and not enough on the show." He said shows cost him \$45,000 more each than they would have in black-&-white. "Color is academic at the moment," he concluded.

Earl Perrin, pres. of Sunbeam agency Perrin-Paus, was delighted, on the other hand, stating that color had a large share in selling 1,000,000 electric "Frypans" since their introduction year ago. He said that he has scrapbook full of critics' praise of bacon-&-eggs commercials and that sales staff showed lift from the sponsorship. Sunbeam has signed up for next fall's Sun. series of NBC-TV spectacles.

Reynolds Metals isn't renewing next fall, but TV-radio ad director Jack Boyle says reason is "disappointment with the programs, not with color. What we'd hoped to get was something with a little more programming imagination—on the *Peter Pan* order."

RCA ad director R. H. Coffin gave favorable reaction, of course, because of company's great stake in color, though he did say: "We bought these shows primarily to benefit from the black-&-white circulation," with color impact on dealers and public a bonus. RCA is expected to remain with *Producers' Showcase*.

Ford considers money well spent, though it estimates color costs 40% more than black-&-white. With eye to future, Ford regards color as the "ultimate in advertising."

Oldsmobile spokesmen, on other hand, merely say: "We knew we were pioneering, and we still know it." It's reported that Oldsmobile will keep Sat. NBC-TV series.

Eastman Kodak had sad experience with color *Norby*, which never caught on, but it looks on color TV sponsorship as long-range investment for sale of film. Ad director W. B. Potter is convinced of color's future, saying: "Color adds immeasurably to the beauty, realism and product identification in commercials."

Practicing Law Institute, 20 Vesey St., N. Y., is currently conducting series of Thu. evening sessions on "Current Problems in Radio & Television," primarily treating with program, performer, tax & film aspects. David M. Solinger, Solinger & Gordon, is chairman & moderator; speakers include John P. Allison; Robert Anthoine, associate prof., Columbia Law School; Robert J. Burton, v.p. & resident counsel, BMI; Robert A. Dreyer, Gale & Falk, counsel for DuMont; George A. Elber, Davis & Gilbert; Michael Halperin, Wilzin & Halperin, attorneys for William Morris Agency; W. Spencer Harrison, v.p. in charge of legal & business affairs, CBS; Howard L. Hausman, William Morris Agency; Henry Jaffe, Jaffe & Jaffe, counsel for AFTRA; Jack L. Katz, counsel, General Artists Corp.; Theodore R. Kupferman, v.p. & gen. attorney, Cinerama Productions Corp.; Seymour S. Mintz, Hogan & Hartson, Washington; Benjamin D. Raub, senior attorney, NBC; James R. Schule, Tompkins, Boal & Tompkins, BBDO counsel; Charles B. Seton, Socolow, Stein & Seton; Leonard H. Steibel, Smith & Steibel; Martin Stone, merchandising consultant, ex-secy. to Judge Irving Lehman.

Facts about closed-circuit TV, as outlined by Theatre Network TV pres. Nathan L. Halpern Apr. 20 at Chicago SMPTE convention: More than 4,000,000 persons have viewed closed-circuit TV, and public has spent more than \$5,000,000 to see theatre TV. Company sponsors have spent more than \$6,000,000 on closed-circuit TV business

For Westinghouse, consumer products ad mgr. Laurence W. Scott feels that *Best of Broadway* series on CBS-TV has been effective and that color has been a bonus. He's convinced color is powerful medium where appetite, beauty and styling are concerned—but Westinghouse hasn't decided whether it will sponsor color this fall.

Chrysler will continue CBS-TV *Shower of Stars*, the ad journal reporting: "For one thing, its cars are currently 'selling like mad,' though the company doesn't pretend to know which part of its TV lineup the buying impulse is coming from. Another reason is quite special: Chrysler reportedly is not paying a premium for *Shower*, is getting it for the same price as for [black-&-white] *Climax*."

* * * *

Upcoming network color schedules: NBC-TV—April 25 & 26, *News Caravan*, films of A-bomb site and blast, 7:45-8 p.m.; May 2, *Producers' Showcase*, "Darkness at Noon," with Lee J. Cobb, David Wayne, Ruth Roman, Oscar Homolka & Joseph Wiseman, 8-9:30 p.m.; May 7, *Max Liebman Presents*, "Desert Song," with Salvatore Baccaloni, Otto Kruger, John Conte, Bambi Linn & Rod Alexander, 9-10:30 p.m. CBS-TV—May 4, *Best of Broadway*, "Broadway," with Joseph Cotten, Piper Laurie, Gene Nelson, Keenan Wynn, Martha Hyer & Akim Tamiroff, 10-11 p.m.; May 12, *Shower of Stars*, "High Pitch," with Marguerite Piazza, Tony Martin, Wm. Frawley & Vivian Vance, 8:30-9:30 p.m.

Four hours of color weekly, in addition to spectacles, is NBC-TV's goal for this summer and fall, exec. v.p. Robert W. Sarnoff told affiliates meeting in New York this week. For this fall, he said, NBC hopes to have daily 5-6 p.m. children's show in color, along with "some key evening shows," segments of *Home* and 3-4 NCAA football games. He said NBC has more color facilities than all other networks combined and that planning is underway now for 1956-57.

First indoor color remote on West Coast—as distinguished from outdoor remotes and color studio originations—was scheduled for April 22 by KTLA, Los Angeles. Program was 1½-hour colorcast of "Las Floristas Head-dress Ball" from Coconut Grove, sponsored by Apple Valley Bldg. & Development Co. and Motorola.

TNT this month will present its 82nd large-screen closed-circuit telecast (latest use was at Apr. 19 GE stockholders' meeting). Largest theatre-TV picture is 47x65 ft., exhibited at drive-in theatres with mobile equipment "with sufficient light and clarity for audience enjoyment." Halpern said technical problems of big-screen TV differ from those of home TV, and urged SMPTE to help closed-circuit industry to "establish proper standards." He strongly backed "network concept"—one firm handling complete facilities, production and service—to provide "stabilization" of closed-circuit medium.

New rate of payment for community antenna service is offered by Walla Walla's Blue Mountains TV Cable Corp. to potential subscribers who want service on temporary basis—fearing they may have to move or desiring to give system a trial. Instead of paying conventional installation charge and monthly fee (about \$135 & \$3.75, respectively), they pay straight \$7 monthly as long as they wish—converting to permanent basis any time and paying for connection on installment plan.

National Community TV Assn. membership totals 178—an increase of 85 during last year, 35 since Jan. 1—according to exec. secy.-gen. counsel E. Stratford Smith. He estimates there are now 375 systems with 100 or more connections each, plus 200-300 serving less than 100. Currently, heaviest rate of growth is in South and Pacific Northwest.

TRENDS IN THE NEW MODELS DUE AT MIDYEAR: Greater use of the vertical chassis, more extensive use of printed circuits, prices at or about present levels -- these are the outstanding facts about the new TV lines to be introduced in June-July. Though manufacturers contacted this week were understandably reluctant to be specific two months in advance of marts and distributor meetings, they were, with few exceptions, generally agreed on the basic trends. There will also be usual new cabinet styling and of course various new gimmicks, including clock timers (Vol. 11:13).

New lines are being shaped with eye to second-set market, whose big potential was underscored by American Research Bureau's survey showing only 3.7% of all TV homes, or 1,300,000 out of total of 35,000,000, had 2 or more sets as of Jan. 1955 (Vol. 11:16). Set makers generally felt this would tend to keep prices at present low levels. Significant exception to this view is Motorola v.p. Ed Taylor, who said:

"A second set doesn't have to be a very cheap job, you know. A lot of folks who now have 17-in. sets could very well buy a high-end 21-in. or even a 24-in. as a second set, putting the 17 in the bedroom, children's room or den. I don't think we've had enough experience with the second set to know what size it represents."

Spokesman for color-conscious RCA, whose lines are watched closely for possible industry-wide trends, said prices of black-&-white sets can't logically be raised now by industry-at-large, considering current state of color development. He clings to view that consumers, as in the days of color's big publicity splashes last year, are once again unwilling to sink a lot of money into a monochrome set.

"Any manufacturer who can sweat out this interim period until color comes through will do all right," he said. "It will mean continuing low profits -- but if he tries to raise prices now, he'll price himself right out of the market."

RCA is going all-out for color, with its new 21-in. tube, and makes no bones about its intention to be biggest customer of its own Lancaster color tube plant's 30,000-per-month capacity if others don't buy. It's expected to announce lower price on its new 28-tube color set in week or so (Vol. 11:15). For news about other manufacturers and their plans for color, see p. 13.

* * * *

Trend to vertical chassis sets, holding out lure of more compact cabinets, has been evident for year, of course, and you can expect to see it accelerated with new lines. Such vertical chassis producers as Admiral, Crosley, Raytheon and others have been very pleased with them and can be expected to include more of them in new lines. An exception, however, is Emerson, which will continue all-horizontal line.

Status of 24-in. set in current low-end market, and where it will fit into new lines, is source of lively speculation in trade. Many manufacturers and distributors have privately expressed some unhappiness about sales of 24-in. sets, even at bargain prices. RCA has discontinued production of 24-in. sets this quarter, but spokesman emphasized it was pleased with their sales performance, and had originally planned to halt output at end of first quarter in view of seasonal trend to lower-priced merchandise. RCA will have 24s in new line. Emerson's Ben Abrams says he's pleased as punch with his 24-in. sets retailing at \$250 for table model, \$330 for console; they account for 15% of his production & sales currently, and he plans to expand 24-in. offerings in new line.

* * * *

TV trade no less than other industries is encouraged in its planning by some very bullish currents in nation's economy -- strengthening convictions that things should go very well for consumers' market rest of year. For example:

Annual gross national production rate (output of goods & services) is up from \$362 billion at end of 1954 to \$370 billion in March; personal income up from 1954's

low point of \$283.4 billion to \$292 billion rate in March, a new high; employment up 400,000 in March over year ago, unemployment down 548,000; new plant & equipment spending on increase, reversing 2-year downtrend.

Authoritative United Business Service offers these predictions for remainder of 1955: (1) Expansion in business activity will continue throughout first half of year. (2) The slowdown this summer -- stemming from auto industry, labor trouble, normal seasonal factors -- will be moderate. (3) Industrial expansion will get under way again next fall and be well maintained during the fourth quarter.

Unfavorable factors cannot be overlooked, notably demands of labor unions for guaranteed annual wage and increase in consumer indebtedness. But taken by & large, there's much support for observation of N.Y. Herald Tribune Syndicate's Washington columnist Roscoe Drummond that "a new period of growth and stability is at hand."

* * * *

TV production totaled 146,472 week ended April 15, compared to 150,453 units in preceding week and 163,746 in week ended April 1. It was year's 15th week and brought output for year to date to 2,400,000 vs. 1,750,000 same 1954 period.

Radio production totaled 273,639 (145,520 auto), compared to 275,849 in week ended April 8 and 287,740 week before. For 15 weeks output was 4,250,000, compared to approximately 2,950,000 in corresponding period year ago.

Topics & Trends of TV Trade: Admiral sticks by its advertising claims, insists they're perfectly legal and proper, in answer this week to Federal Trade Commission's complaint of April 1 (No. 6319) charging misrepresentation in its national ads (Vol. 11:14). Though it maintains claim is correct, Admiral said it no longer advertises that its "giant 21-in picture tubes" provide 20% more screen area than other 21-in. sets—the single specific objection cited in FTC complaint.

Edward F. Downs, attorney representing FTC in complaint, said "we feel confident we can sustain our case." Hearing has been set for May 17 in Chicago before FTC examiner James A. Purcell. Downs said he will decide next week, after studying Admiral's brief answer more fully, whether to request a postponement on the basis of its contents.

Admiral reply states its "giant 21-in. picture tube" does indeed provide 20% more screen area than many TV receivers made by its competitors and other 21-in. sets made by itself. It denies FTC's contention that as result of such ads trade has been "unfairly diverted" to Admiral from its competitors. It further declares that the complaint fails to state specifically any "unfair and deceptive acts and practices and unfair methods of competition in commerce within the intent and meaning of the Federal Trade Commission Act." Reply was signed by Admiral counsel Pope & Ballard, 120 S. La Salle St., Chicago.

[Note: An FTC complaint is not in itself a punitive action. It is merely a preliminary step to determine if prosecution is warranted. In the past, many such complaints have ended with filing of consent judgment in which the company, without admitting guilt, promises to halt the alleged practices in future.]

* * * *

The Nebraska Farmer, published in Lincoln, Neb., surveying 1955 buying plans, reports that 11.9% of 843 responding farm families stated they would buy TV sets this year which, projected, indicates 11,878 units. Radios will be bought by 3%, record players by 1.7%.

Canadian RTMA holds 26th annual general meeting at Sheraton Brock Hotel, Niagara Falls, Ont., June 2-3. Committees meet first day, board & special panels final day.

National Electronic Distributors Assn. moves headquarters to 4704 W. Irving Park Road, Chicago (phone Avenue 3-6445).

Crosley's offer of money-back guarantee to N. Y. area customers if its "Custom V" 21-in. receiver does not "out-perform" all other TV sets (Vol. 11:13) has proven so successful that only 2 sets have been returned to dealers since offer began March 20, said Crosley distributor Gerald O. Kaye. He declared that 70 additional dealers have taken on Crosley TV line since start of heavily-promoted offer, which he said will be extended indefinitely. No conflict with N. Y. Better Business Bureau regulations against "out-performance" ads was seen by Kaye, who is a director of the local BBB.

TV shipments to dealers totaled 1,278,250 in first 2 months of 1955, compared to 1,073,000 in corresponding period year ago, reports RETMA in state-by-state tabulation (county-by-county breakdown available from RETMA to members on request). New York led in shipments, with 113,068; California second, 86,776; Pennsylvania, 81,376. Feb. shipments were 640,771, compared to 637,479 in Jan. and 460,378 in Feb. 1954.

Stromberg-Carlson adds these new models at distributor meetings this week: Cremona, 21-in. mahogany console \$260, bleached mahogany \$270; Milano, 21-in. open-face mahogany console \$320, bleached mahogany \$330, walnut \$350; Regency, 21-in. full-door mahogany console \$460, bleached mahogany & cherry \$470. Marlite tops are \$10 extra on Cremona, \$20 on Milano.

Bill striking at "bait" ads on TV was signed this week by Gov. Harriman, making it misdemeanor in State of N. Y. for advertisers to misrepresent merchandise on TV. Violators can be fined up to \$500, jailed for year, or both, for giving false statements when arranging for TV advertising. It provides no penalties for station personnel unless they know in advance of fraud.

Canadian RTMA has been rebuffed in its fight to eliminate or reduce the 15% excise tax on TV-radio sets & parts, which finances CBC's TV operations. Finance Minister Harris, by including tax in his budget, assured its continuance for at least another year.

Another excise tax bill (HR-5694), which would reduce tax on all manufactured products to 5%, has been introduced by Rep. Mason (R-Ia.) and referred to Ways & Means Committee.

Halicrafters is now manufacturing TV receivers for Sears Roebuck's "Silvertone" line, supplemental to Sears' main supply from Warwick and Pacific Mercury.

COLOR PRODUCTION plans of manufacturers vary as much as ever — because of uncertain public demand — but some producers have agreed with RCA that only possibility of breaking deadlock is to take gamble of going into production (Vol. 11:16).

One major industry figure, contacted in Chicago by RCA this week in its efforts to enlist others in manufacture and promotion of color sets, told us: "Even if we have to lose money at the outset, I think the new price should be \$695 at the very top. The new 28-tube RCA chassis, which really is 26 tubes plus rectifier and picture tube, makes a good set and, whether it's temporary or the ultimate thing, the RCA 21-in. picture tube works very nicely. My own feeling is that Sylvania and CBS have got to come to it, for there must be uniformity of tubes as well as uniformity of action in the job of putting over color."

One of the lesser manufacturers is understood to have told RCA: "If you will furnish us the components so that we can assemble a set to sell for \$500, we know we can get color off the ground."

CBS pres. Frank Stanton, speaking at stockholders meeting in New York this week, said he was disappointed with color's progress, predicted it would be 5-10 years before color was as prevalent as black-&-white. He doubted industry would produce 200,000 color sets this year—as predicted by some. CBS-Hytron is holding off mass production of 22-in. rectangular all-glass tube until there's clear demand from customers, he said.

Latest to make substantial commitment to color is Hoffman Radio, which this week announced first shipments of 21-in. sets using RCA tube, with 24 receiving

tubes and 4 rectifiers, retailing for \$895. Sales mgr. Walter L. Stickel said plans call for "substantial" production—reportedly 5000 this year. Restricting shipments to those distributors with color-trained servicemen, Hoffman is delivering to Oklahoma City, Seattle, San Jose, Minneapolis, San Diego, Los Angeles, San Francisco, Davenport, Phoenix.

Stromberg-Carlson announced it would be in "full-scale" production of 21-in. sets in June or July, a spokesman stating: "We definitely will be in a competitive position" with regard other color set producers.

Among others planning to bring out color sets this summer are: Emerson, aiming at \$700-\$750 price for 21-in.; Hallicrafters, Magnavox and Sentinel, planning to show 21-in. in July. Admiral has modest 21-in. production, will keep it going, tuned to demand. CBS-Columbia and Westinghouse are planning on 22-in. rectangular tube, don't know when production will begin—though latter has said it's aiming for fall. Packard-Bell has target of \$695 set in Aug.-Sept.; Sylvania & Zenith are uncommitted.

Philco is still quiet about color plans, reports it's still working on one-gun tube. Regarding the tube, we apparently erred last week in assuming that RCA's Harry Seelen was referring to Philco development when he spoke of "sensing" tubes that required photoelectric devices and servomechanisms (Vol. 11:16). "The facts are," Philco spokesman said, "that the Philco color TV receiver, as it exists today in the laboratories, employs neither photoelectric devices nor servomechanisms. On the contrary, the chassis for the Philco color receiver is about 20% lighter than the chassis for a 3-gun tube type receiver of approximately the same picture area."

Trade Personals: David H. Cogan, onetime pres. of CBS-Columbia, elected chairman of Victoreen Instrument Co., Cleveland (parts), succeeding Bruce A. Coffin, who continues as director; Raymond F. Shima elected v.p.-treas., succeeded as secy. by Richard T. Brown; C. W. Haller re-elected pres. . . . Dan Packard, veteran of 30 years in major appliance industry, serving last 3 years as gen. sales mgr. of Kelvinator, joins McCann-Erickson May 10 as v.p. & senior marketing exec. . . . Paul M. Kuefler, ex-American Microphone Co., Pasadena, named gen. mgr. of Cornell-Dubilier's west coast div., headquartering at new plant-lab at 4144 Ocean Park Ave., Los Angeles, opened April 20 as part of ceremonies celebrating company's 45th anniversary . . . C. G. (Rip) Mayer, London representative of RCA, has been transferred to gen. managership of Laboratories RCA Ltd., 169 Hardturmstrasse, Zurich 5, Switzerland; his asst. Dr. H. R. L. Lamont is in charge in London . . . Grant Gardner, Wells-Gardner sales v.p., elected a director, replacing Herbert A. Johanson, resigned . . . Kenneth R. Johnson, Packard-Bell gen. sales mgr., elected a v.p. . . . Earl L. Hadley, ex-Westinghouse TV-radio div. & Bendix Radio, named adv. director of Necchi Sewing Machine Sales Corp., N. Y. . . . Albert G. Shafer promoted to v.p. in charge of western div., Radio Condenser Co.; John W. Crowfoot elevated to mgr. of special apparatus div. . . . N. L. (Nibs) Jochem appointed Gates Radio engineering director . . . E. C. Slaughenhaupt promoted to manufacturing v.p., Kenneth E. Phillips to v.p. & purchasing director of Muter subsidiary Rola Co., Cleveland . . . Paul F. Dixon promoted to national sales mgr., Peter H. Whelen to adv. & sales promotion mgr., Motorola Canada Ltd. . . . Martin Sheridan, Admiral director of public relations, speaks on "Automation in TV" to Navy Supply Officers' Club, Great Lakes, Ill., April 27 . . . Richard W. Mitchell resigns as v.p. of I.D.E.A. Inc. (Regency products), will continue as a director . . . Robert Dressler, Howard R. Patterson & A. Crawford Cooley elected v.p.'s of Chromatic TV Labs.

DISTRIBUTOR NOTES: Motorola appoints Arizona Distributors Co., 1891 W. Roosevelt Road, Phoenix (Wm. Sipprell, pres.), replacing Arizona Wholesale Supply Co. . . . Raytheon appoints Radio Distributing Co., 432 S. Carroll St., South Bend . . . Olympic Radio appoints Progressive Appliance Distributors Inc., 1192 E. 40th St., Cleveland, replacing Milmar Inc. . . . Bendix Radio appoints Huron Electric Supply Co., Buffalo . . . RCA Victor Distributing Corp. promotes J. P. Mallon to operating mgr. of Detroit branch, succeeding G. D. Mitchell, now asst. to secy.-treas. of Chicago branch . . . Emerson Radio of Ohio Inc., Cleveland, moves to 4300 Euclid Ave. . . . Capehart-Farnsworth appoints Buckeye Electronic Distributors Inc., 242 E. Long St., Columbus, O. (Al Siegel, pres.). . . . DuMont appoints Uptown Radio Co., Detroit (Milton Kevreson, owner).

RCA Victor reports dollar volume of its 33 $\frac{1}{3}$ & 45rpm records increased 30% in first quarter over first 3 months of 1954, chiefly as result of industry-wide price slashes of up to more than 30% at start of year (Vol. 11:1-2). Reporting on nationwide survey, Emanuel Sacks, v.p.-gen. mgr. of record div., said: "We are convinced that the simplified pricing structure which we pioneered is proving to be the salvation of dealers throughout the country." In addition to price reductions, Sacks attributed sales increase to improvement in quality of recordings and phonograph reproducing equipment, and public's "enthusiastic acceptance" of high fidelity.

Annual "guesstimates" of Canadian TV manufacturers on 1955 TV sales, in informal poll conducted by Canadian RTMA, revealed average of 613,300, estimates ranging from low of 475,000 to high of 730,000. Average estimate also was for 3000 color sets to be sold this year. Average production "guesstimate" was 892,560, compared to actual output of 593,856 in 1954.

A. Cameron Ball promoted to gen. mgr. of Western Merchandise Mart, San Francisco, succeeding Frank K. Runyan, retired.

Financial & Trade Notes: American Broadcasting-Paramount Theatres improved its earnings position considerably during first 1955 quarter, with theatre business continuing upward and telecasting-broadcasting operations now showing results of improved programming, according to letter to stockholders this week from pres. Leonard H. Goldenson. ABC div. operating earnings, while not stated, are said to be running well ahead of last year, though that division showed loss in 1954 due to higher TV and programming costs (Vol. 11:14).

Net profit from operations during first quarter was \$1,917,000, or 45¢ per share on 3,977,096 shares outstanding; \$33,000 additional came from net capital gains. In same 1954 period, net operating profit was \$1,039,000, or 23¢ on 3,967,511 shares; capital gains were \$77,000. Up to April 8 this year, company has purchased 7500 shares of its preferred stock at average of \$20.27 in line with policy of purchasing its preferred stock in the open market to apply against its annual sinking fund requirement of 24,322 shares of preferred. In 1953, it purchased and retired 74,422 shares of preferred.

Proxy statement for May 17 shareholders meeting discloses board has nominated v.p. Sidney M. Markley as director to fill vacancy created by death of Herbert J. Schwartz, pres. of City Stores Co. It also disclosed these officer-director compensations for 1954 (common stockholdings in parentheses): John Balaban, pres. of subsidiary Balaban & Katz Corp., \$139,400 (holds no shares); A. H. Blank, pres. of Tri-States Theatre Corp., \$58,106 (2587 shares); Leonard H. Goldenson, pres., \$181,429 (2450); Walter W. Gross, v.p. & gen. counsel, \$57,143 (100); Robert H. Hinckley, v.p., \$50,000 (none); Robert E. Kintner, v.p. & pres. of ABC div., \$77,500 (3000); Robert H. O'Brien, financial v.p. & secy., \$54,643 (100); Robert B. Wilby, pres. of subsidiary Wilby-Kincey Service Corp., \$41,058 (1018). Messrs. Balaban, Goldenson, Gross, Markley and O'Brien also hold options on 7500, 75,000, 12,500, 5000 & 12,500 shares of common stock, respectively.

Common stockholdings of other officer-directors: Earl E. Anderson, v.p. ABC div., 1974 (also trustee of Edward John Noble Foundation, owning 12,640 shares of preferred & 337,304 shares common; Charles T. Fisher Jr., pres., National Bank of Detroit, 500; Robert L. Huffines Jr., pres., Textron American Inc., 1000; Wm. T. Kilborn, pres., Flannery Mfg. Co., Pittsburgh, 200; Walter P. Marshall, pres., Western Union, 200; Edward J. Noble, owns 8949 common & 324,601 preferred (also trustee of Edward John Noble Foundation, owning 12,640 shares preferred and 337,304 common); Owen D. Young, 1500.

* * * *

Cornell-Dubilier sales in quarter ended March 31 approximated the \$9,950,000 volume of the quarter ended last Dec. 31, though earnings probably were lower because of increased competition, said pres. Octave Blake at ceremonies marking this week's opening of new plant in Los Angeles, firm's 15th. Sales for current fiscal year ending Sept. 30, he said, will probably equal the \$37,149,778 volume of preceding fiscal year, when earnings were \$1,729,640 (\$3.25 a share).

CBS Inc. 3-for-1 stock split was approved at annual stockholders meeting April 20, along with increase to 12,000,000 in total that may be issued. On basis of present shares, 4,023,669 of Class A and 3,302,340 of Class B will be outstanding after split expected to be effected April 29. Stockholders will retain old certificates, receive 2 additional shares for each held.

Muter Co. reports first quarter sales of \$3,162,693, net profit of \$101,687 (14¢ on 721,450 shares), compared with \$3,187,626 and \$111,173 (16¢ on 694,783) for same 1954 period.

GROSS TELECASTING Inc., licensee of WJIM-TV, Lansing, Mich. (Ch. 6) and radio WJIM (250 watts, 1240 kc, NBC & ABC), day after FCC by 5-2 vote assented to transfer of corporate control April 21, placed 193,000 shares of its \$1 par common stock on market at \$15.75. Paine, Weber, Jackson & Curtis headed underwriters group that included Hornblower & Weeks, Merrill Lynch, Pierce, Fenner & Beane and Reynolds & Co.

It's first instance of a single TV-radio property offering its stock to public along lines of Storer and Bitner groups. Chief owner Harold Gross and family will continue to hold approximately 51% interest, public to own about 48%.

In dissent, Comrs. Hennock & Bartley suggested hearing, calling it "a departure from sound broadcast licensing policy" because "the essential 'asset' here involved, the frequencies on which it operates, does not belong to the licensee (see Section 304) but is merely a permit involving a maximum 3-year term subject to renewal." Joint dissent added: "I am concerned lest the rights of unknown minority stockholders interfere with the prime responsibility of the licensee to render a public service, as contrasted with the officers' responsibility to public stockholders unfamiliar with the obligations of a broadcast licensee."

For SEC registration data, including revenue, profit & asset reports, see Vol. 11:13, p. 3.

Electronics Investment Corp., Bank of America Bldg., San Diego, Cal., designed as an open-end mutual investment fund along lines of Television-Electronics Fund, has filed SEC registration statement and issued preliminary prospectus covering 2,000,000 shares of \$1 par capital stock to be offered at \$5 per share through William R. Staats & Co., Los Angeles. Stressing investment in the "electronic age," statement indicates at least 66% of portfolio will be in securities of electronics companies, but no investment shall be made for purpose of exercising control or management. Project is headed by Charles E. Salik, youthful ex-broadcaster who sold his San Diego radio station for \$250,000 last year, and obtained about \$575,000 for his option on one-third of KFSD-TV, San Diego when it was purchased with radio KFSD last year for \$3,200,000 by Fox, Wells & Co. (Vol. 10:31, 42). He's a director in his father's Texas & N. Y. textile firms, Esskay Mfg. Co. & Westway Mfg. Co. John P. Chase, head of Boston investment advisory firm bearing his name and director of various banking & industrial enterprises, has been retained as investment adviser and is a director. Washington counsel, also a director, is Bernard Koteen, of Koteen & Burt. Other officers & directors are Richard T. Silberman, v.p., who is pres.-gen. mgr. of Kay Lab, San Diego (electronics mfr.) and who formerly was in electronics dept. of Convair div., General Dynamics Corp.; William J. Ivans Jr., director, of LaMesa, Cal., now chief electronics engineer, Convair; Byron F. White, secy.-treas., San Diego attorney. Technical advisory board consists of Dr. Charles Stark Draper, director of MIT Instrumentation lab; Henry P. Kalmus, chief of electronic research & development, Diamond Ordnance Fuze Lab, Dept. of the Army, a onetime Zenith Radio physicist; Dr. Joseph M. Pettit, professor of electrical engineering, Stanford U and ex-super-vising engineer, Airborne Instruments Laboratory Inc.

P. R. Mallory & Co. earned \$606,792 (85¢ per share) on sales of \$16,264,164 in first quarter of 1955, compared to \$390,998 (50¢) on \$14,664,955 in same 1954 period.

Bitel-McCullough Inc. reports 1954 net income of \$622,761, or 83¢ per share on 748,546 shares outstanding, vs. 1953 net of 596,871, or 88¢ on 680,497 shares.

Skiatron Electronics & Television Corp. has been approved for listing on the American Stock Exchange.

Electronics Reports: Texas millionaire Clint Murchison's unhesitating endorsement of electronics as a career for his own youngsters, when interviewed by Ed Murrow on *Person to Person* March 25 (Vol. 11:13), took concrete form this week when it was disclosed that Murchison-backed Easy Washing Machine Corp., Syracuse, has put up \$2,000,000 capital for expansion of National Co., Malden, Mass., makers of communications receivers, electronic components, etc. Also in deal are Sid W. Richardson and Perry R. Bass, Ft. Worth financiers.

Ten-year debentures convertible to common will be issued by National in amount of \$1,100,000, addition to which it will have access to a 5-year revolving credit fund of \$900,000. Said Easy pres. W. Homer Reeve:

"Electronics continues to be an increasingly important factor in the home appliance industry in the development of new features and products as well as in the manufacturing process of these products. Therefore, we consider it advantageous for our company to be 'in on the ground floor' for potential new developments resulting from National's extensive engineering and research activities."

Reflecting industry's concern over wide-scale excursions of aircraft manufacturers into electronics business (Vol. 11:7), Hoffman Electronics pres. H. Leslie Hoffman told Los Angeles meeting of Radio Technical Commission for Aeronautics that electronics industry is not working at full capacity and can take on considerably more military work than it is now doing. "Frankly we are puzzled," he added, "as to why some of our friends in the aviation business feel it is necessary to continually expand their electronics activities when the services, facilities and personnel are available for many of these functions within the already existing industry."

Officers of Datamatic Corp., newly formed Waltham, Mass. data processing systems firm jointly owned by Raytheon and Minneapolis-Honeywell (Vol. 11:16): Minneapolis-Honeywell v.p. John J. Wilson, pres.; M-H asst. to pres. Walter W. Finke, v.p. & gen. mgr.; Raytheon asst. v.p.-equipment engineering director J. Ernest Smith, v.p.; Raytheon senior v.p.-treas. David T. Schultz, treas. Other directors are Paul B. Wishart & Charles F. Adams Jr., presidents of M-H & Raytheon, and M-H exec. v.p. Alfred M. Wilson.

To relieve serious shortage of engineers, nationwide engineers' training program is being explored by group representing universities, unions, management, TV & motion picture industries. This was disclosed by pres. John G. Frayne of SMPTE in closing convention address April 22. Expressing concern that Russia is now graduating 43,000 engineers a year vs. the U.S.'s 20,000, he said group held first meeting last week on west coast, plans to analyze findings and make recommendations soon.

Protection of radio-astronomy frequencies is envisioned by FCC in Public Notice 55-483 issued Apr. 21 seeking information to determine whether rule-making is necessary. Directed to organizations engaged in radio-astronomy, it asks locations of existing & planned observatories and laboratories, essential & desirable frequencies, schedule of observations, data on amount of interference permissible, etc.

Elgin National Watch Co. this week announced purchase of Advance Electric & Relay Co., Burbank, Cal., and said the acquisition makes Elgin one of nation's largest makers of high precision electrical relay switches.

Sperry electronic tube div. has completed new \$900,000 plant in Gainesville, Ala., is now installing equipment, according to Joseph C. Brenner, works mgr.

Electronic trouble-shooting techniques are applied to automotive ills by new "engine analyzer" developed by Socony-Vacuum Oil Co. and made available this week for general use by Allen B. DuMont Labs, which will manufacture and sell it under licensing agreement. The 60-lb. portable instrument contains oscilloscope, can be operated on 110-v. or auto battery power. It can diagnose auto ignition faults in less than one minute, will also locate pre-ignition faults and gives simultaneous pictures of behavior of each cylinder in an operating engine. Picture patterns depicting 65 engine ailments have been identified on analyzer's screen.

"Electronics for Automation and Automation for Electronics" will be subject of RETMA symposium Sept. 26-27 at U of Pennsylvania. Subjects of 5 sessions planned and their chairmen: Mechanization of high volume assembly, J. Harrington Jr., United Shoe Machinery Corp.; data sensing, processing & utilization, D. A. Griffin, automation consultant; future of automation (panel discussion), Dr. W. R. G. Baker, GE; automation for low volume production, D. Cottle, GE; redesign for automation of components & products, W. Hannahs, Automatic Production Research.

Anticipating "rapid growth of color TV," GE this week announced it will build \$6,400,000 plant at Irmo, near Columbia, S. C., to produce aluminum electrolytic capacitors. Located on 135-acre site, plant will provide 90,000 sq. ft. of production area in 2 manufacturing buildings, and an additional 15,000 sq. ft. of office space. Plant eventually will employ 700, with limited production due to start early in 1956.

Movies still lead TV in color superiority because of better control and standardized processes, according to Donald G. Fink, Philco director of research for TV-radio-appliances. Addressing SMPTE convention in Chicago this week, he said it's up to TV engineers to narrow the gap. As for TV market generally, Fink hoped that industry would emulate auto producers—upgrading performance and upgrading price, if necessary.

Indiana Steel Products Co.'s contract to purchase Ferroxcube Corp. of America (Vol. 11:13) has been "terminated," and Ferroxcube will continue to be owned and operated jointly by Sprague Electric Co. and Philips Industries Inc. (Philips of Holland).

Walsco Electronics Corp., 3602 Crenshaw Blvd., Los Angeles (TV antennas & chassis) has been purchased by TelAutograph Corp., N. Y., which produces and leases system for transmission of handwritten messages by wire. Walsco becomes a div., Walter L. Schott continuing as pres.

Multiplexing equipment, to be used under new FM functional music rules (Vol. 11:13), will be available from Gates Radio within 90 days, according to National Music-time Corp., which plans to offer stations tapes carrying 8 hours of instrumental music. Company is subsidiary of Audio-Video Products, 730 Fifth Ave., N. Y., is working with Lang-Worth which will continue to service AM stations.

Experiment in commercial TV in Morocco has failed, as French Govt. prepares to buy out privately owned station in Casablanca, which lost average of \$57,000 a month in first year. Compagnie Marocaine de Radio-Television (TELMA), partly financed by American private capital, will be sold to Radiodiffusion-Television Francaise for a reported \$2,285,000. Station will remain on air.

Technical description of large-screen projection color is presented by RCA's Louis L. Evans & R. V. Little Jr. (latter now Remington Rand) in April *Journal of the SMPTE*.

SMALL-MARKET STATIONS will have access to more top network programs as result of 2 developments announced April 22:

(1) CBS disclosed new "Extended Program Service plan" to make available, on sustaining basis, 20-30 CBS commercial programs to affiliates in markets where stations are unordered by sponsors. Plan begins experimentally May 23, is similar to NBC's "Program Service Plan," whereby unordered affiliates are permitted to carry certain NBC-TV shows and to substitute locally-sold commercials for deleted network commercials (Vol. 11:15).

(2) NBC exec. v.p. Robert W. Sarnoff told affiliates meeting that network is working on plans to let unordered optional affiliates use kines of network shows, after their regular run, for sale to local sponsors. Stations would pay small handling charge. This would be in addition to the live Program Service Plan shows now available to interconnected stations. This live lineup was increased this week to 22¾ hours weekly with addition of *Ding Dong School* and *News Caravan* to roster of shows offered non-commercially to unordered affiliates—which already includes *George Gobel*, *Sid Caesar*, *Today*, *Home, Tonight*, etc.

CBS-TV pres. J. L. Van Volkenburg said that, though Extended Program Service shows would be offered at first on sustaining basis only, "studies are under way in order to make some network programs available on a cooperative basis to stations not ordered by advertisers." This would permit these stations to sell time during these network programs, as is now the practice under NBC's Program Service Plan. Van Volkenburg said programs would be added to list as rights are obtained. Participation will be limited to stations in areas where there is "no significant overlapping circulation" with stations already carrying same programs on commercial basis.

By bare 4-3 vote, FCC voted license renewal of radio WOL, Washington, over dissents of Comrs. Lee, Doerfer & Hennock, who charged station with "over-commercialization" and carrying "bait-&-switch" pitches. Comr. Lee's blunt dissenting statement, in which other 2 concurred, noted: "Because some of the others are guilty of the same practice, it is urged here that we should not single out this particular station. But the short answer to that is that we should firmly exercise our jurisdiction as the cases come before us." Lee called attention to offers of \$14.95 vacuum cleaners, followed by attempts to switch customers to \$125 units. "It is claimed that there has been an improvement at WOL," he stated. "If so, the improvement has been negligible." WOL pres. Henry Rau, former pres. of Fly & Harwood Appliance, Memphis, stated that station is member of Better Business Bureau, carries no commercials unacceptable to BBB. "We do not feel we are over-commercialized," he said. "Perhaps the best answer we can give is that according to the Pulse audience measurement survey, the audience of WOL in the Washington area has increased by approximately 50% since we took over in the middle of Nov., 1953."

Two applications were filed with FCC this week—both for outlets in U. S. territories: For Ch. 12 at Mt. Haleakala, Maui, Hawaii—same location as Ch. 3 satellite which went on air last week (Vol. 11:16)—by KVMI, Maui, which plans to rebroadcast programs of KONA-TV, Honolulu; for Caguas, Puerto Rico, Ch. 11, by WKVM, San Juan. Commission now has 159 applications on file (16 uhf). [For details, see *TV Addenda 20-O* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

Licensed TV receivers in Britain totaled 4,407,393 March 1, increase of 99,621 during Feb.

NBC-TV affiliates convention in N. Y. April 21-22, in addition to getting fill-in on color plans and extension of option affiliates' program plans (see adjoining column & p. 10), heard report from Richard A. R. Pinkham, v.p. in charge of network programs, that evening time this summer is virtually sold out, that 250 individual advertisers are expected to use network this year, and that this fall will see continuation of trend to 90-min. & hour programs. He also noted "upsurge of interest in daytime programming," as indicated by recent sales on *World of Mr. Sweeney*, *Modern Romances* & *Tennessee Ernie*. Pres. Sylvester L. Weaver Jr. said that each NBC-TV program will stress "informational content." He added: "We must aim up, not down. This means use of plot that reflects credit on the human side instead of discredit, that brings awe and wonder and excitement and exhilaration to someone because of the solution of a human problem by a human being in a predicament." At conclusion of meeting, affiliates adopted this resolution: "NBC-TV affiliates hereby express their renewed confidence in NBC's sales and program policies and unanimously feel that the accomplishments in sales and programming concepts, as expressed by the summer and fall schedules will materially increase NBC's leadership as the No. 1 advertising medium." Elected officers and members of affiliates exec. committee: chairman, Walter J. Damm, WTMJ-TV, Milwaukee, re-elected; vice-chairman, Clair McCollough, WGAL-TV, Lancaster; secy.-treas., Wm. Fay, WHAM-TV, Rochester; Jack Harris, KPRC-TV, Houston; Robert Hanna, WRGB, Schenectady; W. W. Warren, KOMO-TV, Seattle; Fred Mueller, WEEK-TV, Peoria; James Moore, WSLS-TV, Roanoke; Robert Lemon, WTTV, Bloomington, Ind.

NBC-TV severs affiliation with WTVR, Richmond (Ch. 6) as of June 1, and this week reported it has signed affiliation with upcoming WXEX, Petersburg, Va. (Ch. 8), controlled by Tom Tinsley, who operates radio WLEE in Richmond and WITH, Baltimore. Bad news for pre-freeze Wilbur Havens station, which has had all 4 networks in one-station area but became NBC exclusive in Dec. (Vol. 10:50), came on eve of April 22 celebration of its 7th anniversary as "first TV station in the South." Havens' radio WMBG, while an NBC affiliate, has not renewed affiliation contract and presumably AM will also go to Tinsley. TV station originally was assigned WVAA call letters but is changing to WXEX. Tinsley got grant in competition with Louis Peterson's WSSV, Petersburg, and station is now under construction despite Peterson's pending appeal to courts.

FCC chief examiner James Cunningham was granted important new powers this week when Commission amended Part O of rules to authorize him to: (1) Assign examiners to specific cases. (2) Set dates and places of hearings. (3) Act on petitions to intervene to dismiss applications or to dismiss cease-&-desist orders. (4) Act on requests to file additional pleadings provided in Sections 1.730 & 1.751 of rules. (5) Act on other types of pleadings in cases designated for hearing if such pleadings are filed before issuance of an initial decision.

Wiretapping should be authorized in cases involving national security, FCC Comr. Robert E. Lee, an ex-FBI man himself, told House Judiciary subcommittee this week, stating that he spoke for himself, not for whole Commission. He said Attorney General should have power to authorize wiretapping even though it's "another form of eavesdropping that is abhorrent to our system."

Accenting program and commercial side of TV, replete with articles, pictures, statistics and ads, *Radio-Annual-Television Yearbook* was released this week by *Radio Television Daily* (1360 pp., \$15). It's biggest volume of its kind ever compiled.

SUMMARY-INDEX OF THE WEEK'S NEWS — April 30, 1955

BAROMETERS OF ECONOMIC UPSWING—Review of current business appraisals and forecasts, all pointing to good business generally all this year (p. 1).

UHF EXCISE TAX REPEAL backed unanimously by set makers, who say it would cause vhf-only sets to disappear from market; bill faces uphill battle (p. 3).

WHY NOT LIVE REPEATS? Program executives admit fear of losing viewers, but continue experiments with quick repeats of hits (p. 4).

DEINTERMIXTURE PROSPECTS appear doubtful; Pittsburgh Ch. 11 merger in offing; ex-Camr. Janes protests Texas power boost an anti-trust grounds (p. 6).

SUBSCRIPTION TV DEBATE gets shriller as rival interests argue bitterly and FCC is deluged with mail, running about 5-to-1 in favor (p. 6).

ALL-UHF ALLOCATION, FCC pressure on set makers who own stations urged by Camr. Hennack in "separate comments" to Senate as Platkin-Janes reports (p. 7).

STROMBERG-CARLSON MERGER into big General Dynamics Corp. paints up trend in electronics; reasons far and fiscal background of deal (pp. 11 & 15).

HALLICRAFTERS BREAKS COLOR PRICE to \$695 an eve of RCA announcement; Dr. Baker dubious unless price goes below \$500; others give their views (p. 11).

ZENITH & SYLVANIA increase sales and earnings in first quarter, former's net climbing to \$4.21 a share from \$1.68; reports on other companies (p. 14).

IMPROVEMENT OF PROGRAMS getting more attention, as NBC launches "multi-million dollar talent development program," with stress on fresh material (p. 9).

ALABAMA EDUCATIONAL station starts this week, second of 3, bringing an-air total to 430; plans of upcoming stations (p. 10).

FREE POLITICAL TIME on TV-radio apposed by CBS & NBC spokesmen in testimony before Senate subcommittee; NBC offers 1-min. & 5-min. political spots (p. 16).

SOME BAROMETERS OF THE ECONOMIC UPSWING: Brevity is our business -- and busy business men are our readers for the most part. So we thought you might like a briefing on the mass of economic appraisals and business forecasts which have crowded the popular as well as specialized press in recent weeks. Accordingly, here are digests of some of the more significant current reports. Whether they equate with your own business, and how, you alone are in position to determine.

One that touches the TV trade closest, though it does not purport to particularize, is that of Econometric Institute, N.Y. It sees dollar volume of retail sales climbing to new highs this year -- reaching a seasonally adjusted annual rate of \$180.6 billion in fourth quarter. Broad demand for consumer goods of all kinds will continue through 1955, it shows, gaining 7% first quarter, 4% second, 5% third, 4% fourth. Forecasts of better retail business this year are based on 1.7% gain in population, high levels of employment, increase in disposable income.

For durable goods as a whole, Econometric Institute puts quarterly gains over last year at 10%, 4%, 5% & 5%, respectively. In the "appliance-radio" category (not otherwise broken down) figures are minus-2% first quarter, minus-4% second, plus 1% third, plus 8% fourth. That such dollar reductions or increases cannot be applied specifically to TV and/or radio, is evident -- but they serve as a broad gauge. Nor are they applicable apparently to some appliances, for GE's major appliance division (not including TV-radio) this week reported first quarter sales 37% ahead of year ago, noting trend upward in all lines -- led by dishwashers, up 91%; dryers, up 73%; automatic washers, up 61%.

* * * *

Dept. of Commerce's Office of Business Economics states pickup in business activity which began last fall was widespread throughout the economy, and showed no signs of abating at end of March. New orders received by manufacturers were about 25% above same 1954 quarter. Increase in orders and sales was largest in durable

goods industries like automobiles, refrigerators, washing machines, etc. Good Xmas season last winter continued into ensuing months as disposable national income went up and manufacturers' payrolls rose 9% on seasonally adjusted basis.

Twentieth Century Fund, citing Dept. of Commerce figure of \$5330 as average family income for 1954 and the Bureau of Labor Statistics' figure of 40.7 hours as average work week in manufacturing, with 63,663,000 employed or in armed forces and 3,176,000 unemployed, makes this prediction for 1960:

Average family income \$6000; 37½-hour work week; 69,000,000 employed or in armed forces; only 3,500,000 unemployed, principally shifting between jobs. Report continues: "The aggregate net income of the more than 160,000,000 Americans today probably exceeds the combined income of the 600,000,000 people living in Europe and Russia and far surpasses [that] of the more than 1 billion inhabitants of Asia."

Syndicated financial writer J.A. Livingston rounds up optimistic statements by various industrialists and observes, "Feel the glow?" The current prosperity wave, he says, is manifested in the jump in overtime work, rise in average weekly pay to \$75, and expansion in business, security & real estate loans. "We're having a boom in business and a boom in confidence," he writes.

* * * *

U.S. News & World Report (April 29) bulwarks its confidence with statistical tables, asserts prosperity will continue to rise to new highs in year ahead, incomes will soar, jobs will be plentiful, profits will increase and dividends go up. It sees uptrend in every field but farming -- and only a war or catastrophe halting upswing before mid-1956. Its charts show:

Hard goods output index is 148 now vs. 137 year ago, going up to 155 year from now (1947-49 equaling 100). Soft goods index is 122 now vs. 115 year ago, will go up to 127 year hence. Retail trade index is \$179.5 billion now vs. \$168.4 billion year ago, will be \$188 billion year from now. Retail price index is 114.2 now vs. 115 year ago, will be 114.1 year hence. Factory wages are \$1.85 per hour now vs. \$1.81 year ago, will be \$1.92 year from now.

Total income is now at annual rate of \$294.3 billion vs. \$285.2 billion year ago, will be \$305 billion year from now. Total spending by people is \$243.1 billion now vs. \$231.8 billion year ago, will be \$251 billion; by business, \$54.9 billion now vs. \$44 billion year ago, will be \$59 billion year from now; by govts., \$76.1 billion now vs. \$80.1 billion year ago, will be \$77 billion year from now.

* * * *

National Assn. of Purchasing Agents' April survey reported business outlook continuing bright, some 59% of members stating production of their companies was increasing. Asked if they thought current boom is result of consumer stockpiling, the answers varied: some thought easy credit was main influence, others said increased population, plenty of bargains, confidence in the economic situation.

McGraw-Hill economics director Dexter Keezer said U.S. business will spend record \$29.5 billion on new plants and equipment this year, up 5% from 1954. Practically every manufacturer, he stated, has raised his sights since the 1954 recession and, as a group, they planned to increase capital expenditure by 3%.

The various business services (Kiplinger, Babson, Brookmire, Prentice-Hall, Standard & Poor's, United Business Service, et al) are uniformly optimistic but with various gradations of caution -- noting particularly the possibility of strikes. The New York Times, editorializing on "The Business Recovery," observed April 28:

"What makes the current figures on the business situation particularly encouraging is not that they show things to be better than a year ago, but that (1) the American economy is now back at a level close to that of 1953, the best year in history, and that (2) the preponderance of evidence indicates that in the absence of unforeseeable developments the trend is going to continue upward for some time..."

Since it's people that count, the fact that U.S. population has gone up 8.5% and households have increased nearly 8% since the 1950 census probably bespeaks more than any of the other figures the main reason for our expanding economy.

SET MAKERS ENDORSE UHF TAX EXEMPTION: With a display of unanimity unusual in the highly competitive TV manufacturing industry, top officials of a score of companies which together make nearly 90% of America's TV sets gave enthusiastic backing to a proposal to exempt all-channel sets from the 10% Federal excise tax. In an informal conference with Senate Commerce Committee this week, they predicted that such a move would result in disappearance of vhf-only sets from the marketplace.

If setmakers and telecasters can keep the ball rolling, Committee Chairman Magnuson (D-Wash.) thinks tax proposal has fair-to-good chance. He referred to this plan as one phase of an effort to keep uhf from "dying on the vine." Underlining urgency of meeting is slowdown in sales of uhf sets, which constituted only 14.4% of Feb. production, as compared to 21.5% in Feb. 1954 and 35% in Nov. 1953.

The manufacturers firmly rejected 2 other help-uhf proposals: (1) Suggestion of "voluntary agreement" to produce all-channel sets only -- reason the meeting was called in the first place (Vol. 11:12) -- was immediately dismissed as a potential violation of anti-trust laws. (2) Legislation to ban interstate shipment of vhf-only sets, proposed last year by Comr. Hennock, was opposed by manufacturers as unfair to customers in vhf-only areas who would be required to pay extra for uhf tuners they couldn't use. Its constitutionality was also challenged.

* * * *

Tax exemption won't increase profits of manufacturers, they told the Senators. Average Federal excise tax collection per set amounts to some \$15, just about same as average cost of equipping a set with a uhf tuner. Each manufacturer said his piece at this week's meeting, and consensus was that competition would eventually force all manufacturers to include uhf tuner in every set, even those sets shipped to areas which have no uhf stations -- assuming tax exemption is granted.

Problem of inventories of vhf sets -- estimated at 1-2,000,000 -- troubled some manufacturers. They cautioned that tax exemption bill should have provision for an "effective date" far enough in the future to prevent necessity of "distress liquidation" of vhf-only sets, which might occur if pipelines weren't emptied by the time all-channel sets came on the market at the same price. GE's electronics v.p. Dr. W.R.G. Baker, in wire to the Committee, suggested that industry be given 4-6 mo. warning to get rid of vhf-only sets before any tax measure is effective.

Tax move wasn't viewed as panacea for uhf, but manufacturers and Senators saw it as a necessary step to help lick set circulation problem. The corollary question -- what to do at the telecasting end -- wasn't discussed in any detail. Sen. Payne (R-Me.) told group that some friends from his home state "nearly lost their shirts" in uhf ventures. And Dr. Allen B. DuMont explained that all of uhf's difficulties can't be solved at receiving end. Even high-powered uhf outlets, he said, don't cover as large an area as vhf outlets.

* * * *

Excise tax proposal faces tough journey through Congress, and Sen. Magnuson indicated that strong support by manufacturers, telecasters and public is a vital necessity to put it across. He didn't indicate what course his Committee would take to follow up this week's meeting. It cannot handle tax matters, which are under the jurisdiction of House Ways & Means Committee and Senate Finance Committee -- latter headed by economy-minded Sen. Byrd (D-Va.).

"I think we can sustain this proposal," he said after meeting, "if it's put across in the right way." He warned that it will stand no chance if approached as a "tax relief" measure -- "that would just open up a Pandora's box of special interest tax bills for every industry." The Senator stressed that the measure must be pushed from a "public interest point of view."

A uhf tax exemption bill introduced by Rep. Ikard (D-Tex.) is still awaiting action by House Ways & Means Committee. Last year, Senate Finance Committee rejected a similar measure, and substituted a \$7 tax credit for each uhf set produced, but the bill died when Congress adjourned. Set manufacturers don't feel that anything short of complete tax exemption would encourage full-scale uhf production. (For list of those attending this week's meeting, see p. 10.)

WHY NOT LIVE REPEATS? SOME REACTIONS: Our questions about re-runs of live programs last week (Vol. 11:17) -- probing concept of exploiting TV hits while they're hot -- brought several comments from top-level sources this week. They came from men who know their business, and it's apparent that danger of losing audience is main deterrent to more frequent repeats -- rather than economic or legal reasons.

Hubbell Robinson, CBS-TV network program v.p., replying that CBS repeats top programs on Westinghouse Summer Theatre and will undoubtedly do likewise with Climax when it accumulates sufficient backlog, stated: "The fact remains that no matter how good a show may be, a repeat of it within a reasonably short period of time after the initial broadcast categorically eliminates a substantial portion of the viewers who saw it the first time, with the dangers of resulting loss of circulation. I think that this calculated risk has played a large part in the infrequency in the repeat practice of live shows."

Richard A.R. Pinkham, NBC program v.p., evinces a decided leaning toward more repeats of outstanding shows. He says: "I think the successful repeats of 'Davy Crockett' on Disneyland, 'Patterns' on Kraft and our scheduled repeat of 'Peter Pan' next Christmas, together with classics like 'Amahl', will help to point the way to recalcitrant sponsors, agencies and producers to the validity of repeating great TV programs. I am for this as long as utmost discretion is used. The danger is that a lazy producer or an advertiser trying to save money might go overboard on repeats which would be deadly."

H. Pierson Mapes, v.p.-mgr. of Hutchins Adv. agency, citing experience of the Philco Playhouse, which he handles, also pins answer to size of audience. "Actually," he states, "there is no economic or legal reason for not repeating. The repeat would cost substantially the same as the original. [Legally], unless the story had been sold to pictures or for theatre production, it would be available for repeat."

Citing examples of results with repeats, Mr. Mapes noted that Paddy Chayefsky's "Holiday Song," which obtained tremendous critical acclaim in 1952, not only obtained a below average Nielsen when repeated year later but failed to retain as much audience through whole show as original production. Average "holding power" of Philco Playhouse, he said, is above 85%, but the repeat had only 64.9%. Similar results were experienced, he said, with the 1952 repeats of 1950 hits "The Trial of Stephen Kent" and "Brat Farrar" -- this despite fact there were many more sets-in-use in 1952 than there were in 1950.

Such reports do point up the reasons for so few long-delayed repeats, but they also emphasize need for more experimentation with quick repeats -- within a few weeks -- of the type pioneered successfully by Kraft with "Patterns". U.S. Steel is said to be considering repeats soon of powerful "The Rack" & "No Time for Sergeants."

FCC Comr. Rosel Hyde, long a protagonist of the repeat idea, which actually is standard operating practice with TV film shows (and admittedly overdone with old theatrical features) states: "It seems an economic and artistic waste to use the good programs once and then throwing them into the ashcan. I've always argued that there should be some way of cutting the high cost of TV programming by using good programs more than once -- or by stations sharing the programs they create."

Nearly two-thirds of the post-freeze stations, vhf & uhf combined, are losing money, after depreciation charges, said management consultant Richard P. Doherty, ex-NARTB v.p., at this week's meeting of Pennsylvania Assn. of Broadcasters—a condition he called "paradoxical in such a strong growth industry." That would mean some 200 of the 322 still-on-air stations that started post-freeze. Doherty, who has been engaged as director of management services of new GE-backed National Affiliated TV Stations Inc. (Vol. 11:12,14,16), said fully 75% of the industry's total revenue comes from national & regional sponsors and that "the majority of TV stations have not cultivated fully the vast supply of local advertising dollars already being spent." Many stations are inadequately financed, he said, and some have lost so much money it will take them 3-5 years to get even.

Christian E. Rogers Jr. named engineering asst. to FCC chairman George C. McConaughy, leaving post of special asst. to ODM telecommunications chief Harold Botkin; he holds degrees in physics and law, has been mgr. of KALB, Alexandria, La., worked for AP Radio, served as asst. TV-radio director of Republican National Committee 1947-48, worked as a Washington electronics consultant, served as asst. head of Navy Bureau of Aeronautics electronics design branch 1950-52, was assoc. member of law firm Mechlin, Marshall & Smith 1952-54.

The single application filed this week was for Sacramento's educational Ch. 6, by Central California Educational TV (Kenneth R. Hammaker, pres.; John C. Crabbe, exec. secy.). [For details, see *TV Addenda* 20-P herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

Personal Notes: Hugh B. Terry, pres.-gen. mgr. of KLZ-TV & KLZ, Denver, wins U of Missouri's 26th annual honor award for distinguished service in journalism, to be presented May 2 during school's annual Journalism Week . . . Ted Cott, ex-NBC v.p., named gen. mgr. of DuMont's owned-&-managed WABD, N. Y. & WTTG, Washington, assuming former duties of Don McGannon, now operating v.p., Westinghouse stations. George BarenBregge and Leslie G. Arries Jr. continue as local managers of respective stations . . . David Lowe, producer-director, named program director, WABD . . . Harry D. Peck, ex-gen. mgr. of Hearst's Milwaukee radio WISN, named v.p.-gen. mgr. of upcoming WAGE-TV, Marquette, Mich. (Ch. 6), headed by pres. Jerome Sill and due in July . . . John J. McPartlin, ex-asst. mgr. of WTVW, Milwaukee & ex-sales mgr. of WNBQ, Chicago, returns to Chicago to join local sales force of WBKB . . . F. J. (Joe) Kelley, v.p. & gen. mgr. of WTSP, St. Petersburg, Fla., onetime RCA district mgr., has resigned to become partner in Adcraft Adv. Agency, Corpus Christi, Tex.; his successor at WTSP is Jack Olson, controller of *St. Petersburg Times* . . . G. Richard Shafto, pres. of WIS-TV, Columbia, S. C., sailed on *Queen Mary* April 27 for 6-week European tour . . . Wallie Dunlap, program & operations v.p., WICC-TV, Bridgeport, Conn., resigns to become gen. mgr. of WTAO-TV & WTAO, Cambridge, Mass. . . . Guy Koenigsberger named production mgr. of upcoming KRNT-TV, Des Moines (Ch. 8), due in summer, with Bill Riley as public service director . . . Jules Dundes, sales director, promoted to gen. mgr. of KCBS, San Francisco, CBS-owned, succeeding Arthur Hull Hayes, named pres. of CBS Radio, succeeding Adrian Murphy, retired . . . Georges Huard, mgr. of CBC's CBAF, Moncton, N.B., appointed supervisor of TV station CBOT, Ottawa, and of CBC's upcoming French-language CBOFT there . . . Ray Herndon resigns from KTRH, Houston, to become mgr. of KMID-TV, Midland, Tex., succeeding Sid Grayson, who recently bought 50% interest in radio KFXD, Wichita Falls (Vol. 11:9,13) . . . Raymond M. Neihengen promoted to sales mgr., Avery-Knodel, Chicago . . . Dan Bellus, ex-KFEQ-TV, St. Joseph, Mo., heads new sales development & promotion dept., KFMB-TV & KFMB, San Diego . . . Peter Thornton, from WENS, named public relations director, KDKA-TV, Pittsburgh, succeeding Dick Fortune, who joins Cabbot & Coffman agency . . . James E. Szabo, ex-Adam Young TV, Los Angeles, named national sales mgr. in Hollywood for Advertiser's Television Program Service, sales div. of John W. Loveton Productions . . . Norman W. Glenn, v.p. of Doherty, Clifford, Steers & Shenfield, named director of TV-radio programs & production; Russ Ambruster promoted to senior producer . . . George F. Foley, ex-Newell-Emmett TV-radio director, later with Cecil & Presbrey and packager of TV shows (*Tales of Tomorrow*, *Herman Hickman*), enters law practice at 666 Fifth Ave., N. Y. . . . Harry S. Hyett, ex-gen. mgr. of WEAU-TV, Eau Claire, forms regional rep firm with headquarters in Northwestern Bank Bldg., Minneapolis . . . Dave Reque, from sports dept., named TV-radio editor, *Washington News*, succeeding Bernie Harrison, named TV-radio editor of *Washington Star* as Harry MacArthur goes to drama dept. . . . Ray S. Donaldson, ex-chief counsel, Senate Committee on Banking & Currency, joins Washington law firm of Weaver & Glassie . . . Wm. Lawrence, ex-Wm. Esty, Biow and Pedlar & Ryan agencies and west coast TV-radio-movie producer, joins NBC-TV film div. in N. Y. as mgr. of programs & production . . . John Lugt, ex-production mgr., KGMB-TV, Honolulu, now asst. TV director, Brisacher, Wheeler & Co., San Francisco . . . James McMurry named production mgr., WRC-TV & WRC, Washington, as WRC-TV program mgr. George Dorsey assumes same function for WRC but continues as film buyer; Dorsey reports to James E. Kovach, director of programs.

End of 7-month Lamb hearing appeared to be in sight this week—barring unexpected developments—as Toledo & Erie broadcaster-publisher Edward Lamb stepped down from the witness stand and presented a string of witnesses who testified to his loyalty and anti-communism. Winding up cross-examination, FCC Broadcast Bureau attorney Joseph Kittner questioned Lamb about the book he wrote 22 years ago, *The Planned Economy of Soviet Russia*. Lamb insisted the book constituted exposition of the Russian economy, not advocacy, and blamed newspaper competitors in Erie and Mansfield, O. for giving wide circulation to "distortions." Appearing as witnesses for Lamb were: Sen. Estes Kefauver (D-Tenn.), who said he has known Lamb for 3 years and never heard him "say anything that would lead me in any way at all to doubt his loyalty or embrace any belief that would make him unfit to be a broadcaster"; Lowell Baldwin, who owns dry cleaning plant at Maumee, O., stated that Lamb cautioned him in 1939 to avoid any dealings with Communist-dominated labor unions; Sam Sponseller, Ohio CIO field representative, who said he helped clean Communists out of the organization, recalled that Lamb was strongly anti-Red in 1934. Hearing resumes May 3.

New chairman of NARTB's Code Review Board will be G. Richard Shafto, WIS-TV, Columbia, S. C., replacing John E. Fetzer, WKZO-TV, Kalamazoo, who will continue to serve board for one year ex-officio. New officers and members taking office following NARTB convention May 22-26: Wm. B. Quarton, WMT-TV, Cedar Rapids, replacing J. Leonard Reinsch, WSB-TV, Atlanta, as vice chairman; Mrs. Hugh McClung, KHSL-TV, Chico, Cal.; Richard A. Borel, WBNS-TV, Columbus; Roger W. Clipp, WFIL-TV, Philadelphia. Retiring members are Fetzer, Reinsch and Mrs. A. Scott Bullitt, KING-TV, Seattle. New appointees will attend May 3-4 quarterly meeting of the board in Washington, whose agenda includes: (1) Review of Senate juvenile delinquency subcommittee hearings April 6-7. (2) Study of results of recently expanded monitoring, including special survey of children's programming. (3) Further consideration of "how to stimulate code recognition in films at the production level." (4) Review of "pitchmen" and "bait" advertising practices.

Half ownership of KDRO-TV, Sedalia, Mo. (Ch. 6) and KDRO (250-watts, 1490 kc, MBC) will be obtained eventually by publisher J. Albert Dear under terms of application filed with FCC this week by owner Milton J. Hinlein (Vol. 11:12). Principal of *Sedalia Capital and Democrat*, holding interests in other newspapers and in Tufty News Bureau, Washington, Dear has agreed to buy 7500 shares at \$1 immediately, holds options to acquire 50% for \$40,000 in 20-24 months. Hinlein's Jan. 1 financial statement lists \$280,232 assets, \$176,358 liabilities. Fixed assets are \$212,345 (TV equipment \$133,669 book value); current assets are \$65,619 (\$19,873 accounts receivable). Long-term liabilities of \$169,894 include GE note for \$100,400.

To expedite vacation planning for FCC personnel and those who do business with the agency, Commission announced that it will conduct no hearings or oral arguments July 28-Aug. 30 this year and will hold no regular meetings during the period. Examiners will conduct no hearings, either, but individual commissioners will be on hand to act as Motions Commissioners — to handle emergency matters and routine business.

Libel relief for TV-radio stations was signed into law this week by New York's Gov. Harriman. Measure is designed to shield stations from libel damages as result of broadcasts by politicians. To escape liability under the law, stations must announce at beginning and end of political programs that the remarks are not subject to censorship and do not reflect opinions of station.

FCC's "SECOND LOOK" at vhf-uhf deintermixture is still in its early stages, and commissioners aren't indicating how they think—but the betting in Commission and in industry is strongly against probability of any substantial deintermixture when final votes are tallied. There are few who will predict that more than 1 or 2 cities—if that many—will be deintermixed.

Commission's decisions will be delayed somewhat because of parties' requests for more time to file comments on proposals to deintermix Peoria, Ill.; Evansville, Ind.; Madison, Wis. and Hartford, Conn. (Vol. 11:14). Deadline for comments was extended this week from May 2 to May 17—and FCC has promised oral argument later. Last week, it extended the deadline for comments on Albany, N. Y. case to May 20.

Next clues may come when Commission decides whether or not to start rule-making on the raft of additional petitions for deintermixture precipitated by the 5 foregoing cases. Stimulated by FCC action in those cities, stations have filed petitions for deintermixture affecting following principal cities: New Orleans & Baton Rouge, La.; Hutchinson & Manhattan, Kan.; Raleigh & Durham, N. C.; Fresno & Sacramento, Cal.; Miami & Jacksonville, Fla.; Spartanburg, S. C.; Norfolk, Va.; Toledo, O.; Corpus Christi, Tex.

* * * *

Commission issued no grants this week, though a Ch. 11 CP for Pittsburgh may be in the offing, since competitors WWSW & WJAS are working toward merger giving each 50%. Complication in Miami Ch. 10 case may be expected, Storer Bestg. Co. having told Court of Appeals last week it would file application for Ch. 10 pursuant to court's decision in multiple ownership case (Vol. 11:9). Ch. 10 hearing has been concluded there, but Storer feels it has right to file, nonetheless. Storer now operates uhf WGBS-TV, Miami (Ch. 23), is seeking to get area deintermixed, this week asked Commission to hold up action on Ch. 7 decision pending consideration of deintermixture.

In first major TV case since returning from work on Senate Commerce Committee's uhf-network investigation,

attorney Robert F. Jones, ex-FCC member, submitted 40-p. protest on behalf of KWTX-TV, Waco, Tex. (Ch. 10) against grant of increased power recently authorized to KTBC-TV, Austin (Ch. 7)—which is owned by wife of Senate majority leader Lyndon Johnson (D-Tex.).

Protest charges KTBC-TV is violating Sherman & Clayton anti-trust acts and will increase dominance with power increase. It states that uhf KANG-TV, Waco (Ch. 34) had been able to obtain only DuMont affiliation until bought by Mrs. Johnson last Dec., whereupon both CBS and ABC "almost immediately" indicated willingness to affiliate. Until then, KWTX-TV said, it had chance of getting CBS or ABC. Now, it went on, KTBC-TV has all 4 networks in Austin and KANG-TV has all except NBC. "The above facts," states protest, "strongly suggest that the networks' decisions to affiliate with KANG-TV were not motivated by ordinary business judgment."

Request of grantee WTHT, Wilmington, N. C. (Ch. 3) for more time to build should be denied, examiner Basil P. Cooper recommended in initial decision this week. He said CP-holder has done nothing to start construction, given no good reason why it hasn't.

Two CPs were dropped—KOPR-TV, Butte, Mont. Ch. 4) and KUSH, San Diego (Ch. 21).

Way was cleared for WWLP, Springfield, Mass. to shift from Ch. 61 to Ch. 22 when FCC finalized allocations substituting Ch. 22 for Ch. 61 there, Ch. 25 for Ch. 52 in Barnstable, Ch. 38 for Ch. 50 in Boston, moving Ch. 61 from Northampton to Easthampton, shifting educational reservation in Providence from Ch. 22 to Ch. 36. Commission also proposed to permit WHYV-TV, Springfield, to shift from Ch. 55 to Ch. 40 by starting rule-making to substitute Ch. 40 for Ch. 55 there, Ch. 57 for Ch. 40 in Montpelier, Vt.

FM functional music decision (Vol. 11:13), scheduled to go into effect May 2, has been stayed by FCC for 30 days, pending study of petition for reconsideration to be filed by WWDC-FM, Washington. Commission has adopted new application Form 318 for the service—called "Request for Subsidiary Communications Authorizations (SCA)."

SUBSCRIPTION TV debate continued this week, a bit shriller if anything, and it becomes even clearer that when battle before FCC eventually ends the Commission won't have much more to go on in reaching a decision than it does now—that it will have to make its decisions on basis of theory, pressures and commissioners' sociological & economic leanings.

Commission doesn't necessarily have to make a flat "yes" or "no" decision, may consider authorizing "temporary commercialization" on broad enough scale to produce factual information.

Yet it may prove impossible, through such a test, to answer opponents' major objection—i.e., pay-as-you-look TV will end up simply charging viewers for what they now get free. And there's question, too, whether fee-TV operators will be able to obtain for the tests the prime program fare they seek—current feature movies.

Zenith's small-scale test with 300 Chicago families several years ago, in TV's infancy, is generally considered obsolete. At that time, Zenith managed to pry loose some Hollywood features by getting Justice Dept. to threaten anti-trust proceedings. Movie producers were terribly touchy about "monopoly" charges then; it's anyone's guess as to what would happen with "commercial" tests now.

* * * *

Issues were sharpened up a bit more this week, meanwhile, in debate before FCC Bar Assn. between Zenith counsel W. Theodore Pierson and theatres' counsel Marcus Cohn.

Pierson pinned label "a complete red herring" on opponents' argument that pay-as-you-look TV would result in converting free programs to fee. "They said first that subscription TV would be so successful," he stated, "that it would take over all of the good programs. I submit it could only do that if the public wanted it. We have no means of making the public pay. Therefore, that argument must be based upon the success of subscription TV that is far beyond our wildest dreams.

"At the same time, [they say] that there would be not a minor, but a major revolution in the country, and that everyone would break up their TV sets. Now, I submit both things can't happen. In the final analysis the measure of its succeeding is going to be the public, and if the public gets annoyed with it we are going to get nowhere and lose substantial sums of money."

Cohn put his thesis this way: "The American people have spent approximately \$15 billion since 1948 for TV sets, installations and repairs . . . These people bought their sets on an implied representation by the FCC, by the Congress, and by the local telecaster, that they would never have to pay on their TV sets to see a program . . . All of the arguments which are directed to 'let us give this a try because it is only a new invention' ignore completely the basic problem—that in the process of putting this invention out to the public and getting the public to use it, it is going to deprive the public of something which it already has."

Pierson also analyzed attitude of networks and stations. He said that AB-PT's position is likely to be deter-

mined by its theatre holdings. CBS and NBC "are garnering huge profits out of their power and their operations [and it's easy] to understand why they would not at all like to see a change . . . But should a broadcaster not be in favor of some alternative for success and survival than an affiliation agreement with NBC and CBS? I think we have had demonstrated in the last few months the fickleness of a network's loyalty to its affiliates in terms of an affiliation arrangement." As for NARTB, he asked whether it's "dominated and controlled by the national networks and their sycophants."

Cohn charged Zenith with promising everything to everybody. "Zenith has gone to the newspapers," he declared, "and said subscription TV is a wonderful thing because we don't propose to have any advertising on subscription TV, and therefore the advertising dollar will be more easily accessible to your callers. In still other publicity, Zenith has taken the position that there will be advertising within subscription TV. I would like to know which of the 2 positions is correct."

* * * *

Zenith is reaping results, meanwhile, from its get-out-the-vote campaign, urging people to write to FCC. When we first analyzed letters and cards in FCC files 3 weeks ago (Vol. 11:15), there were 360 in the docket—half for, half against. Today, there are more than 2000—about 5-to-1 in favor of toll TV. Zenith has encouraged letters not only from its stockholders, distributors and dealers but has written to owners of Zenith hearing aids and subscribers to program log of its Chicago FM station.

Among recent supporters gained by Zenith are such diverse groups and individuals as Chicago City Council, National Small Business Men's Assn., actress Gloria Swanson, publicist S. I. Neiman, *Life Magazine* Chicago ad mgr. Wm. G. Erickson, et al.

FCC Commissioners and members of Congress are being deluged with mail, reading little of it. How much effect the sheer volume will have—even they don't know.

Zenith pres. E. F. McDonald sent commissioners photostats of card someone is distributing, opposing pay-as-you-look TV and urging people to boycott Zenith products. McDonald called this "the most vicious and unfair tactic that I have ever seen in the course of consideration of a public issue." One commissioner said, with a laugh, referring to publicity about it, "McDonald has given that card greater distribution than its originators have."

Paramount's International Telemeter is speaking up more and more lately. It sought to join CBS-TV's May 1 debate but was turned down, CBS stating that Telemeter hadn't filed petition with FCC whereas Zenith and Skiatron had. Telemeter reportedly will shortly announce names of some exhibitors who have asked for coinbox franchises in event pay system is authorized.

* * * *

Uhf Industry Committee attacked NARTB's stand against pay systems, stating: "Certainly, no artificial restriction or restraint should be imposed on subscription TV if it can augment TV service."

Broadway Assn., representing various businesses, informed FCC and N. Y. City Council of its opposition, based on fear that reduced attendance at movies might harm restaurants, hotels, etc. There are reports that City Council is about to take stand against pay-as-you-look, approving resolution introduced by pres. Abe Stark.

Article in April 30 issue of *Saturday Review* was attacked sharply by Alfred Starr, co-chairman of Organizations For Free-TV. Article includes a "ballot" with which readers can express views, and Starr said: "We are shocked and dismayed at the unwarranted and undeniable bias contained in your ballot," adding that his group should be given space to answer the article.

INACTION is killing uhf, FCC Comr. Henneck charges in her "separate comments" on the Plotkin & Jones reports, submitted to Senate Commerce Committee April 29—6 weeks after FCC majority presented its views (Vol. 11:12). She termed the recommendations made by Senate TV investigation's former majority counsel Harry Plotkin and former minority counsel Robert F. Jones "pure temporizing or ineffective expedients [which] do not alleviate the plight of uhf." The Commission's majority report, she said, "completely fails to prescribe any effective remedies for the illnesses it diagnoses, and prefers to let the passage of time take care of them."

In a bristling 68-p. document, the oft-dissenting Miss Henneck, whose 7-year term as a Democratic member of the Commission expires in exactly 2 months (June 30), again poured blame on FCC for uhf's current plight and for failing to do anything about it, reiterating her advocacy of a new allocation plan which would move all stations to uhf over a given period of time.

Diagnosing uhf's troubles, she said neither Plotkin, Jones nor the Commission has "come to grips" with 3 basic issues facing Senate Committee in its uhf probe: (1) Vhf-only sets now being sold are "depriving the public of 85% of TV." (2) "The network monopoly controls every phase of TV and strangles its development." (3) "Inaction is destroying uhf."

Her principal suggested remedies: (1) Senate Committee and FCC should "immediately initiate a national campaign to inform the public that they are purchasing sets that cannot tune into 85% of TV." (2) "This Committee should take all necessary measures to make it possible for the public to buy vhf-uhf sets, including a direction to the FCC that it use its power in connection with licensees who are manufacturers." (3) Committee should direct FCC to start immediate rule-making "aimed at correcting the monopolistic scarcity of network programming and at equitable availability of such programming to uhf as well as vhf stations." (4) Congress should immediately conduct a "vigorous" network investigation, and FCC should be given statutory authority to regulate networks.

N. L. Bentson group is buying WLOL, St. Paul (5-kw, 1330 kc) from Independent Bestg. Co., headed by Ralph Atlass, pres. of Chicago's WIND, holding CP for WIND-TV (Ch. 20). Application filed this week states sale is for \$300,000 plus 95% of accounts receivable. Sale brings Bentson back to radio in area where his share-time WMIN-TV (Ch. 11) recently went to Bitner interests for \$1,235,000 and his radio WMIN to Wm. F. Johns family for \$75,000 (Vol. 11:15). Actual buyer of WLOL is new BFR Bestg. Corp., 1/3 owners being Bentson, Joseph Floyd and Mr. and Mrs. Edmond R. Ruben. Same interests also operate KELO-TV, Sioux Falls, S.D. & KELO, hold CP for satellite KDLO, Florence, S. D. (Ch. 3).

Transfer of 50% ownership in radio WKAI, Macomb, Ill. and KLIL, Estherville, Ia. to A. G. Bush, chairman of Minnesota Mining & Mfg. Co. executive committee and board member of KSTP-TV, St. Paul, was approved by FCC this week (Vol. 11:15). He assumes the share of Wm. Schons in return for cancelling \$40,000 loan to stations; Edward Schons retains 50%.

The brighter side of broadcasting business — how some radio stations are showing "hometown ad gains"—is subject of April 29 article by *Wall Street Journal's* Joseph M. Guilfoyle, supplementing his recent bearish findings.

Titled RFD, weekly 15-min. farm show produced for U of Missouri's commercial KOMU-TV, now is being carried on film by 8 stations in state.

Station Accounts: First quarter *Rorabaugh Report on Spot TV Advertising* (N. C. Rorabaugh Co., 347 Madison Ave., N. Y., 260 pp., \$30), covering accounts on 230 reporting stations (80% vhf, 20% uhf) which are said to share approximately 90% of the total dollars spent on national spot TV time, lists these as the top 25 spot buyers Jan.-thru-March: Procter & Gamble, Brown & Williamson, Sterling Drug, Standard Brands, Block Drug Co., Colgate-Palmolive, Ratner Promotions, Carter Products, General Foods, National Biscuit, Bulova Watch, Miles Laboratories, Carnation, Grove Laboratories, Anahist, Vick, R. J. Reynolds Tobacco, Chesebrough, Ford, P. Lorillard, General Mills, Peter Paul, Kellogg Co., Toni, General Motors . . . Many of these advertisers placed several schedules for their various products, using varying numbers of stations, so the rankings are arbitrary in that respect. Surprise 7th ranking of Ratner Promotions, for example, embraces spots bought for such varying items on different stations as My-O-Lene rug cleaner, Sona cosmetics, cake & pastry decorators, food slicers, kitchen utensils, plastic towels, etc. . . . DuPont, for Zerone & Zerex, signs Frank Leahy, ex-Notre Dame coach, to replace late Norman Sper in handling filmed *Football This Week*; Norman Sper Jr. continues as producer for Station Distributors, with BBDO as agency . . . Sinclair Refining Co., for new Power-X gas, using local TV-radio programs and spots in April 26-to-early July campaign, thru Morey, Humm & Johnstone, N. Y. . . . Oldsmobile to sponsor *Patti Page* twice-weekly next season in 15-min. film produced by Joseph Santley, thru D. P. Brother, Detroit . . . San Francisco Brewing Co. (Burgermeister Beer) buys 1955 pro grid games of 49ers and Los Angeles Rams, thru BBDO, Los Angeles . . . National Lead Co. (Dutch Boy Paints) buys 52 Norman Brokenshire *The Handy Man* how-to-do-it shows, filmed by Princeton Film Center, to be placed by McCann-Erickson . . . Buitoni Foods Corp. (Buitoni macaroni, Perugina chocolates) sponsoring Italian-language panel quiz titled *Dove-sonnato* (Where Was I Born?) on WATV, Newark, Sun. noon-12:30 p.m., thru Albert Frank-Guenther Law, N. Y. . . . Among other advertisers currently reported using or preparing to use TV: Apsco Products, Beverly Hills, Cal. (New Home waste disposal), thru J. P. Shelley & Assoc., Los Angeles; Blevins Popcorn Co., Nashville (Pops-Rite popcorn & Savorol seasoning), thru Simon & Gwynn, Memphis; Leisurehouse Inc., Wichita (Laundry Karts), thru R. J. Potts-Calkins & Holden, Kansas City; Cinch Products Inc., Los Angeles (cake, corn bread & biscuit mixes), thru Hixson & Jorgensen, Los Angeles; General Paint Corp., San Francisco (Faze quick-dry paints) thru Geo. C. McNutt Adv., Oakland; Branchell Mfg. Co., St. Louis (Royal Melmac & Color-Flyte dinnerware), thru Glee Stocker & Assoc., St. Louis; American Bird Food Mfg. Corp., Chicago (American 3 Veas bird food), thru George H. Hartman Co., Chicago; Crosse & Blackwell (frozen soups), thru J. M. Korn Adv., Philadelphia; Chatelier, St. Petersburg, Fla. (Dr. Chatelier's Plant Food), thru Zemp & Chandler Inc., St. Petersburg.

New reps: WTCN-TV, Minneapolis-St. Paul, recently acquired by Bitner interests (11:15) to Katz May 1 (from Blair); WIRL, Plattsburg, N. Y. to McGillvra (from Adam Young); WROM-TV, Rome, Ga. to McGillvra (from Weed); KTVW, Tacoma, Wash. to Adam Young; WBOC-TV, Salisbury, Md. to Burn-Smith.

Rate increases: WCAU-TV, Philadelphia, raises base hour from \$2400 to \$3000, 20 sec. \$500 to \$600; KTTV, Los Angeles, hour from \$1400 to \$1750, min. \$365 to \$460; WOC-TV, Davenport, \$700 to \$800 & \$140 to \$160. Rate decrease: WTVW, Milwaukee, cuts base hour from \$950 to \$800, min. \$190 to \$160.

Network Accounts: Last of DuMont's "national" network shows, Bishop Sheen's *Life Is Worth Living*, switches to ABC-TV next fall, probably Thu. 8-8:30 p.m. Programs will also be carried on ABC Radio, will consist of 26 live telecasts, 13 filmed repeats. Spokesman for Bishop Sheen said he was switching networks because of larger audience possibilities and higher financial contribution (which goes to Society for the Propagation of the Faith, of which he's national director). Financial details of long-term contract weren't disclosed. ABC is now negotiating for sponsor—with Admiral, the bishop's sole sponsor on DuMont since program began in 1952, identified as one of the negotiators . . . Full sponsorship lineup for *Warner Bros. Presents* (Vol. 11:12), starting Sept. 13, Tue. 7:30-8:30 p.m., as announced by ABC-TV: Liggett & Myers, 30 min. weekly, thru Cunningham & Walsh; GE, 30 min. alt. weeks, thru Maxon and Young & Rubicam; Monsanto Chemical (All detergent), 30 min. alt. weeks, thru Needham, Louis & Brorby . . . GE to sponsor summer series of live dramas from Hollywood, produced by Fletcher Markle, on CBS-TV, starting June 1, alt. Wed. 10-11 p.m., thru Young & Rubicam; on Sept. 21, GE debuts first of 26 one-hour 20th Century-Fox film programs in same time slot, alt. with *U. S. Steel Hour* . . . New Perry Como show, as yet untitled, due to begin in fall on NBC-TV, probably Sat. 8-9 p.m., will be divided into 20-min. segments with this sponsor lineup: Kleenex, thru Foote, Cone & Belding, Chicago, and Dormeyer (blenders), thru Shaw Adv., Chicago, sharing one segment; Noxzema, thru Sullivan, Stauffer, Colwell & Bayles sharing segment with one other advertiser; Warner-Lambert Co. (cosmetics) occupying full segment . . . American Tobacco (Lucky Strike) renews Jack Benny show on CBS-TV for next season (alt. Sun. 7:30-8 p.m.), while dropping his CBS Radio series after 11 years . . . Dodge due to sponsor Hollywood musical variety show featuring Lawrence Welk orchestra this summer on ABC-TV, Sat. 9-10 p.m., thru Grant Adv., Detroit . . . Associated Products (5-Day Deodorant Pads) to sponsor half of summer *Arthur Murray Party* on NBC-TV, starting June 28, Tue. 8:30-9 p.m., thru Grey Adv.; co-sponsor probably will be Toni . . . Reynolds Metals, which drops *Mr. Peepers* June 15, retains same NBC-TV Sun. 7:30-8 p.m. period probably for its *Frontier* film series; Wally Cox will discard "Mr. Peepers" characterization May 8, assuming various other roles in new-format experiments for balance of series . . . General Foods reported shopping for 30-min. Sat. a.m. network period for re-runs of *Roy Rogers Show*.

New campaign to lure top TV spenders away from the airwaves and onto the printed page is being opened by American Newspaper Publishers Assn.'s Bureau of Advertising, its director Harold S. Barnes told ANPA convention this week in N. Y. He said bureau had new weapon against TV—and is "convinced that the same number of dollars most advertisers are spending in TV will do a better job in newspapers." He gave no details, added: "We're showing TV advertisers what those dollars will buy in newspapers. And how much those dollars will buy in newspapers is making their eyes pop." Bureau of Advertising announced that national advertisers spent \$594,120,000 in newspapers last year, 1.2% below 1953's record of \$601,224,000 — but predicted figure for 1955 would be higher. Although much was made of TV as a competitor for advertising revenue and circulation, some publishers also discussed TV's value as an ally. In one panel discussion, several publishers agreed that both news and "preview" features on TV entertainment helped build readership. Some publishers said televised sports have led to increased demand for newspapers, with women as well as men readers following sports stories more closely as result of viewing them on TV.

Telecasting Notes: Paramount has sold 30 films to TV for \$1,550,000, or about \$51,700 each—first major producer to release any old features direct to TV. All releases were pre-1949, produced by Pine-Thomas. Purchaser was Elliot Hyman, head of Associated Artists Productions. The 30 oldies were formerly owned jointly by Paramount and Pine-Thomas, but reverted to 100% Paramount ownership under deal whereby Paramount and Pine-Thomas divided the films they held jointly. Representative titles: *No Hands on the Clock*, *Torpedo Boat*, *I Live in Danger*, *Submarine Alert*, *High Explosive*, *Alaska Highway*, *Timber Queen*. Hyman plans to re-issue them for theatre showing before making them available to TV . . . Top-notch British films, all recent and some still in theatrical release, have been acquired by Ely Landau's National Telefilm Associates, which spent \$1,000,000 for 7-year distribution rights to the 40 pictures, now being offered stations as "Fabulous Forty" package. From Alexander Korda-Elia Lopert, NTA has taken over distribution of *Tales of Hoffman* (Moirá Shearer, Sadler's Wells Ballet), *Captain's Paradise* (Alec Guinness, Yvonne DeCarlo), *Breaking the Sound Barrier* (Ralph Richardson), *Man Between* (James Mason, Hildegard Neff), *Cry, the Beloved Country* (Canada Lee), *Outcast of the Islands* (Ralph Richardson), *Gilbert & Sullivan* (Maurice Evans, Robert Morley). Other films in package were acquired from J. Arthur Rank and Marvin Gries, featuring such stars as Stewart Granger, James Mason, Deborah Kerr, Jean Simmons, Michael Redgrave, Audrey Hepburn, Dane Clark . . . Top-level MGM executives have been huddling with CBS on TV tieup, expected to be disclosed momentarily; Columbia Pictures, which has done well in TV with subsidiary Screen Gems, reported to be readying weekly one-hour live-&-film show for TV to be titled *Columbia Presents* . . . Gene Autry, who lost Supreme

Court fight to prevent Republic Pictures from selling his pre-war films to TV, negotiating with Columbia Pictures to buy 32 westerns he made for Columbia since the war with intention of releasing them to TV in competition with Republic oldies . . . Unusual film deal: General Teleradio's WNAC-TV, Boston, signs to carry TPA's *Ramar of the Jungle* for the next 5 years—the 52 episodes already completed as well as any produced in future. Series is 2½ years old, has already been shown in Boston, deal costing station about \$100,000 . . . Alfred Hitchcock to shoot 39 half-hour mystery shows for Revue Productions at Republic Studios in July . . . Norman Blackburn, TV veteran, buys novel *Circus Boy* for series of 26 half hours to be produced by Screen Gems . . . King Brothers, movie producers, to film half-hour adventure stories with Latin American backgrounds at Churubusco Studios in Mexico City . . . No glutted market of syndicated shows is foreseen by rep Joe Weed, despite "mass of new TV movie producers"; as he sees it, there will be more good features, greater selectivity by spot sponsors & stations, survival of fittest producers, more exclusive prime bookings, less re-run syndication of network shows . . . Ed Sullivan's *Toast of the Town*, playing one-night stands for sponsor Lincoln-Mercury, will be in Eugene, Ore., Spokane & Seattle, May 4-6, respectively, with latest weekday road shows . . . TV workshop for experimental programs has been set up by New York's WRCA-TV, with goal of presenting "at least one new program concept or idea each week." Tryout features will be incorporated into 1-2 p.m. *Norman Broken-shire Show* beginning May 12 with 30-min. mental health show . . . Bob Hope signed by Associated Broadcasting Co., one of Britain's new commercial TV program contractors, for *Sunday Night at the London Palladium*, one of shows planned for debut of ITA in Oct.

RIDING HIGH on crest of praise for "imaginative programming" which first began to be heard following its *Peter Pan* telecast, NBC this week announced it is undertaking a "multi-million dollar talent and show development program" aimed at uncovering new writers, performers and direction & production talent.

Announcement was made by pres. Pat Weaver in April 29 address to Chicago Executives Club. With a rather obvious glance in the direction of Washington, where one TV network investigation is under way and several others have been proposed, he stressed that such a program could be undertaken only by a network—that no "program service" could afford to take such a gamble, in which the decisions often are "in conflict with the safe, quickly profitable action."

Highlights of NBC's program: "Comedy Development Plan, an organized nationwide plan for discovery, development and maturing of comedians of the future, is now being broadened and expedited." In field of music, negotiations are under way with Rodgers & Hammerstein, as well as British composers Benjamin Britten and Sir Wm. Walton, to do original works for TV. And noted impressario Sol Hurok is now searching Europe for TV talent.

Other projects under consideration, as outlined by Weaver: Use of idle NBC interconnection facilities as "audition cable" to permit programming executives to see local acts and shows for possible network use; development of monthly program from local shows picked up from various origination points around country; assisting Broadway producers in casting their plays with hope of building fresh talent for TV; using radio programs as showcases for testing future TV players.

Drama schools of Yale, Carnegie Institute & Iowa State U will share in RCA-NBC scholarship & fellowship grants announced this week. Scholarships are \$800 a year for undergraduates. Fellowships are \$3500 a year for

graduate students, of which \$750 is grant-in-aid to the university. Selections are to be made by the university. In addition, an NBC "Presidents Award" of not less than \$4000 or more than \$6000 will be granted an individual between ages 25-35 who has shown outstanding talent and creativeness in drama, selection to be made by NBC.

* * * *

TV-radio critic Jack Gould, *New York Times*, apparently agreeing with recent column by Herald Tribune Syndicate's John Crosby (Vol. 11:16), April 24 gave accolade to NBC—more specifically to Weaver—for "virtual monopoly on TV excitement" during current season, pointing to *Peter Pan* as high point in "first real offensive in years against the pat and repetitious rescheduling of so much broadcasting."

Said Gould: "As was obvious even last summer, CBS chose this season to take a sabbatical in programming. It made lots of money but suffered a severe intangible loss: no one talked about CBS. Now Bill Paley, CBS chairman, is seeking revenge and has made it clear he is not going to let Pat Weaver have another unchallenged year. The battle of the titans has been resumed." As for ABC-TV, which pulled the sustained coup of the season with *Disneyland*, it has had trouble clearing time on enough stations but "it can be counted on to give the competitive pot a few stirs . . ."

Importance of TV-radio in press association budgets indicated in membership reports this week during ANPA convention: UP listed 144 TV & 1510 radio stations taking its wire services; AP gave total of 1364 stations; INS listed 113 TV stations.

New 15-franc stamp issued by France as tribute to TV shows antennas over Paris skyline with Eiffel Tower dominant; in right corner is screen with letters RTF — Radio-TV France.

ALABAMA'S SECOND educational station — WBIQ, Birmingham (Ch. 10) — went on air this week, bringing total stations on air to 430, of which 13 are non-commercial educational outlets. Station began programming April 28 with ceremonies televised on Alabama's 2 educational stations and on commercial WBRC-TV, Birmingham, George B. Storer officially presenting to station 5-kw RCA transmitter, 6-bay antenna and other station equipment formerly used by his WBRC-TV. Station is owned by Alabama Educational Television Commission, whose WTIQ, Munford (Ch. 7) went on air last Nov., and whose WAIQ, Andalusia (Ch. 2) plans to start in Sept. Many programs will be televised by all 3 stations on the educational "network," which now carries 10 hours weekly. Consultant is ex-broadcaster-telecaster Thad Holt; station's chief engineer is James Evans.

No equipment shipments were reported this week. GE reports order from Chicago educational WTTW (Ch. 11), due on air next fall, for complete station facilities including 5-kw transmitter, 12-bay antenna, 2 vidicon film chains, 2 studio camera & 2 portable camera chains, for mid-July delivery. GE also has order from KRLD-TV, Dallas (Ch. 4) for new 5-kw driver.

Standard Electronics Corp., Claude Neon subsidiary, appoints Canadian Westinghouse, Hamilton, Ont., as sales engineering rep for Canada. John H. Fletcher will manage sales of Standard broadcasting equipment.

* * * *

In our continuing survey of upcoming stations, these are latest reports received from principals:

WDBJ-TV, Roanoke, Va. (Ch. 7), with 50-kw DuMont transmitter & 12-bay RCA antenna on order, plans start next fall, reports mgr. Ray P. Jordan. It has 73-ft. Blaw-Knox tower on hand, but hasn't started construction except for work on interim studios. Grantee is Times-World Corp., publisher of *Roanoke Times* and *World-News*. It's signed with CBS, has set \$600 base hourly rate. Rep will be Free & Peters.

KLFY-TV, Lafayette, La. (Ch. 10), with DuMont 5-kw transmitter due for installation by May 10, has changed test pattern target to May 15, plans June 3 start as CBS affiliate, reports gen. mgr. Bill Patton. It will use 12-bay RCA antenna on 384-ft. Trilsch guyed tower. Earlier this year it got permission to buy out share-time CP-holder KVOL-TV for \$5,000 out-of-pocket expenses incurred by grantee *Lafayette Advertiser* and KVOL gen. mgr. George H. Thomas (Vol. 11:4). Base rate will be \$200. Reps will be Venard, Rintoul & McConnell and Clark Brown (south-southwest).

KSTF, Scottsbluff, Neb. (Ch. 10), which got STA last week to begin operating from interim site on Abrupt Peak, 10 mi. north of Scottsbluff, now plans June 1 test patterns, reports Wm C. Grove, gen. mgr. of parent KFBC-TV, Cheyenne (Ch. 5), 79 mi. to northwest. On June 15 it plans to begin rebroadcasts of KFBC-TV programs as well as some film originations. RCA transmitter & 6-bay antenna are due to arrive May 15, with antenna scheduled for installation on 120-ft. pole in following 5 days. KFBC-TV chief engineer, R. C. Pfannenschmidt will be in charge of 4-man Scottsbluff operation. Time will be sold only in combination with KFBC-TV. Rep for both is Hollingbery.

CKNX-TV, Wingham, Ont. (Ch. 8) hasn't ordered equipment yet, but hopes to be on air by Oct. 15, writes gen. mgr. W. T. Cruickshank. It will use 650-ft. RCA wavestack tower-antenna. Transmitter house will be built 15 mi. out of town. G. W. Cruickshank will be station mgr.; Don Hildebrand, production director; Vin Dittmer & Scott Reid, from CKNX, sales mgr. & chief engineer, respectively. Rep not chosen.

Set manufacturers attending April 25 uhf conference at invitation of Senate Commerce Committee (see p. 3): Admiral v.p. John F. Gilbarte; Capehart-Farnsworth pres. L. G. Haggerty; CBS-Columbia pres. Seymour Mintz & CBS Inc. v.p. Richard S. Salant; Avco v.p. L. I. Hartmeyer & Crosley-Bendix div. attorney F. J. Ball; Allen B. Dumont & Julian Freret; Emerson pres. Benjamin Abrams; GE attorney Gerald Toye; Hallicrafters pres. R. W. Durst; Hoffman pres. H. Leslie Hoffman; Lion Mfg. Corp. TV-radio gen. mgr. Paul H. Eckstein; Magnavox pres. Frank Freimann & v.p.-secy. Gerald M. Ungard; Motorola exec. v.p. Robert W. Galvin; Philco v.p. James M. Skinner; RCA pres. Frank Folsom, exec. v.p. Robert A. Seidel & v.p.'s Robert L. Werner & Frank Russell; Stromberg-Carlson radio-TV v.p. F. Leo Granger; Sylvania v.p. Arthur L. Chapman & attorney R. E. Anderson Jr.; Travler v.p. I. Edelstein; Wells-Gardner pres. Robert Alexander; Westinghouse Bestg. v.p. J. E. Baudino, mgr. engineering G. C. Larson, counsel John Steen & J. E. Walsh; Zenith sales v.p. H. C. Bonfig & engineering v.p. G. E. Gustafson; RETMA pres. Glen McDaniel & exec. v.p. James D. Secret. Senators attending: Chairman Magnuson (D-Wash.), Monroney (D-Okla.), Ervin (D-N.C.), Bible (D-Nev.), Schoepfel (R-Kan.), Payne (R-Me.).

New glass shadow-mask for color picture tubes is under development at Corning, whose pres. Wm. C. Decker calls it "the most marvelous article ever made of glass." Aimed as substitute for metal mask, glass unit has some 400,000 holes made by photo-etching process, has rim of photoceramic glass. RCA color tube engineering mgr. C. Price Smith says that RCA hasn't had any samples yet and it's too early to tell whether glass has advantages over metal. "There are problems with it, which Corning readily admits," he said. "For example, there's the problem of fastening and positioning glass and there's the matter of a 'charging effect' on glass, requiring a special coating." From cost standpoint, Price says there's no doubt glass could beat present cupro-nickel masks, but work on mild steel may bring cost of metal way down.

A 3-vidicon color camera chain for medical use was introduced by RCA this week at National Academy of Science exhibition in Washington. Designed for portability and compactness, chain comprises 3 suitcase-style units weighing 40-50 lbs. each plus the camera. Dr. Vladimir K. Zworykin, who headed development, stressed compatibility of chain, stating: "The compatibility of this novel system means that information may be televised in color from the operating room or the medical laboratory to doctors and research workers across the country by commercial broadcast facilities as readily as over a closed-circuit. The pictures may be seen on standard home-type color TV receivers with no alteration." Previous RCA color medical demonstrations employed regular studio-type chains (Vol. 11:14).

Upcoming network color schedules: NBC-TV—May 2, *Producers' Showcase*, "Darkness at Noon," with Lee J. Cobb, David Wayne, Ruth Roman, Oscar Homolka & Joseph Wiseman, 8-9:30 p.m.; May 7, *Max Liebman Presents*, "Desert Song," with Nelson Eddy, Gale Sherwood, Otto Kruger, John Conte, Salvatore Baccaloni, Viola Essen & Earl William, 9-10:30 p.m.; May 11, Kraft Theatre, 9-10 p.m. CBS-TV—May 4, *Best of Broadway*, "Broadway," with Joseph Cotten, Piper Laurie, Gene Nelson, Keenan Wynn, Martha Hyer & Akim Tamiroff, 10-11 p.m.; May 12, *Shower of Stars*, "High Pitch," with Marguerite Piazza, Tony Martin, Wm. Frawley & Vivian Vance, 8:30-9:30 p.m.

Experimental color rates charged networks by AT&T for coaxial-microwave facilities will be extended additional 6 months to Dec. 1, phone company notified FCC this week.

THE MAGIC WORD IS 'ELECTRONICS': Just about a year ago, under this same caption, we noted (Vol.10:20): "As magical as TV, which is its commercial keystone, electronics during recent years has attracted many companies which never before had anything remotely to do with it -- some in such a big way that the tail now wags the dog. Hardly a week passes nowadays without word of new ventures, expansions, acquisitions or mergers in various fields of electronics. By and large, the main factor motivating non-electronic companies into the field is the desire to diversify."

Then we pointed out how virtually all aircraft manufacturers have gone into electronics research and manufacture, competing for military orders with old-line TV-radio-electronics manufacturers. Their continuing success is only too well known to many of the old-liners, large and small. We also published, in the same issue, a roundup on unusual entries into electronics field, some of them great industrial names, as prepared for us by Edgar Greenebaum Jr., the Chicago financial consultant.

Proposed merger of Stromberg-Carlson Co., substantial TV-radio-electronics manufacturer and pioneer TV-radio broadcaster, into fabulous General Dynamics Corp., builder of the atomic submarine Nautilus and parent of huge Convair as well as of big Canadair Ltd. of Canada, points up this trend-to-electronics. It's the biggest such merger yet and, unless we miss our guess, it's forerunner of other and similar big mergers of old-line electronics companies with major and minor entities in atomic, aero or other industrial pursuits.

Not only the loss of defense business reflected in balance sheets of some TV-radio manufacturers, but the eagerness of electronics competitors as well as non-electronic enterprisers to expand and diversify, will bring about more mergers. It's in the wind, and it's a logical development of "single weapons system" of procurement whereby defense electronics contracts seem to be tending to go to builders of end items, particularly in aircraft and missile fields.

One of reasons impelling Stromberg-General Dynamics merger, which will be on share-for-share basis, subject to approval of the stockholders of both companies at meetings June 28, is understood to be former's heavy involvement in military sub-contracts with Convair. (For further details about the merger, see p. 15.)

WHAT PRICE WILL BRING MASS COLOR MARKET? On eve of RCA's revelation of production plans for new 28-tube color set at May 3 stockholders meeting -- at price expected to be well below the \$895 of 38-tube receiver -- Hallicrafters broke with \$695 price. Pres. Wm. J. Halligan informed distributors that set will employ RCA 21-in. tube and 25 receiving tubes, "using a combination of RCA circuitry and our own."

Set will be introduced in June, he said, and company will "go into immediate production for the fall market." He stated that Hallicrafters' entry into color now is significant because "we have been one of the few major companies in the industry who did not give way before the many hysterically premature surges on color which skyrocketed overnight -- only to burn themselves out before returning to the ground." He estimated industry will produce 100,000-150,000 color sets this year.

In contrast to Halligan's enthusiasm, GE v.p. Dr. W.R.G. Baker, in his first statement on color in many months, expressed doubt that even a \$500 set would be the key to mass market. Speaking to MIT Club in New York April 27, he said that sales of more than 500,000 annually aren't likely until 1957, that 1,000,000 rate won't come before 1958. If programming is sufficient, he said, sales of 5,000,000 annually may be expected in 1960 and thereafter.

Dr. Baker said that surveys conducted at color demonstrations indicate that 3 out of 4 people would buy color when the price is "substantially less than \$500," though how much less wasn't determined. He said that 9 out of 10 prefer color to monochrome but insist on 3-4 hours of color programs each evening before buying.

Reason for concluding that \$500 won't bring mass market, according to Dr. Baker, is that mass market has several levels. He said a "class" group may be willing to pay up to 40% more than high end of black-&-white line (an average of \$600 for color set), but he predicted that lower income groups wouldn't be willing to pay more than 25% extra for color receivers.

A major manufacturer, who asked us not to name him, confessed to us that he has done a lot of "soul searching" about color and avowed he was as anxious as anybody else to get it going. He will make "a few" of the new-chassis sets, he said, and will price them competitively -- but is dubious about their saleability. He also is skeptical about the round tube. "The tube absolutely has to be rectangular," he said. "We've tested audiences, and they don't like the round tube." Moreover, he added, glass tubes are superior.

RCA is turning out some 3000 metal-coned tubes a month at Lancaster, can push this up to 30,000 (Vol. 11:16) -- and it's an open secret that it has been stockpiling them against expected orders from other manufacturers. It's committed to 21-in. rounds as least expensive to make, strongest and most stable. Prime mover for 22-in. glass rectangular, CBS-Hytron, which has sampled its tube to the set makers, is waiting for demand before undertaking production.

On bullish side, Packard-Bell report to stockholders states that company has made "great strides in research and development," is now in "actual production planning stage," will be "among the first companies in the country to produce color TV sets that will meet the practical requirements of the public."

Right picture tube still isn't available, according to Zenith pres. E.F. McDonald (see p. 14), who told stockholders he had color set taken out of his home 3 weeks ago because he was tired of servicing needed to keep it working.

Topics & Trends of TV Trade: "Terrific fall season" in TV-radio trade, but only nominal profits on TV receivers due to consumer preference for low-end, seems to express consensus of leading manufacturers as they prepare new lines for summer marts and distributor convention displays. It's usual seasonal slacking-off time right now, hence talk of "lower business" and "trend downward." With some exceptions, factory output has slowed down, though it's still running well ahead of 1954 in both TV & radio. In some instances, workers have been temporarily furloughed.

TV production during week ended April 22, according to RETMA, was 151,593 units, slightly ahead of preceding 2 weeks; radio production was 275,176 units (140,098 auto), up slightly from preceding week. It was year's 16th week, and cumulative output of TVs is about 2,625,000 compared with about 1,790,000 in same 16 months last year; of radios, about 4,475,000 vs. 3,140,000. (Note: Cumulative figures are subject to revisions by RETMA when it makes monthly recapitulations.)

Here's a tabulation of the weekly output figures for TV and radio, with comparisons with comparable 1954 weeks. It points up fact that lower output rate in recent weeks is seasonal; it also shows how TV & radio production has been running ahead of some 1954 periods every week thus far:

Week Ending	TELEVISION		RADIO	
	1955	Comparable 1954	1955	Comparable 1954
Jan. 7	190,895	106,525	278,371	225,481
Jan. 14	166,522	95,915	267,544	221,372
Jan. 21	150,985	111,188	262,949	215,976

DISTRIBUTOR NOTES: Sylvania appoints big McKesson & Robbins drug firm as distributor for radios & phonographs to be sold through drug stores; 14 M&R branches have thus far been lined up in what may develop into nation-wide arrangement over and above regular channels of distribution to appliance, furniture & dept. stores . . . Hallcrafters appoints Rogers & Baldwin Hardware Co., 315 South Ave., Springfield, Mo. . . Bendix appoints Hynes & Waller, 1015 Ninth St. NW, Washington, D. C. . . Philco Distributors, Philadelphia, reports resignation of northeast district rep Wm. Taschner, who plans to open appliance outlet in Lakewood, N. J. . . F. B. Connelly Co. (Sylvania) transfers Richard L. Connelly from Seattle to Portland, Ore., as temporary mgr., succeeding Eldon N. Dean, resigned . . . Westinghouse Electric Supply, San Francisco, promotes Edward G. Marten to TV-radio sales mgr. . . Stromberg-Carlson appoints Archie Jones, 925 E. Flagler St., Miami, and Mechanical Engineering Corp., 228 Bank St., Norfolk (G. A. Bering, pres.) . . . Admiral appoints Associated Radio Distributors, 1929 Market St., San Francisco (Cecil D. Roarke, owner) for radios only in northern Calif.; Admiral also appoints Coffin & Wimple Inc., 142 Broad St., Bangor (Milton F. Coffin) for Maine and north-east N. H.; firm has sub-distributing operation at 51 Main St., Portland (Harold I. Hamm, mgr.).

Philco's James H. Carmine is subject of *Fortune's* May "Portrait"—a splendid shot by Myron Ehrenberg, in full-page color—and writeup recounting how "he sold his way out of the troubles." Starting with Philco as a salesman in Pittsburgh 32 years ago, Jimmy Carmine became pres. last year at age 51. Article says: "Mr. Carmine exemplifies Philco's corporate personality, noted for hard-working and fast-moving management ever since the company shifted to radios from storage batteries in 1928 and in just 2 years outsold every competitor."

Mrs. Ruth S. Tay, wife of Clarence S. Tay, gen. mgr. of Admiral distributing branches, died April 23 in Evanston, Ill. Besides her husband, a daughter survives.

Trade Personals: Harold J. Schulman, CBS-Columbia director of product service, onetime DuMont service director, named asst. to pres. Seymour Mintz in charge of coordinating all company plans & activities; Henry Hinz, chief mechanical engineer and asst. to Mintz, has resigned to form Henry Hinz Assoc., 1888 Grant Ave., E. Meadow, L. I., design engineering consultants . . . C. W. Taylor, recently mgr. of tube parts & machinery sales, appointed to newly created position of mgr., color kinescope marketing, RCA tube div. . . Nils G. Anderson promoted to mgr. of Camden plant of RCA engineering products div., reporting to S. N. Lev, gen. plant mgr. . . Kenneth R. Johnson elected sales v.p. and Jean P. Gleis manufacturing v.p., Packard-Bell . . . Irving Sarnoff, Bruno-N. Y., due back May 5 from tour of Orient, during which he and Mrs. Sarnoff visited their son stationed in Japan . . . S. G. Patterson promoted to pres. & gen. mgr., Rogers Majestic Electronics Ltd. . . E. Arthur Hungerford Jr., mgr. of TV dept., General Precision Lab, named exec. director, Metropolitan Educational TV Assn., whose chairman is Dr. David D. Henry, vice chancellor, New York U . . . Edward F. Hamilton, ex-Admiral, named to newly created post of special representative, Hallicrafters sales dept. . . Dan Creato, v.p. & gen. counsel, RCA Service Co., picked for 1955 "Friends of Service" award by National Alliance of TV & Electronic Service Assns., according to Frank J. Moch, NATESA pres. . . Clarence C. Dixon appointed Southeast district sales mgr., Hoffman radio div., headquartering in Dunedin, Fla. . . Gene Walter, ex-Motorola & Crosley, named district mgr., Granco Products, at Richmond . . . P. T. McCauley, ex-Motorola, elected secy-treas., James Vibrapower Co. . . G. E. Lewis appointed mgr., GE radar & precipitation transformer sales, Holyoke . . . Ned Landon named mgr. of public information, GE research labs, Schenectady . . . Gordon Mead appointed Seattle district mgr., Motorola . . . Wm. T. Higgins, ex-pres., Higgins Distributing Co., Baltimore, joins Zenith Radio's marketing development dept. . . Milton Emmer named national sales mgr., Claremont Tube Corp., Long Island City . . . Dr. Harry E. Tebrock, Sylvania medical director, awarded fellowship in Industrial Medical Assn. . . Edward P. Steele promoted to Admiral mgr. of market research, succeeding Robert L. Anderson, resigned.

Muntz TV Inc., though operating under trusteeship in Chapter X proceedings, claims it earned net operating profit of \$374,246 in 5 months through March; this week, it disclosed plans to manufacture 10-tube receiver (including rectifier & picture tubes) to sell for \$99 for 21-in., \$129 for 24-in., both table models. Recently, Ulysses Sanabria's American Television Inc., Chicago, announced 17-in. plywood table model with 9 tubes and without transformer to retail for \$77 (Vol. 11:15).

Guaranteed annual wage is principal demand in negotiations with RCA, which IUE-CIO spokesman revealed were begun April 12 in behalf of 14,000 RCA employes at Camden, Cincinnati and west coast. Spokesman described the talks to date as "tough going," but expressed confidence in "amicable conclusion."

Excise tax collections from manufacturers of radios, phonographs, TVs, components, etc. totaled \$129,148,000 in calendar 1954, down from \$152,971,000 in 1953, according to Internal Revenue Service.

Dr. Vladimir K. Zworykin left by air April 29 with Mrs. Zworykin for month's visit to Japan to meet with leaders of Japanese electronics industry and deliver several lectures on color TV.

Maj. Gen. J. D. O'Connell becomes chief of Army Signal Corps May 1, succeeding Maj. Gen. George I. Back.

Electronics Reports: First transistorized auto radio to be announced as ready for production was demonstrated in Detroit April 27 by Philco and Chrysler Corp. The 11-transistor unit will be special equipment on Chrysler and Imperial cars this fall.

Every maker of car radios has been working on transistorized versions—and Philco-Chrysler announcement is probably first of many. Because of their low power drain, elimination of power components, long life and size-reduction potentiality, transistors are a "natural" for auto radios. Principal use of transistors in consumer products to date has been in hearing aids, although Raytheon and Regency have transistorized portable radios on market.

Auto radio uses Philco Surface-Barrier transistors in place of tubes, eliminating vibrator, power transformer & rectifier. It requires less than 1/10th the battery power used by standard auto radios. Thoroughly tested in laboratory and on road, Philco says radio will withstand severe shock and vibration. Electrical hum and mechanical noises are said to be completely eliminated, and radio starts to operate immediately without warmup. Compactness of transistorized radio makes possible receivers small enough to be installed practically anywhere in the car.

Radio will be priced about \$150, and eventually—perhaps in 1957—it will also be available for Plymouth, Dodge & DeSoto cars. Production will start as soon as tooling has been completed at Philco's Sandusky, O. plant.

* * * *

Importance of electronics in atomic energy program is pointed out in April bulletin of Television-Electronics Fund. Net assets of atomic program, article states, are now approximately \$7.5 billion, of which about 15% (or more than \$1.1 billion) has been for electronics equipment. "In the nuclear instrument field alone, the volume of business done by electronic manufacturers has reached an approximate annual rate of around \$25,000,000. Projecting the past growth over the next 5 years, it is expected that a yearly volume of about \$50,000,000 will be done at that time." In the reactor field, bulletin states that specifications for an atomic reactor suitable for driving a steam-power plant provide an allowance of about \$90,000 for electronic instrumentation—or 4% of cost of complete nuclear power package including building.

Technical details of Project Tinkertoy, now known as Modular Design of Electronics (MDE) and Mechanized Production of Electronics (MPE), have been released to industry in 5 reports published by Commerce Dept.'s Office of Technical Services. They contain summary of the system, techniques for converting from conventional to modular design, hand fabrication technique & photographic processing, mechanized production and manufacturing cost determination. The reports are numbered PB 111275-78 & 111315, priced at \$14 for all 5.

For transistorized portable radios, CBS-Hytron this week announced new matched pair of p-n-p junction transistors, known collectively as type 2N108, designed for Class B push-pull audio amplifier stage.

Gen. Walter Bedell Smith, member of RCA board, named chairman & pres. of AMF Atomics Inc., new atomic energy subsidiary of American Machine & Foundry Co.

John J. Christian, ex-chief of armament staff unit, Boeing Airplane Co., joins Avco's Crosley div. as mgr. of plans & programs for defense operations.

Wm. S. Yeager is appointed to new post of mgr., industrial defense planning, Western Electric; he was supt. of labor relations, manufacturing div.

Lawrence A. Apley, pres. of American Management Assn., elected a director of Sylvania; he's also a director of Standard Oil (Ohio), Dayton Rubber Co., Ohio Wesleyan U.

Financial & Trade Notes: Zenith first-quarter earnings climbed to \$2,074,960 (\$4.21 a share) from \$827,521 (\$1.68) a year ago, sales to \$40,371,812 from \$29,335,190, paced by TV sales which exceeded previous quarterly unit record (in 1953) by more than 20%. However, pres. E. F. McDonald Jr. told stockholders that dollar volume did not increase correspondingly because of competitive conditions and increased proportion of table models. He added that he expected sales momentum to "carry into the second quarter."

He reiterated Zenith's opposition to present color TV tubes, said the medium is no further advanced than it was a year ago. "When Zenith feels it has found the answer to the color tube, we will go all-out in color TV," he said, "but we have no intention to make guinea pigs out of the public or helping the RCA patent pool."

Pointing to company's use of transistors in hearing aids, he said Zenith is "the second largest user of transistors outside the telephone company." He said Zenith soon will introduce line of special gadgets for the hard-of-hearing, including headphone amplifier for use with Zenith clock radio. Directors boosted quarterly dividend from 50¢ to 75¢.

* * * *

Sylvania's net income for first quarter totaled \$3,247,655 (\$1.03 on 2,923,394 shares), best first quarter in company history, on sales of \$73,979,627. First quarter income last year was \$2,121,487 (67¢ on 2,677,726 shares) and sales were \$66,995,451. Pres. Don G. Mitchell said 1955 unit sales of TV sets were highest for any first quarter, though intense competition "prevented dollar volume from being equally strong." He warned that industry-wide TV inventories are increasing, but predicted sales and earnings for 1955 should be ahead of 1954. He added that favorable conditions in the industry and in the general economy "should prevail for the balance of the year," estimating 1955 earnings will exceed \$4 per share. [For 1954 figures, see Vol. 11:11.]

Hoffman Electronics Corp. reports consolidated sales of \$8,988,928 for first quarter, down from \$14,147,572 same 1954 period, with net profits to \$309,906 (43¢ on 719,396 common shares outstanding) from \$470,238 (65¢). Reductions, said pres. H. Leslie Hoffman, resulted entirely from unavoidable delays in production for govt. contracts due to new scheduling. Operations for second quarter are expected to be about same as last year when sales were \$8,768,925 and profits \$348,445; improvement is expected in second half of year from seasonal increase in TV sales and large-scale production of Tacan flight system and other electronic equipment. Profit ratio on govt. work remains about same as 1954, said Mr. Hoffman, while rate of profit on TV production is better than last year.

DuMont Laboratories Inc. shows \$27,000 loss after taxes on sales of \$15,989,000 in 12-weeks ended March 25, which compares with net profit of \$508,000 (20¢) on sales of \$19,770,000 in corresponding 1954 period. Broadcasting losses exceeded manufacturing profits of \$700,000, and statement also reflected elimination of income from Pittsburgh TV station (now KDKA-TV) which was sold last year to Westinghouse.

Olympic Radio & Television Inc. reports sales for first 1955 quarter were \$4,800,986 compared with \$4,860,015 for same 1954 period—higher TV, radio and high-fi sales maintaining volume despite decline in military shipments. Net profit was \$82,631 (19¢ a share) compared to \$58,072 (13¢). Stockholders this week approved increase in authorized shares from 500,000 to 1,000,000.

Standard Coil Products Co. reports sales of \$16,325,635, net profit of \$116,599 (8¢ a share) for first quarter 1955, compared to \$18,971,300 & \$406,306 (28¢) for same 1954 period.

More 1954 officer-director compensation reports to add to those published in Vol. 11:15-16: IT&T—Sosthenes Behn, chairman, \$130,825 (16,747 shares); Wm. F. Halsey, chairman, All America Cables & Radio Inc., \$33,630 (900); Wm. H. Harrison, pres., \$134,115 (43,600); Ellery W. Stone, pres., American Cable & Radio Corp., \$64,413 (14,100); Mark A. Sunstrom, exec. v.p., International Standard Electric Corp., \$53,168 (20,200). Hoffman Electronics Corp.—H. L. Hoffman, pres., \$50,000 (116,192 shares, or 16.15% of total; additional 40,313 held by family); C. E. Underwood, v.p. & treas., \$52,500 (5000); Howard C. Briggs, v.p., Hoffman Laboratories Inc., \$33,333 (2000).

Webster-Chicago sales for first quarter 1955 totaled a record \$8,321,976, with profit of \$192,255 (37¢), compared with 1954 period's sales of \$6,899,586 and profit of \$205,946 (39¢). Pres. Norman C. Owen told annual meeting company has \$14,000,000 military order backlog and prospects for rest of year appear very good. He said Webcor is first to use printed circuits in phonographs, and more than 75% of all amplifiers for company's products in 1955-6 will utilize printed circuitry.

Packard-Bell Co. net income was \$319,238 (46¢ a share) on sales of \$11,038,882 in 6 months ended March 31, compared with \$328,647 (48¢) on \$11,118,097 in same 1954 period. In addition to report on color sets (see p. 12) and military aircraft equipment, exec. v.p. Robert S. Bell stated that company is developing "an amazing transistor wrist radio, for which the company has great plans" and a "greatly improved automatic door, operated on electronic principles."

Trav-Ler Radio Corp. has filed SEC statement covering proposed \$1,250,000 debenture issue to be offered for public sale about mid-May. Funds will be used for working capital. Twelve-year 6% debentures would be issued in denominations of \$500 & \$1000, entitling holder to buy warrants for 50 & 100 shares of Trav-Ler common at unstated subscription price. Lee Higginson Corp., N. Y. and Straus, Blosser & McDowell, Chicago, are principal underwriters.

Magnavox reports sales of \$14,365,079, net profit of \$577,738 (73¢ a share) for quarter ended March 31, compared to \$15,227,147 & \$328,552 (41¢) for corresponding 1954 period. For 9 months ended March 31, net sales were \$42,383,971, profit \$2,110,147 (\$2.65 a share) vs. \$51,147,940 & \$2,030,912 (\$2.55) for same period preceding year.

Skiatron Electronics & Television Corp., promoter of Subscriber-Vision system of subscription TV, had gross income of \$223,119 in 1954, nearly all from govt. contracts, and earned net profit of \$1943—leading pres. Arthur Levey to state in annual report that firm is now paying own way. Deficit from time of organization Feb. 8, 1948 to last Dec. 31 is given as \$58,864. Matty Fox advanced \$129,999 up to Dec. 31 out of committed \$300,000 under his Skiatron TV Inc. franchise deal. Expended up to now on processing of subscription TV application before FCC was \$51,339, on engineering research and designing costs \$48,261. Dean James M. Landis, counsel, is disclosed as holding option on 30,000 shares (out of 1,337,317 outstanding) at \$1.87½, with credit of 12½¢ per share in consideration of legal services.

Dividends: Zenith Radio, 75¢ (up from usual 50¢ quarterly) payable June 30 to stockholders of record June 10; Standard Coil Products Inc., 25¢ May 18 to holders May 9; Servomechanisms, 10¢ May 16 to holders May 2; Stanley Warner, 25¢ May 24 to holders May 4; Westinghouse, 50¢ June 1 to holders May 9; Television-Electronics Fund, 8¢ May 31 to holders April 29; P. R. Mallory, 50¢ June 10 to holders May 23.

STROMBERG-CARLSON has no intention of forsaking either the TV-radio set manufacturing or the TV-radio broadcasting business as result of projected merger with General Dynamics Corp. (p. 11). Fact that General Dynamics proposes to utilize Stromberg's electronic know-how in big way, and probably expand facilities at Rochester, was manifest by arrival of several of its top executives in that city day after proposed merger was announced, April 26. They wanted further look-see at plant and personnel.

Stromberg-Carlson is heavily in govt. work, but a spokesman said it does not want to depend entirely on that kind of business. "We need a wider base," he said, "and in every way this seems to be the right move for us in order to add financial strength and expand our operations." Dynamics pres.-chairman John Jay Hopkins said his firm seeks to broaden its base of operations in electronics, and "Stromberg-Carlson's civilian commercial business, particularly its telephone, radio-TV and sound equipment production would consist of a sound source of diversification for Dynamics."

In TV & radio broadcasting, Stromberg's pioneer WHAM-TV has always been a substantial earner and, until the diminution of network revenues, so was its 50-kw radio WHAM. Many offers to buy the stations have been received, but always rejected. Whether General Dynamics will want to continue in TV-radio broadcasting, time alone will tell; the broadcasting operations, headed by Wm. Fay, will have to be separately incorporated and operated as a subsidiary because General Dynamics has 2 Canadians on its board and the law does not permit foreigners on the boards of U. S.-licensed stations.

In the TV-radio receiver business, Stromberg-Carlson has never been a major factor, but it enjoys a fairly good distributor setup which largely overlaps with Kelvinator distributorships.

Firm is particularly strong in the less-publicized telephone equipment business, selling phones and switchboards to some 5300 independent telephone companies. Since it was founded in Chicago in 1894 by Alfred Stromberg and Androv Carlson, young Swedish immigrants, it has

made and sold some 8,000,000 telephones. The business moved to Rochester in 1902. Its payroll is about 5200. Last year, its sales were \$63,509,429, net earnings \$1,981,754, or \$3.65 per share on 509,115 common shares outstanding as of Dec. 31 (Vol. 11:9). It paid \$1.52½ common dividend, had current assets of \$34,450,978, working capital of \$17,389,513, total net worth of \$19,411,348. [For first 1955 quarter sales & profit, see below.]

As of March 31, Stromberg-Carlson had 530,892 common shares outstanding and 58,457 preferred. The preferred are convertible into 1.4 shares of common.

General Dynamics sales zoomed from \$82,600,000 in 1951 to \$134,500,000 in 1952, \$206,600,000 in 1953, \$648,641,000 in 1954, according to Standard & Poor's. Its net income over same span was \$3,870,000 (\$2.27 per share) in 1951, \$4,920,000 (\$2.86) in 1952, \$6,220,000 (\$3.51) in 1953, \$20,800,000 (\$4.72) in 1954 (giving effect to 2-for-1 split in March 1955). It operates through 4 divisions: Convair, with plants in San Diego, Pomona, Cal., Ft. Worth & Daingerfield, Tex., which make many types of military and commercial planes and guided missiles; Canadair Ltd., Montreal, a subsidiary which makes jet planes and guided missiles for Canadian Govt.; Electric Boat, Groton, Conn., which is sole private producer of submarines for Navy and holds orders for 3 more atomic powered subs; Electro-Dynamics, Bayonne, N. J., which makes electrical motors and generators for marine & industrial uses. On April 30, 1954 it merged with Consolidated Vultee. It employs 55,000.

As of March 31, 1954 General Dynamics' stock capitalization was 4,377,991 shares. It has no preferred. It recently sold public issue of \$40,000,000 in 3½% convertible debentures due in 1975. Its current dividend rate is \$2.20. [For first quarter sales & profit, see below.]

No management changes are planned in either corporation, according to Dynamics chairman-pres. John Jay Hopkins. Robert C. Tait, Stromberg pres., will continue as div. pres. and will also become a senior v.p. and director of Dynamics. Wesley M. Angle, Stromberg chairman, and Bernard E. Finucane, pres. of Security Trust Co. of Rochester and a Stromberg director, will also go on Dynamics board.

Sperry Rand Corp. will be name of new company resulting from merger of Remington Rand Inc. and Sperry Corp., with Gen. Douglas MacArthur as chairman; James H. Rand, vice chairman; Harry F. Vickers, pres.; John Sanderson, v.p. & secy.; Bernard O. Reuther, v.p. & treas. Plan is to convert each share of Sperry common into 3¼ of Sperry Rand, each share of Remington Rand into 2 of Sperry Rand. One share of Sperry Rand preferred would replace each share of Remington Rand preferred. Assets of new company would be about \$484,000,000. Approval requires vote to two-thirds of outstanding stock of each company, will be voted on at Sperry meeting May 26, Remington Rand meeting May 27.

General Dynamics Corp. had backlog of \$1,035,000,000 in unfilled orders at end of March, chairman-pres. John Jay Hopkins reported to stockholders meeting April 28. Its net sales for first quarter increased to \$142,248,000 from \$129,353,000 last year, estimated earnings to \$3,914,000 (89¢ a share) from \$3,313,000 (74¢). Mr. Hopkins said he expected good 1955, and estimated Stromberg-Carlson's 1955 net income would be \$5.70 a share after allowing for conversion of all preferred as against 1954 earnings of \$3.65.

Stromberg-Carlson first quarter sales were \$17,009,385, net income \$604,577, or \$1.07 per share on 530,892 shares outstanding vs. \$16,285,006 & \$571,553 (\$1.13 on 504,118) in same 1954 quarter. At stockholders meeting this week, all officers and directors were re-elected.

Sales of consumer products were up, heavy apparatus & industrial products about same, defense items down during first 1955 quarter, GE pres. Ralph Cordiner reported to stockholders meeting in Schenectady April 19. Nevertheless, quarter's total volume of \$765,907,000 was up 7% over the \$715,596,000 of same 1954 quarter, and profit increased to \$50,569,000 (58¢ per common share) from \$48,029,000 (56¢). The 1954 quarter came within 2% of record high achieved in first quarter 1953.

Borg-Warner Corp. to merge with Byron Jackson Co., San Francisco, maker of electronic devices & nuclear power components as well as pumps and oil field tools, on basis of 4 shares of former for 5 of latter. Borg-Warner 1954 sales were \$380,317,000, earnings \$24,460,000 (\$3.72 per share). Byron Jackson 1954 sales were \$31,890,000, net income \$1,641,087 (\$3.10). Their total assets as of Dec. 31 would have amounted to \$292,473,000.

IT&T has bought Kuthe Laboratories Inc., Newark (vacuum tubes). Dr. Herman Kuthe, who developed the hydrogen thyratron tube at the MIT Radiation Lab, continues as pres. of new IT&T unit.

In list of 33 non-financial corporations having total assets of \$1 billion or more, compiled by UP, only ones identified with electronics industries are AT&T, \$16.51 billion; GE, \$1.69; Westinghouse, \$1.32; Western Electric, \$1.07. Leader by far is AT&T, then Standard of N. J., \$6.61; General Motors, \$5.13; U. S. Steel, \$3.34; Pennsylvania R.R., \$3.04; DuPont, \$2.74; N. Y. Central, \$2.60.

FREE TV-RADIO TIME for political candidates—with U. S. Treasury helping out if it's too heavy a burden on broadcasters—was advocated by Comr. Hennock this week before Senate Rules subcommittee. It was strongly opposed by spokesmen for CBS & NBC, both of which revealed some of their plans for 1956 political telecasting. At issue is S-636, introduced by Sen. Hennings (D-Mo.), to increase national political committees' expenditure ceiling to \$12,300,000, mainly on account of high cost of TV time (Vol. 11:16-17).

Comr. Hennock proposed that Hennings bill be amended to authorize creation of a "joint Congressional & Presidential committee" to develop program which could enable Congress to start free-time policy by the next Presidential election.

NBC financial v.p. Joseph V. Heffernan told Senators the network has several plans to make time more readily available to candidates and at the same time save them money. These included: (1) Cutting short regular 30-min. and hour programs to make available 5-min. segments to candidates and parties in 1956 campaign on "rotation of schedule basis." (2) Offering 1-min. political announcements in *Today, Home & Tonight* shows. (3) Withholding from sale to regular commercial sponsors "a reasonable number" of prime evening periods so that these can be purchased by political parties without necessitating pre-emption charges, which amounted to \$175,000 on NBC-TV alone during 1952 campaign. Hennings thanked Heffernan for "specific and constructive recommendations."

CBS v.p. Richard Salant said his network might be forced to provide less TV-radio coverage of 1956 campaign than it did in 1952. He said if all networks and stations gave 30-min. of free time to all Federal candidates, it would cost broadcasters \$30-50,000,000 every 4 years, and \$7.5-15,000,000 during off-year campaigns. If network donated one half-hour to one presidential candidate, it would eventually cost it and its affiliates \$7,200,000 — because of the demands for free time from all other presidential candidates, of which there were 18 in 1952.

Questioning Comr. Hennock about her free-time plan, Sen. Curtis (R-Neb.) wanted to know what would prevent any number of individuals from organizing political parties merely to take advantage of the free time. The commissioner suggested her plan be confined to "major parties," at least at the start. Sen. Hennings said he's not ready to commit himself on free-time issue, but agreed that TV's growth poses many new problems.

Anti-trust complaint being prepared by Justice Dept. against American Newspaper Publishers Assn., American Assn. of Advertising Agencies and other trade associations doesn't affect NARTB, said NARTB officials after early reports this week indicated it too might be involved. Attorney General Brownell said complaint is based on associations' adherence to flat 15% commission to ad agencies, which he called a price-fixing conspiracy. He said he hoped complaint could be dismissed upon voluntary compliance of associations in dropping the fixed percentage practice. Action was sparked, it was disclosed, by small agencies with insufficient capital to gain membership in AAAA and by big advertisers who sought to build own "house" ad agencies.

First post-freeze station KFEL-TV, Denver (Ch. 2) is revealed in April 26 press release as subject of recent trade ad offering itself for sale at \$750,000, through brokers Blackburn-Hamilton. No longer network-affiliated, KFEL-TV owner Gene O'Fallon issued release, it was indicated, to counteract alleged competitor rumors that "soon there will be only 3 channels in Denver."

Like Storer Broadcasting Co.'s huge upsurge in revenues and profits after it entered TV (Vol. 11:14), Gross Telecasting Inc. (WJIM-TV & WJIM, Lansing, Mich.), which this week marketed 193,000 shares of common stock at \$15.75 (Vol. 11:17), reveals in its prospectus how it too surged upward after it began telecasting service in 1950. Here are its gross revenue and net profit figures, after taking into account chief owner Harold F. Gross' annual salary of \$15,000 and 1950 bonus of \$31,304; 1951, \$68,312; 1952, \$132,282; 1953, \$166,753. In 1954, bonus would have amounted to \$207,070 but was restricted to maximum of \$60,000:

Year	Gross Revenues Television	Gross Revenues Radio	Income Before Taxes	Net Income
1950	\$ 194,070	\$321,247	\$ 177,391	\$107,149
1951	575,615	330,909	387,100	196,508
1952	1,114,939	337,592	749,599	357,077
1953	1,539,951	317,375	927,933	419,891
1954	1,973,031	268,558	1,320,464	639,464

Tenth anniversary of telecasting will be theme of "TV morning," May 26, at NARTB convention in Washington —featuring participation of the presidents of 4 networks in discussion of growth of TV since 1945 and looking ahead to 1965. Session will open with review of events leading up to establishment of TV, by Clair McCollough, WGAL-TV, Lancaster, chairman of Management Conference on TV Day. Other highlights: "First Years of TV," by Dr. Allen B. DuMont. "Management & Growth," tracing development of industry to the present, discussion by pres. Robert E. Kintner of ABC; Harold Hough, WBAP-TV, Fort Worth; John E. Fetzer, WKZO-TV, Kalamazoo & KOLN-TV, Lincoln, Neb. "Television 1955-1965," NBC pres. Sylvester L. Weaver Jr., discussing TV's program structure, and CBS pres. Frank Stanton, examining role of TV in society. Afternoon will be programmed by TvB, featuring talks by director of station relations Norman Cash; co-chairman Richard Moore, KTTV, Los Angeles and pres. Oliver E. Treyz.

Though deadline for comments on AT&T's off-air microwave proposal has been extended until May 20 at request of RETMA and NARTB, quite a few comments were filed this week, most of them from stations urging that they be permitted to build own private microwaves unless AT&T can provide service at same cost. Comments in that vein were submitted by ABC; KOA-TV, Denver; WCMB-TV, Harrisburg, Pa.; WNOW-TV, York, Pa.; WSIL-TV, Harrisburg, Ill.; Dage TV div.; WEAU-TV, Eau Claire; KYTV, Springfield, Mo.; KQTV, Ft. Dodge, Ia. ABC and several others questioned whether community TV systems should also be permitted to use AT&T's off-air service, stating: "In some instances the use of community antenna systems for which the public is obliged to pay is detrimental to the development of free TV service in the area." On other hand, community system operator Cable-Vision Inc., Key West, Fla., urged that they be permitted to obtain such service.

Telecasts from the moon are promised Russian viewers by Soviet scientists. Moscow Radio reports plans to explore the moon with a rocket-borne remote control caterpillar tank which will beam TV signals to the earth. Tank would be unmanned, controlled by radio. Broadcast said that the "mooncasts" would be beamed to home TVs as well as to scientific observatories. It didn't say when.

Coast-to-coast closed-circuit color transmission will be staged by NBC-TV May 5, when 8 live commercials "with full production treatment" will be beamed from N. Y. to Santa Barbara convention of Assn. of National Advertisers, with NBC pres. Sylvester L. Weaver giving commentary for 30-min. presentation.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 19

SUMMARY-INDEX OF THE WEEK'S NEWS—May 7, 1955

DuMONT REORGANIZATION, with new banker-director, aims to ameliorate friction with Paramount, spin off telecasting from electronics business (p. 1).

44th UHF QUILTS in Stockton, Cal., as revivals of off-air uhfs in Mobile, Houston & Norfolk are promised; New Orleans uhf plans 1-megawatt (pp. 3 & 8).

MILLION-WATT UHF power enlarges coverage area, fills in "blind spots" in Wilkes-Barre; first-hand survey of the world's most powerful stations (p. 3).

GRANTS AUTHORIZED in Hattiesburg, Miss., Ephrata, Wash. & Milwaukee, Wis.; one vhf drop-in proposed for Massachusetts, another denied for Buffalo (p. 5).

TOLL TV BATTLE AT FCC, still hotly in publicity phase, getting down to legal specifics as counsel prepare cases and pros & antis line up (p. 6).

PROFITS FROM COLOR sales next year forecast by Sarnoff, announcing \$795 set to stockholders; sees color trade "break-through" by next Xmas (p. 10).

TV SET PRODUCTION for first 4 months of 1955 totals 2,770,000, well ahead of the 1,904,000 produced during same period of 1954; radio output up, too (p. 10).

DISTRIBUTOR SHIPMENTS of TV sets by states reported by RETMA for 9 years through 1954; total of 35,677,818 shipped compares with 37,668,819 produced (p. 11).

RCA SALES & EARNINGS at new record highs first quarter, auguring \$1 billion year; about 20% govt. contracts; Sarnoff's report to stockholders (p. 13).

MARCH NETWORK BILLINGS show CBS-TV & NBC-TV at record highs, radio up from Feb.; combined TV networks did nearly \$100,000,000 in first quarter (p. 14).

REORGANIZATION IN THE OFFING AT DuMONT: New banking blood is coming into Allen B. DuMont Laboratories Inc. shortly -- with these immediate purposes:

(1) To eliminate "bifurcation," as one of banking principals put it, referring to setup whereby Dr. DuMont's management group has 5 directors while biggest stockholder, Paramount Pictures Corp., has 3 -- with resultant differences & clashes.

(2) To spin off the telecasting properties -- WABD, New York and WTTG, Washington, both Ch. 5 -- from the manufacturing business and set them up as separate corporate entities, in which DuMont stockholders would be given the shares.

Basic idea is first to eradicate main source of friction between Dr. DuMont and Paramount, arising primarily out of moviemens' undisguised conviction that the pioneer set & tube manufacturer, who also pioneered telecasting, cannot successfully operate what's essentially show business "from a factory office in Passaic, N.J."

New director slated to be elected at a special board meeting next week is Armand G. Erpf, partner of Carl M. Loeb, Rhoades & Co., nominated by a protesting minority at annual DuMont stockholders meeting May 2. Only 36,302 shares were voted for him, though his firm claims to own or control some 20% of the 1,801,054 shares of Class A common stock outstanding.

Mr. Erpf said his nomination at this week's meeting was a mere preliminary, after which he set about to persuade Dr. DuMont to have his directors elect him at a special meeting. Otherwise, he threatened to conduct a proxy fight. He's represented by Dewey, Ballantine, Bushby, Palmer & Wood law firm -- the "Gov. Dewey firm."

All 560,000 shares of the Class B are owned by Paramount, which held 43,200 shares of Class A (about 2.4%) as of last Jan. 31 but has recently bought more to increase these holdings to 68,000 (about 4%). The shares have equal value save in elections of officers and directors. Paramount votes 3: Barney Balaban, Paul Rabinovitch, Edwin L. Weisl. Dr. DuMont's directors, in addition to himself, are Admiral Stanley F. Patten, v.p.; Bruce T. DuMont, a brother; Thomas T. Goldsmith Jr., v.p. research; Percy M. Stewart, partner of Kuhn-Loeb & Co.

It's expected Bruce T. DuMont may yield his directorship to Mr. Erpf, and there's sentiment also to elect Wm. H. Kelley, v.p. & gen. mgr., to the board.

The quid pro quos of the agreement to elect Mr. Erpf aren't clear yet, but

the motivations are. With his claimed 20% Class A holdings and Paramount's 4%, it was apparent his proxy fight would start with a head of steam -- for such combined holdings exceed the 47,800 shares owned or controlled by Dr. DuMont, the 3100 by Dr. Goldsmith, 400 by Adm. Patten, 200 by Bruce DuMont. Mr. Stewart has 1000 shares.

Most of the Class A common is publicly held, traded on the American Stock Exchange, where this week it rose to high of 17½ from low of 14%, closing at 16% Fri.

There's no bad blood, so far as can be learned, between the bankers and Dr. DuMont himself. The bitterness is all vis-a-vis Paramount, which Dr. DuMont blames for thwarting his purposes consistently, including failure of last year's negotiations for a merger with ABC (Vol. 10:46). This Paramount vehemently denies. Paramount blames him for the heavy losses suffered in the telecasting business, forcing the DuMont network to curtail to a mere skeleton (Vol. 11:1, 13) and to sell its profitable WDTV, Pittsburgh (now KDKA-TV) to Westinghouse for \$9,750,000 (Vol. 10:49).

Company's 1954 report shows assets of \$32,954,000. Common stock's book value is \$12.28. Paramount's 1954 report shows it carries its 560,000 Class B and 43,200 Class A (as of Dec. 31, 1954) at \$164,000, that having been its aggregate investment some 20 years ago in Dr. DuMont's then struggling tube-making company.

Dr. DuMont has long sought to get Paramount to sell out, but unavailingly. Paramount operates a TV station of its own in Los Angeles (KTLA) and like other film producers is evincing an eager interest in the TV film market. But it disavows any desire to take over the DuMont Network or its stations; in fact, its votes were required for approval of the sale of the Pittsburgh station.

It won't be surprising if WTTG in Washington is sold, for the bankers' plans seem to concentrate on WABD, and Dr. DuMont has great hopes for his Electronicam, a combination TV & film camera which has given impressive demonstrations (Vol. 11:6, 8, 13, 16). The Electronicam is already shooting for ad agencies, Ford Foundation, et al, and DuMont is considering going into film producing & syndicating business.

The Electronicam will not be sold, only leased-- and its application to efficiency & quality of theatrical movie production appears to be as important as to TV.

* * * *

There's no disposition to oust Dr. DuMont as head of the TV receiver & tube manufacturing business, which he told stockholders last week earned 3% after taxes both last year and in 1953. Last year, company did a gross business of \$99,570,000 and showed net earnings of \$7,597,000 -- but profit figure included \$6,727,000 after capital gains on the sale of the Pittsburgh station.

Report blames telecasting network operations for low net earning power, and latest 12-week report (to March 25) showed \$27,000 loss on sales of \$15,989,000 in contrast to \$508,000 profit (20¢ a share) on \$19,770,000 in same 1954 period.

Dr. DuMont told the stockholders that network operating losses from inception were \$16,000,000, last year's running \$5,000,000, but he showed that profits from the 3 owned-&-operated stations cut losses down to \$5,500,000. Some saw hint that he might be willing to dispose of both remaining stations when, after pointing out the \$6,725,000 net capital gain after taxes realized from Pittsburgh sale, he said:

"Should it become desirable to translate the market values of our remaining broadcasting properties into liquid assets, it is a matter of simple arithmetic to figure that from the beginning our gains, as a result of being in the broadcasting business, will exceed our total operating losses by more than \$7,000,000 after taxes. This amounts to approximately \$3 a share more in terms of shareholders equity."

But neither the bankers nor Paramount seemed impressed by such figures, if it's contemplated to continue in network telecasting with only 2 stations that are not good earners. They make it plain they want Dr. DuMont to tend to his electronic knitting -- and in that burgeoning field they indicate they have no intention of interfering with him so long as the manufacturing company does well.

Said a banking spokesman: "Dr. DuMont is a first-rate fellow, with certain talents along certain lines. There is no intention to thwart those talents." And Mr. Erpf, apparently satisfied that the situation is well in hand, departed May 6 for 2 weeks in England.

44th UHF QUILTS AIR, 3 REVIVALS PLANNED: One more uhf quit the air this week -- KTVU, Stockton, Cal. (Ch. 36) which signed off April 30 after some 16 months of operation. It's the 44th uhf to go off air, leaving 107 uhf out of 429 stations now operating.

This bad news for the uhf protagonists came simultaneously with information that New Orleans' WJMR-TV, authorized to shift from Ch. 61 to Ch. 20 and planning new GE 1-megawatt transmitter, has not only completed arrangements to take over now-silent WKAB-TV, Mobile (Ch. 48) and operate it as satellite, but is also planning to revive KNUZ-TV, Houston (Ch. 39), off air since last June 25.

And new owner of WTOV-TV, Norfolk (Ch. 27), silent since Oct. 3, still says he plans to reinstate it (Vol. 11:11,17) -- but gives no date.

Plan of WJMR-TV is to specialize in all 3 cities in Spanish-language & Negro programming, according to exec. v.p. George Mayoral, who also contemplates other expansions (see p. 8). Whereas 18-month-old WJMR-TV, with CBS & ABC affiliations in one-vhf New Orleans, is in black and on upgrade, according to Mayoral, Stockton's KTVU was victim of intermixture after Ch. 13 KOVR got on air with Mt. Diablo transmitter and final coup came when new KBET-TV, Sacramento (Ch. 10) got going in March.

Only 60 mi. east of San Francisco and 45 mi. down valley from Sacramento, KTVU went on air Dec. 19, 1953 with \$250 hourly rate, soon boosted to \$385 but later cut to \$175. CP is retained by Brown Industries, which publishes daily Richmond Independent and Fontana Herald and the weekly LaMesa Scout.

MILLION-WATT UHF IMPACT IN WILKES-BARRE: Power makes a world of difference in uhf. It still doesn't change it into vhf, nor is it a substitute for programming -- but the brute force of 1,000,000 watts can overcome many of the finicky shortcomings in local reception and distant coverage which have plagued uhf operators.

This week we visited Wilkes-Barre, Pa., "mother of megawatts," where GE's and RCA's pilot million-watt installations have been in operation since January for NBC-affiliated WBRE-TV (Ch. 28) and ABC-affiliated WILK-TV (Ch. 34). We talked to the station operators and personnel, TV and parts distributors and servicemen, and found all reactions strongly on the plus side.

Wilkes-Barre area is an acid test for uhf, from the technical point of view. Heart of the hard coal mining area, its landscape is a never-ending series of convolutions of high ridges and low valleys -- the enemy of good uhf coverage.

From another point of view, it is ideal uhf country: It's almost completely "un-intermixed". Uhf is the only service in Wilkes-Barre, and the dominant service to its sister-city Scranton, 16 mi. northeast. But that doesn't keep it from being a fiercely competitive market -- between them, the 2 cities have 5 stations, all uhf.

While there is no conversion problem in Wilkes-Barre-Scranton area, there is nevertheless a constant battle for survival -- as 5 TV stations fight it out for the viewer's attention and the advertiser's dollar. And that's why it wasn't too surprising when 2 of the area's outlets announced last winter -- separately -- that each would be "the world's first million-watt TV station."

WBRE-TV chose RCA's new 25-kw transmitter and huge 46-gain antenna. WILK-TV has GE 45-kw klystron-powered transmitter with conventional type antenna. No area measurements have been completed to show individual signal strength and coverage, and during our visit we found no tendencies to make sharp comparisons. In some locations, one signal may be slightly better; in some the other has the edge. In some spots, there's been no signal improvement at all -- but in vast majority of difficult-reception locations the change has been for the better.

Both transmitters are located on same 2000-ft. mountain ridge near edge of city -- 3 mi. apart -- with good line-of-sight to most heavily populated areas. But both stations were plagued from the start with close-in "shadows" where the signals stubbornly refused to penetrate. The most important of these have been filled in as result of the power boosts. The worst problem areas -- most of them fortunately sparsely populated -- may never respond to any power treatment.

There's no question that coverage area has been enlarged, fringes moved out. Shuffling through stations' mail, we saw many cards and letters of the "we-couldn't-get-you-before-but-now-you're-clear-as-a-bell" variety. Stations' best coverage is

to the southwest, where line-of-sight signal follows rich Wyoming Valley, bringing clear pictures as far as 80 mi. To the north it's blocked by mountains (and Binghamton's vhf territory), with consistent good reports coming from 35 mi. or so in that direction. To south and northeast, heavy mail and good reception reports are consistent up to about 40 miles.

* * * *

From local trade sources come these typical reports: Admiral distributor R.B. Wall Co. -- "There's been quite a bit of difference. Wherever the signal used to be weak, our sales have increased, particularly in areas like Berwick [22 mi.], Bloomsburg [35], Danville [45] and Milton [55]." Dahl W. Mack, big Scranton parts distributor -- "There's no question that the signal has been increased considerably in the former fringe area. But the biggest improvement we've noticed has been behind obstructions, in the former 'holes'. I myself live in Clark's Summit, well out of line of sight of both the transmitters. Formerly, I couldn't even pick up their audio. Now both come in strong, though the signal has to bend 1000 ft. In town and in nearby places the signal is much easier to pick up now, allowing us to use lower price antennas and lead-in, with the customer saving money."

How does coverage compare with vhf? That's the inevitable question. There is no easy answer, because there's no vhf to compare it with. But for all the improvement, best estimate is that it's still not as good at filling in shadows and providing long-distance coverage as top-power vhf.

* * * *

Both stations are pleased with their new power plants, though they know they will have to hustle all the more to meet the additional original costs and upkeep (power bill runs about \$1400-\$2000 a month, and total operating costs with the high power add about \$50,000 a year to the stations' bills). Neither station reports any major troubles with the new equipment.

Both stations concentrate on local productions and local selling -- using the "one million watts" to advertising advantage. WILK-TV managing director Thomas P. Shelburne goes in strongly for building up local "personalities," even has daily 90-min. early evening variety show, sold on participation basis. Some 40% of WILK-TV's programming is local live, 40% ABC network. WILK-TV employs over 60, WBRE-TV over 70.

WBRE-TV, with the stronger NBC program lineup and well in the black, also emphasizes Main St. -- and especially since the power boost, it's not only Wilkes-Barre-Scranton's main street, but those in dozens of other communities in the service area. Station has 10 roving newsreel photographers -- many full-time -- stresses local newsfilm coverage in every nearby community. Both stations count their new high power as only a part of the competitive battle for local telecasting supremacy.

They've received quite a few mail inquiries about their high power from other uhf operators, and some have come to give the installations the once-over. But most uhf stations -- particularly in mixed markets -- are struggling now just to stay on the air, and 1,000,000 watts is a luxury they can't even afford to think about yet.

Under what circumstances should uhf operators "go to a million"? We asked managers of both stations. WBRE-TV's exuberant v.p.-gen. mgr. David M. Baltimore replied without hesitation: "Every uhf man in the country ought to have one -- if he can meet the expenses of it." WILK-TV's Shelburne outlined these conditions: "If he wants the edge over his competition; if he wants heavy saturation of power in his primary area, comparing to strong vhf, and if his fringe population is big."

New TV excise tax bill was introduced in Senate this week--by Sen. Long (D-La.). Identical to measure which died with 83rd Congress last year, S-1898 provides for credit of \$7 against manufacturers' 10% excise tax for each set with built-in uhf tuner. Set manufacturers have indicated they will not support such a bill, and uhf telecasters have noted it provides no incentive for production of all-channel sets. Spokesman for Sen. Long said the Senator merely felt the bill "was good last year and ought to be good this year." The bill backed by set makers is

HR-4070, introduced by Rep. Ikard, which would completely exempt all-channel sets from excise tax (Vol. 11:18). Growing impatient with Treasury's apparent unwillingness to state its position on the measure, Ikard this week got House Ways & Means Committee to write to Treasury Dept.

NARTB's mgr. of employer-employee relations Charles H. Tower testified before Senate Labor subcommittee May 4 in opposition to \$1.25 minimum wage proposal as economic hardship for small market stations.

Personal Notes: Clair McCollough, pres. of WGAL-TV, Lancaster, Pa. and gen. mgr. of the Steinman stations, to be given honorary degree of Doctor of Commercial Science by Franklin & Marshall College at its 168th commencement June 13; he's TV chairman of NARTB & co-chairman of its upcoming convention . . . Wm. Lodge, CBS engineering v.p., leaves on European trip, returns in mid-June . . . Paul Whiteman resigns as ABC v.p., will devote more time to Jackie Gleason Enterprises . . . Gordon Gray, v.p. & gen. mgr. of WOR-TV & WOR, elected a director of N. Y. Better Business Bureau . . . Milo Frank, head of CBS-TV talent & casting dept., N. Y., transfers to Hollywood as director of casting & new talent . . . Jack McCabe, from Toronto staff, named CBC asst. supervisor for sports . . . John M. Keys, mgr. of adv. & promotion, promoted to sales director, WNBQ & WMAQ, Chicago, with Charles Dresser moving to staff of NBC-TV network's central div. sales v.p. Edward R. Hitz . . . Wm. Veneman, ex-KTTV, Los Angeles, named exec. asst. for TV to J. Elroy McCaw, owner of KTVW, Tacoma, and part owner of KONA, Honolulu . . . Robert F. Stolfi, ex-CBS-TV network sales dept., named sales promotion director of Notre Dame's projected WNDU-TV (Ch. 46), due next July . . . Wm. W. Joyce named midwest TV sales mgr., Roy Miller radio sales mgr., Chicago office, Katz Agency, reporting to v.p. Charles H. Gunst . . . Ted Huston transferred from N. Y. to head new TV commercial production dept., Lennen & Mitchell, Beverly Hills, Cal. . . Robert W. Rawson named TV-radio director, Sherman Lawrence Adv., Newark . . . Harold V. Phillips, ex-WMBD, Peoria, named sales mgr., WTVH-TV, Peoria, under gen. mgr. Edward G. Smith . . . Dr. Frances Horwich, whose *Ding Dong School* originates from N. Y. after June 1, moving from Chicago to N. Y. to add duties of NBC supervisor of children's programs . . . Wm. S. Hedges, NBC v.p., elected pres. of Rotary Club of N. Y. . . . Samuel Dana, ex-McCann-Erickson, named TV promotion supervisor, NBC Spot Sales . . . John F. Manning, ex-TV-radio director, Foote, Cone & Belding, San Francisco, rejoins Chambers & Wiswell, Boston.

Joseph H. McConnell, who at 47 quit the presidency of NBC in Feb. 1953 to become pres. of Colgate-Palmolive Co. under 5-year contract, has resigned in an apparent policy disagreement with chairman E. H. Little. An attorney, he rose from RCA Victor legal staff to become RCA finance v.p., then NBC exec. v.p., then pres. of network. It's expected he may enter practice of law after a vacation.

Paul D. Miles, engineering asst. to FCC Comr. Rosel H. Hyde, becomes exec. secy. of Interdepartment Radio Advisory Committee (IRAC), replacing Carl W. Loeber, who in turn replaces Christian E. Rogers Jr. as special asst. to Harold M. Botkin, ODM asst. director for telecommunications; last week, Rogers was named engineering asst. to FCC Chairman McConaughy.

New officers of Assn. of Federal Communications Consulting Engineers, elected at annual meeting in Atlantic City April 29: T. A. M. Craven, pres.; Everett L. Dillard, v.p.; Robert L. Kennedy, secy.; John Creutz, treas.; Robert M. Silliman, Russell P. May & George P. Adair, exec. committee.

CBS-TV affiliates hold their general conference May 19-20 in Waldorf-Astoria, N. Y.

John Trevor Adams Jr., 37, sales mgr. of WABC-TV, N. Y. and its former gen. mgr., died May 1 of a heart attack at his home in Larchmont, N. Y. He was once TV-radio director of N. Y. Yankees, and for a while with DuMont Network as asst. sales chief. He also was one of principals in application for Ch. 8 in St. Petersburg, Fla., which went to *Tampa Tribune*. Survivors include his widow and a son.

PPROMPT GRANTS of unopposed applications are order of the day at FCC which issued 3 CPs this week: Hattiesburg, Miss., Ch. 9, Lion TV Co.; Ephrata, Wash., Ch. 43, Basin TV Co.; Milwaukee, Wis., Ch. 31, WFOX. All were filed within last 2 months, the one in Ephrata less than month ago.

Hattiesburg grant followed dropout of WFOR, went to Dave A. & Harold M. Matison and Milton J. Fine, each owning one-third; they own Fine Bros.-Matison Co. clothing store.

Principals of KIMA-TV, Yakima (Ch. 29), headed by Thomas C. Bostic, are owners of Ephrata grant, will make station a satellite of Yakima, as they did now-operating KEPR-TV, Pasco (Ch. 19); they also hold CP for KLEW-TV, Lewiston, Ida. (Ch. 3), and are applicants for Ch. 8, Walla Walla.

Grantee WFOX, Milwaukee (dairyman Joseph A. Clark, 100% owner) felt that with high uhf conversions and with CBS owning uhf in Milwaukee, another uhf station would have fighting chance, hence quest for Ch. 31.

Two-way competition for Ch. 4, Roseburg, Ore., vanished this week when merger was agreed upon by owners of KVAL-TV, Eugene (Ch. 13), who will own 50%, and principals of KIEM-TV, Eureka (Ch. 3) & KBES-TV, Medford, also 50%.

Efforts of WBUF-TV, Buffalo (Ch. 17) to get Ch. 8 assigned there were turned down by Commission which said it was unable to get Canada to agree to the necessary channel shifts. In passing, FCC said that if it had placed the channel in Buffalo, it wouldn't simply turn it over to WBUF-TV, as requested by station, but would have given all applicants a crack at it. Sale of WBUF-TV to NBC for \$312,000 awaits FCC approval (Vol. 11:11).

Favorable action on a vhf "drop in," first in month, was issuance of proposed rule-making to place Ch. 6 in Nashaquitsa, Mass., on Martha's Vineyard. Petition had been filed by WNBH, New Bedford, which once held CPs for WBOS-TV, Boston (Ch. 50) and WTEV-TV, New Bedford (Ch. 28).

NBC's proposal to buy WKNB-TV, New Britain, Conn. (Ch. 30), and move it to Mt. Higby (Vol. 11:2) was held up by FCC which sent "McFarland Letter" indicating a hearing is necessary. Action parallels that in case of WSTV-TV, Steubenville, O. (Ch. 9), which CBS proposed to buy and move to Pittsburgh (Vol. 10:47).

Commission decided to look further into another sale—transfer of CP for KNAC-TV, Ft. Smith, Ark. (Ch. 5), to broadcaster-publisher Donald W. Reynolds (Vol. 11:8)—ordering a hearing to determine whether there has been "trafficking" in a CP.

Storer's petition to deintermix Miami by deleting Ch. 7 & 10 and moving WTVJ to uhf was amended this week to leave WTVJ on Ch. 4—amendment stating that uhf station can survive in city with only one vhf competitor. At same time, it filed for Ch. 10, saying it would withdraw application if FCC deintermixes area. Storer operates Miami's WGBS-TV (Ch. 23).

Lamb hearing was postponed this week until May 9, with further postponement until May 16 probable, as FCC personnel connected with case trooped to Washington district court where turnabout witness Mrs. Marie Natvig is being tried on 6 counts of perjury. During week's trial proceedings, 2 FBI agents and FCC investigator Robert Leahy testified Mrs. Natvig told them she had been a Communist and presumed Lamb to be one. Govt. charges Mrs. Natvig lied in Feb. when she recanted certain testimony she had given earlier. Govt. abandoned one of its perjury charges this week—the one that Mrs. Natvig lied in February when she said she told FBI investigators she did not want to testify at Lamb hearing.

Telecasting Notes: "A good story's worth repeating because there are so few of them," stated noted producer Leland Hayward in *Variety* interview this week—adding another voice to those deploring the economic and artistic waste in TV's failure to re-run most of its hit programs (Vol. 11:17-18). He went on to note that a major success retains or even enhances its pulling power as it's transferred from one medium to another, citing as example movie version of TV's original *Marty*, which is clearly headed for top international awards, according to this week's reports from film festival in Cannes, France. Though working currently only on movies and theatre, Hayward considers TV "the medium that has the greatest excitement, [but] it must be live TV, of course" . . . Similar comment on repeats was made by *New York Times* TV-radio critic Jack Gould this week; praising CBS-TV's May 1 repeat of Reginald Rose play *Almanac of Liberty* under sponsorship of B'nai B'rith Anti-Defamation League, he noted: "*Studio One* has other treasures in its vaults. Why not bring them out?" . . . Columbia Pictures' Screen Gems was among first to show value of film repeats, and this season is no exception. All 39 programs of 1954-55 *Ford Theatre* series have been sold—13 of them currently being shown on NBC-TV as *Kodak Request Performance*, Wed. 8 p.m., 13 to be run as *Ford Summer Theatre* starting on NBC-TV July 7, Thu. 9:30 p.m., 13 bought by Bulova for spot placement this fall . . . Two points on film and film re-runs were made last week by Nielsen v.p. George Blechta, who told N. Y. TV Film Council that research discloses no difference between film and live TV in audience pulling power and that summer re-runs of network film shows garner audiences just as large as those reached by new summer replacements . . . Emulating *Peter Pan* pat-

tern, DuMont's WABD will present stage production *Shoe-string Revue* May 12, 7:30-8:30 p.m., 2 days before its scheduled closing at President Theatre; revue had opened Feb. 28, is believed to be first stage production to appear on TV before closing in theatre . . . Republic Pictures-Consolidated Film Laboratories has acquired N. Y. site on W. 47th St. between 10th & 11th Avenues, for modern film processing labs needed because of increasing demands of TV, expected to be ready by Sept.; plant on W. 57th St. will be absorbed, with theatrical printing continuing at Ft. Lee plant . . . "Britain Falls for the Huckster" titles excellent appraisal of commercial TV prospects there by Robert Lewis Shayon in May 7 *Saturday Review*; having done some first-hand reporting on the subject ourselves (Vol. 10:45), we recommend this article for factual accuracy, despite its somewhat cynical approach . . . Delays in A-bomb blast, first scheduled April 26 and finally set off May 5, cost networks estimated \$5000 daily . . . Another TV play to movies: F. W. Durkee's *Watch Me Die*, presented recently on NBC-TV's *Phileo-Goodyear Playhouse*, has been bought by Lou Walters . . . ABC-Paramount, still casting about for acquisition of a record company, reported looking over Cadence Records (Sam Clark) which brought out best-selling *Ballad of Davy Crockett*; it's said General Teleradio (MBS) also wants in on recording business.

Permanent injunction against TV satire on a movie property was granted May 6 by Los Angeles district court. Jack Benny and CBS were permanently barred from burlesquing on TV the 1944 MGM murder drama *Gaslight*. MGM first obtained temporary injunction when Benny proposed building TV show around the film in 1953.

BATTLE OF TOLL TV before FCC won't deal in generalities, if questions raised by opposition are indicative. In last few weeks, firm of Cohn & Marks, counsel for Joint Committee on Toll TV, has filed with Commission mass of economic and technical questions which it says must be answered so that FCC can "determine where the public interest lies in this matter." Prepared by consultants Dallas Smythe and John V. L. Hogan, questions include:

Will receiver decoders be sold, leased or loaned to public—at what price?

Will commercials be carried? If so, what income is expected from what rates?

How fast would sets be equipped with decoders, broken down according to vhf-uhf composition of each market?

What revenues are expected from subscription TV?

How many hours will be devoted to it?

Will there be different prices for programs—if so, how will they be fixed?

What are the estimated revenues, expenses and profits for next 5 years — for stations, equipment makers and program suppliers?

What is circuitry involved for monochrome and color transmitters and receivers to be converted to scrambled basis?

What have been results of technical field tests of equipment?

Is there a "universal" unscrambler for sets, or will several types be needed, and what are their precise specifications?

Who owns patents?

Are the several systems compatible?

These are mere sample of the scores of questions. It's assumed that pay-TV proponents were prepared to answer some of them anyway, but significance of the list is that it emphasizes that major rule-making proceedings of the FCC are never casual or quickie affairs—and that time involved can usually be measured in years, as was case in color and end-of-freeze hearings.

* * * *

Paramount's International Telemeter Corp. seems to be well aware of delays involved, for this week v.p. Paul MacNamara disclosed that thought is being given to inauguration of pay system on closed-circuit basis—confined to cables and requiring no FCC approval—in 2 undisclosed cities, one with 100,000 population, other with 50,000. They'd be financed by local exhibitors, he said.

Telemeter did attempt such an operation in Palm Springs, Cal. with a few hundred subscribers but dropped it because movies wouldn't make enough features available. However, MacNamara says that Telemeter could have gone to court and obtained the film, that producers can't refuse to sell for fair price—but that Palm Springs operation wasn't worth it.

Telemeter has own subsidiary, "Ampli-Vision," manufacturing community antenna equipment of type needed for closed-circuit work—but has been trying to sell the subsidiary recently.

MacNamara says system could start with 5000 subscribers. Several community systems already have that many customers, may be willing to consider pay-as-you-look operations—though some are leary of offending TV stations whose signals they now feed to customers. Largest community system, serving more than 6000 homes, is in Williamsport, Pa., was recently sold for reported \$1,200,000 to Texas group (Vol. 11:12).

* * * *

Organizations continue to take sides, meanwhile. For example, Brooklyn Dodgers pres. Walter O'Malley said he was in favor of pay system, would like to charge 50¢ per set per game. This brought protest from the Father Duffy Post, Catholic War Veterans. Organizations for Free-TV, through co-chairmen Alfred Starr and Truman Rembusch, promptly cited O'Malley's statement as evidence that toll TV would convert free programs to fee, since Dodgers' games are now on TV. Miami-Dade County Chamber of Commerce voiced opposition to subscription TV in resolution, forwarded to FCC, asking preservation of "the public's freedom to look and freedom to listen without paying any fee." George Trautman, pres. of minor baseball leagues, wrote FCC that he thinks subscription TV is "one ray of hope" for dwindling gate receipts—which he blamed largely on major league telecasts. N. Y. State American Legion said it would ask national organization

to take stand against toll TV, Adjutant Maurice Stember declaring that thousands of sets were donated to veterans in hospitals and "we see no reason why all these donated sets should be converted to 'bedside slot-machines' requiring wounded, sick and disabled heroes to pay for programs they now enjoy without charge."

Debate on CBS-TV May 1, though complicated by so many participants, revolved around same arguments as in past. Zenith counsel W. Theodore Pierson argued that pay system would be supplementary; that present free programs wouldn't be converted to subscription basis because "we have no means of getting the people to pay for them if they can get them without paying." Victor Sholis, v.p. of WHAS-TV, Louisville, insisted that pay-as-you-see operators would outbid free system for present top-rated programs, taking them off present system. Sholis added another factor:

"These proponents are now asking the Govt. to give them a slice of this scarce public resource and they want to use it free of any responsibility or obligation or burden of serving the broad public interest . . . The wonderful glories Mr. Pierson talked about—educational programs, all the cultural things—are not going to be presented because they are not good box office . . . I am very much concerned over what happens to the well-rounded TV programming service which is now our obligation. Who goes to Yucca Flats to present the bomb? Who goes to Ann Arbor to present a roundup on the Salk vaccine? They are not box office."

Next televised debate was scheduled for May 8 on NBC-TV, Zenith sales v.p. H. C. Bonfig taking 15 min., opponents' Alfred Starr taking 15 min.—latter adding "box office" in form of Faye Emerson, who will interview Starr.

Zenith will take advantage of NARTB convention in Washington week of May 22 to conduct Phonevision demonstrations, closed-circuit and off-air, latter using facilities of WMAL-TV. Equipment will be kept in Washington for demonstrations after convention.

Network Accounts: Encouraged by record surge of new business and renewals, ABC-TV plans to start daytime programming next fall, along with a couple of heavy-duty week-end evening shows. According to current plans, weekday programming will move up from present 7 p.m. starting time to 3 p.m., with 2 one-hour shows preceding the sold-out *Mickey Mouse Club* 5-6 p.m. Also in works is Sun. 7:30-9 p.m. show produced by an unidentified major Hollywood studio, and Sat. 8-9 p.m. drama series by Alex Segal & Herb Brodtkin, producers of current *U. S. Steel Hour* & *Elgin Hour*. Network has written total of \$34,600,000 in orders during last 12 weeks, or more than its total billings for 1954 . . . Johnson & Johnson plans \$250,000 saturation campaign for new Baby Shampoo, buying 15 min. every Wed., May 4 thru June 22, on each of 3 NBC-TV shows: *Ding Dong School*, *Tennessee Ernie Show* & *Pinky Lee Show*; agency is Young & Rubicam . . . Dodge to sponsor live coverage of final round of 55th National Open golf tournament from San Francisco on NBC-TV, June 18, Sat., 8-9 p.m., thru Grant Adv. . . Miles Laboratories buys John Daly newscasts on ABC-TV beginning July 4, Mon.-Wed.-Fri. 7:15-7:30 p.m., thru Wade Adv., Chicago . . . Quaker Oats to sponsor *Sgt. Preston of the Yukon* on CBS-TV next fall, Thu. 7:30-8 p.m. thru Wherry, Baker & Tilden . . . Reynolds Aluminum replaces *Mr. Peepers* with as-yet-untitled summer do-it-yourself show featuring actor-comedian Dave Willock on NBC-TV beginning June 26, Sun. 7:30-8 p.m., thru Clinton E. Frank Inc., Chicago . . . General Dynamics Corp., which is merging with Stromberg-Carlson (Vol. 11:18), begins sponsorship with institutional commercials of *Youth Wants to Know* on NBC-TV May 15, Sun. 2:30-3 p.m., thru Morey, Humm & Johnstone.

Station Accounts: Houston Oldsmobile dealer Harlan Lane has bought all-night telethon on KGUL-TV May 6, running 10:30 p.m. to 7 a.m., with 2 hours of simulcasting on radio KNUZ and costing reported \$6000, besides fee for comic Jerry Colonna, m.c. Report isn't in yet whether he sold all 100 new & used cars on floor—but gimmick of having salesroom as "studio," letting customers be televised signing up, serving doughnuts & coffee, all heralded in full-page ads in city's newspapers, is unique in TV's commercial annals. Dynamic 28-year-old dealer, one of Olds' tops, has avowed sales goal of 500 new & 500 used cars monthly . . . Colgate-Palmolive, for its after-shave lotion, and American Greeting Card Co. tie up for joint Father's Day (June 19) campaign using TV-radio to back up drugstore, co-op & magazine promotion . . . Pepsodent introducing Dove, new toilet soap, in test markets, thru Ogilvy, Benson & Mather, N. Y. . . J. & J. Slater and Hanan & Son, big shoe retailers, sign 40-week contract with WRCA-TV & WRCA, N. Y. for news and weather cut-ins on *Today* and for partic. in various other shows, thru Wendell P. Colton Co., N. Y. . . Burnham & Morrill (B&M Oven-baked Beans), using TV only, no other media, in isolated 6-mo. test on WBAY-TV, Green Bay, Wis., budgeted at \$12,500, upped sales 75% in first 11 weeks, 370% in first half of April, according to preliminary report in May 2 *Sponsor Magazine* . . . Bristol-Myers (Ipana), thru Doherty, Clifford, Steers & Shenfield, and Xlnt Spanish Foods Inc., thru Hixson & Jorgensen, buy alt. sponsorships of second half of *Western Varieties* on KTLA, Los Angeles, Fri. 9:30-10 p.m., Cliquot Club sponsoring first half weekly . . . Among other advertisers currently reported using or preparing to use TV: Resolute Paper Products Corp., N. Y. (wax paper), thru Ettinger Adv. Agency, N. Y.; Lady Esther, Div., Zonite Products Corp., New Brunswick, N. J. (whirled-in-lanolin face powder), thru Biow-Biern-Toigo, N. Y.; American Home Products Corp., N. Y. (Aero shave), thru Geyer Adv., N. Y.; Kretschmer Corp., Carrollton, Mich. (wheat germ), thru Gleason Adv., Detroit; Union Oil Co. of California, Los Angeles (Purple Royal Triton motor oil), thru Young & Rubicam, Hollywood; Purex Corp., South Gate, Cal. (Trend liquid detergent), thru Foote, Cone & Belding, Los Angeles; Parfums Charbert, N. Y. (Breathless Mist cologne), thru Sterling Adv. Agency, N. Y.

Rate increases: CBS raises rates of 3 o-&o outlets—WCBS-TV, New York, adds new Class AA hour (7:30-11 p.m. Mon.-Sat. & 6-11 p.m. Sun.) at \$6500, min. at \$1700, Class A hour going from \$6000 to \$6250; WBBM-TV, Chicago raises base hour from \$3000 to \$3300 and adds new Class AA min. only rate (6:59-10 p.m. daily) at \$650; KNXT, Los Angeles, raises base hour from \$2700 to \$3200, adds new Class AA min. only rate (7:59-10 p.m. daily) at \$600. WOOD-TV, Grand Rapids adds new Class AA hour (8-10:30 p.m. daily) at \$950, min. at \$180, Class A hour going from \$800 to \$875; WHO-TV, Des Moines, raises base hour from \$550 to \$650, min. \$110 to \$130; KCMC-TV, Texarkana, Tex., from \$200 to \$260 & \$40 to \$52; WDXI-TV, Jackson, Tenn., \$150 to \$200 & \$20 to \$40. Rate adjusted: WOAY-TV, Oak Hill, W. Va. now has \$200 base hour & \$40 min. rates, changed from \$350 base in effect when sold only in combination with now defunct WKNA-TV, Charleston, W. Va.

"Strangers Into Customers" titles film depicting power of TV as an ad medium, based on study for NBC by W. R. Simmons & Assoc., to be shown at NARTB convention May 26 after TV Bureau of Advertising presentation.

Gotham Adv. consolidates with Irwin Vladimir & Co. July 1 to form Gotham-Vladimir Adv., with Gotham's Duncan Sutphen Jr. as chairman, Irwin Vladimir as pres.

New reps: KCOP, Los Angeles, to Weed (from Katz); WOAY-TV, Oak Hill, W. Va. to Pearson (from Weed).

EXPANDING in both uhf & vhf fields, Supreme Broadcasting Co. Inc. (Chester F. Owens, pres. & George A. Mayoral, exec. v.p.) has plans (1) to install GE 1-mega-watt plant for its Ch. 20 WJMR-TV, New Orleans, soon to shift from Ch. 61; (2) to revive WKAB-TV, Mobile (Ch. 48) which has been acquired from Mrs. Louise Pursley for \$200,000 debts, owed mainly to GE, and operate it as a satellite of WJMR-TV; (3) to revive, with KNUZ mgr. David Morris, KNUZ-TV, Houston (Ch. 39), off air nearly year; (4) to acquire 30% of upcoming WORA-TV, Mayaguez, Puerto Rico (Ch. 5), remaining 70% to continue in hands of CP holder Radio Americas Corp., headed by Alfredo Ramirez de Arellano Jr., chemical engineer & sugar cane grower; (5) to apply for Ch. 11 in Caguas, suburb of San Juan, P.R. and Ch. 7 in Ponce. However, Caguas project will be dropped if current negotiations are completed for purchase of 60% of Jose Ramon Quinones' WAPA-TV, San Juan (Ch. 4), in which Cuban telecasters Goar & Abel Mestre hold 14% ownership. Mayoral is an ex-GE engineer, who also does consulting work on Central American TV projects.

GE reports shipment of 20-kw transmitter to WTOCTV, Savannah (Ch. 11) and 5-bay helical antenna to WENS, Pittsburgh (Ch. 16). New GE orders: for upcoming WKRG-TV, Mobile (Ch. 5), 35-kw transmitter, 4-bay antenna, film & live studio equipment; for WSIX-TV, Nashville (Ch. 8), 12-bay antenna, July delivery.

* * * *

In our continuing survey of upcoming stations, these are latest reports received:

WAGE-TV, Marquette, Mich. (Ch. 6), has ordered 5-kw GE transmitter & 6-bay batwing antenna, plans July 5 test patterns, mid-July programming, reports 66% owner Jerome Sill, also gen. mgr. & 21% owner of radio WMIL, Milwaukee, which dropped Ch. 6 application there last week. It will use 700-ft. Kimco tower, now is working on prefabricated studio-transmitter building. Rep not chosen.

KTRE-TV, Lufkin, Tex. (Ch. 9), with 5-kw GE transmitter ordered for mid-May delivery and 6-bay antenna month later, plans July 15-Aug. 1 start, writes v.p.-gen. mgr. Richman Lewin. It will use 500-ft. Andrews tower, plans to operate as satellite of KPRC-TV, Houston. Specific targets will be set when FCC grants CP for microwave with Houston. Boyd Porter Jr. will be program director; Murphy Martin, commercial mgr. Base rate will be \$150. Rep will be Venard, Rintoul & McConnell.

WILL-TV, Champaign-Urbana, Ill. (Ch. 12, educational), which recently changed call from WTLC, expects to have 12-bay GE batwing antenna installed by June 20 on Memorial Stadium's northwest tower, reports director Frank E. Schooley for grantee U of Illinois. Later, antenna may be moved to school's Blaw-Knox FM tower in nearby Monticello, Ill. Although 5-kw transmitter donated by GE is "practically ready," targets haven't been set for test patterns or programming.

■

CKVR-TV, Barrie, Ont. (Ch. 3), has ordered 5-kw transmitter & antenna from Canadian GE for mid-summer installation, plans Sept. 1 test patterns. Microwave link to Toronto 55 mi. to south is already under construction and interconnected programming is scheduled to begin Sept. 15, reports Ralph Snelgrove, gen. mgr. and pres. of newly-formed Ralph Snelgrove Television Ltd. Among board members are former Barrie mayor Peter A. Sinclair; Canadian sales rep Paul Mulvihill; R. Stanley Dilworth, pres. of Dilworth Equipment Co., Toronto. It will use Stainless tower at site 2 mi. south of Barrie, where new building will house TV studios & transmitter as well as radio CKBB studios. Base rate will be \$240. Reps will be Adam Young & Paul Mulvihill.

Box Office Television Inc., closed-circuit TV producer headed by Wm. P. Rosensohn, announced this week it will soon "open an experimental TV studio laboratory to facilitate agency-client coordination of TV commercial production." According to trade reports, BOTV is cutting its staff and will subordinate closed-circuit activities to new laboratory project, probably even changing corporate name. Other closed-circuit TV news this week: (1) Theatre Network TV Inc. (Nathan L. Halpern) has signed 81 theatres to carry May 16 Marciano-Cockell heavyweight title bout. (2) TNT announced nationwide labor agreement with IATSE-AFL covering technical employees operating closed-circuit equipment. (3) Second nationwide closed-circuit AMA "Videclinic" will be presented before audience of 25,000 physicians in 34 cities under sponsorship of Smith, Kline & French Labs. Topic will be mental disease.

Telerad Inc., 2226 Television Lane, Pueblo, Colo., has taken over management of KCSJ-TV, Pueblo (Ch. 5) and radio KGA, Spokane (1510 kc, 50-kw, ABC) for owners Bankers Life & Casualty Co. in arrangement which its pres. Ray J. Williams states provides "same thing for the broadcasting business that Conrad Hilton does for hotels." He and v.p. Dave Baylor, with Chicago attorney N. M. Michaels and Bankers Life investments v.p. C. L. Little, constitute planning committee for Telerad Inc., which states it's backed by 3 investment firms "in addition to Texas oil interests" and plans to finance, plan, build and provide personnel "for all classes of stations, new, distressed or stations dissatisfied with present profits." It claims proposals are under discussion with 3 stations, and plans to handle up to 10.

Sarkes Tarzian Inc., which built equipment for its own pre-freeze WTTV, Bloomington, Ind. (Ch. 4), has appointed F. Dan Meadows, ex-gen. sales mgr. of Dage TV div. of Thompson Products Inc. and onetime RCA district sales mgr., as commercial mgr. of its broadcast equipment dept. He will merchandise complete line of TV studio equipment, including vhf & uhf transmitting equipment, vidicon film & studio cameras, relay switching, audio control, 16mm film and automatic slide projectors, microwave equipment.

Senate communications subcommittee under Sen. Pastore (D-R. I.) holds first public hearings May 19 on 2 bills requested by FCC: S-1549, to give Commission authority to levy small fines on non-broadcast licensees; S-1456, to amend common carrier section of Communications Act. FCC will be first to testify. Also due for early hearing by subcommittee is Commission's request for modification of "protest" procedure.

Latest private microwave is 2-hop link granted by FCC this week to KVEC-TV, San Luis Obispo, Cal. (Ch. 6)—an off-air pickup to get programs of KABC-TV & KNXT, Los Angeles. Cost of Raytheon equipment is \$19,942, and transmitters are to be located at McKittrick Summit and Black Mt. Station reported it had sought estimates for microwave service from phone company, received indefinite answers.

DuPont "Kinetic" Chemicals Div., Wilmington, Dela. (attention F. R. Zumbro) is making available on request copies of its 1954 architectural file folder setting forth consulting engineers' views on air conditioning of TV studios, among other structures; one of authorities cited is C. A. Rackey, NBC mgr. of audio-video engineering.

Ban on TV, radio and photos in Manhattan & Bronx courts was upheld this week by appellate div. of N. Y. Supreme Court, which ruled that Justice Diserio of Bronx Children's Court violated rule when he permitted TV and news photographers to operate last March at arraignment of 9 boys on delinquency charges.

Color Trends & Briefs: GE's continuous-motion color & monochrome film scanner, after long development period, is now in production and will be installed in stations beginning in about 45 days. GE officials are enthusiastic about performance, admitting that early models had troubles which they say are now completely eliminated. They will make scanner major feature at their NARTB convention exhibit.

The unit's optical system, developed with Eastman Kodak, employs rotating mirror principle which, GE claims, "affords many times more light than any other flying spot scanner system, and gives a crisper, brighter, cleaner picture with a minimum amount of noise."

System is designed so that station may start with monochrome-only, if it chooses. Prices of components: color scanner channel, \$25,500; monochrome scanner channel, \$13,000; dual 2x2 slide scanner, \$7000; film scanner, including continuous motion projector, \$18,000. Thus, station can start with equipment to handle black-&-white film & slides for \$38,000, then add color at any time for \$12,500 more.

GE shipped first such scanner to KING-TV, Seattle, year ago (Vol. 10:25), has been field-testing it since. DuMont and RCA, meanwhile, had substantial jump on GE, selling scores of film chains in interim. GE now aims to make up for lost time.

* * * *

RCA's 2 new 21-in. color sets (see p. 10) are \$795 "Seville" lowboy console and \$895 "Director" open-face console, both with 26 tubes including kinescope, both available in mahogany and light woods. Announcing new sets, consumer products exec. v.p. Robert A. Seidel said that dealers would be offering limited numbers in early June and that production would mount each month thereafter. Sets have same circuits, except that "Director" has two 8-in. speakers, "Seville" one—and latter has detachable legs. Seidel attributed reduction in number of tubes to: (1) New circuits. (2) New production techniques, such as use of printed circuits. (3) New dual-purpose rectifier and triode-pentode tubes.

Winners of 1954 McCall's Awards to women in TV-radio, as announced at this week's convention of American Women in Radio & Television in Chicago: top award, Angela McDermott, for *TV Schooltime* on WRGB, Schenectady; executive, service to community, Dorothy Daniel, WQED, Pittsburgh, for work in launching unique citizen-supported educational TV station; executive, service to women, Bee Baxter, KSTP-TV, St. Paul, for nurse recruitment program *Operation Tender Loving Care*; executive, service to youth, Josephine Wetzler, WLS, Chicago, for slogan contest on her *School Time*; broadcaster, service to community, Marian Young Taylor (Martha Deane) for series on juvenile delinquency on WOR, N. Y.; broadcaster, service to women, Mary Jones, WFIL, Philadelphia, for making possible "Mary Jones Hearth" shelter for homeless young women; broadcaster, service to youth, Mary Koehler Rowe, KPIX, San Francisco, for *Adventure School*.

Nationwide search for comedy writing talent was announced this week as "Phase 1 of NBC's multi-million dollar talent and show development program" (Vol. 11:18). Under supervision of program development director Leonard Hole, NBC will solicit aid of colleges, little theatres and affiliates to find promising writers, best to be brought to New York and Hollywood, attached to NBC staff on salary for training and apprenticeship. Calling comedy writing search the "most critical" phase of talent project, Hole said: "It stems from the fact that TV burns out comedy material so enormously fast and the fact that it's so hard to find and develop new comedy writers."

Color TV tape, now undergoing field testing by NBC-TV, is considerably improved over first public showings at RCA Princeton Labs (Vol. 9:49) but "not quite ready for commercial use," according to RCA-NBC experts. Asked whether tape equipment would be commercially available within a year, one stated, "It's too close to be able to pinpoint it. In some ways it's superior to kines now, other ways it's still not as good," he said, "but I'm very optimistic about it." Asked whether tape equipment might not be too expensive, except for network use, he stated: "I'm not at all worried about the price. I believe it will compare favorably with film equipment, coming within price range of individual stations." On May 12-13, Minnesota Mining & Mfg. Co., which supplies TV tape stock, will feature demonstration of color tape at dedication of research center in St. Paul, Minn., with closed-circuit program microwaved from NBC-TV, N. Y.

Upcoming network color schedules: NBC-TV—May 11, *Kraft Theatre*, "Judge Contain's Hotel," 9-10 p.m.; May 19, *Home segments*, 11:04-11:12 & 11:50-11:57; May 20, *Coke Time*, color commercials only, 7:30-7:45 p.m.; May 22, *Max Liebman Presents*, "Promenade," with Judy Holiday, Herb Shriner, Janet Blair & Kay Starr, 7:30-9 p.m. CBS-TV—May 12, *Shower of Stars*, "High Pitch," with Marguerite Piazza, Tony Martin, Vivian Vance, Wm. Frawley & Mel Allen, 8:30-9:30 p.m. NBC-TV reports tentative plans to offer daily 5-6 color show this fall comprising combination of *Pinky Lee* and *Howdy Doody* shows.

Raytheon is doubling color servicing course in Chicago, having trained 200 since start of school in Sept. According to v.p.-mgr. Henry F. Argento, standards are kept so high that only 70% get diplomas. School is conducted by Ken Kleidon under supervision of Frank Loasby, director of TV-radio sales engineering. Servicemen are picked from dealers' crews by Raytheon distributors.

Among first uhf stations to order color film chain is McClatchy's KMJ-TV, Fresno (Ch. 24), buying 3-V unit from RCA. Uhf WBRE-TV, Wilkes-Barre (Ch. 28) is planning to start out with live camera chain.

There-ought-to-be-a-law dept.: Political telecast of the future, if Sen. Neuberger (D-Ore.) has his way, might be preceded or followed by an announcement that "the speaker on this program uses pancake makeup and a Teleprompter." He has introduced bill (S-1909) providing that all political telecasts shall include announcement of whether speaker is using cueing aids and what facial makeup, if any, he is wearing. He told Senate he's concerned over "tendency to substitute play-acting for reality [in political campaigns], to try to make men seem to be something which they are not." Sen. Goldwater (R-Ariz.) arose to ask Neuberger if he would also include toupees in the bill. Neuberger then invited Goldwater to sponsor such an amendment. Goldwater concluded humorous exchange with: "I suggest that we are splitting hairs."

Sponsor Magazine to stage another dinner for the 108 pre-freeze stations on eve of Washington NARTB convention; at party Sun. night, May 22, George Abrams, adv. mgr. of Block Drug Co., will be speaker. Note: Same evening rival *Broadcasting-Telecasting* is holding reception honoring FCC members in National Press Club, and next morning *Billboard* will host breakfast featuring panel discussion on films in TV.

RCA Chairman David Sarnoff disclosed at this week's stockholders meeting that his long visit with Gen. Eisenhower March 15 (Vol. 11:12) had to do with a memo he submitted, dated April 5, titled "Program for Political Offensive Against World Communism," which will be released shortly.

RCA SEES COLOR MAJOR FACTOR IN 1956: Startling prediction on color receiver sales, given by RCA chairman David Sarnoff at May 3 stockholders meeting in N.Y.: "I expect that in 1956 and the years ahead, RCA earnings from sales of color TV sets will substantially exceed its earnings from sales of black-&-white sets during those years."

Announcement of prices on new line of color sets accompanied Gen. Sarnoff's prediction -- and he stated that consolette would be \$795, console \$895. New line, coming off Bloomington, Ind. production lines this week, has 26 tubes, including picture tube, and the \$795 consolette is \$100 less than price of now-discontinued 38-tube line. [For details of sets, see p. 9.]

There had been speculation that the price drop would be greater (Vol.11:16). Hallicrafters' \$695 price, announced late last week (Vol.11:18), thus stands as the lowest to date. Other sets makers who have had modest color production going to meet any growth in demand -- such as Admiral & Hoffman -- haven't indicated whether they'll also offer a set at \$795 or less.

In response to question at meeting, in which a stockholder asked why RCA had set a "high price" on color sets while other manufacturers were said to be offering \$500 sets, Gen. Sarnoff stated: "A man with \$795 will be able to buy an RCA color set. Come and tell me when you can walk into a store and actually buy a set for \$500." He said it would be a year to two, "depending on volume," before good color sets could be purchased at \$500.

No manufacturer has yet offered a \$500 set, though Chromatic TV Labs has said it would demonstrate, late this month, a receiver which it believes could be manufactured for "substantially" less than \$500 (Vol.11:15). Chromatic doesn't plan to produce sets or tubes itself, but hopes to license others to do so.

Though many industry leaders see color eventually supplanting black-&-white as their major product, none has gone as far as Gen. Sarnoff in predicting that this will start next year. Most have said it would take 3-5 years -- or more.

Reinforcing his statement on color, Gen. Sarnoff told stockholders: "Color TV, I firmly believe, will 'break through' and be well under way before Christmas of the present year. A reasonable number of color programs will be broadcast with regularity and this number will increase rapidly as more color sets are installed in homes. We are confident that we can sell all the color sets and tubes we will produce between now and the end of this year."

* * * *

TV production sagged to year's low for week ending April 29 -- only 131,627 units. It was year's 17th week, which means one-third of 1955 has been counted, and it means that approximately 2,770,000 TVs have been made thus far this year compared with about 1,904,000 in same 1954 period. (For unrevised RETMA weekly figures for each of first 16 weeks, see p. 12, Vol. 11:18.)

RETMA revises its weekly figures when it makes monthly recapitulations, and this week its monthly recap for first quarter came out: 654,582 in Jan., 702,514 in Feb., 831,156 in March -- total 2,188,252 for quarter. That's about 40% ahead of same 1954 quarter's 1,447,110.

Radio output continues to hold steady -- 278,054 (142,108 auto) for week ending April 29, bringing 17-week total to approximately 4,745,000 vs. 3,326,800 for same 1954 period. Radio figure, revised only through first quarter, shows 1,086,146 in Jan. (280,121 home sets, 47,303 portables, 573,837 auto, 166,885 clock); 1,089,724 in Feb. (232,831 home, 109,120 portable, 597,742 auto, 150,031 clock); 1,482,274 in March (300,840 home, 233,465 portable, 774,025 auto, 173,944 clock).

First quarter's radio output, totaling 3,640,144 breaks down as: 813,792 home sets, 389,888 portables, 1,945,604 auto, 490,860 clock.

Topics & Trends of TV Trade: From 1946 through 1954, distributor shipments of TV sets to dealers throughout the U. S. and its territories totaled 35,677,818, according to a recapitulation released this week by RETMA. The aggregate shipment figure compares with production total over same 9-year period of 37,668,819, to which can be added some 2,770,000 sets known to have been produced thus far this year. Latest NBC estimate of sets-in-use, dated March 1, places that figure at 35,028,000 (Vol. 11:16). The new RETMA recapitulation of shipments for 1946-1954:

State	Total	State	Total
Alabama	361,689	New Hampshire	120,842
Arizona	123,925	New Jersey	1,664,853
Arkansas	179,862	New Mexico	66,768
California	3,129,919	New York	4,754,300
Colorado	231,379	North Carolina	555,087
Connecticut	635,586	North Dakota	56,736
Delaware	108,845	Ohio	2,592,978
District of Columbia	351,174	Oklahoma	412,549
Florida	554,183	Oregon	218,476
Georgia	559,164	Pennsylvania	3,112,857
Idaho	70,295	Rhode Island	229,881
Illinois	2,487,747	South Carolina	225,468
Indiana	1,029,462	South Dakota	49,153
Iowa	565,117	Tennessee	461,774
Kansas	310,223	Texas	1,366,244
Kentucky	427,405	Utah	156,224
Louisiana	391,164	Vermont	52,622
Maine	176,297	Virginia	556,496
Maryland	631,803	Washington	492,729
Massachusetts	1,448,063	West Virginia	297,733
Michigan	1,682,313	Wisconsin	724,469
Minnesota	573,162	Wyoming	15,211
Mississippi	146,951	U. S. Total	35,616,771
Missouri	918,661	Alaska	5,496
Montana	39,396	Hawaii	55,551
Nebraska	278,876	Grand Total	35,677,818
Nevada	20,660		

TV set sales by Canadian factories for first quarter of this year totaled 166,462 sets, production 215,918, reports Canadian RTMA. This compares with sales of 111,399, production of 122,625 in same 1954 period. Projected production estimate for April-June period is 145,222 more sets. March sales totaled 55,076 at average price of \$292, production 75,560. Inventory at end of March was 97,340 compared to 76,856 at start of month. Toronto led in March sales with 9422; Montreal second, 8883; British Columbia, 5364; Manitoba, 4550; other Ontario, 4286; Nova Scotia, 4137; Alberta, 3727; Ottawa & eastern Ontario, 3201; New Brunswick & Prince Edward Island, 2859; Quebec City, 2809; Hamilton-Niagara, 2367; Saskatchewan, 1665; Windsor, 1605; other Quebec provincial areas, 195; Newfoundland, 6.

Failures in retail TV-radio-appliance trade during first 1955 quarter totaled 107, involving \$3,758,000 in liabilities, reports Dun & Bradstreet. They compare with 128 involving liabilities of \$17,604,000 in same 1954 period. In all of 1954, there were 457 such failures with liabilities of \$29,920,000. Dun & Bradstreet failure record includes concerns involved in court proceedings or voluntary actions likely to end in loss to creditors, does not cover discontinuances with outside obligations paid in full. In table of retail failure rate per 10,000 operating concerns, the appliance-radio-TV category shows 105 in 1954, 80 in 1953—second highest after infants' & children's wear.

While IUE (CIO) locals were reported demanding guaranteed annual wage and 5% pay increase from RCA plants at Camden and elsewhere, involving some 14,000 workers under 2-year contract expiring in April 1956, same union's Philco locals this week ratified new one-year contract calling for 5¢-an-hour pay boost and certain fringe benefits involving some 5500 employes. New Philco minimum wage rate is \$1.53 an hour, maximum \$2.71, and covers 10 plants.

Old John Wanamaker Store at Broadway & 8th St. (1,500,000 sq. ft.) will be converted and modernized into what will be known as Merchandise Mart of New York, an international display & trading center for hard goods, under plans of new owner Astor-Broadway Holding Corp.

DISTRIBUTOR NOTES: Dick C. Klein assigned to chief of Raytheon factory-owned TV-radio branch distributorships, his former duties as director of marketing taken over by Henry F. Argento, v.p. & gen. mgr., and Cliff Knoble, director of merchandising; Raytheon has own branches in Chicago, Milwaukee, Peoria, Harrisburg . . . Philco opens Cleveland factory branch in former quarters of Strong, Carlisle & Hammond Co., which gave up franchise . . . Sylvania appoints Interstate Distributors, 808 W. 14th St., Kansas City . . . CBS-Columbia Distributors Inc., N. Y., names Howard Gross, ex-Motorola Eastern regional sales mgr., as gen. mgr., succeeding Martin L. Scher, resigned . . . Crosley-Bendix franchise for Syracuse-Rochester area acquired from O'Donnell Distributors by Artec Distributors, Middletown, which will continue to operate temporarily from O'Donnell offices in Syracuse . . . Admiral names General Merchandise Co. Inc., 207 N. Milwaukee St., Milwaukee, as additional distributor for radios only; Admiral Distributors-Milwaukee Div. remains area distributor for entire Admiral line . . . Admiral-N. Y. promotes John Klein to sales promotion mgr. for chain store accounts in metropolitan area; Bernard Kaiser succeeds him as lower Manhattan district sales rep . . . GE Supply Co. sets up new mid-Atlantic region with headquarters at 705 Edgewood St., NE, Washington, with C. T. Shropshire as v.p. & regional mgr., M. W. Ryner mgr. for consumer goods . . . Admiral Distributors-Boston Div. takes over New England territory formerly handled by Alexander Distributors Inc., Springfield, with Boston gen. mgr. Thomas J. Hodgens supervising office at 214 Birnie Ave.

Sightmaster Corp., New Rochelle, N. Y., immediately upon confirmation of Chapter XI reorganization plan for Transvision Inc., same city, whereby creditors are to receive 15%, reported it has become largest stockholder in Transvision and proposes to recapture Transvision's former \$3,500,000 business in the TV kit business. New kit has been designed and is now being marketed, said Sightmaster pres. Michael L. Kaplan, and plans call for a color kit by fall along with high fidelity equipment, test instruments, community antenna systems, amplifiers. Sightmaster has endorsed notes to creditors whereby they will be paid 3% now and 1% every 2 months until the 15% is paid. Sightmaster takes over stockholdings of Emanuel Cohen. When Transvision schedules were filed in Oct. 1953, liabilities were put at \$722,589; tax carryover loss is \$750,000, said Mr. Kaplan, which "will be very advantageous to Sightmaster."

Chapter XI petition filed this week by Fada Radio & Electric Co. (Jacob M. Marks, pres.), with factory in Belleville, N. J., estimates liabilities at \$1,604,945 and assets at \$2,451,137 and proposes to pay in full all creditors under \$250 within 90 days after confirmation and all others 5% as initial installment and 5% quarterly thereafter.

Setchell-Carlson Inc., New Brighton, Minn., reports it's producing new 17-in. 20-tube portable TV weighing under 40 lb., to retail at \$180. Cabinet is aluminum, finished in Fabrikoid. It's offered in 3 colors, and factory states it's making 100 a day.

Rokville Co., 1099 So. Logan, Denver, maker of cabinets, again reports it will manufacture color TV sets before end of year; it's RCA-licensed, and pres. is R. L. Pierzina.

Total of 119 different types of receiving tubes are used in 150 models of 1954 & 1955 TV sets surveyed by GE tube dept. The sets surveyed had total of 2950 sockets, or just a shade under 20 tubes per set.

Philco's midsummer distributor convention, where 1956 TV-radio lines will be introduced, will be held at Miami Beach's Fountainbleau Hotel, June 26-28.

Electronics Reports: "Lots of Glamor, But Little Cash" headlines article in May 5 *Journal of Commerce* detailing difficulties of smaller electronics companies in financing expansion needs. Causes of these troubles, as enumerated by writer Ben Weberman: (1) Technological advances render production models obsolete almost as fast as they are developed; therefore substantial sums are needed to keep up with progress. (2) Because Govt. is electronics industry's biggest customer, sales are subject to cancellations, stretch-outs and obsolescence—and this hazard in forecasting long-term prospects has caused wariness on part of bankers and other investors. (3) Tremendous expansion of the industry has stiffened competition and held profits to rock bottom.

"Unable to sell stock to the public without a historical record of earnings gains backed by growth of civilian business," says article, "the companies have been forced to merge with older, financially strong companies; have sought venture capital from wealthy individuals; received bank credit against firm govt. contracts, and, especially, have plowed net income back into the business." It concludes that financial problem will be eased when civilian demand for electronic products grows more important in relation to govt. orders.

* * * *

Motorola's entry into transistor manufacturing was announced this week with disclosure that ground is about to be broken for new \$1,500,000 plant in Phoenix, first section of which will be ready early in 1956. Volume use of transistors is now anticipated, pres. Paul V. Galvin stated, in portable and car radios and in communications equipment. "Transistors," he said, "will revolutionize the design of car radio, and we will announce our first transistorized car radio models in early 1956."

Newest transistor portable radio: Introduced by Emerson, shipments begin next week on tiny set containing 2 transistors, 3 tubes, 2 batteries. Weighing less than 1 lb., it's 6-in. wide, 1¼-in. high, sells for \$44. Other transistorized radios introduced to date: 4-transistor Regency pocket set at \$49.95; 8-transistor Raytheon portable at \$79.95.

"Mural TV," system whereby light amplifier is used to produce flat picture (Vol. 11:6), is a creation of RCA, said Chairman Sarnoff, responding to question at this week's stockholders meeting. However, he added, it's still in lab stage, only 30 or 40% completed.

Trade Personals: John J. Anderson named mgr. of portable appliances, Westinghouse appliance div., Mansfield, O., succeeding Robert M. Oliver, resigned . . . Douglas Wallace May 1 succeeded E. W. Cashman, retired, as Graybar v.p. & director . . . J. J. Harris, gen. mgr. of Philco Distributors Inc., N. Y., elected to board of N. Y. Better Business Bureau . . . Robert M. Fichter, ex-adv. mgr. for major appliances & electric housewares, named adv.-promotion mgr., Westinghouse TV-radio div. . . . Wm. R. Bush, ex-aide to chief of naval research, named asst. gen. sales mgr., Hoffman Labs . . . Joseph S. Wright, gen. counsel & director, onetime Federal Trade Commission attorney and onetime secy. to ex-Sen. Wheeler, named Zenith Radio v.p. . . . Charles Lloyd, ex-Nashville regional sales mgr., named Motorola's eastern regional sales mgr. succeeding Howard Gross, now gen. mgr. of CBS-Columbia Distributors Inc., N. Y. . . . Daniel Newman, ex-DuMont, named CBS-Columbia director of product service, succeeding Harold J. Schulman, now asst. to pres. Seymour Mintz . . . George Cohen, Emerson eastern regional sales mgr., promoted to director of service sales; Floyd Makstein continues as mgr. of service sales . . . Loyd Dopkins, ex-Crosley, Majestic & Zenith, named sales v.p., Granco Products Inc., Long Island

Standard Electronics div. of Hupp Corp. will be name of new division formed by Hupp's purchase of electronics business of Brown-Allen Chemicals Inc. (Vol. 11:10,16). [New division is not to be confused with Standard Electronics Corp., transmitter-making subsidiary of old Claude Neon.] Brown-Allen electronics operations were carried on its books as of Dec. 31 at \$798,000, less depreciation and amortization reserve of \$343,800. Hupp made initial payment of \$250,000 in cash, plus 125,000 shares of its common stock, with contingent additional payment during next 5 years through issuance of not over 120,000 shares of common, based on and payable from net earnings of electronics div. Principal products of electronics div. will be cadmium sulfide photocells and quartz crystals.

RCA's move into business "brain" field heralded by announcement by Chairman David Sarnoff at this week's stockholders meeting (see pp. 10 & 13) that company's new "Bizmac" data processing system is designed to handle such business tasks as invoicing, inventory control, etc. First Bizmac system is being built for delivery next fall (at \$5,000,000) to Army Ordnance Tank-Automotive Command in Detroit, where it will be used for stock control of parts, replacing 350 clerks. Gen. Sarnoff also announced RCA has received from United Air Lines its largest order for airborne radar—\$2,500,000. Radar will become standard equipment in all UAL planes.

Hycon-Eastern Inc. is new firm formed by leading MIT scientists Dr. Jerrold R. Zacharias & Dr. Jerome B. Weisner, to specialize in research and product development in fields of nuclear instrumentation, microwaves and computers. It's principally owned by Hycon Mfg. Co., Pasadena, Cal., with the 2 scientists holding substantial equity. It plans to acquire facilities near Cambridge, Mass.

Claude Neon Inc. has changed name to Dynamics Corp. of America, the better to identify it with its electronics activities which include manufacture of TV-radio transmitters (through subsidiary Standard Electronics Corp.), radar, guided missiles, quartz crystal oscillators, automation, fire control, analog computers.

Two new 10-kw vhf transmitters will be introduced at NARTB convention in Washington, May 22-26: Standard Electronics will show "economy model" priced at \$55,000, and GE will display its first unit in that power range.

Efficiency of solar battery (Vol. 10:18) has been increased from 6% to 11%, Bell Labs reports, stating that this is comparable to efficiency of best gasoline engines.

City, N. Y. . . . N. J. Litherland, ex-Servel Inc., appointed Magnavox comptroller . . . George M. Hakim has resigned as adv. director, Hoffman Electronics . . . John Belieff, ex-Fairchild Publications, named Sparton Baltimore area district merchandiser . . . Alexander E. Blazis, ex-foreman of Raytheon receiving tube plant at Quincy, named mgr. of newly opened sales office & warehouse at Franklin Park, Ill.; C. R. Hammond, asst. Raytheon v.p., is equipment sales mgr. there . . . Everett W. Olson appointed director of adv. & public relations, Webster-Chicago, succeeding S. T. Seaman, now with John W. Shaw Adv., Chicago, newly appointed to handle Webcor account . . . Richard P. Axten, ex-Alexander Smith Inc. (carpets) joins Raytheon June 1 to direct public relations for all its operating divisions . . . Lawrence W. Kanega, ex-gen. sales & merchandise mgr., elected v.p.-operations mgr., RCA Victor record div.

Harold Harris, v.p. of Channel Master Corp., is author of "Eyes & Ears of TV," 3-p. article on antennas, included in 1955 *Book of Knowledge Annual*.

R. Karl Honaman, on leave from Bell Labs, where he is publications chief, named deputy asst. secy. for public affairs, Defense Dept.

Financial & Trade Notes: RCA is by way of becoming a \$1 billion company this year, based on record first-quarter sales of \$256,305,000, up 13% from 1954 quarter's \$226,609,000, reported by chairman David Sarnoff at annual stockholders meeting May 3. Quarter's net profit was \$12,568,000 (84¢ a share), gain of 25% over 1954 quarter's \$10,066,000 (66¢). In all of 1954, RCA achieved record sales of \$940,950,000, net profit of \$40,525,000, or \$2.66 a share (Vol. 11:9).

Those figures highlighted session at which Gen. Sarnoff also disclosed that TV manufacturing, telecasting & servicing represents about 52% of RCA's business; that govt. sales & services in first quarter amounted to \$52,000,000, or about 20% of total volume; that unfilled govt. orders on March 31 amounted to \$300,000,000 and deliveries this year are expected to approach 1954 figure of \$221,000,000; that RCA has contract for guided missile launching system for which mechanical engineering phase is being handled by American Machine & Foundry Co.; that its govt. service dept.'s "global electronics field engineering program" for U.S. armed forces includes several thousand RCA-trained field engineers; that RCA International's 1955 first-quarter sales were at record level.

The headline news in Gen. Sarnoff's statement, however, was his surprise prediction that earnings from the sale of color TV sets "in 1956 and years ahead" will exceed those from black-&-white, along with announcement of new \$795 color console and \$895 color console now in production (see p. 10).

Stockholders sided with management to vote down proposals for annual instead of staggered election of all directors and for limitation of extra incentive compensation to executives to \$200,000 ceiling or 100% of base pay for any one individual. They reelected to board Edward F. McGrady, Gen. Walter Bedell Smith, Wm. E. Robinson, Dr. E. W. Engstrom, John T. Cahill — and they unanimously approved resolution urging Gen. Sarnoff to remain with RCA for at least 5 more years from next March 1 when his present employment contract terminates and when he will have completed 50 years with the company. On Feb. 27, 1956 he reaches 65, company retirement age, which can be waived by board.

* * * *

International Resistance Co. pres. Charles Weyl reported to annual stockholders meeting this week that sales for first 15 weeks of 1955 rose to \$4,112,722 and earnings to \$199,457 (15¢ a share on 1,342,598 common shares outstanding) from sales of \$3,525,802 and earnings of \$69,378 (5¢ on 1,331,163 shares) for like 1954 period. For all 1954, sales were \$13,207,649, earnings \$603,320 (45¢). IRC during first quarter acquired Hycor subsidiaries in Calif. & Puerto Rico whose sales this year are expected to exceed \$1,000,000. Mr. Weyl said company is planning another acquisition, undisclosed.

Motorola first-quarter sales, despite reduced military billings, went up to \$51,873,179 from \$48,006,800 in same 1954 quarter — and pres. Paul V. Galvin, in letter to stockholders, called it second best first quarter in firm's history and attributed improvement mainly to black-&-white TV. Earnings went up to \$2,153,038 (\$1.11 per share) from \$1,644,084 (85¢). For full year 1955, Galvin said, business should exceed previous high of \$217,000,000 of 1953. [For 1954 profit-&-loss report, see Vol. 11:12.]

Tung-Sol reports first quarter sales of \$11,892,273, net profit of \$756,714 (\$1.09 on 641,787 shares), compared to \$9,516,287 & \$450,304 (78¢ on 554,952) same period last year.

Dr. Edward H. Litchfield, dean of Cornell School of Business & Public Administration, elected Avco director.

A. P. Barton, ex-asst. gen. mgr. of Elgin National Watch Co. ordnance div., heads new electronics division that embraces recently acquired Neomatic Inc., L. A.; American Microphone Co., Pasadena; Advance Electric & Relay Co., Burbank. Gordon Odell, former Elgin mgr. of commercial development, has been named west coast plant mgr. Elgin pres. J. G. Shennan told L. A. press conference that about 10% of 1955 volume will be in electronics, or about \$5,000,000.

Collins Radio Co. last week offered 122,500 shares of 4% cumulative preferred stock, \$50 par, convertible into B common through May 1, 1965, to holders of its Class A and Class B common at rate of one share for each 12 common held. Collins stockholders previously approved reclassification as of April 25 of \$5 common, whereby each share is changed into 1½ shares—the Class A having voting rights. New stock is convertible into Class B at initial price of \$27.

Texas Instruments Inc. is issuing to holders of its common stock rights to subscribe at par to 165,945 shares of new 4.48% \$25 par cumulative convertible preferred stock at rate of one share for each 18 of common held, rights expiring May 19. New preferred is convertible into common at any time before May 1, 1965 at rate of one preferred for each 1½ common.

National Co., Malden, Mass., recently backed by Easy Washing Machine Co., Syracuse (Clint Murchison) to extent of \$2,000,000 (Vol. 11:17), has elected as directors Mrs. H. Paul Nelligan, v.p. of Easy Washing Machine Co. and Howard W. Sluyter, associated with the Murchison Brothers in Texas.

* * * *

Loew's Inc., parent of MGM and biggest of movie producer-theatre firms (Vol. 11:17), earned net profit of \$3,274,451 (64¢ per share) on gross revenues of \$92,399,000 in 28 weeks ended March 17 compared to \$3,199,166 (62¢) on revenues of \$97,106,000 in corresponding 1954 period. For the 16 weeks ended March 17, net was \$1,753,102 (34¢) on gross of \$52,613,000 vs. \$2,065,273 (40¢) on \$56,096,000 in same 1954 period.

National Theatres Inc. reports net income for 6 months ended March 26 totaled \$1,280,549 (46¢ a share), compared with \$1,307,050 (47¢) same period last year. For quarter ended March 26, net income was \$734,133 (27¢) vs. \$651,468 (24¢) same 1954 period.

Stanley Warner Theatres reports, for 6 months ended Feb. 26, net profit of \$1,621,600 (73¢ on 2,208,680 shares), compared with \$1,191,400 (50¢ on 2,367,696) same period last year.

Twentieth Century-Fox income for 52 weeks ended Dec. 25 was \$115,715,815 compared to \$113,513,260 in comparable 1953 period. Earnings jumped to \$8,044,524 from \$4,560,887.

Paramount Pictures Corp. gross income in 1954 was \$110,069,588, net profit \$9,003,802 (\$4.10 per share) vs. \$112,803,066 & \$6,779,563 (\$3.06) in 1953.

Columbia Pictures reports net earnings of \$3,655,000 (\$4.37 a share) for 39 weeks ended March 26, vs. \$2,644,000 (\$3.12) for corresponding period last year.

— ■ —

Dividends: CBS "A" & "B" 3-for-1 stock split payable May 20 to stockholders of record April 29; Tung-Sol, 25¢ June 2 to holders May 20; Aircraft Radio, 20¢ May 25 to holders May 18; Globe-Union, 30¢ June 10 to holders June 1; Consolidated TV & Radio Broadcasters Inc. (Bitner group), 28¢ July 1 to holders June 15; RCA, 25¢ July 25 to holders June 17.

Ralph S. Euler, senior v.p., Mellon National Bank & Trust Co., Pittsburgh, appointed a director of Consolidated TV & Radio Broadcasters Inc. (Bitner group).

Network TV-Radio Billings

March 1955 and January-March 1955

(For February report see *Television Digest*, Vol. 11:15)

COMBINED NETWORK TV billings for first quarter fell just short of record \$100,000,000 total after CBS-TV climbed to new monthly high of \$16,036,896 and NBC-TV to record \$14,122,193 in March, according to Publishers Information Bureau report. The quarter's aggregate \$99,319,468 compared with \$74,208,152 in same 1954 period. Network radio, meanwhile, showed a substantial improvement in March—up about \$1,000,000 from Feb., but quarter's \$32,237,038 was still running about \$7,000,000 behind same 1954 period. The PIB figures:

	NETWORK TELEVISION			
	March 1955	March 1954	Jan.-March 1955	Jan.-March 1954
CBS	\$16,036,896	\$11,379,631	\$46,562,763	\$32,058,441
NBC	14,122,193	10,981,690	39,714,529	30,466,775
ABC	3,806,425	2,640,699	11,092,316	7,923,645
DuMont	628,625	1,205,526	1,949,860	3,759,291
Total	\$34,594,139	\$26,207,546	\$99,319,468	\$74,208,152

	NETWORK RADIO

* In order to maintain continuity and comparability with previously published data, an adjustment factor of 1.817 has been used by PIB in calculating gross network radio time charges for those nighttime network radio programs where ABC Rate Card No. 6 was in effect.

† Revised as of March 4, 1955.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers' Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 40%. However, they're generally accepted in the trade as an index.

Signs of good TV times: CBS first quarter sales & earnings, soon to be reported, will be ahead of year ago; last year's constituted record (Vol. 11:13) . . . CBS pres. Frank Stanton, personally, heads 399 Park Ave. Corp., planning big new office structure opposite modernistic Lever House, which probably accounts for rumors about projected "TV City" to occupy Park to Lexington Aves. between 53rd & 54th Sts. . . NBC has blueprinted office building opposite its big Burbank studios . . . Ziv TV business reported up 32% in first 1955 quarter from same 1954 period; it's closed corporation, so figures aren't made public . . . WRCA-TV, NBC-owned N. Y. key, which reputedly represents gross billings around \$20,000,000 (about same as CBS key WCBS-TV), reports 23% increase in time sales first quarter.

Rush of sponsors to be charter advertisers on NBC Radio's new *Monitor* week end radio service (Vol. 11:15) is reported by the network, which says it has sold nearly 500 1-min. participations, though program doesn't begin until June 12. Taking advantage of "introductory dividend plan" are such advertisers as Gruen, American Motors, Western Union, Carter Products, RCA, Mid-Continent Petroleum, Coppertone, Bronze Tan & Seaforth—said to account for total of \$450,000 in orders.

It's open season for "nominating" candidates for the FCC again, what with Comr. Hennock's term expiring June 30. White House isn't saying anything about names submitted, but President Eisenhower is expected to pick the Democratic nominee momentarily, and he must of course be persona grata to the Democratic leadership. One strongly-backed name definitely before Mr. Eisenhower is that of Richard Mack, chairman of the Florida Public Utilities Commission, endorsed by both Senators (one of whom, Sen. Smathers, is on Senate Interstate Commerce Committee) and by all Florida Congressmen save the single Republican member from St. Petersburg, Wm. C. Cramer, who has made no objection. Mr. Mack is from Coral Gables.

The \$3,000,000 sale of WNBC-TV, Binghamton, N. Y. (Ch. 12), with radio WNBC to Walter Annenberg's Triangle Publications by John C. Clark interests (Vol. 11:11) was approved by FCC this week. Agreement stipulates actual transfer will take place in 20 days, or by May 24, but closing date is not yet settled. It will be operated under direction of Triangle's WFIL-TV mgr. Roger W. Clipp, with gen. mgr. Geo. Dunham and other key personnel remaining at WNBC-TV. In addition to operating WFIL-TV & WFIL, Philadelphia, Annenberg also owns 50% of radio WHGB, Harrisburg, and publishes *Philadelphia Inquirer*, *New York Telegraph*, *TV Guide*, *Seventeen* and other publications.

Backlog of TV applications was principal subject of questioning by Sens. Magnuson (D-Wash.) and Saltonstall (R-Mass.) as FCC members appeared this week before Senate Appropriations subcommittee headed by Magnuson at preliminary hearing on budget for fiscal 1956. Chairman McConaughy said backlog can be cut down to the "hard core cases" if Senate approves full appropriation. House already has approved FCC budget, adding \$90,000 for processing backlog and \$80,000 for Commission study of networks, to the \$6,700,000 estimated in budget request (Vol. 11:14). Magnuson said he would call Commission back in about 2 weeks to discuss investigation and other "policy matters." He also said Govt. ought to get to work to provide suitable office space for FCC.

Control of KGNC-TV, Amarillo, Tex. (Ch. 4) & KGNC, together with *Amarillo News* and *Globe-Times* and *Lubbock Avalanche* and *Journal* and Lubbock radio KFYO is sought in application filed with FCC this week by Roy N. Whittenburg family which now owns 35.6%. Group proposes to increase holdings to 91.8% by acquiring 64,409 shares of Globe-News Pub. Co. for \$3,864,540 from Parker Prouty group. Wes Izzard would remain TV mgr. Feb. 28 balance sheet of Globe-News Pub. Co. lists \$8,308,296 total assets, \$1,228,072 current assets, \$703,392 current liabilities, \$5,439,831 surplus. Globe-News and subsidiaries show \$506,208 net earnings for 1953, \$277,173 for 1954. TV station lists \$1,026,461 total assets, \$1,044,519 current liabilities, \$119,267 deficit.

"Play Marco," bingo-type program conducted by KTLA, Los Angeles (Vol. 11:10) seems to be an illegal lottery, in eyes of FCC which this week told station it was scheduling "cease-&desist" hearing in which burden would be on KTLA to prove otherwise. However, station informed Commission it would drop program June 2—and it's presumed hearing will be called off, license renewed.

TV applications filed this week: For Miami, Ch. 10, by Storer Bestg. Co. (see p. 5); for Laredo, Tex., Ch. 8, by Midland, Tex. architect H. C. Avery Jr. & contractor David H. Cole. [For details, see *TV Addenda 20-Q* herewith; for complete listings of all grants, new stations, applications etc., see *TV Factbook No. 20* with Addenda to date.]

Russians celebrated May 7 as 60th anniversary of invention of radio by—guess who?—Alexander Popov.

SUMMARY-INDEX OF THE WEEK'S NEWS—May 14, 1955

HELP-UHF TAX BILL has little chance of passage this session in view of Administration's opposition to new tax legislation; telecasters push for action (p. 1).

BANKER ELECTED TO DuMONT board, presaging sale of one or both stations or else separate operation; plans for Electronicam this summer (p. 2).

SET MAKERS SITTING OUT subscription TV fight, with exception of pro-pay stand of Sylvania and opposition of those owning networks and stations (p. 3).

SUBSCRIPTION TV proponents have popular side of fight, a tough obstacle for opponents; FCC calm about deluge of mail, awaits formal arguments (p. 4).

CONGRESSIONAL PROBES into virtually all phases of TV broadcasting and manufacturing demanded as vote-conscious lawmakers eye "glamour" industries (p. 8).

"EXPLODING CONSUMER DEMAND" forecast at convention of security analysts; RCA strike vote authorized; fair trade repeal doubtful (p. 10).

CBS ACHIEVES RECORD revenues of \$104,206,067 for first quarter, profit of \$3,892,677 is highest in company's history (p. 13).

SINGLE CP GRANTED, to KWGB, Goodland, Kan., as FCC works on vhf drop-ins, channel shifts; CBS affiliation practices examined in Albany hearing (p. 9).

NEW STATIONS ABOUT TO GO into 3 non-TV towns: Twin Falls, Ida.; Rapid City, S. D.; Lafayette, La. Notes on shipments and other upcoming stations (p. 9).

RICHARD A. MACK, Florida utilities commissioner, definitely in line for FCC post to be vacated by Comr. Henneck June 30 (p. 14).

DIM OUTLOOK FOR UHF EXCISE TAX BILL: Against heavy odds, vhf & uhf telecasters embarked this week on full-steam campaign for a law to exempt all-channel TV receivers from the manufacturers' 10% Federal excise tax.

Virtually all Congressmen are familiar with plight of uhf -- and sympathetic -- but most key lawmakers hold out little hope for Congressional action this session. Biggest block is Administration's stated policy to consider no tax bills this year. Congress' determination to adjourn in July also raises the obstacle of time.

HR-4070, introduced by Rep. Ikard (D-Tex.), member of Ways & Means Committee, would provide the exemption, wiping out price differential between all-channel and vhf-only sets. Set manufacturers, meeting with the Senate Commerce Committee last month, endorsed measure, agreed it could cause vhf-only sets to disappear from the market (Vol. 11:10). Bill has been referred to Ways & Means Committee, which has asked Treasury Dept. to give its views on the measure.

Industry is currently concentrating its lobbying efforts on influential members of Ways & Means Committee and on the Treasury Dept. -- spokesman for the Administration on tax matters. NARTB is committed to support measure, and a group of powerful vhf telecasters backed the proposal at last year's Potter subcommittee uhf hearings. This week, NARTB govt. relations v.p. Ralph Hardy, officials of CBS & NBC and several other telecasters made separate visits to important members of the Ways & Means Committee -- spoke with Chairman Cooper (D-Tenn.) and Reps. Mills (D-Ark.), Boggs (D-La.), Simpson (R-Pa.), among others.

Their goal is to get Committee to schedule hearings. If hearings are on the calendar by time of NARTB convention May 22-26, it's evident that telecasters who converge on Washington at that time will be able to do some good by explaining to their individual Congressmen why the bill is needed.

* * * *

Industry representatives found Congressional reaction divided along party lines. Republicans, while sympathetic to bill's objectives, pointed to Administration's opposition to tax legislation this session -- particularly excise taxes. They pointed out that any excise tax action would be likely to bring pressure from every industry with an excise axe to grind.

Warmer reception came from Democrats. Generally, they felt public opinion was in favor of bill, and expressed view that if Ways & Means Committee approves measure it will easily sweep through the full House. But Chairman Cooper, while friendly, made no commitment on hearings.

Keystone to future of bill is Treasury Dept. attitude. Backers of bill point out that despite an immediate loss to the Govt. of \$75-\$100,000,000 in annual excise taxes, ultimate result will be far greater tax returns because of increase in number of taxpaying TV stations, employes, servicemen, etc.

A high Treasury official held out little hope for a favorable report. He told us it may still be some time before report is sent out. Declining to discuss the specific legislation, he outlined his department's policy on excises:

"I don't see how the Treasury can back any changes in excise taxes, in view of the President's recommendations that there should be no changes in this field this year. The Administration is very strongly against any patchwork changes in the tax structure, but believes the whole excise tax field is due for a complete overhaul -- wants to take a look at the whole thing, possibly next year. I suspect, too, that Congress is not eager to get into taxes at this time."

To avoid "special interest" label, set makers are generally staying aloof from lobbying on bill, though RETMA and an overwhelming majority of TV manufacturers have endorsed it. Its proponents stress that it's not a "tax relief" or "special interest" bill, will put no money in pockets of set makers. Rather, they say, it's "broad public interest" legislation to remove an artificial restriction to growth of nationwide competitive TV system by encouraging the public to buy "a complete TV set" -- one with all 83 channels.

* * * *

While endorsement of Ikard Bill is virtually universal throughout the industry, unreserved enthusiasm for it is not. Some uhf telecasters express fear that the measure is being regarded as the be-all-&-end-all for uhf. They back the bill, but call it "little more than a palliative," and urge that equal attention be given to such questions as program and network availability, competition in intermixed areas, cost and performance of uhf transmitters, allocation problems, etc.

One active uhf telecaster group, UHF Industry Coordinating Committee, headed by Harold Thoms (WISE-TV, Asheville, N.C.), has called meeting of uhf operators May 22 in Washington, to discuss easing of equipment payments, deintermixture, addition of vhf assignments, "market straddling," AT&T network costs and private microwaves, production of all-channel sets, obtaining network programs, subscription TV.

Summing up chances for all-channel tax exemption, those who visited Congressmen put it this way: Odds are heavily against passage this session, but educational work being done now may turn the tide next year.

NEXT PROBABLE STEPS IN DuMONT SHAKEUP: Armand G. Erpf, a partner in Wall Street investment house of Carl M. Loeb, Rhoades & Co., was elected this week to replace Bruce T. DuMont on the board of directors of Allen B. DuMont Laboratories Inc., as predicted (Vol. 11:9) -- and it can now be assumed the board not only will seek to resolve DuMont-Paramount policy differences but will undertake to:

(a) Sell one or both of the remaining TV stations (WABD, New York & WTTG, Washington) as well as the valuable big Tele-Centre on East 67th St., or

(b) Spin off the telecasting properties from the TV-electronics manufacturing business, and place their ownership in the hands of DuMont stockholders. This is the plan first favored by Mr. Erpf, presently on a 2-week trip to England.

Either way, the DuMont Network as such, already curtailed to a mere hookup of the N.Y. & Washington stations, ready for expansions as ordered but with only 6 "network" sponsors remaining, seems doomed to extinction -- unless revived by a buyer.

There have been conversations looking to sale of the properties, but nothing came of them, though at one juncture it looked like a N.Y. combine was ready to pay \$11,000,000 for the "package". Another valuation had \$5,500,000 on WABD, \$3,500,000 on WTTG, \$1,000,000 for the Tele-Centre.

The bankers, perhaps eyeing the successful ownership of stations by other big industrial corporations, are said to be inclined to the belief that the 2 stations can be operated profitably as independents, hence should be spun off. But the Washington station has been a loser, though is said to be holding its own now, and may be sold separately; several local broadcasting interests have approached DuMont, but none felt \$3,500,000 evaluation justified by past, present or potential earnings.

* * * *

DuMont's Electronicam TV-filming system, which can produce theatre-quality film at the same time it shoots a live TV show and which was first discussed as the basis for a "film network" (Vol. 11:16), will become available this summer on a lease basis, terms still undetermined, in both 16 & 35mm versions. DuMont is unlikely itself to go into the film production and syndicating business, but will make device available to film makers on a lease-&-service basis along the lines of IBM with its large business machines & computers.

For Hollywood, educational & govt. uses, leasing will be arranged through the DuMont plant at Clifton, N.J. Pilot 16mm Electronicam is now in use at Tele-Centre, where some educational films are being made for the Educational TV & Radio Center at Ann Arbor, Mich. James L. Caddigan is in charge, reporting to Ted Bergmann.

Compared with conventional film-making methods, Electronicam is said to cut production costs in half. One labor question apparently was solved this week when DuMont signed pact with Screen Actors Guild providing same pay scale that prevails in the TV film industry -- somewhat higher than AFTRA's live & kinescope TV rates.

FEW MANUFACTURERS CONCERNED ABOUT FEE TV: Most setmakers have little to say about pay-as-you-look TV, for few see how it affects them one way or the other. Those owning networks or stations -- like RCA and CBS -- have shown their aversion to it. But others prefer not to get into a hassle over something which they feel holds no dangers -- though some are a bit irked by fact that Zenith "is getting a priceless amount of free publicity and advertising," as one of them put it. (Other interests continue to have plenty to say about it, meanwhile -- see p. 5.)

We queried a score of top manufacturers, have an even dozen replies to date, and foregoing is the pattern of responses from those with no telecasting interests. There was one exception -- and he, incidentally, was the only one who agreed to let us quote him by name. Here's what Sylvania chairman-president Don G. Mitchell thinks:

"There is no question but that programming costs have reached the point where they are acting as a major deterrent to broadening the scope and increasing the quality of TV programs...The major consideration seems to be that any potential solution to the over-all cost problem now confronting the broadcasters and sponsors deserves most careful consideration, and specifically, that subscription TV field tests should be authorized so that reasonably conclusive evaluation can be made.

"Under the American free market system, the consumer or purchaser makes his choice every day -- not only to buy or not to buy, but which brand he will buy. There is nothing basically different about subscription TV; if it is not sound and there is no demand for it, the public will not buy it."

Contrary view is expressed by a manufacturer who is also a telecaster. He says: "I never agreed with either Comdr. McDonald or Dr. Millard Faught...No prediction that either has made about the inability of our present system of TV to provide service has been proven true, and yet every year those of us who pioneered in TV have been told that we are doing something that could not be possible.

"The most recent approach by Zenith, whereby stations would take on 'phone-vision' for a couple of peak hours each day only for paid subscribers is simply ridiculous. We spend tremendous amounts of money to build audiences and I can not conceive of getting anything out of Zenith during these periods, when we are off the air and denying the public our service and the service to which they are entitled under our license, to recompense us for entering into any such ridiculous situation."

Another manufacturer puts it this way: "I am all for doing anything that will enable us to sell more equipment or that will give the customer better programs, which will enable us to sell more equipment. But I haven't been convinced yet (a)

that subscription TV will do this, or (b) that anyone has a practical approach to the technical, legal and social problems that subscription TV raises."

Not much interested in toll TV per se, but concerned about "side effects," another set maker observed: "My opinion is that we can take it or leave it. I doubt whether the proponents can put it over. In the meantime, too much publicity may be another deterrent to TV sales as many people are not very analytical in their reading and may think that it's another new device that will obsolete their current TV investment. I think a clarification to the public on this would be in order."

Another is dubious, saying: "The thought of putting slot machines in every American home, and expecting people to pay for something whose only present cost is the slight irritation of a commercial, appears rather impractical."

Rest of them are staying out of the squabble for the present, making such comments as: "Have not crystallized my thinking." "Haven't formulated a policy." "It is rather unusual to find me not vocal about almost anything, but I should like to stay out of the middle of this particular subject." "Do not actually have any real definite opinion." "Not sufficiently familiar with the matter."
